Application of Securities and Exchange Commission.

IN THE

DISTRICT COURT OF THE UNITED STATES

FOR THE DISTRICT OF DELAWARE.

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY.	A Proceeding to Enforce a Plan Pursuant to Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935. Civil Action No. 995. (Filed Jan. 9, 1947)

TO THE HONORABLE THE JUDGES OF THE DISTRICT COURT OF THE UNITED STATES FOR THE DISTRICT OF DELAWARE:

The Securities and Exchange Commission, by its attorneys, Harry G. Slater and Bernard S. Kanton, respectfully states:

Application of Securities and Exchange Commission (Cont'd)

(1) The applicant, Securities and Exchange Commission (hereinafter sometimes referred to as the "Commission") is an agency and instrumentality of the United States created by and organized pursuant to Section 4 of the Securities Exchange Act of 1934, being Title I of the Act approved June 6, 1934, 48 Stat. 885, 15 U. S. C. Sec. 78(d).

(2) This application is made pursuant to the authority vested in the Commission and the jurisdiction vested in this Court by Sections 11(e), 18(f) and 25 of the Public Utility Holding Company Act of 1935 (hereinafter sometimes referred to as the "Act"), being Title I of an Act of Congress approved August 26, 1935, Stat. 803, 15 U. S. C., Sec. 79(a) *et seq.*

(3) Engineers Public Service Company (hereinafter sometimes referred to as "Engineers") is a corporation organized under the laws of the State of Delaware, and is a holding Company within the meaning of Section 2(a)(7) of the Act. Engineers has filed notification of registration under Section 5(a) of the Act and is a registered holding company under the Act.

(4) El Paso Electric Company (hereinafter sometimes referred to as "El Paso") is a corporation organized under the laws of the State of Texas and is a public utility company within the meaning of Section 2(a)(5) of the Act. El Paso is also a subsidiary of Engineers within the meaning of Section 2(a)(8) of the Act.

(5) Gulf States Utilities Company (hereinafter sometimes referred to as "Gulf States") is a corporation organized under the laws of the State of Texas and is a public utility company within the meaning of Section 2(a)(5) of the Act. Gulf States is also a subsidiary of Engineers within the meaning of Section 2(a)(8) of the Act.

(6) Virginia Electric & Power Company (hereinafter sometimes referred to as "Virginia") is a corporation

Application of Securities and Exchange Commission (Cont'd)

organized under the laws of the State of Virginia and is a public utility company within the meaning of Section 2(a)(5) of the Act. Virginia is also a subsidiary of Engineers within the meaning of Section 2(a)(8) of the Act.

(7) On September 16, 1942 and October 6, 1942, after notice and opportunity for hearing, the Commission in a proceeding instituted by it, pursuant to the provisions of Section 11(b)(1) of the Act directed, in substance, that Engineers sever its relationship with certain of its subsidiary companies by disposing of its direct and indirect ownership, control, and holding of securities issued and properties owned, controlled or operated by certain of its subsidiary companies. A petition to review the Commission's orders of September 16, 1942 and October 6, 1942 was filed subsequently with the United States Court of Appeals for the District of Columbia, which Court, reserving, in part, the determination of the Commission, set aside the orders of the Commission and remanded the case to the Commission for further proceedings in accordance with its opinion. Both the Commission and Engineers applied to the Supreme Court of the United States for writs of certiorari which were granted. A decision of the Supreme Court has been delayed for lack of a quorum. In the meantime, Engineers has partially complied with said orders of the Commission by disposing of certain of the investments ordered divested. At the present time, Engineers' assets consist of investments in El Paso, Gulf States, and Virginia, and cash.

(8) On September 10, 1945, Engineers filed an application with the Commission, pursuant to Section 11(e) of the Act, for approval of a plan designed to effectuate compliance with the provisions of Section 11(b) of the Act and with the orders of the Commission dated September 16, 1942 and October 6, 1942, said plan providing in substance for the disposition of Engineers' interest in El Paso and

Application of Securities and Exchange Commission (Cont'd)

Gulf States and for the dissolution and liquidation of Engineers. El Paso and Gulf States filed related declarations pursuant to Section 7 of the Act for the purpose of facilitating the effectuation of such plan.

(9) On October 15, 1945, the Commission issued its notice of and order for hearing on said plan and related declarations, in a consolidated proceeding, directing that notice of such hearing be given to all security holders of Engineers by mailing to each of said persons a copy of said order for hearing at least 15 days prior to the date of hearing. Notice of said order for hearing was also published in the Federal Register, published by the Commission as Holding Company Act Release No. 6131 (a copy of which is attached hereto and marked "Exhibit A"), was mailed to all persons on the Commission's mailing list for releases under the Act, and was released to the press. The requirements of the Commission's order as to the giving of said notice to such persons were complied with.

(10) Public hearings were duly held from time to time, briefs were filed, and the Commission heard oral argument on the plan and the related declarations. On December 4, 1946, the Commission issued its Findings and Opinion in which it found that the disposition of Gulf States and El Paso and the dissolution of Engineers were necessary to effectuate the provisions of Section 11(b), but that various aspects of the transactions proposed to accomplish these results were unnecessary, and unfair and inequitable. The Commission further stated that if the plan were amended within a period of 30 days, in accordance with modifications which it suggested, an appropriate order would be entered approving the plan as thus amended. Said Findings and Opinion of the Commission was published as Holding Company Act Release No. 7041, a copy of which is attached hereto and marked "Exhibit B".

Application of Securities and Exchange Commission (Cont'd)

(11) On December 17, 1946, for the purpose of complying with the modifications suggested in the Findings and Opinion of the Commission dated December 4, 1946, Engineers filed an amended plan, El Paso and Gulf States filed amended declarations and Virginia filed a declaration pursuant to Section 7 of the Act. On December 31, 1946, Engineers filed a further amendment to its plan. A copy of the plan as amended to December 31, 1946, is attached hereto and marked "Exhibit C" and will hereinafter be referred to as "the amended plan".

(12) Pursuant to the Notice and Order of the Commission dated December 19, 1946, the record was reopened for hearing and argument before the Commission. A copy of said Notice and Order was sent to all stockholders of record of Engineers at least 10 days before said hearing and argument. Notice was given to all other persons by publication of said Notice and Order in the Federal Register. Said Notice and Order was also published by the Commission as Holding Company Act Release No. 7077 (copy of which is attached hereto and marked "Exhibit D"), was mailed to all persons on the Commission's mailing list for releases under the Act, and released to the press. Such reconvened hearing and argument were completed, and the record in the matter closed, on January 3, 1947.

(13) On January 8, 1947, the Commission entered its Supplemental Findings and Opinion and Order, finding the amended plan necessary to effectuate the provisions of Section 11(b) and fair and equitable to the persons affected thereby, and approving the amended plan. Said Supplemental Findings and Opinion of January 8, 1947 was published as Holding Company Act Release No. 7119 (copy of which is attached hereto and marked "Exhibit E").

(14) The amended plan fully set forth in Exhibit C herein provides in substance for the disposition by Engi-

Application of Securities and Exchange Commission (Cont'd)

neers of its interests in El Paso, Gulf States and Virginia; the retirement of the preferred stocks of Engineers at $110 per share and accrued dividends in the case of the $5.50 and $6 preferred stocks and at $105 per share and accrued dividends in the case of the $5 preferred stock; and the liquidation and dissolution of Engineers.

(15) Engineers has requested the Commission to apply to a United States District Court in accordance with the provisions of Sections 11(e) and 18(f) to enforce and carry out the provisions of the amended plan and the Commission makes this application pursuant to such request.

(16) Pending a final order herein, the institution of any action or proceeding in this or any other forum by or on behalf of Engineers or its security holders or any other person with respect to any of the actions or transactions encompassed by the amended plan or the Commission's Order of January 8, 1947, would interfere with or tend to interfere with compliance with said Order and the orderly enforcement of the amended plan in this Court and would result in unnecessary expense and delay.

WHEREFORE, applicant respectfully prays that the Court, in accordance with the provisions of Section 11(e) of the Act, take the following action:

(a) Hold a hearing on this application;

(b) Order Engineers to give such notice of said hearing to its security holders, to the participants in the proceedings before the Commission, and to other persons, as the Court may deem appropriate;

(c) Enjoin, during the pendency of these proceedings, all security holders of Engineers and all other persons from doing any act or taking any action interfering with, or tending to interfere with, these proceedings or with the

Application of Securities and Exchange Commission (Cont'd)

carrying out of the amended plan, and compliance with the Order of the Commission approving it, including the commencement or prosecution of any action, suit or proceeding at law or in equity or under any statute in any Court or before any executive or administrative officer, commission or tribunal, other than such proceedings before the Commission or this Court or the Circuit Court of Appeals as may be appropriate under the Act or the Rules and Regulations promulgated thereunder;

(d) After notice and opportunity for hearing, approve the amended plan as fair and equitable and appropriate to effectuate the provisions of Section 11(b) of the Act, and to such extent as the Court deems necessary for the purpose of carrying out the terms and provisions of the amended plan, take exclusive jurisdiction and possession of Engineers and its assets wherever located;

(e) Enter an appropriate order enforcing and carrying out the terms and provisions of the amended plan and directing Engineers and its officers, directors and agents to take such steps and do such acts as may be necessary for the purpose of carrying out the terms and provisions of the amended plan and such order of the Court;

(f) After approval of the amended plan, enjoin all security holders of Engineers and all other persons from doing any action or taking any action interfering with or tending to interfere with these proceedings, with the enforcement of said Order of the Commission or with the carrying out of the amended plan, including the commencement or prosecution of any action, suit or proceeding at law or in equity or under any statute in any court or before any executive or administrative officer, commission or tribunal, other than such proceedings before the Commission or this Court or the Circuit Court of Appeals as may

be appropriate under the Act or the Rules and Regulations promulgated thereunder;

(g) Grant such other, further and different relief and enter such other orders or decrees as the Court may find to be just and equitable in the premises.

SECURITIES AND EXCHANGE COMMISSION
PHILADELPHIA

HOLDING COMPANY ACT OF 1935
Release No. 6131

October 15, 1945

The Commission today issued its Notice of Filing and Order. (Holding Company Act Release No. 6131) directing that a hearing on the plan recently filed by Engineers Public Service Company be held on November 13, 1945. In connection with the issuance of such notice, a copy of which is

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

annexed hereto, the Commission made the following statement:

> "On September 10, 1945, Engineers Public Service Company, a registered holding company, filed a plan pursuant to Section 11 (e) of the Public Utility Holding Company Act of 1935 for divestment of its interests in Gulf States Utilities Company and El Paso Electric Company, the retirement of its preferred stock, and other related matters. The plan, however, refers to review proceedings now pending in the Supreme Court of the United States with respect to Engineers Public Service Company and states that it is not expected that any portion of the plan will be consummated until after the Supreme Court's decision. At the present time no specific date has been set for oral argument in the matter before the Supreme Court, although it is understood that argument may be ordered for a date in November. Moreover, while the plan provides that court approval and enforcement by a United States District Court is a condition to consummation, no request for court enforcement has yet been made. Under the provisions of Section 11 (e) of the Act the plan cannot be enforced by a United States District Court unless Engineers Public Service Company requests such enforcement.
>
> "In view of the foregoing some doubt has existed as to whether, at the present time, the plan should be set down for hearing. However, we have decided that hearings on the plan should commence on November 13, 1945. We have reached this decision because we realize that proceedings will be necessarily time consuming and that the period prior to the decision of the Supreme Court might well be utilized profitably if the proceedings were gotten under way at this time."

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

SECURITIES AND EXCHANGE COMMISSION

Philadelphia

HOLDING COMPANY ACT OF 1935

Release No. 6131

UNITED STATES OF AMERICA

BEFORE THE SECURITIES AND EXCHANGE COMMISSION

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 15th day of October, A. D., 1945.

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY File No. 54-132 EL PASO ELECTRIC COMPANY File No. 70-1149 GULF STATES UTILITIES COMPANY File No. 70-1150 (Public Utility Holding Company Act of 1935)	Notice of Filing of Plan Under Section 11(e) of the Act and Declarations to Effectuate Related Transactions, Order Consolidating Proceedings, and Order for Hearing on Consolidated Matters.

The Commission having previously instituted proceedings pursuant to Section 11(b)(1) of the Public Utility Holding Company Act of 1935 (File No. 59-4) with respect to Engineers Public Service Company (Engineers), a registered holding company, and each of its subsidiaries, to

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

determine what action is necessary in order that the Engineers holding company system shall so limit its operations as to comply with the standards of that Section; and

The Commission having entered orders on July 23, 1941, December 29, 1941 and September 16, 1942, pursuant to Section 11(b)(1) of the Act, directing Engineers to sever its relationship with certain of its subsidiary companies by disposing or causing the disposition of its direct and indirect ownership, control and holding of securities issued and properties owned, controlled or operated by certain of its subsidiary companies; a petition to review the Commission's order of September 16, 1942 having been filed with the United States Court of Appeals for the District of Columbia, which Court set aside the order of the Commission and remanded the case to the Commission for further proceedings in accordance with its opinion; and both the Commission and Engineers having applied to the Supreme Court of the United States for writs of certiorari which have been granted and before which Court the review proceeding is now pending; and Engineers having partially complied with such orders of the Commission by disposing of certain investments ordered divested therein, but still retaining investments in four public utility subsidiaries, namely, El Paso Electric Company (El Paso), Gulf States Utilities Company (Gulf States), Virginia Electric and Power Company (Virginia) and The Western Public Service Company (Western);

NOTICE IS HEREBY GIVEN that Engineers has filed an application for approval of a plan pursuant to Section 11(e) of the Public Utility Holding Company Act of 1935 for the divestment of its interests in El Paso and Gulf States; and that El Paso and Gulf States, for the purpose of facilitating the effectuation of such plan, have filed declarations pursuant to Section 7 of said Act regarding the reclassification of their respective shares of common stock. The plan consists of Parts I, II, and III and separate orders are

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

requested on each of said Parts. It is stated that it is not expected that any portion of this plan shall be consummated until after the decision of the Supreme Court in the review proceeding referred to above. The plan, as filed, does not contain any request for court enforcement.

All interested persons are referred to said documents which are on file in the offices of this Commission for a statement of the transactions therein proposed, which are summarized below:

Part I of the plan provides for the following transactions:

1. Engineers proposes to borrow $3,000,000 from a bank, such loan to be evidenced by a two-year note, payable $750,000 semi-annually. The loan agreement is to contain a provision for the borrowing of additional amounts, if needed, which provision is to be availed of in the event Western is not sold before the effective date of Part I of the plan or for any other reason. The agreement is to provide further that Engineers shall not, until the bank note is fully paid, pay any dividends in cash on its common stock.

2. Engineers then proposes to mail warrants to its common stockholders, each of which warrants will evidence the right to acquire from Engineers one share of Gulf States common stock for each share of Engineers common stock at the rate of $11.50 per share to be payable in cash or by exchanging whole shares of Engineers preferred stock at the rate of $100 per share plus accrued dividends, with a cash payment for the difference between the exchange value of Engineers preferred stocks and Gulf States common stock, provided, however, that Engineers may withhold the mailing of such warrants in the event that, in its opinion, market conditions are such as to render it inadvisable to proceed with the issuance of such warrants. The warrants must be exercised on or before a specified date (to be approximately ten days after the mailing of the warrants).

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

Upon the mailing of such warrants, Part I of the plan is then to be deemed effective. All warrants will be registered in the names of the common stockholders and will be transferable on the books of Engineers. Such warrants will be issued and distributed without the surrender by the common stockholders of Engineers of their common stock. Furthermore, any holder of Engineers preferred stock who surrenders such stock in exchange for Gulf States common stock will be entitled to receive, in respect to such surrendered shares, the same amount, if any, which preferred stockholders depositing their stock under the provisions of the following paragraph herein receive, in addition to $100 a share. To the extent warrants are not exercised, Engineers will sell the shares of Gulf States common stock represented thereby as promptly thereafter and in such manner as the Board of Directors of Engineers deems to be in the best interest of Engineers, subject to the obtaining of the requisite regulatory approvals.

3. Engineers will deposit an amount equal to $100 per share plus accrued dividends for each share of Engineers preferred stock not surrendered in exchange for Gulf States common stock as provided in paragraph 2 above (which sum is to be realized from the bank loan, the exercise of the warrants and the remaining balance from treasury cash) in trust with a bank or trust company for the benefit of its preferred stockholders. Five days prior to such deposit notice will be given to the preferred stockholders and will state that upon surrender of the preferred stock certificates to a Transfer Agent, the preferred stockholders will be paid $100 per share plus accrued dividends; and from and after the date of such deposit, dividends on the preferred stock are to cease. Thereafter the only right remaining to the registered holder of a preferred stock certificate will be the right to receive an additional amount if any as is determined to be payable as provided in Part II below.

Exhibit A to Application of Securities and Exchange Commission (Cont'd).

4. Engineers will distribute as a dividend in partial liquidation its portfolio holdings of common stock of El Paso pro rata to the common stockhloders of Engineers on the basis of 1/5th of a share of El Paso common stock for each share of common stock of Engineers. No fractional shares of common stock will be issued or delivered, but in lieu thereof scrip will be issued and delivered. Such scrip will not be entitled to dividends, voting rights or any other stockholders' rights. When combined in lots aggregating one or more full shares of stock, scrip may, up to the date of sale of such shares of stock, be exchanged for such shares, together with any dividends which shall have been paid to stockholders of record on any date subsequent to the effective date of Part I of the plan. Engineers proposes to undertake to provide facilities whereby any holder of scrip certificates may dispose of such scrip, or acquire additional scrip so as to enable the holder to exchange such scrip for full shares of stock. All shares of stock reserved for issuance and delivery upon the exchange of scrip which shall not have been issued or delivered in connection with such exchange within two years after the effective date of Part I, shall, promptly after the expiration of such period, be sold by the Transfer Agent and the Transfer Agent shall, as soon as possible thereafter, distribute to the holders of scrip certificates not theretofore surrendered their proportionate part of the proceeds of sale, plus their proportionate part of any dividends which shall have been declared to holders of record as of a date prior to the date of sale.

5. In order to provide a reserve for the payment, if any, to which Engineers' preferred stockholders shall be held to be entitled in addition to $100 per share and accrued dividends, Engineers will retain its interest in the Virginia common stock until a final determination is so made.

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

6. Epsco, Inc., a mutual service company for the Engineers holding company system, will cancel its service contracts with Engineers, Virginia, El Paso, and Gulf States.

The plan provides that the consummation of Part I of the plan is dependent upon the satisfaction of certain conditions, among others, as follows:

> (a) the Commission, when requested by Engineers, shall have instituted a proceeding in a court of competent jurisdiction pursuant to Section 11(e) of the Act and such court shall have entered a separate decree or order finding Part I of the plan to be fair and equitable and appropriate to effectuate the provisions of Section 11 of the Act and such court shall have taken action to enforce and carry out the terms and provisions of Part I of the plan;
>
> (b) there shall have been obtained from the United States Treasury Department (unless Engineers, in its discretion, shall waive this condition) a closing agreement or ruling or closing agreements or rulings as to the tax consequences of the transactions necessary to carry out Part I of the plan and such agreements or rulings shall be satisfactory to counsel for Engineers; and
>
> (c) any corporate action in connection with Part I of the plan, which may be deemed necessary by counsel for Engineers shall have been carried out in a manner satisfactory to such counsel.

Part II of the plan requests that the Commission issue a separate order finding that it is fair and equitable that no amount in addition to $100 per share and accrued dividends be paid the Engineers preferred stockholders. However, it is provided that if the Commission finds and orders that some additional amount shall be paid to the preferred stockholders of Engineers, then and in such event Part II of

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

the plan becomes automatically amended so as to provide that Engineers shall pay its preferred stockholders such additional amount as the Commission shall have so specified; provided, however, that Engineers reserves the right to petition for a review of any such order.

Part III provides that within one year after all liabilities of Engineers have been finally determined and liquidated, Engineers will be legally dissolved and liquidated, with the remaining common stock of Virginia and the other remaining assets of Engineers being distributed pro rata to the Engineers common stockholders, or Engineers will be merged with Virginia with the Engineers common stockholders receiving their pro rata interest in the merged company. The details of Part III are to be supplied at a later date by amendment to this Part of the plan.

The plan provides that the consummation of Part III of the plan is dependent upon the satisfaction of certain conditions, among others, as follows:

> (a) there shall have been obtained from the United States Treasury Department (unless Engineers, in its discretion, shall waive this condition) a closing agreement or ruling or closing agreements or rulings as to the tax consequences of the transactions necessary to carry out Part III of the plan, and such agreements or rulings shall have been satisfactory to counsel for Engineers; and
>
> (b) any corporate action in connection with Part III of the plan which may be deemed necessary by counsel for Engineers shall have been carried out in a manner satisfactory to such counsel.

Engineers has requested the Commission to issue appropriate orders and findings in connection with the proposed transactions hereinabove described in Parts I and III of the plan to conform and contain the recitations and

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

requirements of Supplement R and Section 1808(f) of the Internal Revenue Code, as amended.

In connection with the proposed reclassification of the common stocks of El Paso and Gulf States so as to enable Engineers to effectuate properly the carrying out of paragraphs 2 and 4 of Part I of the plan above, El Paso and Gulf States have filed with the Commission separate declarations under Section 7 of the Act requesting, in effect, that the Commission issue orders at the same time or prior to the time it issues orders under Part I of the plan so as to enable both companies to amend their respective charters prior to the consummation of Part I of the plan.

El Paso proposes in its filing (File No. 70-1149) to amend its charter in order to change its presently authorized 150,000 shares of no par value common stock which are presently outstanding and held by Engineers into 381,994 shares of no par value common stock.

Gulf States proposes in its filing (File No. 70-1150) to amend its charter in order to (1) decrease its presently authorized 300,000 shares of no par value common stock by eliminating therefrom 20,000 shares of no par value common stock not heretofore issued and not now outstanding, (2) change the authorized 280,000 shares of no par value common stock which are presently outstanding and held by Engineers into 1,909,968 shares of no par value common stock and (3) change the voting rights of the holders of 120,000 shares of preferred stock of Gulf States now issued and outstanding so that in lieu of one vote per share of preferred stock, each share of preferred stock shall be entitled to seven votes.

El Paso and Gulf States have also requested the Commission to issue appropriate orders and findings in connection with the proposed transactions described above to conform and contain the recitations and requirements of Supplement R and Section 1808(f) of the Internal Revenue Code, as amended.

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

It appearing to the Commission that the proceedings with respect to said plan and said declarations are related to and involve common questions of law and fact and therefore should be consolidated; and

It further appearing to the Commission that it is proper and in the public interest and in the interest of investors and consumers that a hearing be held with respect to said plan and said declarations, and that said plan should not be approved and that said declarations should not become effective, except pursuant to further order of the Commission; and

It further appearing appropriate in view of the Commission's order of September 16, 1942 and of the provisions of Section 11(d) with respect to court enforcement of such an order, to provide opportunity for hearing, as part of these consolidated proceedings, as to whether the Commission should approve any plan of reorganization of Engineers that may be hereafter proposed by the Commission in the first instance or by any person having a bona fide interest in the reorganization;

It is Hereby Ordered that the proceedings on the plan (File No. 54-132) and the declarations (Files Nos. 70-1149 and 70-1150) be, and hereby are, consolidated.

It is Further Ordered that a hearing be held at 10:00 A. M., E. S. T., on the 13th day of November, 1945, at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania, in such room as may be designated on such day by the hearing room clerk in Room 318. All persons desiring to be heard or otherwise wishing to participate in the proceedings should notify the Commission in the manner provided by its Rules of Practice, Rule XVII, on or before the 9th day of November, 1945.

It is Further Ordered that Allen MacCullen or any other officer or officers of the Commission designated by it

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under Section 18(c) of said Act and to a trial examiner under the Commission's Rules of Practice.

IT IS FURTHER ORDERED that, without limiting the scope of the isues presented in the consolidated proceedings, particular attention will be directed at the hearing to the following matters and questions:

1. Whether the plan, as proposed or as modified, is necessary to effectuate the provisions of Section 11(b) of the Act and is, in all respects, fair and equitable to the persons affected thereby.

2. Whether the proposed retirement of the $5, $5.50 and $6.00 Preferred Stocks of Engineers at $100 per share plus accrued dividends without payment of any amount in excess thereof is necesary to effectuate the provisions of Section 11(b) and fair and equitable to the persons affected thereby, and, if not, what payment for the retirement of such preferred stocks would be fair and equitable.

3. Whether the securities proposed to be issued by El Paso and Gulf States meet the requirements of Section 7 of the Act.

4. Whether the proposed issuance of a $3,000,000 bank note and the proposed issuance of warrants by Engineers are necessary to effectuate compliance with Section 11(b) and conform with the standards of Section 7.

5. Whether the plan should be modified to include a provision for the payment by Engineers of all fees and expenses by whomsoever incurred in connection with said plan or the proceedings with respect thereto which the Commission may determine, award, allow or allocate and whether the fees and expenses to be paid in connection with the consummation of

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

the plan and all transactions incidental thereto are for necessary services and are reasonable in amount.

6. Whether the accounting entries in connection with the proposed transactions are in conformity with the standards of the Act and the Rules promulgated thereunder.

7. Whether, in the event the Commission shall approve such plan as filed or modified, the Commission shall approve such plan for purposes of Section 11(d) of the Act so as to permit the Commission on its own motion and irrespective of request therefor on the part of Engineers, to apply to a court for enforcement of such plan pursuant to Section 11(d), or whether, in the event that the Commission shall not approve such plan as filed or as modified, a plan proposed by the Commission or by any person having a bona fide interest in the reorganization of Engineers should be approved by the Commission for purposes of Section 11(d), and, if proposed by the Commission, what the terms and provisions of such plan should be.

8. Whether, if the transactions proposed are authorized by the Commission, it is appropriate in the public interest and in the interest of investors and consumers that any terms and conditions be imposed in connection with such authorization and, if so, what such terms and conditions should be.

9. Generally, whether the proposed plan and all transactions incidental thereto are, in all respects, in the public interest and in the interest of investors and consumers and consistent with all applicable requirements of the Act and the Rules thereunder.

It is Further Ordered that jurisdiction be reserved to separate, either for hearing, in whole or in part, or for disposition, in whole or in part, any of the issues, questions or matters herein set forth or which may arise in

Exhibit A to Application of Securities and Exchange Commission (Cont'd)

these proceedings or to consolidate with these proceedings other filings or matters pertaining to the subject matter of these proceedings, and to take such other action as may appear conducive to an orderly, prompt and economical disposition of the matters involved.

IT IS FURTHER ORDERED that notice of this hearing be given to Engineers, El Paso and Gulf States and to all other interested persons, said notice be given to Engineers, El Paso and Gulf States by registered mail and to all other interested persons by publication in the Federal Register.

IT IS FURTHER ORDERED that Engineers give notice of this hearing to all its stockholders of record by mailing a communication giving the date, hour and place of hearing to each of said persons at his last known address at least 15 days prior to the date of the hearing and also advising that the company will, if requested, furnish copies of this Notice and Order for Hearing to said persons.

By the Commission.

ORVAL L. DUBOIS,
Secretary.

GULF STATES UTILITIES COMPANY
File No. 70-1150
(Public Utility Holding Company Act of 1935)

Findings and Opinion of the Commission

SIMPLIFICATION OF HOLDING COMPANY SYSTEM

Plan Under Section 11(e)—Necessity

Where a plan under Section 11(e) of the Act provides for liquidation of holding company through sale of portion of portfolio by means of warrants and distribution of balance *pro rata* among common stockholders with eventual dissolution of holding company, *held,* that plan is "necessary" to effectuate the provisions of Section 11(b) within the meaning of Section 11(e) of the Act.

Where after distribution and sale of its portfolio, holding company will remain with a single subsidiary and serve no useful purpose, *held,* that holding company would unnecessarily complicate the structure of the holding company system under the standards of Section 11(b)(2) and that a

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

plan submitted under Section 11(e) for liquidation and dissolution of the holding company is "necessary" to effectuate the provisions of Section 11(b) within the meaning of Section 11(e) of the Act.

Where Section 11(e) plan for liquidation of holding company provides that a portion of the funds needed to complete the plan will be obtained by means of bank loan, and where it appears that such loan will delay compliance with the Act and that funds can be obtained from other sources without such delay, *held,* that provision for bank loan is not "necessary" to effectuate the provisions of Section 11(b) and cannot be approved.

Where Section 11(e) plan provides that holding company serving no useful purpose will dissolve immediately but will continue for an indefinite period as a trusteeship during which time it will hold a substantial portfolio of securities and function as a registered holding company and where under the circumstances it does not appear that there is adequate justification for delaying compliance with the Act, *held,* that the trusteeship as proposed is not "necessary" to effectuate the provisions of Section 11(b) and cannot be approved.

Plan Under Section 11(e)—Fairness and Equity

Where plan under Section 11(e) provides that on liquidation of holding company to comply with Section 11(b) the preferred stock will be retired at the charter-involuntary liquidation price, *held,* that the plan is unfair and inequitable to persons affected thereby and cannot be approved where the fair investment value of the preferred stock, apart from the process of liquidation under the Act, is in excess of that price.

Plan Under Section 11(e)—Fees and Expenses

The Commission has jurisdiction over the payment of fees and expenses incurred in connection with Section 11(e)

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

plans and a plan failing to provide for Commission supervision of such fees and expenses cannot be approved.

APPEARANCES:

WILLIAM E. TUCKER, of Mudge; Stern, Williams & Tucker of New York City, for the Applicants.

LAWRENCE R. CONDON and FREDERICK ZAZOVE, of New York City, on behalf of T. W. Streeter and other preferred stockholders of Engineers.

FRANCIS H. SCHEETZ, PHILIP H. STRUBING, ARTHUR H. CLEPHANE, and EVANS, BAYARD & FRICK of Counsel, of Philadelphia, Pa., representing the Home Insurance Company and other holders of preferred stock of Engineers.

BERNARD S. KANTON, for the Public Utilities Division of the Commission.

Engineers Public Service Company ("Engineers"), a registered holding company, has filed a voluntary plan for our approval under Section 11(e) of the Public Utility Holding Company Act of 1935. The plan has been presented as a method of effectuating compliance with the requirements of Section 11 of the Act and with the previous orders of this Commission issued pursuant to Section 11 (b)(1).[1]

In summary, Engineers proposes under the plan to dispose of the common stock of its wholly owned subsidiary, Gulf States Utilities Company ("Gulf States"), by offering the stock to its common stockholders under a warrant program; to distribute as a liquidating dividend the common stock of its wholly owned subsidiary, El Paso Electric Company ("El Paso"); to retire its own outstanding preferred stock at $100 per share and accrued dividends; to

[1] *Engineers Public Service Co.*, 12 S. E. C. 41 (1942) and 12 S. E. C. 268 (1942). See also 9 S. E. C. 764 (1941) and 10 S. E. C. 904 (1941) for earlier proceedings.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

go through the statutory processes of dissolution but continue for an indefinite period as a trusteeship; and at the end of such trusteeship, to distribute its remaining assets to its common stockholders.

Hearings on the plan were held at which all interested persons were given an opportunity to participate. Briefs were submitted and we heard oral argument. Certain features of the plan have been objected to by representatives of the preferred stockholders and by the staff of the Public Utilities Division of the Commission. The findings which follow are made on the basis of the complete record before us.

General Description of the System

Engineers was organized in 1925 as a Delaware corporation. It has outstanding the following securities:

143,951 shares of $5.00 Dividend Convertible Preferred Stock, Cumulative, without par value,[2]

183,406 shares of $5.50 Cumulative Dividend Preferred Stock, without par value,[3]

65,098 shares of $6.00 Cumulative Dividend Preferred Stock, without par value, and

1,909,968 shares of Common Stock, having a par value of $1.00 per share.

All three series of preferred have a stated value of $100.00 per share and share *pari passu* in assets in liquidation. Under the charter provisions they are entitled to receive $100.00 per share, plus accrued dividends, in involuntary liquidation; on redemption or voluntary liquidation the $5.00 series is entitled to $105.00 per share, plus accrued dividends, and the $5.50 and $6.00 series are en-

[2] The conversion feature expired on June 30, 1938.

[3] At issuance the $5.50 series carried an attached warrant giving the holder the right to buy one share of Engineers' common at $68.00 per share. The warrant rights expired before any were exercised.

titled to $110.00 per share, plus accrued dividends. There is no corporate debt outstanding and there are no preferred dividend arrearages. Each share of common stock has one vote. The preferred stock has no voting rights except in statutory proceedings or when eight quarterly dividends have been passed, in which case by plurality vote the preferred stockholders as a class may elect one less than a majority of the Board of Directors.

Appendix A contains Engineers' corporate and consolidated balance sheets as at June 30, 1945, giving effect to operations from July 1, 1945, to December 31, 1945, and corporate and consolidated income statements for the twelve months ended June 30, 1945.

Engineers' principal assets at the present time consist of 99.8% of the common stock of Virginia Electric & Power Company ("Virginia"), and all of the common stocks of El Paso and Gulf States.[4] These three subsdiaries operate in the states of Virginia, West Virginia, North Carolina, Louisiana, New Mexico, and Texas, while Engineers exercises control and renders supervisory services from its principal office in New York. A mutual service company, Epsco, Inc., is used by all the companies and they share its cost.

Virginia

In 1944 Virginia Public Service Company was merged with Virginia. The company is engaged principally in the business of generating and purchasing electric energy and of transmitting, distributing and selling it at retail and wholesale in approximately 990 communities and surrounding areas located in eastern and central Virginia, northeastern North Carolina and east central West Virginia and hav-

[4] When the plan was filed, Engineers also owned securities of Western Public Service Company (Delaware). These securities were disposed of by sale in February 1946, during the pendency of these proceedings, and the cash proceeds are now included in the company's treasury. *Engineers Public Service Co.*, ... S. E. C. ..... (1946)., Holding Company Act Release No. 6420.

ing a population of about 1,694,000. The principal communities served are: Richmond, Norfolk, Portsmouth, Alexandria, Petersburg and Charlottesville. Virginia's transportation business was sold in 1944 and 1945. It also operates a manufactured gas business in Norfolk, South Norfolk, Newport News and Hampton, Virginia. Our orders requiring the disposition by Engineers of the Virginia gas properties are presently pending on certiorari before the United States Supreme Court.[5]

Plant and Property

The utility plant and property as at June 30, 1945, was carried at $135,370,856 which, together with applicable reserves, was classified in the following manner:

TABLE I

Utility Plant and Property		
Electric and common plant, at original cost		$118,619,541
Gas plant, at cost[6]		5,513,847
Acquisition adjustments, Account 100.5[7]		11,237,468
Total utility plant and property		$135,370,856
Reserves:		
Depreciation reserve	$18,658,749	
Reserve for amortization of plant acquisition adjustments	2,221,265	20,880,014
Net utility plant and property		$114,490,842

As noted in the above table, the electric and common plant, at original cost, and the gas plant, at cost, amounted

[5] *Engineers Public Service Co.*, 12 S. E. C. 41 (1942) and 12 S. E. C. 268 (1942); aff'd in part and reversed in part, 138 F. 2d 936 (Ct. App. D. C., 1943), cert. granted, 322 U. S. 723 (1944).

[6] In September 1945 original cost studies for gas properties were filed with the State Regulatory Commission increasing plant acquisition adjustments by $93,374.

[7] Provision is being made, pursuant to orders of regulatory Commissions, for the amortization of plant acquisition adjustments by charges to income over a 15-year period commencing in 1943.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

to $124,133,388, against which there is a depreciation reserve of $18,658,749 (or 15%), leaving adjusted net utility plant and property of $105,474,639.

Capitalization and Surplus

The capitalization and surplus of Virginia as of June 30, 1945, is shown below:

TABLE II

	Amount	%
Funded debt:		
First and refunding mortgage bonds, Series E, 2¾% due 1975	$ 59,000,000	47.7
Notes payable, due 1946-1954	12,715,000[8]	10.3
Total funded debt	$ 71,715,000	58.0
Preferred Stock, $5.00 dividend ($100 par)	$ 28,947,100	23.4
Common Stock, no par, 2,938,445 shares	$ 13,546,555	10.9
Capital surplus	1,031,324	.8
Earned surplus	8,479,016[9]	6.9
Common Stock and Surplus	$ 23,056,895	18.6
Total capitalization and surplus	$123,718,995	100.0

Earnings.

Virginia's earnings and pertinent ratios for the twelve months ended June 30, 1944, and for the twelve months ended June 30, 1945, are as follows:

[8] On December 31, 1945, $1,135,000 due currently was paid together with $5,100,000 of notes paid in advance of maturity, leaving outstanding on that date notes amounting to $6,480,000. On July 3, 1946, we granted an application to sell $6,500,000 of 1¾% notes to mature serially from February 1, 1947 to August 1, 1956, proceeds to be used to retire all notes then outstanding and to make capital additions. *Virginia Electric & Power Co.*, Holding Company Act Release No. 6763, July 3, 1946.

[9] Under the terms of the indenture securing the Series E Bonds, earned surplus as of June 30, 1945, was restricted as to dividends on the common stock in the amount of approximately $6,593,000.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

TABLE III

	Twelve Months Ended June 30	
	1944	1945
Gross income [10]	$ 6,946,611	$10,342,109
Income deductions		
Interest and amortization	$ 2,030,247	$ 2,916,036
Amortization of plant acquisition adjustments	209,985	693,168
Total income deductions	$ 2,240,232	$ 3,609,204
Net income	$ 4,706,379	$ 6,732,905
Preferred dividend requirements	1,189,992	1,447,348
Balance for common stock	$ 3,516,387	$ 5,285,557
Ratio of gross income to:		
Total income deductions	3.10	2.87
Total income deductions and preferred dividend requirements	2.03	2.05

Gulf States

Gulf States is engaged principally in the business of generating and purchasing electric energy and transmitting, distributing and selling it at retail and wholesale in an area in southeastern Texas and southwestern Louisiana comprising approximately 27,500 square miles and serving an estimated 581,000 people. The principal cities served are Beaumont, Port Arthur, and Orange, Texas; and Baton Rouge and Lake Charles, Louisiana. The company also

[10] Gross income is shown after deduction of special charges in lieu of Federal taxes on income arising from premiums and expenses on redemption of bonds and losses on sale of transportation properties. Such special charges amounted to $2,091,177 in the twelve months' period ended June 30, 1944, and $4,424,813 in the twelve months' period ended June 30, 1945. The inclusion of special charges in income deductions would result in the following ratios:

	Twelve Months Ended June 30	
	1944	1945
Ratio of gross income before deductions of special charges to:		
Total income deductions	2.69	1.84
Total income deductions and preferred dividend requirements	1.64	1.56

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

supplies steam to two industrial consumers and natural gas is purchased and distributed in Baton Rouge, Louisiana, and vicinity. Our order of September 16, 1942, required Engineers, if it determined to retain Gulf States as its principal system, to dispose of Gulf States' gas business, and of a water and an ice business which it also operated.[11] The ice business has been sold, but no action has been taken to dispose of the water or the gas business.

Plant and Property

Attached hereto as Appendix B is the condensed balance sheet of Gulf States as at June 30, 1945.

The utility plant and property at that date was carried at $64,476,718 which, together with applicable reserves, was classified in the following manner:

TABLE IV

Utility Plant and Property		
Electric plant, at original cost		$ 56,761,267
Other utility plant at cost		4,485,274
Electric plant acquisition adjustments Account 100.5 [12]		750,989
Common utility plant acquisition adjustments Account 108.15 [12]		2,479,188
Total utility plant and property		$ 64,476,718
Less		
Depreciation reserve	$11,859,127	
Reserve for amortization of plant acquisition adjustments	807,553	12,666,680
Net utility plant and property		$ 51,810,038

[11] See note 5, *supra*.

[12] Pursuant to an order of the Federal Power Commission, the company is providing a reserve for amortization of plant acquisition adjustments by charges to income over a 15-year period beginning January 1943. The company may, at its option, accelerate the charges to income and credits to the reserve for amortization of plant acquisition adjustments by utilizing certain anticipated reductions in taxes arising from the amortization of emergency facilities.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

As noted in the above table, the electric and other utility plant at original cost and cost, respectively, amounted to $61,246,541 as at June 30, 1945, against which there was a reserve for depreciation of $11,859,127 (or 19.4%), leaving a net electric and other utility plant of $49,387,414.

Capitalization and Surplus

The capitalization and surplus of Gulf States as at June 30, 1945, is shown below:

TABLE V

	Amount	%
Funded debt		
Mortgage bonds, 3½%, due 1969	$27,300,000[13]	51.5
Preferred Stock		
$4.40 cumulative dividend, par $100	$12,000,000	22.7
Premium on preferred stock	$ 306,870	0.6
Common stock and surplus		
Common stock, no par, 280,000 shares	$11,101,125	20.9
Earned surplus	2,268,625	4.3
Total common stock and surplus	$13,369,750	25.2
Total capitalization and surplus	$52,976,620	100.0

The proposed plan provides as a condition precedent that the presently outstanding 280,000 shares of no par value common stock will be reclassified into 1,009,968 of no par value common stock with no change in the capital account.

Earnings

Attached hereto as Appendix C is the income statement of Gulf States for the twelve months ended June 30, 1945.

[13] This issue was recently refunded by the issuance of $27,000,000 principal amount 2¾% mortgage bonds due 1976 and $2,000,000 principal amount of 10 year 1¾% serial notes. See *Gulf States Utilities Co.*, ... S. E. C. ..... (1946), Holding Company Act Releases Nos. 6700 and 6720. This refunding is not reflected in any of the financial data in the record or in these Findings.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

The earnings and pertinent ratios for the periods ended June 30, 1944 and June 30, 1945, are as follows:

TABLE VI

	Twelve Months Ended June 30,	
	1944	1945
Gross income	$3,862,033	$4,262,475
Income deductions		
Interest and amortization	$1,210,289	$1,014,877
Amortization of plant acquisition adjustments	193,810	193,810
Total income deductions	$1,404,099	$1,208,687
Net income	$2,457,934	$3,053,788
Preferred dividend requirements	584,968	560,917
Balance for common stock	$1,872,966	$2,492,871
Ration of gross income to:		
Total income deductions	2.75	3.53
Total income deductions and preferred dividend requirements	1.94	2.41
Earned per share (on basis of reclassification of 1,909,968 shares	$0.98	$1.31

Attached hereto as Appendix D are pro forma income statements for the years 1939 through 1945 (last two months of 1945 estimated) adjusted to give effect to present fixed charges, preferred dividends and proposed number of shares of common stock.

The average earnings per share on the proposed number of shares for the periods shown in Appendix D amounted to $1.18 per share and earnings for the years 1944 and 1945 (partly estimated) amounted to approximately $1.47 per

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

share.[14] Gulf States has paid common stock dividends of approximately 50% of the balance available for common stock from 1939 through June 1945.

El Paso

El Paso is engaged in the business of generating and purchasing electric energy and distributing and selling it at retail and wholesale in the City of El Paso, Texas, and surrounding territory in the Rio Grande Valley in extreme western Texas and southeastern New Mexico. The company serves an estimated population of 170,000.

Plant and Property

Attached hereto as Appendix E is the condensed balance sheet of El Paso as at June 30, 1945.

The utility plant and property at the above date was carried at $12,466,430, which is stated to be at original cost. The depreciation reserve as of the above date amounted to $2,162,198 (or 17.3%), leaving net utility plant and property of $10,304,231.

Capitalization and Surplus

The capitalization and surplus of El Paso as at June 30, 1945, is shown below:

---

[14] After reduction in Federal income taxes resulting from amortization of emergency facilities amounting to $84,497 in 1943, $523,102 in 1944 and $1,254,290 in 1945 (partly estimated). Before this extraordinary reduction, average earnings for the periods shown in Appendix D amounted to $1.04 per share and for the years 1944 and 1945 (partly estimated) amounted to $1.01 per share.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

TABLE VII

	Amount	%
Funded debt:		
Mortgage bonds, 3¼% due 1970	$ 6,500,000[15]	51.5
Notes payable, 2¼% due 1946-47	280,000	2.2
Total funded debt	$ 6,780,000	53.7
Preferred stock:		
$4.50 cumulative dividend, no par, 15,000 shares	$ 1,500,000	11.9
Premium on preferred stock	$ 33,750	0.3
Common stock and surplus:		
Common stock, no par, 150,000 shares	$ 3,848,692	30.4
Earned surplus	462,063	3.7
Total common stock and surplus	$ 4,310,755	34.1
Total capitalization and surplus	$12,624,505	100.0

The proposed plan provides as a condition precedent that the presently outstanding 150,000 shares of no par value common stock will be reclassified into 381,994 shares of no par value common stock with no change in the capital account.

Earnings

Attached hereto as Appendix F are income statements of El Paso for the twelve months' period ended June 30, 1945. The earnings and pertinent ratios for the twelve months' periods ended June 30, 1944, and June 30, 1945, are as follows:

[15] This issue has been recently refunded by the issuance of $6,000,000 principal amount 2¾% mortgage bonds due 1976. *El Paso Electric Co.*, ... S. E. C. ..... (1946), Holding Company Act Release No. 6944. This refunding is not reflected in any of the financial data in the record or in these Findings.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

TABLE VIII

	Twelve Months Ended June 30 1944	1945
Gross income	$834,055	$923,449
Interest and amortization	259,055	239,047
Net income	$575,000	$684,402
Preferred dividend requirements	67,501	67,501
Balance for common stock	$507,499	$616,901
Ratio of gross income to:		
Interest and amortization	3.22	3.86
Interest, amortization and preferred dividend requirements	2.55	3.01
Earned per share (on the basis of the proposed reclassification to 381,994 shares)	$ 1.33	$ 1.61

The present dividend rate on the common stock is equal to approximately $1.00 per share of common stock, based on the proposed number of shares to be outstanding. This would amount to $381,994 annually or approximately 60% of the earnings for the twelve months' period ended June 30, 1945.

Prior Proceedings

Integration proceedings under Section 11(b)(1) of the Act were instituted with respect to Engineers and its subsidiaries in 1940. On July 23, 1941, the Commission issued an order in those proceedings directing Engineers to dispose of its interest in The Key West Electric Company and in Puget Sound Power and Light Company.[16] On December 29, 1941, the Commission issued a further order directing Engineers to dispose of its interest in Missouri Service Company, The Northern Kansas Power Company, and The Western Public Service Company.[17] These orders have been fully complied with. On September 16, 1942, and October 6, 1942, the Commission issued further orders

[16] 9 S. E. C. 764.
[17] 10 S. E. C. 994.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

directing Engineers to dispose of all of its remaining holdings except Virginia or Gulf States, giving the company 15 days within which to choose between those two companies as its principal system, and designating Virginia as the principal system if the company failed to make a choice. The orders also provided that if Virginia is retained it must dispose of its gas and transportation properties.[18] Engineers has complied with the 1942 orders to the extent of disposing of all the holdings ordered to be divested except those in Gulf States, El Paso and Virginia and, with respect to the latter two companies, it has disposed of their transportation properties. Engineers filed a petition with the United States Court of Appeals for the District of Columbia for review of the 1942 orders and on November 22, 1943, the Court set those orders aside and remanded the case to the Commission for further proceedings in accordance with its opinion.[19] Both Engineers and the Commission thereupon applied to the Supreme Court of the United States for writs of certiorari, which were granted.[20] The decision of the Supreme Court has been delayed for lack of a quorum.

Since 1939 and during the pendency of the proceedings described above, Engineers has on several occasions endeavored to repurchase a portion of its outstanding preferred stock. In 1939 and again in 1941 we approved repurchase of 7,000 shares and 5,000 shares, respectively, by a call for tenders or by purchases in the open market. On both occasions the preferred stocks were selling within a range of 69 to 87¾ and the money used to effect the purchase program had been obtained from the sale or retirement of a portion of Engineers' holdings in its sub-

[18] 12 S. E. C. 41 and 12 S. E. C. 268.
[19] 138 F. 2d 936 (1943).
[20] 322 U. S. 723 (1944).

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

sidiaries.[21] However, in 1943, when it had become apparent that substantial readjustments would be necessary within the Engineers system to bring it into compliance with the Holding Company Act, we denied a request by the company to repurchase 35,000 shares on the same terms. At that time the stocks were selling within a range of 61 to 74. We found the proposed repurchases would be unfair since there was no reasonable relationship between the prices to be paid and the treatment the preferred would receive under a comprehensive plan for compliance with the Act.[22] By 1944 the market prices had risen and 25,560 shares were retired with our approval at an average price of over $99.00.[23] No other shares have been retired, although Engineers has accumulated a substantial balance of treasury cash.

Provisions of the Amended Plan

The plan as amended is segregated into two parts. A separate order has been requested by Engineers for each part.

Gulf States and El Paso have also filed declarations under Section 7 of the Act which provide for the following transactions to be consummated prior to the effectiveness of Part I of the plan:

(a) Reclassification of the 150,000 shares without par value of El Paso, being all of the authorized and issued common stock, into 381,994 shares.

(b) Reclassification of the 280,000 shares of common stock without par value of Gulf States, being all of the issued common stock (there being 20,000 shares of such

common stock authorized but unissued) into 1,909,968 shares.[24]

Part I of the plan provides for the following transactions:

1. Engineers proposes to borrow from a bank the sum of $3,000,000 at an annual interest rate of approximately 1½%. The loan is to be evidenced by a two-year note payable $750,000 semi-annually. The loan agreement will permit the borrowing of additional amounts, if needed, in order to carry out the plan.[25] The agreement will provide that until the loan has been fully repaid Engineers shall not pay any dividends in cash on its common stock or make any distributions other than those provided in the plan.

2. Engineers will issue warrants to its common stockholders as of a record date evidencing the right to purchase from Engineers, at a subscription price of $11.50 per share, one share of Gulf States common stock for each share of Engineers common stock held. The subscription price will be payable in cash or by exchanging whole shares of Engineers preferred stock (which the common stockholder may hold) at the rate of $100.00 per share, plus accrued dividends, with a cash payment for the difference. Any common stockholder who surrenders preferred stock in payment of the subscription price will be entitled to receive, in respect to such surrendered shares, any amount in addition to $100.00 which is found to be payable to the preferred stock on its retirement. The warrants must be exercised on or before a specified date which will be ap-

---

[24] The proportionate voting power of the preferred stockholders of Gulf States will be preserved by giving them seven votes for each share held.

[25] Additional amounts up to $4,500,000 may be borrowed on the same terms, except that repayment of the additional amounts is not to commence until the first loan has been repaid in full. Under the plan it is anticipated that this additional amount might be needed if the preferred is to be paid more than $100.00 per share and accrued dividends.

proximately 10 days after the mailing of the warrants.[26] Each warrant will be registered in the name of the common stockholder and will be transferable on the books of Engineers. The warrants will be issued and distributed without the surrender by the common stockholders of their common stock. Engineers will sell the shares of Gulf States common stock represented by unexercised warrants promptly after the expiration date and in such manner as the Board of Directors of Engineers deems to be in the interests of Engineers, subject to the obtaining of requisite regulatory approvals. Upon the mailing of the warrants, Part I of the plan is to be deemed effective. However, Engineers will reserve the right to withhold the mailing of the warrants in the event that, in its opinion, market conditions are such as to render it inadvisable to proceed with their issuance.[27]

3. Engineers will deposit in trust with a bank or trust company an amount equal to $100.00 per share, plus accrued dividends, for each outstanding share of Engineers preferred stock not surrendered in exchange for Gulf States common stock under the provisions outlined in paragraph 2 above. Five days prior to such deposit, notice will be given to the preferred stockholders stating that, upon surrender of the preferred stock certificates, the preferred stockholders will be paid $100.00 per share, plus accrued dividends. The right of the preferred stock to dividends will cease on the date of the deposit. Thereafter, the only right remaining to the registered holder of a preferred stock certificate will be the right to receive such additional amount, if any, as is determined to be payable in retirement as provided in Part II of the plan. It is estimated

[26] It was indicated at the hearing that this period would be increased to 15 days.

[27] An original proposal to list the warrants on the New York Stock Exchange on a "when issued" basis was abandoned when it was learned that the Exchange would probably not permit listing as long as the company reserved the right to withhold mailing the warrants.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

that approximately $39,245,500, plus an amount equal to accrued dividends, will be deposited to retire the preferred on this basis. This sum will be obtained from the sale of Gulf States common stock through warrants, treasury cash, and the bank loan. On the date the deposit is made the certificate of incorporation will be amended to reflect the complete elimination of the preferred from the capital of the company.

4. Engineers will distribute as a dividend in partial liquidation its portfolio holdings of common stock of El Paso *pro rata* to the common stockholders of Engineers, on the basis of ⅕ of a share of El Paso common stock for each share of common stock of Engineers. Scrip will be issued in lieu of fractional shares. The scrip will not be entitled to dividends or voting rights. When combined in lots aggregating one or more full shares of stock, the scrip may, up to the date of sale of such shares of stock, be exchaged for full shares, together with any dividends which have been paid on the stock. Engineers will undertake to provide facilities for the exchange of scrip for a period of approximately two years after the effective date of Part I. At the expiration of that time, all shares which shall not have been issued or delivered will be sold by the transfer agent, who shall, as soon as possible thereafter, distribute to the record holders of the scrip their proportionate share of the proceeds of the sale and any dividends, after subtracting the costs of the sale.

5. Engineers' holdings in Virginia, which are to be retained for an estimated period of three years under the trusteeship described in paragraph 7, *infra*, will provide a reserve for any payment in addition to $100.00 per share and accrued dividends to which Engineers preferred stockholders shall be found entitled.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

6. Epsco., Inc., a mutual service company for the Engineers holding company system, will cancel its service contracts with Engineers, Virginia, El Paso and Gulf States.

7. Within 60 days after the plan becomes effective (that is, within 60 days after the mailing of the Gulf States warrants), the company shall go through the necessary statutory processes of dissolution and the company shall be deemed dissolved. It is proposed, however, that Engineers will continue as a body corporate for the purpose and term specified under Section 42 of the general corporation law of Delaware for an estimated period of three years unless at the end of that time there is unfinished litigation. This will establish a trusteeship, consisting of the Board of Directors at the time of dissolution, who will liquidate the company and settle its unfinished business. The trustees will be authorized to fill vacancies that occur by a vote of one-third of the trustees then in office. In paying the debts of the company, the trustees will be directed, in so far as possible, not to use the common stock of Virginia, which is to be retained to the end that the final liquidation of Engineers shall be accomplished by the distribution *pro rata* among its common stockholders of as many shares as possible of the common stock of Virginia. The trustees are empowered to borrow funds needed to effectuate the plan.

Part II of the plan requests that the Commission issue a separate order finding that it is fair and equitable that no amount in addition to $100.00 per share and accrued dividends be paid the Engineers preferred stockholders upon retirement. However, it is provided that, if the Commission finds and orders that some additional amount shall be paid to the preferred stockholders of Engineers, then Part II of the plan will become "automatically amended" so as to provide that Engineers shall pay its preferred

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

stockholders the additional amount specified by the Commission. Engineers reserves the right to contest such additional payments before the Commission and in court or to petition for a review of any such order.

The following conditions are expressly established for the effectuation of Part I of the plan:

1. Reclassification of the common stock of Gulf States and El Paso.

2. Approval by this Commission of the plan.

3. Application by the Commission to a Federal district court under the provisions of Section 11(e) of the Act for court approval of the plan; the effectiveness of the plan is conditioned upon such court approval.

4. Obtaining from the Treasury Department, unless Engineers waives this condition, of a closing agreement or ruling as to the tax consequences of the plan which shall be satitsfactory to counsel for Engineers.

5. Carrying out of any corporate action in connection with the plan which may be deemed necessary by counsel for Engineers in a manner satisfactory to such counsel.

6. Obtaining of approval from any regulatory bodies having jurisdiction of transactions under the plan.

7. Concluding arrangements to borrow the necessary funds.

8. Issuance of the Gulf States warrants.

Part II is conditioned upon Part I of the plan being consummated.

Appendix A contains Engineers' corporate and consolidated balance sheets and income statements *pro forma* giving effect to the provisions of the plan.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

Statutory Standards.

Section 11 (e) establishes a voluntary procedure whereby a registered holding company or a subsidiary may propose a plan for compliance with Section 11 (b) and present it to the Commission for approval. If the Commission approves the plan, and the initiating company so requests, the plan may be presented to a Federal district court for approval and enforcement.

Section 11 (e) sets forth the standards which we must apply in considering whether a voluntary plan can be approved. We are required to find

"1. That the plan is "necessary to effectuate the provisions" of Section 11 (b), and

2. That the plan is "fair and equitable to the persons affected" thereby.

In applying these standards to the Engineers plan, we shall indicate our views on some of the objections which have been raised against the plan.

1. *Necessity.*

As indicated above, our order of September 16, 1942, directed Engineers to dispose of its holdings in El Paso and its holdings in either Virginia or Gulf States. As to the latter, the company was given 15 days within which to choose, if it so desired, the principal system which it wished to retain. To the extent that the present plan provides for the immediate disposition of Gulf States, Engineers may be deemed to have selected Virginia as its principal system. However, the plan goes further than our order by also providing for the formal dissolution of Engineers and for the eventual distribution in liquidation of the Virginia common stock *pro rata* among the Engineers common stockholders.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

In so far as the plan proposes the disposal of El Paso and Gulf States, it is designed to comply with the express findings in our Opinion and Order of September 16, 1942, that those properties cannot be retained under the integration standard of Section 11 (b) (1) in the same system with Virginia. Accordingly, we find that the disposal of El Paso and Gulf States is necessary to effectuate the provisions of Section 11 (b).

We have consistently held that to be "necessary" a plan need not be the only possible method for complying with the Act or that each of its details must be specifically dictated by express terms in the Act. We have held that a proper construction of the "necessary" clause permits the approval of plans which provide "a suitable means of achieving results required" by Section 11 (b).[28] It is sufficient if the plan affords an appropriate means for achieving compliance with the Act even though other means might have been chosen. However, the means chosen must be designed to achieve compliance with fairness to all persons affected and as expeditiously as is possible under the particular circumstances of the case.

Engineers has produced an abundance of evidence showing that once it has disposed of El Paso and Gulf, it will have no reason to continue as a separate corporate entity for it would then be the parent of a single operating company, Virginia. In that situation, Engineers admits that it would be an "economic monstrosity" and all participants in this proceeding seem to be in agreement with that conclusion. The record does not clearly indicate what it will cost to maintain Engineers after Gulf States and El Paso have been divested. Estimates range from $172,000 to $365,000 a year. The company freely admits that Engineers could in no way justify any such continuing expendi-

[28] *The United Light and Power Company*, ... S. E. C. ..... (1945); Holding Company Act Release No. 5840; *United Public Utilities Corp.*, ... S. E. C. ..... (1946), Holding Company Act Release No. 6908.

ture. Virginia is able to undertake its own financing and service and is large enough to stand independently. Any functions Engineers might perform should more properly be carried out by Virginia's own management. We find that the presence of Engineers would unduly complicate the structure of the system and that it would, therefore, come within the prohibition of Section 11 (b) (2). Accordingly we find that the proposal to dissolve Engineers is "necessary" to effectuate the provisions of Section 11 (b) of the Act.

In finding that the major objectives of the plan—the disposition of El Paso and Gulf States and the dissolution of Engineers—are required by Section 11 (b) and are, therefore, "necessary" we do not thereby approve all of the mechanics proposed by Engineers to accomplish those objectives. As we have indicated, the plan must provide a fair and expeditious method for effectuating compliance with the Act. We cannot approve mechanics of the plan which will result in substantial delay in achieving such compliance. Although considerable latitude is permitted the company in framing a voluntary plan which is appropriate and suitable, we must also review the detailed manner in which the plan is to be performed in order to assure that the mandate of the Act that all necessary steps be taken "as soon as practicable" is being obeyed.

The staff and the preferred stockholders have raised strong objections to the provisions in the plan for a trusteeship and a bank loan. Since the bank loan is one of the asserted justifications for the trusteeship it will be considered in connection with our discussion of the trusteeship.

As has been indicated, it is proposed that within 60 days after the effective date of the plan Engineers will take steps to dissolve the corporation. However, it is also proposed that Engineers will continue as a trusteeship for a period of three years in order to pay off the bank loan and litigate the question of whether payment above the involun-

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

tary liquidation price is due the preferred. It is further proposed to retain the stock of Virginia for that period and to use its earnings for repayment of the loan; the stock itself is to serve as security both for the loan and for any additional payment which may be found due the preferred stockholders.[29] The staff contends that, under the Act, Engineers' continuance as a trusteeship in the form proposed will be no different in substance from Engineers as a corporation in its present form and that, since the three-year trusteeship would serve to delay unjustifiably the complete disappearance of Engineers required by the Act and burden the common stockholders with unnecessary additional expense, the Commission cannot approve this feature of the plan. It is pointed out, in this connection, that, although the trusteeship is patterned after the provisions of the Delaware Corporation law applying to dissolved corporations, it is not being established pursuant to it. As a consequence, the trusteeship is not limited, as it probably would be under the statute, to conducting litigation and marshaling assets. The proposed trusteeship of Engineers would continue a substantial number of the present top management of Engineers at their present salaries and would retain a substantial portfolio of securities (Virginia) with an estimated value of $65,000,000[30] which it will continue to supervise for an estimated three-year period. The record indicates that this supervision will include not only the selection of management for Virginia but the overseeing of all of the company's activities. The staff and the preferred stockholders maintain that the trusteeship in the form proposed is wholly unnecessary and is simply a device to continue the holding company in another form. It is asserted that the principal reason for

---

[29] The loan agreement itself would provide that no part of Virginia could be distributed to stockholders until the loan was paid in full.

[30] Barnes, President of Engineers, testified that the value of the Virginia common stock owned by Engineers is worth, in his opinion, not less than $65,000,000.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

this feature of the plan is to be found in the personal tax problems of certain large common stockholders of Engineers; that the trusteeship is to permit accumulation of earnings within the system which will ultimately be realized by such stockholders as capital gains rather than as income.

Engineers advances the following reasons as justification for continuance of the enterprise as a trusteeship for three years: (a) That period is required to pay off the bank loan which will supply the balance needed to retire the preferred. (b) The trusteeship will conduct litigation arising over the preferred premium and will retain Virginia common as security for payment of any additional amount required. (c) Certain Federal tax problems remain unsettled and the possibility that additional liability may be found against the company for past years requires that assets be retained. (d) The income of Engineers for the period of the trusteeship would accrue as a capital gain to its stockholders when distribution is finally made and the aggregate savings of income tax during those years to individual stockholders exceed the expense of maintaining Engineers and is thus an additional reason for the trusteeship.

We have carefully analyzed each of these reasons and have come to the conclusion that they do not, individually or in sum, justify continuance of the enterprise for a three-year period and the withholding during that period of assets estimated to be worth $65,000,000 which properly belong and should be distributed to Engineers' stockholders. We discuss each of the asserted reasons in turn.

a. *The bank loan.* It is urged that adequate funds to retire the preferred can best be obtained by means of a bank loan, originally estimated at $3,000,000, to supplement treasury cash and the amount to be obtained for Gulf States, and that Virginia must be retained as security for the bank loan. In the first place, there seems to be an obvious weak-

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

ness in that portion of the argument which seeks to justify retention of $65,000,000 of Virginia assets for the purpose of securing a $3,000,000 loan. But more important, we think the bank loan is wholly unnecessary since it can easily be demonstrated that there are several other simple and feasible methods of obtaining the necessary additional cash without delaying full compliance with the Act.

Engineers has 392,455 preferred shares outstanding. Assuming that all of these will be retired at $100 per share, a total of $39,245,500 in cash is needed.[31] Retirement of the preferred at more than $100 per share will require an estimated additional $4,000,000, including expenses.[32] At the close of the hearings Engineers had on hand approximately $14,650,000 of treasury cash. The brief of applicant states that since the record was closed earnings of approximately $1,500,000 have accumulated to October 1946, while estimates in the record show that a total of approximately $2,175,000 will accumulate in 1946. We shall adopt this latter figure, which brings treasury cash at the end of 1946 to about $16,825,000. Sale of the Gulf States common by warrants at $11.50 per share, as proposed in the plan, will yield an additional $21,964,632, leaving a balance to be obtained for retiring the preferred of approximately $500,000, if no premium is required, or of approximately $4,500,000 if the additional amount is payable.[33]

---

[31] To the extent that preferred shares are exchanged for the Gulf States common, fewer shares of preferred will remain to be retired for cash; but the amount of cash received from the warrants would, of course, be reduced by the same amount. Since they cancel out, we may use the full $39,245,500 figure in our discussion.

[32] The origin of this figure and its propriety is discussed later in this opinion. See page 36 [page 75a of this appendix].

[33]

Par value of Preferred	$39,245,500
Less cash end 1946	16,825,000
	$22,420,500
Less subscription price Gulf States	21,964,632
Additional cash necessary if preferred paid at $100	$ 455,868
Estimated cost of additional payments to preferred	4,000,000
Additional cash necessary if preferred paid more than $100	$ 4,455,868

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

It is apparent that if the balance needed, after treasury cash, of $26,420,000 (including $4,000,000 for payment in excess of $100) can be obtained from other sources, the bank loan will be wholly unnecessary. The Gulf States warrants were proposed to supply the major portion of the funds. In that connection the method by which the $11.50 subscription price was derived is not without significance. D. C. Barnes, President of Engineers, testified that the price was arrived at as follows: It was originally proposed to set the price at $10, an arbitrary figure, which would have resulted in a $6,000,000 bank loan. When our staff raised objections, the company halved its amount; this resulted in increasing the subscription price to $11.50.

This price of $11.50 was not intended to represent Engineers' estimate of the worth of each share of reclassified Gulf States common. According to one of Engineers' witnesses no effort was ever made to get a true valuation of the Gulf States shares. Engineers carries its investment in Gulf States at $19,914,347.[34] However, an exhibit introduced by the company compared the price-earnings ratios of four unaffiliated operating companies (having market quotations) which were deemed somewhat comparable to Gulf States for the period from 1938 to June 30, 1945. The average yield of those securities, when applied to Gulf States' earnings, showed the equity of Engineers in Gulf States to be about $29,981,000, or $15.70 per share. R. N. Benjamin, Secretary for Engineers, testified that in his opinion Gulf States common should sell somewhere between $13 and $16.50 per share, and he referred to an analysis made by a brokerage firm placing the value as high as $20 per share. Barnes was unwilling to place a value on Gulf

[34] The "tax cost" of Gulf States is $12,839,697. Any amounts received in excess of that amount will be subject to capital gains tax of 25%. However, Engineers experienced a substantial capital loss in its sale of Puget Sound which can be carried over and applied to any gain realized in the sale of Gulf States. This must occur before 1949.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

States, but he stated that while he would refuse an offer of $30,000,000 ($15.71) for the properties, he would "be interested" in an offer of $35,000,000 ($18.32). R. E. Badger, an expert witness on behalf of certain preferred stockholders, stated the value of Gulf States in his opinion to be $30,000,000.

For our purposes, it is unnecessary to appraise the value of Gulf States with any more definiteness than what is already set forth. All that is required under the plan to retire the preferred is a maximum of $26,420,000, or something less than $14 per share. The price of $14 per share is equivalent to about 8.5 times earnings for 1945 (last two months estimated), after reduction in Federal income tax resulting from amortization of emergency facilities. Before this reduction the price of $14 per share is equivalent to about 14.1 times earnings for the same period.

The only objection which Engineers has raised to increasing the warrant price is the asserted additional burden it will place on the common stockholders of Engineers who elect to exercise the warrants. Considerable evidence was introduced into the record showing the extent and size of individual holdings of Engineers common in order to prove that the burden on the individual stockholder will be great, especially when it is considered that Engineers common has sold as low as $1.25 per share in 1942. However, it should be recognized that the use of warrants is not the only method available for raising cash from the disposition of Gulf States, for there is nothing to prevent sale in the open market through competitive bidding. If the object of the warrants is to permit stockholders so desiring to maintain their position in the system companies without being subjected to an underwriting expense, it must be realized that the retirement of the preferred cannot be carried out without some expenditure, and that the expenditure in any event is only commensurate with the benefit resulting

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

to the common.[35] We consider the question of the fairness of the warrant program to the common stockholders later in this opinion.

In view of the change which has taken place in the market since the plan was first presented the management may feel that it is not presently feasible to dispose of Gulf States at a price sufficient to supply all of the cash needed to retire the preferred and we do not mean to indicate that this method is the only proper one to raise the additional cash. The plan, as filed, completely overlooks the possibility of obtaining the relatively small amount of additional cash required through the sale of El Paso stock or through the sale of some of the Virginia stock. There seems to be no reason why El Paso could not be offered to Engineers' stockholders on separate warrants or otherwise sold to raise the additional cash needed. A further alternative would be to dispose of a small quantity of Virginia for cash or possibly to revise the plan and offer Virginia, rather than Gulf States, under the warrant program. We believe that the choice of methods is best left to the discretion of the management of the company. In our view none of these methods should present any difficult or complex problems and any one of them, if properly presented, would be an acceptable solution to the company's difficulty, would enable the plan to be completed without a bank loan, and would thereby expedite compliance with the Act.

It is true that on several occasions we have approved provisions in Section 11(e) plans for bank loans, the proceeds of which were to be used for retiring the company's preferred stock. However, in each of those cases the company was to continue in operation for other reasons and we ascertain that the bank loan would in no way interfere with the ability of the company to comply expeditiously

[35] The Federal Reserve Board's recent amendment to Regulation U will permit margin purchases of up to 50% on the warrants to be issued under the plan. This will make for a substantial reduction in the cash outlay required of Engineers' common stockholders.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

with the Act.[36] On the other hand, we have been unable to find any other justification for Engineers' continuing beyond the consummation of this plan and the bank loan would only impede immediate compliance with the Act and add unnecessary expense.

We find that the bank loan is not necessary to the effectuation of a valid plan and that provision of the plan cannot be approved. And since we find the bank loan unnecessary, we must of course reject any argument which attempts to justify the proposed three-year trusteeship on the basis of the loan.

b. *Conduct of litigation and security therefor.* It is argued that the trusteeship is required in order to conduct any litigation arising over the amount payable to the preferred on retirement and that Virginia must be retained as security for any payment in addition to $100 and accrued dividends which may be found due. We cannot agree. It appears that the state law makes adequate provision for conducting litigation on behalf of a dissolved corporation and there would seem to be no need for retaining a large staff of Engineers for that purpose. In addition, it should be pointed out that the District Court having jurisdiction over the plan will also have adequate power to assure that the interests of the corporation are protected in any proceedings which may continue beyond the consummation of the plan.

We do agree on the necessity for a provision to assure the availability of assets to pay any excess over $100 which is found to be due the preferred stock. But we cannot accept the argument that $65,000,000 of Virginia stock is necessary as security for the $4,000,000 in dispute. And there is no reason why security for this $4,000,000 cannot be provided by an escrow arrangement, which will require

---

[36] See e. g. *Cities Service Co. et al.*, ... S. E. C. ..... (1944), Holding Company Act Release No. 4944; *Electric Bond & Share Co. et al.*, ... S. E. C. ..... (1946), Holding Company Act Release No. 6879-1.

retention of only that amount. We have in other cases approved such arrangements in similar situations.[37] We think a suitable escrow can easily be devised; the details of such an escrow are the subject of discussion later in this opinion. See p. 36 *infra* [page 75a of this appendix]. We conclude, therefore, that there is no validity in this asserted justification for the three-year trusteeship as proposed.

c. *Unsettled tax problems.* During the hearings Engineers attempted to justify the trusteeship principally by the bank loan and the possibility of litigation over the payment due the preferred. It was only when briefs were submitted and at oral argument that an additional reason was advanced. It is asserted that there are unsettled Federal tax questions arising from returns filed in past years on which possible liability may accrue. These returns are currently under review by the Treasury Department.

An examination of the record in the light of this claim reveals little testimony as to Engineers' tax situation and does not disclose with any definiteness the nature of the liability which might result. It does appear that, during the years 1940 to 1945, Engineers filed consolidated returns with certain of its system companies for all or part of that period. Except for El Paso and Virginia, these companies have either been sold or dissolved, and Engineers, as parent of the group, maintains that it may be primarily liable for any tax deficiencies which may emerge from an examination of the returns by the Treasury Department for the years subsequent to 1943. In addition, it appears that Engineers has claimed excess profits tax refunds for the calendar years 1942 and 1943, aggregating nearly $5,000,000, which have not yet been acted upon by the Treasury Department. While the record contains some testimony concerning the rebate, there is a dearth of evidence bearing on possible tax liabilities, or their extent, or as to the

[37] See *The United Light and Power Co., et al.*, 10 S. E. C. 1215 (1942).

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

estimated time required for their settlement. When pressed at oral argument for a more definite statement of these possible additional tax liabilities, counsel for Engineers was unable to make one.

In the present state of the record, the claim of possible tax liability and even the limits of such claim are wholly indefinite. We certainly cannot find that such a claim justifies the three-year trusteeship, retention of all of Virginia, and a failure to comply with the Act for that period of time. Engineers, if it so desires, may establish a reserve of appropriate amount, to be administered through escrow or otherwise, to take care of any liability which may be found. There would certainly be no need to retain $65,000,000 of Virginia stock for this purpose or to continue in office for three years a large part of the present management of the company at present full-time salaries as provided in the plan.

The brief for Engineers indicates that "it might not be deemed necessary to hold all of the common stock of Virginia for this purpose as protection, but the Engineers' directors would undoubtedly not desire to distribute as much as 5% of the Virginia common stock, for such distribution would make it impossible for Engineers and Virginia to file consolidated returns (at least 95% ownership being required for such purposes), and Engineers would then become subject to tax on the dividends received from the balance of the Virginia common stock".[38] Although it is not possible to estimate what this tax would be without some knowledge of the size of the reserve required, the taxes which might result should be compared with savings resulting from the immediate distribution of the balance of Virginia, i.e., substantially all of the cost of maintaining Engineers as a separate entity would be

[38] Brief for Engineers, filed August 19, 1946, at p. 36 [page 75a of this appendix].

saved,[39] and it would be unnecessary to pay the 2% tax on income for the privilege of filing consolidated returns. Even if the balance were in favor of continuing to file consolidated returns, it does not appear that the amount of the difference would be sufficiently large to warrant a continuing of the trusteeship in the form proposed.

d. *Tax savings to certain stockholders.* Finally, it is urged that the trusteeship would result in substantial tax savings to individual stockholders of Engineers. If the company were to borrow money to retire the preferred and repay the loan from earnings of Virginia retained for the period of the trusteeship, the resulting increase in the asset value attributable to each share of common stock would be a capital gain to the stockholder. On the other hand, if the preferred is retired with money received from sources other than earnings, and the Virginia stock is distributed immediately, the earnings of Virginia distributed as dividends become taxable immediately as dividend income to the stockholder at rates determined by each stockholder's individual circumstance. It is impossible to ascertain how much difference this would make to the stockholders as a whole, but we can agree that it would impose substantial additional taxes on those of the Engineers' stockholders who are in the higher surtax brackets. It should be noted, however, that this argument is primarily applicable to those Engineers' common stockholders who are in the tax brackets in which there is a significant difference between the tax rate on a capital gain and the tax rate on income.[40] To those of the Engineers' common stockholders who are not in those tax brackets, it would seem more desirable to obtain immediate distribution of their pro rata share of Virginia and immediate receipt of Virginia divi-

---

[39] See discussion of these expenses at p. 18, *supra* [p. 51a of this appendix].

[40] 338 common stockholders own 72.54% of the common stock and 1308 stockholders own 84.77%, while the balance of 15.23% is divided among 12,083 stockholders.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

dends. Under the plan Engineers' common stockholders would not only not receive Virginia dividends directly but under the terms of the bank loan could not be paid any dividends by Engineers during the existence of the loan.

We have always recognized the importance of tax considerations in Section 11(e) proposals. We have sought to cooperate in achieving that type of rearrangement which imposes the least tax burden on the company and the security holders, so long as the choice does not result in frustrating the Act or in delaying attainment of its objectives. We have found that the continued existence of Engineers would unduly complicate the system. The Act requires that unnecessary entities be eliminated "as soon as practicable."[41] Under these circumstances, the desire of stockholders to withhold income and thereby realize capital gains cannot justify ignoring the plain dictates of the Act.

Conclusion on Necessity

For the reasons indicated, we find that the provisions of the plan providing for the disposition of Gulf States and El Paso and the dissolution of Engineers are "necessary" under the standards of the Act; we find that the provisions for a bank loan and a trusteeship are not "necessary" under the standards established by Section 11(e) of the Act, and cannot be approved.

We turn to a consideration of the fairness of the plan.

H. *Fairness*

The reduction of the Engineers holding company system from its previous size and diversity to a single operating company necessitates a commensurate contraction of its financial structure. Engineers' outstanding preferred, instead of providing valuable leverage for the common, has become a financial burden. Engineers has accumulated

---

[41] Sections 1(c) and 11(b).

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

from previous property dispositions and retained earnings a large reserve of idle cash, which is yielding no return; at the same time there is in excess of $39,000,000 of preferred stock outstanding with a fixed claim to prior dividends. Ordinarily a company in this position would exercise its call privilege and redeem the preferred at its call price. However, Engineers has proposed to dissolve by paying off the preferred in cash and distributing the remaining assets to its common stockholders.

The rights of the preferred on retirement are fixed as follows in the charter of Engineers:

> "III. Preference on liquidation, etc. In the event of liquidation, dissolution or winding up of this Corporation, or any reduction of its capital stock, resulting in any distribution of its assets to its stockholders, the holders of the preferred stock of each series shall be entitled to receive, for each share thereof, an amount equal to $100, together with all dividends accrued or in arrears thereon, plus, in case such liquidation, dissolution or winding up or reduction shall have been voluntary, the fixed redemption premium for such series, if any, before any distribution of its assets shall be made to the holders of the common stock; but the holders of the preferred stock shall be entitled to no further participation in such distribution . . ."

It is the position of Engineers that the liquidation of the company is compelled by the Holding Company Act; that the action being taken is, therefore, involuntary; and accordingly that under the particular circumstances of this case, the involuntary liquidation prices established in the charter of the company should control.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

A. *Fairness to the Preferred Stockholders*

Before we can approve the Engineers plan under Section 11(e), we must find that its provisions are "fair and equitable" to the persons affected by the plan. It is important to note that the present case is not one in which the proponent of the plan is asserting its desire to liquidate voluntarily in accordance with its charter provisions and state law nor is it one in which it is asserted that the company would or might have been liquidated apart from the Act; here it is specifically stated—and, indeed, strenuously argued by Engineers, that the sole reason for the dissolution is the impact of Section 11 and that the liquidation is wholly involuntary.[42] *Otis & Company* v. *Securities and Exchange Commission,* 323 U. S. 624 (1945) held that a reorganization or liquidation impelled by Section 11 does not mature preferred stockholders' claims. The court pointed out that the reason for this conclusion "lies in the fact that Congress did not intend that its exercise of power to simplify should mature rights created without regard to the possibility of simplification of system structures which otherwise would arise only by voluntary action of the stockholders, or involuntarily, through action of creditors" (at p. 638). Accordingly, while we may assume the validity of Engineers' assertion that the proposed dissolution is being caused by the Act and is in that sense "involuntary," we cannot accept any argument that the preferred claim is thereby matured and that the involuntary liquidation provision of the charter is therefore the conclusive measure of the claim.

---

[42] At oral argument counsel for Engineers stated:

"Engineers would not be dissolving if Section 11 of the Act had not been passed. It would have continued into the future for many years. . . . fact it is difficult to imagine any likely circumstances or set of circumstances which would have caused its liquidation at any time. Thus, Section 11 of the Act is the cause without which the liquidation would not have happened."

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

It is settled that in a Section 11 reorganization a security holder must receive, in the order of his priority, from that which is available for the satisfaction of his claim, the equitable equivalent of the rights surrendered.[43] Since under the circumstances of this case, we do not think it proper to regard the liquidation provisions of the charter as conclusive in determining those rights, we must consider all provisions of the charter applicable to the preferred, such as the dividend rate and the call price as well as the liquidation preferences, and we must analyze the financial condition of the company with particular regard to the asset and earnings coverage of the preferred.

As we have indicated, the preferred stocks of Engineers have annual dividend rates of $5.00, $5.50 and $6.00, and call prices of $105.00, $110.00 and $110.00, plus accrued dividends, respectively, and are entitled to a preference of 100.00 and accrued dividends on "involuntary" liquidation or dissolution and to a preference equivalent to their call prices on "voluntary" liquidation or dissolution.

The $5.00 series was issued in March 1928 and sold to the public at $100.00 per share; the $5.50 series was issued in October 1928 and sold to the public at $99.50 per share;[44] and the $6.00 preferred was issued in September 1930 and sold to the public at $100.00 per share. Dividends have always been maintained on the three series of preferred stocks since their issuance, except during the period from July 1, 1933, to July 31, 1936. The arrearages which accumulated in this period were paid off in 1936 and 1937.[45]

---

[43] *American Power & Light Company*, S. E. C. (1946), Holding Company Act Release No. 6176, p. 5 quoting *Group of Instituitonal Investors* v. *Chicago M., St. P. & P. R. Co.*, 318 U. S. 523 (1943), cited in *Otis & Company* v. *Securities and Exchange Commission*, 323 U. S. 624, 639-40 as applicable to Section 11(e).

[44] A portion of this series was issued in exchange for securities of The Puget Sound Power and Light Company; these were entered on the books of Engineers at $99.50 per share.

[45] The market history of the three series of preferred may be summarized as follows: The $5.00 series reached a high of $123.00 in 1929; its average

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

Table IX shows the corporate and consolidated capitalization and surplus of Engineers and its subsidiaries, as of June 30, 1945, adjusted for the sale of Western:

TABLE IX

	Corporate Amount	Corporate %	Consolidated Amount	Consolidated %
Securities of subsidiaries Held by public				
Funded debt	$	....	$105,795,000[46]	47.1
Preferred stock	.....	....	42,447,100	18.9
Premium on preferred stock	.....	....	340,620	0.2
Minority interest	.....	....	50,003	....
	$	....	$148,632,723	66.2
Securities of Engineers				
Contract payments	$ 81,812	0.1	$ 81,812	....
Preferred stock	$39,245,500	60.0	$ 39,245,500	17.5
Common stock and surplus				
Common stock	$ 1,909,968	2.9	$ 1,909,968	0.9
Capital surplus	17,076,576	26.1	17,076,576	7.6
Earned surplus	7,095,022	10.9	17,591,664	7.8
Total common stock and surplus	$26,081,566	39.9	$ 36,578,208	16.3
Total capitalization and surplus	$65,408,878	100.0	$224,538,243	100.0

Thus it appears that the preferred stock of Engineers represents 17.5% of consolidated capitalization and sur-

price with the conversion privilege was $60.94; and $80.50 since the expiration of that privilege, its overall average since issue is $67.16. The $5.50 series had an average of $53.98 while its warrant right existed, and an average of $85.23 since; it reached a high of $109.00 in 1929, and its overall average since issue is $64.52. The $6.00 preferred reached its highest market price in 1945; its average price since issue is $62.77. As of February 13, 1946, the latest date covered in the hearings, the $5.00 series was selling at 105⅛, the $5.50 series at 105¼, and the $6.00 series at 109.

Engineers common, issued in 1925, reached a high of 79⅝ in 1929 and a low of 1⅛ in 1935. On February 13, 1946 it was selling at 36.

[46] Of this amount $2,500,000 is due within one year.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

plus; that the preferred is junior to 66.2% and that it is senior to 16.3%.

Table X shows the earnings available for fixed charges and preferred dividends of the Engineers system for the period 1937 to 1945. The average coverage of fixed charges and preferred dividends for the last five periods was 1.4 times.

TABLE X

(000 Omitted)

Year	Consolidated Earnings Available for Fixed Charges Including Preferred dividends of Subsidiaries[47]	Fixed Charges, Preferred Dividends and Minority Interest of Subsidiaries[48]	Preferred Dividends of Engineers	Total Fixed Charges and Preferred Dividends	
				Amount	Times Earned
1937	$ 15,936	$12,168	$ 2,323	$ 14,491	1.1
1938	16,226	12,383	2,323	14,706	1.1
1939	17,553	12,264	2,295	14,559	1.2
1940	16,966	11,810	2,285	14,095	1.2
1941	16,773	11,620	2,263	13,883	1.2

12 mos. to 6/30/45	15,610	7,454	2,119	9,573	1.6
Total	$141,627	$92,436	$20,296	$112,732	1.3

Table XI gives Engineers' corporate income, corporate expenses, and income available for preferred dividend requirements for the period 1937 through June 1945. For the past five periods preferred dividend requirements on a corporate basis have been earned an average of 1.5 times. It should be observed that the sale of Puget Sound in 1943 and 1944 has strengthened the earnings of the company.

---

[47] Consolidated earnings for the year 1944 and the twelve months ended June 30, 1945 are shown after deduction of special charges in lieu of Federal taxes on income arising from premiums and expenses on redemption of bonds and losses on sale of transportation properties.

[48] Fixed charges as shown include amortization of utility plant acquisition adjustments.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

Dr. R. A. Badger, an expert witness for certain preferred stockholders, prepared an analysis of the three series of Engineers' preferred stocks. After analyzing the earnings and assets of Engineers, he selected for comparison the preferred stocks of five public utility holding companies which he believed to be similar to Engineers. These companies were compared with Engineers for the years 1940 to 1945 with reference to "times all charges and preferred dividends earned," "proportion of prior obligations to total capitalization," "book value of equity per share of preferred," "percent of net quick assets to prior obligations" and "times parent company dividends were earned." It appeared that in general the position of Engineers' preferred was somewhat below the average of the five other companies until the disposition of Puget Sound in 1943. As a consequence of that disposition, its position improved to slightly over the average for those companies. Badger concluded that on an overall basis Engineers was in a median or average position as compared to the five companies studied. On the basis of a comparison of the yields of the five securities studied, he concluded that the $5.00 preferred of Engineers had an average value of $107.49

[49] Does not include unusual dividend paid by El Paso Electric Company in the amount of $900,000.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

a share, the $5.50 preferred an average value of $118.31 a share, and the $6.00 preferred an average value of $129.07 a share.

Badger also prepared a study of the preferred stocks of ten operating and holding companies selected for the similarity of their earnings to those of Engineers. These companies on an average earned all charges and preferred dividends 1.49 times in 1943, as against 1.40 times for Engineers. In 1944 they earned overall charges 1.48 times, as against 1.54 times for Engineers. They covered preferred dividends, 2.52 times in 1943, as against 2.48 for Engineers, and in 1944 covered preferred dividends 2.46 times, as against a similar coverage of 3.20 for Engineers. The stocks selected sold at prices to yield between 3.9 and 5.4%, or an average yield for the ten stocks of 4.5%.[50] Badger applied this yield to the several classes of Engineers' preferred and obtained corresponding values of $111.11 for the $5.00 preferred, $122.22 for the $5.50 preferred, and $133.33 for the $6.00 preferred. Badger concluded, however, that in his opinion, and in view of the "investment characteristics" of the company and the conditions of the money market, a proper yield for the Engineers preferred, absent a call price, would be 4.6%, so that the corresponding investment worth per share of the three series would be $108.70, $119.57 and $130.33, respectively. He concluded further that, because of the redemption privilege, "the present investment values are represented by their call price, plus a slight premium to account for the time required to effect a call." This time he estimated at approximately three months and concluded that the fair investment values of the three series of Engineers' preferred are as follows:

---

[50] A recomputation during cross-examination resulted in a slight alteration in the figures for one company, but the change was insignificant in its relation to Badger's final conclusion.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

$5.00	cumulative	preferred	$106.25
5.50	"	"	111.38
6.00	"	"	111.50

No additional expert testimony on value was introduced into the record and no serious challenge was made in the proceedings to Badger's conclusion that the fair investment value of the preferred on a going concern basis is in excess of the call price. As a matter of fact, witnesses for Engineers testified several times to the same effect. Thus Barnes, president of Engineers, testified that, if there were no Holding Company Act or if the Act were to be repealed today, he would expect each of the series to sell somewhat above its voluntary redemption price; that the excess, however, would be small and would represent the discount of the present dividend yield for such time as the company might require to effect a refunding at a lower dividend rate; and that the voluntary redemption price acts as a "stopper." And Engineers in its brief states (at p. 5):

> "The record in this case shows that these amounts ($106.25, $111.38, $111.50, respectively) are substantially the present value or investment worth of these three series of stock, on a going concern basis and apart from the Act, under prevailing yields applied to comparable securities."

It is apparent that the preferred has an investment value at least equal to the respective call prices. We have indicated in previous opinions that the call price will ordinarily set a ceiling on the value of a security, for it provides a means, apart from the Act, whereby the security can be retired at a maximum price.[51] Accordingly, we need not

[51] *Buffalo, Niagara & Eastern Power Corp.*, S. E. C. (1945), Holding Company Act Release No. 6083; *New England Power Associates, et al.*, S. E. C. (1946), Holding Company Act Release No. 6470; *American Power & Light Co.*, S. E. C. (1945), Holding Company Act Release No. 6176. The New England plan has been approved by the United States District Court, 66 F. Supp. 376 (Mass. 1946).

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

attempt to determine whether, apart from the call provisions, the investment value of the preferred would exceed that ceiling.

Upon a full consideration of the record before us, we conclude that the payment of $100.00 per share, plus accrued dividends, to the preferred in retirement is not fair and equitable to the preferred stockholders, and that the fair and equitable standard would require the payment of an amount equal to the call prices of the securities, plus accrued dividends. We cannot, therefore, approve the provisions of Part I of the plan relating to the retirement of the preferred.

Counsel for one group of preferred stockholders has raised objection to a feature of the warrant plan which he claims is unfair as between groups of preferred stockholders. This provision would permit common stockholders of Engineers who also own preferred stock to use their preferred stock in payment of the subscription price of the Gulf States warrants. The unfairness is alleged to arise because these stockholders will be permitted to obtain Gulf States at the subscription price while a preferred stockholder owning no common who desires to acquire Gulf States stock will be forced to purchase warrants in the market. We are unable to see any unfairness in this provision. Any advantage to a stockholder owning both preferred and common comes wholly from his ownership of the common and is derived from rights properly issued to the common. Counsel could certainly not complain if a stockholder holding both common and preferred used cash received for his preferred to exercise the warrants received by reason of his holdings of common. This feature of the plan is merely a short cut to the same result. Counsel also asserts unfairness because a common stockholder who uses preferred in payment will have the benefit of a tax-free exchange, while the preferred stockholder owning no common will be immediately taxable for any profits which ac-

crue upon retirement of his stock for cash. We do not believe that this difference in tax consequences to the individual shareholder causes the plan to be unfair.[52]

B. *Fairness to the Common Stockholders*

The retirement of the preferred stock will be of immediate benefit to the common stockholders. As indicated above, the company at the time of the hearings had on hand idle treasury cash of over $14,650,000, while it is estimated that this sum will reach approximately $16,825,000 by the end of 1946. These funds have been accumulated through property dispositions and retained earnings. The management has pursued a policy of withholding dividends on the common stock until it is satisfied that the system has made all the adjustments that will be required of it under the Holding Company Act.[53] As a consequence the company has now accumulated a large amount of idle funds while it continues to have outstanding three substantial issues of preferred stock having fixed dividend requirements. Under the circumstances the elimination of this prior charge is highly beneficial to the common. Moreover, in so far as the retirement of the preferred is a step toward bringing the Engineers system into compliance with the Act, it hastens the day when the common will begin receiving dividend income.

No objection has been raised to the use of warrants for raising the cash needed to retire the preferred stock and as a method for distributing the shares of Gulf States to the common stockholders of Engineers. We recently had occasion to consider the fairness of the use of warrants for such purposes. In *Electric Bond and Share, et al.,* S. E. C. (1946), Holding Company Act Release No. 6879-1 we stated:

> "Generally speaking we have considered the use of warrants to be a satisfactory and appropriate means

---

[52] *Cf. New England Power Association,* S. E. C. (1946), Holding Company Act Release No. 6470.

[53] No dividends have been paid on the common since 1932, although earnings have been available since 1938.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

of distribution of portfolio securities required by Section 11."

In that case a common stockholder had urged that the warrants were unfair because he lacked sufficient cash to exercise them and feared that he would be unable to realize the full value of his interest in a sale of the warrants. We pointed out that warrants give the stockholder several choices: he may exercise his rights to subscribe or he may elect to sell his warrants; or he may sell part of them and exercise the remainder; or he may elect to sell all or part of his stock and use the proceeds to exercise the warrants. We also pointed out that the stockholder would be harmed only in those cases where he sells all or part of his warrants and the amount received is inadequate to compensate him for his loss of position in the company. We were unable in that case to find that there was any reason to believe that the stockholder would be so harmed, and we are likewise unable in this case to see any reason why there will not be a "substantial correspondence between the market price of the warrants and the difference between the offering price of the stocks and the market price of the stocks."[54]

We have elsewhere discussed the proposed offering of reclassified Gulf States common stock and concluded that a price of $14 per share would provide an adequate margin for the warrant program. The present dividend rate of the Gulf States common is equal to approximately 80¢ per share on a reclassified basis. At $14 per share a dividend of 80¢ would provide a yield of 5.72%, and on an earnings

[54] Engineers has introduced an exhibit showing that when new issues appear on the market there may be a tendency for them to be underpriced until they become seasoned; it is suggested that this would be reflected by a lower market price for the warrants. To the extent that this may hold true in the case of Gulf States, it is unlikely that this underpricing would exceed the expense of an offering through underwriters (the alternative to a warrant program), which expense would have to be borne by the common stockholders.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

basis of $1.31 a share, the times earnings ratio would be 10.7. These earnings indicate an inherent value in the warrants should they be issued with a subscription price of $14 or less.

On the basis of earnings available for common stock for the 12 months ended June 30, 1945, the following effect on a share of Engineers' common stock will take place upon operation of the plan, assuming the bank loan were deleted and the warrant price increased to $14 per share:

TABLE XII

Per share of common stock	
Earnings on a consolidated basis	3.16
Earnings on a consolidated pro forma basis	2.57
Decrease in Engineers' earnings	$0.59
Earnings on 1/5 share of El Paso	0.32
Net decrease in earnings	$0.27
Earnings per share of Gulf States	1.31
Net increase in earnings if Engineers' stockholder purchases Gulf States' common stock	$1.04

The additional earnings of $1.04 per share would be realized by the purchase of Gulf States' common stock at $14.00 per share—13.4 times the increased earnings, or a return of 7.43% on such cost. The foregoing facts bear on the fairness of the plan to the holders of Engineers' common. However, since the present plan cannot be approved without amendment and since the proposed warrant price may be one of the provisions amended, we need not now enter a finding on the fairness of this price.

There is one further matter which merits discussion. Engineers argues that the payment to the preferred of any amount in excess of $100.00 per share would be inequitable to the common stockholders. It points out that the Act has required substantial dispositions of property, some of which,

notably Puget Sound, were sold at a substantial loss, while the disposition of others is asserted to have eliminated whatever benefit the common once obtained from its investment in a company with a diversified portfolio of securities. Engineers contends that only by restricting the amount paid the preferred can the "loss", which it is said was imposed by the Holding Company Act, be shared by the preferred and the common stockholders and that any premium would only be a "windfall" to the preferred. Although there is novelty in this argument we think it is without substance.[55] The Supreme Court in the *Otis* case indicated that the Holding Company Act was not intended to create a "windfall" to any class of security holders; but what was meant by the Court was that the Holding Company Act should not be permitted to mature claims and thereby transform the existing value of a security in a going concern into a matured claim which might be greater or less than such existing value. If, as in the *Otis* case, the matured claim of the preferred is greater than its existing value and the Act were permitted to mature the claim, the Act would create a windfall to the preferred. Conversely, if the matured claim were less than the existing value, and payment were permitted on that basis, the Act would create a windfall to the common. To argue here in terms of a windfall to the preferred at the expense of the common, however, is to beg the question. Whatever is taken *unfairly* from one class of security holders of necessity becomes a windfall to the recipient; but whatever is the *fair* measure of a security holder's claim

---

[55] In passing, we should point out that we do not accept counsel's hypothesis that the *Act* has caused the asserted losses. In all of its divestments, Engineers has been free in its choice of methods, and, within limits, to choose the time for divestment. All sales have been negotiated by Engineers at arm's-length. If, as in the case of Puget Sound, the sale brought less than the carrying value on the books of Engineers, the indication is that the carrying value was excessive and not that the sales price was low. It is significant that the market price of Engineers' common when the plan was filed was the highest since 1932 and that the price has been rising steadily since 1942 when the program of simplification got under way. As shown in Footnote 45, *supra*, Engineers' common reached a low of 1⅛ in 1935. By 1945, when the plan was filed, it had reached a high of 37.

should properly be given to him. We are required by Section 11(e) to apply the fair and equitable standard to liquidations and recapitalizations occurring under the Holding Company Act. The courts have reiterated that the fair and equitable standard is that of "absolute priority", which requires that full compensation be given the senior securities before any payment or participation is permitted to the junior securities. In our treatment of fairness to the preferred stockholders under the plan we have found that full compensation to the preferred requires that they be paid an amount equal to their redemption prices in order to satisfy their prior claim to the assets and earnings of the company. The common cannot now contend that recognition of the full priority of the preferred stockholders as required by the statute is unfair to the common.

We conclude that the plan, if amended in accordance with this Opinion, would be fair and equitable to the common stockholders of Engineers.

Other Matters

Separability of Parts of the Plan

As we have indicated, the proposed plan is separated into two parts. Part I sets forth the mechanics of the plan and provides for the retirement of the preferred at $100.00 per share and accrued dividends. Part II provides for a separate finding on any amount which may be found payable to the preferred in addition to $100.00. Engineers has made a formal motion that we deal separately with the two parts and issue a separate order for each part. This motion was opposed by the staff and the preferred stockholders.

The purpose of the separation is set forth in applicant's brief (at p. 44):

> ". . . In this manner it is hoped that a large portion of the program for the elimination of Engineers as

Exhibit B to Application of Securities and Exchange Commission (Cont'd).

> a holding company can be carried into effect promptly and without awaiting the determination of the admittedly controversial question as to the amount, if any, in addition to $100 per share of the preferred stock of Engineers plus accrued dividends, which should be paid to such stockholders."

The company's need to put its idle cash to use and reduce its preferred dividend charges as soon as possible is obvious. And we are in complete accord with the stated objectives of immediate distribution of $100.00 to the preferred (without prejudice to its right to assert a further claim) and expeditious solution of the Section 11 problems of Engineers. However, we do not believe the attainment of these objectives requires two separate orders or a separation of the plan into two parts and we see no need for any such procedure. We think the objectives can easily be achieved, with fairness to both the common and the preferred, by the method which we have followed in other similar cases.

We have approved plans whereby immediate payment was made of the amount conceded to be due and the question of any additional amounts payable was reserved for further litigation. There would seem to be no reason why, upon the District Court's approval of this plan, a similar payment could not be made to the preferred here, thereby ending any claim to dividends while their rights to any additional payment are being litigated and are secured in an escrow. This of course assumes that the escrow would cover not only the amount in dispute but also compensation for the withholding, during the period of litigation, of any additional amount found payable.

Engineers has also indicated that the proposed severance was designed to preserve its right to challenge before the Commission or the courts any additional payment which we find due the preferred. We agree that Engineers should

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

have this right, and we see nothing incongruous in the company's challenging before the courts this portion of the plan which has been inserted at our insistence and with which it finds itself in disagreement.[56]

For the reason indicated, we must deny Engineers' motion for separate consideration and decision on each of the two parts of the plan.

Escrow Provision

We have concluded that the preferred stockholders are entitled to receive on retirement an amount equal to the redemption price. Engineers has expressed its intention to contest any such finding in the courts, thus giving rise to the possibility that litigation will ensue which may last for some period of time. We have also indicated our belief that this litigation does not justify retaining Virginia or continuing Engineers for that period, and have stated that ample provision can be made to safeguard the preferred by means of an escrow arrangement. Engineers has indicated a willingness to amend the plan so as to provide such an escrow.

The staff has submitted an estimate of $4,000,000 which it considers an adequate amount for the escrow. This figure was obtained as follows:

Premium on preferred stock	$3,204,795
Dividend adjustment (assuming delay in payment for three years)	484,455
	$3,689,250

An additional sum of about $310,750 was included to cover all fees and expenses, including the fees and expenses of a depositary. No challenge has been raised to these figures

[56] *Cf. Electric Bond & Share Company,* S. E. C. (1946), Holding Company Act Release No. 6879-1 at p. 14.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

and on examination we find them to be adequate and reasonable.[57]

Should the additional payment to the preferred be sustained we believe that they are entitled to compensation for the sum withheld from them during the period of litigation and the escrow should so provide. This return should be determined by ascertaining the yield for each series of preferred on the basis of its dividend rate and the price ultimately deemed payable. In this manner the preferred will receive for the period of the escrow a return on the amount in escrow which is measured by the return which would have been received by it if the stock remained outstanding.

The company has indicated that it would prefer to place in escrow shares of Virginia rather than cash in order to receive some return during the period of the escrow. However, since the purpose of the escrow is to protect the preferred stockholders, we cannot permit the pledging of any securities whose value may fluctuate with the vicissitudes of the market. It is necessary that the company place in escrow cash or government securities of appropriate type. We recognize that this escrow may result in some loss to the common who might otherwise employ the funds at a higher return. But the escrow serves two purposes: it enables the common to retire $100 per share of the preferred immediately, thereby stopping the payment of further dividends on that amount, and it provides security for the payment of any additional amount which may be found due the preferred. The immediate cessation of preferred dividends can be justified only if the preferred can be assured of its eventual full payment. The immediate cessation of preferred dividends is, of course, of substantial advantage to the common and the loss of a return on the escrowed amount is merely a necessary cost of securing this advantage.

---

[57] Applicant's brief uses the figure $3,700,000 as the approximate amount of the premiums payable on call plus an amount to cover compensation for the delay in effecting payment of the full amount which may be found payable to the preferred.

Exhibit B to Application of Securities and Exchange Commission (Cont'd).

Fees and Expenses

Thomas W. Streeter, a director of Engineers and the owner of a substantial amount of preferred stock, voiced continuing objection to the plan while it was being considered by the Board of Directors. At his suggestion a resolution was adopted authorizing the company to reimburse preferred stockholders for costs up to $5,000 incurred in the employment of Lawrence R. Condon as their counsel "in order to assure that the interests of the preferred stockholders of this company will be represented by counsel in the proceedings . . . involving the plan . . . ." The resolution also stated that the payment to Condon would be subject to prior approval by this Commission, that it was without prejudice to his right to apply for a larger amount or the company's right to oppose it, and that "nothing herein shall be deemed to be an admission by the company that the Securities and Exchange Commission has jurisdiction over the payment of fees in connection with the pending Section 11 (e) plan." The plan contains no provision for the supervision by the Commission over fees and expenses. In setting the plan for hearing we ordered that attention would be directed, among other things, to:

> "5. Whether the plan should be modified to include a provision for the payment by Engineers of all fees and expenses by whomsoever incurred in connection with said plan or the proceedings with respect thereto which the Commission may determine, award, allow or allocate and whether the fees and expenses to be paid in connection with the consummation of the plan and all transactions incidental thereto are for necessary services and are reasonable in amount."

Engineers has taken the position in its brief and at oral argument that the Commission has no jurisdiction to

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

supervise fees and expenses incurred in connection with plans submitted for approval under Section 11 (e). It argues that Section 11 (e) contains no specific provision covering fees and that this omission indicates a Congressional intent not to give the Commission such jurisdiction; in this connection it points to Section 7 (d) (4) of the Act and Sections 241 to 250 of Chapter X of the Bankruptcy Act which include express language conferring jurisdiction with respect to fees.

Although Section 11 (e) contains no specific provision covering the allowance of fees and expenses, it has been our consistent practice over a long period of time to exercise jurisdiction over fees and expenses in Section 11 (e) plans. This is the first case in which substantial question has been raised as to our power in this respect.[58]

Plans presented for approval frequently are opposed by one or more groups of security holders. The management's responsibilities are, of course, to all of the company's security holders. But it would be naive to overlook the normal responsiveness of management to the class of securities which controls the voting power and which has selected it. And, once the management has devised and filed its plan, it is natural that, as a proponent of the plan, it should exert its best efforts towards securing approval. There is thus a strong possibility that opposing groups, unless they are willing to employ separate counsel at their own expense, will not be adequately represented and that, as a consequence, the thoroughness of our hearings and our ability to explore all aspects of the plan would be impaired for lack of the beneficial contributions such interested persons might otherwise make. We have been charged with responsibilities to all security holders, regardless of class, and the fulfillment of that obligation requires adequate representation of their respective interests and points of

[58] *Cf. Utilities Employees Securities Co.*, S. E. C. (1944), Holding Company Act Release No. 5349.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

view in proceedings before us. Unless there were some assurance that persons who contribute to the development of a plan and otherwise benefit the estate will receive fair compensation, constructive suggestions would be discouraged. The payment of fees and allowances to such persons from the estate, under court supervision, is an accepted principle of equity receivership and corporate reorganization law. In exercising jurisdiction over fees and expenses we have endeavored to assure adequate compensation to qualified representatives of the various groups of security holders and thereby to assure adequate coverage of the issues before us.[59] We think it clear that the statute confers that power and obligation.

First, we believe that the "fair and equitable" standard which we must apply in approving the plan necessitates a consideration by us of fees and expenses incurred in connection with the plan. Section 11 (e) is a general and broad grant of power to this Commission. The section establishes two general standards by which we must judge a plan: It must be necessary to effectuate the provisions of Section 11 (b) and it must be fair and equitable to the persons affected by such plan. These two standards, in spite of their generality, have clearly ascertainable meanings. The objectives of Section 11 (b) are contained in the Act and our findings that a plan is "necessary" to effectuate those objectives is thus measured by the Act itself. On the other hand, although the "fair and equitable" standard is not defined in the Act, it has attained a definite meaning through usage in reorganization law[60] and that meaning has been incorporated in Section 11 (e).[61] The courts have held that the "fair and equitable" standard covers all aspects of the reorganization process and includes not

[61] *Otis & Co. v. S. E. C.*, 323 U. S. 624 (1945).

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

only the strict priority rule, but also extends to subordination of claims, full disclosure, prevention of overreaching by insiders and all other considerations of equity, depending upon the "exigencies of varying situations."[62] It seems obvious that supervision over fees must be exercised not only to encourage participation of interested persons in the exploration of all equitable considerations but also for the even more direct purpose of insuring against overreaching through payment of excessive fees to insiders and guarding against a depletion of assets to the detriment of security holders. While it is true that Chapter X contains specific provisions relating to fees, it must be recognized that it is a complete catalog of the reorganization process and endeavors to cover in detail all of its aspects; Section 11 (e), on the other hand, is in general terms and adopts only the key phrase of "fair and equitable" as the criterion to be applied to all aspects of the plan.

Second, we think it most significant in ascertaining our powers under Section 11 (e) that Sections 7, 10 and 12 do contain express grants of authority over fees and expenses. These are specific sections relating to sales and acquisitions and set forth in elaborate detail the standards, requirements and tests which we must apply in determining whether to approve such transactions. By including specific reference to fees, Congress indicated that it considered the question of fees and expenses of importance in the issuance or acquisition of securities. Every plan under Section 11 (e) involves in some manner the exchange, issue, distribution, alteration or cancellation of securities. Congress cannot have intended that in so far as a plan involves a transaction within the purview of Section 7, 10 or 12, we can supervise fees—but only to the extent that the fees relate to that particular transaction. In a thoroughgoing recapitalization or liquidation under Section 11 (e) the ex-

[62] *American Ins. Co. v. City of Avon Park*, 311 U. S. 138, 146 (1940).

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

change or issuance of securities is but one aspect of the larger transformation of the corporation and is inextricably bound up with that change. It would be impossible to rule separately on fees for particular portions of a plan. In the preparation of a plan, considerations of its policy, economy, legality, tax consequences, and its fairness and feasibility are all interrelated. Thus, even though the Engineers plan involves relatively few transactions, each of its parts are interrelated. The price at which the warrants on Gulf States will be exercised was determined, in part, by the size of the bank loan contemplated. The bank loan, in turn, gave rise to the trusteeship, which in turn raises the problem of when disposition will be made of the Virginia holdings. The entire plan depends on a favorable tax consequence. We obviously could not segregate the services performed in connection with each segment of the plan or in any way appraise their value without considering the plan in its entirety.

Third, the importance of obtaining adequate representation before us of all interested persons, the need to prevent overreaching in order to conserve assets so that the plan will be fair to all, and the express statutory duty to control fees and expenses with respect to at least some portions of the plan, all indicate that the supervision of fees in Section 11 (e) plans is in the public interest and necessary for the protection of investors. Thus, apart from the other considerations we have discussed, Section 11 (e) in expressly providing that plans may be submitted for our approval "in accordance with such rules, regulations or order as the Commission may deem necessary or appropriate in the public interest or for the protection of investors or consumers," permits us to act by order to require that the matter of fees be covered by the plan and subject to our supervision. Counsel for Engineers argue that, since no rule or regulation or order is now in general effect, the Commission may not impose such a restriction on their

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

plan. In so arguing they misinterpret the meaning of the word "order" and misconstrue the power of the Commission to act in individual cases. An order issues in a particular case and is used with reference to the situation presented in the particular case. If that were not true, there would be little point in the Act's enumeration of the power to act by "rule, regulation or order."

For the reasons indicated, we believe it is clear that we have the power and obligation to supervise fees and expenses incurred in connection with a Section 11 (e) plan.[63] Accordingly, we find that the plan is incomplete in failing to provide that the payment of fees and expenses shall be subject to award or allocation by the Commission and the plan should be amended to include such a provision.

Compliance with the Standards of Section 7

We have examined the proposals to reclassify the common stock issues of Gulf States and El Paso in order to facilitate their distribution under the plan. At the present time the outstanding common of both companies is entirely owned by Engineers; consequently, the reclassification is merely a book entry which will not affect any public holders of the stock. Both companies, however, have preferred stock outstanding in the hands of the public. To the extent that the preferred stock has voting rights, any increase in the number of shares of common will normally diminish the proportionate voting power of the preferred. Section 7 (e) requires that we examine into the effect of any such reclassification on the voting power existing among the holders of securities of the company.

---

[63] Jurisdiction over fees has been reserved in practically every Section 11(e) plan which we have approved. See, e.g., *Buffalo, Niagara and Eastern Power Assoc.*, S. E. C. (1945), Holding Company Act Release No. 6083. It is not without some significance that this is the first occasion in which this jurisdiction has been the subject of substantial challenge. In *Puget Sound Power & Light Co., et al.*, 13 S. E. C. 226 (1943), where Engineers had joined in the application, the plan there proposed also lacked adequate provisions for Commission supervision of fees and expenses. Counsel for preferred stockholders objected to this deficiency and the Commission's order contained a condition reserving such jurisdiction. Engineers did not challenge this condition.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

In the case of Gulf States, it is proposed to change the voting rights so as to give the present preferred stock seven votes for each share in lieu of the present one vote for each share. At the present time there are authorized a total of 300,000 shares of common and 120,000 shares of preferred, giving the preferred 28.5% of the voting power. After reclassification of the common to 1,909,968 shares and the increase in preferred voting power to seven votes per share the preferred will have 30.5% of the voting power. Under the circumstances, we do not believe the reclassification will result in an unfair or inequitable distribution of voting power.

At the present time El Paso has outstanding 15,000 shares of preferred and 150,000 shares of common. It is proposed to increase the common to 381,994 shares. The preferred has no voting power on ordinary corporate matters unless there has been a failure to pay dividends for eight consecutive quarters, in which case they may elect one less than a majority of the board of directors. The voting power of the preferred will not be affected by the proposed reclassification and no unfair or inequitable distribution of voting power will result.

We are informed that no approval of the transactions by any state agency is required.

We find no reason for making any adverse findings under Section 7 and accordingly we can approve the applications to reclassify the Gulf States and El Paso common stocks. However, since these applications are presented for the purpose of facilitating the plan which cannot be approved in its present form, we will withhold action on the applications pending the submission of an amended plan.

Form of Order

Applicant has requested that we make findings necessary to bring the plan within the provisions of Sections 371

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

and 1808(F) and Supplement R of the Internal Revenue Code. Such findings would be clearly appropriate and upon receipt of an amended plan in accordance with this opinion we shall enter an order containing those findings.

Summary of Conclusions

1. We have found those provisions of the plan providing for the disposition of Gulf States and El Paso and for the dissolution of Engineers to be necessary under the requirements of the Act. We are unable to make a similar finding as to certain mechanics of the plan and accordingly we cannot approve the plan in its present form.

2. We believe that a bank loan is unnecessary and would serve only to delay without justification full compliance with the Act; the record indicates that there are several other sources of funds open to the company which would not have any delaying effect.

3. We believe that the purposes for which the three-year trusteeship was proposed can be satisfied in ways which would not require retention of a large part of the staff of Engineers and retention of $65,000,000 of Virginia stock during this period; upon payment of $100.00 per share and accrued dividends to the preferred stockholders of Engineers and creation of an appropriate escrow to protect their right to any additional payment found due, all or substantially all of the stock of Virginia can be distributed immediately.

4. If the management feels that some provision should be made to earmark a part of the company's assets as a reserve for any tax liabilities which may be found against the company, it would appear that appropriate provision could be made.

5. We have found that the plan is unfair in its treatment of the preferred stockholders and that fairness requires

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

that they be paid an amount equal to their respective call prices on retirement.

6. While we cannot grant applicant's motion for separate orders on the two parts of the plan, we do believe that the company is justified in its desire to stop the accrual of dividends while the controversy over the amount payable to the preferred is being litigated. We believe this objective can be achieved by the creation of an escrow which includes a provision to compensate the preferred stockholders for the time full payment is withheld from them.

7. We believe the plan is incomplete and unfair in failing to include a provision for supervision by the Commission over the payment of fees and expenses incurred in connection with the plan.

8. We can approve the applications under Section 7 providing for the reclassification of the common stock of Gulf States and El Paso.

We shall not enter any order at this time. If within a period of thirty days Engineers files a plan amended in conformity with this Opinion, we shall enter an order approving the amended plan and we shall apply to an appropriate District Court for approval and enforcement of the plan. If no amended plan is filed within the period specified (or such further extension as we may grant), we shall enter an order disapproving the present plan and we shall take such action as seems appopriate to enforce expeditious compliance with Section 11.

By the Commission (Commissioners McConnaughey and McEntire), Chairman Caffrey and Commissioner Hanrahan concurring in the result.

(SEAL)

ORVAL L. DUBOIS.
Secretary.

ENGINEERS PUBLIC SERVICE COMPANY

Condensed Corporate Balance Sheets Actual Adjusted as at June 30, 1945 and Pro Forma Giving Estimated Effect to Operations During the Period July 1 to December 31, 1945 and to Consummation of Part [illegible] of the Plan

EXPLANATION OF ADJUSTMENTS

[a] Adjusted to give effect to sale of The Western Public Service Company (Delaware) on February 28, 1946 for approximately $1,500,000.

[1] The net decrease of $4,645,389 in capital surplus is explained as follows:

Decrease:	
The distribution of the common stock of El Paso as a dividend in liquidation from the capital of Engineers, pro rata to common stockholders	$6,645,389
Increase:	
Transfer of unused portion of reserve for depreciation in value of investments applicable to securities of El Paso to capital surplus	2,000,000
Total decrease	$4,645,389

[2] The increase of $3,565,830 in earned surplus is explained as follows:

Estimated increase in earned surplus resulting from operations during the period July 1 to December 31, 1945		$1,515,545
Book profit on sale of Gulf States:		
Proceeds from sale of common stock	$21,964,632	
Less: Carrying value of common stock	19,914,347	2,050,285
Increase		$3,565,830

[3] Engineers will covenant that it will not pay any dividends on its common stock until the $3,000,000 note payable is fully paid.

ENGINEERS PUBLIC SERVICE COMPANY AND SUBSIDIARIES

Condensed Consolidated Balance Sheets Actual Adjusted as at June 30, 1945 and Pro Forma Giving Estimated Effect to Operations During the Period July 1 to December 31, 1945, Certain Adjustments and Consummation of Part I of the Plan

EXPLANATION OF ADJUSTMENTS

a Adjusted to give effect to sale of The Western Public Service Company (Delaware) on February 28, 1946 for approximately $1,500,000.

b Gives effect to estimated operations for the period July 1, 1945 to December 31, 1945, tax adjustments resulting from loss claimed on sale during 1945 of transportation properties and accelerated amortization of war facilities due to termination of war emergency period, and payment of $5,100,000 notes payable on December 31, 1945, all pertaining to Virginia.

c Provision is being made, pursuant to orders of regulatory commissions, for the amortization of plant acquisition adjustments in the amount of $11,237,468, by charges to income over 15-year periods, commencing in 1943 and 1944. This amount excludes $93,374 applicable to gas properties which has been fully reserved.

d Represents the excess ($12,614,495) of the recorded investment in shares of Virginia over the adjusted net assets applicable to such shares at dates of acquisition which is explained as follows:

Investment		$27,762,262
Less:		
Capital represented by such shares	$14,546,228	
Surplus of Virginia at dates of acquisition	601,539	15,147,767
		$12,614,495

e Approximately $7,042,000 of the pro forma consolidated earned surplus is not available for the payment of dividends on common stock of Virginia due to covenants made by such company restricting the payment of dividends on common stock, and the parent company earned surplus of $10,660,852 included in the pro forma consolidated earned surplus would not be available for the payment of dividends on its common stock until the $3,000,000 note payable is paid in full.

1 Increase in utility plant of Virginia in the amount of $2,570,000 representing estimated construction from July 1 to December 31, 1945.

2 To state the Norfolk gas utility plant at original cost.

Book value of Norfolk gas utility plant	$5,513,847
Original cost of Norfolk gas utility plant	5,420,473
Plant acquisition adjustments	$ 93,374

3 Reduction in acquired surplus representing establishment of reserve for gas plant acquisition adjustments.

Plant acquisition adjustments	$ 93,374
Minority interest	202
Engineers' proportion	$ 93,172

4 Decrease in cash of $2,439,455 is explained as follows:

Payment of notes payable of Virginia prior to maturity	$5,100,000
Net increase in cash from operation of Engineers and Virginia from July 1 to December 31, 1945	2,660,545
Net decrease	$2,439,455

5 Decrease in post-war refund of Federal excess profits tax in the amount of $219,755 due to an adjustment of over accrual for 1944 Federal income taxes of Virginia and its subsidiary.

6 Anticipated refund in the amount of $1,986,093 of Federal income taxes of Virginia applicable to prior periods, as shown in items (c) and (d) of Footnote 11.

7 Decrease in notes payable in the amount of $6,235,000 is explained as follows:

Payment of notes payable of Virginia prior to maturity	$5,100,000
Retirement of notes payable of Virginia during the period July 1 to December 31, 1945 at maturity dates	1,135,000
Total decrease	$6,235,000

8 Decrease in taxes accrued in the amount of $3,151,177 is explained as follows:

Portion of over accrual for 1944 Federal income taxes of Virginia and Citizens Rapid Transit Corporation (prior subsidiary of Virginia) resulting from sale of transportation properties	$3,004,512
Over accrual for 1945 Federal income taxes of Virginia resulting from termination of accelerated amortization	146,665
Total decrease	$3,151,177

9 Decrease in other current liabilities in the amount of $146,223 is explained as follows:

Adjustment of post-war refund applicable to Federal income taxes of Citizens Rapid Transit Corp.	$ 18,459
Transfer to earned surplus of the balance of the provision for Federal income taxes of Citizens Rapid Transit Corp. for 1944 in excess of the liability due	127,764
Total decrease	$ 146,223

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

ENGINEERS PUBLIC SERVICE COMPANY AND SUBSIDIARIES

Condensed Consolidated Balance Sheets Actual Adjusted as at June 30, 1945 and Pro Forma Giving Estimated Effect to Operations During the Period July 1 to December 31, 1945, Certain Adjustments and Consummation of Part I of the Plan

EXPLANATION OF ADJUSTMENTS (Continued)

10 Increase in depreciation reserve from operations for the period July 1, 1945 to December 31, 1945, in the amount of $1,633,600.

11 Increase in "Earned surplus since May 31, 1938 parent company's proportion" in the amount of $9,777,762 is explained as follows:

(a) Estimated operations for the period July 1 to December 31, 1945, after giving effect to $3,354,604 reduction in Federal income taxes due to accelerated amortization of war facilities	$ 4,878,610	
(b) Portion of over accrual for 1944 Federal income taxes of Virginia resulting from sale of transportation properties (recorded in August 1945)	2,797,149	
(c) Adjustment of 1944 provision for Federal income taxes of Virginia representing claim for refund resulting from sale of transportation properties (recorded in December 1945)	1,009,750	
(d) Claim for refund of Federal income taxes applicable to prior years due to accelerated amortization of war facilities of Virginia (recorded in December 1945)	976,343	
(e) Adjustment of 1944 provision for Federal income taxes of Citizens Rapid Transit Corp. as shown in 9 above	127,764	
Total	$ 9,789,616	
Less amount applicable to minority interest	11,854	
Net increase in "Earned surplus since May 31, 1938 parent company's proportion"		$ 9,777,762

12 Elimination of excess cost of investments in shares of subsidiaries over stated value on books of subsidiary companies at dates of acquisition is as follows:

	Investments	Stated Value on Books of Subsidiary Companies	Excess Cost
El Paso	$ 6,645,389	$ 3,848,692	$ 2,796,697
Gulf States	19,914,347	11,101,125	8,813,222
	$26,559,736	$14,949,817	$11,609,919

13 Decrease of investment in associated company representing the sale by Virginia of its investment in Epsco, Inc. in the amount of $39,980.

14 Decrease of cash in the amount of $9,590,888 is explained as follows:

Cash payment to preferred stockholders ($100 per share)		$39,245,500
Cash to be received as follows:		
Bank note to be issued	$ 3,000,000	
Conversion of U. S. securities	4,650,000	
Sale of Gulf States	21,964,632	
Sale by Virginia of its investment in Epsco, Inc.	39,980	
Total increases		$29,654,612
Net decrease in cash		$ 9,590,888

15 Unused portion of Engineers' reserve for depreciation in value of investments applicable to securities of El Paso transferred to capital surplus in the amount of $2,000,000.

16 Decrease in capital surplus in the amount of $1,220,351 is explained as follows:

Decrease resulting from distribution of the common stock of El Paso as a partial dividend in liquidation from the capital of Engineers pro rata to common stockholders		$ 6,645,389
Increases:		
Transfer from reserve for depreciation in value of investment in securities of El Paso	$2,000,000	
Consolidating adjustment representing earned surplus of Virginia at May 31, 1938 earned subsequent to date of acquisition and prior to May 31, 1938, restricted at that date as a result of an accounting reorganization of Engineers transferred to capital surplus	3,425,038	5,425,038
Net decrease		$ 1,220,351

17 Increase in consolidated earned surplus of $2,050,285 is explained as follows:

Proceeds from sale of Gulf States common stock	$21,964,632
Book cost to Engineers	19,914,347
Book profit on sale of Gulf States common stock credited to earned surplus	$ 2,050,285

There is a contingent asset of approximately $2,000,600 representing possible refunds of Federal income and excess profits taxes.

ENGINEERS PUBLIC SERVICE COMPANY

Condensed Corporate Income Statements Actual for the Twelve Months Ended June 30, 1945 and Pro Forma Giving Estimated Effect to the Consummation of Part I of the Plan

Explanation of Adjustments

[1] The decrease in common stock dividends is explained as follows:

Decreases:	
Gulf States	$1,330,000
El Paso	993,750
Western	41,250
Total decrease in common dividends	$2,365,000
Less increase in VEPCO common dividends	205,326
Net decrease	$2,159,674

[2] The decrease in preferred stock dividends represents income from Savannah Electric and Power Company (sold) and El Paso Electric Company of Delaware (dissolved) in the amounts of $22,000 and $2,999, respectively, or a total decrease of $24,999.

[3] The decrease in interest resulting from the sale of Western and Missouri Service Company amounted to $25,440 and $23,000, respectively, or a total of $48,440.

[4] The decrease of miscellaneous revenue in the amount of $555,723 is detailed as follows:

From miscellaneous investments:	
Savannah Electric and Power Company (preferred dividend)	$ 11,000
Savannah Electric and Power Company (common dividend)	458,555
Missouri Service Company (bond interest)	64,475
Northern Kansas Power Company (open account interest)	125
Total miscellaneous investments	$534,155
From miscellaneous revenue:	
Principally on interest from U. S. securities	21,568
Total decrease	$555,723

[5] The decrease in expenses of $124,779 is due to the elimination of subsidiary companies.

[6] The net increase in other taxes of $105 is explained as follows:

Increase in New York State and City taxes	$5,039
Less reduction Federal capital stock, Delaware franchise and miscellaneous taxes	4,934
Net increase	$ 105

[7] Estimated interest at 1½% per annum on proposed $3,000,000 bank loan.

[8] The decrease of $95,480 in Federal income taxes is due to a reduction in income of Engineers.

[9] Engineers preferred stock will be entirely eliminated.

Explanation of Adjustments

[a] Actual adjusted to reflect the elimination of subsidiaries that have been sold within the twelve-month period, sale of Western on February 28, 1946, distribution of El Paso and Gulf States common stock.

[b] The provision for Federal income taxes includes provision for estimated excess profits taxes after reductions (1) of $850,000 resulting from amortization of emergency facilities and (2) of $4,424,831 related to and applied against items totaling $6,359,232 charged directly to surplus.

[1] The increase in operating revenue in the amount of $927 represents a reversal in consolidation for inter-company power sales between Missouri Service Company and The Northern Power Company which had been previously eliminated in giving effect to the consolidated income statement of Engineers.

[2] The net decrease in operation in the amounts of $115,184 is explained as follows:

Decrease in expenses of Engineers		$124,511
Increases:		
Increase in expenses of Virginia due to cancellation of service contract with Epsco, Inc.	$8,400	
Increase in expenses represents the contra in item (1) above	927	9,327
Net decrease		$115,184

[3] The decrease in Federal income taxes of $102,662 is explained as follows:

Reduction due to decrease in income of Engineers	$ 95,480
Reduction due to increase in expenses of Virginia	7,182
Total decreases in Federal income taxes	$102,662

[4] The net increase in other taxes of $105 is explained as follows:

Increase in New York State and City taxes	$ 5,039
Less reduction in Federal capital stock, Delaware franchise and miscellaneous taxes	4,934
Net increase in other taxes	$ 105

Exhibit B to Application of Securities and Exchange Commission (Cont'd):

Appendix A
Part IV
Page 3 of 3 pages

5 The decrease in other income in the amount of $105,909 consists of a decrease in earnings of $84,341 from subsidiaries which were sold prior to June 30, 1945 and a decrease of miscellaneous revenue of $21,568.

6 The net increase in interest and amortization of $93,172 is explained as follows:

Increases:	
The increase in interest income to Engineers from The Western Public Service Company and Missouri Service Company represents a reversal in consolidation for inter-company interest which had been previously eliminated in giving effect to the consolidated income statement of Engineers in the amounts of $25,440 and $23,000, respectively	$ 48,440
Interest at 1½% per annum on proposed $3,000,000 bank loan	45,000
Total increases	$ 93,440
Decrease resulting from the elimination of non-recurring interest of Engineers	268
Net increase	$ 93,172

7 The increase in preferred dividend requirements of $23,500 represents a reversal in consolidation for inter-company preferred dividend income from Savannah Electric and Power Company and El Paso Electric (Del.) in the amounts of $22,000 and $1,500, respectively, which had been previously eliminated in giving effect to the consolidated income statement of Engineers.

8 Engineers preferred stock will be entirely eliminated.

Exhibit B to Application of Securities and Exchange Commission (Cont'd)

ENGINEERS PUBLIC SERVICE COMPANY

(Incorporated)

Plan Pursuant to Section 11(e) of the

PUBLIC UTILITY HOLDING COMPANY ACT OF 1935 FOR DIVESTMENT OF ASSETS AND RELATED MATTERS

DIVISION A

Purposes of Plan

1. Compliance with orders of the Securities and Exchange Commission ("the Commission") directing the divestment by Engineers Public Service Company (Incorporated) ("Engineers") of its interest in El Paso Electric Company ("El Paso") and Gulf States Utilities Company ("Gulf States").

2. The divestment by Engineers of its interest in Virginia Electric and Power Company ("Virginia").

3. The retirement of the Preferred Stock of Engineers at $110 per share and accrued dividends in the case of the $6 Cumulative Dividend Preferred Stock and the $5.50 Cumulative Dividend Preferred Stock and at $105 per share and accrued dividends in the case of the $5 Dividend Convertible Preferred Stock.

4. The dissolution and liquidation of Engineers.

DIVISION B

Introductory Statement

Engineers, organized and existing under the laws of the State of Delaware, is a registered holding company under

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

the Public Utility Holding Company Act of 1935 ("the Act").

Engineers holds the following securities:

150,000 shares of Common Stock without par value of El Paso, being all of the authorized and issued Common Stock of said Company. These shares are to be reclassified into 381,994 shares of Common Stock, without par value, prior to the divestment of El Paso by Engineers.

280,000 shares of Common Stock without par value of Gulf States, being all of the issued Common Stock of said Company, there being 20,000 shares of such Common Stock authorized but unissued. The 280,000 outstanding shares of Common Stock are to be reclassified into 1,909,968 shares of Common Stock, without par value, prior to the divestment of Gulf States by Engineers.

2,932,065 shares of Common Stock without par value of Virginia Electric and Power Company ("Virginia"), there being, in addition, 6,360 shares of such Common Stock in the hands of the public and 20 shares of such Common Stock reserved for scrip and 1,061,555 shares of such Common Stock authorized but unissued.

Engineers has outstanding the following securities:

143,951 shares of $5 Dividend Convertible Preferred Stock ("$5 Preferred") without par value, entitled to receive $100 per share, plus accrued dividends, in involuntary liquidation and $105 per share, plus accrued dividends, on redemption or voluntary liquidation.

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

183,406 shares of $5.50 Cumulative Dividend Preferred Stock ("$5.50 Preferred") without par value, entitled to receive $100 per share, plus accrued dividends, in involuntary liquidation and $110 per share, plus accrued dividends, on redemption or voluntary liquidation.

65,098 shares of $6 Cumulative Dividend Preferred Stock ("$6 Preferred") without par value, entitled to receive $100 per share, plus accrued dividends, in involuntary liquidation and $110 per share, plus accrued dividends, on redemption or voluntary liquidation.

1,909,968 shares of Common Stock of the par value of $1 per share.

Early in 1940 the Commission brought a proceeding against Engineers and its subsidiaries under Section 11(b)(1) of the Act. This Section provides for the restriction of integrated systems and incidental businesses which a holding company may control. On July 23, 1941, the Commission issued an order in that proceeding directing Engineers to dispose of its interest in The Key West Electric Company and Puget Sound Power & Light Company. This order has been fully complied with. On December 29, 1941, the Commission issued a further order under Section 11(b)(1) directing Engineers to dispose of its interest in Missouri Service Company, The Northern Kansas Power Company and The Western Public Service Company. This order also has been fully complied with. On September 16, 1942 and October 6, 1942, the Commission issued further orders under the same Section directing Engineers to dispose of all of its remaining investments except that in Virginia, which, if retained, must dispose of its gas and transportation operations. Engineers has complied with these 1942 orders by disposing of all of the investments ordered di-

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

vested by those orders except its investments in Gulf States, El Paso and Virginia and with respect to the latter two companies, has partially complied with said orders by the disposal of their transportation properties. Engineers filed a petition with the United States Court of Appeals for the District of Columbia, for a review of the 1942 orders and on November 22, 1943, the Court set these orders aside and remanded the case to the Commission for further proceedings in accordance with its opinion.

The Supreme Court of the United States granted writs of certiorari to both the Commission and Engineers but the case has not yet been decided.

Division C

The Plan

1. Engineers, except as below provided, will mail warrants to its Common Stockholders of record on a date to be fixed by the Board of Directors of Engineers, each of which warrants will evidence the right to acquire from Engineers shares of Gulf States Common Stock (reclassified) on the basis of one share of Gulf States Common Stock for each share of Engineers Common Stock held by such Stockholders on such date either

   (a) by purchasing from Engineers whole shares of such Gulf States Common Stock at the rate of $11.50 per share, or in the alternative,

   (b) by exchanging with Engineers whole shares of Engineers Preferred Stock for shares of Gulf States Common Stock on the basis of equivalent values, assigning $11.50 per share for each share of Gulf States Common Stock and $105 plus accrued dividends to the expiration date of the warrant for each share of $5 Preferred and $110

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

plus accrued dividends to the expiration date of the warrant for each share of $5.50 Preferred and $6 Preferred; provided that, on the basis of the relative values above stated, the value of the whole shares of Engineers Preferred Stock surrendered in exchange shall not exceed the value of the shares of Gulf States Common Stock which the warrant holder is entitled to and intends to acquire, but to the extent that the value of such shares of Engineers Preferred Stock surrendered in exchange is less than the value of such shares of Gulf States Common Stock to which the warrant holder is entitled and intends to acquire, the difference shall be paid by the warrant holder to Engineers.

The Board of Directors of Engineers may, however, withhold the mailing of such warrants in the event that, in its opinion, market conditions are such as to render it inadvisable to proceed with the issuance of the warrants. Upon the mailing of such warrants, the Plan shall be deemed effective. In cases where the addresses of such Stockholders are unknown or are outside continental United States and Canada, warrants will not be mailed to Common Stockholders of this Company of record on such date but will be held in the name of Transfer Agent against instructions of the record owners, or their duly authorized agents, until the opening of business on the second business day before the expiration date of the warrant period, at which time all warrants so held with respect to which no such instructions have been received shall, subject to the provisions of paragraph 9 hereof, be sold by the Company and the pro rata share of the aggregate net proceeds, if any, remitted to each Stockholder on whose behalf warrants are so sold, or, in cases where such remittance is not law-

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

ful or the address is unknown, held for the account of each such Stockholder subject to payment upon receipt of lawful instructions. In cases where the Engineers' Common Stockholder cannot be located and where no valid claim is made for such net proceeds within a period of ten years from the effective date of the Plan, such net proceeds shall be paid to Gulf States. The warrants must be exercised on or before a specified date (to be approximately sixteen days after the date of mailing warrants). All warrants will be registered in the names of the Common Stockholders, except as above provided, and will be transferable on the books of Engineers. Such warrants will be issued and distributed without the surrender by the Common Stockholders of Engineers of their Common Stock certificates.

2. The Transfer Agent will mail or deliver certificates for Gulf States Common Stock to those persons who exercise the warrants. To the extent warrants are not exercised, Engineers shall sell shares of Gulf States Common Stock represented thereby as promptly thereafter and in such manner as the Board of Directors of Engineers deems to be in the best interests of Engineers, subject to the provisions of paragraph 9 hereof.

3. Engineers will deposit in trust for the benefit of its Preferred Stockholders with a solvent bank or trust company an amount equal to $105 per share plus accrued dividends to the date of such deposit for each share of $5 Preferred and $110 per share plus accrued dividends to the date of such deposit for each share of $5.50 Preferred and $6 Preferred not surrendered in exchange pursuant to (b) of paragraph 1 and will give to all holders of such Preferred Stock five days' prior notice of such deposit at their

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

respective registered addresses, and such notice shall state that upon surrender by the Preferred Stockholders of their certificates for Preferred Stock to the Transfer Agent, they will be paid $105 per share plus such accrued dividends for each share of $5 Preferred and $110 per share plus such accrued dividends for each share of $5.50 Preferred and $6 Preferred; and from and after the date of such deposit, dividends on the Preferred Stock will cease and determine. Such deposit will be in cancellation of the whole of the outstanding Preferred Stock of Engineers. The President or a Vice President and the Secretary or an Assistant Secretary of Engineers shall, without further action by Directors and Stockholders of Engineers, file a certificate or certificates of Engineers reflecting the elimination of the capital represented by the Preferred Stock and the elimination of the authorized Preferred Stock in the Office of the Secretary of State of the State of Delaware and shall record in the office of the Recorder of Deeds of New Castle County, Delaware, a copy or copies thereof certified by the Secretary of State.

4. Immediately after filing the certificate provided for in paragraph 3, the President or a Vice President, and the Secretary or an Assistant Secretary, of Engineers, shall without further action by the directors or stockholders of Engineers:

(1) deposit for filing in the office of the Secretary of State of the State of Delaware, a certificate signed by them and verified by the oath of one of said officers, which shall state that Engineers is dissolved, in which certificate there shall be included a list of names and residences of the directors and officers of Engineers as of the date of such filing;

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

(2) deposit for recordation in the office of the Recorder of Kent County, Delaware, being the county in which the principal office of Engineers is maintained, a duplicate original of the certificate referred to in (1) above;

(3) cause to be published a copy of such certificate in one issue of a newspaper published in Kent County, Delaware, being the county in which the principal office of Engineers in the State of Delaware is situated; and

(4) deposit for filing in the office of the Secretary of State of the State of Delaware an affidavit of the Manager or Publisher of the newspaper referred to in (3) above, that said certificate has been published one time in said newspaper;

and thereupon, when the steps specified in (1), (2), (3) and (4) above shall have been taken, the dissolution of Engineers shall thereby become effective.

5. Promptly after the dissolution of Engineers shall have so become effective Engineers will distribute (1) all of the Common Stock (reclassified) of El Paso pro rata to the Engineers Common Stockholders, on the basis of one-fifth of a share of El Paso Common Stock for each share of Engineers Common Stock and (2) approximately 94.4% of the Common Stock of Virginia pro rata to the Engineers Common Stockholders on the basis of 1.45 shares of Virginia Common Stock for each share of Engineers Common Stock. Such distribution will be without the surrender by the Common Stockholders of Engineers of their Common Stock certificates. No fractional shares of Common Stock of either El Paso or Virginia will be issued or delivered, but in lieu thereof scrip will be issued and delivered. Such scrip will not be en-

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

titled to dividends, voting rights or any other stockholders' rights. When combined in lots aggregating one or more full shares of stock, scrip may, up to the date of sale (hereinafter in this paragraph described) of such shares of stock, be exchanged for such shares, together with any dividends which shall have been paid to Stockholders of record on any date subsequent to the effective date of the Plan and prior to the date of such exchange. Engineers will undertake to provide facilities whereby, prior to the date on which the distribution referred to in this paragraph is made, any holder of scrip certificates may dispose of such scrip, or acquire additional scrip so as to enable the holder to exchange such scrip for full shares of stock. All shares of stock reserved for delivery upon the exchange of scrip which shall not have been delivered in connection with such exchange within two years after the effective date of the Plan, shall, promptly after the expiration of such period and subject to the conditions of paragraph 9 hereof, be sold by the Transfer Agent and the Transfer Agent shall, as soon as possible thereafter, distribute to the holders of scrip certificates not theretofore surrendered their proportionate part of the net proceeds of sale, plus their proportionate part of any dividends which shall have been declared to holders of record as of a date after the effective date of the Plan and prior to the date of sale. In cases where the Engineers' Common Stockholders cannot be located and where no valid claim is made for the net proceeds from the sale of stock and the proportionate part of dividends referred to above and within a period of ten years from the effective date of the Plan, such net proceeds and proportionate part of dividends shall be paid, with respect to net proceeds of El Paso stock and dividends, to El Paso, and with

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

respect to net proceeds of Virginia stock and dividends, to Virginia.

In cases where the Engineers' Common Stockholder cannot be located and where no valid claim is made for the whole shares of El Paso and Virginia Common Stocks distributable to such stockholder within a period of ten years from the effective date of the Plan, such shares of stock shall be returned to the issuing Company for cancellation and the claims to dividends payable to holders of record of said shares after the effective date of the Plan shall be cancelled.

6. After the dissolution of Engineers shall have been effective as aforesaid, Engineers shall, nevertheless, be continued as a body corporate for the purposes and for the term specified in Section 42 of the General Corporation Law of the State of Delaware, and Engineers, acting under the direction of its Board of Directors, shall collect its assets and settle its debts and liabilities, with full power, subject to the provisions of paragraph 9 hereof, to sell and dispose of any or all of the assets of Engineers not distributed as aforesaid. Any vacancy occurring in the Board during the continuance of Engineers as a body corporate as aforesaid may be filled by the Board, as provided in its By-laws. After the final settlement of the affairs of Engineers and payment of or provision for its debt and liabilities, the Directors shall cause the distribution to the Engineers Common Stockholders of the remaining assets of the Company either in kind or in cash in exchange for their certificates of Engineers Common Stock. The Directors shall have power to authorize an agent to vote all shares of Virginia Common Stock held by the Company at any time after the making of the distribution referred to in paragraph 5 above at all meetings of

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

stockholders at which such stock is entitled to vote except as to any matter which is being contested by any stockholder.

7. Within 60 days after the dissolution of Engineers shall become effective in accordance with paragraph 4 above, Epsco, Inc., the mutual service corporation, will cancel it service contracts with Engineers, Virginia, Gulf States and El Paso, and Epsco, Inc. will then be dissolved and liquidated.

8. Engineers will pay all fees and expenses by whomsoever incurred in connection with the Plan or the proceedings in respect thereto, to the extent approved by the Commission.

9. Sales by Engineers of warrants in cases where the addresses of stockholders are unknown or are outside the Continental United States or Canada provided to be made under the provisions of paragraph 1 above, by Engineers of shares of Gulf States Common Stock represented by warrants not exercised provided to be made under the provisions of paragraph 2 above, by Engineers of any assets not distributed provided to be made under the provisions of paragraph 6 above, and by the Transfer Agent of shares of stock of Virginia and El Paso, represented by scrip, which shall not have been delivered in connection with the rights of combination of such scrip provided to be made under the provisions of paragraph 5 above, shall all be made subject to the following provisions: Engineers or the Transfer Agent, as the case may be, may sell such warrants or shares of stock on the New York Stock Exchange without further action by the Commission, but neither the Company nor the Transfer Agent shall sell any such warrants or shares in any other manner unless the Company or the Transfer Agent, as the case may be,

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

shall by telephone or telegraph have given to the Commission at least 24 hours prior notice of its intention so to do and of the details in respect thereof. Upon the expiration of such 24 hour period the Company or the Transfer Agent, as the case may be, may proceed with such sale in the manner specified in such notice unless during such period the Company or the Transfer Agent, as the case may be, shall have been informed by the Commission that the Commission intends to issue an order to show cause why the sale should be consummated, in which event such sale shall not be consummated without the approval of the Commission.

Engineers believes and alleges that the approval of this Plan is necessary for compliance with the orders issued by the Commission on September 16, 1942 and October 6, 1942 under Section 11 of the Act and to effectuate the provisions of subsection (b) of Section 11 of the Act, and if the Commission shall find the Plan necessary to effectuate the provisions of subsection (b) of Section 11 of the Act and fair and equitable to the persons affected thereby, Engineers prays that the Commission shall enter an order approving the Plan containing a recitation that the relevant transactions of the Plan are necessary or appropriate to the integration or simplification of the holding company system of which Engineers is a member and necessary or appropriate to effectuate the provisions of subsection (b) of Section 11 of the Act, all in accordance with the meaning and requirements of the Internal Revenue Code, as amended, including Sections 371 and 1808(f) and Supplement R thereof.

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

DIVISION D

Conditions to Effectuation of the Plan

The effectuation of the Plan is dependent upon the satisfaction of the following conditions:

1. Gulf States shall have reclassified its Common Stock into 1,909,968 shares of Common Stock, without par value; Gulf States shall have given to its Preferred Stock seven votes per share instead of the one vote per share it now carries; El Paso shall have reclassified its Common Stock into 381,994 shares of Common Stock, without par value; the charters of Virginia and El Paso shall have been amended to provide for cumulative voting in respect of the Common Stock for the election of Directors; and the charters of Virginia, Gulf States and El Paso shall have been amended to provide for pre-emptive rights to Common Stockholders to subscribe for additional Common Stock issued for cash except in the case of public offerings.

2. The Commission shall have issued the order prayed for.

3. The Commission shall have instituted a proceeding in a court of competent jurisdiction pursuant to Section 11(e) of the Act and such court shall have entered a decree or order for the purpose of enforcing the Plan.

4. There shall have been obtained from the United States Treasury Department (unless Engineers, in its discretion, shall waive this condition) a closing agreement or ruling or closing agreements or rulings as to the tax consequences of the transactions necessary to carry out the Plan and such agreements or rulings shall be satisfactory to counsel for Engineers.

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

5. Any corporate action in connection with the Plan, which may be deemed necessary by counsel for Engineers shall have been carried out in a manner satisfactory to such counsel.

6. Authorization satisfactory to counsel for Engineers shall have been given for the carrying out of the Plan and for the issuance for all securities provided to be issued pursuant to the Plan, by all regulatory commissions, the consent of which is legally necessary.

7. The warrants referred to in paragraph 1 of the Plan shall have been mailed to Engineers Common Stockholders within the exceptions therein provided.

Division E

Amendments to the Plan and Other Provisions

Until approved by the Commission, the Plan may be modified or amended in any respect or particular by Engineers. After being approved by the Commission and before being approved by a court, the Plan or any part thereof may be modified or amended in any respect or particular by Engineers with the approval of the Commission. After the approval by the Court and before the Plan has been consummated, pursuant to the order or decree of a court of competent jurisdiction, the Plan may be modified or amended in any respect or particular by Engineers with the approval of both the Commission and the Court. No amendments to the Plan shall be made without the consent or agreement of Engineers.

Engineers may employ such agents, attorneys or others as it may deem desirable for the purpose of carrying out the Plan. Engineers may from time to time delegate to others any power or discretion conferred upon it by the Plan.

Exhibit C to Application of Securities and Exchange Commission (Cont'd)

The statements, opinions and conclusions contained in the Plan are intended solely for the purpose of assisting the Commission, any court and the Stockholders in any steps or proceedings with respect to the Plan and are not intended for use or information by prospective purchasers of any securities whether now existing or proposed to be issued or for any purposes other than the purposes set forth in this paragraph; and no one is authorized to make any statements regarding the Plan, whether with reference to any securities referred to herein or otherwise which are not set forth herein.

Exhibit D to Application of Securities and Exchange Commission (Cont'd)

proval of a plan pursuant to Section 11 (e) of the Act for the divestment of its interests in El Paso Electric Company ("El Paso") and Gulf States Utilities Company ("Gulf States"); and El Paso and Gulf States, for the purpose of facilitating the effectuation of such plan, having filed declarations pursuant to Section 7 of said Act regarding the reclassification of their respective shares of common stock; and

The Commission, in its Notice of Filing and Order for Hearing issued October 15, 1945 (Holding Company Act Release No. 6151), having summarized therein the terms of such plan and declarations (which matters were consolidated) and ordered a hearing thereon; and having required Engineers to give notice of such hearing to all its stockholders of record by mailing a communication giving the date, hour and place of hearing to each of its stockholders at their last known address and also advising its stockholders that Engineers would, if requested, furnish copies of said Notice of Filing and Order for Hearing; and hearings having been held, extensive testimony having been taken and numerous exhibits having been introduced, the record having been closed, and briefs having been submitted and the Commission having heard oral argument; and

The Commission having on December 4, 1946 issued its Findings and Opinion (Holding Company Act Release No. 7041) stating that if within a period of thirty days from the date of said Opinion the plan were amended in accordance with the views expressed therein, an appropriate order approving said plan, as so amended, would be entered and the Commission would apply to an appropriate District Court for approval and enforcement of the plan; and

Engineers having filed an amendment to the plan on December 17, 1946, in which it is stated that the plan has been amended in accordance with the Commission's views

Exhibit D to Application of Securities and Exchange Commission (Cont'd)

expressed in its Findings and Opinion issued December 4, 1946; and El Paso and Gulf States, for the purpose of facilitating the effectuation of such plan, as amended, having filed amendments to their declarations pursuant to Section 7 of the Act; and Virginia Electric and Power Company ("Virginia"), for the purpose of facilitating the effectuation of such plan, as amended, having filed a declaration pursuant to Section 7 of the Act, all as more particularly described hereafter;

All interested persons are referred to said documents which are on file in the offices of the Commission for a full statement of the transactions therein proposed, which are summarized as follows:

1. Engineers will mail warrants to its common stockholders, which warrants will be transferable on the books of the company and will evidence the right to acquire shares of Gulf States common stock from Engineers, on the basis of one share of Gulf States common stock (reclassified into 1,909,968 shares of common stock, which is the same number of shares as the outstanding Engineers common stock) for each share of Engineers common stock, either by purchasing from Engineers whole shares of Gulf States common stock at the rate of $11.50 per share, or in the alternative, by exchanging whole shares of Engineers preferred stock for shares of Gulf States common stock on the basis of equivalent amounts, assigning $11.50 per share for each share of Gulf States common stock and $105 plus accrued dividends to the expiration date of the warrants for each share of $5 preferred stock and $110 plus accrued dividends to the expiration date of the warrants for each share of $5.50 and $6 preferred stock. However, it is provided in the amended plan, that the Board of Directors of Engineers may withhold the mailing of such warrants in the event that, in its opinion, market conditions are such as to render it inadvisable to proceed with the issuance

Exhibit D to Application of Securities and Exchange Commission (Cont'd)

of the warrants. The warrants are to be exercised on or before a specified date to be approximately sixteen days after the date of mailing the warrants. Such warrants will be issued and distributed without the surrender by the common stockholders of Engineers of their common stock. In cases where the addresses of Engineers' common stockholders are unknown or outside continental United States and Canada, warrants will not be mailed to such stockholders but will be held by a transfer agent against instructions of the record owners until the opening of business on the second business day before the expiration date of the warrant period, at which time all warrants so held with respect to which no instructions are received, shall, subject to the provisions of paragraph 8 below, be sold by the company and the *pro rata* share, if any, remitted to each stockholder, or in cases where such remittance is unlawful or the address unknown, held for the account of each such stockholder. In cases where the Engineers' common stockholder cannot be located within a period of 10 years from the effective date of the amended plan, such net proceeds shall be paid to Gulf States. It is stated in the amended plan that upon the mailing of such warrants the amended plan shall be deemed effective.

2. To the extent that the warrants are not exercised, Engineers proposes to sell shares of Gulf States common stock represented thereby as promptly thereafter and in such manner as the Board of Directors of Engineers deems to be in the best interests of the company, subject to the provisions of paragraph 8 below.

3. Engineers will deposit in trust for the benefit of its preferred stockholders an amount equal to $105 per share plus accrued dividends to the date of deposit for each share of $5 preferred stock and $110 per share plus accrued dividends to the date of deposit for each share of $5.50 preferred and $6 preferred not surrendered in exchange pursuant to

Exhibit D to Application of Securities and Exchange Commission (Cont'd)

paragraph 1 above, and will give to all holders of such preferred stock five days prior notice of such deposit. From and after the date of such deposit, dividends on all three series of preferred stock will cease. It is stated that such deposit will be in cancellation of the whole of the outstanding preferred stock of Engineers.

4. Immediately after the filing of a certificate reflecting the elimination of the capital represented by the preferred stock of Engineers in the Office of the Secretary of State of the State of Delaware, Engineers is to be legally dissolved as a corporate entity.

5. Promptly after the dissolution of Engineers becomes effective, Engineers will distribute the common stock of El Paso pro rata to the Engineers common stockholders on the basis of 1/5 of a share of El Paso common stock (reclassified into 381,994 shares of common stock) for each share of Engineers common stock and also distribute approximately 94.4% of the Virginia common stock to the Engineers common stockholders on the basis of 1.45 shares of Virginia common stock for each share of Engineers common stock. Such distribution will be without the surrender by the common stockholders of Engineers of their common stock certificates. No fractional shares of common stock of either El Paso or Virginia will be issued or delivered but in lieu thereof scrip will be issued and delivered. Such scrip will not be entitled to dividends, voting rights or any other stockholders' rights. When combined in lots aggregating one or more full shares of stock, scrip may, up to the date of sale of such shares of stock, be exchanged for such shares, together with any dividends which shall have been paid to stockholders of record on any date subsequent to the effective date of the amended plan and prior to the date of exchange. Engineers proposes to undertake to provide facilities whereby any holder of scrip certificates may dispose of such scrip, or acquire additional scrip so

Exhibit D to Application of Securities and Exchange Commission (Cont'd)

as to enable the holder to exchange such scrip for full shares of stock. All shares of stock reserved for issuance and delivery upon the exchange of scrip which shall not have been issued or delivered in connection with such exchange within two years after the effective date of the amended plan, shall, promptly after the expiration of such period and subject to the conditions of paragraph 8 below, be sold by the transfer agent and the transfer agent shall, as soon as possible thereafter, distribute to the holders of scrip certificates not theretofore surrendered their proportionate part of the proceeds of sale, plus their proportionate part of any dividends which shall have been declared to holders of record after the effective date of the amended plan and prior to the date of sale. If within a period of 10 years from the effective date of the amended plan, common stockholders of Engineers cannot be located, the proportionate part of the net proceeds and dividends attributable thereto shall be paid with respect to net proceeds of El Paso stock and dividends, to El Paso, and with respect to net proceeds of Virginia stock and dividends, to Virginia. Furthermore, it is also provided that if within a period of 10 years from the effective date of the amended plan certain Engineers common stockholders cannot be located, the whole shares of El Paso and Virginia common stocks not so claimed shall be returned to the respective issuing company for cancellation and the claims of dividends payable to holders of record of said shares after the effective date of the plan shall be cancelled.

6. It is further provided that after Engineers shall have become dissolved, Engineers is to be continued as a body corporate for the purposes and for the term specified in Section 42 of the General Corporation Law of the State of Delaware, and Engineers, acting under the direction of its Board of Directors, is to collect its assets and settle its debts and liabilities, with full power to sell and dispose of

Exhibit D to Application of Securities and Exchange Commission (Cont'd)

any or all of the assets of Engineers not distributed as aforesaid. After the final settlement of the affairs of Engineers and payment of or provision for its debts and liabilities, the Directors shall cause the distribution to the Engineers common stockholders of the remaining assets of the company either in kind or in cash in exchange for their certificates of Engineers common stock. It is further provided that the directors shall have power to authorize an agent to vote all shares of Virginia common stock held by the company at all meetings of stockholders at which such stock is entitled to vote except as to any matter which is being contested by any stockholder.

7. Within 60 days after the dissolution of Engineers shall have become effective, Epsco, Inc., the mutual service company, will cancel its service contracts with Engineers, Virginia, Gulf States and El Paso and thereupon be dissolved and liquidated.

8. Sales by Engineers of warrants in cases where the addresses of stockholders are unknown or are outside the continental United States or Canada provided to be made under the provisions of paragraph 1 above; by Engineers of shares of Gulf States' common stock represented by warrants not exercised provided to be made under the provisions of paragraph 2 above; by the transfer agent of shares of stock of El Paso and Virginia represented by scrip which shall not have been delivered in connection with the rights of combination of such scrip provided to be made under the provisions of paragraph 5 above; and by Engineers of any assets not distributed provided to be made under the provisions of paragraph 6 above, shall all be made subject to the following provisions: Engineers or the transfer agent may sell such warrants or shares of stock on the New York Stock Exchange without further action by the Commission, but neither Engineers nor the transfer agent shall sell any such warrants or shares of

Exhibit D to Application of Securities and Exchange Commission (Cont'd)

stock in any other manner unless the company, or the transfer agent, as the case may be, shall by telephone or telegram have given to the Commission at least 24 hours prior notice of its intentions so to do and of all the details in respect thereof, and upon the expiration of such 24-hour period, Engineers or the transfer agent may proceed with such sale in the manner specified in said notice unless during said period Engineers or the transfer agent shall have been informed by the Commission that the Commission intends to issue an order to show cause why the sale should be consummated, in which event such sale shall not be consummated without the approval of the Commission.

The following conditions, among others, are expressly established for the effectuation of the amended plan:

a. Reclassification of the common stocks of Gulf States and El Paso.

b. Approval by the Commission of the amended plan.

c. Obtaining from the United States Treasury Department, unless Engineers waives this condition, a closing agreement or ruling as to tax consequences of the transactions necessary to carry out the amended plan, which agreement or ruling shall be satisfactory to counsel for Engineers.

d. The issuance of the Gulf States warrants.

Engineers states that the approval of the amended plan is necessary for compliance with the orders issued by the Commission on September 16, 1942, and October 6, 1942, under Section 11 of the Act and to effectuate the provisions of Section 11 (b) of the Act, and if the Commission shall find the plan necessary to effectuate the provisions of Section 11 (b) of the Act and fair and equitable to the persons affected thereby, the Commission should issue an order

Exhibit D to Application of Securities and Exchange Commission (Cont'd)

approving such amended plan. Engineers also requests that the Commission's order approving the amended plan contain the recitation that the relevant transactions contained therein are necessary or appropriate to the integration or simplification of the holding company system of which Engineers is a member and necessary or appropriate to effectuate the provisions of subsection (b) of Section 11 of the Act, or in accordance with the meaning and requirements of the Internal Revenue Code, as amended, including Sections 371 and 1808 (f) and Supplement R thereof. The amended plan provides for the payment by Engineers of all fees and expenses by whomsoever incurred in connection with said amended plan or the proceedings with respect thereto to the extent approved by the Commission.

In connection with the amended plan, Virginia has filed a declaration and El Paso and Gulf States have filed amended declarations pursuant to Section 7 of the Act proposing, among other things, that the respective charters of Virginia, El Paso, and Gulf States will be amended to provide for cumulative voting for the election of the respective boards of directors for each company and for preemptive rights to the holders of common stock in respect to common stock of each company issued for cash, except in respect to any such stock issued in connection with a public offering.

The Commission being required by the provisions of Section 11 (e) of said Act, before approving the plan, as amended, to find that such plan is necessary to effectuate the provisions of Section 11 (b) and is fair and equitable to the persons affected thereby; and

It appearing to the Commission that the proceeding heretofore instituted with respect to the plan filed by Engineers (File No. 54-132) and the declarations filed by El Paso (File No. 70-4149) and Gulf States (File No. 70-1150) are related to and involve common questions of law and fact with the declaration filed by Virginia (File No. 70-1419) and therefore should be consolidated; and

Exhibit D to Application of Securities and Exchange Commission (Cont'd)

The Commission deeming it appropriate to afford interested persons opportunity for hearing and argument on the plan and declarations, as amended, and deeming it appropriate that any such hearing and argument should be held before the Commission and should be directed to whether the plan, as amended, conforms to the standards of Section 11 (e) and whether the declarations, as amended, satisfy the requirements of Section 7:

IT IS HEREBY ORDERED that the declaration filed by Virginia be, and hereby is consolidated with these proceedings.

IT IS FURTHER ORDERED that any person desiring to present argument or to be heard on such plan, as amended, shall appear before the Commission at 10:30 A. M., E. S. T., on the 3rd day of January, 1947, at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania, in such room as may be designated at that time by the Hearing Room Clerk in Room 318, at which time the record herein will be reopened and the hearing herein will be reconvened. Any person desiring to present argument or to be heard shall, on or before the 2nd day of January, 1947, file a written request or application with the Secretary of the Commission in accordance with the provisions of Rule XVII of the Commission's Rules of Practice. Such request shall set forth the nature of such person's interest in the proceedings and the matters concerning which it is desired to present argument or to be heard.

IT IS FURTHER ORDERED that notice of this argument and hearing be given to Engineers, El Paso, Gulf States and Virginia, and all other participants in the proceeding, by mailing to them copies of this order by registered mail, and to all other persons by general release of this Commission which shall be distributed to the press and mailed to the mailing list for releases issued under the Holding Com-

Exhibit D to Application of Securities and Exchange Commission (Cont'd)

pany Act of 1935, and by publication in the Federal Register.

IT IS FURTHER ORDERED that Engineers give notice of this argument and hearing to all its stockholders of record by mailing a copy of this Notice and Order at least 10 days prior to the date of this argument and hearing.

IT IS FURTHER ORDERED that jurisdiction be and is hereby reserved to separate, in whole or in part, any of the issues, questions or matters in these proceedings or which may arise in these proceedings, or to consolidate with these proceedings other filings or matters pertaining to said consolidated proceedings or to take such other action as may appear conducive to an orderly, prompt and economical disposition of the matters involved.

By the Commission.

ORVAL L. DUBOIS,
Secretary.

Supplemental Findings and Opinion

Supplemental Findings and Opinion

APPEARANCES:

William E. Tucker, of Mudge, Stern, Williams & Tucker, of New York City, for the Applicants and Declarants.

Lawrence R. Condon and *Frederick Zazove*, of New York City, for T. W. Streeter and other preferred stockholders of Engineers.

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

Francis H. Scheetz, and *Evans, Bayard & Frick* of counsel, of Philadelphia, Pa., for the Home Insurance Company and other holders of preferred stock of Engineers.

Louis Boehm and *Morton S. Schorr*, of New York City, for Frances Boehm and Lucille White, common stockholders of Engineers.

Bernard S. Kanton, for the Public Utilities Division of the Commission.

On December 4, 1946, we issued our Findings and Opinion with respect to the Section 11(e) plan filed by Engineers Public Service Company ("Engineers"); we stated that no order would be entered until the company had been afforded thirty days within which to present amendments to the plan to meet the objections indicated in the Opinion.[1] On December 18, 1946, Engineers filed the amended plan now before us.

On December 19, 1946, we issued notice that an amended plan had been filed and ordered hearing and argument before us on January 3, 1947.[2] Our order provided that notice of hearing be sent to all participants in the proceeding, to all stockholders of record of Engineers, mailed to the appropriate mailing list for Commission releases, published in the Federal Register, and distributed to the press. Such notice was given and the hearing and argument took place as ordered. Objections to the amended plan were raised by certain common and preferred stockholders. These objections are considered below.

Reference is made to our Findings and Opinion of December 4, 1946, for a full analysis of the Engineers' holding company system, the voluntary plan which had been pre-

[2] Holding Company Act Release No. 7077.

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

sented for our approval, and our discussion of the plan. We found that the plan met the standards of the Act in providing for (1) the distribution of the common stock of Gulf States Utilities Company ("Gulf States") through its sale under warrants to be issued to Engineers' common stockholders; (2) the distribution as a liquidating dividend of the common stock of El Paso Electric Company ("El Paso"); and (3) the eventual dissolution and liquidation of Engineers. We found the plan "unfair" in failing to provide for payment of the equivalent of the voluntary redemption price on retirement of the outstanding preferred stock of Engineers. We suggested that, if Engineers intended to litigate the question of the proper amount payable to the preferred, the plan should provide for immediate payment of $100 per share and accrued dividends and that an escrow for the additional amount in dispute and appropriate compensation for the delay in payment should be established to protect the rights of the various parties. We found that provisions in the plan for a bank loan to raise cash, and for a trusteeship which would retain all of the present investment in the common stock of Virginia Electric and Power Company ("Virginia") for an indeterminate period, were not "necessary" under the standards of the Act. We also found the plan unfair and inadequate in failing to provide for Commission jurisdiction over the allocation and award of fees and expenses.

The provisions of the amended plan are detailed in the notice and order for hearing. See n. 2, *supra*. The substance of the original plan has been retained; the principal features of the modified plan can be summarized as follows:

1. The plan retains the provision for distributing Gulf States common stock through sale at $11.50 per share under warrants issued to Engineers' common stockholders. The warrant period has been extended to sixteen days. The plan will be deemed effective upon mailing of the warrants, although the company reserves the right to withhold mailing,

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

and therefore delay the effective date of the plan if, in its opinion, market conditions have changed so as to render the warrant program inadvisable.

2. The bank loan has been deleted from the plan. An exhibit filed with the amended plan indicates that cash which would have been provided by the bank loan will be obtained from special dividends declared by the three operating subsidiaries.[3]

3. Engineers will retire and cancel its outstanding preferred stock by depositing in trust an amount equal to $105 per share plus accrued dividends to date of deposit for each share of $5 preferred stock and $110 per share plus accrued dividends to date of deposit for each share of $5.50 and $6.00 preferred.[4] Five days' notice will be given stockholders in advance of deposit. The right to further dividends will cease on the date of deposit.

4. Engineers will dissolve.

5. The common stock of El Paso will be distributed in liquidation *pro rata* to Engineers' common stockholders on the basis of one-fifth of a share of El Paso for each share of Engineers common held.

6. 94.4% of the common stock of Virginia will be distributed *pro rata* to Engineers' common stockholders on the basis of 1.45 shares of Virginia common stock for each share of Engineers' common held.

7. Engineers will continue as a trusteeship under its Board of Directors for the purposes and term specified in Section 42 of the General Corporation Law of the State

[3] Special dividends will be paid as follows: Virginia, $2,932,000; Gulf States, $756,000; El Paso, $105,000. Except for the regular quarterly dividend payable in March 1947, no further common stock dividends will be paid by Virginia until June 15, 1948 or by Gulf until December 15, 1947.

[4] The plan retains the provision permitting common stockholders owning preferred stock to use the preferred in exchange for the Gulf States being distributed on warrants. To the extent that preferred is so exchanged the amount of the deposit will be reduced.

RECORD

P.132A-207A

of Delaware in order to marshal its assets, meet its liabilities and wind up its affairs. For this purpose 162,612 shares of Virginia common (5.4%) will be retained after the distribution described in paragraph 6 above.[5] The staff of the trusteeship will consist of one full-time officer and a part-time tax consultant, with clerical assistance, at an estimated expense of $48,000 per year. The only other expense will be that of a transfer agent and registrar estimated at $20,000 per year, or a total estimated annual expense for operating the trusteeship of $68,000. The trusteeship would receive no income until June 15, 1948.[6] Assuming continuance of the present Virginia dividend rate, dividends thereafter would be at the rate of $1.00 per share, or a total income to the trusteeship of $162,612 per year after June 15, 1948, until the stock is either sold or distributed. After final settlement of the company's affairs, all remaining assets will be distributed to Engineers' common stockholders in cash or in kind.

The directors constituting the trusteeship will have power to authorize an agent to vote the Virginia common stock retained by the trusteeship at all meetings of stockholders, except as to any matter being contested by any stockholder.

8. Within sixty days after the dissolution of Engineers shall have become effective, EPSCO, Inc., the mutual service company for the system, will cancel its contracts with the companies in the system, dissolve and liquidate.

The plan requests that the Commission apply, pursuant to Section 11 (e) of the Act, to an appropriate United States District Court for approval and enforcement of the plan. The plan is conditioned, among other things on (1) Commission and Court approval, (2) the receipt of satisfactory tax agreements from the Treasury, (3) reclassifi-

[5] Engineers owns 99.8% of the common stock of Virginia. Two-tenths of one percent is publicly held.

[6] See n. 3, *supra*.

cation of the common stock of Gulf States and El Paso, and (4) issuance of the Gulf States warrants. It also contains a provision reserving to the Commission jurisdiction to pass on the payment of fees and expenses in connection with the plan.

Statutory Standards

The amended plan removes those features found objectionable in our previous Opinion and provides for expeditious compliance with the Act. There will be an immediate distribution of the maximum amount of Engineers' holdings commensurate with the need to wind up its affairs in an orderly manner. The trusteeship, as modified by the present amendment, overcomes the principal objections raised to the original proposal. While the form of a trusteeship is retained, the staff of the trusteeship has been reduced to a minimum, with an annual expense now estimated at $68,000, as compared with previous estimates ranging as high as $365,000. Moreover, instead of retaining all of the stock of Virginia for the period of the trusteeship, all but a small portion will be distributed immediately. The comparatively small amount retained, having an estimated value of approximately $3,600,000, does not appear excessive in view of the tax questions and other matters which remain unsettled.

The bank loan has become unnecessary in view of the cash which will become available to Engineers through the declaration of special dividends by the three operating subsidiaries. The unrestricted surplus accounts of those companies are adequate to permit these dividends. A common stockholder has filed a letter in these proceedings objecting to the special dividends and to the stated intention of the directors of Virginia and Gulf States to pay no further dividends for a given period regardless of earnings.[7] It is

[7] See n. 3, *supra*.

his belief that, as a consequence, the value of the securities received by him on the break-up of Engineers will be depressed. He suggests, as an alternative, that the warrant price for Gulf States be increased to raise the additional cash required to retire the preferred. Our previous Opinion left to the management the choice of methods for raising the necessary cash, as long as such choice did not delay compliance with the Act and was otherwise appropriate. The method chosen—declaration of special dividends—was one that had been suggested during the hearings on the original plan. Since there appears to be adequate unrestricted surplus available for that purpose, we can, under the circumstances here presented, see no objection to the declaration of such dividends. We note that the alternative suggested by the objecting common stockholders would require an increase in the warrant price for Gulf States from $11.50 to approximately $14. This would, of course, require that common stockholders desiring to exercise the warrant pay in an additional $2.50 per share for the Gulf States common and would thus impose an increased burden on them; it would also narrow the margin between the warrant price and the value of the Gulf States common. These were appropriate factors for the management to consider along with all other relevant matters in making its choice as to how to raise the additional cash required. We conclude that the method chosen to generate the necessary cash cannot be considered to be unfair to Engineers' common stockholders.

The preferred stockholders will receive upon retirement the full call price of their securities, including accrued dividends, the amount for which they have contended and the amount which our previous Opinion found to be fair. The plan is fair to the common stockholders and otherwise conforms with the applicable standards of Section 11 in that it provides for a rapid winding up of the affairs of the company at a minimum expense and distributes to them the

residue of the estate after payment of liabilities and the retirement of the preferred stock.

Accordingly, we find the amended plan necessary to effectuate the purposes of Section 11 (b) and fair and equitable to all persons affected.

Objections to the Amended Plan

In addition to the objection raised by a common stockholder to the special dividends mentioned above and which we have found to be without substance, common stockholders have objected to other aspects of the plan.

C. A. Johnson, a common stockholder, has submitted a letter in which he objects to the payment of any amount to the preferred in excess of $100 per share plus accrued dividends and indicates that he may contest any Commission order approving such additional payment. Similar objection was stated informally by the representative of another group of common stockholders.[8] The matter of fair treatment in the payment to be made to the preferred has been one of the principal issues in these proceedings and the position now being taken by these common stockholders was zealously presented by the company. The arguments presented were the subject of careful consideration and our Opinion treats the matter in detail. Under the circumstances, the objections appear to have been urged principally to preserve the rights of these stockholders to contest our order in the courts and there is no reason to change our previous findings on this aspect of the plan.

The preferred stockholders of the Streeter group have expressed the fear that the amended plan does not afford

[8] Counsel for this group requested a stay of one week for the purpose of filing a formal request to be heard. In view of the time factor, the expense incurred in any delay of these proceedings, and the fact that our notice and order for hearing have been outstanding for 10 days, we do not feel that any further delay in this matter would be warranted and we would deny a request for any such stay. However, since counsel's request merely relates to his right to be heard, and since he has been already afforded that right, the matter appears to be moot.

adequate protection of their interests in view of the opposition now expressed to the treatment of the preferred and the possibility that some objecting common stockholders may elect to litigate the matter. They have accordingly urged that the plan be further amended to include an escrow provision similar to that outlined in our previous Opinion to protect the preferred in the event of litigation.

We do not agree that any such amendment is necessary at this time. There is considerable question whether the eventuality on which the contention is based will occur at all. Should the plan be approved by the District Court, it is conjectural whether further appeals will be undertaken in view of the delay involved and the consequent expense to the company which would, of course, ultimately be borne by the common stockholders. We believe that prompt payment of the full amount which we have found due the preferred will most expeditiously accomplish compliance with the Act. Should our view be approved by the Court and should the objecting stockholders continue their objections and indicate an intention to appeal, there is the further question whether a court, under the circumstances and in view of the considerations of substantial expense and delay, would grant a stay. Only at this stage, and in such event, is there any need to consider the necessity of an escrow arrangement. In such event, to achieve expeditious compliance with the Act and fairness to the persons affected, it would be appropriate for Engineers to make prompt payment of $100 per share and accrued dividends in order to stop the accrual of further dividends, and set up an escrow arrangement, along the lines suggested in our previous Opinion, to protect the interests of the various groups. As indicated in our previous Opinion, such an escrow would have to be large enough to assure payment not only of the amount in issue, but of an additional amount to provide the preferred "for the period of the escrow a return on the amount in escrow which is measured by the return which

would have been received by it if the stock remained outstanding." We do not believe that it would be necessary to return the case to the Commission in order to set up such an escrow. Presumably, any such escrow would be established under Court supervision and our counsel before the Court will be available to present our views. We conclude that it is unnecessary to amend the plan further at this time since it is at least questionable whether an escrow will be needed and since the matter can be raised and dealt with in court if and when the need arises.[9]

Other Matters

1. Our previous Opinion indicated that upon the filing of a plan which meets the statutory standards we would approve the declarations now on file with us to reclassify the common stock of Gulf States and El Paso in order to facilitate the distribution of those shares under the plan. These declarations have been consolidated with the proceedings on the plan, and our order will provide for their approval.

The El Paso declaration has been further amended to provide for an amendment to the company charter to include provisions for cumulative voting and for preemptive rights to the holders of common stock on additional issues of common stock issued for cash except in connection with a public offering. The Gulf States declaration has been similarly amended as to preemptive rights, but not as to cumulative

[9] In this connection it should be pointed out that the plan can be amended, according to its terms, at any time before its consummation. We do not understand that the plan would permit the proposed deposit in trust of the full amount to relieve Engineers of any further responsibilities to the preferred if the payment to the preferred of the amounts deposited were the subject of a stay. Any such provision would obviously be unfair unless there were assurance that the preferred would receive adequate compensation for any delay in payment to them.

voting.[10] In addition, a declaration has been filed by Virginia to amend its charters to provide both for cumulative voting and preemptive rights. These changes are in accord with the general policy of the Commission in other cases and we find them to be consistent with the applicable provisions of the Act.[11] Our order will provide for the approval of the Section 7 declarations, as amended, of the three companies.

2. Engineers has requested that our order contain necessary findings under Sections 371 and 1808 (f), and Supplement R of the Internal Revenue Code. Such findings are clearly appropriate and will be included in our order.

By the Commission (Chairman Caffrey, Commissioners McConnaughey, McEntire and Hanrahan); special concurring opinions of Chairman Caffrey and Commissioner Hanrahan are issued herewith.

ORVAL L. DUBOIS,
Secretary.

(SEAL)

---

[10] The company is advised by Texas counsel that an amendment of the charter to provide for cumulative voting would require the unanimous consent of all stockholders. In view of the substantial number of public holders of preferred stock, the management does not believe that such consent could be obtained at this time from all stockholders of Gulf States.

[11] See *American Power & Light Co., Texas Utilities Company*, ... S. E. C. ..... (1945), Holding Company Act Release No. 6158; *Kings County Lighting Co.*, ... S. E. C. ..... (1946), Holding Company Act Release No. 7060.

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

Caffrey, C., concurring:

I join fully in this Opinion.

In the prior Opinion herein I noted my concurrence in the result (..... S. E. C. ....., Holding Company Act Release No. 7041). I think it appropriate to explain here the reasons for my concurrence.

The Opinion concluded that redemption prices should be paid to Engineers' preferred stocks because their investment value is equal at least to that amount. I agreed. However, it is only when the liquidation provisions of the charter cannot be found applicable to a given situation that there is room for an exploration of investment value. While the Opinion seemed to presume that those provisions of the charter do not apply under the particular circumstances of the case, I think it necessary to state at greater length the reasons why this is so.

There is no order outstanding which compels Engineers to liquidate. We have already inspected the Engineers system under Section 11 (b) (1) and have indicated that Engineers might retain as its principal system either the electric utility operations of Virginia or of Gulf States (12 S. E. C. 41, and 268). There is no formal compulsion on Engineers to liquidate, and, in fact, it has proposed its liquidation in the form of a voluntary plan under Section 11 (e) on the ground that it would be an "economic monstrosity" left with only a single system.

However, that is not, in my view, enough to make a case for voluntary liquidation. Our orders under Section 11 (b) (1) do not preclude a careful investigation of the surviving holding company system under Section 11 (b) (2) to determine what action might be necessary (including dissolution of the top company) in order to simplify the system and distribute its voting power equitably). I think that Engineers would have been subject to such a proceeding had it not come forth with a voluntary plan. Engi-

neers' "voluntary" proposal did no more than forestall the necessity for action by the Commission.

Further, Engineers' decision to liquidate came as a logical step following the necessity to comply with our Section 11 (b) (1) orders. It is the operation of Section 11 and not mere managerial discretion that has brought about the liquidation.

Under these circumstances, I do not believe that the liquidation can properly be termed voluntary.

On the other hand, our precedents make it clear that such a liquidation is not "involuntary" within the meaning of a charter drafted without the Holding Company Act in view. The situation of a liquidation necessitated by creditor or other action reasonably foreseeable in the ordinary business life of a corporation is not presented by the necessity of compliance with Section 11. Liquidation has commended itself to Engineers' management because the company will no longer serve any useful economic function within the system. But that step is made desirable (and, in all probability inevitable) by the operation of Section 11. To hold otherwise would be contrary to our prior views and to the decision of the Supreme Court in *Otis* v. *S. E. C.*, 323 U. S. 624.

These views do not, however, apply in a case where liquidation can reasonably be demonstrated to have commended itself to management for reasons not related to the operation of the Act.

Hanrahan, C., concurring:

I agree with the conclusions in the original and supplemental Opinions in this matter and with all of the reasoning except that in the original Opinion relating to the fairness of the price to be paid to the preferred stockholders. In my view, the discussion of the investment value of the preferred is wholly unnecessary. The charter provides for

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

payment of the premiums in the event of a voluntary call or voluntary liquidation and it seems clear to me that, within the meaning of such charter provision, the action proposed by Engineers is "voluntary." Consequently it follows that fairness and equity require payment to the preferred stockholders of the prices specified in the charter in the event of voluntary liquidation.

File No. 70-1149

GULF STATES UTILITIES COMPANY
File No. 70-1150

VIRGINIA ELECTRIC AND POWER COMPANY
File No. 70-1419

(Public Utility Holding Company Act of 1935)

Order Approving Amended Plan

Engineers Public Service Company ("Engineers"), a registered holding company, having filed on September 10,

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

1945, an application pursuant to the provisions of Section 11 (e) and other applicable sections of the Public Utility Holding Company Act of 1935 and the Rules and Regulations of the Commission promulgated thereunder, for approval of a plan of reorganization for the purpose of complying with the provisions of Section 11 (b) (1) of the Act and with orders of this Commission dated September 16, 1942, and October 6, 1942; and El Paso Electric Company ("El Paso"), Gulf States Utilities Company ("Gulf States") and Virginia Electric and Power Company ("Virginia"), having filed declarations pursuant to Section 7 of said Act for the purpose of facilitating the effectuation of such plan;

Public hearings having been held on the plan of reorganization and declarations filed pursuant to Section 7 in consolidated proceedings after appropriate notice in which all interested persons were given opportunity to be heard, briefs having been filed and oral argument having been heard; and the Commission having on December 4, 1946, issued its Findings and Opinion stating that, if within a period of 30 days from the date of said Findings and Opinion the plan were amended in accordance with the views expressed therein, an appropriate order approving said plan as so amended would be entered; and the applicants having filed on December 17, 1946 an amendment to the plan and amendments to the declarations filed pursuant to Section 7 of the Act; and the applicants having filed certain other amendments to said amended plan of reorganization and said declarations on December 31, 1946, January 2, 1947 and January 3, 1947;

Public hearings having been held on said amended plan and said amended declarations after appropriate notice in which all interested persons were given opportunity to be heard and oral argument having been heard;

The applicants having requested that the Commission enter an order finding that the proposed transactions are

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

necessary to effectuate the provisions of Section 11 (b) of the Public Utility Holding Company Act of 1935, fair and equitable to the persons affected thereby, and that such order contain recitals in accordance with the requirements of Sections 371 and 1808 (f) and Supplement R of the Internal Revenue Code, as amended; and having further requested the Commission to enter an order permitting said declarations, as amended, to become effective forthwith; and having also requested the Commission pursuant to Section 11 (e) of the Act, to apply to the appropriate United States District Court to enforce and carry out the terms of the amended plan of reorganization;

The Commission having considered the record and oral argument herein, and having on January 8, 1947 made and filed its Supplemental Findings and Opinion herein; and

The Commission having found that the amended plan of reorganization is necessary to effectuate the provisions of Section 11 (b) and is fair and equitable to the persons affected thereby and the Commission having further found that said declarations, as amended, should be permitted to become effective;

IT IS ORDERED pursuant to the applicable provisions of the Act that the amended plan of reorganization be, and hereby is, approved, and that said declarations filed pursuant to Section 7 be permitted to become effective, respectively, subject, however, to the conditions specified in Rule U-24 and subject to the following terms and conditions:

1. That jurisdiction be and it hereby is reserved to the Commission to approve, disapprove, modify, allocate or award from the estate of Engineers by further order or orders, all fees or other compensation and all remuneration or expenses claimed or hereafter claimed by any persons in connection with the amended plan, the transactions incident thereto and the consummation thereof;

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

2. That jurisdiction be and it hereby is reserved to the Commission to take such further action as the Commission may deem necessary or appropriate to effectuate the requirements of Section 11 (b) of the Act; and

3. That jurisdiction be and it hereby is reserved to the Commission to entertain such further proceedings, to make such supplemental findings and to take such further action as the Commission may deem appropriate in connection with the amended plan, the transactions incident thereto and the consummation thereof, and in the event such amended plan be not consummated, to enter such further orders as the Commission may deem appropriate under Sections 11 (b), 11 (f) and 20 (a) of the Act.

It Is Further Ordered that counsel for the Commission be, and they hereby are, authorized and directed to make application forthwith on behalf of the Commission to an appropriate United States District Court pursuant to the provisions of Section 11 (e) and subsection (f) of Section 18 of the Act, to enforce and carry out the terms and provisions of the amended plan.

It Is Further Ordered that this order shall not be operative to authorize the consummation of any of the transactions proposed in the amended plan until an appropriate United States District Court shall, upon application thereto, enter an order enforcing such amended plan.

It Is Further Ordered and Recited that all steps and transactions involved in the consummation of the amended plan, including particularly the issuances, transfers, exchanges, conveyances, expenditures, acquisitions, receipts, distributions and sales, hereinafter described and recited in subparagraphs I through VIII below, are necessary or appropriate to the integration and simplification of the Engineers Public Service Company holding company system and are necessary or appropriate to effectuate the provisions

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

of Section 11 (b) of the Public Utility Holding Company Act of 1935, are hereby authorized, approved and directed; the stock and securities and other property which are ordered to be issued, exchanged, received, acquired, transferred, conveyed, distributed or sold upon such transactions, and the expenditures which are ordered to be made, being specified and itemized as follows:

I. A. Engineers, except as recited below, will issue and distribute by mail to the holders of its common stock of record on a date to be specified by its Board of Directors, without the surrender by such stockholders of their certificates for Engineers common stock, warrants described in the amended plan evidencing the right to acquire from Engineers 1,909,968 shares of common stock (reclassified) of Gulf States, on a share for share basis and on the terms hereinafter more particularly set forth.

B. In cases where the addresses of the record holders of Engineers common stock are unknown or are outside the continental United States and Canada, such warrants will not be mailed, but will be held in the name of a Transfer Agent and will be issued and distributed upon instructions of said record owners, or their duly authorized agents, until the opening of business on the second business day before the expiration date of the warrant period, at which time all warrants so held with respect to which no such instructions have been received will be sold by Engineers, subject to the provisions of paragraph 9 of Division C of the amended plan and the pro rata shares of the aggregate net proceeds, if any, will be remitted to each holder of common stock of Engineers on whose behalf warrants are so sold, or, in cases where such remittance is not lawful or the addresses are unknown, held for the account of each such stockholder subject to payment upon receipt

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

of lawful instructions. In cases where the Engineers common stockholder cannot be located, and where no valid claim is made for such proceeds within a period of ten years from the effective date of the amended plan, such net proceeds will be paid to Gulf States.

II. Pursuant to the provisions of the above mentioned warrants, Engineers will transfer and deliver Gulf States common stock to those persons who exercise said warrants before the expiration date thereof, and upon such exercise the holders of said warrants will either (1) pay Engineers $11.50 for each share of Gulf States common stock so acquired, or (2) deliver to Engineers in exchange for said Gulf States common stock whole shares of Engineers preferred stock on the basis of equivalent values, assigning $11.50 per share for each share of Gulf States common stock, and $105 plus accrued dividends to the expiration date of the warrant for each share of Engineers $5 preferred stock and $110 plus accrued dividends to the expiration date of the warrant for each share of Engineers $5.50 preferred stock and $6 preferred stock; provided that, on the basis of the relative values above stated, the value of the whole shares of Engineers preferred stock to be exchanged under the warrants will not exceed the value of the shares of Gulf States common stock which the warrant holder is entitled to and intends to acquire, and to the extent that the value of such shares of Engineers preferred stock exchanged for Gulf States common stock under said warrants is less than the value of such shares of Gulf States common stock to which the warrant holder is entitled and intends to acquire, the difference will be paid by the warrant holder to Engineers in cash.

III. Any of the 1,909,968 shares of Gulf States common stock not sold or exchanged upon exercise of the above mentioned warrants will be sold by Engineers,

subject to the provisions of paragraph 9 of Division C of the amended plan.

IV. Engineers will thereafter deposit in trust with a solvent bank or trust company for the benefit of its preferred stockholders an amount equal to $105 per share plus accrued dividends to the date of such deposit for each share of its $5 preferred stock, and $110 per share plus accrued dividends to the date of such deposit for each share of its $5.50 preferred stock and $6 preferred stock, not surrendered in exchange upon exercise of the above mentioned warrants, in cancellation of all its preferred stock.

V. A. Engineers will dissolve and, promptly thereafter, distribute pro rata to the holders of its common stock, without surrender by said holders of their certificates for common stock of Engineers:

(1) the entire 381,994 shares of El Paso common stock (reclassified) which will then be held by Engineers, on the basis of one-fifth of a share of El Paso common stock for each share of Engineers common stock held, and

(2) approximately 94.4% (2,769,453 shares) of the common stock of Virginia, on the basis of 1.45 shares of Virginia common stock for each share of Engineers common stock held.

B. In any case where the above proportions would result in a fraction of a share of common stock of either El Paso or Virginia, instead of fractional shares Engineers, through a Transfer Agent, will issue and distribute scrip, as described in the amended plan, exchangeable, when combined in lots aggregating one or more full shares of stock, for certificates for said shares, together with any dividends which shall have

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

been paid in respect of such shares to stockholders of record on any date subsequent to the effective date of the amended plan and prior to the date of exchange.

C. Upon surrender for exchange of such scrip aggregating one or more full shares of common stock of El Paso or Virginia, prior to the date of sale of such stock hereinafter referred to, said Transfer Agent will, in exchange for said scrip, deliver to the holder thereof a share or shares of such stock, together with any dividends which shall have been paid in respect of such shares to stockholders of record on any date subsequent to the effective date of the amended plan and prior to the date of exchange, and new scrip for any fraction in excess of a full share or shares.

D. All shares of common stock of El Paso or Virginia reserved for delivery upon exchange of such scrip which shall not have been delivered in connection with such exchange within two years of the effective date of the amended plan will be sold by the Transfer Agent, subject to the provisions of paragraph 9 of Division C of the amended plan, and the Transfer Agent will distribute to the holders of scrip certificates not theretofore surrendered their proportionate part of the net proceeds of sale, plus their proportionate part of any dividends which shall have been declared to holders of record as of a date after the effective date of the amended plan and prior to the date of sale; except that in cases where the Engineers common stockholders cannot be located and where no valid claim is made for the net proceeds from the sale of said stock and the proportionate part of dividends referred to above within 10 years from the effective date of the amended plan, such net proceeds and proportionate part of dividends will be paid, with respect to net proceeds of El Paso stock and dividends, to El Paso, and

Exhibit E to Application of Securities and Exchange Commission (Cont'd)

with respect to net proceeds of Virginia stock and dividends, to Virginia.

E. In cases where an Engineers common stockholder cannot be located and where no valid claim is made within 10 years from the effective date of the amended plan for the whole shares of El Paso or Virginia common stock distributable to such stockholder, such shares of stock will be returned to the issuing company for cancellation and the claims to dividends payable to holders of record of said shares after the effective date of the amended plan will be cancelled.

VI. Engineers will thereafter collect its assets and settle its debts and liabilities, and in connection therewith will, to the extent determined by its Board of Directors and subject to the provisions of paragraph 9 of Division C of the amended plan, sell and dispose of any or all of the assets not distributed as aforesaid, including all or any part of the Virginia common stock not theretofore distributed as above provided.

VII. After the final settlement of the affairs of Engineers and the payment of or provision for its debts and liabilities, it will distribute to its common stockholders its remaining assets, either in kind or in cash, in exchange for the certificates of Engineers common stock, and the Engineers common stockholders will surrender said certificates in exchange for such final distribution.

VIII. The foregoing transactions or any of them may be effected through and deliveries may be made to or through trustees, attorneys, transfer, exchange or other agents, or otherwise, and/or the stock and securities and other property may be delivered directly to those ultimately entitled thereto, all in any manner

consistent with the Court order enforcing the amended plan and within the time limits, if any, specified in the amended plan or in said Court order.

By the Commission.

ORVAL L. DUBOIS,
Secretary.

Order Setting Case for Hearing.

IN THE

DISTRICT COURT OF THE UNITED STATES

FOR THE DISTRICT OF DELAWARE

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY	A Proceeding to Enforce a Plan Pursuant to Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935 Civil Action No. 995 (Filed Jan. 9, 1947)

Order.

This 9th day of January 1947, upon consideration of the Application of the Securities and Exchange Commission, filed herein the 9th day of January 1947, and motion of counsel for said Common, IT IS ORDERED as follows:

(1) That a hearing be held on the 17th day of February 1947, at 11:00 A. M., E. S. T., in the District Court of the United States for the District of Delaware at the United States Court House, Wilmington, Delaware, before the Honorable Paul Leahy, District Judge, for the purpose of determining whether the Court should enforce and carry

Order Setting Case for Hearing (Cont'd)

out the terms and provisions of the plan of Engineers Public Service Company to effectuate the provisions of Section 11(b) of the Public Utility Holding Company Act of 1935, referred to in said Application and approved by the Securities and Exchange Commission by its Order dated January 8, 1947, and whether such plan is fair and equitable and appropriate to effectuate the provisions of Section 11(b) of the Public Utility Holding Company Act of 1935, and for such other purposes as may appear necessary or appropriate in the premises;

(2) That Engineers Public Service Company give notice of said hearing to each holder of record of its outstanding securities by mailing postage prepaid to his or her last known address a copy of the notice attached hereto and marked "Exhibit 1" and a copy of the Findings and Opinion and Order of the Securities and Exchange Commission dated January 8, 1947; that notice of said hearing be given to the participants in the proceedings or to their counsel of record; and that notice be given to all other persons by publications once in a newspaper of general circulation published in the cities of New York, New York; Wilmington, Delaware; and Boston, Massachusetts, in the form hereto annexed as Exhibit 1; and that such notice be mailed and published, respectively, on or before the 15th day of January, 1947;

(3) That on or before February 10, 1947, any person who proposes to oppose the Application of the Securities and Exchange Commission or the enforcement and carrying out of the terms and provisions of said plan, or the approval by this Court of said plan, shall serve by mail on Harry G. Slater, Chief Counsel, Public Utilities Division, Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania; and on Mudge, Stern, Williams & Tucker, Counsel for Engineers Public Service Company, 40 Wall Street, New York 5, New York, copies of a written statement of objections and any brief proposed

Order Setting Case for Hearing (Cont'd)

to be filed in support thereof and shall file such statement and brief on or before such date with the Clerk of this Court. Such statement of objections shall be addressed to the Commission's Application herein and to the Commission's Findings and Opinion dated December 4, 1946, and to the Commission's Supplemental Findings and Opinion dated January 8, 1947, and shall state in detail and in the manner required for pleadings by the Rules of Civil Procedure for the District Courts of the United States, the extent to which such statement challenges the allegations and findings therein contained together with any affirmative defense or objections to said Application;

(4) That during the pendency of these proceedings all security holders of Engineers Public Service Company, and all other persons be, and they are hereby, enjoined and restrained from doing any act or taking any action interfering with, or tending to interfere with, these proceedings or with the carrying out of the plan and compliance with the Order of the Commission approving it, including the commencement or prosecution of any action, suit or proceeding at law or in equity or under any statute in any court or before any executive or administrative officer, commission or tribunal, other than such proceedings before the Commission or this Court as may be authorized by the Act or the Rules and Regulations promulgated thereunder and such review, if any, in the Circuit Court of Appeals as may be provided by law.

By the Court,

(s) PAUL LEAHY
United States District Judge

Dated:
January 9, 1947.

Statement of Objections of Central-Illinois Securities Corporation and Christian A. Johnson.

IN THE

DISTRICT COURT OF THE UNITED STATES

FOR THE DISTRICT OF DELAWARE

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY	A Proceeding to Enforce a Plan Pursuant to Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935. Civil Action No. 995. (Filed Feb. 10, 1947.)

NOTICE IS HEREBY GIVEN, pursuant to an Order of United States District Court for the District of Delaware in the above-entitled cause, dated January 9, 1947, that CENTRAL-ILLINOIS SECURITIES CORPORATION (a corporation organized and existing under the laws of Delaware) and CHRISTIAN A. JOHNSON, being the owners of 5000 shares of Common Stock and 1000 shares of Common Stock of Engineers Public Service Company (hereinafter referred to as "Engineers"), respectively, acting in their own behalf and on behalf of all other owners of Common Stock of Engineers, do hereby OBJECT to the approval by the Court and to the enforcement and carrying out of the terms and provisions of the plan of Engineers under Section 11(e) of the Public Utility Holding Company Act of 1935 ("the Act"), approved by the Securities and Exchange Commission by its Order dated January 8, 1947, the enforcement of which is the subject of the above-entitled proceedings.

The grounds of objections are that the aforementioned plan of Engineers does not conform with the requirements of Section 11(e) of the Act in that said plan is not "fair and equitable" to the Common Stockholders of Engineers and is not "appropriate" to effectuate Section 11(b), in the following particulars:

Statement of Objections of Central-Illinois Securities Corporation and Christian A. Johnson (Cont'd)

1. Said plan provides for the payment to the holders of the Preferred Stocks of Engineers of amounts aggregating approximately $3,200,000 in excess of the amounts to which such stockholders are entitled under the applicable charter provisions of Engineers and in consonance with the standards of fairness and equity;

2. Said plan, in failing to provide for the establishment of an escrow fund with respect to the aforementioned excess or bonus payments to the Preferred Stockholders is deficient of any mechanics for the effectuation and carrying out of the other phases of the plan of Engineers during such period as the legality and propriety of payment of the excess or bonus amounts is in litigation.

Dated, February 7, 1947.

Statement of Objections of Lucille White and Frances Boehm.

IN THE

DISTRICT COURT OF THE UNITED STATES

FOR THE DISTRICT OF DELAWARE.

IN THE MATTER of ENGINEERS PUBLIC SERVICE COMPANY.	A Proceeding to Enforce a Plan Pursuant to Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935. Court Action No. 995. (Filed Feb. 10, 1947.)

TO THE HONORABLE DISTRICT COURT OF THE UNITED STATES FOR THE DISTRICT OF DELAWARE:

Lucille White and Frances Boehm, common stockholders of Engineers Public Service Company by Louis Boehm and Raymond L. Wise, their counsel, do hereby object to the Plan of Engineers Public Service Company to effectuate the provisions of Section 11(b) of the Public Utility Holding Company Act of 1935 and do further object to the application of the Securities and Exchange Commission for the enforcement and carrying out of the terms and provisions of said plan, and do further object to the approval by this Court of said plan as follows:

With Respect to the Findings and Opinion of the Securities and Exchange Commission Dated December 4, 1946

1. Object to so much of the Findings and Opinion as states: (p. 26) "Since under the circumstances of this case, we do not think it proper to regard the liquidation provisions of the charter as conclusive in determining those

Statement of Objections of Lucille White and Frances Boehm (Cont'd)

rights, we must consider all provisions of the charter applicable to the preferred, such as the dividend rate and the call price as well as the liquidation preferences, and we must analyze the financial condition of the company with particular regard to the asset and earnings coverage of the preferred."

On the ground that the liquidation provisions of the charter are conclusive.

2. Object to so much of the Findings and Opinion as states: (p. 31) "It is apparent that the preferred has an investment value at least equal to the respective call prices."

On the ground that the investment value of the preferred stock is not in excess of $100.00 per share plus accrued dividends and on the further ground that no evidence was introduced for the common stockholders to substantiate that fact.

3. Object to so much of the Findings and Opinion as states: (p. 31) "Upon a full consideration of the record before us, we conclude that the payment of $100.00 per share, plus accrued dividends, to the preferred in retirement, is not fair and equitable to the preferred stockholders, and that the fair and equitable standard would require the payment of an amount equal to the call prices of the securities, plus accrued dividends. We cannot, therefore, approve the provisions of Part I of the plan relating to the retirement of the preferred."

On the grounds set forth in Objections 1 and 2.

With Respect to the Supplemental Findings and Opinions of the Securities and Exchange Commission Dated January 8, 1947

4. Object to so much of the Supplemental Findings and Opinion as states: (p. 5) "The plan is fair to the common

Statement of Objections of Lucille White and Frances Boehm (Cont'd)

stockholders and otherwise conforms with the applicable standards of Section 11 in that it provides for a rapid winding up of the affairs of the company at a minimum expense and distributes to them the residue of the estate after payment of liabilities and the retirement of the preferred stock.

Accordingly, we find the amended plan necessary to effectuate the purposes of Section 11(b) and fair and equitable to all persons affected.''.

On the ground that the payment to the preferred of the call price is unfair and inequitable to the common stockholders in that it provides for the payment to the preferred in excess of $100.00 per share, plus accrued dividends, contrary to the involuntary liquidation provisions of the charter.

Statement of Objections of Thomas W. Streeter, et al.

IN THE

DISTRICT COURT OF THE UNITED STATES

FOR THE DISTRICT OF DELAWARE

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY	A Proceeding to Enforce a Plan Pursuant to Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935. Civil Action No. 995. (Filed Feb. 10, 1947.)

Statement of Objections of Thomas W. Streeter et al. Preferred Stockholders of Engineers Public Service Company to Application Filed by the Securities and Exchange Commission.

Thomas W. Streeter, a preferred stockholder and a director of Engineers Public Service Company, together with other stockholders holding 10,494 shares of preferred stock of the company, by their attorney, Lawrence R. Condon, respectfully state:

1. Pursuant to the authorization of the Company's Board of Directors they have retained counsel, above named, on behalf of the preferred stockholders and have participated throughout the course of these proceedings before the Securities and Exchange Commission.

2. They admit that if the amended plan is consummated in accordance with the prayer for relief contained in the application of the Securities and Exchange Commission such plan would be fair and equitable and appropriate to effectuate the provisions of Section 11(b) of the Public Utility Holding Company Act of 1935.

Statement of Objections of Thomas W. Streeter, et al.
(Cont'd)

3. They admit that the proposed dissolution of Engineers Public Service Company is necessary to effectuate the provisions of the Act, as alleged by the Commission in paragraphs 10 and 13 of its application but allege that such dissolution is not required by the Act or by any order of the Commission and is entirely voluntary within the meaning of the Company's charter.

4. They admit that the preferred stocks have investment values of at least their respective call prices and that the preferred stockholders are entitled to such amounts if the dissolution is required by the Act but allege that the proposed retirement of the preferred stocks is tantamount to a redemption of such stocks within the meaning of the Company's charter.

5. They object to the Commission's finding contained in its Supplemental Findings Opinion and Order, entered January 8, 1947, that in the event the common stockholders should secure a stay preventing the payment of the full amount of the call prices of the respective preferred stocks, it would be appropriate for Engineers to make a part payment on the preferred stocks of One Hundred ($100.00) Dollars per share and thus stop the accrual of further dividends. Under the Company's charter, the preferred stockholders are entitled to be paid their dividend preference before the common stockholders may receive any dividends or assets unless the preferred stockholders are paid their respective redemption preferences in full together with accrued dividends to the date of payment. Your objectors allege that any action in accordance with the finding of the Commission would be a violation of the contract rights of the preferred stockholders and, further under all the circumstances of this case, if such action were taken the plan would not be fair and equitable.

6. This statement of objections is filed in accordance with the order of this court entered January 9, 1947 but in

view of the fact that any objection to termination of dividends would be academic if the plan is consummated according to its terms and the application of the Commission, your objectors respectfully submit that the filing at this time of a brief on the question of dividends would not be within the contemplation or intent of such order and might well be an imposition on the Court's time. Your objectors construe the Court's order as permitting such action and they respectfully reserve the right at an appropriate time, to support the objections stated herein with a brief if, as, and when, any application is made for a stay of an order of this Court directing the consummation of the plan according to its terms.

WHEREFORE, your objectors respectfully pray that the Court: (1) enter an order in accordance with the application of the Securities and Exchange Commission, and (2) in the event such request is made, deny any request for a stay of such order.

February 6th, 1947.

Exhibit 1 to Motion of Securities and Exchange Commission to Supplement Application.

"On February 11, 1947, at the request of Engineers, the Commission amended its Supplemental Findings and Opinion and Order dated January 8, 1947, in the manner set forth in its Order of Amendment dated February 11, 1947, a copy of which is attached hereto and marked "Exhibit F" (Holding Company Act Release No. 7190), so as to make appropriate findings and recitals to enable Engineers to obtain the benefits of Supplement R and Sections 371 and 1808 (f) of the Internal Revenue Code, as amended, in the event that it becomes necessary and desirable, in order to consummate uncontested portions of the amended plan, to make an appropriate escrow arrangement which will preserve the rights of affected persons pending any protracted litigation with respect to any contested portion of said amended plan."

Exhibit 1 to Motion of Securities and Exchange Commission to Supplement Application (Cont'd)

EXHIBIT F

For IMMEDIATE Release Tuesday, February 11, 1947

SECURITIES AND EXCHANGE COMMISSION

PHILADELPHIA

HOLDING COMPANY ACT OF 1935

Release No. 7190

UNITED STATES OF AMERICA

BEFORE THE

SECURITIES AND EXCHANGE COMMISSION

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 11th day of February, A. D. 1947.

IN THE MATTER
of
ENGINEERS PUBLIC SERVICE COMPANY
File No. 54-132
EL PASO ELECTRIC COMPANY
File No. 70-1149
GULF STATES UTILITIES COMPANY
File No. 70-1150
VIRGINIA ELECTRIC AND POWER COMPANY
File No. 70-1419
(Public Utility Holding Company Act of 1935)

Order of Amendment.

The Commission on December 4, 1946, having issued Findings and Opinion with respect to the Section 11 (e)

Exhibit 1 to Motion of Securities and Exchange Commission to Supplement Application (Cont'd)

plan filed by Engineers Public Service Company ("Engineers"), and having on January 8, 1947, issued Supplemental Findings and Opinion and Order approving said plan as amended;

The Commission having found in said Supplemental Findings and Opinion that the plan as amended meets the applicable standards of the Public Utility Holding Company Act of 1935 and that, if in the course of securing court approval and enforcement of said plan it should appear that protracted litigation might ensue over the question of the amount payable to the preferred stockholders, and thereby impede expeditious enforcement of the plan and compliance with the Act, it would be in conformity with said Act and the Commission's Findings and Opinion to separate the contested issue from the uncontested issues and consummate the uncontested portion of the plan and that ample latitude exists in the plan and in the powers of the enforcement court to approve the plan with an appropriate escrow arrangement which will achieve that result; and

Engineers having subsequently indicated that, in the event such an escrow is established, it has been advised by tax counsel that the present Order approving the amended plan may not contain adequate provisions and recitals to satisfy the requirements for tax exemption in Supplement R and Sections 371 and 1808 (f) of the Internal Revenue Code, and Engineers having requested that such provisions and recitals be made and incorporated into our order; and

The Commission finding that such provisions and recitals are appropriate;

IT IS ORDERED that

1. The portion of the Supplemental Findings and Opinion of January 8, 1947, appearing as the second full paragraph at page 6 of Holding Company Act Release No. 7119, is amended to read as follows:

Exhibit 1 to Motion of Securities and Exchange Commission to Supplement Application (Cont'd)

"We do not agree that any such amendment is necessary at this time. There is considerable question whether the eventuality on which the contention is based will occur at all. Should the plan be approved by the District Court, it is conjectural whether further appeals will be undertaken in view of the delay involved and the consequent substantial expense to the company which expense would, of course, ultimately be borne by the common stockholders. We believe that prompt payment of the full amount which we have found due the preferred will most expeditiously accomplish compliance with the Act. However, should the objecting stockholders continue their objections and indicate an intention to appeal any order of approval by the District Court, it is clearly desirable, in order to avoid the possibility of unnecessary delay in carrying out the uncontested portion of the plan until the controversy with respect to the additional payments is determined, that some arrangement should be made to separate the uncontested from the contested issues. In such event, to achieve expeditious compliance with the Act and fairness to the persons affected, it would be appropriate for Engineers to make prompt payment of $100 per share and accrued dividends to the preferred in order to stop the accrual of further dividends, and to set up an escrow arrangement, along the lines suggested in our previous Opinion, to protect the interests of the various groups and to enable the company to go forward with the uncontested portion of the plan. As indicated in our previous Opinion, such an escrow would have to be large enough to assure payment not only of the amount in issue but of an additional amount to provide the preferred 'for the period of the escrow a return on the amount in escrow which is measured by the return which would have been received by it if the stock remained outstanding.' This can be accomplished

through the establishment of an escrow in cash of $4,000,000 as suggested in our former Opinion, and through such incidental changes in the program for carrying out the plan which such an escrow entails.[9] Establishment of such an escrow and the incidental changes which such an escrow arrangement would require, would be fair and equitable to the persons affected by the plan and would be necessary and appropriate to effectuate the provisions of Section 11 (b).

"Accordingly, if it appears during the course of the enforcement proceeding that it is likely that some holder or holders of Engineers common stock will contest the right of the preferred stockholders to receive in respect of their stock any amount in excess of $100 per share and accrued dividends, and Engineers indicates that it, therefore, desires to follow the alternative method of effectuating the plan through the use of an escrow, with such incidental changes which an escrow involves, such alternative shall be deemed the method approved by the Commission for effectuating the plan. We do not believe that it would be necessary to return the case to the Commission in order to set up such an escrow or to make the incidental changes which

---

"[9] As stated in our former Opinion under the heading, 'Escrow Provision' (Holding Company Act Release No. 7041, at p. 36), the escrow, if established, should provide for the deposit by Engineers with the Escrow Agent of $4,000,000 in cash for the purpose of (1) providing for payment to the preferred stockholders of an amount equal to the redemption premiums on the shares of their respective series, or such lesser amount as shall finally be determined to be payable to them, with interest thereon for the period of delay at rates determined in respect of each series of preferred stock on the yield basis stated in our former Opinion and (2) providing for the payment of fees and expenses incurred or to be incurred under the plan, which fees and expenses are subject to the approval of the Commission. Briefly stated, the principal incidental changes in the program resulting from the establishing of an escrow are that the preferred stockholders who exchange their shares of preferred stock for Gulf States common stock will be given credit on such exchange to the extent of $100 per share plus accrued dividends and the deposit for the preferred stockholders who do not so exchange will be $100 per share and accrued dividends, with provisions, in both such cases, for the payment in cash of additional amounts equal to the redemption premiums on the shares of their respective series, or such lesser amount, as shall finally be determined to be payable to them, with interest thereon as aforesaid."

the establishment of the escrow involves. Such escrow and such incidental changes would be established in accordance with our order herein, under Court supervision, and our counsel before the Court are authorized to present to the Court the Commission's views concerning whether the form of escrow and the incidental changes conform to the standards set forth herein, in our former Opinion and in our Order.

"We conclude that it is unnecessary to amend the plan further at this time since it is at least questionable whether an escrow will be needed at all and since the matter can be raised and dealt with in Court, if and when the need arises.[9a] However, in view of the possibility that the alternative escrow procedure may be followed in effectuating the plan, our Order approving the plan shall be phrased in the alternative and contain necessary provisions and recitals to satisfy the requirements of the Internal Revenue Code in the event that an escrow is established."

2. Our Order of January 8, 1947, approving the amended plan is amended to read as follows:

(a) The sixth full paragraph of said Order is amended to read:

"The Commission having found that the amended plan of reorganization is necessary to effectuate the provisions of Section 11 (b) and is fair and equitable to the persons affected thereby, and the Commission having further found that said declarations, as amended, should be permitted to become effective, and the Commission having further found that, if there

"[9a] We do not understand that the plan would permit the proposed deposit in trust of the full amount to relieve Engineers of any further responsibilities to the preferred if the payment to the preferred of the amounts deposited were the subject of a stay. Any such provision would obviously be unfair unless there were assurance that the preferred would receive adequate compensation for any delay in payment to them."

Exhibit 1 to Motion of Securities and Exchange Commission to Supplement Application (Cont'd)

appears to be a likelihood of litigation beyond the District Court with regard to the right of the preferred stockholders of Engineers to receive in respect of their stock any amount in excess of $100 per share and accrued dividends, it is advisable, in order to avoid possibility of delay in the carrying out of the whole plan until such controversy is determined, to provide for escrowing such additional amount, plus appropriate compensation for the delay in payment of any additional amount found to be due and payable, to await the outcome of any such litigation and to make the incidental changes in the program for carrying out the amended plan which such an escrow entails, and that in such circumstances such escrow and changes in the program are necessary and appropriate to effectuate the provisions of said Section 11(b) and are fair and equitable to the persons affected thereby;".

(b) The said Order is amended by substituting a semicolon for the period at the end of the sub-paragraph numbered VIII appearing at the end of said Order and adding the following:

"provided, however, that if counsel for Engineers, in the course of the enforcement proceeding and at any time before the approval of the amended plan by the United States District Court, shall state to the District Court that Engineers has determined that it appears likely that some holder or holders of Engineers' common stock will litigate beyond the District Court the payment to the Engineers preferred stockholders of any amount in addition to $100 per share and accrued dividends and that Engineers accordingly desires to follow the alternative method of effectuating the plan through the use of an escrow, then counsel for the Commission shall present to said District Court a form of a proposed decree or order of said Court, setting forth a

proposed escrow agreement and the incidental changes in the program which the establishment of the escrow involves, and in such event (a) all references in this amended Order to the amended plan shall be deemed to be to the amended plan as affected by the establishment of such escrow and the making of such incidental program changes, (b) the references to warrants in sub-paragraphs I through IV above shall be deemed to be to warrants providing for assigning to the Engineers $5 preferred stock, $5.50 preferred stock and $6 preferred stock, a value of $100 per share plus accrued dividends to the expiration date of the warrant and providing that any holder of Engineers preferred stock who surrenders his stock in exchange for Gulf States common stock will, in respect of such surrendered shares, have the right to receive the same amount which holders of such preferred stock not so surrendering their stock will receive in addition to $100 per share plus accrued dividends if any such amount is finally determined to be payable, and (c) sub-paragraphs II and IV above shall be deemed to read as follows:

'II. Pursuant to the provisions of the above mentioned warrants, Engineers will transfer and deliver Gulf States common stock to those persons who exercise said warrants before the expiration date thereof, and upon such exercise the holders of said warrants will either (1) pay Engineers $11.50 for each share of Gulf States common stock so acquired, or (2) deliver to Engineers in exchange for said Gulf States common stock whole shares of Engineers preferred stock on the basis of equivalent values, assigning $11.50 per share for each share of Gulf States common stock, and $100 plus accrued dividends to the expiration date of the warrant for each share of Engineers preferred stock; provided that, on the basis of

Exhibit 1 to Motion of Securities and Exchange Commission to Supplement Application (Cont'd)

the relative values above stated, the value of the whole shares of Engineers preferred stock to be exchanged under the warrants will not exceed the value of the shares of Gulf States common stock which the warrant holder is entitled to and intends to acquire, and to the extent that the value of such shares of Engineers preferred stock exchanged for Gulf States common stock under said warrants is less than the value of such shares of Gulf States common stock to which the warrant holder is entitled and intends to acquire, the difference will be paid by the warrant holder to Engineers in cash. Any holder of Engineers preferred stock who surrenders his stock in exchange for Gulf States common stock will, in respect of such surrendered shares, have the right to receive the same amount which holders of such preferred stock not so surrendering their stock will receive in addition to $100 per share plus accrued dividends if any such amount is finally determined to be payable.

* * * * *

'IV. After completion of the disposition of the Gulf States common stock, Engineers will

'(a) deposit in trust, for the benefit of Engineers preferred stockholders who have not surrendered their preferred stock in exchange for Gulf States common stock, with a solvent bank or trust company an amount equal to $100 per share plus accrued dividends to the date of such deposit, in respect of each such share; and

'(b) deposit with a solvent bank or trust company in escrow the sum of $4,000,000 in cash, pursuant to the provisions of an escrow agreement which provides, among other things,

Exhibit 1 to Motion of Securities and Exchange Commission to Supplement Application (Cont'd)

'(i) for payment to holders of preferred stock of Engineers, in addition to the $100 per share and accrued dividends to be allowed on exchange for Gulf States common stock or to be deposited in trust as above provided in respect of shares not so exchanged, of $5 per share in respect of each share of $5 preferred stock and $10 per share in respect of each share of $5.50 preferred stock and $6 preferred stock, plus in each case an amount equal to simple interest on the amount so paid at a rate per annum equal to 4.76% in the case of $5 preferred stock, 5% in the case of $5.50 preferred stock and 5.45% in the case of $6 preferred stock from the date of said escrow agreement to the date of such payment, upon delivery to the escrow agent of an opinion of independent counsel to the effect (1) that the District Court of the United States for the District of Delaware in Civil Action No. 995 has entered a decree or order approving the amended plan, including the payment to holders of Engineers preferred stock of the amount, above specified, equal to the respective redemption premiums on their shares with interest as aforesaid and directing its enforcement, (2) that no holder of Engineers common stock has made timely appeal from such decree or order, or, in the alternative, that a holder or holders of Engineers common stock has made such a timely appeal but that the appellate court or courts have approved said decree or order approving the amended plan entered by said District Court as aforesaid, and (3) that such decree or order has become final as against the holders of Engineers common stock and is no longer subject to appeal by them;

Exhibit 1 to Motion of Securities and Exchange Commission to Supplement Application (Cont'd)

'(ii) for payment to the Engineers preferred stockholders of the amounts specified in said final order and, upon delivery to the escrow agent of a certified copy of an order of the Commission or an order or decree of the United States District Court or any appellate court directing or permitting the distribution to the holders of preferred stock of some part of the amount deposited in escrow, but less than the amounts specified in subdivision (i) above, together with an opinion of independent counsel that such order or decree has become final and is not subject to appeal;

'(iii) for payment of certain fees, compensation, remuneration and expenses pursuant to order of the Commission and for repayment to Engineers of amounts not payable to preferred stockholders or for fees, compensation, remuneration or expenses.

Such amounts will be deposited in cancellation of all of the Engineers preferred stock. The holders of Engineers preferred stock who have not surrendered the same in exchange for Gulf States common stock will surrender such stock to the trustee above mentioned against payment of the amounts deposited in trust in accordance with subdivision (a) above in respect of their shares, and all holders of Engineers preferred stock will receive so much of the said $4,000,000 as may be determined to be payable to them in accordance with said escrow agreement.'"

By the Commission.

ORVAL L. DUBOIS,
Secretary.

Notice to Security Holders, et al., of Hearing on Plan.

IN THE

DISTRICT COURT OF UNITED STATES

FOR THE DISTRICT OF DELAWARE

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY	A Proceeding to Enforce a Plan Pursuant to Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935. Civil Action No. 995. (Filed Feb. 17, 1947.)

Notice.

TO THE SECURITY HOLDERS OF ENGINEERS PUBLIC SERVICE COMPANY AND TO ALL OTHER PERSONS:

NOTICE IS HEREBY GIVEN, pursuant to an Order of United States District Court for the District of Delaware in the above-entitled cause, dated 9th day of January, 1947, that the Securities and Exchange Commission has filed an Application in said Court to enforce and carry out the terms and provisions of a plan of Engineers Public Service Company under Section 11(e) of the Public Utility Holding Company Act of 1935, approved by the Securities and Exchange Commission by its Order dated January 8, 1947, and that a hearing will be held before the Honorable Paul Leahy, United States District Judge, sitting as Judge of said District Court of the United States at the United States Court House in Wilmington, Delaware, on the 17th day of February, 1947, at 11 A. M., E. S. T., for the purpose of determining whether the Court should enforce and carry out the terms and provisions of such plan, and whether such plan is fair and equitable and appropriate to effectuate the provisions of Section 11(b) of said Act, and for such other purposes as may appear necessary or appropriate in the premises.

Notice to Security Holders, et al., of Hearing on Plan (Cont'd)

Any person who proposes to oppose the enforcement or carrying out of the terms and provisions of said plan or the approval of said plan by the Court, is required by said Order of the Court to serve on or before the 10th day of February, 1947, on Harry G. Slater, Chief Counsel, Public Utilities Division, Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania, and on Mudge, Stern, Williams & Tucker, Counsel for Engineers Public Service Company, 40 Wall Street, New York 5, New York, copies of a written statement of objections and any brief proposed to be filed in support thereof and shall file such statement and brief on or before such date with the Clerk of said District Court of the United States. The Court's Order provides that such statement of objections shall be addressed to the Commission's Application to said Court and to its Findings and Opinion dated December 4, 1946, and to its Supplemental Findings and Opinion dated January 8, 1947, and shall state in detail, and in the manner required for pleadings by the Rules of Civil Procedure for the District Courts of the United States, the extent to which such statement challenges the allegations and findings therein contained, together with any affirmative defense of said Application.

A copy of the plan as approved by the Securities and Exchange Commission will be supplied upon request addressed to Engineers Public Service Company, 90 Broad Street, New York 4, New York.

NOTICE IS FURTHER GIVEN that during the pendency of these proceedings, all security holders of Engineers Public Service Company and all other persons are enjoined and restrained from doing any act or taking any action interfering with, or tending to interfere with these proceedings or with the carrying out of said plan, or compliance with the Order of the Commission approving it, including the commencement or prosecution of any action, suit or proceeding at law or in equity or under any statute in any

court or before any executive or administrative officer, commission or tribunal, other than such proceedings before the Commission or this Court as may be authorized by the Act or Rules and Regulations promulgated thereunder, and such review, if any, in the Circuit Court of Appeals as may be provided by law.

ENGINEERS PUBLIC SERVICE COMPANY

Supplemental Statement of Objections of Thomas W. Streeter et al., to Application filed by Securities and Exchange Commission.

IN THE

DISTRICT COURT OF THE UNITED STATES

FOR THE DISTRICT OF DELAWARE

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY	A Proceeding to Enforce a Plan Pursuant to Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935. Civil Action No. 995.

Supplemental Statement of Objections of Thomas W. Streeter et al. Preferred Stockholders of Engineers Public Service Company to Application Filed by the Securities and Exchange Commission.

(Filed February 17, 1947)

Leave of Court having been first sought and obtained, Thomas W. Streeter, a preferred stockholder and a director

Supplemental Statement of Objections of Thomas W. Streeter et al., to Application Filed by Securities and Exchange Commission (Cont'd)

of Engineers Public Service Company, together with other stockholders holding 10,494 shares of preferred stock of the Company, by their attorney, Lawrence R. Condon, respectfully state:

1. They object to the Commission's Order of Amendment entered February 11, 1947 for the following reasons:

(a) It was entered without notice and an opportunity to be heard in violation of Section 11 of the Act. See Exhibit "A" attached hereto. Moreover, the said order was entered subsequent to the notification by the Company of its stockholders of the proceedings before this Court pursuant to the order of this Court entered January 9, 1947.

(b) It approves an escrow arrangement which is not a part of the plan.

(c) It approves the terms of an escrow agreement proposed by the Company without notice to the persons affected thereby and without an opportunity to be heard thereon.

(d) It approves "changes" to the plan without giving notice to persons affected thereby and without an opportunity to be heard thereon.

(e) It authorizes counsel for the Company to amend the plan in his sole discretion without notice to those affected thereby and an opportunity to be heard thereon.

(f) It requires the preferred stockholders to surrender their stock certificates leaving such stockholders without any indicia of a possible right to receive further sums in cancellation of their stock.

(g) It permits the Company to terminate the preferred stockholders' dividend preference prior to being paid their full redemption preference. Such action by the Company

Supplemental Statement of Objections of Thomas W. Streeter et al., to Application Filed by Securities and Exchange Commission (Cont'd)

was not proposed as part of the plan and was approved by the Commission without notice or an opportunity to be heard.

2. They object to the Commission's finding contained in such Order of Amendment that establishment of the described escrow, and the incidental changes which it would require, would be fair and equitable to the persons affected by the plan and would be necessary and appropriate to effectuate the provisions of Section 11(b) of the Act. Your objectors allege that the establishment of such an escrow without notice and an opportunity to be heard would constitute a denial of due process of law and further allege that if the plan is construed to permit an escrow in terms approved by the Commission, such plan would not be fair and equitable for the reasons set forth in paragraph numbered 5 of their Statement of Objections heretofore filed in this proceeding.

Dated February 17, 1947.

Before:

HON. PAUL LEAHY,
U. S. District Court Judge.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Appearances:

HARRY G. SLATER, Esq., and BERNARD S. KANTON, Esq., for the Securities and Exchange Commission.

WILLIAM E. TUCKER, Esq., and PAUL D. MILLER, Esq., of Mudge, Stern, Williams & Tucker, of New York, for Engineers Public Service Co.

CALEB R. LAYTON, III, Esq., and Francis H. SCHEETZ, Esq., of Philadelphia, Pa., for Home Insurance Co. and other Preferred Stockholders.

EDWIN D. STEEL, JR., Esq., of Morris, Steel, Nichols and Arsht; LAWRENCE R. CONDON, Esq., of New York, and FREDERICK ZAZOVE, Esq., of Illinois, for Thomas W. Streeter, Dissenting Minority Director of Engineers, and Preferred Stockholders.

HERBERT L. COBIN, Esq.; ALFRED BERMAN, Esq., and J. HOWARD ROSSBACH, Esq., of Guggenheimer & Untermyer, of New York, for Central-Illinois Securities Corporation and Christian A. Johnson, holders of Common Stock.

LOUIS BOEHM, Esq., and WILLIAM ESBITT, Esq., of New York, for Common Stockholders.

Mr. Steel: May it please the Court, may I move the admission *pro hac vice* of Mr. Frederick Zazove of the Illinois Bar and Mr. Lawrence R. Condon of the New York Bar who represent Thomas W. Streeter and others, preferred stockholders of Engineers Public Service Company.

The Court: You are admitted, gentlemen.

Mr. Layton: If your Honor please, I move the admission of Mr. Francis H. Scheetz of the Philadelphia Bar, representing Home Insurance Company and other preferred stockholders.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

The Court: You are admitted.

Mr. Cobin: If your Honor please, may I move the admission of Mr. Alfred Berman and Mr. J. Howard Rossbach of New York, representing Central-Illinois Securities Corporation and Christian A. Johnson.

The Court: You are admitted, gentlemen.

Mr. Tucker: I have no member of the Delaware Bar to move my admission. My name is William E. Tucker, and I have associated with me Paul D. Miller. Mr. Miller and I are counsel for Engineers Public Service Company.

The Court: You are admitted, Mr. Tucker.

Mr. Tucker: Mr. Miller too?

The Court: Yes.

Mr. Boehm: I am in the same position as Mr. Tucker. My name is Louis Boehm, and I am a member of the Bar of New York and also of the United States Supreme Court. I represent Lucille White and Frances Boehm, who are common stockholders.

The Court: You are admitted.

Mr. Slater: If the Court please, this hearing this morning is with respect to Engineers Public Service Company pursuant to the applicable provisions of the Public Utility Holding Company Act of 1935 and is being held pursuant to the Court's order of January 9, 1947. It might be well at the very outset for the company to submit its affidavits of compliance with the notice requirements of that order of the Court.

Mr. Tucker: I am pleased to present an affidavit of the mailing of notice of Richard N. Benjamin, who is Secretary of the Engineers Public Service Company, which was directed by the Court's order to give notice to the stockholders and certain notice by publication, and this is the affidavit which shows the mailing and also the affidavits of publication.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Slater

Mr. Slater: Since the filing of the Commission's application on January 9, your Honor is probably aware that we have filed a motion to supplement the Commission's application so as to reflect therein certain action taken by the Commission after the institution of this enforcement proceeding. The motion to supplement, in brief substance, is a motion to reflect in the proceeding an order of amendment issued by the Commission at the request of Engineers so as to assure to Engineers the benefits of certain provisions of the Internal Revenue Code in the event that an alternative course of consummation of the plan; in the event of a favorable Court order, is followed.

Now, the genesis of that, briefly, is as follows: In its original opinion of December 5, 1946 the Commission indicated that it would be appropriate under the circumstances of this case to create an escrow arrangement whereby there would be deposited in escrow an amount to cover distributions which are involved in the contested portions of the plan so that the uncontested aspects of the plan may be consummated. At that time Engineers had proposed a plan which provided for payment of $100 per share to the preferred stockholders. The Commission held that that was unfair; that the retirement amounts should be amounts equal to the redemption prices. The escrow arrangement was then suggested as an integral part of the plan. However, Engineers amended its plan so as to conform to the Commission's finding, and in the supplemental findings and opinion of January 8 the Commission indicated that an escrow arrangement was not necessary. Engineers was no longer objecting to the conclusions of the Commission. It was not then clear that there would be a contest in the Court or that the escrow arrangement would absolutely be necessary. The Commission further pointed out that if it developed that an escrow arrangement was a practical and feasible thing to do in the event that a contest developed, that one could

be created under the supervision of this Court, since an escrow would be a proper part of the consummation of the plan which this Court would direct in the event it would approve the plan.

The Court: Is there objection to the proposed amendment?

Mr. Slater: I understand that there is, your Honor.

However, upon consideration tax counsel advised Engineers that in the event such an escrow is created under the aegis of the Court, the incidental changes involved in consummating the plan makes it desirable that the Commission set forth certain itemizations and recitals so as to assure to Engineers the tax benefits of the applicable provisions of the Internal Revenue Code in the event that the escrow route is followed.

So the Commission issued this order of amendment, which in no way alters its previous findings and in no way affects the fairness issues which were before the Commission, and simply states what is the fact; that in the event an escrow arrangement is created the actions and transactions incident thereto would be necessary to effectuate the provisions of Section 11.

As I say, the amendment is submitted simply to reflect the action of the Commission since the filing of the application.

Perhaps before I go ahead further your Honor might want to hear from the opposition. I don't know the basis of the opposition except that an affidavit was handed me about two minutes before I got up.

The Court: We will hear from the opposition.

Mr. Zazove: If your Honor please, we were served with a notice of a motion by the Securities and Exchange Commission on the morning of Thursday, February 13, which for the first time called to our attention——

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Zazove

The Court: Does your criticism go to the amendment as such or is it an integral part of your objection as a preferred stockholder? Because I don't want to get into the merits of the other question until it is presented to me.

Mr. Zazove: It has a twofold purpose, your Honor. In the first place, we are objecting to the granting of this motion, which I will state, and I offer an affidavit in opposition to the motion made by the Securities and Exchange Commission.

The Court: Go on.

Mr. Zazove: Our position, as we see it, Judge, procedurally must take this course: A motion is now pending before you and naturally we are not concerned with the merits of the Commission's so-called amending order as we are with the procedural aspects of due process. In the event the motion is granted by the Court then we would ask leave to file a supplemental statement of objections in opposition to the amending order.

Now, I don't want to get into the merits, which that supplemental statement of objections would be, until we get a ruling on the motion. We think there is a sound reason for denying the motion just on the basis of due process.

In order to present the point adequately I must describe a little bit of what happened heretofore. The initial plan, as Mr. Slater told the Court, that was presented by the company to the Commission provided that the preferred stockholders would be paid $100 per share plus accrued dividends with no further payment to be made by the company unless the Court or the Commission ordered that payment. That plan was filed with the Commission and due notice was given by the Commission, as is indicated by the exhibits attached to the Commission's application, and hearings were held thereon. Subsequent to the closing of the record the Commission issued its Findings and Opinion in which it

indicated that it could not approve this plan as fair to the preferred stockholders unless it were further amended, and the Commission indicated in what respects amendments would have to be made. One amendment would be to require that the preferred stockholders be paid their redemption preferences. The second amendment was that the company should file an amendment creating an escrow so as to protect the preferred stockholders and their claims.

Now, the purpose of that particular escrow and that particular amendment which the Commission said was necessary was due to the mechanics of the plan whereby the company was proposing merely to pay $100 and no more and to pass out the assets to the common stockholders; so that in order to protect the preferred the Commission felt that an amendment was necessary to create an escrow.

Instead of amending the plan as the Commission directed, the company abandoned its original proposal of paying $100 per share and filed what is now known as Amendment No. 6, which constituted an entirely different plan. In this plan the company stated that it would pay the preferred stockholders their full redemption preferences as described by the charter. There was no provision in this plan for an escrow. Nothing was said about an escrow. Nothing was indicated in the plan other than the fact that the company was going to pay the preferred stockholders their full redemption preferences, and the company filed this plan, Amended Plan No. 6, with the Commission, and the Commission issued a notice to the public in which it described this plan. There was not a word in there about any escrow; there was not a word in there that would lead anybody to believe, if he were a preferred stockholder, that he would be paid anything other than the full redemption prices as provided by the charter.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Zazove

The notice of this proceeding was sent to all the stockholders by the company. Notice was given to the public and to the press in the usual manner by the Securities and Exchange Commission, and the hearing was held on this amended plan. As I said before, there was not a word and not a mention in the plan or in the Commission's notice or in the company's notice to its stockholders that there would ever be anything but a proposal by the company to pay the full redemption prices.

The Court: What about the Supplemental Findings and Opinion of the Commission under date of January 9, 1947?

Mr. Zazove: I am coming to that, your Honor. Subsequent to that hearing the record was closed and the Commission in its Supplemental Findings stated, which we believe contrary to the record, that the preferred stockholders were still objecting to the plan because it had no provision for an escrow. Now, if the Court will examine the record of the proceeding before the Commission which is now or will be before the Court, he will find that all the preferred stockholders said was that the Amendment No. 6 to the Plan was not fair and equitable to the preferred stockholders because it failed to comply with the Commission's Findings insofar as the Commission held that the preferred stockholders were entitled to additional compensation in the event they did not receive payment in full and at one time. We didn't ask for an escrow; we merely asked that the plan be further amended so as to provide that if there were any reason for delay that the preferred stockholders would be paid additional compensation.

So we say that the statement in the Supplemental Findings by the Commission constituted nothing but dictum, since there was nothing before the Commission at that time which had anything to do with an escrow or which had anything to do with any proposal of anyone that they were not going to pay the full redemption prices at one time.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Zazove

Now, notice of the Supplemental Findings that were issued by the Commission was mailed to the stockholders on December 20, 1946, to which there is attached a letter to the stockholders from the company. That is an exhibit in the record. It is Exhibit No. 82. If the Court will examine this letter he will find that unequivocally the plan states and the company's letter states that the company has abandoned any intention of contesting the payment of more than $100 a share to the preferred stockholders, and specifically says that the plan as now amended provides for the payment of the redemption prices in full at one time, in one amount, with no escrow. Not a word said about the escrow.

The Court: Well, what do you want done?

Mr. Zazove: Well, we don't believe that the Commission's motion should be granted for this reason: That it constitutes in effect an amendment to this plan without any notice and opportunity to be heard by anyone. The first time we knew about this thing was on Thursday, February 13, when we were served with a registered copy of the order of amendment that was entered by the Securities and Exchange Commission.

The Court: Setting aside for the moment any procedural impedimenta that may be present here, what do you want done?

Mr. Zazove: We want the motion of the Commission denied.

The Court: You don't want any provision for the escrow at all?

Mr. Zazove: Not if it is done this way. If this constitutes an amendment to the plan, there never was any notice or hearing on it.

The Court: Do you or do you not want an escrow feature?

Mr. Zazove: We don't want an escrow as proposed in this form of amendment.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Slater

The Court: You want to be heard on it.

Mr. Zazove: If the motion is granted we want to be heard on the merits of it, yes, sir.

The Court: Let us get on with the other feature.

Mr. Slater: I just want to say, your Honor, we are not asking you to approve at this time in the hearing the action taken by the Commission. Your Honor may disagree with it, but the fact is the Commission has taken that action, and it seems proper only to have this proceeding reflect all of the action taken by the Commission in the case.

The Court: Let us get on with the rest of the case. I am reserving the ruling on that.

Mr. Slater: I should like at this point, your Honor, to submit to the Court the record of the proceedings before the Commission consisting of 8 docket volumes of Commission records which are to your Honor's left. For your Honor's convenience may I submit an index of the testimony and exhibits which comprise that record. In submitting the record we don't believe it will be necessary for the Court in this case to examine into it. As we understand it, there is no attack upon the substantiality of the evidence upon which the Commission's subsidiary findings are based.

As your Honor is aware, the objections to the entry of the enforcement order prayed for are confined in scope in relation to the issues raised by the plan as a whole at the administrative level. However, since it is the independent duty of the Court apart from any objections which may have been filed to satisfy itself that the plan meets the statutory tests of necessity as well as fairness, I should like in presenting our affirmative case to state very briefly the more material aspects of the plan which relate to both of those statutory tests.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Slater.

The plan, in brief substance, is a plan for the liquidation and dissolution of Engineers, and was proposed by the Management and approved by the Commission as affording an appropriate means of resolving the problems of that company and its system under the Holding Company Act. In 1935 when the Act was passed Engineers was one of the larger holding company systems. In terms of the integration provisions of Section 11(b)(1) Engineers did gross violence to the Act. In addition to being engaged in the electric and gas utility business it operated suburban, interurban transportation systems, bus and street railway systems, ice and coal storage plants, telephone, steam, water properties and toll bridges. Geographically it could not have been more scattered, with properties in the Northwest in the State of Washington; Texas, Louisiana, New Mexico, and in the East, Virginia, West Virginia, Maryland and Key West.

In a Section 11(b)(1) proceedings instituted by the Commission, the Commission directed that Engineers limit its operations to the electric utility system of what is now Virginia Electric & Power Company, which operates in the states of Virginia, West Virginia, and North Carolina, and to certain related business. Court litigation ensued over that directive, and the Court of Appeals for the District of Columbia affirmed in part and reversed in part. The United States Supreme Court granted certiorari to both Engineers and to the Commission. The matter was argued in November 1945, but was never decided because Chief Justice Stone's death broke the quorum of the Justices. The case will not be decided, therefore, without re-argument, which has not yet been held.

In the meantime, during the course of this litigation Engineers has proceeded to effect compliance in part with the directive of the Commission, so that today Engineers

owns the common stock of Virginia Electric & Power Company, all but a very few shares; owns all of the common stock of Gulf States Utilities Company, which operates in Louisiana and, I believe, Texas; and all the common stock of El Paso Electric Company, an electric utility company operating in Texas and New Mexico.

It is the position of the Management, without any dissent expressed by any interested person, that upon the disposition of El Paso and Gulf States, which cannot be retained, the Commission has held, in combination with Virginia, the economic usefulness of Engineers would cease. The record clearly indicates that the Virginia properties are large enough to be operated independently of Engineers; that any function which Engineers might perform can be assumed by Virginia's management, and that the expense of Engineers' continued existence as a holding company merely over Virginia is unjustified.

The amended plan as approved by the Commission provides, then, for the disposition by Engineers of its interest in El Paso and Gulf States and Virginia, the retirement of the Engineers' outstanding preferred stocks—Engineers has no debt—and its dissolution. These results are clearly necessary to effectuate the provisions of Section 11(b) in the context in which Engineers finds itself and the Commission made the statutory finding of necessity.

The steps and the transactions proposed to accomplish the statutory objective involved the raising of some 42½ or 43 million dollars of cash to effect the retirement of the 392,000 odd shares of preferred stock which Engineers has outstanding at the amounts fixed by the plan as amended and approved by the Commission. Engineers has a $5 preferred stock, a $5.50 preferred stock, and a $6 preferred stock. The Commission held that the $5 stock should be retired in fairness and equity at an amount equivalent to its redemption price of $105; and the $5.50 and $6 stocks

at amounts equivalent to their redemption prices, in both cases $110.

Now, of the total amount needed to retire the preferred stocks the plan provides that Engineers will raise some $22,000,000 by the sale of its common stock interest in Gulf States to its common stockholders, Engineers' common stockholders pursuant to a warrant program at $11.50 a share. Engineers has on hand some $17,000,000 of cash to be applied, which can be applied to the retirement of the preferred stock. The balance of some $3,800,000 is to be raised by the declaration of special dividends from the subsidiaries.

I might note at this point that the warrant program permits those common stockholders who also own preferred stock to tender their preferred stock in payment of the Gulf States common stock on the basis of $11.50 a share for the Gulf and the retirement amounts fixed by the plan for the preferred stock.

Upon retirement of the preferred stock Engineers, after making provision for its liabilities, will distribute its remaining assets, namely, the common stock of Virginia and the common stock of El Paso to its own common stockholders and dissolve.

The Court: Is that exchange feature optional?

Mr. Slater: Yes, your Honor. I might add that the warrants, the Commission found, would have a value. They are transferable. A common stockholder of Engineers who did not desire to exercise his warrant might sell them to somebody who would. The Commission did not find it necessary to fix a value for the Gulf States common stock, but found a value there of at least $14, so as to provide a margin of $2.50 for each share over the warrant price.

The Commission found that the plan presented suitable means of accomplishing necessary results, that the plan was therefore necessary within the meaning of Section

11(e); and we submit that there is ample warrant for the Court to concur in that conclusion.

As to the fairness of the plan the principal issue presented related to the amounts at which the preferred stocks of Engineers should be retired, and that is the only issue which objectors have raised here, apart from the objection we heard this morning or may expect regarding any creation of an escrow arrangement.

Engineers' charter provides for the payment of $100, and I quote:

"In the event of any liquidation, dissolution, or winding up . . . or any reduction of its capital stock, resulting in any distribution of its assets to its stockholders; plus, in case such liquidation, dissolution, or winding up shall have been voluntary, the fixed redemption premium."

This, of course, before any distribution of assets can be made to the common stockholders.

The charter then goes on to provide that a consolidation or merger in which Engineers is involved shall not be deemed to be a liquidation, dissolution, or winding up within the meaning of that paragraph of the charter.

The plan as originally filed by Engineers provided for the payment to preferred stockholders in retirement of their interests of $100 a share, the amount equal to the involuntary liquidating preference. It was the position of Engineers that the impact of Section 11(b)(1) compelled the retirement of the stock and the dissolution of Engineers; therefore the liquidation and dissolution of Engineers is involuntary within the meaning of the charter and the involuntary liquidation price of $100 should be given controlling weight as against the entire remaining aspects of the bundle of rights of the preferred stockholders. In taking that position, however, Engineers conceded freely, and its president testified, that the investment value of the stock was equal to its redemption prices. That is, absent

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Slater

the Section 11 proceedings the preferred stocks would sell in all probability in excess of their call prices, and that the Management would retire the stocks at their call prices.

The Commission did not dispute that Section 11 impelled the discontinuance and elimination of Engineers as a corporate entity and that the proposed dissolution is involuntary in that sense; but the Commission reiterated the principles of the Otis case.

The Court: What is the $5 preferred selling for today?

Mr. Slater: Around $105. I believe they are all around the call prices at the present time.

In reiterating the principles of the Otis case the Commission said that in reorganizations or liquidations under Section 11 liquidation preferences do not mature. They were intended to mature either voluntarily by stockholder action or involuntarily by the action of creditors, and that this was not an involuntary dissolution withing the meaning of the charter.

The Otis case, as the Court knows, held as to a charter drawn in 1929 that the legislative policy now reflected in the Holding Company Act was not then foreseen, and Engineers' charter was drawn in 1925. In any event, the Commission held that the liquidation preferences, whether voluntary or involuntary, are not controlling, but that in evaluating the appropriate amounts to be given to the preferred stocks in retirement of their interests consideration must be given to all of the provisions of the charter, including the dividend rate and call price and the financial position of the company as well as of the preferred stocks. In the latter connection the assets and particularly the earning coverages of the preferreds were carefully considered. The Commission's findings on that score are set forth on pages 27 to 31 of its original Findings of December 5, 1945, and the Court will find them rather comprehensive.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Slater

The Commission found that the entire bundle of rights to be surrendered by the preferred stockholders has an investment value at least equal to the redemption prices. This conclusion was reached independently of the testimony to the same effect by the president of Engineers.

Now, the record abounds overwhelmingly with evidence to support the findings and conclusions of the Commission in regard to the investment value of the stocks. If it develops that we are wrong in our understanding that there is no challenge here, we shall, of course, be glad to submit pertinent record references with which we otherwise hesitate to burden the Court.

The Commission in conclusion, holding as it has in other cases that ordinarily the redemption price sets a ceiling on the investment value, since the redemption price is the maximum price, apart from Section 11, at which the security could be retired, concluded that fairness and equity required that the preferred stockholders receive amounts equal to the redemption prices upon retirement of their securities.

It may be noted, if the Court is not already aware of it, that the result reached here by the Commission is the result of all four commissioners participating, although two concurred in the result. Chairman Caffrey, one of those concurring, indicated clearly, however, in a one-page opinion which is part of the Commission's Findings of January 8, that he joined fully in the rationale of the two Commissioners; namely, that the liquidati preferences of the charter, whether voluntary or involuntary, are not here matured; that the doctrine of the Otis case requires that the preferred stockholders receive as the equivalent of the rights surrendered the present investment values of their securities.

The fourth commissioner, Commissioner Hanrahan, took the view that the dissolution was voluntarily proposed within the meaning of the charter and the provisions of the

charter in respect to voluntary liquidation, which are equal to the redemption prices, are therefore controlling.

An additional argument was presented by the Management in support of the original plan which has been adopted here lock, stock, and barrel by common stockholders objecting, and that is the so-called "share-the-loss" argument. The argument goes as follows: The divestments required by Section 11 thus far accomplished have visited heavy losses on the common stockholders, and equity requires that these losses be shared by the preferred stockholders by restricting the amount paid to them now to their involuntary liquidation price of $100 a share. In our view the argument is wholly without merit, and the Commission, we submit, disposed of it decisively on pages 33 to 34 of its Opinion of December 5. There is, of course, no demonstration whatsoever that the Act caused any of these alleged losses. As a matter of fact, when the plan was filed the market price for Engineers common stock was the highest it had been since 1932, and that price has been rising steadily since 1942 when steps of compliance were commenced to be taken. Further, the common stock reached a low of 1⅛ in 1935, and in 1945, after the asserted losses are supposed to have occurred, that is, losses attributable to the Act, was selling at a high of $37 a share. The loss suffered by Engineers in its investment in Puget Sound Power & Light Company is emphasized in connection with this argument. Engineers there suffered a loss of some 32 or 33 million dollars on its invested cost. As a matter of fact, however, the record clearly shows that that was a loss which was destined from the very day Engineers acquired its investment. In 1928 it paid $34,000,000 for all of the common stock of Puget, which was then yielding a return of some 2½%. In payment it issued in substantial part a large number of shares of its own $5.50 preferred stock, and the return on the Puget

common stock decreased instead of increased in later years; and in the early thirties the company was hard put to it to stave off bankruptcy, and huge arrearages on the preferred stocks distributed in the hands of the public resulted. The situation was such that in a fair and equitable recapitalization of Puget some three or four years Engineers emerged with a 3% common stock interest in the recapitalized company for all of its interest originally acquired in Puget.

In connection with the "share-the-loss" argument it should also be pointed out that any losses which might have occurred, whether attributable to Section 11 or not, they can be or otherwise are, of course, reflected today in the investment values of the preferreds as well as the common stock. In addition, the common, of course, bargained for the equity position which it now has, a position where it must absorb the losses; and for that it received an opportunity for unlimited gain. The preferred, of course, bargained against that position, sought a position of relative safety with the common as an underlying cushion to absorb losses which are now alleged. The preferred, of course, is the senior security, and the common, possessing only the residual interest, receives what is left after the preferred stock receives pursuant to the priority doctrine the equitable equivalent of what the preferred stock is surrendering

As I have stated, Engineers amended its plan to conform to the Commission's Findings and Opinion of December 5, and after notice and opportunity for further hearing as set forth in our application, the Commission issued its Supplemental Findings and Opinion and Order on January 8, in which the Commission approved the plan as amended, and it is that plan which we bring here now for enforcement.

That is all I have at this time, unless the Court has some questions.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Slater

The Court: Yes. I want you to clear up a matter for me. Does the Commission take the position that the charter contract is at an end between the parties?

Mr. Slater: No, I would not say that it does, your Honor, no. It says simply that the liquidation provisions of the charter are not controlling. They are decisive of the rights of the parties here.

The Court: What if you have a charter which provided that in the event this company has to merge, liquidate, or dissolve in order to comply with the Public Utility Holding Company Act of 1935 the preferred stocks shall be entitled to X, Y and Z? What would happen then?

Mr. Slater: I think the Commission would have given controlling weight to that provision of the charter. It was foreseen, and what was taking place was within the contemplation of the parties. You may recall it was the minority position in the Supreme Court that although the Holding Company Act was not expressly in the charter, that you could read Holding Company Act into the involuntary provisions for liquidation or into the liquidation provisions. That is, the minority held that when you speak of liquidation you don't speak merely of involuntary action by creditors, but involuntary action by something that might come along, such as the Holding Company Act.

I should like to reserve some time for rebuttal, your Honor.

The Court: Oh, certainly.

Does counsel for the Company wish to be heard?

Mr. Tucker: I think, your Honor, under the circumstances we, perhaps, should take a neutral position. We are in the awkward situation of having urged on the Commission that no premium be payable, and when the Commission decided against us on the point, of reversing our field on that and agreeing to pay the premium; and now

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Zazove

that the common stockholders are taking our original position which we urged, it seems to us our position should be neutral and to leave it to them to present that view to the Court.

The Court: Who wishes to be heard next?

Mr. Tucker: I don't want to say that I don't want to be heard on the escrow, because it seems to me vital that we have an escrow here unless the whole plan is to be delayed; but I assume I will do that later.

The Court: Yes.

Mr. Berman: Does your Honor think that the proponents ought to go forward or the objectors?

The Court: Are there any more proponents?

Mr. Zazove: If your Honor please, we are heartily in accord with this plan as it now stands.

The Court: Let us hear from this side of the field first, then. Either you or Mr. Scheetz. It doesn't matter.

Mr. Zazove: I subscribe to everything Mr. Slater told the Court. In fact, before the Commission we on behalf of the preferred stockholders urged that this case was governed by the Otis decision and that the preferred stockholders were entitled to their investment values of their securities; but at this stage of the proceeding we find that objection has been made by the common stockholders to the reasons given by the Commission in supporting the result that the plan, as now proposed reaches, and so we take the further position at this time, if your Honor please, that the Commission's order can be supported for reasons other than the Otis decision. Of course, we say that that only becomes important if your Honor should happen to agree with the common stockholders that the Otis decision does not control here.

We feel that the present plan before the Court is, in effect, a voluntary proposal by the company to accomplish

a result which could have been achieved under the charter. I would like to explain that to you. Under the charter in the event of a call redemption prices are payable. In the event of a voluntary liquidation under State law the redemption prices are payable. In the event of a merger, which was originally proposed as an alternative, the appraisal provisions of the Delaware statutes become operative to dissenting stockholders, and the testimony on this record indicates that the investment values under an appraisal are in excess of the call prices. So that we feel in this particular case if you view this voluntary proposal by the company to pay an amount equivalent to the redemption prices as any one of those alternative methods of procedure which they could have pursued under the charter, that you reach the same result.

As the Supreme Court has pointed out in the Otis case, fairness of the plan is not to be judged by the method that is used to achieve it. What has actually happened here is that the company as a part of the vehicle furnished to them by Section 11(e) of the Holding Company Act has proposed as an initial step the retirement of its preferred stock. The company, as many companies have done, could have called the stock under the charter and would have reached the same result. Now, why they didn't pursue the call provisions of the charter can be explained here, I think. Under the charter they would have to give 30 days' notice to the preferred stockholders, and it would have been necessary under the Holding Company Act to go back to the Commission and secure the Commission's approval. As it turned out under this plan as proposed the company is now suggesting that it wants to pay prices equivalent to the redemption prices, but it is doing it with only five days' notice under an 11(e) plan, and we submit that unless this Court can say that the only method, the only result which will be fair in this situation is the payment of $100, that

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Zazove

the plan must be approved as fair and equitable regardless of the reasons advanced by the Commission.

If you will recall, in the United Light & Power decision, which eventually became the Otis case, the Supreme Court in affirming the result all the way back down the line gave reasons which had not been advanced or used by the Commission nor the Court, for example, and we believe that the same thing would be true here; that if this plan and the result can be found fair on any basis, it does not depend on the investment value theory as long as this company has the inherent right to proceed under its charter; and I would like to recall to your Honor the Standard Gas & Electric case which was before you about a year ago or so. There the company's plan provided that no premium would be paid upon the redemption of the debentures. That case went to the Circuit Court of Appeals, and it was held that a premium was not payable. Because of subsequent developments when it came around to consummating the plan, the company for different reasons which it deemed satisfactory to itself abandoned its original proposal to retire the debentures and came in with a voluntary proposal to call the debentures and pay the premium, and this Court held that was fair. So we have a Circuit Court case here, and the only decision so far has been that they must pay prices equivalent to the——

The Court: I have no recollection that in the Standard case I held that was fair and equitable. I returned the matter to the Commission. It never came back to me.

Isn't that correct, Mr. Slater?

Mr. Slater: I think that is correct, your Honor.

Mr. Zazove: As I understood your Honor's decision, you said the company did not lose its right to proceed under the contract and call the debentures. In other words, the fact that there was a decision that they could retire

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Scheetz

them under Section 11 without paying the premium did not deprive the company of the right to call the stock, which is what we think is happening here. The fact that the Company has the right to propose an 11(e) plan does not deprive the company of the right to proceed under any of these other provisions of the charter, and we think that the result of what is proposed is identical if it had proceeded in that manner.

Of course, I would like to be heard on the other point at a later time.

The Court: Yes, we will reserve that.

Mr. Scheetz: If your Honor please, I am speaking for a group of preferred stockholders which owns approximately 9,000 shares of preferred stock. There is not much that I have to add to the presentation of the case in favor of the plan. Throughout the proceedings before the Commission we opposed the original plan and supported the plan as the Commission indicated the plan should be. Throughout those proceedings we urged that there should be an escrow provision in case the matter was to be litigated; deferred to the Commission's suggestion at the last hearing; but that was not a necessary feature of the plan at the stage as it then existed. But since some opposition has developed, why, obviously, it is an indicated course. Without wishing to prejudice Mr. Condon's position in any way with respect to the procedural approach, I am not making any objection to that.

On the merits I want to make some comments on two features. One is this question of sharing the losses that was expounded before the Commission, and it seems to me that there is a very practical answer that dictates how

inappropriate it is. It means this: That in the course of the compliance with the Act if losses should develop in liquidations which may or may not have arisen since the Act was adopted, which may or may not be the result of the attitude of the market toward the situation under the pressure of the Act, they would have to be measured. In turn, if as a step in compliance with the Act, the company is allowed to go out and buy its securities in the market at discounts, as happened in this case, and happened when the company itself was urging that they were not in liquidation, did not involve liquidation or reduction of capital within the meaning of the charter, that they were not compelled to pay the $100 involuntary liquidating price, the Commission would arrive at a point where it should go back and retroactively try to appraise the pros and cons, the pluses and minuses, in determining what it should do years later in carrying out a simplification program of the system as it was then constituted.

Now, there is one other point: The Commission has indicated, and I think the cases indicate, that the choice of the method of carrying out the provisions of Section 11 is not the important thing. Here the company urged, and I gather the opposition is urging, that the charter provisions should apply, because this is, in substance, a liquidation. Had the company retained the method of merging Virginia Electric & Power Company with Engineers, then the applicable charter provision provides that that should not be deemed a liquidation and dissolution; and, as Mr. Zazove said, presumably the procedures of the Delaware Merger Act would have been invoked, unless perchange the company had said that in the particular type of merger they were going to work out they would have paid some specific price and tried to by-pass both the charter provisions and the Delaware law.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Boehm

Now, when it comes to giving effect as to what a charter provides, then the security holders would be very much at the mercy of the particular method chosen by which to accomplish the result, and I think that the question here being one of what is the investment position of the preferred stockholders should not be determined by just whatever the charter happens to provide; particularly as it was pointed out in the Otis case that this type of proceeding was not before the parties when the contract was adopted.

The Court: Have all the preferreds been heard from?

All right, Mr. Berman.

Mr. Berman: Between Mr. Boehm and myself it was decided that he should go first, if that is agreeable to your Honor.

The Court: All right.

Mr. Boehm: May it please your Honor, in behalf of Lucille White and Frances Boehm, who own 1,000 shares of the common stock of Engineers, which they have held since 1943, I desire to oppose only that part of the plan of simplification or dissolution which provides that the preferred stockholders shall receive a redemption premium above $100 per share; namely, $105 per share in the case of the $5 preferred, and $110 per share in the case of $5.50 and $6 preferred.

We oppose it on the ground that the Otis case does not make it obligatory upon the Court or the Commission to pay this premium; that it would be grossly unfair to the common stockholders if this premium were paid; and that, as a matter of fact, the investment value of the preferred stock is not and for many years has not been more than $100 per share.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Boehm

Now, in order to ascertain whether the Otis case is binding upon the Court and upon the Commission on the question of paying the redemption premium to the preferred stock, I think it is important that we go into the facts of the Otis case and the law that was laid down by the Supreme Court in that case. I might add that in the Otis case the Supreme Court itself was very sharply divided. Five Justices voted in favor of the majority opinion and three Justices, headed by Chief Justice Stone and concurred in by Justice Frankfurter and one other judge, whose name I forget for the moment, voted that the charter provision was absolutely controlling and that the question of fairness and equitableness did not enter into the case.

So that the Otis case was decided by a very sharply divided Court, and I think must be confined to the facts of that case alone, and that a case which stands upon different facts must be decided quite apart from the Otis case.

Now, the facts in the Otis case were that the United Light & Power Company was the top holding company of a very extensive utility system. It had beneath it another holding company known as the United Light & Railways Company. The plan of simplification was drawn under the so-called Grandfather clause of the Public Utility Holding Company Act, which provided that a holding company which is the owner of a subsidiary company which itself is a holding company must be dissolved. Pursuant to that provision of the Act this simplification proceeding was brought.

There was no real dissolution of the business as a going enterprise. The system continued on just the same as before. The only question that was involved was whether the top holding company should be succeeded by a subholding company which would receive all of the assets of the top holding company. So that we have here purely a corporate simplification proceeding which in no way affected

the business of the system itself; and the Supreme Court in its opinion laid great stress upon that fact in stating that it was not the intention of Congress that rights under such a liquidation or simplification, the rights of stockholders and security holders, should be destroyed.

The question in the Otis case was the very converse of the question we have in this case, namely, whether the common stock of the United Light & Power Company which had at that time an equity in present earnings of over two and a half million dollars per year, even though there had been large accumulations on account of arrears on the preferred stock, whether that common stock should be completely wiped out because Congress had ordered a simplification of the capital structure; and this is what the Supreme Court in its majority opinion said on that point, and with your Honor's permission I would like to read it, because I think it goes right to the heart of the question:

"Satisfaction of the great-grandfather clause might have been obtained in this or other holding company systems by an order for merger, consolidation or recapitalization between top holding companies or between associate companies in the lower tiers of the corporate hierarchy. Such procedure would avoid the liquidation of Power. The selection by the Commission of one method of system adjustment to accomplish simplification rather than another is an incident which ought not to affect rights."

In other words, the Court said there that merely because you are dissolving one company, one holding company, and giving its assets over to another holding company is no reason why you should destroy the rights of a class of stock completely.

Then the Court went on to say at page 632:

"Upon analysis of the Holding Company System's experience and upon an estimate of future earnings, the Com-

mission assumed earnings of $6,185,000 annually which would be applicable to Railways' common and, as a consequence of the distribution, to Power's preferred and common stockholders. Since the annual preferred dividend requirements were $3,600,000, there appeared a balance of $2,585,000 available for the reduction of preferred stock arrearages of $38,700,000 as of December 31, 1942. The Commission noted that if all the assumed earnings materialized and were applied to liquidating the preferred current and deferred dividends, in approximately fifteen years the arrearages would be paid and the common would be in a position to receive dividends. Furthermore, only by forced liquidation could the common stock be deprived of its possibility for future earnings. Only by means of forced liquidation and the receipt of all Railways' common, could Power's preferred gain a right to prospective earnings above its guaranteed dividends."

In other words, we have the situation in the Otis case of the common stock having a very substantial present interest in the earnings of the company, over two and a half million dollars a year; and we also have the position of the preferred stock, if the common stock had been wiped out, receiving all of the common stock of the sub-holding company and being entitled to receive two and a half million dollars of dividends which it otherwise would not be entitled to; and the Supreme Court said it was not necessary in that case that that should be done; that this was not the only method by which this holding company system could have been liquidated or simplified; that a number of other methods could have been chosen without destroying the interest of the common stockholders; and that because there were these other methods available there was no reason why the common stock with earnings of two and a half million dollars a year should be completely wiped out; and,

accordingly, they sustained the SEC in giving to the common stockholders a small interest, a very small interest in the new company amounting to about 5½% of the common stock of the new company.

In support of its argument that it was not the intention of Congress to wipe stockholders' rights and security holders' rights out in the process of simplifying utility holding companies the Court went on to say at page 637:

"The provision"—that is, the indenture provision—"having been adopted in 1929, six years prior to enactment of the Public Utility Holding Company Act, a 'simplification' under this Act, having as an incident to it the dissolution of one company in a holding company system, was not an anticipated 'liquidation' within the meaning of Power's charter provision."

Here we have no such situation at all. We have no elimination of one company in a holding company system. We have a complete liquidation and dissolution of Engineers and no other holding company remains. We have not here a distribution of stocks to the preferred stockholders and the common stockholders as we had in the Otis case. We have here the payment in cash of the amount due to the preferred stockholders, so there can't be any question as to the value of what they are receiving.

"Enforcement of an overriding public policy should not have its effect visited on one class with a corresponding windfall to another class of security holders."

Now, I submit that that provision is applicable here because what in effect is being done here to give a windfall to the preferred stockholders by giving to them the redemption premium amounting to $3,200,000, which otherwise belongs to the common stockholders, and I will go into that a little later on the question of the investment value, so called, of the preferred stock.

"Nor should common stock values be made to depend on whether the Commission, in enforcing compliance with the Act, resorts to dissolution of a particular company in the holding company system, or resorts instead to the devices of merger or consolidation, which would not run afoul of a charter provision formulated years before adoption of the Act in question."

In other words, they say here you don't have to dissolve this top holding company. You could have merged the sub-holding company with the top holding company and left the positions of the common stockholders and preferred stockholders of United Power just as they were before; and merely because the Commission takes the method of dissolving the top holding company instead of merging the top holding company with the subholding company is no reason why you should destroy the values of the common stockholders having an equity of over two and a half million dollars per year in the earnings of the company.

The Court goes on to say:

"The Commission in its enforcement of the policies of the Act should not be hampered in its determination of the proper type of holding company structure by considerations of avoidance of harsh effects on various stock interests . . ."

In other words, the Court said to have done what was urged there by the preferred stockholders would have been a harsh effect upon the common stockholders and wiping out of their interest.

". . . avoidance of harsh effects on various stock interests which might result from enforcement of charter provisions of doubtful applicability to the procedures undertaken."

So that we have here in the Otis case the situation of whether the Commission in its simplification of a top holding company would be justified in ordering the dissolution

of that company and in wiping out in the process an entire class of stock, the common stock that had a very substantial present equity then existing in the earnings of the company; and the Supreme Court said Congress did not intend that, and further on in their opinion they quote from the message of the President of the United States to the Congress in which he said that it was not the intention of the Act to destroy property rights or the rights of security holders; and the Supreme Court said, by a divided court, it is true, that under that situation where there was another method of simplification open that the Commission was justified in giving some recognition to the common stock that had a very substantial equity in the earnings of the company.

Here we have, however, the very converse of that proposition. Here we have the situation of the preferred stock which is not satisfied with receiving everything the charter gives to it, but wants more than the charter gives to it. Because we have a provision here that in the event of a dissolution of this company, an involuntary dissolution of this company, the preferred stock shall receive——

The Court: Let me see if I can get your point. Is it your argument that the charter provision applies?

Mr. Boehm: It is my argument that in this particular case the charter provision applies, yes, your Honor, and upon the facts of this case, which are distinguishable from the facts of the Otis case.

Here in this case we have the situation of the preferred stock which has had offered to it by Engineers $100 per share in cash, not in stock of another holding company or even in stock of subsidiary operating companies where there might be some question as to the value of the stock and where the value of the stock is determined usually by capitalizing earnings either at ten times or twelve times or fifteen times, and there might be a serious question as to what rate of

capitalization should be employed in evaluating such stock. Here the preferred stock has been offered cash of $100 per share, which is all that upon an involuntary dissolution of the company they are entitled to; and the preferred stockholders come forward and they say, "No, that is not enough. We think the investment value of our stock is more than $100 per share and we want to get everything that we can possibly get in the event that the company had called the stock, voluntarily called the stock, which would be $105 and $110 per share," as I said before.

Now, we say that that position is inequitable, and just as the position of the preferred stock in the case of United Light & Power was harsh to the common stock, therefore we say now here—in that they wanted to wipe out the common stock completely—we say now here that the position of the preferred stock is harsh and inequitable to the common stock, because they want to give something that the Supreme Court said no class of stockholder should receive by reason of the simplification of these companies or dissolution of these companies, and that is a premium which they otherwise would not be entitled to.

The Court: Recess for ten minutes.

(At this point a brief recess was taken.)

Mr. Boehm: Before I come to the question of this investment value of the preferred stock I would like to touch for just a moment on the question as to whether the liquidation of Engineers was voluntary or involuntary. The Commission in its Opinion and Findings said at page 18:

"We find that the presence of Engineers would unduly complicate the structure of the system and that it would, therefore, come within the prohibition of Section 11(b)(2).

Accordingly we find that the proposal to dissolve Engineers is 'necessary' to effectuate the provisions of Section 11(b) of the Act." That is the majority opinion.

Then Commissioner Caffrey in a separate opinion which he subsequently wrote said "However, that is not, in my view, enough to make a case for voluntary liquidation. Our orders under Section 11 (b) (1) do not preclude a careful investigation of the surviving holding company system under Section 11 (b) (2) to determine what action might be necessary (including dissolution of the top company) in order to simplify the system and distribute its voting power equitably. I think that Engineers would have been subject to such a proceeding had it not come forth with a voluntary plan. Engineers' 'voluntary' proposal did no more than forestall the necessity for action by the Commission.

"Further, Engineers' decision to liquidate came as a logical step following the necessity to comply with our Section 11 (b) (1) orders. It is the operation of Section 11 and not mere managerial discretion that has brought about the liquidation.

"Under these circumstances, I do not believe that the liquidation can properly be termed voluntary."

Now, that brings us to the question as to what is the so-called investment value of the company. In connection with that I might state that for a number of years, I think three or four years, the dividend payable on the preferred stock was in default. In other words, no dividends whatever were paid on the preferred stock for a period of years. The preferred stock was originally issued in 1928, I think, or thereabouts, and was sold to the public at par or less. The $5.50 and $6 preferred stocks were sold—the $5 preferred stock was sold at $100 per share; the $5.50 preferred stock was sold at $99.50 per share; and the $6 preferred stock was sold at $100 per share.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Boehm

Now, in order to get the public to buy these stocks even with a five and five-and-a-half dollar dividend attached, it was necessary, or the company and the bankers apparently thought it was necessary, to sweeten this preferred stock by giving warrants for conversion of the preferred stock into common stock at a time when the conversion price had an actual value; so that we may assume that without those warrants the preferred stock could not have been sold to the public at $100 and at $99.50 per share. So that the investment value of those stocks at the time that they were issued was less than par, and it was only by the device of granting a conversion privilege, which has long since expired, that the public was induced to buy these stocks.

Now, I just want to read a short abstract from a footnote of the brief which was submitted by Engineers to the SEC on the question of the prices of these stocks. At page 16 in the footnote Engineers says:

"Until the year 1944 none of the shares of preferred stock have ever sold in the market above $100 except with respect to the $5.50 stock at intervals for a period of about 13 or 14 months in the years 1929, 1930, and 1931, when due to some action induced by warrants above-referred to the $5.50 stock sold above $100, and in respect of the $5 stock for a period of a few months in 1929 and 1930 it sold above 100 induced by a conversion privilege above referred to."

In other words, because of this conversion privilege that was granted to this stock, this stock for a short period of time sold at par or above.

I am still reading:

"Furthermore, for most of the period since its issue the preferred stock has not only sold above 100, but for very considerable period much below 100. In fact, for example, during the years 1933 and 1934 all the series of preferred stocks sold in the market from around ten or fifteen dollars per share to thirty dollars per share."

Just imagine. Sold between ten and fifteen percent of the par value up to thirty percent of the par value, a stock which they now say has an investment value of more than $110 per share.

"As late as 1942 all three series sold in the forties. The record also shows that the average market price per share on the New York Stock Exchange of the three series of preferred stocks from the date of their issuance to October 31, 1945"—that is less than a year and a half ago—"was as follows: For the $5 stock $67.16 was the average price; for the $5.50 stock $64.52, and for the $6 stock $62.77."

Now, that is the average price of those stocks from the time of the issuance down to less than a year and a half ago, and they say that the investment value of that preferred stock is over $110 per share. How do they arrive at that theory that it is worth over $110 per share? The preferred stockholders put a man named Badger on the witness stand who stated he was an expert on the value of securities, and he took certain other stocks which were selling—this was I think in the spring of 1946 that this testimony was taken——

Mr. Zazove: January 1946.

Mr. Boehm: In the winter or spring of 1946 when, as your Honor may recall, the stock market was at its peak, the very peak of the present stock market, which was in the spring of 1946; and, subsequently, as your Honor may possibly recall, it went down, and in September and October of 1946 we had a very decided crack in the stock market. Stocks which were selling in the spring of 1946 at $100 per share, many of them are selling now at no more than half of what they were selling at at that time. And the only reason that this preferred stock is selling above par today is because this plan now provides, as found by the SEC, that they shall be paid their redemption premium.

Had it not been for that I am quite sure that this stock would not be selling above par today.

This man Badger went on the witness stand and he said that comparing this stock with certain other stocks that he named which were then selling at certain prices at the peak of the market, he concluded in his opinion, and it is purely a matter of opinion, that the investment value of this stock was over $110 per share. I think he went up as high as $119 for some stock and even higher—$129 or $130 for some other stock, and he had the temerity to testify that those would be the prices of the stock and investment value of the stock as far as human foresight could see.

The Court: Well, it wasn't as easy as that. According to page 30 of the Commission's Findings he indulged in the traditional methods of appraising the value of the securities.

Mr. Boehm: That is correct. It may be that at that time if that stock possibly could have sold in the market at that moment when he was testifying that those prices might have been realized or might not; I don't know. It depends on the quantity of the stock that is offered. You may have a few hundred shares or even a few thousand shares of stock selling at a certain price; but when it comes to selling about $39,000,000 worth of stock all at one time, you may not be able to get the prices at which a few hundred or a few thousand shares would sell for in the market. That is quite a different question.

But, at any rate, we know that prices fluctuate. Stock prices fluctuate. They never stand still. They either go up or they go down, and they usually go down much faster than they go up. We all know that. Whoever owned a share of stock in the market knows that.

Now, what was the reason that this stock and the other stock with which he compared it had gone to those prices? Here was this stock that over a period of sixteen or seven-

teen years was selling anywhere from an average of $62 to $67 per share. What was the reason that it suddenly jumped up and other stocks like it to $180 per share? Well, we happened to have a war. We happened to have a war boom. It happened that this company serviced a war boom area. Portsmouth, Virginia, is probably the greatest shipping center of the country, and during the war was serviced by this company. Other war boom areas were serviced by this company. Its earnings during that period were tremendous—of course, phenomenal—but those are not permanent earnings. When the war stopped the shipbuilding activity in Portsmouth dwindled. Today I am told there is very little shipbuilding going on in that area. The war boom is over. Earnings have come more or less back to a normal and will continue in the future to more back to normal than they have in the past, and you can't predict the investment value of the stock on the earnings of one or two years. We have to take a long period of years—ten years at least, I say, to find out what the investment value of the stock really is, what a certain stock will do under good times, under bad times, and under normal times, and you can't just pick up the peak of the war boom and say these earnings are going to continue as long as we can foresee, and therefore the investment value of this stock is so much.

The Court: Before we proceed further I want to read you a sentence from page 31 of the Commission's Findings:

"No additional expert testimony on value was introduced into the record and no serious challenge was made in the proceedings to Badger's conclusion that the fair investment value of the preferred on a going concern basis is in excess of the call price."

At that point did you introduce testimony contra Badger?

Mr. Boehm: I am very glad that your Honor raised the point, because it is something that I had intended to touch upon. The plan of the company provided for $100 per share to the preferred stock. There was no need for common stockholders to appear before the Commission, because Engineers was fighting, so to speak, the fight of the common stockholders. Their plan provided for $100 per share. For common stockholders to have appeared before the Commission under those circumstances would have been a duplication, it seems to me, of the work that the Engineers Company and its counsel were doing before the Commission. There would have been no excuse for common stockholders to appear and urge the same position that the company was already urging, and I am sure that the SEC would have said that that is an unnecessary duplication. The common stockholders therefore had a right to assume that the company was properly presenting its side of the case and that it was doing everything in its power to have the Commission adopt the plan as written by the company.

I don't wish to criticise the company. That is not my purpose. But we had a right to assume that the company would present proof as to the investment value of the stock, and that it was not the amounts that Mr. Badger had testified to. I understand that Mr. Barnes, the president of the company, who may be a very good utility operating man, but who I don't believe qualified before the Commission, and perhaps does not claim to be an expert on security values, he sort of assented to the theory or idea that the investment value of this stock was over $100 per share and was more than the call price of the stock. I think in that assent he was totally in error. I don't think that he is sufficiently qualified to be an expert on that subject, and the common stockholders therefore were left without any

testimony to controvert the testimony of Badger. Therefore I say that inasmuch as the common stockholders were not represented before the Commission, and the company is now assenting to the order of the Commission, that the common stockholders have not had their day in court before the Commission, and that this case should be returned to the Commission with the order that it receive the testimony in behalf of the common stockholders as to the real and true investment value of the stock; and if your Honor will do that we will be prepared to present expert testimony to the Commission as to what the actual investment value of this stock is over a period of years, not in a boom time, not in one or two years, but over a period of years; and in that connection I might say to your Honor that until 1944 for a period of about 15 years or 14 years this preferred stock had not sold at par—had sold at great discounts from par for a period of 14 or 15 years, and it was not until the war brought on this phenomenal business and this phenomenal rise in the stock market that we have had since 1942 that these preferred stocks have reached par. I say that a company whose stock for a period of 14 or 15 years sells at very substantial discounts from par, and the market place is a very good test of what values are, because you have hard-headed businessmen who are paying their own money for securities and determining what they are worth—I say that when in the market place that stock was not worth par and did not sell for par over a period of 14 or 15 years, that it requires a high degree of temerity to have a so-called expert come in and say to the Commission that this stock is worth $119 a share or $129 a share or anything like that.

We are practically willing and we are prepared, if your Honor will give us the opportunity, to present testimony to the Commission of what the real investment value of

this stock is. As I have said before, that value is not based upon the prices of one or two years that these or other stocks have been selling for, but upon the average prices over a period of years that the market place has been actually willing to pay for this stock. In this particular case it happens to be for a period of about 15 years, and it does not require a great expert in security values to understand that the opinion evidence—that is all it is, because Mr. Badger's testimony was merely opinion evidence—that the opinion evidence of the so-called expert hired by one class of security holders to give the highest possible value that he can to certain securities has little value in the face of the actual facts in this case; and I think that even a man who is not an expert can readily see that stock which has an average market price of between $62 and $64 a share over a period of years is not worth $129 per share; and that when its value has gone up because we had a tremendous war boom and a big stock market boom in the last year or two before this testimony was given, that that does not fix the investment value of the stock.

I submit that if these preferred stockholders are given the amount of $3,200,000 which this redemption premium amounts to, that they will be given a windfall at the expense of the common stockholders, and that is the very thing that the Supreme Court said should not result from these simplification or dissolution proceedings.

The Court: I have your point.

Mr. Boehm: We have a very rough draft of a brief. May I have the privilege——

The Court: We will take up the matter of briefs at the end of the argument.

Mr. Boehm: Very well.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd).

Berman

Mr. Berman: May it please the Court, my associate Mr. Rossbach and myself appear here on behalf of Central-Illinois Securities Corporation and Christian A. Johnson, the owners of 5,000 shares and 1,000 shares, respectively, of Engineers Public Service common stock.

Central-Illinois Securities Corporation is a publicly-owned investment trust incorporated under the laws of Delaware and having more than 2,000 security holders residing in all parts of the United States.

The Court: Was your client a party before the Commission?

Mr. Berman: My client did not appear during the course of the proceedings before the Commission, Judge Leahy, for the reason stated by Mr. Boehm that the position that we espouse here was at that time espoused by the company; but our client did notify the Commission when the Commission issued the notice of the filing of the amended plan, which provided for the payment of the premium, and the Commission asked those who wished to be heard in objections to notify it, our clients addressed a letter to the Commission stating that they opposed the amended plan on the ground that the proposed payment of premiums was unfair to the common stockholders and stated their objections with some particularity. You will find a reference to their objections in the Commission's Supplemental Findings.

Our objections here are directed to two aspects of the plan: One, the proposal to pay the preferred stockholders the premium which we contend renders the plan unfair and inequitable to the common stockholders; and, secondly, the omission from the plan of the mechanics for the establishment of an escrow fund into which such bonus payments could be placed pending final judicial review. We contend the omission of such machinery, unless remedied in the court, as apparently it may be, would render the plan not appropriate to effectuate Section 11(b) for the reason that

it would prevent the going forward of the remaining and non-controversial aspects of the plan, and therefore would not be appropriate.

So that your Honor will understand at the outset what our position is on the merits, I will say first we believe the charter provisions here are applicable, that this is not a voluntary liquidation or reduction of capital, and that under the charter provision, therefore, the prefefred stockholders by contract have agreed to accept $100 per share plus accrued dividends. We say further that even if the charter provision were not present and the charter were silent that the same result would be reached on the basis of applicable Commission decisions as to the meaning of fairness and equity in this type of situation, also on the basis of the judicial decisions as to the applicable legal principles appropriate to situations involving frustration of corporate enterprises and specifically held applicable to a liquidation of this type under Section 11 by many Federal courts, including this one, on a number of occasions; and not less than four Circuit Courts of Appeals, four different Circuit Courts of Appeals.

Thirdly, we go on to contend that quite apart from the charter provisions, the Commission decisions as to what fairness and equity means, and court decisions as to the appropriate legal principles, but as a matter of fairness and equity and justice applied to the facts of this particular case the preferred stockholders are not entitled to this bonus or premium aggregating some $3,200,000, and that to pay it to them would be contrary to the expressed intent of Congress in passing this very statute.

I think from what Mr. Slater said——

The Court: You don't go so far as to contend in connection with the Congressional intent to which you just made reference that there can never be a situation where the preferred should receive its call price?

Berman

Mr. Berman: Oh, I am not prepared to make that statement quite as broad as that, your Honor.

The Court: In other words, it depends upon the particular facts of each case, because in one instance you might have a preferred which in fairness and equity should receive it, and in another instance it should not.

Mr. Berman: I must concede that possibility, although I am frank to say I don't know what the circumstances would be. But given a proper factual setup, that result might arise as a result of fairness and equity.

The Court: I want to be clear that you did not mean that it was the Congressional intent that the preferred would never get its premium.

Mr. Berman: Oh, no. Maybe the charter would provide for it to have a premium on a specific situation, or there might be other factual circumstances; but I say under the circumstances of this case it would violate the intent of Congress if a premium were paid.

As I understand the position of the Commission when Mr. Slater addressed the Court and also based on the Commission's Opinion, I think it is clear that at least three of the four Commissioners concede that this plan is not a voluntary plan in the sense that the word "voluntary" appears in the charter provision in question, and I assume that the Commissioners would concede that it is, in fact, involuntary if the charter language could be held to have its normal import. But, as I understand it, the Commission said, however, that this charter is not to be considered as meaning what it seems to say, because they could not have had in mind the proceedings under the Holding Company Act, and the Commission did not discuss that at all. It said the Otis case so held. Therefore before spending too much additional time on the charter provisions I think we ought to turn to the Otis case to see if the Commission is correct

in its reliance on that decision for its contention that the charter provisions are not applicable here.

At the outset we point out three vital factual distinctions which exist between the plan that was before this Court, the Circuit Court, and finally the Supreme Court in the Otis case, and the plan which is at bar. One is a difference as to the wording of the charter provision itself. In this case the language of the charter provision is much broader that the language with which the Court was dealing there. That language merely provided that in the event of voluntary or involuntary liquidation, preferred stockholders should receive such and such an amount. But here we have a provision which says in the event of liquidation, dissolution, or winding up or any reduction of capital accompanied by a distribution of assets, the preferred stockholders should receive $100 unless these acts be voluntary, and then they get specified premiums. So that this language covers a much broader series of acts, and the word "involuntary" as such is not used here at all. The matter is first put broadly as a blanket provision. Any liquidation, dissolution, winding up, or reduction of capital, $100 a share; unless if they be voluntary, premiums. Clearly under that language the burden is on him who asserts that the act is voluntary to prove that it is. The burden is not on us to prove that the act is not voluntary, although we would have no difficulty in acquitting ourselves of such a burden.

Secondly, we say that provision also has to be construed under the applicable principles of Delaware law to the effect that preferences being in derogation of the common law must be construed strictly against the preference. We cite cases in our brief on that point. I will return to the charter provision shortly. At this time I merely point out that the language here is much broader and that we are not dealing with a single word "involuntary" which the Court

in effect held there was used as a term of art to apply to actions of creditors. The word "involuntary" as such does not appear here. Instead we have this broad blanket provision.

Secondly, we wish to point out in the United Light & Power Company plan dissolution of the system was not taking place. We were dealing there merely with the dissolution of what this Court termed in its Opinion "the apex company of a multi-tiered holding company system." Here we are dealing with the liquidation of the only holding company in the holding company system and with the simultaneous dissolution of the system itself. Here you dissolve the one holding company and the system necessarily falls apart. So that we have here what we didn't have in the United Light case, a liquidation of the system as well as of a particular holding company.

Some years ago when the Commission was first getting into these problems of fairness and equity under dissolutions and recapitalizations it had occasion to stress the importance of the fact that you had a certain rule applied when liquidation was in the air and certain other rules were applicable when liquidation was not in the air. The Commission started out, and I refer now to its Federal Water Service Corporation decision, 8 SEC 893, and it said, "We must, as Mr. Justice Holmes warned, think things, not words. It will not do to argue that a reorganization is a reorganization no matter why begun or under what circumstances."

Now, our contention, your Honor, is that the effect of the Commission's decision here is that the Commission was thinking words and not things. The Commission said that in the Otis decision, the Supreme Court said, "liquidation preferences are not matured. Charter provisions providing liquidation are not applicable to holding company

situations. Therefore we do not have to consider this charter provision." But the Commission did not go so far as to analyze the Otis decision and find out in what context the Supreme Court was saying these things and in what limited way, and pointed at what.

In the same Federal Water Service decision the Commission had occasion to say in the same context, "An appropriate Commission order under Section 11(b) might require liquidation. In such cases a Section 11(e) plan would be a substitute for liquidation, and the words 'fair and equitable' on such facts would yield the same result as if the company were the debtor in a bankruptcy reorganization proceeding. But there are many cases, and this case is one"—that is the Federal case—"where the appropriate order under Section 11(b) would not be to liquidate, but without liquidation would require simplification of the corporate structure."

Then it went on: "To ignore the significant absence of a liquidation atmosphere when construing these words meaning 'fair and equitable' is to do violence to their own history. We are convinced that absent liquidation there is an important difference in the context and legal rights to be recognized, and that that difference and right requires a difference in the legal or the equitable consequences."

Now, it is against that background and that language, to which you will find no reference unfortunately in the Engineers' Findings or Supplemental Findings, that we approach the factual situation here. Your Honor had before him the United Light & Power case before it went to the Supreme Court and before it went to the Circuit Court, and your Honor considered the facts very carefully, and I think your understanding of the facts is very important, if I may take the liberty of referring to them at this time, because they were substantially the same understanding

which the Supreme Court had when the case came before it. Your Honor said:

"A consideration of the basic facts before the Commission supports its special finding of what is fair and equitable under all the circumstances. True, the preferred has a charter claim of $164.50 per share in cash upon dissolution, as the term is ordinarily understood when total corporate assets are either sold privately or on the block and liquidation, in the sense that total corporate purpose ceases, takes place. But the Commission has caught the nuance in the present situation. There is no real finality to this particular situation. There is no real finality to this particular dissolution. Power's shareholders simply transform themselves into holders of common stock of Railways and thus obey the demands of Congress. Power as the head of a holding company system is now declassé by congressional mandate; the interests of all classes of stock are nevertheless still lodged in a continuing enterprise.

* * * * *

"It is neither an exercise in semantics nor a rejection of labels to consider the present plan little more than a reclassification."

Then you went on to say what would happen if it were an actual reclassification how the preferred rights could be interfered with, stripped away, their accrued right to dividends destroyed, and so forth.

We say, your Honor, that in the case before you the Commission has failed to catch the nuance, because what is before us now is a real liquidation, is a dissolution of the enterprise, is a termination of the enterprise in the sense that real corporate purpose ceases. If this is not a liquidation we cannot conceive what a liquidation is. When a charter of a holding company says that this is what happens, in the event of liquidation of the holding company,

can it be taken to be any less complete than a liquidation which means dissolution of the holding company and distribution or sale of every asset in the holding company portfolio? Does it require in order to be a dissolution of a holding company that every dynamo of every operating company be placed separately on the block and sold? Is that what is meant by the dissolution of a holding company or holding company system? Clearly not. It means dissolution of the holding company enterprise in such a way that the system falls apart and ceases to be a holding company system. That was not taking place in the United Light & Power plan, as your Honor pointed out. There you were merely peeling off the top layer of a multi-tiered structure, and the security holders were merely stepping down one step, and the enterprise and the system continued, because there were other holding companies to hold it together, and that it what the Supreme Court meant when it used the terms "in a simplification under the Holding Company Act such as is here present"—and we will revert to the actual language—"liquidation preferences are not matured, were not intended by Congress to be matured." Liquidation preferences were intended not to be matured in that situation, because the Supreme Court and this Court and the Circuit Court and the Commission found that in that case liquidation was not taking place. The system was not being dissolved. There was a pseudo liquidation, a technical liquidation of the top company, but the whole enterprise continued and the interest of the shareholders continued. They merely stepped down one step. That is not what is happening here. Nor can it be said that in this situation merely because the common stockholders are going to receive in that dissolution all of the common stocks of three operating companies that the enterprise is continuing. First of all, we hasten to point out that a holding company sys-

tem is more than simply the common stocks of the individual operating companies which underlie it.

The Supreme Court recently had occasion to hammer at that very point in the North American case, and I think its language there is worthy of attention.

The Court: Let us recess for lunch at this time. Recess until two-fifteen.

(At this point recess was taken until 2:15 o'clock p. m., the same day.)

Two-fifteen o'clock p. m.
The same day.

Present:

As before noted.

Mr. Berman: May I proceed, your Honor?

The Court: Yes.

Mr. Berman: I was pointing out prior to the recess, your Honor, that a genuine liquidation is taking place here, even though the securities of the three remaining underlying companies will be distributed to the common stockholders, because a holding company is something more than the sum total of the securities which it holds.

In the North American decision decided by the Supreme Court last term at 327 U. S. 686, North American had argued that it was not subject to the commerce clause of Congress because, it said, "We are merely a corporate holder of securities; we are not even in the stream of commerce"; and, of course, in their case, as I understand it, they did not even have a service company like Engineers does have; and the Supreme Court said:

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Berman

"North American is more than a mere investor in its subsidiaries. * * * (p. 694)

* * * * *

"This argument, however, misconceives not only the power of Congress over interstate commerce, but also the basic nature of public utility holding companies and the effect that stock ownership has upon their activities. The dominant characteristic of a holding company is the ownership of securities by which it is possible to control or substantially to influence the policy and management of one or more operating companies in a particular field of enterprise. To be sure, other devices may be utilized to effectuate control, such as voting trusts, interlocking directors and officers, the control of proxies, management contracts and the like. But the concentrated ownership of voting securities is the prime method of achieving control, constituting a more fundamental part of holding companies than of other devices of business. Public utility holding companies are thereby able to build their gas and electric utility system, often gerrymandered in such way as to bear no relation to economy of operation or to effective regulation. The control arising from this ownership of securities also allows such holding companies to exact unreasonable fees, commissions and other charges from their subsidiaries, to make undue profits from the handling of the issue, sell and exchange of securities for their subsidiaries, to issue unsound securities of their own based upon the inflated value of the subsidiaries and to effect adversely the accounting practices and the rate and dividend policies of the subsidiaries (end of quote)."

The Court went on to point out that Congress had a right to find that those were unwholesome practices from a public point of view and from a social point of view, but what we are here saying is that for many holding companies

that concentrated control represented influence of great importance, because when you dissolve the holding company, even if you distribute out to the security holders everything that the holding company ever had, they still would not have this system. They would then be merely individual stockholders in operating companies in which none of them as individuals would have control of the operating companies. They could not influence the dividend policies of the operating companies; they could not force them into service contracts; they could not even insist that they be well managed, because here you are going to have these stocks scattered among ten thousand or so individual stockholders, although theoretically in the aggregate they still have control; but as a practical matter they have none, and there is no system.

Judge Healy passed on this same point, or I should say Commissioner Healy, in his dissenting opinion in United Light and American Light & Traction case. There too the argument was made by preferred stockholders that in view of the fact that the liquidation of American Light & Traction Company would result in the distribution of some securities to the common stockholders that there was not a genuine liquidation; and Commissioner Healy in his dissenting opinion stated:

"I think the liquidation of American Light is a genuine liquidation. American Light has already sold substantial stock holdings in several companies for cash pursuant to requirements of the Act. American Light proposes to go out of existence. After paying off its preferred in cash its assets are to be distributed in kind to its common stockholders. The largest of these, Railways, (the only other holding company in the picture) is under an order and commitment to dispose immediately of what it thus receives. This is not a case as in the dissolution of The United Light and Power Company where Power ceased to be the top

holding company and its immediate subsidiary, Railways, continued in existence and through dissolution of Power became the top holding company of a system which was almost precisely the same as it had been Power's dissolution. In the Power dissolution the enterprise continued. In the present dissolution the enterpise ends. What is the enterprise heretofore conducted under the name American Light & Traction Company? It is that of a holding company. This includes more than merely owning securities, as the recent Supreme Court decision in the North American case so clearly pointed out. That enterpise ends and no other holding company takes its place. It is true that the stocks left in American Light's portfolio after selling so much as is needed to pay off the preferred will be distributed to American Light's common stockholders. It is true the operating companies in which American Light holds shares will continue to operate, but the enterprise being liquidated is a holding and not an operating company and it is no less a liquidation because certain of its holdings will be distributed to its stockholders rather than sold in the market and the cash avails distributed. One method of liquidation is quite as complete and real as the other and quite as effective in bringing the enterprise to an end. Besides, a considerable portion of the cash to be paid the preferred has already been obtained through the sale of assets as ordered by this Commission, . . ."

Now, in the Engineers case we have all the factors to which Judge Healy adverted in the language I have just quoted, and we have more, because here the holding company system initially consisted of some eight large operating companies and probably a half dozen additional statutory nonutilities, but companies which represented earning power and value. All of those have now been disposed of except these three which remain, and it is the cash realized on the

sale of those other assets which is to be used in part, at least, in paying off the preferred; and even the three which now remain cannot remain, because the company is under 11(b)(1) compulsion to sell all but the Virginia, so that at least two others must go out. Now, in effect, the common stockholders are buying one of these three companies, Gulf States. They are going to put up $22,000,000 through the warrants technique to purchase the stock of Gulf States just as though the management offered it on the block. And the other two companies could of course be sold and the cash used to pay off the preferred, but that would involve perhaps useless underwriting fees, and therefore they are being distributed out directly to the common stockholders, some of whom may sell their shares and others may retain them; but the mere fact that they are receiving the shares of these two remaining companies out of what was once a large holding company system certainly does not make this not a liquidation.

In the United Power & Light case which has come before this Court and the other Courts, we had the situation to which I referred before recess, that there we were liquidating merely the top holding company and the system as such would continue. That was what your Honor referred to as the nuance in that particular situation. In this situation the nuance is that this enterprise is not continuing.

Mr. Boehm read extensively from the Supreme Court's Opinion in the Otis case. I won't take the time to do it again, although I would like to stress somewhat different language. I have set it forth at pages 48 and 49 of our brief. But I do think that the nub of what the Supreme Court found there as it relates to the Engineers case is this:

The Commission referred to the Otis case and said the Supreme Court held in the Otis case that liquidation preferences are not applicable to a situation, a Section 11 pro-

ceeding under the Holding Company Act, and therefore we do not have to apply the liquidation preferences in the Engineers' situation. But here is what the Court actually said after a continued discussion in which it stressed time and again "We are dealing here with a mere simplification of a holding company system. We are dealing here merely with the elimination of a company in a holding company system. The enterprise continues. This is, in effect, a reclassification. The enterprise continues." And then it went on to say, referring to the charter provision:

"We think, however, that the charter preference is inoperative in simplification under Section 11(b)(2). The provision having been adopted in 1929, six years prior to enactment of the Public Utility Holding Company Act, a 'simplification' under this Act, having as an incident to it the dissolution of one company in a holding company system, was not an anticipated 'liquidation' within the meaning of Power's charter provision."

I agree with that language just as your Honor agreed with it and the Circuit Court did. That was technically a liquidation, but it was not the kind of liquidation that stockholders have in mind when they refer to the liquidation of the company and the rights that usually accrue to the stockholders at the time. It was merely a peeling off of a layer. It is true that stockholders could not have had in mind that type of thing when they drew the charter; but what we are now confronted with in this case is the liquidation of the enterprise, precisely the type of thing that stockholders have in mind when they talk about liquidation, because, as I pointed out earlier, it is inconceivable that there could be a more complete type of liquidation than the one taking place. How do you liquidate a holding company more thoroughly than to dissolve the holding company, sell off enough assets to get the money to retire the senior pre-

ferreds, and then sell the balance of the assets or distribute them pro rata to the stockholders? There is no other way. You don't take the machinery of the operating companies, and put it on the block. A holding company is the operating companies plus the service company plus the concentrated control that permits dominance of the operating companies. Those things all go.

I will not dwell further on that. I say in the Commission's Findings and Supplemental Findings we find no discussion of that, but merely a reference to the Otis decision, and that is why I said earlier that the Commission's findings were thinking words and not things, because it did not get the picture before it.

Now, allied to the point we have just been discussing that a real liquidation is taking place is the fact that here the security holders and preferred stockholders are being paid off in cash instead of being given securities of the underlying company as occurred in the United Light & Power case. Now, that distinction is very important, because the Commission having found that the Otis case interdicted the reliance upon the charter provision, then went on to say, "How do we determine the rights of the stockholders if the charter provision does not apply?" They said, quoting the Otis decision, which in turn quoted the Chicago Milwaukee reorganization decision in the Supreme Court:

"It is settled that in a Section 11 reorganization a security holder must receive, in the order of his priority * * * the equitable equivalent of the rights surrendered."

Then it went off to determine the equitable equivalent of the rights being surrendered by the preferred. But the basic fallacy is that the language I have just read has reference only to a situation where a reorganization is occurring, not a liquidation. The stockholders in United

Light & Power and in the Milwaukee cases the senior security holders were being forced to take securities in a reorganized company, and the Court said, "Under those circumstances, since we are not giving them cash, we have to try to equate, measure the rights of what they are giving up, compare it with what they are getting." That is made perfectly plain by reference to the Otis decision where this equitable equivalent of rights doctrine comes in, comes in near the end of the majority opinion, where it is clear the Court is talking there merely about the allocation as between the preferred stockholders and the common stockholders; and the Court says:

"As indicated earlier in this opinion, we have not undertaken to review the facts to determine whether the allocation of stock between the preferred and common is in proper proportion. That issue is not made. It was vigorously discussed by Commissioner Healy in the dissenting opinion. * * * The allocation properly may be made without dollar valuation so long as 'each security holder in the order of his priority receives from that which is available for the satisfaction of his claim the equitable equivalent of the rights surrendered'."

Then it cites three cases, the Milwaukee case, Group of Investors *v.* Chicago, Milwaukee, St. Paul, et cetera, the Consolidated Rock Products case, and the Ecker *v.* Western Pacific, and a fourth case, Kansas City Terminal Company. They are railroad reorganizations.

Now, the significant thing about it is that the railroad reorganizations come up under Section 77 of the Bankruptcy Act, and the Consolidated Rock Products case came up under Section 77B, the predecessor of Chapter X of the Bankruptcy Act, and both of those statutes expressly provide that where payment is made in cash to senior security holders, those security holders are not concerned with the

reorganization. They don't even have a vote in the reorganization. They are paid out, and therefore when you find a discussion in these decisions of the rights of senior security holders, it is talking about senior security holders who cannot receive cash, who are not being paid out, but who are being forced to take new securities which the Court says must then be measured to see whether they are the equitable equivalent of the rights being surrendered in the old securities.

Now, any doubt about that is removed by a reference to the Milwaukee decision where this equitable rights doctrine was evolved in its fullest flower, where the Court says:

"A requirement that dollar values be placed on what each security holder surrenders and on what he receives would create an illusion of certainty where none exists and would place an impracticable burden on the whole reorganization process. * * * It is sufficient that each security holder in the order of his priority receives from that which is available for the satisfaction of his claim the equitable equivalent of the rights surrendered. That requires a comparison of the new securities allotted to him with the old securities which he exchanges to determine whether the new are the equitable equivalent of the old."

What could be clearer than the fact that that language of equitable equivalent of rights is applicable solely and specifically to reorganizations where the senior securities cannot be given cash, but are being given new securities? We say that the Commission, therefore, misapplied that doctrine to the situation such as we have here where the security holders are being paid off in cash according to the charter rights.

Now, lest there be any question about it, let us bear in mind that the Supreme Court in the Otis case never for a minute suggested, either the majority or the minority, that

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Berman

the charter rights are not applicable if intended to cover the situation. The majority said:

"There is an argument that if the charter provision applies to this situation, it cannot be disregarded and that in such a liquidation 'fair and equitable' would require the distribution of assets only to the preferred. We do not reach that position. The point at issue is whether this charter provision applies."

The minority, however, went on to reach the question, and they said:

"We cannot assent to the proposition advanced by the Commission that even though the priority stipulation was intended to be applicable to any kind of an involuntary liquidation, including one such as the present, the Commission can nevertheless override it. Such provisions for priority in a corporate charter constitute a contract among the stockholders which is entitled to constitutional protection, 194-6 impairment of which is not lightly to be attributed to Congress. No constitutional issue is raised here."

The Court went on to say, "But it is clear to us that there would be a very grave constitutional problem."

So that neither the majority nor the minority were saying in the Otis case that if the charter provision was intended to apply to the situation then before the Court that it would not be controlling. They went on to say, the majority at any rate, that it was not intended to apply to that type of a system simplification that was involved in the United Light plan, the peeling off of merely one layer; but had it been a liquidation in the real sense of liquidation, the type of liquidation that your Honor spoke of when the case was before him in his Opinion, then the Supreme Court majority certainly did not intend to say and the Commission is in error in thinking that it intended to say, if that is its view, that those charter rights would nevertheless not be con-

trolling; and, as the Chief Justice said in his dissent, should the Commission undertake to apply Section 11(e) in such a way as to vitiate charter rights which were intended to apply, a very serious constitutional problem is raised, and, of course, we raise it here.

Now, it is against that context and that background of non-liquidation that we come to this expression which is to be found in so many opinions of the Commission since the Otis case: that liquidation rights are not matured in reorganizations or liquidations under the Holding Company Act. That is not what the Otis decision stands for. The Otis decision stands for the proposition that liquidation rights are not matured where there is no liquidation but merely simplification or a reclassification, but where there is a genuine liquidation, where liquidation is in the atmosphere, as the Commission said in the Federal case, then we have the type of liquidation envisaged by the charter provisions of this company and so many others. We must not lose sight of the fact that what was at stake in the United Light & Power, in the Otis case, was the fact that preferred stockholders were claiming that the liquidation of the top holding company there accelerated the right of the preferred stockholders to determine their liquidating preferences, and the Supreme Court was saying, "Oh, no, this is not the type of situation which was intended to give you the right to accelerate that way"; but that is a very different thing from saying that if in that case, even, the preferred stockholders had been tendered their liquidating claims in cash—that is, $162.50 in cash, that they would have had the right to reject it and demand a premium. There is not the slightest basis for such a contention based on that case; and to apply that language wrenched out of its context to this situation to say that the preferred stockholders who are tendered their liquidating rights have the

right to reject it and insist on a premium for going value, for present investment value, so called, well, that doctrine at least finds no support in the Otis decision if it finds any anywhere else.

While we are on the Otis decision I think we should take a moment to point out to your Honor that if the Otis decision were applicable, if the Otis doctrine or rationale were applicable to this situation, that instead of the preferred stockholders being entitled to demand their liquidating claims in cash and getting them as they are here, were you to apply the United Light & Power formula, the preferred stockholders would emerge with much less than $100 in present cash value. We have worked that out and pointed it out in our brief on page 55, where we show that if you use the United Light & Power formula, that is, you measure the right of the preferred as represented by their claim to dividends against the residual earnings remaining for the common stock, and if we make all sorts of liberal assumptions here as to earning power and everything else, that actually the preferred stockholders on such basis would get common stock in this liquidation which would have a present market value of not more than $70.

Then we go on to show if we took the $17,000,000 of cash in the treasury and made an immediate pro rata distribution to the stockholders, that would only bring them up to about $83. So that it should not be thought by our argument here that the United Light doctrine is not applicable that we would not stand to gain if it were. We would gain financially, and the preferred, which has apparently been hammering at the Otis decision is applicable, if we apply that doctrine would emerge considerably worse than they will when it is determined that the doctrine is inapplicable. But honesty and consistency requires us to take the position that we do: that this is the type of liquidation which the United Light & Power plan was not; that this is

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Berman

a genuine liquidation to which your Honor referred and to which the other Courts referred, which does mature liquidating claims of preferred stockholders.

If the Otis decision does not stand for the proposition that liquidating claims are inapplicable here, we return again to the language of the charter and we point out once more that this charter provision is phrased in such a way as to make it plain that in any type of liquidation, dissolution, winding up, or capital reduction the preferreds get $100 a share plus accrued dividends, unless same be voluntary; and we say that that requires a showing on the part of those who contend for the benefit of the exception to prove that the exception exists; and, of course, I don't think we need lose much time here to argue that this is not a voluntary liquidation, because, first of all, we have a formal finding by the Commission that the dissolution of Engineers is necessary, is compelled by Section 11(b)(2) of the Act, and is necessary to effectuate that section. The Commission has held to like effect many times, and it has been universally upheld by the Courts. The latest such decision is the decision of the Supreme Court in American Power & Light and Electric Power & Light Corporation where the Commission had ordered the dissolution of two useless holding companies. They had objected, and the Court said that certainly the Commission could do that; and we collate and cite those cases in the brief.

But even if the Commission had not found that the total liquidation of Engineers is required to effectuate Section 11(b)(2), it would not make any difference in the final result here because clearly a partial liquidation of so radical a nature has taken place under the mandate of Section 11(b)(1) as a result of the divestment orders that on applicable principles of law and Commission decision the retirement of the senior securities is made necessary in any event.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Berman

The Commission more than three years ago pointed out in the Western Public Service case, which was then a subsidiary of Engineers, that Engineers had more than the problem of an 11(b)(1) to cope with. They said, "In addition to making the divestments which we have ordered, Engineers has the further duty of contracting its capital structure to conform with its shrunken system"; and Judge Healy went further, Commissioner Healy, in his concurring opinion in that case, and pointing to the provisions of the certificate of incorporation with respect to reduction of capital stock said, "Even if this is not a total liquidation, what is certainly taking place here is a partial reduction of capitalization, which brings into play the charter provisions applicable to the liquidation price in the event of reduction of capital stock." Certainly that is taking place here in this very proceeding.

In the Findings of December 5 in the Engineers' case the Commission went on to say, "In any event, the shrinkage in the Engineers' system is such that its capital structure must be shrunk and the senior securities must be eliminated."

Now, as your Honor knows from having handled any number of such proceedings that where the Commission has found that a shrinkage in the system must occur, even though the holding company may still remain alive and a part of the system may remain alive, that because it is placed under the compulsion of paring down its capital structure to conform to that pared-down geographical system, the retirement of the senior securities is held to be involuntary and no call premiums are held payable. A long series of Commission opinions attest to that.

Your Honor had the question before you and considered it very extensively in the Consolidated Electric & Gas case where the argument was being made that we were dealing

here with a Section 11(e) plan, which is voluntary, and that there was no outstanding 11(b)(2) order requiring the retirement of the preferred stock; and you said, "It is clear that this company has to contract itself to comply with the Commission's 11(b)(1) order, and that something has to be done with that capital structure. They can't have this preferred stock outstanding, and under those circumstances the doctrines applicable to frustration of corporate enterprise are applicable"; the same doctrine which the Circuit Court of Appeals in the Second Circuit applied in the New York Trust against SEC case, where the retirement of the debentures was held necessary; and therefore no premiums payable, and so forth.

So that even if we did not have a complete liquidation of the system such as we do in fact have, but merely had a *pro tanto,* a partial liquidation which rendered this preferred stock in appropriate to the size of the system, a long line of Commission and Court decisions uniformly hold that the senior security holders under such circumstances have no right to demand premiums.

Now, the question was squarely presented to the Commission in its Cities Service decision, Holding Company Act Release No. 4944, which we quote at pages 26 to 28 of our brief. There the Cities Service Company had filed an 11(e) plan to retire debentures, $7 preferred stock having a call premium of $10, $5 preferred stock, and $6 preferred stock. The Commission had issued no order to the company to retire those securities, but it had found that under 11(b)(1) the company would be shrunken to about 55% of its initial size, and the Commission started by reviewing its past decisions and citing a number of them and said, "We held that satisfaction of the securities there involved, without payment of redemption premium, was fair and equitable, and in both cases our decision was affirmed on appeal.

"In each of the cases cited above we had entered an order that the issuer of the securities involved must be liquidated and dissolved by reason of the requirements of Section 11 (b). No such order, however, had been entered in Consolidated Electric and Gas Company. In prior findings in that proceeding we had found that disposition by Consolidated of its interest in a major subsidiary thereof was necessary to effectuate the provisions of Section 11; that compliance with Section 11 (b) would involve substantially complete liquidation of that portion of the enterprise on which the Federated bonds (theretofore assumed and presently proposed to be paid by Consolidated) had a lien; that application of the proceeds of such sale to the requirement of bonds was a necessary consequence of the sale; and that simplification of the security structure of Consolidated by elimination of the Federated bonds was necessary to effectuate the provisions of Section 11 (b) (2). In these circumstances, we concluded that payment of the Federated bonds at their principal amount and accrued interest, as provided in the plan of Consolidated, was fair and equitable to the investors affected thereby.

"In the instant case, we have heretofore found, pursuant to Section 11 (b) (1), that Power & Light must dispose of its interest in subsidiaries which then constituted over 55% of the consolidated assets of the Power & Light system. Originally controlling a widely scattered empire, Power & Light will be limited by the compulsory provisions of Section 11 to its Ohio properties. As stated above, elimination of all senior securities from the corporate structure of Power & Light is a necessary consequence of such partial liquidation, and is compelled by the provisions of Section 11 (b) (2)."

And the Commission held that no premiums were payable either on those debentures, the 7% preferred or the 6%

Berman

preferred, and so forth, and that despite the fact, one, that Cities Service had not been ordered to liquidate, but was to remain alive; and, two, that Cities Service did not have the money in its treasury to pay off the preferred stock, nor were the common stockholders willing to furnish that money, but Cities Service went out and borrowed that money from a bank. In other words, it replaced them with new capital, new senior capital, bearing an interest rate of only some 2%, but retired its senior securities bearing interest rates of 5, 6 and 7 percent; and the Commission found that no premiums were payable not only under the contract—the contract was silent on that, they said—but on principles of fairness and equity there was no basis on which they could receive a premium.

Now, here we do have a total liquidation of the enterprise and here we have no replacement of the senior capital with other senior capital. We have the dissolution of the entire enterprise and the money being put up in large part by the common stockholders to pay off the preferred at their liquidating claims, and the Commission has found now that it would not be consonant with the principles of fairness and equity that the preferred stockholders should not receive a bonus or premium on the basis of this now present investment value doctrine.

There must be a dozen courts that have passed on the question of the non-payment of premium in these other cases. Every one of them has concurred in the Commission's view that no premium was payable because the retirement of the securities was being made under the impact of Section 11(b)(2), and as I stated, four Circuit Courts of Appeals, four different ones, have found that those were the applicable principles. We have collated those cases and cited them in our brief. Now the Court is being asked, in effect, to reverse all that and to find that on the facts in this case premiums are payable.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Berman

We take the position that even if there were nothing, no agreement in the charter here providing for the payment of $100 per share, that on general principles of equity these preferred stockholders are not entitled to $100 per share first of all.

The charter provision that the preferred stockholders or debenture holders should receive a redemption premium of course rests upon the assumption that when the common stockholders exercise their redemption right they are exercising a valuable right which will permit them to pay off the present senior money and replace it with senior money having a lower cost to them and that they will continue to have in the capital structure this senior money, only it will be senior money at a lower price; and therefore they pay a premium to the former senior money people to step out of the picture and let themselves be replaced by those who are willing to take a lower rate of return. But, of course, in a situation where you are liquidating you can't pay a redemption premium to your senior money people to step out, because you are losing the advantages of the senior money in not retaining it.

The Second Circuit Court of Appeals in its New York Trust Company case, to which I have referred, clearly made that point. In that case, which was one phase of the United Light & Power case, the debenture holders argued that the stockholders could pay them a premium nevertheless, in money, giving them the equivalent of their rights; and the Court said, "Why, no, these people have no reason to pay you a redemption premium, because it has been made illegal for you to stay in this enterprise and, in fact, for this enterprise to stay alive. Those are not the circumstances under which the right to a premium arises. Your rights are cut off and theirs are cut off. They can't pay you to stay here and furnish leverage. They have been ordered to go out of

business or they have been ordered not to have senior securities. Those are not the circumstances under which the right to premium arises."

What is this present investment value doctrine that we are dealing with? We contend that in essence it is nothing more than the right of the preferred stockholders or the value to the preferred stockholders to continue to receive in the future an excessive rate of return. That is, in essence, what the preferred investment value doctrine is. The preferred stockholders say, "If you pay us $100 now, our liquidating claim, so called, considering the going rates of money, if we take that hundred dollars and go out and invest it in a good safe security, a security of comparable caliber; we can only get 4½ or 5 percent on it, whatever the figure be, instead of 6 percent and 5½ percent which we are now getting. Therefore you are forcing us now to lose the excess that our present preferred stocks enjoy over the going value, the going money rate. That is a valuable right for which we ought to be compensated."

Now, we agree, your Honor, that when the preferred stockholders are forced to relinquish the right to receive the excessive dividend rate that they are now getting, that they are giving up something which they would rather not give up; they are giving up something which has value definitely. But we are not getting the benefit of their relinquishment. We common stockholders are also being forced to relinquish our right to the future profit possibilities inherent in this enterprise. The Government has stepped in and said, "This type of enterprise is now illegal. It must come to an end. Go out of business."

Mr. Slater referred earlier to the contentions, he said, of the company that the preferred stockholders should be made in equity to share the losses. That is not our position here. We are not asking these preferred stockholders

to bear any losses. We have indemnified them against every loss this system has had since its formation and all the hardships that it has gone through under the Act. The preferred stockholders have received the full and punctual payment of their dividends, with the exception of several years, which were speedily thereafter compensated for. We are now ready to pay them 100 cents on the dollar for their liquidating claim. Whatever losses we have borne as a result of the forced divestments—and there have been losses and very substantial ones—the common stockholders will bear exclusively. They do not ask the preferred to bear a penny of it. But we say, "Don't ask us also to be the indemnifiers of the preferred for the future profit possibilities that they are being forced to give up by the enactment of Congress."

Now, it is a well-recognized doctrine in our courts that when Congress exercises its rights, its powers to regulate commerce or to take property, it pays for the property; but many losses incident to the exercise of those rights are lost. In the recent Powelson case, which we set forth in our brief, the Supreme Court had occasion to review that subject, at page 39 of our brief, and speaking of loss of future opportunities it says:

"The public project, to be sure, has frustrated respondents' plan for the exploitation of its power of eminent domain. We may assume that that privilege was a thing of value and that this frustration of the plan means a loss to respondent. But our denial of compensation for that loss does not make this an exceptional case in the law of eminent domain. There are numerous business losses which result from condemnation of properties but which are not compensable under the Fifth Amendment. * * * It is well settled in this Court that, 'Frustration and appropriation are essentially different things.' Thus in Mitchell *v.* United

States, 267 U. S. 341, the owner was denied compensation for the destruction of his business which resulted from the taking of his land for a public project even though the business could not be reestablished elsewhere. This Court, after noting that 'settled rules of law' precluded a consideration of 'consequential damages' for losses of a business or its destruction, stated: 'No recovery therefor can be had now as for a taking of the business. There is no finding as a fact that the Government took the business, or that what it did was intended as a taking. If the business was destroyed, the destruction was an unintended incident of the taking of land.' "

Well, whatever loss the preferred stockholders are going to suffer in the sense of deprivation of their future right to this excessive rate of dividend, this future attractive business opportunity, that is a loss just as the loss of the owner of the land in the TVA case and Powelson case of his right to build a huge hydroelectric site there. He had that possibility and it was taken away, but he got no compensation for that. That was consequential to the exercise of the overriding government powers.

Here the right is being taken away from this corporation to continue as a going enterprise, a holding company system with all the values that inhere in that kind of an enterprise—the control of all these operating companies, the rendition of services, the making of all kinds of profits, the recoupment of past losses—and that is all being taken away from the corporation and the common stockholders. Who compensates us for those losses? No one, of course. Those are consequential to the exercise of government powers.

As a matter of fact, in the American Power & Light and Electric Power & Light cases before the Supreme Court it was argued that the statute was unconstitutional because

valuable rights were being taken away from the stockholders for which no compensation was being given by the Government; and the Court said, "Of course, we brush that aside. It is your loss, if any there be. They may very well be substantial. Those are consequential to the exercise of the powers of Congress to regulate commerce. There is no recovery for you and there need not be." So the common stockholders have nobody to look to to recoup their past losses or to pay them for the loss of their future profit possibilities. Why then is it equitable require them to indemnify the preferred for the loss of their future profit possibility, and that is all that this present investment value is. We don't ask them to share past losses.

When Puget Sound was sold Engineers wrote some $37,000,000 off its books as a dead loss. It realized $700,000 on an investment of $34,000,000. That was a loss that the preferred stockholders have not felt one iota, nor are we asking them to, and there were other such losses when Engineers had to dispose of an extremely valuable option it had which would have given it control of the El Paso Natural Gas Company, which has become one of the leading natural gas pipeline companies in the country. That was a profit opportunity which was taken away from the common stockholders. Measured by market values alone, that was a $4,000,000 loss, I believe Engineers has said, and actually they would have had control of the system and been permitted to participate in its growth possibilities, which are enormous. Nobody has asked the preferred stockholders to compensate the common for that loss or to share in that loss.

We are ready to indemnify them and pay them every dollar that is coming to them, but they ask more. They say, "Pay us for the highly excessive dividend rate that we are not going to get when this enterprise comes to an end."

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Berman

Now, it should be noted the corporation does not have in its treasury the cash to pay off these preferred stockholders. It has only about 40% of that amount, and the balance of that money is coming from the common stockholders who are now getting together through the rights technique and putting up $22,000,000 of fresh capital in order to acquit themselves of their obligation to pay the preferred and the full liquidating right. And they are doing more: They are mortgaging the future earning power of two of the additional subsidiaries by paying up advance dividends of some $3,700,000 covering a period of some two years, to pay off the preferred stock. All that they are doing, and yet the preferred stock is not satisfied.

Now, Mr. Boehm has referred to the issue price and market history of the preferred stocks and to the fact that it sold at ten and fifteen dollars a share and so forth. That is true. I don't have to go over it.

We have referred to the fact that the common has met its obligations punctiliously, and in another context Commissioner Healy had occasion to point out in his American Light & Traction decision that the common stockholders or the stockholders in that case by their very sacrifices of retaining earnings in the enterprise had managed to give the preferred stock the present investment value which it has, that high investment value, and he said, "To whatever extent the present strong position of the debt is attributable to earnings and asset coverages that exist because of past sacrifices on the part of the stockholders, it seems to me wholly unfair and unequitable now to penalize them further for this conservatism by requiring them to pay a premium to the debtholders whose contracts have been punctually observed at all times." And he quotes from the Scriptures and says, "From him that hath not shall be taken away even that which he hath."

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Slater

The fact is that the common stockholders here have received no dividends from this enterprise since 1931, and in the prior years they received a total of some $3.70 over the past years. This is true, notwithstanding the fact, as the Commission points out in its Findings, that earnings have been available for the payment of dividends on the common stock ever since 1938; that therefore cash and surplus was available to make possible a payment of these dividends to the common; and not one penny was paid, because the Management was pursuing a conservative policy of husbanding resources with a view to the partial or complete liquidation of this enterprise, and now it has piled up this huge surplus, to which the preferred stockholders now point as further proof of the value of their preferred stock.

I think the other points are adequately covered in my brief. Thank you, your Honor.

The Court: Do you want to have a short reply, Mr. Slater?

Mr. Slater: Yes, your Honor.

If the Court please, while it is perfectly true that Congress left it in the first instance to the management of these companies to propose the method by which they shall resolve their problems under the Act, it is also perfectly true that Congress did not intend to leave to these managements the measure of participation to be accorded security holders; and if you adopt the arguments of objectors that is precisely what you are doing. You are saying that the claims of preferred stockholders are elastic; they are so big if the management proposes one method of compliance with the statute; they shrink to a smaller size if they propose another, or perhaps expand again to an even larger size if

they propose a third method. That, of course, is not what Congress intended. It doesn't make sense.

Congress said not one penny of investor interest, of investment value, shall be sacrificed, and the National Power Policy Committee said so and the President said so.

In the last analysis, that is what we are doing here, measuring claims and nothing more. How you satisfy that claim once you measure it is the second question. That depends on what the management proposes. They may propose a plan where cash is available to satisfy the measure of the claim. In that event the security holder takes the cash, perhaps, and buys securities to restore himself to his investment position in that going concern. Perhaps the management may propose a method where securities are available to satisfy that measure of participation, that measure of claim which is in any event constant.

The Court: Did I understand you correctly this morning, Mr. Slater, in that you said the charter provisions are not operative, but you look to the charter simply as a point of reference to see what the rights were that the party theretofore enjoyed, and you used them as an integral part of determining what is fair and equitable with relation to him?

Mr. Slater: I think your Honor has got it, but let me restate it and make sure. What I said was this: The Commission pays and the Otis doctrine requires that consideration be given to all the rights of the security holders as set forth in the charter, but not conclusive controlling weight to the liquidation provision. That is, the charter also contains specifications as to dividend rates. That is an important charter right which must be considered. The objectors would have you forget that, ignore it, and give controlling weight only to the single charter provision which speaks of liquidation.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Slater

The charter also has provisions for redemption. That is a valuable right which, absent Section 11, must be accorded weight in evaluating the investment position of the preferred stock. The preferred stock has a position of safety in the going concern. It has a risk position; it has asset coverage; it has earnings coverage—all of which it must be compensated for.

As I pointed out this morning, the Engineers' charter provides that in the event of a merger or consolidation this talk of a hundred dollars on liquidation, whether voluntary or involuntary, is off. It just doesn't apply. Therefore if Engineers had proposed a merger plan we would not be wrestling with the language of the liquidation provisions of the charter as Mr. Berman has tried to do. We look at the appraisal provisions of the Delaware statute, perhaps, and there is no reason then that an appropriate appraisal would not result in the investment value which the Commission has found. Simply because Engineers proposes the dissolution route is no reason why the preferred stockholders should be short-changed that way; and, as a matter of fact, this plan today contains provision for the merger, and a merger was originally proposed as an alternative. There is leave to Engineers to amend the plan today, and that merger is a possibility if the tax consequences of this dissolution plan turn out for one reason or another to make the plan unfeasible. Do we then go back to the Commission and come back to this Court to re-measure the claim of the preferred stock in the event that the merger is then selected by the Management as the route to be pursued? It just would not make any sense. There would be hopeless confusion. The Commission's job would never be done.

Now, it is perfectly clear that involuntary liquidation within the meaning of the charter did not contemplate what is here happening. The Otis case holding was as to a charter drawn in 1929. This was drawn ir 1925. So when

the objector Johnson devotes many pages of his brief to convince the Court that what the draftsmen of the charter had in mind was the Holding Company Act, it is just speculation, just pure conjecture. But fortunately in this case we don't have to speculate at all, because we have with us and we have had in this proceeding a gentleman whom I understand is the draftsman of the charter, Mr. Tucker, counsel for Engineers; and Mr. Tucker has stated and it is in the record of these proceedings as follows:

"When you act under the bankruptcy laws of Chapter X on account of a financial failure, the stockholders must be deemed to have had the financial failure of this organization in mind when they acquired their investment. Section 11 is not a situation where the company is in financial difficulty in the ordinary sense, and it certainly would be so in our case, because we have no bonds, we have no bank debt, we just have preferred stock. It is an arbitrarily and forced statutory termination of the enterprise, and it has no relation whatsoever to any factors which the parties could have had in mind when they entered the enterprise."

Now, unless the common stockholders think for one moment that their rights in this proceeding were not zealously represented by the Management when the original plan was proposed, I hasten to add that this statement was made to the Commission several years ago in connection with a proposal by Engineers to buy its preferred stock in at the then current market prices of some $60 to $70 a share. This is, the shoe was on the other foot at that time.

The Court: Let us get to the other point, the escrow arrangement. I would like to hear argument on that.

Mr. Slater: All right, your Honor.

I just can't refrain, your Honor, if I may, from making one more statement. There has been so much recitation of "from the Otis case" it is remarkable the agility with which they succeeded in skirting around a single sentence

which disposes of the entire contention. They have read all around it.' That sentence follows what Mr. Berman has quoted in his brief and in the oral argument and what Mr. Boehm has quoted. It says, "The reason does not lie in the fact that the business of Power continues in another form."

That is, whatever might have been said by Judge Healy, whatever might have been said by the Chief Justice, whatever might have been said in any other tribunal, the Supreme Court did not render its decision on the basis of the fact that there was a peeling off or liquidation or recapitalization. There was just action required by the Holding Company Act.

As to the escrow, if the Court please, it makes sense from the point of view of the statute, from the point of view of security holders to proceed as expeditiously as we can with those aspects of the plan which are not the subject of controversy. The warrant program and its success is dependent, of course, in large measure on market conditions at the time it is undertaken, and it is very desirous to give the Management a free hand as soon as possible to get that program under way.

As I stated earlier, originally the Management and the Commission were not in agreement on the pay-off to the preferred stockholders. The Commission then urged an escrow arrangement as part of the plan. When Engineers amended the plan so that Engineers was not going to contest the fairness to the preferred stockholders with the Commission, the Commission said, "There is no need, so far as we can see now, for an escrow. If it develops that one is appropriate and one is necessary in order to make progress with the uncontested portions of the plan, it can be done under the supervision of and in the court when it becomes clear that it is desirable to make such an arrange-

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd).

Slater

ment." The Commission said that counsel could then under the aegis of the Court enter into an appropriate escrow. But the plan was never amended. It was just a statement by the Commission made in its Opinion in saying, in connection with a request, I believe, by Mr. Condon at the time, that there should be an escrow.

Subsequently tax counsel advised Engineers that in the event it developed in the court that the escrow should be created, the incidental changes in the plan would create questions as to whether they were entitled to certain tax benefits under the Revenue Code unless they got an order from the Commission which recites that those transactions involved in the changes are necessary to effectuate the provisions of Section 11. So the Commission did not amend the plan, but amended the Findings to merely recite what would be the situation as far as Section 11 is concerned if the escrow were created and were approved by the Court.

Now, in spelling out the recitals, in spelling out the details and the itemizations which the Revenue Code requires in order for that order to be effective so as to give the tax benefit, the Commission assumed that the escrow arrangement which the Court would approve and which counsel would agree upon would be the precise escrow arrangement which the Commission proposed in its original opinion and to which there was no objection whatsoever. Mr. Condon concurred in it. He urged it. In fact, he took a position before the Commission which in our view precludes the position he now takes before this Court.

The Court: Give me the details of the arrangement. What actually happened?

Mr. Slater: Well, Engineers will deposit with a bank in escrow the sum of $4,000,000. We have a proposed form of escrow agreement, your Honor, which we have distributed to counsel. The escrow provides that there will be de-

posited with the Chase National Bank of the City of New York—that is, this proposed form of escrow—the sum of $4,000,000. Of that amount $3,204,795 is the total which the preferred stockholders are entitled to in excess of $100 per share in the event that the Commission's determination proves to be correct. In addition, the escrow proposes that $484,325 shall be included as an amount to compensate the preferred stockholders for three years—that is, there is an assumption here that litigation will ensue for three years—for the delay in getting their full payment. The sum of $310,880 is to provide for the payment of fees and expenses in connection with all aspects of the plan.

The escrow agreement then goes on to spell out the obligations of the depository in certain events, depending in each case on how the litigation goes.

Now, as I understand it, counsel for the preferred stockholders Streeter and so forth, represented by Mr. Condon and Mr. Zazove, are dissatisfied, in effect, with what is set forth in paragraph B of paragraph 1 of the escrow. That is, they want to be compensated in full as though the preferred stock had not been retired at all or as though they did not receive any payment, but continue to receive, as though they still held the certificate and did not receive $100, the contract dividend rate specified in the security, an arrangement which in our view would be wholly inequitable and an arrangement which Mr. Condon before the Commission denounced.

He stated at page 1832 of the record, and I am just picking one which is typical of many statements made by him:

"The plan should provide that in the event that payment of the full amount due to the preferred stockholders is delayed, the company will pay an amount equal to the yield of each series of preferred on the basis of its dividend rate at the price ultimately deemed payable."

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Slater

"In this manner," as the Commission said on page 36 of its Opinion, its December 5 Opinion when an escrow was first recommended by the Commission, "The preferred will receive for the period of any litigation a return on the amount withheld which is measured by the return which would have been received by it if the stock remained outstanding."

Finally at page 1844 of the record Mr. Condon states, "I would like to correct one impression that I am sure Mr. Tucker gave to the Commission inadvertently that I have ever contended that at any time the preferred stockholders were entitled to receive $100 in cash and to get dividends on the $100 during the course of the litigation. I am quite sure that his better judgment will indicate that that has never been my position."

I would just like to point out to your Honor that if these dividend rates continue in effect, notwithstanding the fact that they get their $100, it will cost the common stockholder some $2,119,000 a year to litigate this matter; and if it takes three years, as it well might, it will cost them about six and a half million dollars to litigate over a fund totalling $3,200,000.

The Court: I think we will take a recess at this time.

(A brief recess was taken at this point.)

Mr. Slater: If your Honor please, I learned during the recess that I perhaps owe the Court an explanation and apology to Mr. Condon. I read quotations from the record which bore on a position he took at one time, but I understand that in the course of the administrative proceeding he took the other position, too.

The Court: Mr. Tucker, do you want to be heard now or do you want Mr. Zazove to be heard?

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Zazove

Mr. Tucker: It is immaterial to me. I should like to be heard on the escrow.

The Court: I think I will hear from Mr. Zazove now.

Mr. Zazove: If your Honor please, before I get into this controversial matter about what we did or didn't do before the Commission——

The Court: I am not particularly interested in that, Mr. Zazove.

Mr. Zazove: I would like to get back to the initial observation I made in the earlier part of this hearing to this effect: The notice which was sent to all the stockholders by the company which was embodied in a letter dated December 20, 1946, together with Supplemental Findings of the Commission which passed upon an approved plan as now amended and as now before the Court, together with the notice and order that was entered by this Court on January 9, 1947, which was mailed to all the stockholders, had no word and no provision about an escrow agreement or an escrow arrangement. The pl n as it now stands before the Court permits the following to happen:

It permits the common stockholders who own preferred stock to tender their preferred stock in exchange for Gulf States common stock at a price equivalent to the redemption prices. There is no word in the plan that says they can only tender it on the basis of $100 and retain an interest in a lawsuit for the balance. In addition to that, the notice and the order which this Court entered on January 9, 1947, which was mailed to all the stockholders contained no provision whatsoever and no mention that a stockholder out in California or any other place might wind up here instead of getting his redemption price with getting $100 plus an interest in a lawsuit.

The Court's order directed that all objectors file statements of objection on or before the 10th of this month, and

that order that you entered was directed to three things: It was directed to the Commission's original Findings; it was directed to the Commission's Supplemental Findings; and it was directed to the plan as amended and as now before the Court; and it was perfectly logical for any stockholder receiving that notice to assume that on the basis of the plan then before the Court the proposal was presented to pay out the redemption prices. There was not a word in there about an escrow.

Now, this so-called order of amendment that the Commission entered was entered without notice to anyone.

The Court: Just a minute. At that point let me see if I can clearly follow you. Assuming the Court in the present proceedings decides that he does not think the preferred stock is entitled to its premium, then the escrow business is out; is that true?

Mr. Zazove: The plan is out then.

The Court: Assuming the plan is approved, can't these things be taken care of in the order of approval, these things you are objecting to at the moment?

Mr. Zazove: Only, I think, your Honor, if the stockholders had notice that an alternative method of carrying this plan out was going to be adopted. We filed a statement of objections here and we made no mention of the escrow arrangement. We never saw it. The first time we ever knew there was an escrow thing here was on last Thursday morning when we were served with a copy of the Commission's order, and I think your Honor's order did not contemplate any escrow. There is not a word in there, and that is why at this time I am asking leave of the Court to file a supplemental statement of objections in which we direct ourselves to the merits of this escrow arrangement, and we explain to the Court why we think if it is adopted the plan would not be fair.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Zazove

In other words, we are perfectly content with the plan as it was sent to the stockholders and as it was approved by the Commission.

Everybody talks about this amending order as being necessary to enable the company to get these tax exemptions under Supplement R. Of course we have no objections to that whatever. We are in favor of it.

The Court: Your objection really goes to this point: If the Commission wanted to amend the plan you should have had an opportunity to appear before the Commission and voice your objection to the escrow.

Mr. Zazove: That is absolutely the case, and I think if this Court wants to amend it that we and all the other stockholders are entitled to an opportunity to be heard on the basis of an alternative proposal. They call these incidental changes. They are not changes. It puts back the original plan that was before the Commission. The original plan proposed a payment of $100 and that is all. It proposed this stock would be exchanged for Gulf States stock on the basis of $100. The Commission's order goes further than Mr. Slater indicated to you. I will read it. I am quoting from the Order approving the amended plan, which is known as the Supplemental Findings and the Order attached to it:

The Commission specifically "directs" the adoption of these changes "that are necessary"—they say—"to get the tax advantages" and it "directs" the creation of an escrow.

We saw this escrow agreement this morning when it was handed to me. I haven't even read it yet. Certainly on behalf of the preferred stockholders we are entitled at least to look at the escrow arrangement and urge our objections to it.

Mr. Tucker stated in his brief that before an escrow would be promulgated he would discuss its terms with all

counsel. He discussed it with the Commission, but we never heard about it.

The Court: Is it your position that you will contend that you are entitled to your interest or to your dividends while the plan is in the Courts awaiting ultimate approval?

Mr. Zazove: Yes, sir, that is our position, and I will explain it to you. I would like to have leave to file this supplemental statement so it will be before the Court.

The Court: You may file it.

Mr. Zazove: At this time I would like to have the record show I gave Mr. Slater a copy and I am giving Mr. Tucker a copy.

The Court's order also directed that briefs in support of such statement of objection should be filed at the same time the statement was filed. Of course, we did not file it because we had nothing to object to. I am asking leave of the Court at this time to file a brief in support of our supplemental statement of objections.

The Court: You want to file a brief, you say?

Mr. Zazove: In accordance with your order we were directed to file a brief. This brief deals with the amending order and the question of continuation of dividends. Do I have leave to file it, sir?

The Court: Oh, certainly.

Mr. Zazove: I am also giving copies to opposing counsel.

Mr. Berman: May we also have a copy?

Mr. Zazove: The order requires us to serve Mr. Tucker and Mr. Slater. If I have enough copies I will be glad to distribute them.

I want to get back to what our position is regarding this dividend proposition. In the Otis case the Supreme Court held, and the Commission agrees, that liquidation provisions were inoperative; but Otis never said that the redemption provisions of the charter were inoperative; and

in this very case the Commission applied the redemption provisions as against the preferred stockholders, because the only testimony in this record, and it is uncontroverted, is by Dr. Badger, who testified the investment values of these preferred stocks were greatly in excess of the call prices. He testified the $6 preferred was $133 in value.

The Commission said, "We don't have to go above the call prices, because we can apply the redemption provisions of the charter, since the common stock has the right to call the stock at any time." So they say, "You are limited to the redemption prices."

We say the Commission has applied as against us a provision in the charter, but when it comes to giving us the benefits of that charter it has refused to apply them; that the only way that the common stockholders have a right to terminate our dividends under this charter is by paying us in full, not by giving us $100 and an interest in a lawsuit. These common stockholders are going to get the immediate benefits of the assets and the earnings of this company as soon as they make a deposit here according to this escrow arrangement, but they are not willing to suffer the detriments for which they are responsible in the event they get the benefit.

The Court: Have you argued this point before the Commission?

Mr. Zazove: We never had an opportunity to, Judge. All we had an opportunity to argue was the original plan which provided for retirement (redemption) prices to be paid of $100. We stated the plan was unfair, and one of the reasons we gave for it being unfair was that the company itself with all the assets and all the attorneys they had was contemplating fighting one class of stockholders; namely, the preferred stockholders, while terminating their interest in the company; and so we said that was unfair, and it was

under those circumstances that we asked for an escrow, because we didn't want the money and the assets paid out to the common stockholders without saving something for us in the event we litigated the question of the redemption feature in this case. The statement of what transpired at the reconvened hearings completely overlooked the statement which Mr. Condon made and which I think makes this thing entirely clear. He said that the amended plan as filed did not give us the minimum which the Commission said we were entitled to, and that minimum was this: That if there was delay in paying us the full redemption prices we are entitled to additional compensation on (of) the amount withheld. All Mr. Condon did was to say that the amended plan made no provision for paying this additional compensation, but it provided that any claims to dividends or any interest were to be terminated upon the deposit of the full redemption prices; and so Mr. Condon in the light of those circumstances said the plan was not fair. But he specifically said in answer to Mr. Tucker, and I am quoting now from page 1839 of the record. Mr. Tucker said to Mr. Condon that he, Mr. Condon "would be unhappy with it unless the plan provided for a continuation of full dividends on the preferred stock of Engineers until the full amount, $100 plus the premium plus dividends were deposited. Wasn't that your position in your brief, Mr. Condon?"

"Mr. Condon: It was, Mr. Tucker, and it still is and I will still urge that in the District Court."

It has been our position here that it was very unfair to have the provision in the charter applied as against us by holding us to the call prices where the investment values exceeded that amount, and not applying it to the common stockholders who are trying to take advantage of it. They want to discontinue paying us dividends. We say the only time they have the right to do that is by paying us our

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Scheetz

redemption prices which the Commission found was due to us.

It turns out now with this amendment the Commission has adopted without notice to anybody, and if the Court approves it without notice to stockholders, that it is going to be done as an alternative. You are going to do exactly what we said is unfair. You are going to give the common stockholders the benefits of the redemption provisions of the charter and deny the preferred stockholders the benefits at the same time.

The Court: I don't understand what you mean by "deprive the preferred stockholders of their benefits under the charter."

Mr. Zazove: We say that under the charter that the redemption provisions are still operative, and the Commission says so too.

The Court: You say they are operative until actually, in fact, you get the cash.

Mr. Zazove: That is right; until you have a call, a strict compliance with the charter. The Delaware statutes say the preferred stockholders are just as well the owners of the company as the common stockholders, and if they want to terminate the preferred stockholders' rights they should not give them $100 and an interest in a lawsuit while the common stockholders get the benefits of the thing, but they should give them the redemption price as the charter provides. That is our position.

The Court: I have it.

Mr. Scheetz: If your Honor please, since I represented preferred stockholders before the Commission I think in fairness to you I should say what our position had been there, because it is at variance with the position you just heard.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Scheetz

When Engineers filed its original plan proposing to pay $100 only, and divided the plan into two parts, the first part that they would pay $100 and the second part that they would pay no more than $100, that second part was really a design for a lawsuit. But at that time I took the position before the Commission that any plan which did not provide for an escrow of the amount in litigation was unfair. My approach to it was irrespective of the theory on which the preferred stock would be valued, whether it was a voluntary redemption or whether it was an application of the fair investment value rule.

Having taken that position before the Commission throughout the proceedings, I adhere to it I say—I hope without prejudice to the position that has just been presented to you; but it seems to me that since there could be a controversy here that that was a statesmanlike way to dispose of the thing, although my client, of course, would like to enjoy the dividend during that period.

So far as the procedure is concerned, had that question arisen here for the first time I would be disposed to take a look at the escrow agreement, and if it is a satisfactory agreement, to agree that such an escrow arrangement was fair under those particular circumstances.

The Court: Was this a matter of discussion and determination before the Commission?

Mr. Scheetz: Well, certainly to this extent, and I trust other counsel will correct me if I don't state it fully: The proposal was urged early in the proceedings, and when Engineers came in with an amended plan proposing to pay the full amount without any reservations whatsoever, at first there appeared to be no need for an escrow arrangement. At the last hearing the question was raised as to what would be the situation in the event opposition developed, because as the plan was worded Engineers could put up the money and stop the dividend, and the preferred stockholders would

not be compensated in any way for the delay in receiving the amount in litigation.

I first objected and joined Mr. Condon's objection to the absence of an escrow agreement. Mr. Kanton spoke for the Staff and urged if such a situation developed it could be dealt with here before the Court, and in view of the statements made in the hearing I withdrew any objection that I had to the absence of an escrow agreement in the plan at that time. Now that the opposition has developed, of course the problem is acute and needs to be dealt with. I think that is a correct statement of what happened.

The Court: Mr. Tucker.

Mr. Tucker: Your Honor will find in the Supplemental Findings and Opinion of the Commission, which until this past week was the final word from the Commission in connection with this plan, a warning to everybody connected with this case that what has happened here was likely to happen. I refer to the next to the last division of the Supplemental Findings and Opinion of the Commission under the heading of "Objections to the Amended Plan"; and on page 6 of that Release, which is Release No. 7119, if your Honor has it there, you will find that the possibility that an escrow arrangement would be entered into in this situation was approached there directly. The difficulty, I think, with what the Commission there said was that they assumed that we could wait until an appeal had been taken in this case, and at that stage introduced the escrow.

Obviously, I think that, as a matter of law, is not so. After this Court has entered its opinion approving this plan, assuming that that is what the Court is going to do. As the Judge pointed out, if you are going to disapprove this plan, why, that ends it anyway. But if the Court should

approve the plan and final order of this Court should be entered directing its enforcement, and an appeal should be taken, my conception of the law is that at that stage an escrow arrangement could not be set up, that this Court would have lost jurisdiction over the case.

Now, the difficulty that developed in connection with the situation as the Commission left it in this Supplemental Findings and Opinion was that under Supplement R and Section 1808-F of the Internal Revenue Code, the exemptions which are allowed to transactions which take place under a Section 11 plan look for their exemptions not to the order of the District Court, but to the Commission. Now, it is perfectly obvious that unless the exemptions are described in the Commission's order and the transactions are described in the Commission's order in the exact form in which they are carried out, they do not get the benefit of the Supplement R exemption, because Supplement R says that they must have taken place under an order of the Commission which shall describe them, and such order of the Commission shall be or become a final order.

Our Tax Department of my office studied this statement of the Commission with respect to an escrow and pointed out that if the escrow arrangement were gone into, since it was not contemplated by the original Commission order approving the plan as amended to Amendment No. 6, the various transactions which necessarily have to be changed under the plan if an escrow is provided would not have been described in that order and we would not get the benefit of the protection afforded, and that would become an extremely serious matter to all these stockholders.

I then took the matter up with the Commission and they said, "Well, what you are objecting to is the form of our order."

I said, "That is right."

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Tucker

They said, "You want us to specify in the order the various transactions which shall take place in the event an escrow shall be set up."

I said, "That is right." So I said, "It is my idea that I will send down to the Commission a communication and point out this tax difficulty to you, and ask you at that level to put such provisions in the plan so that if on hearing before the District Court it shall become evident that the question of the payment to the preferred stockholders of something in excess of $100 per share is going to be contested beyond the level of the District Court, the escrow arrangement can be provided."

So I did send such a letter, and just for the completion of the record in this case I would like to submit a copy of the communication which I sent to the Commission.

(The letter referred to was filed with the Clerk.)

Mr. Tucker: Your Honor will discover that the final order which the Commission adopted in its Order of Amendment adopts the language set forth in that communication. You will see what this escrow does is purely a procedural matter. It is nothing more. I think the Commission so viewed it. I think we so view it, and I am in hopes the Court will so view it.

It says here you have a plan, and perhaps it would be advisable for me to point out what the plan did provide prior to the time that this amendatory order was filed and the changes in procedure which obviously become necessary if the escrow is to be adopted.

The plan was filed as amendment to Amendment No. 6, provided, one, the offering by Engineers of all of the outstanding common stock of Gulf States as reclassified to equal the number of shares of outstanding common stock of Engineers on a share-for-share basis under warrants for subscription in cash at $11.50 per share, or in the alter-

native in shares of Engineers preferred stock at the redemption prices—that is, to have the $5 stock taken at a value of $105 and to have the $5.50 and $6 stock taken at a value of $110. Then it provided for the distribution to the Engineers' common stock of all of the stocks of El Paso and a part of the stock of Virginia. Then it provided for the benefit of Engineers' preferred stockholders for the deposit to those who shall not exchange their stock of $105 with respect to the $5 stock and $110 with respect to the $5.50 and $6 stock. Then it provided for the dissolution of Engineers and the distribution of the remaining assets after the debts and liabilities of Engineers should finally be disposed of.

Now, as I have said, the Opinion of the Securities and Exchange Commission approving this plan intimated this possibility, that the allowance of the above, $105 per share for the $5 stock and $110 for the $5.50 and $6 preferred stocks in respect of shares both exchanged for Gulf States stock and not so exchanged might be contested on the theory that the shares of the Engineers' preferred stock should not be allowed more than $100 per share and accrued dividends; and, as I have pointed out, it indicated that if such contest should develop this contested issue might have to be segregated from the rest of the plan by the establishment of an escrow providing for such additional payments over and above $100 per share and accrued dividends to the preferred stock; or, in the event such additional payments should finally be determined to be payable in the courts, or such lesser amount, if any, as the Courts and the Commission might find to be payable on final determination.

Now, it is obvious that if we are going to segregate out the issue as to the amount to be payable to the preferred stock, two things have to be done to the program. We can't allow the preferred stockholders who exchange for Gulf States stock to exchange their stock on the basis of $105 for the $5 stock and $110 for the $5.50 and $6 stock. We

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Tucker

must cut that back to $100. Also we can't deposit for the benefit of the preferred stockholders who do not exchange their preferred stock $105 for the $5 stock and $110 for the $5.50 and $6 stocks. We have to cut that back to $100. And we have got to set up in an escrow agreement an arrangement which will provide for the additional payments to be made to these stockholders if and when the Courts shall determine that the additional amount is payable.

The Court: Will that additional amount include more than the premium?

Mr. Tucker: Yes, because the Commission in its original Opinion in this case discusses this escrow arrangement and it says that it thinks that what should be deposited in escrow should be the amount of $4,000,000. Of this amount $3,200,000 approximately would be the premium payments; but they said the preferred stockholders, unless they get their money immediately, for a delay in getting the balance of the money they should be entitled, the Commission said in its original Opinion, to be compensated on the basis of the yield which they would have had had the stock continued out. So that in addition to the amount of the premium itself, this escrow does provide for escrowing $484,325, which is an amount equal to simple interest for a period of three years. Not that we think that the litigation is going to take three years. Not at all. We are hopeful it will take very much less than three years. But it was conceived that this was the maximum time that the litigation of this premium question would take, and this amount of $484,325 is for simple interest for three years at the rate per annum of $4.76 in the case of the Engineers $5 preferred, $5.00 in the case of the $5.50 preferred, and $5.45 in the case of the Engineers $6 preferred on the amount set forth in A above. I was reading that from the escrow. And those were the yield bases that the Commission itself said they believed should be applied if an escrow were set up.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Tucker

The Court: So that Mr. Zazove's quarrel with you is the difference in the first stock dividend rate, $4.76 and 24 cents?

Mr. Tucker: No. Mr. Zazove is saying, as I understand from what he said here, you must deposit $100 plus accrued dividends after you sell the Gulf States stock, and you may deposit also $4,000,000 in escrow; and in explanation of the four million I might say parenthetically that the balance of the sum—the two amounts I mentioned do not equal four million, and the balance of the sum, $310,880, is to cover expenses.

Mr. Zazove says, as I understand it, "If we get $100 and accrued dividends and at the same time we get the premiums; that is, $5.00 on the $5 stock and $10.00 on the other two series of stocks, then all right; we are satisfied that the preferred stock should be cancelled; but if we don't get it, if we don't get it all at once, even though we can go get a hundred dollars now and just as soon as this litigation is settled we get the balance mailed to us plus interest on this yield basis, we are not satisfied that our claim is fulfilled and we are claiming the dividends up to the time that the litigation shall be settled."

In other words, the whole validity of an escrow arrangement, segregating out this issue—perhaps he should explain that himself, but as I understand it, the whole validity of a segregation of this issue and cutting off of the dividends in respect of $100, the deposit, and then giving the interest on the delayed payment isn't enough. He thinks he should be entitled, as I get it, to dividends on the full amount until he gets his pound of flesh.

The Court: You mean he would not credit the interest that he would receive on the dividend that he claims?

Mr. Tucker: All I know——

The Court: You can answer that, Mr. Zazove.

Mr. Zazove: Before I reach the question that your Honor asked, you first have to decide whether it is due process of law to have an escrow arrangement imposed upon you be-

fore you had a chance to argue that that would make it unfair. After that point is settled we say that under the circumstances where you are giving the common stockholders the benefits of the call provisions of the charter by restricting us to the call prices that it would be unfair and inequitable to terminate our dividends. The only way they are entitled to terminate our dividends is to pay us the full amount at one time and not give us an interest in a lawsuit. That is exactly our position.

The Court: Proceed, Mr. Tucker.

Mr. Tucker: Regardless of the extremity of that position, we regarded this arrangement as a procedural matter. We recognized that if this were to be contested and an escrow were not set up then the whole plan would have to be delayed pending this outcome.

Now, I call your attention to the fact, if your Honor please, that a part of this plan involves in every sense of the word a market operation. The validity of the warrant offering in the sense of whether it will be successful or whether it will not be successful turns on there being some value to the market. Various estimates of the value of the Gulf States stock has been made, but it is apparent, and I think everybody agrees, and nobody has denied, that under present market conditions there is a value to the warrants. In other words, that the stock has a value somewhat greater than $11.50 per share—maybe $2 or something. But enough to make the operation successful.

Now, if the whole plan has got to be delayed until this issue as to the question whether the premium is payable or as to whether it is not payable is decided, maybe for a year or eighteen months or some time, whether the plan is at all practicable under those conditions will be a very serious question. The market has only to slip a few points and the sale of the Gulf States stock as set up in the plan would be impossible. Therefore it is of vital importance, as it

seems to me, both to the preferred stockholders and to the common stockholders that the operation of offering the Gulf States stock under the warrants be not delayed. Nobody knows with a market operation when a thing is delayed whether at the time it is attempted to be carried out it can be carried out or whether it cannot be carried out.

Now, there is another reason why it becomes extremely important that this transaction so far as the preferred stock is concerned in making these deposits and making this escrow and cutting off the preferred stock dividends is important, and that is because this company has in its treasury from the sale of various assets and from the accumulations of dividends, as was pointed out by the common stockholders here, which could have been paid to the common stock and which were not paid to the common stock because of the uncertainties involved in the enforcement of this Act, the sum total of about $17,000,000, and it is incurring right today and has incurred for a considerable period of time a loss of $2,600 a day, just figuring the average dividend rate of these various classes of preferred stock. Unless the persons involved in this litigation want to see the assets of this company wasted in that kind of way, it seems to me they ought to cooperate in some kind of way to separate out this issue.

Drawing attention to the technicalities that have been raised and which I haven't had any opportunity to really study, except to glance at the objections which were made there, if in substance it seemed to the Commission and it seemed to me a procedural matter, these people are here in court and they are having their opportunity to object here, and it is procedural; and, after all, if it is procedural I don't see any substance in it at all. They are in court here. The conception which the Commission had in mind was that this escrow would be settled so far as its terms are concerned by a presentation to this Court at the time

that your Honor should indicate that he was going to approve this plan, if he is, and we have no question if your Honor is not going to approve this plan that there would be presented to the Court a form of order which should embrace a form of escrow.

Now, we have made a form of escrow agreement that we have here which has been worked out with the Commission's staff and Engineers and myself, and it follows along the lines which I think the Commission said precisely was the fair thing to do in this case in order to separate out this issue; and, in any event, its actual terms, as we concede, could be settled before this Court on the application for settlement of the order itself separating this issue and providing for the incidental program changes which the escrow necessarily entails that I have already pointed out to your Honor.

Now, to make the serious claim, as seems to be made here, that that is an infringement of a basic right to be heard I think has little substance. They are here in court. They will have the opportunity in the setting up of this escrow arrangement and in the making of these incidental changes in the program, which obviously have to be made if the program is to be carried out along escrow lines, before your Honor; and it surprises me a little that counsel should take the position under those circumstances that their basic constitutional right has been infringed.

It could have been handled, presumably, by Engineers filing an amendment with the Commission asking this Court to send it back and serving notice and wh[illegible] have you; but if it is, as it seems to me, purely a procedural matter, it seems to me that the method that was followed in our calling attention to the fact that our tax rights would be seriously embarrassed if the order were left the way it was, that their order should have gone on and provided for this contingency, as they pointed out in their original Opinion,

and as they pointed out in the Supplemental Findings. My brother can't say, it seems to me, with fairness that he is taken by surprise by this picture. In the original Opinion when the plan was disapproved an escrow was discussed. In the Supplemental Findings and Opinion the escrow possibility was discussed. It was not included in the original Order as it should have been, but all that this Order that has now been entered does is to provide for the setting up of the escrow and for other changes in the plan which obviously are necessary or in the program which are obviously necessary. One is that instead of depositing $105 and $110 for the preferred stock that do not exchange, you deposit $100 and cover the additional payment under the escrow; and instead of permitting the exchange of preferred stock for Gulf States common stock on the basis of $105 and $110 respectively, you now provide for them on the basis of $100. You can't have an escrow if you don't do that.

So it seems to me that your Honor should grant the motion which Engineers has made, and in the event that it should be granted, it is so obvious that we have opposition to the payment of these additional amounts, that I would like to say now formally as counsel for Engineers, pursuant to the terms and provisions of the order of amendment that Engineers has made a determination that it appears likely that some holder or holders of Engineers' common stock will litigate beyond the District Court the payment to Engineers' preferred stockholders of any amount in addition to $100 per share and accrued dividends; and Engineers accordingly desires to follow the alternate method of effectuating the plan through the use of the escrow and the other incidental changes in the program which the escrow enforces.

I thank you.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Mr. Slater: Your Hono , may I have a moment to clear up——

The Court: I don't want to hear any more argument.

Mr. Berman: I am somewhat baffled about one aspect of the situation as it now stands. I certainly share in Mr. Tucker's views that the parties ought to cooperate here to segregate out the controversial and non-controversial aspects of this proceeding, and I thought this escrow arrangement was going to do it in that it would, in effect, establish two funds: one for $100 plus accrued dividends and the other for this $4,000,000, which is premiums plus interest on the premiums if the preferred is entitled to them.

So that if your Honor were to accept the view which we have contended for here that the preferred stockholders are not entitled to premiums, I was of the opinion that the first portion of the plan would nevertheless be approved and carried out, the non-controversial portion. The $4,000,000 would still be in escrow so that the preferred stockholders and/or the Commission, if they saw fit to appeal could do so, and ultimately we would have a final determination.

On the other hand, if your Honor were to reject our contentions and approve the payment of the premiums, then we of course or any other common stockholders would have the right to appeal and the escrow fund would contain that money.

But as I understood Mr. Tucker, the escrow fund would apply only to the second contingency; namely, that in the event your H nor approved the payment of the premium and we appeal, then there will be an escrow.

I certainly hope I misunderstood. Actually, in effect, there will be a fund so that your Honor, even if he accepts our point of view, can approve the first portion of the program and it can go through; and then either party can appeal as to the other side.

Transcript of Hearing on Plan Held February 17, 1947 (Cont'd)

Mr. Tucker: If I may just say to the Court I think perhaps I did mislead my brother. The escrow, so far as we are concerned, is an irrevocable escrow. We deposit $4,000,000. If there shall be no appeal from the finding of this Court that the plan is fair and equitable, if that shall be its finding, then the money is to be paid forthwith. If there is an appeal, then the premiums are to be paid if on final determination the premiums are determined to be payable. On the other hand, under paragraph 3, if some lesser amount shall be determined to be payable, that shall be paid out of the escrow; and it is only on the condition that no escrow is to be paid that the money comes back to the Engineers.

Mr. Berman: If I am correct, Mr. Tucker, in my understanding of what you now said, is it not the fact, then, that Judge Leahy must disapprove the whole plan if he finds the premiums are not payable? He could approve the plan so far as it provides for the immediate payment of the $100 and disapprove the payment of the premiums, that amount then remaining in escrow subject to the right of the preferred stockholders to appeal. Is that correct?

Mr. Tucker: No, I don't think so. I think I am dealing here with a question that I am sure Judge Leahy is much more capable of answering than I am. I conceive the power of the Court to be merely to approve or disapprove a plan of the Commission. I take it that under the provisions of Section 11(e) this Court has no authority to amend the plan in the sense that it changes the basic principle applied in the plan. I think the plan as filed and in order to provide this escrow must be either approved or disapproved by this Court and it has no other authority. Then I take it if this Court shall disapprove the plan the whole matter goes back to the Commission for consideration of the basis of the disapproval and for presentation by the company of another voluntary plan consistent with the provisions of the Court's finding. But I take it that under Section 11(e) no plan can

be presented which does not have the approval of the company. It is a voluntary plan.

I think if the plan is disapproved it goes back to the Commission, and the Commission has to and the company itself has to rearrange the plan and again submit something to the Court after we have agreed on a plan that has been approved by the Commission. That is my position.

Mr. Slater: If your Honor please, I hesitate to do so, but we must disagree with the statement just made by Mr. Tucker. As we view this escrow, it is a two-way escrow. The Commission or the preferred stockholders might appeal in the event that this Court should determine only one hundred dollars is payable. The common stockholders have indicated they would appeal if the Court agreed with the determination of the Commission. But certainly the reorganization process and equity powers of this Court can't be so inflexible that this Court can't by appropriate order approve those portions of a plan which are clearly separable and in no way impinge on the controverted portions of a plan. That is all we are doing in handing up this escrow agreement. We are telling the Court now that in connection with the order of consummation or the order of approval or the order of disapproval as to certain aspects and approval of other aspects which your Honor might enter, take into account this provision for an escrow, and after we know what the Court determination is, one side or the other will then present an appropriate form of order which will make provision for the escrow. It is just silly to upset ten-elevenths of this plan, at least that, if not ninety-nine-one hundredths, simply because there is a disagreement as to a segregated small portion in relation to the whole of what we are doing here.

Procedurally Mr. Zazove, it seems to me, is very much confused. What the Commission issued by way of amendment has nothing to do with what we are doing here. We could vacate that order tomorrow. The sole consequence would be that Engineers today would not be assured of tax

relief under Supplement R. Of what avail that would be to Mr. Zazove or the preferred stockholders I don't know. The Commission could reinstate the order a month or two months or three years from now, and perhaps Engineers would get the benefit of the tax relief then; but if we had not issued that order we would be here today asking your Honor to consider with counsel, as the Commission told these stockholders might happen, a fair and equitable way of consummating what everybody wants consummated and yet preserving for future litigation the rights of all the interested parties.

The Court: There was some mention made of briefs.

Mr. Boehm: I would like to file a brief, and I would ask about a week's time within which to submit it.

Mr. Slater: Two weeks for us, if your Honor please.

Mr. Zazove: We should like the same, your Honor.

Mr. Berman: I have already filed a brief. Most of the parties have had copies of it. In a sense, therefore, I think they will be replying to my brief, and I ask your Honor that I have five days after they serve their brief on me to answer.

The Court: Make it a week.

Mr. Berman: Thank you.

Mr. Boehm: May I make just one observation in connection with something that my friend Mr. Berman had said that I did not agree with myself.

The Court: Why don't you make it in a footnote in your memorandum?

Mr. Boehm: Thank you, your Honor.

(At this point the hearing was concluded.)

I hereby certify that the foregoing is a true and accurate transcript from my stenographic notes in this proceeding.

Opinion Re Plan (Cont'd)

A preliminary statement of the facts show Engineers Public Service Company has no debt. Its stock structure consists of 143,951 shares of preferred $5 cumulative dividend convertible; 183,406 shares of preferred $5.50 cumulative dividend; 65,098 shares of preferred $6 cumulative; and 1,909,968 shares of $1 par common. All three series of preferred have a stated value of $100 per share. In the event of involuntary liquidation the preferred stocks are entitled to receive $100 per share plus accrued dividends. On redemption or voluntary liquidation the $5 preferred is entitled to $105 per share and the $5.50 and $6 are entitled to $110 per share, plus accrued dividends for both series.

The Securities and Exchange Commission found that Engineers' holdings were in violation of the Public Utility Holding Company Act of 1935 (15 U. S. C. A. §79 *et seq.*) In the Matter of Engineers Public Service Co., 9 S. E. C. 764; 10 S. E. C. 904. Orders for compliance were issued; *ibid.*, 12 S. E. C. 41 and 268; which directed disposal of all companies except Virginia Electric and Power Company or Gulf States Utility Company with fifteen days to choose whether Virginia or Gulf should remain as the principal system; and if Engineers failed to make a choice, Virginia was to be designated. Review proceedings were taken and the court sustained portions of the orders and reversed on others. Engineers Public Service Co. *v.* S. E. C., 138 F. 2d 936. Certiorari was granted. *Ibid.*, 322 U. S. 723. The matter is awaiting reargument in the Supreme Court.

A description of Engineers Public Service Company and its holding company system may be found in 12 S. E. C. 41 and at 268, Holding Company Act Releases Nos. 7041, 7119 and 7190. There will be no extended discussion of background.

---

* The charter provisions with which we are concerned provide:

"III. Preference on liquidation, etc. In the event of liquidation, dissolution or winding up of this Corporation, or any reduction of its capital stock, resulting in any distribution of its assets to its stockholders, the holders of the preferred stock of each series shall be entitled to receive, for each share thereof, an amount equal to $100, together with all divi-

Opinion Re Plan (Cont'd)

The plan before the court provides:

1. Engineers will dispose of Gulf States by issuing warrants to its common stockholders entitling them to purchase one share of Gulf States common for each share of Engineers' common at a subscription rate of $11.50 per share which will be payable in cash or by exchanging shares of Engineers' preferred which any common stockholder might have.

2. From treasury and other cash and the proceeds from the Gulf States warrants, Engineers will retire its outstanding preferred stock by payment of $105 plus accrued dividends on the $5 preferred, and $110 per share plus accrued dividends for each share of the $5.50 and $6 preferred.

3. Engineers will dissolve.

4. Engineers will distribute as a partial liquidating dividend its holdings of the common stock of El Paso Electric Company to Engineers common stockholders.

5. A like distribution of all but 5.4% of the common stock of Virginia (99.8%) to Engineers common stockholders. The undistributed balance—estimated value $3,600,000—in trust to be used in winding up Engineers' affairs. Any balance finally left to go to Engineers' common stockholders.

6. EPSCO, Inc., a mutual service company, will cancel its service contracts and dissolve.

---

dends accrued or in arrears thereon, plus, in case such liquidation, dissolution or winding up or reduction shall have been voluntary, the fixed redemption premium for such series, if any, before any distribution of its assets shall be made to the holders of the common stock; but the holders of the preferred stock shall be entitled to no further participation in such distribution. * * * A consolidation or merger of this Corporation with any other corporation or corporations shall not be regarded as a liquidation, dissolution or winding up of this Corporation within the meaning of this Paragraph III, provided such consolidation or merger does not substantially impair the rights and preferences of the preferred stock."

Opinion Re Plan (Cont'd)

By amendatory proceedings believed necessary to satisfy certain tax problems, in the event litigation arose over the fairness of treatment to the preferred stocks under the plan, an escrow was established for the amounts in dispute. The necessity or appropriateness of the plan has not been questioned. There are two main objections.

Objections

1. A group of common stockholders claim unfairness if any amount in excess of the involuntary liquidation price of $100, plus accrued dividends, as specified in the charter, is paid to the preferred stocks.

2. A group of preferred stockholders object to the escrow for the difference between the amount payable under the plan and the involuntary liquidation price. By the terms of the escrow all three series of preferred would receive $100 per share plus accrued dividends; further dividends would cease; and the uncontested portions of the plan may move forward.

(In original opinion names of counsel appear here)

LEAHY, District Judge

/s/ Leahy

A § 11(e) court has the affirmative and independent duty to consider and find whether a proposed plan, which has been approved by the Securities and Exchange Commission, is fair and equitable. In the Matter of Interstate Power Company, D. C. Del., ... F. Supp. ..... The first question is whether the various series of preferreds are entitled to amounts in excess of $100 per share plus accrued and unpaid dividends. When a company is subject to the Act, the quantum of participation of the various

security holders is determined by the application of fair and equitable standards to particular fact situations. In re United Light & Power Co., D. C. Del., 51 F. Supp. 217; In re Consolidated Electric & Gas Co., D. C. Del., 55 F. Supp. 211; In the Matter of Community Gas and Power Company, D. C. Del. ..... F. Supp. .....; In the Matter of Interstate Power Company, D. C. Del., ... F. Supp. ..... The application of those principles convinces me that to pay the premium here would result in a failure to satisfy those standards by a wide margin.

Certain common stockholders argue that this plan involves a true liquidation as distinguished from the fictitious liquidation involved In re United Light & Power Co., D. C. Del., 51 F. Supp. 217, aff'd 3 Cir., 142 F. 2d 413, aff'd sub. nom. Otis & Co. *v.* Securities and Exchange Commission, 323 U. S. 624, and that consequently the stock rights of the various security holders are not to be treated as though in a continuing enterprise. Since this is a true liquidation, the parties argue, the charter provisions do apply and therefore the preferreds are not entitled to a premium. The charter in this case provides that the preferreds shall be entitled to a premium only in the event that the winding up is voluntary; and this and other courts have held that where a company must change its capital structure because of the impact of the Act, the winding up or reorganization is not voluntary.[1] See in re Consolidated Electric & Gas Co., D. C. Del., 55 F. Supp. 211; In re North Continent Utilities Corp., D. C., Del., 54 F. Supp. 527; City National Bank & Trust Co. of Chicago *v.* S. E. C. and North

---

[1] It is interesting to note that in the Matter of Consolidated Electric & Gas Co., *supra*, the Commission argued that a liquidation made necessary by the impact of the Act is not voluntary. See page 3 of the memorandum of the Commission, where it said: "* * * and (2) that the present proposal for the retirement of Federated bonds is not the voluntary act of Consolidated but is the result of the impact of Section 11 of the Act." Now independently of the previous argument of the Commission and the prior holdings on the matter, it seems obvious that a plan, whether submitted by the company or the Commission, is not a voluntary plan. Congress has ordained certain action and when the company takes such action it can be said to be voluntary only in a Pickwickian sense.

American Light & Power Co., 7 Cir., 134 F. 2d 65; New York Trust Co., et al. *v.* S. E. C., 2 Cir., 131 F. 2d 274. This is ingenious argument and, if accepted, would of course be dispositive of the holding that payment of the premiums would not be fair and equitable. I prefer not to definitely decide this particular point but to consider the charter provisions of the company as but one of several factors in determining the relative rights of the various security holders.[2] In most of the cases which have arisen involving the payment of premiums, In re United Light & Power Co., D. C. Del., 51 F. Supp. 217; In re North Continent Utilities Corp., D. C. Del., 54 F. Supp. 527; In re Consolidated Electric & Gas Co., D. C. Del., 55 F. Supp. 211; In re Standard Gas & Electric Co., D. C. Del., 59 F. Supp. 274, the charter has called for the payment of premiums in cases of liquidation and redemption, but notwithstanding this fact both the SEC[3] and the courts have held that under the particular fact situations the payment of premiums was not warranted on considerations of all the facts involved. As stated, the charter provisions, then, are but one circumstance looking toward non-payment of premiums.

---

[2] Although I have an entirely open mind on the question, my present thought is that the rule of Otis & Co., applies also to a situation in which there is a true liquidation rather than a nominal or formal liquidation mainly because this is not a change in corporate form contemplated by the charter. But counsel argue forcefully that Otis & Co. by its stress that the court was there concerned with a continuing enterprise impliedly holds that a different result would obtain in a true liquidation. I think that perhaps Otis & Co. was not intended to go that far. When a novel question is before a court, it frequently grabs any and all reasons in support of its conclusion. It does not follow, however, that any one of those facts is the *sine qua non* for the decision.

It is, of course, true that once the charter is not accepted as controlling, there is no reason why 100 is the necessary figure for a senior security holder to receive. It may be more or it may be less. But, in this case, after consideration of all factors involved, I conclude that $100 would be fair and equitable, but that the payment of premiums would not be fair and equitable.

Moreover, there is respectable opinion that a contractual obligation may be overriden in any case where necessary to achieve an otherwise constitutional purpose. Norman *v.* Baltimore & Ohio Railroad, 294 U. S. 240 (Gold Clause Case).

[3] The Commission has taken the position that ordinarily, but not necessarily, the redemption price should fix the ceiling as to the amount which a preferred or debenture may receive.

Opinion Re Plan (Cont'd)

The facts in this case indicate that the issuing price and market history also look toward non-payment of the premium. None of the three series of preferred stocks was initially sold to the public for more than $100 per share. In order to sell the preferreds at these prices it was deemed expedient to attach a "convertible" feature to the $5 series and warrants to the $5.50 series. It is unnecessary to consider what the value of these privileges was; it is sufficient that even with these privileges the stock did not command a premium. Moreover, there is no showing that the company received the amounts which the public paid for the various issues of preferred. There must have been various underwriting fees and the underwriting spreads in vogue at the time were quite large. When the inquiry is as to the relative rights of the preferreds vis-a-vis the common, the important consideration is not what the preferred security holders paid, but how much the company received for their stock. Since it is practically certain, then, that the company did not receive as much as $98 per share for any of the three series of preferreds and since none of the three series was initially sold to the public for more than $100 per share, clearly, with respect to this factor, there is no consideration of colloquial equity why the preferreds should be paid a premium.

The market history ex the conversion and warrant privileges has shown an average price much below $100 per share. The importance of the conversion and warrant features is demonstrated, for example, by the lower average price of the $6 preferred since issue than the other two series of preferreds. Another circumstance to be considered, although not strictly one of market history, is that dividends were omitted from preferreds from July 1, 1933 to July 31, 1936, but such arrearages which accumulated in this period were paid off in 1936 and 1937. The market history accordingly not only fails to support the preferred's claim to a premium, but affords affirmative support to the non-payment of the premium.

The preferreds[4] argue for a different conclusion largely on the basis of uncontradicted expert testimony of Dr. R. A. Badger, i.e., on the basis of items "all charges and preferred dividends earned", "proportion of prior obligations to total capitalization", "book value of equity per share of preferred", "percent of quick net assets to prior obligations" and "times parent company dividends were earned", a present value for these preferreds substantially in excess of the charter liquidating preferences would be indicated. I accept Dr. Badger's values and, in the absence of a showing of changed circumstances, I shall assume that those values are applicable at the present time. It must be conceded, however, that these values are not controlling because the plan itself does not propose to give these amounts to the preferreds. Further, it is unnecessary to decide whether these values would more than offset the other factors previously considered and consequently justify the payment of a premium, for in this case this factor is neutralized and rendered impotent by several other considerations. What the plan overlooks is that this is not a one-way argument but a two-way argument. The necessity and impact of the plan which makes the preferreds give up this present enhanced value also works to the detriment of the common. In order to comply with the divestment orders, many of the assets of Engineers were sold for less than the carrying value on Engineers' books, and many of such securities thus disposed of subsequently increased in market value or capitalized earning power greatly in excess of the amounts realized by Engineers upon their sale. In short, the forced divestment orders have worked a hardship on both the common as well as the preferred stocks.

[4] It is interesting to note that the Commission not only did not recognize "present investment value" as the appropriate standard for measuring the rights of Engineers' preferred stocks, but actually *prohibited* Engineers from liquidating 35,000 shares of such stock at a time when the market appraised their "present investment value" at $61–$74 per share, and despite the fact that Engineers' charter granted it the unqualified right to make such repurchases so long as the price paid was *less* than the redemption price.

Moreover, and what is probably more important, a significant reason why the present preferreds are able to be evaluated at more than their redemption prices is because of retained earnings over a period of years not paid as dividends to the common stockholders. The past sacrifices and contributions of the common[5] contributed significantly to the present value of the preferreds.

The preferred stockholders will receive every dollar which the common contracted to pay them, with the result that the preferred will have gotten back approximately $190 for every $100 which they, or their predecessors, initially invested in the enterprise. But fairness and equity do not require that the preferred stockholders be paid an additional $3,200,000 for the theoretical future deprivation of their present excessive dividend rate, for in each case the inquiry is one of relative rights based on colloquial equity. In short, there is no reason why the preferreds should get additional compensation for the termination of the lucrative dividend rate which the preferreds have received, when this termination results wholly and directly from frustration of the enterprise by governmental edict. The argument for payment of the premium is comparable to dealing cards off the top of a deck. When full hands (based on theoretical "investment value") have been dealt to all the senior security holders, the common would merely get whatever happens to remain. Under the Act the interest of all investors must be considered. An emphasis on a preferred's rights must not slight the interests of a common stockholder. For if this occurs this is the direct opposite of the arguments utilized in United Light & Power, D. C. Del., 51 F. Supp. 217, aff'd 3 Cir., 142 F. 2d 413, aff'd sub. nom. Otis & Co. v. Securities and Exchange Commission, 323 U. S. 624, where participation was accorded the various security holders in accordance with the standard of colloquial equity.

[5] "The impact of the Otis decision was that the security device of preferred shareholders should not result in a windfall to preferred at the expense of common in a situation where Congress had prescribed that surgery be applied but with as little shock to investors as possible." 59 Har. L. Rev. 1159.

Opinion Re Plan (Cont'd)

I do not consider the argument advanced as to what these series of preferreds would be worth if there were no Public Utility Holding Company Act. I do not think it profitable to consider an argument based on unreality *for there is a Public Utility Holding Company Act.* Unless one subscribes completely to the doctrine of foreordination, things might always be different from what they are.

Not only, therefore, is there no reason on the basis of fairness and equity why the preferreds should get their redemption feature, but also there are numerous and satisfactory reasons, discussed above, why the payment of the premium should be denied. In the cases of In re United Light & Power Co., In re North Continent Utilities Corp., In re Consolidated Electric & Gas Co., *supra*, and especially in In re Standard Gas & Electric Co., D. C. Del., 59 F. Supp 274, refusal to pay the premium was upheld as being fair and equitable. I am not unmindful of the rule that there may be more than one fair and equitable plan; and because the premium payment was refused in one case does not necessarily mean that the payment of that premium in the particular case would have been held unfair;[6] but in view of all the factors which have usually been considered in these cases, I conclude that because of the provision for payment of premium, the plan does not meet the requirements of fairness and equity.

With the exception of the payment of redemption premiums, the plan is approved including the Escrow Agreement. The arguments which contend that the Escrow Agreement is not fair to the preferred stockholders have been considered, but I think they have no merit.

A form of order may be submitted.

[6] But see In re Standard Gas & Electric Co., 3 Cir., 151 F. 2d 326, where the court indicated affirmatively that the premium should not be paid in these cases. It said: "All the debenture holders appearing before us insist that if the debentures are to be liquidated the holders are entitled to the call premiums specified in the contract between the company and the holders thereof. Neither the Commission nor the District Court agreed with the view and we do not either. There is good authority supporting the position that retirement of the obligation under these circumstances is not the kind of voluntary calling by the company which brings the terms into operation. * * *

"The debenture holders obliquely attack the holdings of these decisions and say in addition that they present a different problem from the one in this case. We think the decisions are right and that the reasons they give are applicable."

Dated: May 15, 1947

Findings of Fact and Conclusions of Law.

IN THE

DISTRICT COURT OF THE UNITED STATES,

FOR THE DISTRICT OF DELAWARE.

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY.	A Proceeding to Enforce a Plan Pursuant to Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935. Civil Action No. 995.

Findings of Fact and Conclusions of Law With Respect to Proposed Payments to Preferred Stockholders of Amounts in Excess of $100 per Share and Accrued Dividends.

(Filed May 29, 1947.)

The Court having on May 15, 1947 filed its Opinion in these proceedings finding fair and equitable and appropriate to effectuate the provisions of Section 11 of the Public Utility Act of 1935 the proposed plan, as amended, of Engineers Public Service Company pursuant to Section 11(e) of said Act, in all respects except with respect to the proposed payment to the preferred stockholders of amounts in excess of $100 per share plus accrued dividends (such excess amounts being hereinafter sometimes termed "premium"), which proposed premiums the Court found to be not fair and equitable; and the Court by Order to be entered simultaneously with the making and filing of these findings, having adopted the Findings and Opinion of the Securities and Exchange Commission dated December 5, 1946 and January 8, 1947 as its findings of fact and conclusions of law except insofar as such findings and conclusions of the Commission relate to or bear upon the payments of the

premiums or are inconsistent with the Opinion dated May 15, 1947 or with the findings and conclusions of law filed with said Order;

The Court now makes and enters the findings of fact and conclusions of law set forth below:

FINDINGS OF FACT.

1. This Court has jurisdiction of this proceeding by virtue of the provisions of Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935.

2. All persons whose rights are affected by the amended plan have had due notice and opportunity for hearing as provided by law.

Background.

3. Engineers Public Service Company (hereinafter referred to as "Engineers") is a corporation organized under the laws of Delaware on or about June 23, 1925, and is registered with the Securities and Exchange Commission (hereinafter referred to as "the Commission") as a registered public utility holding company under the Public Utility Holding Company Act of 1935 (hereinafter referred to as "the Act").

4. From its inception, Engineers functioned as a holding company, and not as a mere investment company. Primary emphasis was placed on exercising centralized control of its operating company subsidiaries, and on obtaining the advantages of broad geographic and economic diversity. The published report of Engineers for 1926 (the first full year of operations) stated these purposes as follows:

> "Your Company is a public utility holding company. Its purposes are twofold: first, as to the public served, to improve and develop the service in the territories occupied by its subsidiaries; and second,

as to the investing public, to offer the opportunity, through purchases of its securities, to participate in an investment which, through *diversification*, has greater stability than the same investment in a single property. *Common control* through a holding company makes possible the raising of new capital in adequate amounts when needed for the development of the public service, and through breadth of view and experience, makes for sound engineering and economical operation and the bringing of good service to many communities which without the holding company's backing would have inferior service." (Emphasis added.)

Substantially the same statement of purposes appears in each of the published annual reports of the Company through the year 1932.

5. Centralized control was achieved not only through selection of the local managements of the operating companies, but through centralized "servicing" arrangements. Initially, these services were rendered by Stone & Webster, Inc., but in 1930 Engineers formed its own central service company (presently called "Epsco"), the stock of which was owned by the various operating companies, and which thereafter rendered all services to the operating companies on a mutual basis and at cost.

6. Economic and geographic diversification were achieved by acquiring control of operating companies in various sections of the country. At the time the Act was passed, Engineers controlled more than 15 electric, gas and other utility companies operating in approximately 15 diverse States throughout the United States. In addition, there were comparatively minor operations in Mexico, Canada and Porto Rico.

Findings of Fact and Conclusions of Law (Cont'd)

7. The Commission found that the widely scattered holding company system of Engineers violated Section 11(b)(1) of the Act, and in a series of Orders directed Engineers to dispose of all its subsidiaries except Virginia Electric and Power Company, or alternatively Gulf States Utilities Company; and if Engineers failed to make a choice within 15 days, Virginia was to be designated as the retained system. One of the Commission's Orders was appealed by the Company to the Circuit Court of Appeals, which sustained portions of the Order and reversed on others. The Supreme Court granted certiorari and heard argument, but after the death of the former Chief Justice ordered reargument, which has not been heard.

8. In compliance with the various divestment Orders of the Commission, Engineers had disposed over the past eight years of the ownership of stock in all of its subsidiaries except three: Virginia Electric and Power Company, Gulf States Utilities Company and El Paso Electric Company. A contract had been entered into by Engineers in 1943 for the sale of El Paso Electric Company to the City of El Paso, but the sale was not completed due to the inability of the City to obtain requisite voter approval.

9. Although the Commission did not actually institute proceedings against Engineers under Section 11(b)(2) of the Act, it formally admonished Engineers that the Company must take action to file a comprehensive plan under Section 11(e) designed not merely to comply with its Section 11(b)(1) divestment Orders, but also to comply with the requirements of Section 11(b)(2) by readjusting the capital structure of Engineers to meet the drastically reduced scope of its operations resulting from the 11(b)(1) Orders.

10. The dissolution of Engineers embodied in its Section 11(e) plan (which, as amended, is the subject of the

present proceeding) was proposed by Engineers in order to comply with the requirements of both Sections 11(b)(1) and 11(b)(2) of the Act. The continued existence of Engineers as a holding company over the single operating company subsidiary allowed it under the Commission's 11(b)(1) Order would be devoid of function or purpose, as well as uneconomical, and would therefore violate Section 11(b)(2). In its Findings and Opinion of December 5, 1946 the Commission stated: "We find that the presence of Engineers would unduly complicate the structure of the system and that it would, therefore, come within the prohibition of Section 11(b)(2). Accordingly, we find that the proposal to dissolve Engineers is 'necessary' to effectuate the provisions of Section 11(b) of the Act." This finding fully accords with the Commission's decisions in the American Power & Light and Electric Power & Light cases, recently affirmed by the Supreme Court, 329 U. S. 90.

11. In its Findings and Opinion of December 5, 1946 the Commission refused to approve a provision of Engineers' plan as initially proposed, which would have established a trusteeship for a period of 3 years to hold the common stock of one of its remaining three subsidiaries, Virginia Electric & Power Company, on the ground that such provision would "continue the holding company in another form", in contravention of the Commission's finding that dissolution of the holding company is required by Section 11. In compliance with the Commission's holding, the plan was thereafter amended to eliminate this aforementioned trusteeship provision of the plan and to provide for the prompt distribution of all the remaining assets.

12. Under Engineers' Section 11(e) plan, all the outstanding preferred stocks will be retired; the common stock of Gulf States Utilities Company, one of Engineers' three remaining subsidiaries, will be sold through the issuance of "rights" to the common stockholders of Engineers for

$22,000,000 (which will be used together with treasury cash in the retirement of the preferred stocks); the common stocks of Engineers' other two subsidiaries (Virginia and El Paso Electric) will be distributed as a liquidating dividend to the common stockholders of Engineers; Engineers itself and the mutual service company, Epsco, will be dissolved.

13. Since Engineers has no subholding companies (such as were present in the case of United Light & Power Company) the liquidation and dissolution of Engineers will effect the liquidation and dissolution of the entire holding company system of Engineers. Upon consummation of the plan, the holding company enterprise of Engineers will be completely terminated.

14. There are more than 13,000 common stockholders of Engineers, all of whom will participate ratably in the distribution of Engineers' remaining assets, including the stocks of the operating companies. The concentrated control of the holding company will be completely dissipated, and the three operating companies will thus become wholly independent and unrelated, and will be unconnected with one another either physically, by effective common control, or otherwise.

15. The holding company system of Engineers, as well as Engineers as a corporate entity, have been frustrated by the provisions of the Act and the Orders issued thereunder. The proposed liquidation and dissolution embodied in the plan, and the retirement of the preferred stocks therein provided, are directly and wholly the consequence of such frustration.

16. Engineers' plan as initially submitted to the Commission proposed that the preferred stocks would be retired by cash payment of $100 per share plus accrued divi-

dends. In the hearings before the Commission the Company contended that the proposed payment was fair and equitable to the preferred stockholders, and payment of any greater amount would be unfair and inequitable to the common stockholders. Preferred stockholders contended they should receive a greater amount approximately equivalent to the call prices of the respective preferred stocks. The Commission in its Findings and Opinion of December 5, 1946 found that the preferred stocks have an "investment value" at least equal to the respective call prices of such preferred stocks, and stated that it would not approve the plan unless it were amended to provide for the payment to the preferred stockholders of an amount equal to the call prices plus accrued dividends. The Company thereafter amended the plan to provide for such call prices. Over the objections of two groups of common stockholders, the Commission approved the amended plan and applied to this Court for approval and enforcement. The Commission gave its advance approval to any arrangement that might be made in the District Court to establish an escrow fund for the premium payments, and to permit the main body of the plan to be consummated pending final litigation of the premium question.

Charter Provisions

17. The Certificate of Incorporation of Engineers provides that in the event of "liquidation, dissolution or winding up" of the corporation the holders of the preferred stock of each series shall be entitled to receive an amount equal to $100 per share, together with all dividends accrued or in arrears thereon before any distribution of assets is made to the holders of the common stock. The charter also provides that in case such liquidation, dissolution or winding up shall have been *voluntary*, the preferred stockholders should further be entitled to receive "the fixed redemption premium for such series, if any." The fixed redemption

premium is $5 for the $5 Cumulative Dividend Convertible Preferred, and $10 for the $5.50 and $6 Cumulative Dividend Preferred Stocks. There are not now, and for many years have not been, any dividends in arrears on any of the preferred stocks.

18. The Certificate of Incorporation makes identical provision with that stated in the preceding paragraph, for payments to the preferred stockholders in the event of "*any reduction of its capital stock,* resulting in any distribution of its assets to its stockholders."

19. The Certificate of Incorporation also provides (i) that the corporation may, at its option at any time redeem the whole or any part of the preferred stock or any series thereof, at a price for each share equal to $100 plus the fixed redemption premium therefor, if any, together with the amount of any dividends accrued or in arrears thereon; (ii) that the corporation may also, from time to time, repurchase shares of its preferred stock at *not exceeding* the price or prices at which the same may be redeemed.

20. Engineers has not called and redeemed, and does not propose to call and redeem, its preferred stocks. The payment proposed to be made to the preferred stockholders in the Engineers' plan are *not* payments incident to, or by reason of, a voluntary "liquidation, dissolution or winding up" of the corporation, or a voluntary "reduction of its capital stock".

21. The liquidation and dissolution of Engineers proposed in the plan, and the retirement of the preferred stocks, are incidents to and result from the mandatory provisions of Section 11 of the Act and the Commission's Orders issued thereunder, which have resulted in governmental frustration of the Engineers enterprise.

Findings of Fact and Conclusions of Law (Cont'd)

Issuance and Sale of the Preferred Stocks and Market History thereof.

22. The $5 Cumulative Dividend Convertible Preferred Stock was sold to the public by underwriters in March 1928 at $100 per share; it carried the privilege of conversion into common (at the option of the holder any time up to and including June 30, 1938) on the basis of 15 shares of common for each 10 shares of such preferred. The Company actually received only $95 per share for this stock. A substantial amount of this preferred stock was thereafter converted by the holders into common stock, at an average cost of approximately $52 per share of common.

The $5.50 Cumulative Preferred Stock was issued in October 1928, and sold to the public in part by underwriters at $99.50 per share; the remaining portion was issued to holders of junior preferred and common stock of Puget Sound Power & Light Company in exchange for their stock as a result of which Engineers obtained control of that company. Each $5.50 preferred share was issued with a warrant entitling the holder at any time between November 1, 1929 and November 1, 1938 to purchase the share of common stock at $68 per share.

The $6 Cumulative Preferred Stock was sold by underwriters to the public in September 1930 at $100 per share.

23. Until 1928 Engineers carried the preferred stocks on its balance sheet and in its preferred stock account at the aggregate amount actually received by it for such stocks, which was substantially less than $100 per share. In 1938 it transferred to preferred stock account $1,925,767, representing the difference between $100 per share and the aggregate consideration actually received therefor, indicating an average discount of approximately $4.00 for each share of preferred stock outstanding. Since 1938, all shares of preferred have been carried on Engineers' balance sheet and capital stock account at $100 per share.

Findings of Fact and Conclusions of Law (Cont'd)

24. The market history of the three series of preferred stocks may be summarized as follows: The $5 series reached a high of $123 in 1929 and a low of $10⅛ in 1935; its average price with the conversion privilege was $60.94, and since the expiration of that privilege $80.50; its overall average since issuance was $67.16.

The $5.50 series reached a high of $109 in 1929, and a low of $11 in 1933 and 1934; its average over the period that its warrant right existed was $53.98, and since the expiration of the warrants $85.23; its overall average since issuance is $64.54.

The $6 preferred reached its highest market of $109 in 1945, and sold at a low of $12 in 1933; its overall average since issuance is $62.77.

As of February 13, 1946, the $5 series was selling at $105⅛, the $5.50 series at $105¾ and the $6 series at $109. The comparable prices on February 17, 1947, the date of the hearing before this Court, were $104½, $108¼, and $109½, respectively.

25. The market prices of the preferred stocks in the earlier years must be considered in the light of the warrants and conversion features operative in that period, and in the light of the fact that Engineers common sold as high as $79⅝ per share in 1929. The market prices in recent years must be considered in the light of the extensive market purchases made by Engineers, referred to below, and other extrinsic factors such as the Commission's American Power & Light debenture decision (Holding Company Act Release No. 6176) wherein premiums were awarded senior security holders for the first time.

26. Dividends have always been regularly maintained on all three issues of preferred stocks since their issuance, except during the period from July 1, 1933 to July 31, 1936. The arrearages which accumulated in this period were paid off in 1936 and 1937. As of December 31, 1946, the follow-

ing aggregate amount of dividends had been paid by Engineers on the preferred stocks; $5 series, $86.25 per share; $5.50 series, $93.50 per share; $6 series, $90 per share.

Market Purchases by Engineers of Preferred Stocks and Commission's Restrictions With Respect Thereto.

27. In 1939 and 1941 Engineers, with the authorization of the Commission, utilized a portion of the funds realized by it from the sale of various of its assets pursuant to the Commission's divestment Orders to make purchases in the open market (after giving notice to all security holders) of approximately 12,000 shares of the various series of preferred stocks. These purchases were made at prices ranging from $69 to $87¾ per share. However, in 1943, the Commission refused to permit Engineers to make contemplated purchases of approximately 35,000 additional shares of preferred stock at a time when the preferred stocks were selling at $61-$74 per share, notwithstanding the provisions of Engineers' charter giving it the unqualified right to make such repurchases so long as the prices paid were *less* than the redemption prices. The reason stated by the Commission for its refusal was the necessity for Engineers to file "a comprehensive plan" designed to satisfy the requirements of Sections 11(b)(1) and 11(b)(2) of the Act. In a special concurring opinion, one of the Commissioners pointed out that the company was required to effect a partial liquidation compelled by the Act, and that consequently a reduction of capital was taking place within the intendment of the charter provision for involuntary reduction of capital. It was clearly inferred that the preferred stockholders were entitled to the amount specified in the charter with respect to involuntary liquidation or reduction of capital, namely, $100 per share plus accrued dividends. However, the principal Commission opinion warned that preferred stockholders who elected to hold their stock might not

actually realize ultimately as much as $100 per share, stating:

> "Of course, the treatment to be accorded to the preferred stocks under a comprehensive plan depends upon the conditions existing at the time such plan is approved. The mere fact that the holders of shares of preferred stock are entitled to a preference of $100 a share on *involuntary liquidation* does not mean that they will actually realize that amount if they elect to retain their holdings. . . ." (Emphasis added.)

28. In 1944, at a time when the preferred stocks were selling in the 90s, the Commission granted to Engineers authorization to utilize $4,000,000 in the purchase of preferred stocks at prices not exceeding $100 per share, stating:

> "As noted above, the current market prices of the three series of preferred stocks which Engineers now proposes to reacquire are close to the *involuntary liquidation prices.* And under the circumstances we are satisfied that the proposed reacquisition is not unfair to the security holders of Engineers." (Emphasis added.)

Pursuant to this authorization Engineers purchased 25,560 shares of the various series of preferred stocks at an average price of $99. It did not make additional purchases because the prices of the stocks advanced above $100 per share in the course of this concentrated purchasing.

29. The market purchases of preferred stocks which were actually made benefited not only the common stockholders but also the remaining preferred stockholders, since the retirement of a substantial number of shares of preferred at less than $100 per share served to strengthen and enhance the position of the remaining shares. The substantial purchases made by Engineers necessarily furnished

support to the market prices of Engineers preferred, and enabled those preferred stockholders who elected to sell to obtain higher prices than might otherwise have prevailed.

Market and Dividend History of the Common Stock

30. There are 1,909,968 shares of Engineers' common stock outstanding, owned by more than 13,000 common stockholders. These shares were all issued during the years 1925 to 1930, inclusive, except for several hundred shares issued subsequent to 1930 in conversion of scrip. The aggregate consideration received for such shares as shown by the Company's books was $58,059,512.85, or an average of $30.40 per share. In 1936, the common stock was changed from no par to $1 per value, and written down to the sum of $1,909,968, at which amount it is presently carried.

31. The common stock sold at a high of $79⅝ in 1929 and a low of $1⅛ in 1935. On February 13, 1946 the common was selling at $36; on February 17, 1947, the date of the hearing before this Court, at $32½ per share; on May 14, 1947, the day before the issuance of the Court's opinion herein, at $25⅞.

32. In 1928-1930, inclusive, 294,880 shares of common stock were issued to holders of $5 preferred stock who exercised their conversion privilege at an estimated average cost of $52.16 per share of common. In 1929, 197,911 shares of common were issued at a price of $42.50 per share pursuant to rights issued to the holders of the preferred and common stocks of Engineers.

33. From the date of Engineers' organization until the present time, the common stock received the following cash dividends: In 1929, $1 per share; in 1930, $1.70 per share; in 1931 and 1932, $1 per share, total $4.70. Fractional stock dividends in common stock were also issued during certain of those years. No dividends of any kind have been paid on

the common stock since 1932, although, as the Commission found, earnings have been available for such dividends since 1938.

34. From September 1935 to the end of 1945, earnings accruing in the Engineers' system to the interest of the common stockholders and not distributed during the period aggregated approximately $24,500,000. Since that time this amount has necessarily become even greater. Although not all these earnings could have been distributed because of various restrictions on dividend payments, the accumulation of these funds within the system has added materially to the value of the preferred stocks by reason of the facts that these funds, together with funds derived from the sale of properties pursuant to Commission divestment Orders, have been used in part to finance improvements and additions of the operating companies which have increased the earning power of the subsidiaries, and in part to retire an aggregate of 60,346 shares of preferred stock of Engineers and of El Paso of Delaware, at an aggregate cost of $5,894,227. The asset value, dividend coverage and quality of the presently outstanding preferred stocks have thereby been improved.

35. As of June 30, 1945, subsidiaries of Engineers had $2,773,000 of free earned surplus, and Engineers, the parent company itself had $7,095,000 of free earned surplus, or a system total of $9,868,000 which could have been declared out in dividends to the common stockholders. Since June 30, 1945 these amounts available for dividends have necessarily substantially increased. If such common stock dividends had actually been paid, the ratio of consolidated common stock and surplus to total capital structure would have been sharply reduced. The ratio of "Net quick assets to prior obligations", as well as total amount of liquid assets, upon which the expert witness for the preferred stockholders placed considerable emphasis, would also have been sharply reduced.

Findings of Fact and Conclusions of Law (Cont'd)

36. The deprivation of all dividends to the common stockholders since 1938, resulted from the policy of Engineers' management to withhold such dividends until the company has made all the adjustments that will be required of it under the Act, including the necessary reduction of its capital. This deprivation on the part of the common stockholders has obviously been of substantial benefit to the preferred stockholders.

Losses Sustained by Engineers in Making Divestments.

37. Engineers sustained substantial losses on many of the properties sold by it in compliance with the requirements of Section 11(b)(1) of the Act and the Commission's divestment Orders thereunder. The largest of such losses was with respect to its investment in Puget Sound Power & Light Company which, after being drastically reduced in a Section 11(e) reorganization under the Holding Company Act, was disposed of in compliance with the Commission's divestment Orders, for a total consideration of $774,475, as compared with a cost to Engineers of $34,000,000. The book loss on this investment was thus more than $33,000,000. A formal offer of proof was made during the proceedings before the Court to establish that the equity owned by Engineers in Puget Sound prior to the recapitalization would presently have a cash value of $10,000,000. It is not necessary for present purposes to determine this amount with exactitude. The subsequent increases in the earnings of Puget Sound, concerning which the Court takes judicial notice (Moody's Public Utility Manual [1946] p. 1081), over the amount estimated by the Commission for reorganization purposes (13 S. E. C. 226, 243), and the increase in market prices for utility common stocks which occurred subsequent to 1944 (to which the Securities and Exchange Commission makes reference in its Twelfth Annual Report to Congress, at p. 46) make

plain that Engineers' investment in Puget Sound came to have a realizable cash value substantially higher than the amount realized by Engineers under the circumstances referred to above. Substantial book losses were also sustained by Engineers on the sale of its investments in Western Public Service Company of Maryland, of Missouri Service Company and Northern Kansas Power Company, of Savannah Electric & Power Company, and others.

In the case of El Paso Natural Gas Company, with which Engineers also was ordered by the Commission to sever its relationship, Engineers held a valuable option on which it managed to realize a book profit; but subsequent to compliance with the Commission's divestment Order the market price of the El Paso Natural Gas Stock divested by Engineers rose by more than $4,000,000.

38. Although it is argued that the foregoing divestment losses affected the investment value found for the preferred stocks (discussed below), this contention is conceded only theoretical validity in view of the fact that Dr. Badger (the evaluation expert on behalf of the preferred stockholders, whose testimony is discussed below) found that the preferreds' redemption provision places a fixed ceiling on such values. Since the preferred stockholders have received their dividends over the entire period since issuance at the full rate contracted for and are now to receive the full principal amount to which they are entitled, it is clear that the brunt of the losses and deprivations caused by the Act have fallen, and necessarily must fall, upon the residual claimants, the common stockholders.

Additional Contributions to be made by Common Stockholders in order to carry out the Plan.

39. Engineers has on hand approximately $17,000,000 in cash representing retained earnings not paid as dividends to the common stockholders, and proceeds of prop-

erty sales. To retire the outstanding 392,455 shares of the various issues of preferred stock at $100 per share will require $39,245,500. To pay the premiums on the preferred stocks would require $3,200,000 additional; and under the provisions of the escrow arrangement approved by the Commission and this Court $4,000,000 cash must be deposited in order to assure payment to the preferred stockholders, if successful on appeal, not only of the premiums but of interest thereon during the period of litigation, and of fees and expenses in connection therewith. Engineers is thus short about $26,000,000 cash needed to carry out the plan. The plan requires that this deficiency shall be made up by the common stockholders of Engineers, in the following manner:

(a) $22,000,000 will be paid to Engineers through the exercise of warrants to purchase the common stock of one of Engineers three remaining subsidiaries, Gulf States;

(b) $3,800,000 will be received by Engineers in the form of "advance dividends" to be paid by Engineers' remaining subsidiaries, on condition that no further dividends may be paid by such companies for specified future periods of time extending until June 15, 1948.

40. In order to retire the preferred stocks, the common stockholders are required in accordance with the foregoing, to contribute $22,000,000 of additional cash and to undergo the risks of possible declining markets; and in addition they are required in effect to "mortgage" the remaining assets by advance payments of dividends, which will result in a partial continuance for additional periods of time of the deprivation of dividends already sustained by the common stockholders during many years past. If this Court's determination that the premiums are not payable to the preferred stockholders is sustained on appeal, the common

stockholders will ultimately receive the return of the escrow fund without, however, any interest for the withheld period, and *less* all fees and expenses incurred in the establishment of the escrow and in the litigation.

Evidence as to "Present Investment Value of the Preferred Stock".

41. An expert witness for certain preferred stockholders, Dr. R. E. Badger, testified in the proceedings before the Commission that in his opinion on a "going concern basis", or "exclusive of the impact of the Public Utility Holding Company Act of 1935", the Engineers preferred stocks would at the time of his testimony have sold on a 4.6% yield basis (or $108.70, $119.57, and $130.33, respecively, for the $5, $5.50 and $6 series), if the preferred stocks were not subject to call and redemption at the option of the Company. In view of the redemption provision, he concluded that "the present fair investment values are represented by their call price, plus a slight premium to account for the time required to effect a call."

42. "Fair investment value" was defined by Badger as "the price or value at which the shares of the several classes of stock would exchange hands between willing buyers and willing sellers, neither under compulsion to buy or sell and both thoroughly informed of all of the various elements of value." It is thus primarily a market value criterion, and is subject to all the problems inherent in predicting future market values.

43. Badger's valuation involved in large measure the determination of the yield basis (that is, dividend rate as a ratio to market price) at which utility preferred stocks regarded by him as comparable with the Engineers preferreds were selling at the time his study was made. In comparing the preferred stocks of Engineers with the other companies he compared such factors as "times all charges

and preferred dividends earned", "proportion of prior obligations to capital", "book value of equity per share of preferred" and "% of net quick assets to prior obligations". The preferred stocks on which he based his comparison, were for the most part those of utility holding companies and operating companies, which, like Engineers, have been subject to the impact of the Act.

44. Badger did not express the judgment that the preferred stocks of Engineers are "high grade" preferreds; on the contrary, he termed them "medium grade" preferreds. He compared them with a group of five other utility preferreds which he termed "medium grade", and reached the conclusion that "Engineers might be said to rest in a median or average position as far as the preferred stocks of these five companies are concerned", thus indicating that the Engineers preferreds may be classed as only medium "medium grade" preferreds. The president of the Company who also qualified as a financial expert, expressed the judgment that on the basis of the criteria customarily employed by financial experts, the Engineers preferreds are "closer to a low grade preferred stock than to a high grade preferred stock", and the evidence supports this view.

45. Although stating that his conclusions were "exclusive of the impact of the Public Utility Holding Company Act", Badger made plain that he excluded only the impact of Section 11 in requiring the dissolution of Engineers, and that he made no attempt to allow for or exclude the far-reaching effect since 1935 of the entire Act and the Commission's Orders thereunder, on Engineers, its subsidiaries, or on the other utility holding and operating companies used by him for purposes of comparison.

46. Analysis of the value of the Engineers preferreds on a "going concern" basis is largely an exercise in seman-

tics, since the Act dictates the dissolution of Engineers and of the entire holding company enterprise, and thus makes impossible the "going concern" in which the preferred and common stockholders engaged to invest. If not for the requirements of the Act, Engineers as a "going concern" would have been free to take advantage of the present low money markets by calling and redeeming its preferred stocks and replacing them with preferred stocks carrying a lower dividend rate than those now outstanding; it would thus continue to enjoy the leverage advantages of senior capital, but at a substantially lower cost. Under these circumstances, payment of the premiums to the preferred stockholders would have been consonant with the purposes and intent of the charter redemption provision. But the Act has made it impossible for the Company and the common stockholders to avail themselves of these benefits contemplated by the contract, along with the many other advantages which would have accrued to them as a "going concern, exclusive of the impact of Section 11."

47. The favorable effect upon the values estimated by Badger for the Engineers' preferred stocks, of the large amounts of earnings which have accrued to the equity of the common stockholders of Engineers and have been retained within the system under the circumstances referred to above (Paragraphs 34 and 35) is clearly evident in the importance attributed by Badger to the large amount of liquid assets and cash in the Engineers' system, and to the high ratio of "net quick assets to prior obligations".

48. Assuming the correctness of Badger's estimates of the investment values of the Engineers' preferred stocks "on a going-concern basis", subject to all the infirmities above referred to, the question still is: "investment values" for how long? The record amply establishes that the values found by Badger have not been the investment values of these stocks during most of their past history; certainly not

in 1935 when the Act was passed, at which time the preferreds sold within a range of $14-55 per share, with two years' accumulation of dividends in arrears (having sold the previous year as low as $10-$12 for all issues); certainly not as recently as 1943, when the Commission refused to permit Engineers to make market purchases at the then current prices of $61 to $74, and warned that preferred stockholders might not ultimately realize as much as $100 per share.

49. Badger's valuations rest heavily on the extremely low current yield rates of bonds and preferred stocks and his belief in the "permanence" of such low yields. He recognized that the current low money and yield rates in large measure reflect the effect of government financing of World War II, and the measures employed by the government to assure low interest rates on the vast amount of securities necessarily issued in recent years by the government.

50. Badger initially testified that the values he proposed to place on the preferred stocks are "values of a permanent nature and are not values of a temporary or speculative nature." Under cross examination he defined this to mean "they are permanent values one can reasonably predict into the future, values that will probably be maintained for a period possibly of *three to five years*, and in the absence of some possible worldwide event that we cannot predict at the present time. . . ." Later he testified he thought it possible to predict "between *2 and 3 years*, up to 5 years, barring something of an entirely unpredictable nature, such as a World War".

51. The record establishes that the values attributed by Badger to the Engineers preferred stocks, largely depend not only on market and economic conditions, but also on continuance of current money rates which were at the time of Badger's study concededly the lowest in the country's history; that such money rates in turn largely depend on

continuance of governmental financial policies including "pegging" of the market on government securities; and that there is and can be no assurance that such policies will not be modified; nor can it be foretold how soon such modifications may take place. The extremely low money rates which resulted in Badger's finding that the preferred stocks of Engineers have an "investment value" greater than $100 per share, largely reflect artificial factors which are clearly subject to changes at any time and may well be of purely transitory character.

52. It is well-known that within the last twelve months there have been rather sharp declines in the market prices of many securities, and a concomitant trend toward somewhat higher money rates. The Federal Reserve Bulletin for April 1947 (pages 431 and 432) shows that common stocks had dropped from 142 (Fed. Res. index) in March 1946 to 124 in March 1947; public utility common stocks had dropped from 123 in March 1946 to 107 in March 1947; yields on long term government bonds had risen from 2.09% in March to 2.19% in March 1947; "high grade" corporate bond yields had risen from 2.35% in March 1946 to 2.49% by the end of March 1947. On high grade preferred stocks the average yield has risen from 3.42% in April 1946 to 3.75% as of April 1947 (Standard & Poors, Trade & Securities, Current Statistics Section, May 1947, p. 27). The increase in yields on low to medium grade preferreds must necessarily be even greater than the increase on high grade preferreds and high grade bonds. These changes occurring within approximately a year of Badger's testimony do not bear out his views as to the asserted stability and "permanance" of the low money rates, even if "permanent" be defined as "two to three years". A continuance for two or three years of the trend indicated over the past year could substantially reduce or wholly eliminate the differential in the current yield rate over dividend rate in the case of preferred stocks of the type of Engineers.

Findings of Fact and Conclusions of Law (Cont'd)

53. The record indicates that there are other imponderables and variables, aside from the trend of money rates alone, which might affect the future "investment value" of the Engineers preferreds, measured on the theoretical "going-concern" basis. If a period of sharp inflation develops, the earnings of the public utility subsidiaries of Engineers could decline sharply due to inability to obtain authorization for rate increases rapidly enough to offset increased operating costs. Adverse earnings resulting from future government competition is another possibility which is claimed to be present. Expert witnesses for the Company stressed that what might occur to the "investment values" of the Engineers preferred stocks in the event of a prolonged economic recession or a real depression is at least to some extent indicated by the past history of these stocks, which, as has been pointed out, sold in the last depression as low as $10-$12 per share.

54. The record establishes that the investment values of the Engineers preferred stocks found by Badger at the time of his testimony do not represent the investment value of these stocks in the past, and are by no means determinative of the investment value of these stocks for any considerable period of time in the future. Because the preferreds' redemption provision acts as a "stopper", the future investment value cannot become greater than the call price, but on the other hand may very well become much less. The record further establishes that there are present many factors of a potentially adverse character, and that the extent to which the investment value of preferred stocks of this character can decline under adverse conditions is indeed very great.

CONCLUSIONS OF LAW

1. The proposed liquidation and dissolution of Engineers provided in the plan is not voluntary, but is instead an involuntary liquidation and dissolution required by the Act.

Findings of Fact and Conclusions of Law (Cont'd)

2. The proposed retirement of the Engineers preferred stocks provided in the plan is not a call and redemption within the meaning of the charter, but is an involuntary reduction of capital required by the Act, and is also incident to the involuntary liquidation and dissolution of Engineers, required by the Act.

3. The proposed liquidation and dissolution of Engineers and of Epsco as provided in the plan, will effect the complete liquidation and termination of Engineers as a corporate entity and of the Engineers holding company system. Termination of the entire holding company enterprise will take place.

4. The enterprise in which the preferred and common stockholders of Engineers invested and with respect to which they contracted, has been frustrated, and its termination made necessary, by an Act of Congress passed to "effectuate an overriding public policy".

5. Retirement of the preferred stocks by payment to the holders thereof of $100 per share, the maximum amount contributed by them or their predecessors, plus accrued dividends, and without deduction for underwriting expenses and discount sustained by the Company, is fair and equitable to such holders.

6. Nothing contained in the certificate of incorporation of Engineers or any other corporate document entitles the preferred stockholders to more than $100 per share plus accrued dividends.

7. No special facts or circumstances in connection with the issuance of the preferred stocks or their subsequent history, or the relationships of the preferred and common stockholders, create any equitable considerations warranting the payment to the preferred stockholders of amounts

in excess of $100 per share plus accrued dividends; and careful examination of all the relevant factors impels the conclusion that payment to the preferred stockholders of such excess amounts would not be warranted or justified.

8. Payments to the holders of the preferred stocks of Engineers of any amounts in excess of $100 per share plus accrued dividends, would be unfair and inequitable to the holders of Engineers' common stock, and would contravene the "fair and equitable" standards of Section 11(e) of the Act.

9. No conclusion is reached as to whether the charter provisions of Engineers limiting the preferred stockholders to $100 per share plus accrued dividends in the event of involuntary liquidation, dissolution, winding up or reduction of capital, forecloses the preferred stockholders from receiving under the plan at bar amounts in excess thereof, since the conclusion is reached that the preferred stockholders are in any event not entitled to receive any such excess amounts on the basis of all the relevant considerations, even if the charter provision is not itself controlling. Said charter provision, however, if taken into account, constitutes an additional factor supporting the conclusions reached, as above stated.

District Judge

May 29, 1947.

Order Approving and Enforcing Plan.

IN THE

DISTRICT COURT OF THE UNITED STATES

FOR THE DISTRICT OF DELAWARE

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY.	A Proceeding to Enforce a Plan Pursuant to Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935. Civil Action No. 995. (Filed May 29, 1947.)

A certain plan to effectuate the provisions of Section 11(b) of the Public Utility Holding Company Act of 1935 (hereinafter called the "Act") having been filed with the Securities and Exchange Commission (hereinafter called the "Commission") by Engineers Public Service Company, a registered holding company under the Act (hereinafter called "Engineers"); said plan being dated as of September 10, 1945, and thereafter amended to and including Amendment No. 6 thereto, dated December 30, 1946, being in the form set forth in Exhibit C annexed to the application herein; and the Commission, after notice and opportunity for hearing, having found in its Supplemental Findings and Opinion and Order entered January 8, 1947, said plan as so amended necessary to effectuate the provisions of subsection (b) of Section 11 of the Act and fair and equitable to the persons affected thereby and approved the plan as so amended; and the Commission by its Order of Amendment, dated February 11, 1947, a copy of which was attached as Exhibit F to "Exhibit 1" to the Motion to Amend Application to Enforce Plan, filed in this Court on February 13, 1947, having found that if, in the course of securing court approval and enforcement of said plan, it should appear that protracted litigation might ensue over the question of the amount payable to the preferred stockholders of Engineers and thereby impede expeditious

Order Approving and Enforcing Plan (Cont'd)

enforcement of the plan and compliance with the Act, it would be in conformity with said Act and the Commission's Findings and Opinion to separate the contested issue from the uncontested issues and consummate the uncontested portion of the plan; and counsel for Engineers in the course of this proceeding having stated to this Court that Engineers has determined that it desires to follow the alternative method of effectuating the plan through the use of an escrow; and counsel for the Commission having presented to this Court a form of proposed decree or order of this Court setting forth a proposed form of escrow agreement and such incidental changes in the carrying out of the plan which the establishment of the escrow involves, substantially as described in said Order of Amendment, said plan as amended by amendments to and including Amendment No. 6 thereto dated December 30, 1946, and supplemented to include an escrow agreement and certain incidental changes, being hereinafter called "Plan"; and Engineers having requested the Commission to apply to a Court to enforce and carry out the terms and provisions of the Plan; and the Commission having on January 9, 1947, filed with this Court an Application, amended as aforesaid, to enforce and carry out the terms and provisions of the Plan; and this Court by Order dated January 9, 1947, having fixed February 17, 1947, as the date for hearing upon the Plan and having prescribed the notice to be given of such hearing, the time within which any objections might be made to the Plan and the manner of making such objections; and it appearing from the affidavit of the Secretary of Engineers that due and sufficient notice of said hearing was given substantially in accordance with the provisions of said Order of January 9, 1947; and objections having been filed by certain stockholders of Engineers to the Plan; a hearing on the Plan having been duly held by this Court in accordance with the provisions of said Order of January 9, 1947; and the Commission, Engineers and certain common and preferred stockholders of Engineers having appeared by their counsel and having

Order Approving and Enforcing Plan (Cont'd)

been heard; and this Court having duly considered the Plan, the objections and the evidence, the Court being fully advised in the premises;

IT IS HEREBY FOUND, ORDERED, ADJUDGED AND DECREED:

1. The Court hereby adopts as its findings of fact and conclusions of law the findings of fact and conclusions set forth in the Findings and Opinions of the Commission dated December 5, 1946 and January 8, 1947, being Exhibits B and E to the Commission's application herein, except insofar as said findings and conclusions of the Commission relate to or bear upon the allowance or payment to the preferred stockholders of any amounts in excess of $100 per share and accrued dividends and are inconsistent with the opinion of this Court issued May 15, 1947 or with any of the findings of fact or conclusions of law filed herewith.

2. Subject to the terms and conditions of the Commission's Order of January 8, 1947, as amended by its said Order of Amendment of February 11, 1947, the Plan is approved as fair and equitable and as necessary or appropriate to effectuate the provisions of Section 11 of the Act except that it is not intended to approve the allowance or payment to Engineers preferred stockholders of any amounts in excess of $100 per share and accrued dividends, any such excess allowance or payment to the Engineers preferred stockholders being expressly disapproved. It is directed, however, that allowance or payments to Engineers preferred stockholders shall be made as provided in and subject to the provisions of paragraph 6 below, and preferred stockholders shall have the right to receive under the provisions of the Escrow Agreement provided for in said paragraph 6 such additional amounts, if any, as may ultimately be determined to be payable to them as provided therein; said Escrow Agreement is approved as fair and equitable and as necessary or appropriate to effectuate the provisions of Section 11 of the Act and as a means of protecting the

respective interests of all classes of stockholders of Engineers pending disposition of any appeals from this order which may raise the question of the rights of preferred stockholders of Engineers to receive any amounts in excess of $100 per share and accrued dividends.

3. Subject to the terms and conditions of the Commission's Order of January 8, 1947 and its Order of Amendment of February 11, 1947, this Court, for the purposes of carrying out the terms and provisions of said Plan, hereby takes exclusive jurisdiction of Engineers and its assets wherever located.

4. Engineers shall retain possession of its assets for the purpose of carrying out the terms and provisions of the Plan and of this Order, or any subsequent order herein; and Engineers may enter into any transactions not inconsistent with the Plan, including the filing of any appropriate application or declaration with the Commission in conformity with the Act and the rules, regulations and orders promulgated and issued by the Commission thereunder, in all cases where such filing and the entry of appropriate orders with respect thereto would be required if this Court had not taken such jurisdiction.

5. Engineers, acting by or through its officers and directors, is hereby authorized, ordered and directed to take and to cause to be taken as soon as practicable all action necessary to carry into effect and fully to consummate the steps and transactions provided in the Plan, except the allowance or payment to Engineers preferred stockholders of any amount in excess of $100 per share and accrued dividends, to comply with all orders of this Court and the Commission relative thereto, except as aforesaid and subject to the provisions of paragraph 6 below.

6. Engineers shall consummate those provisions of the Plan dealing with the retirement of its outstanding preferred stocks in the following manner:

Order Approving and Enforcing Plan (Cont'd)

(a) By exchanging with holders of warrants to acquire shares of common stock of Gulf States Utilities Company (a subsidiary of Engineers, hereinafter called "Gulf States") said shares of Gulf States common stock for whole shares of Engineers preferred stock, assigning to each share of Gulf States common stock the value of $11.50 per share and to each share of Engineers preferred stock the value of $100 per share plus accrued dividends to the expiration date of the warrant, provided that, on the basis of the relative values above stated, the value of the whole shares of Engineers preferred stock surrendered in exchange shall not exceed the value of the shares of Gulf States common stock which the warrant holder is entitled to and intends to acquire, but to the extent that the value of such shares of Engineers preferred stock surrendered in exchange is less than the value of such shares of Gulf States common stock to which the warrant holder is entitled and intends to acquire, the difference shall be paid by the warrant holder to Engineers; and provided, however, that any holder of Engineers preferred stock who surrenders his stock in exchange for Gulf States common stock will, in respect of such surrendered shares, have the right to receive the same amount which the holders of such preferred stock not so surrendering their stock will receive in addition to $100 per share plus accrued dividends;

(b) By depositing in trust for the benefit of Engineers preferred stockholders who shall not have surrendered their preferred stock in exchange for Gulf States common stock with The Chase National Bank of the City of New York an amount equal to $100 per share, plus accrued dividends to the date of such deposit in respect of each such share to be paid to them upon surrender of their certificates for

Order Approving and Enforcing Plan (Cont'd)

preferred stock, five days' notice of intention to make such deposit having been given;

(c) By depositing with The Chase National Bank of the City of New York in escrow the sum of $4,000,000 in cash pursuant to the provisions of the Escrow Agreement attached hereto as Exhibit 1 and made a part hereof.

Upon deposit of the amounts specified in (b) and (c) above, the rights and claims of the holders of shares of Engineers preferred stock shall cease and determine except their rights and claims in respect of said deposited amounts.

7. All creditors and security holders of Engineers and all other persons be and they hereby are enjoined and restrained from doing any act or taking any action, interfering with, or tending to interfere with these proceedings or with the carrying out of this order or any part thereof, including the commencement or prosecution of any action, suit or proceeding at law or in equity or under any statute in any court or before any executive or administrative officer, commission or tribunal, other than proceedings before the Commission, or this Court or the Circuit Court of Appeals or other appellate court as may be appropriate under the Act or the rules and regulations promulgated thereunder.

8. The Court reserves jurisdiction to enter such supplemental orders or decrees and to give such other and further relief as may be necessary or appropriate to enforce and carry out the provisions of the Plan, including approval of any alternative methods of meeting the cash requirements of the Plan that may be proposed by Engineers and approved by the Commission.

By the Court

(s) PAUL LEAHY
United States District Judge

Dated May 29, 1947.

Escrow Agreement, Exhibit 1 to Order.

EXHIBIT 1

Escrow Agreement.

....., 1947.

THE CHASE NATIONAL BANK OF THE CITY OF NEW YORK,
11 Broad Street,
New York 15, N. Y.

Dear Sirs:

1. The undersigned, Engineers Public Service Company (Incorporated) (Engineers) herewith hands you as Escrow Agent hereunder, its check in the amount of $4,000,000, which is the amount required to be deposited in escrow by the Engineers' "Plan Pursuant to Section 11(e) of the Public Utility Holding Company Act of 1935 for Divestment of Assets and Related Matters", as amended by amendments to and including Amendment No. 6, dated December 30, 1946, as changed to include this Escrow Agreement and certain program changes incidental thereto (which amended Plan, with such changes, is hereinafter referred to as "the Plan", a copy of which Plan has been delivered to you. Said sum of $4,000,000 is made up of the following amounts:

(a) The sum of $3,204,795, being an amount equal to $5 per share in respect of 143,951 outstanding shares of the $5 Dividend Convertible Preferred Stock ($5 Preferred) of Engineers; $10 per share in respect of the outstanding 183,406 shares of $5.50 Cumulative Dividend Preferred Stock ($5.50 Preferred) of Engineers; and $10 per share in respect of the 65,098 outstanding shares of $6 Cumulative Dividend Preferred Stock ($6 Preferred) of Engineers.

(b) The sum of $484,325, being an amount equal to simple interest for three years at a rate per annum of 4.76% in the case of the Engineers $5 Preferred, 5% in the case of the Engineers $5.50 Preferred, and 5.45% in the case of the Engineers $6

Escrow Agreement, Exhibit 1 to Order (Cont'd)

Preferred on the amounts set forth in (a) above in respect of each of said series.

(c) The sum of $310,880, to provide for the payment of all fees and other compensation and all remuneration or expenses claimed or hereafter claimed by any persons in connection with the Plan, the transactions incident thereto and the consummation thereof, approved by the Securities and Exchange Commission (hereinafter called the Commission).

2. Upon delivery to you of an opinion of independent counsel (as defined in paragraph 6 hereof), accompanied by a certified copy of the order or decree involved,

(A) to the effect (1) that the District Court of the United States for the District of Delaware in Civil Action No. 995 has entered a decree or order approving the Plan, including the payment to holders of Engineers preferred stock of the amounts, below specified, equal to the respective redemption premiums on their shares, with interest thereon, and directing its enforcement, (2) that no holder of common stock of Engineers has made timely appeal from such decree or order or, in the alternative, that a holder or holders of common stock of Engineers has made such a timely appeal but that the appellate court or courts have approved said decree or order approving the Plan entered by said District Court as aforesaid, and (3) that such decree or order has become final as against the holders of common stock of Engineers and is no longer subject to appeal by them; or

(B) to the effect (1) that said District Court in said Civil Action has entered a decree or order approving the Plan in all respects other than the payment to holders of Engineers preferred stock of the

Escrow Agreement, Exhibit 1 to Order (Cont'd)

amounts below specified and directing its enforcement to the extent so approved but disapproving or failing to approve the payment of such amounts; (2) that timely appeal has been made from such decree or order in so far as its disapproves or fails to approve the payment of such amounts, and that an appellate court has reversed such decree or order in so far as it disapproves or fails to approve the payment of such amounts and the District Court on mandate of such appellate court has entered a decree or order approving such payment to the holders of Engineers preferred stock; and (3) that such decree or order directing such payment to holders of the preferred stock has become final as against the holders of preferred and common stock of Engineers and is no longer subject to appeal by them; or

(C) to the effect that an order of the Commission in the proceedings now pending before it in file No. 53-132 or in consolidated proceedings including file No. 53-132, file No. 70-1149, file No. 70-1150 and file No. 70-1419 or in any other proceedings under section 11(b), section 11(d) or section 11(e) of the Public Utility Holding Company Act of 1935, or an order or decree of any court having jurisdiction, has been entered, has become final and is no longer subject to appeal, which Commission order or court order or decree either approves an amended plan providing for, or otherwise provides for or directs, the payment to the holders of Engineers preferred stock of at least the amounts below specified;

then you shall release and pay over to the holders of Preferred Stock out of the amounts deposited with you pursuant to clauses (a) and (b) of paragraph 1 hereof, the amount of $5 per share in respect of each share of $5 Preferred, the amount of $10 per share in respect of each share of $5.50

Escrow Agreement, Exhibit 1 to Order (Cont'd)

Preferred and the amount of $10 per share in respect of each share of $6 Preferred, plus in each case an amount equal to simple interest, computed on the basis of 360 days per year, on the amount so paid at a rate per annum equal to 4.76% in the case of the Engineers $5 Preferred, 5% in the case of the Engineers $5.50 Preferred, and 5.45% in the case of the Engineers $6 Preferred from the date hereof to the date of such payment. Such payment is to be made by mailing the same to the persons who were the registered holders or assignees of registered holders of such Preferred Stock at the time their certificates for such stock were surrendered, either in exchange for Common Stock of Gulf States Utilities Company or upon payment to them of $100 per share and accrued dividends, all as provided in the Plan. You shall be entitled to rely upon a list or lists furnished you by The Chase National Bank of the City of New York and Stone & Webster Service Corporation, Transfer Agents for the Preferred Stock, or either of them, as to the names of such registered holders or their assignees at the time of such surrender and their mailing addresses. Any balance of the sum deposited with you pursuant to clause (b) of paragraph 1 hereof shall be paid over to Engineers.

3. Upon delivery to you of an opinion of independent counsel (as defined in paragraph 6 hereof), accompanied by a certified copy of the order or decree involved, to the effect that an order of the Commission in the above mentioned proceedings now pending before it or in any other proceedings under section 11(b), section 11(d) or section 11(e) of the Public Utility Holding Company Act of 1935, or an order or decree of any court having jurisdiction, has been entered, has become final and is no longer subject to appeal, which Commission order or court order or decree directs or permits the distribution to holders of Preferred Stock of some part of the amount deposited pursuant to clauses (a) and (b) of paragraph 1 hereof, but less than the amounts specified in paragraph 2 hereof, you shall release and pay over to

Escrow Agreement, Exhibit 1 to Order (Cont'd)

the holders of Preferred Stock entitled thereto, pursuant to the terms of such order or decree, in the manner provided in paragraph 2 hereof, the respective amounts to which such holders shall be entitled pursuant to such order or decree, and you shall release and pay over to Engineers the balance of said sum deposited pursuant to clauses (a) and (b) of paragraph 1 hereof.

4. Upon delivery to you of an opinion of independent counsel (as defined in paragraph 6 hereof), accompanied by a certified copy of the order or decree involved, to the effect that an order of the Commission in the above mentioned proceedings now pending before it or in any other proceedings under section 11(b), section 11(d) or section 11(e) of the Public Utility Holding Company Act of 1935, or an order or decree of any court having jurisdiction, has been entered, has become final and is no longer subject to appeal, which Commission order or court order or decree determines or finds that the holders of Preferred Stock are not entitled to receive any amounts in addition to the amount of $100 per share plus accrued dividends to be allowed to Preferred Stockholders on exchange of shares of Preferred Stock for shares of Gulf States Common Stock or to be deposited in trust for Preferred Stockholders who shall not have so exchanged their shares of Preferred Stock, all as provided in the Plan, you shall release and pay over to Engineers all sums deposited with you pursuant to clauses (a) and (b) of paragraph 1 hereof.

5. Upon delivery to you of (a) a certified copy of the order of the Commission in the above mentioned proceedings approving payment to specified persons of fees and other compensation, remuneration and expenses, and (b) an opinion of independent counsel to the effect that such order has become final and not subject to appeal; you shall release and pay over to the persons designated in said order out of the amounts deposited pursuant to clause (c) of para-

graph 1, the respective amounts specified in said order, and after deducting the amount of your fees and expenses and the compensation of your counsel in accordance with the provisions of paragraph 8 hereof, you shall pay over to Engineers any balance of said sum.

6. The term "independent counsel" as used herein shall mean counsel selected by you who shall not have entered their appearance in the above mentioned proceedings before the Commission or in the above mentioned court proceedings as counsel for any party or participant, but who may be counsel regularly retained by you.

7. You shall not be liable for any action taken or omitted to be taken by you hereunder in good faith, or for any act, mistake or omission of any agent employed by you. You shall be fully protected in any action taken or omitted to be taken pursuant to advice of counsel.

8. You shall be entitled, subject to the approval of the Commission, to reasonable compensation for your services hereunder and reimbursement of your reasonable expenses, including fees and disbursements of your counsel and any independent counsel selected by you for the purposes of paragraphs 2, 3 or 4 hereof, and for the payment of such compensation or reimbursement, you shall have a lien upon any amounts deposited with you pursuant to clause (c) of paragraph 1 hereof.

9. You may, at any time, resign by giving 30 days' notice in writing to Engineers of your intention so to do. In case of any such resignation, or in case you shall become unable to act hereunder, Engineers will promptly appoint a successor Escrow Agent, which shall be a trust company or bank with trust powers having its principal office in the Borough of Manhattan, City and State of New York and having a capital and surplus of more than $1,000,000. Upon

Escrow Agreement, Exhibit 1 to Order (Cont'd)

payment of any sums held by you hereunder to any such successor Escrow Agent, you shall be discharged from all further liability hereunder, and the successor Escrow Agent shall become the Escrow Agent hereunder with like effect as if originally designated Escrow Agent hereunder. Any successor to your business shall forthwith become successor Escrow Agent hereunder without further action on the part of Engineers.

10. Any disputes as to the duties of the Escrow Agent hereunder shall be submitted to the United States District Court for the District of Delaware pursuant to the jurisdiction reserved by it in its order enforcing the Plan.

The signature of your duly authorized officer in the space provided below will evidence your acceptance of your appointment as Escrow Agent hereunder, and your acknowledgment of receipt of Engineers' check for $4,000,000 referred to in paragraph 1 hereof, the proceeds of such check to be held and disposed of by you in accordance with the provisions hereof.

Very truly yours,

ENGINEERS PUBLIC SERVICE COMPANY
(Incorporated)

By .....
President

The undersigned hereby accepts its appointment as Escrow Agent hereunder and acknowledges receipt of the above mentioned check for $4,000,000.

Notice, Petition and Order Re Stay (Cont'd)

UNITED STATES DISTRICT COURT

FOR THE DISTRICT OF DELAWARE

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY	A Proceeding to Enforce a Plan Pursuant to Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935. Civil Action No. 995.

Petition for Stay or Order.

TO THE HONORABLE PAUL LEAHY:

This Honorable Court, having indicated at the hearing on May 26, 1947 that an order in accordance with the proposed order submitted by counsel for the Securities and Exchange Commission will be granted on May 29, 1947, your petitioner, Thomas W. Streeter, a director and preferred stockholder of Engineers Public Service Company, by his attorney, Lawrence R. Condon, hereby applies for a stay, pending appeal, of such order and as grounds for such stay states as follows:

1. The said order is erroneous in that it permits and directs the consummation of the plan, although the Court has disapproved that portion dealing with the treatment to be accorded the preferred stockholders.

2. The said order is inconsistent with the Court's opinion of May 15, 1947, in that the order directs consummation of the plan, whereas, in the opinion the Court concludes that the plan is not fair and equitable.

3. The said order adopts and approves, without notice or an opportunity for hearing, an escrow which does not

adequately protect the interests of the preferred stockholders.

4. The said order approves and adopts substantial changes to the plan which were not part of the plan submitted to and approved by the Securities and Exchange Commission.

5. The said order approves and adopts the findings of the Securities and Exchange Commission contained in its so-called Order of Amendment which was entered without notice to the preferred stockholders and an opportunity to be heard thereon.

6. On information and belief, the Board of Directors of Engineers Public Service Company, on May 22, 1947, authorized and directed the officers to proceed immediately with the consummation of the plan in accordance with the said order.

7. The Company, on information and belief, has been authorized by the directors to immediately carry out the provisions of paragraph 6 of said order and intends to terminate dividend payments to the preferred stockholders.

8. The Company, on information and belief, contemplates the early distribution of substantially all its assets.

9. Your petitioner intends to promptly perfect and prosecute an appeal to the Circuit Court of Appeals from the order of May 29, 1947.

10. If a stay of the order of May 29, 1947 is not granted, your petitioner and the other preferred stockholders will be irreparably injured through the distribution of substantially all the Company's assets, and your petitioner's right of appeal from the order permitting the consumma-

tion of the plan, changing the terms of such plan, and approving an inadequate escrow may be defeated, in effect, by a consummation of the plan before the hearing and decision on appeal.

WHEREFORE, your petitioner respectfully prays that, pending the determination of an appeal herein, consummation of the plan and creation of the escrow authorized, approved, and directed by the order of May 29, 1947, be stayed and that your petitioner have such other and further relief as is just and proper.

Order Re Transmittal of Original Record of Proceedings Before Securities and Exchange Commission to Circuit Court of Appeals.

IN THE

DISTRICT COURT OF THE UNITED STATES,

FOR THE DISTRICT OF DELAWARE.

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE CO.	Civil Action No. 995.

Order.

(Filed June 12, 1947.)

This 12 day of June, 1947, upon consideration of the attached petition of the appellant, Securities and Exchange Commission, that the original of the record of proceedings before it, which has been filed herein as Exhibit 1, be sent to the United States Court of Appeals for the Third Circuit in lieu of copies thereof, it is

ORDERED that the original of the record of proceedings before the Securities and Exchange Commission, filed herein as Exhibit 1 be transmitted to the United States Circuit Court of Appeals to the Third Circuit, in lieu of copies thereof, and it is further

ORDERED that said exhibit be entrusted to the attorneys for the Securities and Exchange Commission for filing in the United States Circuit Court of Appeals for the Third Circuit.

By the Court

(S) PAUL LEAHY
United States District Judge.

Petition of Securities and Exchange Commission For Transmittal of Original Record of Proceedings Before Securities and Exchange Commission to Circuit Court of Appeals.

IN THE

DISTRICT COURT OF THE UNITED STATES,

FOR THE DISTRICT OF DELAWARE.

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE CO.	Civil Action No. 995.

Petition for Order Permitting Original Exhibit to be Sent to Appellate Court.

To The Honorable Judge of The United States District Court for The District of Delaware:

The petition of the Securities and Exchange Commission respectfully shows:

(1) That petitioner has filed a notice of appeal from the order of this Court entered May 29, 1947.

(2) That petitioner has designated on appeal herein the complete record, proceedings and evidence herein.

(3) That included in the record before this Court as Exhibit 1 is the original record in these proceedings before the Securities and Exchange Commission.

(4) That the said record in these proceedings before the Securities and Exchange Commission consists of some 8

Petition of Securities and Exchange Commission For Transmittal of Original Record of Proceedings Before Securities and Exchange Commission to Circuit Court of Appeals (Cont'd)

volumes of typewritten and printed matter and if copies thereof are required to be filed in the Circuit Court of Appeals for the Third Circuit, unnecessary delay and expense will be caused.

WHEREFORE, your petitioner prays that an order be entered pursuant to Rule 75(i) of the Rules of Civil Procedure, requiring that the original of the record in these proceedings before the Securities and Exchange Commission be sent to the Circuit Court of Appeals for the Third Circuit in lieu of copies thereof, and for such other and further relief as the Court may deem proper.

Designation of Contents of Record on Appeal of Streeter, et al.

IN THE

DISTRICT COURT OF THE UNITED STATES,

FOR THE DISTRICT OF DELAWARE.

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY.	Civil Action No. 995.

Designation of Contents of Record on Appeal.

(Filed June 13, 1947)

Thomas W. Streeter, appellant herein, designates as the record on appeal those items contained in the designation filed by the Securities and Exchange Commission, and in addition thereto, the following:

1. Order dated June 12, 1947 of Judge Leahy permitting the original record of the proceedings before the Securities and Exchange Commission to be transmitted to the United States Circuit Court of Appeals for the Third Circuit.

2. Supplemental Statement of objections dated February 17, 1947 of Thomas W. Streeter, et al., and Exhibit A attached thereto.

3. Letter dated February 7, 1947 from Engineers Public Service Company to the Securities and Exchange Commission and attachment thereto including proposed amendments to the order of the Securities and Exchange

Designation of Contents of Record on Appeal of Streeter, et al. (Cont'd)

Commission of January 8, 1947 and a draft of an Escrow Agreement.

4. Escrow Agreement filed February 17, 1947.

5. Notice of Presentment of Order for Settlement and Signature dated May 19, 1947 and annexed proposed Order.

6. Notice of Appeal by Thomas W. Streeter dated and filed May 29, 1947.

7. This designation.

Designation of Contents of Record on Appeal of Central-Illinois, *et al.*

Designation by Appellees, Central-Illinois Securities Corporation and Christian A. Johnson, of Additional Portions of the Record, Proceedings and Evidence to be Included in the Record on Appeal from the Order of the District Court Dated May 29, 1947.

(Filed June 18, 1947)

To the Clerk of the Above Named Court:

You are hereby requested, pursuant to Rule 75(a) of the Federal Rules of Civil Procedure, to include in the record on appeal from the order of the District Court dated May 29, 1947 in the above-entitled proceeding, the following additional portions of the record, proceedings and evidence, in addition to the portions of such record, proceedings and evidence heretofore designed by the appellants:

1. Transcript of hearing before the Dstrict Court held May 26, 1947.
2. Transcript of hearing before the District Court held May 29, 1947.
3. A copy of this additional designation.

Dated, June 17, 1947.

Transcript of Hearing on Plan Held May 26, 1947.

IN THE

DISTRICT COURT OF THE UNITED STATES,

FOR THE DISTRICT OF DELAWARE.

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY.	Civil Action No. 995.

Wilmington, Delaware,
May 26, 1947.

BEFORE:

Hon. PAUL LEAHY, U. S. District Court Judge.

APPEARANCES:

HARRY G. SLATER, Esq., and BERNARD S. KANTON, Esq., for the Securities and Exchange Commission.

WILLIAM E. TUCKER, Esq. and PAUL D. MILLER, Esq., of Mudge, Stern, Williams & Tucker, of New York, for Engineers Public Service Co.

CALEB R. LAYTON, III, Esq., and FRANCIS H. SCHEETZ, Esq., of Philadelphia, Pa., for Home Insurance Co. and other Preferred Stockholders.

FREDERICK ZAZOVE, Esq., of New York, for Thomas W. Stre[illegible]er, Dissenting Minority Director of Engineers, and Preferred Stockholders.

Slater

ALFRED BERMAN, Esq., of Guggenheimer & Untermyer, of New York, for Central-Illinois Securities Corporation and Christian A. Johnson, holders of Common Stock.

WILLIAM ESBITT, Esq., of New York, for Common Stockholders.

Mr. Slater: If your Honor please, we have for presentation and signature this morning a form of decree in the Engineers Public Service case. Copies have been furnished to all counsel of record and notice given of the hearing on the entry of the order this morning.

The order attempts to accomplish what your Honor is aware we have tried to work out here from the very beginning; namely, the preservation of the litigation position of all parties with respect to the only portion of the plan which was ever in dispute, and yet allowing the company to go forward with those portions of the plan which this Court has found meets the tests of the statute and which no persons in interest have disputed.

There are two changes in the order which have been suggested by Mr. Scheetz, counsel for the preferred stockholders. I don't have the precise language here. I believe Mr. Tucker is in the process of writing it out, but I would like to call your Honor's attention to it.

The first is in the paragraph numbered one on page 3, where it has been suggested that that "except" clause be cross-referenced with appropriate language to paragraph 8, the very last paragraph on page 6, where in clause No. 2 the Court, it is proposed, will reserve jurisdiction to enter its findings of fact and conclusions of law with respect to the disputed aspect of the case.

Slater

The Court: The only reason I suggested that that be included in the order was that if an appeal is taken under Rule 52 I am required to make those findings. If no appeal is taken I have no desire to file findings of fact and conclusions of law.

Mr. Slater: I think I can state that appeals will be taken.

The Court: Yes.

Mr. Slater: The other change in the——

The Court: That is not a matter of substance; that is only a matter of draftsmanship to cure ambiguity.

Mr. Slater: That is all, your Honor.

The other is not a matter of substance either. It is at the end of paragraph 6 on page 5, paragraph (b) of paragraph 6, which talks about the rights of the preferred stockholders. In respect of the deposit of the amounts the plan provides not only for the deposit, but notice to the preferred stockholders of the intention to make the deposit. We want to include in there also language of the giving of the notice. I think the plan provides for five days prior notice to the preferred stockholders of making of the deposit.

There has been filed in this Court—at least we have received copies of a suggestion in a memorandum in support thereof regarding the placing of the escrow funds, $4,000,000, I believe, by Mr. Boehm, counsel for common stockholders, a suggestion that the escrow funds be invested by the escrow agent in short term Governments, which would earn a return of seven-eighths of one percent or one percent, thereby accruing to the fund some $40,000 a year and to the ultimate beneficiaries of the fund. While we have no objection in principle to putting idle funds to work, we do not urge that the objections of the company to subjecting these funds to any possible risk whatsoever be disregarded and that this Court should require the company to work the escrow out in that manner. I know that Mr. Tucker has given consideration to that

suggestion. I don't think the company goes along with it. If your Honor has some doubts as to whether it should be required, I believe Mr. Tucker is prepared to address the Court on that point.

The Court: Is Mr. Boehm here in support of his suggestion?

Mr. Esbitt: I am here representing Mr. Boehm.

Mr. Slater: There has been one minor change in the printed form of the escrow itself which is annexed to the form of the order which I should like to call to the Court's attention. On page 2 of the printed form of the escrow, paragraph (b) at the top, clause No. 2 originally read as presented at the time of the hearing that timely appeal has been made by a holder or holders of preferred stock of Engineers. That has been changed to read that timely appeal has been made. The reason for that change is that the Commission, if it is an appellant, should be included in what that clause intends to accomplish, and the same results should follow in the event of a Commission appeal from an order such as here will be entered as will follow if the holders of preferred stock appeal.

The Court: Is that change made in the copy sent me, Mr. Tucker, after the hearing?

Mr. Tucker: Yes, that change has already been made in the printed copies that are being presented here this morning.

Mr. Slater: The change is included in the copy attached to the Exhibit 1 to the order. On the last page, if your Honor please, there is a new paragraph No. 10 which was not in the original draft. No. 10 reads, "Any dispute as to the duties of the escrow agent hereunder shall be submitted to this Court," and so forth, all pursuant to the jurisdiction reserved in the plan. We think that is inherent in the situation anyway. The setting up of the escrow is a device which this Court is employing. The usual injunc-

tive provision of the Court's order makes this Court the exclusive forum for any disputes which might arise in connection with the confirmation of the plan, so we put it in there out of an excess of caution.

The Court: I would like to place a question mark on those remarks, Mr. Slater. While appeals are pending and once the record leaves this Court I have serious doubt as to whether I can do anything with respect to the escrow agreement, because that is an essential part of what is going to be reviewed.

Mr. Slater: That is correct, your Honor. We did not have in mind that situation, however. We had in mind this situation: Suppose appeals are taken and decided one way or the other and then the escrow agent begins to perform his function in accordance with that appeal. Disputes may arise as to just what the obligations of the escrow agent are, and we think they ought to be settled in this Court. That is all we have in mind. Perhaps No. 10 ought to be clarified so as to be confined to that situation, but we certainly agree with what your Honor has said.

The Court: My interpretation of the language as suggested would be it could only include what you just referred to, so I don't see any point unless you want to.

Mr. Slater: I believe that is all I have unless your Honor has some suggestions.

The Court: No, I haven't any.

Mr. Slater: Since there will be an appeal or appeals and therefore proposed findings of fact and conclusions of law by the Court are necessary I should like to raise while all counsel are here the precise manner in which your Honor desires that that be done. For instance, I don't know that your Honor intends to hear counsel on each other's proposed findings of fact and conclusions of law or whether your Honor desires, indeed, for all counsel to submit proposed findings, whichever side of the Court's decision they

happen to be on. We thought that that might be settled this morning.

Mr. Zazove: If your Honor please, before you get to the question of findings I would like permission to be heard on this order.

The Court: Come forward, Mr. Zazove.

Mr. Zazove: By telephone I communicated to Mr. Slater the fact that the preferred stockholders and the Director of Engineers, Thomas W. Streeter, whom we represent, had objections to this order.

The Court: Before you proceed I want to eliminate matters that are not in controversy. As I understand, there is no objection to the proposed amendment to paragraph 1 on page 3?

Mr. Slater: I haven't heard of any, your Honor, other than Mr. Zazove's objections that I haven't heard of at all except they go to the whole order.

The Court: I see. Then as to the matter to be added to (b) on page 5 there will be a controversy concerning that?

Mr. Slater: Not that I know of, your Honor, no.

The Court: You may proceed, Mr. Zazove.

Mr. Zazove: My objections go to the entire order rather than any particular portions of it. I have prepared here a short memorandum which I hope will be helpful to the Court. It is our position, your Honor, that under the scheme of the Public Utility Holding Company Act that in view of the Court's decision and the opinion in this case that the proper form of order that should be entered would be one denying enforcing of the plan. We have other reasons for asserting that this order should not be entered.

The second one is if the Court adopts and approves this escrow which apparently this draft of order purports to do, that the effect of that will be to have this Court rewrite the plan that was approved by the Commission and

submitted to you. In your opinion you stated that the plan had been amended by supplementary proceedings to include an escrow. It is our position that that is not what happened. The theory of the Commission and the company was that the Commission was merely making anticipatory findings in order to give the company tax relief under Supplement R of the Internal Revenue Code in the event that this Court saw fit to impose an escrow in this situation. We have always contended that the plan has no provision for an escrow; therefore the order is what is putting it into the plan and we think that constitutes a rewriting of the plan. In effect, that is a different method of consummating the plan than was proposed and approved by the Commission.

In the recent Alton case in the Seventh Circuit a similar situation arose where a plan provided for its consummation by the managers following the approval of the plan by the Interstate Commerce Commission and the security holders and the Court in the interest of speed substituted "trustees" for "managers."

The Court: Refresh my recollection on the present record. Didn't the Commission take action with respect to the escrow?

Mr. Zazove: Only insofar as making anticipatory tax claims are concerned. It did not purport to approve or adopt a plan. They specifically said in their findings that this plan does not have to be amended to include the escrow, but the Court has the inherent equitable powers to do that; so it is obviously their theory that the plan contains an escrow. It is our conclusion that we have been deprived, therefore, of an opportunity to be heard on it both before the Commission and before the Court. We were never consulted about the terms of the escrow. If your Honor remembers, an escrow was submitted to you after the hearing in the form of a letter from Mr. Tucker. We did not

think the escrow adequate to protect our rights and we have never been heard on it, and we think if the Court adopts this thing now at this time with the changes that that is a substantial amendment to the plan and does not comply with the Act.

I can detail some of these changes to you. The way the plan was presented to the Commission it was proposed to retire the preferred stock at the call prices. This was to be done in two ways; one by an exchange of the preferred stock at the call price value for Gulf States stock or, two, by payment in cash therefor. There wasn't a word in the plan and there still isn't about an escrow or about an alternative method of effectuating the plan. That all came about subsequent to the Commission's order approving the plan when it appeared that the common stockholders for the first time might contest this thing, and the whole purpose of what the Commission had done and said in its supplemental findings was that in the event that the common stockholders wanted to appeal from an order, the escrow was supposed to take care of their rights. It was not until we got into Court and the Court's opinion came out that we came to the point where the plan in its terms was being rewritten.

Now, a preferred stockholder instead of getting a hundred dollars and his call price in cash or instead of being able to turn in his stock at the call price, he is being given a hundred dollars, or he can only turn his stock in for a hundred dollars and he gets a lawsuit for the balance. We think that is a substantial change; if it is going to be made it should have been made before the Commission in the first place.

It is our view that under the Public Utility Holding Company Act this Court is a reviewing body, that your jurisdiction is to approve or disapprove what happened before the Commission. The plan the Commission approved required the company to pay the call prices. The Court in its findings and its proposed order disapproved

that part of the plan; so you can't say that you have got both the Commission and the Court approving it.

There are several decisions that we have cited in this memorandum indicating that the Court's power is to approve or disapprove, and what this order purports to do is to approve in part and disapprove in part.

The second objection we have to it is we don't think the Court has the power to enter an order terminating the rights of the preferred stockholders without making findings. If you will read that order carefully you will find it says in there that all the rights of the preferred stockholders are terminated when this order is entered except as specified in the order; and those paragraphs which are included in the order constituting an amendment to this plan were never submitted to the Commission; there was never a hearing on them; we never had an opportunity to be heard about it. We think under those circumstances that the Court is limited to entering an order denying enforcement because it has failed to approve this plan, and the statute requires that action for enforcement.

Another reason we think makes this order defective is Rule 52(a) of the Rules of Civil Procedure requires that the Court make findings of fact and conclusions of law before entering an order.

We don't think that this plan can be divided up into two parts the way they are attempting to do it. For example, suppose somebody objected to issuing warrants, which is just another part of the plan. I don't think that the Court would say he could substitute his own judgment for what this plan ought to do and say, "I don't like warrants; I want you to sell the stuff at competitive bidding or pass it out as dividends in kind." If you were attempting to change that part of it you would have a different plan, and under those circumstances it would not be the same plan as approved by the Commission.

Slater

If this order is entered, reserving jurisdiction over findings of fact and conclusions of law, the preferred stockholder is placed in a position where we may have an interlocutory order. We can't tell whether the company proposes to go ahead with it at all, except that portion of it which specifically provides that the preferred is to be retired. Without findings of fact and conclusions of law we don't know what the Court of Appeals is supposed to be asked to review. Specifically this order says that the opinion is to be deemed as findings of fact and conclusions of law. We cite some cases in our memorandum where it has been held to be ambiguous and doubtful whether the opinion could be used for that purpose.

We think also that this talk about reserving the problem of writing findings of fact and conclusions of law makes the whole thing too uncertain and so indefinite, and that together with the other reasons I have stated that the chances of this order being sustained on an appeal, without regard to the substance of it but merely as to the procedural mechanics, is highly doubtful; and we are asking that the proper order be entered, which we feel is an order denying enforcement because the Court failed to approve the plan. From such an order which is final and reviewable all parties can be heard and their relative rights determined.

Mr. Slater: Does your Honor want to hear me in reply?

The Court: Yes. We will have full discussion, so whoever wants to speak can speak.

What about the precise language of Rule 52(a) as suggested by Mr. Zazove?

Mr. Slater. It is quoted on page 12 of Mr. Zazove's memorandum.

The Court: "In all actions tried upon the facts without a jury, the court shall find the facts specially and state separately its conclusions of law thereon and direct the entry of the appropriate judgment." I gives me difficulty.

Slater

Mr. Slater: You mean you have some difficulty as to whether you should enter an order in advance of——.

The Court: Of signing findings and conclusions.

Mr. Slater: Well, we certainly would not insist on this procedure if it gives your Honor difficulty. We think that every means ought to be devised by counsel——.

The Court: I will be quite frank with you. That is the question that bothers me. Now, if I could sign findings then I would enter this order. I am not certain that I can go along with Mr. Zazove that the order to be entered should be an order of disapproval, because I think this plan is separable; and while it may be a truncated order, nevertheless I still think it would be good.

Mr. Slater: We think so too, your Honor. We think that what your Honor is asked to do here is to resort to an equitable device which is inherent in the powers of an equity court, and it is a situation which we now have which the Commission said would be all right with it; namely, that the escrow arrangement should be set up here under the aegis of the Court if, as, and when it appears that it is necessary; and, of course, nobody had a hearing on it before the Commission because there was no escrow set up before the Commission. Mr. Zazove had a hearing here on February 17 and on the terms of the escrow. Your Honor passed on those arguments which he advanced in your opinion, and he has opportunity further to be heard today on the terms of the escrow. He could go on and argue further on the points which he has raised, but if your Honor wants to hear further argument on the 52(a) point I see no express language there which talks about the conclusions of law having to come prior to the entry of the decree. They certainly must be stated separately. You see, your Honor, 52(a) also would seem to be directed to a situation where the Court sits as a fact-finding tribunal in the sense that a jury sits.

Slater

The Court: Yes, I have no doubts as to whether I should find any at all. The same problem has arisen in those cases where three judges sit in the District Court reviewing an Interstate Commerce Commission decision. All we do is look at the record which comes up from the Commission. In the last case in this court Judge Biggs, Judge Maris, and I sat, and we discussed that among ourselves, the necessity of making findings, and we could not arrive at any conclusion; so we said, "Well, the thing to do is to file them anyhow." We then asked the prevailing party to prepare the findings and we accepted them and signed them. But there is doubt in the minds of some judges as to whether 52(a) would apply to a Section 11 proceeding.

Mr. Slater: We would suggest if the prevailing party could get up proposed findings in a day or so that perhaps that course might be pursued; but if we are to have an opportunity to be heard whether the findings proposed by the prevailing party ought to be the findings that your Honor ought to adopt, I am afraid there will be interminable delay in terms of the program that is confronting this company. If your Honor is not convinced that 52(a) is applicable, and it certainly does not appear to be applicable to this situation by its terms, I should think the same equitable result in terms of causing further delay and the jeopardy to the entire program in terms of the current market conditions ought to prevail here, especially since your Honor has an opinion——

The Court: It is my observation whenever you are in doubt as to a procedural matter like that, if you decide to go ahead and not wait, sometimes you are reversed; and it takes longer to review the situation than if you had done it in such a way as to clear any ambiguity in the first place.

The point is I have no strong feeling about these matters one way or the other. It would seem to me it would be the litigants who would want to see that they are pro-

tecting themselves. I don't see why the prevailing party could not submit to me proposed findings and if I think they are acceptable sign them, because I have been through this. A trial has been had.

Have you any thought on the matter, Mr. Berman?

Mr. Berman: No, your Honor. I was going to suggest that on the matter of submission of the proposed findings I would think if all counsel are going to have the right to be heard, as Mr. Slater indicated would be one of the possible procedures, it would be a rehearing of the entire case, and that doesn't make sense.

We already have in preparation proposed findings since it was communicated to us that they might be wanted, and our method of procedure is to annotate every finding to the record in such a way that your Honor would be able to check with facility the support in the record for every statement made, and we thought that we would not serve them on any parties. Your Honor would examine those, satisfy himself that the findings are supported by the record and that they agreed with his opinion, and I would think we could get our proposed findings in here by the end of this week. I would think by Friday if all goes well.

But on this question of 52(a), if your Honor will permit me to say a word on that, I would like to suggest that after all the proposed order which is now before the Court does—in that order the Court does make findings of fact. It is true it does not specially state separately conclusions of law thereon, but what the Court does here is to adopt the findings of the Commission as its own in all respects except as the Commission's findings related to and bore upon the question of premiums.

As I envisage what occurred here is that actually the plan has been split into two portions. We have this portion with respect to the payment of a hundred dollars a share and the carrying out of the remaining portions of

the plan and the establishment of the escrow. That is what your Honor is entering his order on now. The proposed order does not say that the premiums are specifically disapproved. It merely says that they are not approved and the remaining portion of the plan is approved. On that portion it seems to me that your Honor has made findings of fact and conclusions of law in adopting those of the Commission.

Now, upon submission of the proposed findings on the premium question, if your Honor adopts those and signs them, then he would enter his decree, we would suggest, specifically disapproving the payment of the premiums, and that would be the decree on that portion. I had thought that that is what we were doing, splitting the plan into those two portions so that they could stand up on their own feet, and that, as I understand it, was the scheme of the Electric Bond & Share plan which was approved by the District Court in New York. That is, you had the initial plan providing for the payment of $100 per share. That was approved. The plan provided for termination of the dividends on that amount. You had the issuance of the stub to the preferred stockholders giving them a right to any additional amount found fair and equitable at some later point, and the first portion went ahead. The Court found it was fair and equitable. Dividends were terminated on the hundred dollars a share. I thought we were essentially amending this plan to adopt the same essential outline.

Now, I do feel that perhaps just to keep the record clear, and since Mr. Zazove has raised the point, that counsel for the company might very well file with this Court either as part of the record the specific amendment to the plan specifically stating that the plan is hereby amended to include this escrow provision. It is true that some of that amending process took place by statements in court, by

letters of counsel, and it would seem to me so there would be no doubt about it that the specific written amendment should be filed.

I would also like to suggest, if your Honor will permit me, Mr. Zazove indicates at this time that the establishment of the escrow fund is something which is very troublesome to him, yet as I read the Commission's supplemental findings of January 9, 1947 it states, "The preferred stockholders of the Streeter group"—that was counsel for the Streeter group, Mr. Condon and Mr. Zazove—"have expressed the fear that the amended plan does not afford adequate protection of their interests in view of the opposition now expressed to the treatment of the preferred and the possibility that some objecting common stockholders may elect to litigate the matter. They have accordingly urged that the plan be further amended to include an escrow provision similar to that outlined in our previous opinion to protect the preferred in the event of litigation."

So, as I understand it, if the Commission's supplemental findings correctly state the course of events before the Commission, it was Mr. Zazove and his associate who urged that an escrow fund be established.

Then the Commission goes on to say it makes a specific finding of fairness with respect to the establishment of that escrow fund, saying, "Only at this stage, and in such event, is there any need to consider the necessity of an escrow arrangement. In such event, to achieve expeditious compliance with the Act and fairness to the persons affected, it would be appropriate for Engineers to make prompt payment of $100 per share and accrued dividends in order to stop the accrual of further dividends, and set up an escrow arrangement, along the lines suggested in our previous opinion, to protect the interests of the various groups."

Zazove

So that you have a specific finding of fairness by the Commission with respect to the establishment of the escrow fund if it is set up, and therefore I don't think Mr. Zazove is accurate in saying that all that the Commission was to make findings as to tax consequences. It made an anticipatory finding of fairness of this plan to include an escrow provision and the termination of all dividends on the hundred dollars principal amount on payment of that amount; and it seems to me the escrow provision and the escrow fund provided is consummate with the Commission's opinion "along the lines suggested in our previous opinion" to use the Commission's words.

As Mr. Slater said, copies of the escrow arrangement were distributed to counsel at the time of the previous hearing. We all had an opportunity to examine them. The amendment made since that time has been slight. The amended escrow arrangement was in the hands of counsel prior to the submission of their briefs to your Honor; so that Mr. Zazove had an opportunity to be heard in his brief at that time and has the further opportunity now.

It seems to me that Mr. Zazove is standing on a highly technical position which is not supported on the merits, and I urge again on the question of the findings that your Honor consider the feasibility of regarding the Commission's findings as compliance with 52(a) with respect to the entire portion of the order save as to the payment of premiums.

The Court: I so intend to accept those findings. This order so provides.

Mr. Slater: Paragraph 1 so recites.

The Court: That is right.

Mr. Zazove: Mr. Berman came into this case after it left the Commission. He apparently did not read our brief that we filed with this Court. That statement in the Commission's supplemental findings is entire inaccurate and is pointed out in our brief that we filed with this Court.

Zazove

The situation which actually occurred was as follows: Following the Commission's order or findings in which it disapproved the payment of the hundred dollars the company filed an amended plan in which it provided that it would pay the call prices, but the Commission had also indicated in its first findings that in the event there was any delay in paying the full amount that the preferred stockholders were to be paid additional compensation for the delay. Under the terms of the plan the company proposed to deposit the call prices with a bank and to immediately pass out practically all of its assets to the common stockholders. It was for that reason that Mr. Condon went down to the Commission and pointed out that the plan did not comply with the Commission's findings, because there was no provision for additional compensation in the event of delay. That was the escrow that Mr. Condon was talking about, and Mr. Berman misleads the Court when he tells you that is this escrow.

The Electric Bond & Share case up in New York has nothing to do with this case. That was a plan filed with the Commission proposing to pay $30 on the preferred stock, and the Commission approved it and they went to court to enforce it, and months later when the company acquired some more money they came in and asked for permission to pay another $70, and the Commission approved that and they went back to court to enforce it, and in that case they gave the preferred stockholders some stubs to indicate their interest in the proceedings, and those stubs can be sold; they have a value. This plan does not give the preferred stockholders any indicia of ownership whatsoever. It is just an indication of the fact that we have never been heard on this escrow. It was submitted to the judge after the hearing. There was no notice sent to the stockholders about it. The escrow is supposed to take care of fees and expenses. The amounts that were included in

that escrow was at a time back before the Commission before we had five other lawyers in the case.

Those are just indications that the preferred stockholders have never been given an opportunity to be heard as to the adequacy of the escrow arrangement.

In addition to that there has always been the issue in this case as to whether the common stockholders had the right to separate this plan so as to terminate the dividends of the preferred stockholders. Originally the plan was written in two parts. It said Part I and it said Part II. The company made a motion to the Commission two years ago asking the Commission to separate the plan so they could stop the dividends. The Commission turned them down. The company filed a new plan in which it took out parts I and II. It was no longer separable but was a single piece of yarn. This is all a last-minute occurrence, this separability stuff.

The Court: Did you wish to be heard, Mr. Esbitt?

Mr. Esbitt: Yes. With respect to the proposed findings of fact and conclusions of law I think rather than burden the Court with two sets, one from Mr. Boehm's office and one from Mr. Berman's office, I was going to suggest that we get together and submit joint findings of fact and conclusions of law from both offices.

The other point Mr. Boehm wished me to make to the Court was with respect to the deposit of $4,000,000. We submit it would be a waste of the funds of the entire corporation to have this amount in cash deposited with the Chase Bank, and we suggest rather than that being done that the $4,000,000 be invested in short term Government securities. While they don't have a large rate of interest, somewhere about seven-eighths of a percent, still it would be better than idle funds. We don't know how long this litigation may continue. It might be a year or two years. The interest rate of one percent or even a little less would

result in $40,000 per year for the benefit of the corporation. It has been suggested that there is a slight risk. I submit to the Court that the risk of these short-term Government securities is so slight that it could not possibly under any circumstances wipe out the interest that would be earned by this $4,000,000, and we think it to the benefit of the corporation and all the parties concerned that the money be invested in the short-term Government securities.

May I submit a short memorandum with respect to that and a proposed order which modifies the submitted order only to the extent that the money be invested rather than deposited in cash.

Mr. Tucker: It is undoubtedly to the interest of the company to get an order entered here which will at least survive the stay period. If there is any point of substance to be raised in the Appellate Court or procedure which would lead to a setting aside of the order or a stay of the order so that we could not go forward with the distribution of the Gulf States stock that would be a serious matter. As I told the Court on the original hearing, this is a market operation. This company is selling the Gulf States common stock and has fixed a price on it of $11.50, and in order for it to be a successful operation the rights which are issued, the so-called warrants, must have some value of sufficient basis so that people will want to buy or sell the warrants if they don't care to exercise them themselves. It is vitally important that that operation be carried out at the earliest possible moment.

On the assumption that an order was to be entered last Thursday or Friday, whenever the time was that the hearing was originally set for, we had assumed that we would take a record for the distribution of the warrants as of June 4 and they would be mailed on the 5th, and that within sixteen days they would expire or have been exercised, and that the operation would have been completed. The com-

pany has been terribly concerned with the weakness of the market and views with a great deal of mental disturbance the possibility of any further delay for fear that the market may get so much worse as to make the operation impossible.

The Court: Well, we have to make a choice, Mr. Tucker. What is it to be?

Mr. Tucker: I realize that fact, and in view of your Honor's apparent doubt about the situation as to whether it is necessary to make findings of fact and conclusions of law prior to the entry of this order I was going to suggest that we do that, but that all possible speed be made in connection with them.

Somebody suggested that they might be ready with them on Friday. Of course, Friday is a holiday. I presume it is a holiday in Delaware, although I don't know. So Friday is not the day, and by naming a day of that kind I had hoped that they meant they could bring them in and your Honor could see them and we could get them settled and back of us.

The Court: I am in this position, Mr. Tucker: I would not hesitate to sign the order as it is today with the amendment suggested by Mr. Slater, and then after Mr. Berman and his associates for the common stockholders, namely, Mr. Boehm and Mr. Esbitt, submit their findings, I would sign an order on them. I am quite willing to do that, but I put the question as to whether, if my action is undone by the Circuit Court, it is going to mean more real injury to the company and all the stockholders if we do that. It is a choice that has to be made by someone.

Mr. Tucker: All right. I was attempting to tell the Court I thought we ought not to take the risk involved, but I was urging on the Court at the same time that speed be exercised and that we don't further delay this market operation in the face of a critical market condition, and

Scheetz

I was wondering whether it would not be possible—I know that Mr. Berman has been working on those findings, because he came to the company office to get some material in connection with them, and it may be that they are in better shape than he has perhaps intimated, and perhaps on Thursday at some time he would be able to get together with Mr. Boehm's representative here and present them and we will all be here.

The Court: Well, Friday is not a Federal holiday. It is a State holiday.

Mr. Scheetz: It has been our purpose here, representing the Home Insurance Company and other groups of preferred stockholders to expedite this all we can and not take any procedural position whatever which would interfere with that. I haven't done anything on request for findings of fact, because, frankly, I expected that this order would be signed and we would have a little more leisure to do that. I think it is correct to say that your Honor's opinion has some rather expansive statements in it and the way the order is worded it says "Jurisdiction is reserved as to matters which are inconsistent"; and while I had not reached any final conclusion it seemed to me that put the burden on us of putting a rather detailed request for findings of fact.

The Court: This Circuit has held, Mr. Scheetz, that you don't have to put everything in the findings; it is only the ultimate facts.

Mr. Scheetz: That is true. It has been my further thought that assuming that the Commission were going to appeal, they could standardize those findings of fact and save time of the Court by not multiplying them or duplicating them. Under the commitments I have made for this week I don't see how I could meet a date of Thursday or Friday.

Scheetz

The Court: Mr. Berman and Mr. Boehm are going to submit me findings, and those are the only findings that I am going to be interested in. They support my view that the premium is not to be paid in this case. That is as far as I am going.

Mr. Slater: I suppose under that arrangement, your Honor, appellants would be free to urge, for example, that a finding that your Honor made had no basis in the record.

The Court: That is right.

Mr. Slater: We would not be bound by those findings because we did not have a chance to be heard.

The Court: That will be your target.

Mr. Slater: Yes.

The Court: I don't understand your suggestion, Mr. Scheetz.

Mr. Scheetz: For example, there are some affirmative findings in your opinion which go to the support of the preferred's position.

The Court: Wouldn't you attack those on appeal?

Mr. Scheetz: No. On the other hand you disregard everything which is inconsistent with that finding. That goes pretty far. I don't know whether the findings as presented by the common stockholders will cover every specific point, so that there may be some major points which when we go up will have a finding by the Commission but no finding whatever by the Court except insofar as they are inconsistent with your opinion, and that is what made we think it needed some study and possibly the presentation of points by the preferred stockholders; but if your Honor does not propose to rule on any submissions by the preferred stockholders then, of course, we would not do it.

The Court: In other words, you want to take a draft of the proposed findings as submitted by the common stockholders and you want to examine them and say as to finding of fact No. 7, for instance, you think there is no basis in the record and you want to argue about that?

Tucker

Mr. Scheetz: No, I don't. There may be some facts which are not referred to in the opinion and not covered in the findings as presented by the common stockholders, and then the only thing that we have to go on is the present opinion which says, in effect, that you negative everything that is inconsistent with your opinion.

The Court: But on appeal can't you point to the record that is before the Commission and say "This is where the fact is and the Court disregarded it"?

Mr. Scheetz: Yes, I suppose so, but certainly I am not going to take any position which would interfere with advancing it, and under those circumstances I think even if I presented any at all it would only be one or two major points.

The Court: As far as the time schedule is concerned you are out for this week?

Mr. Scheetz: I can't touch it until Wednesday, and I probably could get something down here on Thursday, but I am not going to be happy about it.

The Court: Well, suppose we take a five-minute recess and you gentlemen can decide.

(At this point a brief recess was taken.)

Mr. Tucker: If your Honor please, perhaps it would be just as well if Mr. Berman would state the kind of program he thinks he can meet. As I understand it—he can correct me if I am wrong—I guess I am speaking for Mr. Esbitt also—Mr. Berman feels that he can get the findings, as he said, documented for ready reference and checking either mailed on Wednesday or delivered to the Court Thursday morning. I think the problem that we face then is how long the Court is likely to want to check them.

The Court: I will give them my immediate attention. I think I can do it in a day.

Mr. Tucker: You think you can hear counsel within a day, say either on Thursday or some time Friday morning?

The Court: I find now whatever the law is generally, this Circuit has made Memorial Day a holiday. We have a letter from the Judicial Council to that effect.

Mr. Tucker: Would it be asking to much to hear us late on Thursday?

The Court: I will do that, yes.

Mr. Tucker: At the same time, of course, this order should be put in final form and signed after the findings of fact.

The Court: I think before we arrive at a tentative conclusion we better get rid of the short terms under the escrow.

Mr. Tucker: Yes, I think so, too, and I would like to speak to that subject now, if I may. If we are going to change the form of the order substantively I think it ought to be done and gotten in good shape and have some copies available.

This thought of investing the escrow funds is not a new one with Mr. Boehm. The company thought of it——

The Court: What do you mean by "short term"? Six months, a year, two years?

Mr. Tucker: What Mr. Boehm practically has suggested is governments having a maturity not more than three years from the date of purchase. I have some suggestion, but that is what he means, and it is specifically so stated in his amendatory order which he handed to the Clerk.

To give you the background on this thing, we had suggested a secured fund in the first instance and had suggested a pledge of a very considerable amount, whatever amount the Commission might fix, of the stock of Virginia Electric & Power Company, which is one of the subsidiaries, on the theory that we would delay distribution of that stock until the end of the dissolution and liquidation of Engineers; so that any amount of that stock, which had a value of some-

where in the neighborhood of $45,000,000, which is a very large amount of money, it would have been we were offering security of a very considerable amount for $4,000,000 and saying to the Commission "How much of it shall we pledge here to pay?" The Commission said "No, this is a cash fund. Its requirements may become necessary at any time. When they become necessary we have to have the cash right now and we don't want that kind of thing. We don't want the fund invested. We want it deposited in cash."

Now comes along the suggestion that we put it into governments. Now, as a matter of fact, the interest rate is very small. There is some risk of fluctuation; there is some risk of loss. As this thing works, so the bond people tell us, you can put in your subscription for these short-term governments, and they are over-subscribed perhaps fifty or sixty percent, and that means they immediately go to a premium. The escrow agent is not in a position to speculate with this fund. It can only subscribe for what it has to actually invest or reinvest and it can't over-subscribe the way the others do. It will have to, when it gets to maturity of some of these short-terms pay the premiums and it may be you are going to a certain extent, not seriously, perhaps, impair the fund.

The company's position is that there is not a sufficient amount to be gained the way the market on those things operates, and considering the character of the fund we think that it ought to be deposited in cash and ought to be forever ready immediately to be turned loose for the purposes for which it is set up.

In any event, if we are to invest in governments the company has to suggest that we don't take the three-year maturities, but we take the one-year maturities, on the theory that you have much less risk in the one-year maturities than you have in the three—that is, not longer than one year from the date of purchase.

Slater

Now, another point, as Mr. Boehm suggested changing this, he suggested that we buy the bonds in the first instance and deposit them. If we are going to do it at all we ought not to do it that way. We ought to deposit the money and let the escrow agent do it, so that there will be no question but what we have deposited the cash. We ought to deposit the cash and let the escrow agent buy the bonds.

Now, I hate to be technical about it, but I am not sure that in view of the fact that the Commission has specifically considered an invested fund as contrasted with a cash fund and has decided on a cash fund that we ought not to stick to a cash fund, and I don't think there is a sufficient amount to be gained in interest to compensate for the possibility of some loss in the administration of the fund, and I would hope the Court would leave it on the basis of a cash deposit.

The Court: I don't recollect you said what your position was, Mr. Slater.

Mr. Slater: It is our position that we don't object in principle to investing this money in short-term governments, but we don't think the Court ought to require that this be done over the objection of the company who, to a certain extent, is acting as a stakeholder here.

The Court: I don't mind being the judge to review this plan, but I hate to be the company's investment counsel.

Mr. Slater: That is our position.

I would like to take very slight issue with Mr. Tucker on what the Commission had to say about a stock escrow fund. The Commission turned down the proposal that, I believe, then fifty-five or sixty million dollars of Virginia stock be escrowed, not only because that was wholly unreasonable to the relation to the ultimate obligation here, but it would impede what everybody wanted to get here, and that was the speedy dissolution of Engineers and distribution of the assets to its stockholders. It did not seem feasible to the Commission to tie up that major asset

having a value of that amount because of the need or desirability of an escrow fund. So our position is, in effect, similar to the company's in result. We don't think that the Court ought to insist upon it while we don't feel too strongly about doing it that way.

The Court: Well, I have some hesitancy in telling the company to do it when the company itself says that it prefers not to do it, and certainly those who have been with the company I think have more expert knowledge on a matter like that than I. So when you come down on Thursday I think your order should contain the amendments that you referred to this morning, Mr. Slater.

Mr. Slater: Yes, paragraphs 1 and 6.

The Court: I don't think I would approve a provision directing the company to invest in short-terms. If I am wrong in that the Circuit Court will quickly remedy it.

The common stockholders will present their findings to me by sending them in the mail and I will go to work on Thursday morning and I don't see why I could not be in a position to meet with all counsel at three o'clock Thursday afternoon.

Mr. Berman: Your Honor, I am somewhat disturbed about the fact that despite all the hearings we have had and the briefs submitted Mr. Zazove is still here arguing that he has not had a hearing on the merits of the escrow fund. He talks about procedure and then he refers to his objections to the escrow fund on what I would think were the merits and then he concludes by saying that what he has been talking about after all is just procedure and he has not had a hearing on the merits. We think he has, but to eliminate any question of doubt on that and so that Mr. Zazove is not going to be able to come to the Circuit Court and say "Although I pleaded with the judge to give me a hearing on the merits and told him we never have had an opportunity to be heard, he would not do it" I would suggest that your Honor grant Mr. Zazove an oppor-

tunity right here and now once again to further state his objections not on procedural grounds, but on the merits to that fund.

The Court: I don't see how he can improve on the articulation as found in his brief.

Mr. Berman: I would have thought so, but since he said that is merely procedural and still says he has not been heard on the merits I think we ought to knock that prop out from under him and say, "Let us hear you on the merits." I think we ought to give him that opportunity and he should be required to take advantage of it here or forever after hold his peace.

The Court: I think between the time we had our hearing on February 17 and the time that he filed his brief he certainly marshaled every argument at his disposal. I so consider it.

Mr. Berman: That is my impression, your Honor.

The Court: I have nothing before me. The program as announced will follow through. I will see you gentlemen at three o'clock on Thursday.

Mr. Berman: Would it be of any assistance to your Honor if I were to bring the findings down Thursday morning and be available in case your Honor wanted me?

The Court: Yes, I think that is a good suggestion.

(At this point the hearing was adjourned to May 29, 1947, at 3:00 o'clock p. m., Eastern Daylight Saving Time.)

I hereby certify that the foregoing is a true and accurate transcript from my stenographic notes in this proceeding.

HARRY J. BLAN
Official Court Reporter
U. S. District Court

Transcript of Hearing on Plan Held May 29, 1947.

IN THE

DISTRICT COURT OF THE UNITED STATES,

FOR THE DISTRICT OF DELAWARE.

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY.	Civil Action No. 995.

Wilmington, Delaware
May 29, 1947
Three o'clock p. m.

BEFORE:

HON. PAUL LEAHY, U. S. District Court Judge.

APPEARANCES:

HARRY G. SLATER, ESQ., for the Securities and Exchange Commission.

WILLIAM E. TUCKER, ESQ., of Mudge, Stern, Williams & Tucker, of New York, for Engineers Public Service Company.

CALEB R. LAYTON, III, ESQ., and FRANCIS H. SCHEETZ, ESQ., of Philadelphia, Pa., for Home Insurance Co. and other Preferred Stockholders.

FREDERICK ZAZOVE, ESQ., of New York, for Thomas W. Streeter, Dissenting Minority Director of Engineers, and Preferred Stockholders.

Transcript of Hearing on Plan Held May 29, 1947 (Cont'd)

ALFRED BERMAN, ESQ., of Guggenheimer & Untermyer, of New York, for Central-Illinois Securities Corporation and Christian A. Johnson, holders of Common Stock.

Mr. Berman: May it please your Honor, pursuant to your direction I have exhibited to all counsel copies of the original findings which your Honor instructed that they be shown.

The Court: Mr. Slater, you were about to rise to say something?

Mr. Slater: I was going to address myself to the order, your Honor.

The Court: To the order or to the findings?

Mr. Slater: As to the findings, if your Honor wants to hear counsel on that.

The Court: Why can't we take advantage of Rule 52(b)? Within the next ten days if you want to suggest any amendment to the findings you are at liberty to do so. I can sign the findings as they are today, and if there are any further amendments you want to make on them, tell me in advance so I can fix a day for you next week.

Mr. Slater: You mean we would have to study them and study the record, I suppose, to make any intelligent suggestions.

The Court: Rule 52(b) says, "Upon motion of a party made not later than ten days after entry of the judgment the court may amend its findings or make additional findings." So I don't think we are under any particular pressure this afternoon so far as the findings are concerned. After you go through them if you think there is something that should not be there or something that should be added, we will fix a date and have a hearing on them.

Mr. Slater: All right.

The Court: Does anyone else have anything to say with respect to the findings at this time?

Mr. Slater: I don't know, your Honor, how that program might work out in connection with the Appellate aspects of this proceeding. I understand that we are to be in the Circuit Court of Appeals on Monday in connection with an application for stay, if stay is denied in this Court. So that an appeal will have been taken, and it might be a little incongruous to go up there and argue the stay on the case as docketed.

The Court: How are you going to perfect an appeal by Monday? Simply appearing before the Circuit Court to ask for a stay does not mean that your appeal is perfected.

Mr. Slater: No.

The Court: You first have to file notice of appeal here, and your appeal is not an appeal as such until your record is docketed in the Appellate Court. So I don't think that would have any effect.

Mr. Slater: That may be correct, your Honor. I was just concerned with the possible question of the appellate jurisdiction having vested in how the ten-day rule would then operate. It would strike me offhand that the ten days is to be taken advantage of in advance of taking the appeal. Once an appeal was taken perhaps the privilege of 52(b) may have been waived. I don't know.

The Court: My point is that an application for stay is not taking an appeal.

Mr. Slater: Well, there will be a notice of appeal filed previously. I suppose there must be in order to get anything before the Circuit Court in connection with a stay petition. I understand that is Mr. Condon's program.

The Court: All right. I don't have a copy of the order.

Mr. Slater: I have one right here, your Honor.

The Court: There have been three drafts. I want to be certain this is the correct one.

Mr. Slater: I would like to point out the changes to which I understand there is no objection at least as to

form. The first is at the end of the paragraph numbered one on page 3. That has been revised to conform to what is now the fact; namely, the simultaneous filing of findings of fact and conclusions of law. The last clause after the date has been added after May 15.

The Court: Yes.

Mr. Slater: The next change is in paragraph 2. There has been added at the end of the first sentence the words "in such cases allowance or payment to the Engineers preferred stockholders being expressly disapproved."

The Court: Yes.

Mr. Slater: The next change is on page 5 in the paragraph lettered (b) at the end thereof, where there has been added "five days notice of intention to make such deposit having been given."

The Court: What was the purpose of that?

Mr. Tucker: Because the plan required five days notice to the stockholders so they would have an opportunity of having their stock in promptly. It was made at the suggestion of the preferred stockholders.

Mr. Slater: It is a provision in the plan.

The Court: Yes.

Mr. Slater: Paragraph 8 is the next and last one, your Honor, on page 6. The second half of the paragraph has been deleted. Originally that half of the paragraph reserved to the Court jurisdiction to enter the findings of fact and conclusions of law which it is now entering.

The Court: What did you have in mind by using the words "including the approval and any alternative methods meeting the cash requirements of the plan"?

Mr. Slater: Perhaps Mr. Tucker might speak on that. It has relation, as I understand it, to the current market and, of course, changes that might occur which might require some amendment. I suppose there would be further proceedings of an amendatory nature before the Commission and then we would be back here for a supplemental order.

I think paragraph 8 states simply what is the situation, anyway. I think the Court would have inherent jurisdiction to consider any suggested changes in the program or the plan.

Mr. Tucker: The exact suggestion was made by Roger Foster of the Commission's staff in view of the critical condition of the market and the fact that the company might be forced to go back to the Commission and, so-called, sweeten the warrant situation by the addition of some additional stock which might be included in the $11.50 per share.

The Court: Anything further?

Mr. Slater: May I make two very brief comments with respect to the findings, your Honor?

Of course, I have not attempted to check in reading this in the last thirty or forty minutes, but it occurred to me that it might be helpful to all of the parties in presenting this case in the Circuit Court of Appeals to have it clearly stated what your Honor has already stated in the original opinion; namely, that the present investment value of the stock is conceded to be $110.

Mr. Tucker: Well, with respect to two series——

Mr. Slater: Yes, with respect to the other one it is callable at $110 and with respect to the stock it is callable at $105.

On page 6, for example, of the findings in paragraph 16 you state, "In the hearings before the Commission the company contended that the proposed payment was fair and equitable." That was the payment of $100 as originally proposed. It was conceded by the company, however, that the investment value of the stock was equivalent to the call price. While making the contention that the hundred dollars was payable, they nevertheless conceded that the investment value was $100, and that was the testimony of Mr. Barnes, as I recall it. There never was any dispute before the Commission.

The Court: My understanding is simply because that fact is not noted in paragraph 16, that doesn't mean that you can't tell the Circuit Court that that is a fact.

Mr. Slater: That is correct, your Honor, but since you state it yourself in your opinion I was just suggesting, and not arguing for it or insisting on it, that it might make for clarity and convenience both if it were also in here.

The Court: You stated you had another comment?

Mr. Slater: Yes, it is at the end of No. 16, too, on page 7, the last sentence. It is stated there that the Commission gave its advance approval to any amendment. Now, used very loosely I have no objection to "amendment", but what did not occur and what has not occurred is that the plan has been amended. The Commission expressly refused to amend the plan and said if an escrow turns out to be necessary it can be done under the aegis of the Court, and we have viewed the escrow device simply as a device in connection with the mechanics of consummation.

The Court: In other words, you say that is not an amendment in the sense that Mr. Zazove uses.

Mr. Slater: Correct. I don't think it is our contention, at least, that Mr. Zazove has any legal argument to make, because he has no facts to predicate an argument on, because the plan has not been amended.

The Court: What is your suggestion?

Mr. Slater: "The Commission gave its advance approval to any arrangement which might be made in the District Court looking toward the establishment of an escrow fund," and so forth.

The Court: I am inserting the following: "The Commission gave its advance approval to any arrangement that might be made in the District Court to establish an escrow fund," et cetera.

Mr. Slater: Thank you, your Honor. That is all I have.

Mr. Zazove: With respect to the findings I just have one comment. I am not dissenting in these or agreeing in them, but I am making one comment with respect to inaccuracy which maybe the Court will be interested in: I think it is in paragraph 25, page 11, the second full paragraph on that page. It states there that as of February 13, 1946 "the

latest date covered by the hearing before the Commission." I believe that is an inaccurate statement because the Commission reopened the case in 1947 and reopened the record for the purposes of testimony, so that is not really an accurate statement. I don't care whether it is corrected or not, but I am just pointing it out.

The Court: What about it, Mr. Berman?

Mr. Berman: Well, that statement was taken from the Commission's Findings and Opinion of December 5.

Mr. Zazove: But the record was opened subsequently.

Mr. Berman: It may be that there was a subsequent hearing after the issuance of those findings.

The Court: Let us be accurate. "As of February 13, 1946" then strike out the "latest date covered by the hearing before the Commission."

Mr. Zazove: It is also in paragraph 32, your Honor.

The Court: The same deletion will take place in paragraph 32, line 2, where the word "the" will come out and on line 3 the words "latest date covered by the hearings before the Commission."

Mr. Zazove: On that same paragraph it says, "On February 17, 1947, the date preceding the hearing before this Court." That is not accurate because I think the hearing took place before the Court on that date.

The Court: That is right. I remember the date. Take out the word "preceding", leaving it "the date of the hearing."

Mr. Berman: That same revision, your Honor, should be made back on page 11 where the price of the preferred stocks is discussed.

The Court: The word "preceding" will be taken out after the word "date" and the word "of" will be inserted.

Mr. Zazove: Those are all the inaccuracies that I discovered. That is all I have to say about the findings. I take it that the Court has signed the order?

The Court: No, I haven't signed the order.

Transcript of Hearing on Plan Held May 29, 1947 (Cont'd)

Mr. Zazove: I am not ready to be heard in that phase of it except to renew our objections to the entry of the order. I don't want the record to indicate that we are concurring in this.

I would like to be heard after the order is entered or signed.

The Court: Today?

Mr. Zazove: Yes.

The Court: What is the purpose of that?

Mr. Zazove: I want to file a petition of Mr. Streeter for stay of the consummation.

The Court: You understand, gentlemen, when I sign these findings it is in the form where words are crossed out and paragraphs have been deleted. While I am signing this to make it legally effective as of today, I will have my secretary retype it on Monday and send you each a copy.

I am signing the findings right now. I am signing the order now, too.

Mr. Zazove: If your Honor please, I would like to present a petition for a stay of the order and consummation of the plan. There is attached an affidavit of Thomas W. Streeter, who is Director of Engineers Public Service Company and a Preferred Stockholder. I would also like to present to you a very short memorandum in support of the petition, and I am going to distribute copies to the other counsel.

The Court: This is Mr. Condon's. Are you both together?

Mr. Zazove: That is right. I am in Mr. Condon's office.

If your Honor please, I have served all parties with copies of the petition and in the interest of saving time I prefer, if the Court pleases, that he read the petition and the memorandum.

The Court: To get a stay you would have to put up a supersedeas bond.

Mr. Zazove: To get a stay automatically——

The Court: Yes.

Mr. Zazove: There is no judgment, and as far as I can see from the Rules of Civil Procedure——

The Court: But you deprive persons from that which the decree says is theirs.

Mr. Zazove: We have some decisions in our memorandum which indicate that it is within the inherent powers of a court of equity to stay the effect of an order which changes the status quo.

The Court: I never heard of a stay without a supersedeas bond.

Mr. Zazove: It is within the Court's discretion, your Honor, to waive a bond. This is the type of proceeding where it would be impossible for the preferred stockholders to post a bond. They are unorganized and scattered throughout the country. We are asking leave to maintain the status quo, because otherwise if we are right our appeal will have been futile, because the plan will have been consummated.

The Court: This first paragraph on page 2 of the memorandum says, "The Court's order permits, and the Company intends, the distribution of substantially all of the Company's assets prior to the time when an appeal can be heard and determined. In the event the Circuit Court of Appeals decides that the Court's order was improper and/or the escrow was inadequate, the preferred stockholders will have suffered irreparable damage and their appeal would be futile, since the plan would already be consummated."

You don't have to complete your appeal to ask for a stay. You can find any appellate judge and ask for a stay if you can get him tonight.

Mr. Zazove: That is absolutely correct, your Honor, and the rules of the Third Circuit require that we make prior application to the District Court.

The Court: Mr. Zazove, I can't think of a situation where after I have ordered that something can be done, then

to turn around and negative my jural facts and issue a stay. While you have the power and it may be exercised in some instances where acts are ordered to be done or found in the decree or judgment, you would simply negative what you have already found to be the jural fact; so under those circumstances I have said I will let my elder brother grant the stay, and they have done it.

Mr. Zazove: I think Mr. Slater will bear me out that this is the first instance that I know of where a plan was approved by the Securities and Exchange Commission and there were further appeals beyond the District Court where there was an attempt to consummate the plan before the hearing in the Court of Appeals.

The Court: I know; but if you have merit to your contention you have six separate Court judges in the Third Circuit who can listen to it.

The prayer in the petition for stay is hereby denied. I wish you would prepare an order to that effect.

Mr. Zazove: Could you write it right on the petition, your Honor, to save trouble?

The Court: Yes.

Mr. Zazove: I have one further request and I am through, and that is this: We intend to perfect an appeal as promptly as possible, and I would like to know from the Court if it would be possible to have the Court's order which you have just signed entered now so that we can perfect an appeal?

The Court: As soon as we are through will you enter it on the docket, Mr. Clerk?

The Clerk: I will be glad to, sir.

The Court: Anything further?

Mr. Slater: I just want to thank your Honor for your courtesies in helping us work out our schedule here and for the time given the Commission this week.

(At this point the hearing was adjourned.)

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement

I hereby certify that the foregoing is a true and accurate transcript from my stenographic notes in this proceeding.

HARRY J BLUM
Official Court Reporter
U. S. District Court

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement.

February 7, 1947

SECURITIES AND EXCHANGE COMMISSION
18th and Locust Streets
Philadelphia 3, Pa.

Dear Sirs:

The Supplemental Findings and Opinion of the Commission made and filed January 8, 1947, in consolidated cause entitled In the Matter of Engineers Public Service Company, et al, (SEC File No. 54-132, File No. 70-1149, File No. 70-1150 and File No. 70-1419) make reference to the possibility that provision may hereafter be made for the establishment of an escrow and for incidental program changes in the event of a contest respecting the issue whether the holders of Preferred Stock of Engineers should receive for such shares more than $100 and accrued dividends.

However, an examination of the Order Approving Amended Plan in said consolidated cause entered the 8th

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

day of January, 1947, reveals that no provision is made therein for some of the steps which will be necessary in order to carry out the Amended Plan in the event that such escrow shall be established and changes in the program made which are incidental thereto. Our tax counsel points out that such failure might leave such transactions outside the protection afforded by Supplement R and Section 1808(f) of the Internal Revenue Code, since such steps will, under such circumstances, not have been specified and itemized in an order of the Commission which has become or becomes final in accordance with law as required by the tax statute.

Accordingly, we hereby request that the Commission enter an order of amendment in said consolidated cause which shall correct that failure by specifying the transactions which will take place if such escrow is established and the incidental changes consequent thereon made. For your information as to the form which we believe said order of amendment should take if the protection afforded by said Supplement R and Section 1808(f) is to be clearly applicable to the program changes incident to the establishment of such escrow (as well as to the steps not affected by said escrow), we are attaching hereto suggested provisions for inclusion in such order of amendment, and we respectfully request the adoption by the Commission of such an order of amendment.

Respectfully submitted,

ENGINEERS PUBLIC SERVICE COMPANY

By D. C. BARNES
President

[Proposed Order of Amendment, as enclosed]

Our order of January 8, 1947, approving the amended plan is amended to read as follows:

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

(a) The sixth full paragraph of said order is amended to read:

"The Commission having found that the amended plan of reorganization is necessary to effectuate the provisions of Section 11(b) and is fair and equitable to the persons affected thereby, and the Commission having further found that said declarations, as amended, should be permitted to become effective, and the Commission having further found that, if there appears to be a likelihood of litigation beyond the District Court with regard to the right of the preferred stockholders of Engineers to receive in respect to their stock any amount in excess of $100 per share and accrued dividends, it is advisable, in order to avoid possibility of delay in the carrying out of the whole plan until such controversy is determined, to provide for escrowing such additional amount, plus appropriate compensation for the delay in payment of any additional amount found to be due and payable, to await the outcome of any such litigation and to make the incidental changes in the program for carrying out the amended plan which such an escrow entails, and that in such circumstances such escrow and changes in the program are necessary and appropriate to effectuate the provisions of said Section 11(b) and are fair and equitable to the persons affected thereby;".

(b) The said order is amended by substituting a semi-colon for the period at the end of the sub-paragraph numbered VIII appearing at the end of said order and adding the following:

"provided, however, that if counsel for Engineers, in the course of the enforcement proceeding and at

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

anytime before the approval of the amended plan by the United States District Court, shall state to the District Court that Engineers has determined that it appears likely that some holder or holders of Engineers' common stock will litigate beyond the District Court the payment to the Engineers preferred stockholders of any amount in addition to $100 per share and accrued dividends and that Engineers accordingly desires to follow the alternative method of effectuating the plan through the use of an escrow, then counsel for the Commission shall present to said District Court a form of a proposed decree or order of said Court, setting forth a proposed escrow agreement and the incidental changes in the program which the establishment of the escrow involves and in such event (a) all references in this amended order to the amended plan shall be deemed to be to the amended plan as affected by the establishment of such escrow and the making of such incidental program changes, (b) the references to warrants in subparagraphs I through IV above shall be deemed to be to warrants providing for assigning to the Engineers $5 preferred stock, $5.50 preferred stock and $6 preferred stock, a value of $100 per share plus accrued dividends to the expiration date of the warrant and providing that any holder of Engineers preferred stock who surrenders his stock in exchange for Gulf States common stock will, in respect of such surrendered shares, have the right to receive the same amount which holders of such preferred stock not so surrendering their stock will receive in addition to $100 per share plus accrued dividends if any such amount is finally determined to be payable, and (c) sub-paragraphs II and IV above shall be deemed to read as follows:

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

'II. Pursuant to the provisions of the above mentioned warrants, Engineers will transfer and deliver Gulf States common stock to those persons who exercise said warrants before the expiration date thereof, and upon such exercise the holders of said warrants will either (1) pay Engineers $11.50 for each share of Gulf States common stock so acquired, or (2) deliver to Engineers in exchange for said Gulf States common stock whole shares of Engineers preferred stock on the basis of equivalent values, assigning $11.50 per share for each share of Gulf States common stock, and $100 plus accrued dividends to the expiration date of the warrant for each share of Engineers preferred stock; provided that, on the basis of the relative values above stated, the value of the whole shares of Engineers preferred stock to be exchanged under the warrants will not exceed the value of the shares of Gulf States common stock which the warrant holder is entitled to and intends to acquire, and to the extent that the value of such shares of Engineers preferred stock exchanged for Gulf States common stock under said warrants is less than the value of such shares of Gulf States common stock to which the warrant holder is entitled and intends to acquire, the difference will be paid by the warrant holder to Engineers in cash. Any holder of Engineers preferred stock who surrenders his stock in exchange for Gulf States common stock will, in respect of such surrendered shares, have the right to receive the same amount which holders of such preferred stock not so surrendering their stock will receive in addition to

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

$100 per share plus accrued dividends if any such amount is finally determined to be payable.

* * * * * *

'IV. After completion of the disposition of the Gulf States common stock, Engineers will

(a) deposit in trust, for the benefit of Engineers preferred stockholders who have not surrendered their preferred stock in exchange for Gulf States common stock, with a solvent bank or trust company an amount equal to $100 per share plus accrued dividends to the date of such deposit, in respect of each such share; and

(b) deposit with a solvent bank or trust company in escrow the sum of $4,000,000 in cash, pursuant to the provisions of an escrow agreement which provides, among other things,

'(i) for payment to holders of preferred stock of Engineers, in addition to the $100 per share and accrued dividends to be allowed on exchange for Gulf States common stock or to be deposited in trust as above provided in respect of shares not so exchanged of $5 per share in respect of each share of $5 preferred stock and $10 per share in respect of each share of $5.50 preferred stock and $6 preferred stock, plus in each case an amount equal to simple interest on the amount so paid at a rate per annum equal to 4.76% in the case of $5 preferred stock, 5% in the case of $5.50 preferred stock and 5.45% in the case of $6 preferred stock from the date of said

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

escrow agreement to the date of such payment, upon delivery to the escrow agent of an opinion of independent counsel to the effect (1) that the District Court of the United States for the District of Delaware in Civil Action No. 995 has entered a decree or order approving the amended plan, including the payment to holders of Engineers preferred stock of the amount, above specified, equal to the respective redemption premiums on their shares with interest as aforesaid, and directing its enforcement, (2) that no holder of Engineers common stock has made timely appeal from such decree or order, or, in the alternative, that a holder or holders of Engineers common stock has made such a timely appeal but that the appellate court or courts have approved said decree or order approving the amended plan entered by said District Court as aforesaid, and (3) that such decree or order has become final as against the holders of Engineers common stock and is no longer subject to appeal by them;

(ii) for payment to the Engineers preferred stockholders, of the amounts specified in said final order upon delivery to the escrow agent of a certified copy of an order of the Commission or an order or decree of the United States District Court or any appellate court directing or permitting the distribution to the holders of preferred stock of some part of the amount deposited in escrow, but less than the amounts specified in subdi-

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

vision (i) above, together with an opinion of independent counsel that such order or decree has become final and is not subject to appeal; and

(iii) for payment of certain fees, compensation, remuneration and expenses pursuant to order of the Commission and for repayment to Engineers of amounts not payable to preferred stockholders or for fees, compensation, remuneration or expenses.

Such amounts will be deposited in cancellation of all of the Engineers preferred stock. The holders of Engineers preferred stock who have not surrendered the same in exchange for Gulf States common stock will surrender such stock to the trustee above mentioned against payment of the amounts deposited in trust in accordance with subdivision (a) above in respect of their shares, and all holders of Engineers preferred stock will receive so much of the said $4,000,000 as may be determined to be payable to them in accordance with said escrow agreement.' "

Exhibit 1

Escrow Agreement.

February ....., 1947.

.....

.....

New York, N. Y.

Dear Sirs:

1. The undersigned, Engineers Public Service Company (Incorporated) (Engineers) herewith hands you as Escrow Agent hereunder, its check in the amount of $4,000,000, which is the amount required to be deposited in escrow by the Engineers' "Plan Pursuant to Section 11(e) of the Public Utility Holding Company Act of 1935 for Divestment of Assets and Related Matters", as amended by amendments to and including Amendment No. 6, dated December 30, 1946, as changed to include this Escrow Agreement and certain program changes incidental thereto (which amended Plan, with such changes, is hereinafter referred to as "the Plan"), a copy of which Plan has been delivered to you. Said sum of $4,000,000 is made up of the following amounts:

(a) The sum of $3,204,795, being an amount equal to $5 per share in respect of 143,951 outstanding shares of the $5 Dividend Convertible Preferred Stock ($5 Preferred) of Engineers; $10 per share in respect of the outstanding 183,406 shares of $5.50 Cumulative Dividend Preferred Stock ($5.50 Preferred) of Engineers; and $10 per share in respect of the 65,098 outstanding shares of $6 Cumulative

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

Dividend Preferred Stock ($6 Preferred) of Engineers.

(b) The sum of $484,325, being an amount equal to simple interest for three years at a rate per annum of 4.76% in the case of the Engineers $5 Preferred, 5% in the case of the Engineers $5.50 Preferred, and 5.45% in the case of the Engineers $6 Preferred on the amounts set forth in (a) above in respect of each of said series.

(c) The sum of $310,880, to provide for the payment of all fees and other compensation and all remuneration or expenses claimed or hereafter claimed by any persons in connection with the Plan, the transactions incident thereto and the consummation thereof, approved by the Securities and Exchange Commission (hereinafter called the Commission).

2. Upon delivery to you of an opinion of independent counsel (as defined in paragraph 6 hereof), to the effect (1) that the District Court of the United States for the District of Delaware in Civil Action No. 995 has entered a decree or order approving the Plan, including the payment to holders of Engineers preferred stock of the amount, below specified, equal to the respective redemption premiums on their shares, and directing its enforcement, (2) that no holder of Common Stock of Engineers has made timely appeal from such decree or order or, in the alternative, that a holder or holders of Common Stock of Engineers has made such a timely appeal but that the appellate court or courts have approved said decree or order approving the Plan entered by said District Court as aforesaid and (3) that such decree or order has become final as against the

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

holders of Common Stock of Engineers and is no longer subject to appeal by them, you shall release and pay over to the holders of Preferred Stock out of the amounts deposited with you pursuant to clauses (a) and (b) of paragraph 1 hereof, the amount of $5 per share in respect of each share of $5 Preferred, the amount of $10 per share in respect of each share of $5.50 Preferred and the amount of $10 per share in respect of each share of $6 Preferred, plus in each case an amount equal to simple interest on the amount so paid at a rate per annum equal to 4.76% in the case of the Engineers $5 Preferred, 5% in the case of the Engineers $5.50 Preferred, and 5.45% in the case of the Engineers $6 Preferred from the date hereof to the date of such payment. Such payment is to be made by mailing the same to the holders of Preferred Stock of record at the date hereof (or in the case of shares of Preferred Stock which shall have been surrendered in exchange for Common Stock of Gulf States Utilities Company pursuant to the provisions of (b) of paragraph 1 of Division C of the Plan, at the date of such surrender), and you shall be entitled to rely upon a list or lists furnished you by The Chase National Bank of the City of New York and Stone & Webster Service Corporation, Transfer Agents for the Preferred Stock, or either of them, as to the names of such registered holders and their mailing addresses. Any balance of the sum deposited with you pursuant to clause (b) of paragraph 1 hereof shall be paid over to Engineers.

3. Upon delivery to you of (a) a certified copy of an order of the Commission in the proceedings now pending before it in File No. 53-132 or in consolidated proceedings including File No. 53-132, File No. 70-1149, File No. 70-1150, and File No. 70-1419, or a certified copy of an order or decree of the District Court of the United States for the District of Delaware or any appellate court, directing or

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

permitting the distribution to the holders of Preferred Stock of some part of the amount deposited pursuant to clauses (a) and (b) of paragraph 1 hereof; but less than the amounts specified in paragraph 2 hereof, and (b) an opinion of independent counsel to the effect that such order of the Commission or such court order or decree has become final and is not subject to appeal, you shall release and pay over to the holders of Preferred Stock entitled thereto, pursuant to the terms of such order, in the manner provided in paragraph 2 hereof, the respective amounts to which such holders shall be entitled pursuant to such order, and you shall release and pay over to Engineers the balance of said sum deposited pursuant to clauses (a) and (b) of paragraph 1 hereof.

4. Upon delivery to you of (a) a certified copy of an order of the Commission in the above mentioned proceedings or a certified copy of the order or decree of the above mentioned District Court or any appellate court, determining or finding that the holders of the Preferred Stock are not entitled to receive any amounts in addition to the amount of $100 per share plus accrued dividends to be allowed to Preferred Stockholders on exchange of shares of Preferred Stock for Gulf States Common Stock or to be deposited in trust for Preferred Stockholders who shall not have so exchanged their shares of Preferred Stock, all as provided in paragraph 3 of Division C of the Plan, and (b) an opinion of independent counsel to the effect that such order or decree has become final and not subject to appeal, you shall release and pay over to Engineers all sums deposited with you pursuant to clauses (a) and (b) of paragraph 1 hereof.

5. Upon delivery to you of (a) a certified copy of the order of the Commission in the above mentioned proceed-

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

ings approving payment to specified persons of fees and other compensation, remuneration and expenses, and (b) an opinion of independent counsel to the effect that such order has become final and not subject to appeal, you shall release and pay over to the persons designated in said order out of the amounts deposited pursuant to clause (c) of paragraph 1, the respective amounts specified in said order, and after deducting the amount of your fees and expenses and the compensation of your counsel in accordance with the provisions of paragraph 8 hereof, you shall pay over to Engineers any balance of said sum.

6. The term "independent counsel" as used herein shall mean counsel selected by you who shall not have entered their appearance in the above mentioned proceedings before the Commission or in the above mentioned court proceedings as counsel for any party or participant, but who may be counsel regularly retained by you.

7. You shall not be liable for any action taken or omitted to be taken by you hereunder in good faith, or for any act, mistake or omission of any agent employed by you. You shall be fully protected in any action taken or omitted to be taken pursuant to advice of counsel.

8. You shall be entitled, subject to the approval of the Commission, to reasonable compensation for your services hereunder and reimbursement of your reasonable expenses, including fees and disbursements of your counsel and any independent counsel selected by you for the purposes of paragraphs 2, 3 or 4 hereof, and for the payment of such compensation or reimbursement, you shall have a lien upon any amounts deposited with you pursuant to clause (c) of paragraph 1 hereof.

9. You may, at any time, resign by giving 30 days' notice in writing to Engineers of your intention so to do.

Letter of Engineers to Securities and Exchange Commission, Dated February 7, 1947, Enclosing Proposed Order of Amendment and Draft of Escrow Agreement (Cont'd)

In case of any such resignation, or in case you shall become unable to act hereunder, Engineers will promptly appoint a successor Escrow Agent, which shall be a trust company or bank with trust powers having its principal office in the Borough of Manhattan, City and State of New York and having a capital and surplus of more than $1,000,000. Upon payment of any sums held by you hereunder to any such successor Escrow Agent, you shall be discharged from all further liability hereunder. Any successor to your business shall forthwith become successor Escrow Agent hereunder without further action on the part of Engineers.

The signature of your duly authorized officer in the space provided below will evidence your acceptance of your appointment as Escrow Agent hereunder and your acknowledgement of receipt of Engineers' check for $4,000,000 referred to in paragraph 1 hereof, the proceeds of such check to be held and disposed of by you in accordance with the provisions hereof.

Very truly yours,

ENGINEERS PUBLIC SERVICE COMPANY
(INCORPORATED)

By.....
President

The undersigned hereby accepts its appointment as Escrow Agent hereunder and acknowledges receipt of the above mentioned check for $4,000,000.

.....

By.....

Escrow Agreement.

....., 1947.

THE CHASE NATIONAL BANK OF THE CITY OF NEW YORK,
11 Broad Street,
New York 15, N. Y.

Dear Sirs:

1. The undersigned, Engineers Public Service Company (Incorporated) (Engineers) herewith hands you as Escrow Agent hereunder, its check in the amount of $4,000,000, which is the amount required to be deposited in escrow by the Engineers' "Plan Pursuant to Section 11(e) of the Public Utility Holding Company Act of 1935 for Divestment of Assets and Related Matters", as amended by amendments to and including Amendment No. 6, dated December 30, 1946, as changed to include this Escrow Agreement and certain program changes incidental thereto (which amended Plan, with such changes, is hereinafter referred to as "the Plan"), a copy of which Plan has been delivered to you. Said sum of $4,000,000 is made up of the following amounts:

(a) The sum of $3,204,795, being an amount equal to $5 per share in respect of 143,951 outstanding shares of the $5 Dividend Convertible Preferred Stock ($5 Preferred) of Engineers; $10 per share in respect of the outstanding 183,406 shares of $5.50 Cumulative Dividend Preferred Stock ($5.50 Preferred) of Engineers; and $10 per share in respect of the 65,098 outstanding shares of $6 Cumulative Dividend Preferred Stock ($6 Preferred) of Engineers.

(b) The sum of $484,325, being an amount equal to simple interest for three years at a rate per annum of 4.76% in the case of the Engineers $5 Preferred, 5% in the case of the Engineers $5.50 Preferred, and

Escrow Agreement (Cont'd)

5.45% in the case of the Engineers $6 Preferred on the amounts set forth in (a) above in respect of each of said series.

(c) The sum of $310,880, to provide for the payment of all fees and other compensation and all remuneration or expenses claimed or hereafter claimed by any persons, in connection with the Plan, the transactions incident thereto and the consummation thereof, approved by the Securities and Exchange Commission (hereinafter called the Commission).

2. Upon delivery to you of an opinion of independent counsel (as defined in paragraph 6 hereof), to the effect (1) that the District Court of the United States for the District of Delaware in Civil Action No. 995 has entered a decree or order approving the Plan, including the payment to holders of Engineers preferred stock of the amount, below specified, equal to the respective redemption premiums on their shares, with interest thereon, and directing its enforcement, (2) that no holder of Common Stock of Engineers has made timely appeal from such decree or order or, in the alternative, that a holder or holders of Common Stock of Engineers has made such a timely appeal but that the appellate court or courts have approved said decree or order approving the Plan entered by said District Court as aforesaid and (3) that such decree or order has become final as against the holders of Common Stock of Engineers and is no longer subject to appeal by them, you shall release and pay over to the holders of Preferred Stock out of the amounts deposited with you pursuant to clauses (a) and (b) of paragraph 1 hereof, the amount of $5 per share in respect of each share of $5 Preferred, the amount of $10 per share in respect of each share of $5.50 Preferred and the amount of $10 per share in respect of each share of $6 Preferred, plus in each case an amount equal to simple interest, computed on the basis of 360

days per year, on the amount so paid at a rate per annum equal to 4.76% in the case of the Engineers $5 Preferred, 5% in the case of the Engineers $5.50, and 5.45% in the case of the Engineers $6 Preferred from the date hereof to the date of such payment. Such payment is to be made by mailing the same to the persons who were the registered holders or assignees of registered holders of such Preferred Stock at the time their certificates for such stock were surrendered, either in exchange for Common Stock of Gulf States Utilities Company or upon payment to them of $100 per share and accrued dividends, all as provided in the Plan. You shall be entitled to rely upon a list or lists furnished you by The Chase National Bank of the City of New York and Stone & Webster Service Corporation, Transfer Agents for the Preferred Stock, or either of them, as to the names of such registered holders or their assignees at the time of such surrender and their mailing addresses. Any balance of the sum deposited with you pursuant to clause (b) of paragraph 1 hereof shall be paid over to Engineers.

3. Upon delivery to you of (a) a certified copy of an order of the Commission in the proceedings now pending before it in File No. 53-132 or in consolidated proceedings including File No. 53-132, File No. 70-1149, File No. 70-1150, and File No. 70-1419, or a certified copy of an order or decree of the District Court of the United States for the District of Delaware or any appellate court, directing or permitting the distribution to the holders of Preferred Stock of some part of the amount deposited pursuant to clauses (a) and (b) of paragraph 1 hereof, but less than the amounts specified in paragraph 2 hereof, and (b) an opinion of independent counsel to the effect that such order of the Commission or such court order or decree has become final and is not subject to appeal, you shall release and pay over to the holders of Preferred Stock entitled thereto, pursuant to the terms of such order, in the manner provided

Escrow Agreement (Cont'd)

in paragraph 2 hereof, the respective amounts to which such holders shall be entitled pursuant to such order, and you shall release and pay over to Engineers the balance of said sum deposited pursuant to clauses (a) and (b) of paragraph 1 hereof.

4. Upon delivery to you of (a) a certified copy of an order of the Commission in the above mentioned proceedings or a certified copy of the order or decree of the above mentioned District Court or any appellate court, determining or finding that the holders of the Preferred Stock are not entitled to receive any amounts in addition to the amount of $100 per share plus accrued dividends to be allowed to Preferred Stockholders on exchange of shares of Preferred Stock for Gulf States Common Stock or to be deposited in trust for Preferred Stockholders who shall not have so exchanged their shares of Preferred Stock, all as provided in the Plan, and (b) an opinion of independent counsel to the effect that such order or decree has become final and not subject to appeal, you shall release and pay over to Engineers all sums deposited with you pursuant to clauses (a) and (b) of paragraph 1 hereof.

5. Upon delivery to you of (a) a certified copy of the order of the Commission in the above mentioned proceedings approving payment to specified persons of fees and other compensation, remuneration and expenses, and (b) an opinion of independent counsel to the effect that such order has become final and not subject to appeal, you shall release and pay over to the persons designated in said order out of the amounts deposited pursuant to clause (c) of paragraph 1, the respective amounts specified in said order, and after deducting the amount of your fees and expenses and the compensation of your counsel in accordance with the provisions of paragraph 8 hereof, you shall pay over to Engineers any balance of said sum.

Escrow Agreement (Cont'd)

6. The term "independent counsel" as used herein shall mean counsel selected by you who shall not have entered their appearance in the above mentioned proceedings before the Commission or in the above mentioned court proceedings as counsel for any party or participant, but who may be counsel regularly retained by you.

7. You shall not be liable for any action taken or omitted to be taken by you hereunder in good faith, or for any act, mistake or omission of any agent employed by you. You shall be fully protected in any action taken or omitted to be taken pursuant to advice of counsel.

8. You shall be entitled, subject to the approval of the Commission, to reasonable compensation for your services hereunder and reimbursement of your reasonable expenses, including fees and disbursements of your counsel and any independent counsel selected by you for the purposes of paragraphs 2, 3 or 4, hereof, and for the payment of such compensation or reimbursement, you shall have a lien upon any amounts deposited with you pursuant to clause (c) of paragraph 1 hereof.

9. You may, at any time, resign by giving 30 days' notice in writing to Engineers of your intention so to do. In case of any such resignation, or in case you shall become unable to act hereunder, Engineers will promptly appoint a successor Escrow Agent, which shall be a trust company or bank with trust powers having its principal office in the Borough of Manhattan, City and State of New York and having a capital and surplus of more than $1,000,000. Upon payment of any sums held by you hereunder to any such successor Escrow Agent, you shall be discharged from all further liability hereunder, and the successor Escrow Agent shall become the Escrow Agent hereunder with like effect as if originally designated Escrow Agent hereunder. Any successor to your business shall forthwith become successor

Escrow Agreement (Cont'd)

Escrow Agent hereunder without further action on the part of Engineers.

The signature of your duly authorized officer in the space provided below will evidence your acceptance of your appointment as Escrow Agent hereunder, and your acknowledgement of receipt of Engineers' check for $4,000,000 referred to in paragraph 1 hereof, the proceeds of such check to be held and disposed of by you in accordance with the provisions hereof.

Very truly yours,

ENGINEERS PUBLIC SERVICE COMPANY
(Incorporated)

By.....
President

The undersigned hereby accepts its appointment as Escrow Agent hereunder and acknowledges receipt of the above mentioned check for $4,000,000.

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

IN THE

DISTRICT COURT OF THE UNITED STATES,

FOR THE DISTRICT OF DELAWARE.

IN THE MATTER *of* ENGINEERS PUBLIC SERVICE COMPANY.	A Proceeding to Enforce a Plan Pursuant to Sections 11(e) and 18(f) of the Public Utility Holding Company Act of 1935. Civil Action No. 995.

A certain plan to effectuate the provisions of Section 11(b) of the Public Utility Holding Company Act of 1935 (hereinafter called the "Act") having been filed with the Securities and Exchange Commission (hereinafter called the "Commission") by Engineers Public Service Company, a registered holding company under the Act (hereinafter called "Engineers"); said plan being dated as of September 10, 1945, and thereafter amended to and including Amendment No. 6 thereto, dated December 30, 1946, being in the form set forth in Exhibit C annexed to the application herein; and the Commission, after notice and opportunity for hearing, having found in its Supplemental Findings and Opinion and Order entered January 8, 1947, said plan as so amended necessary to effectuate the provisions of subsection (b) of Section 11 of the Act and fair and equitable to the persons affected thereby and approved the plan as so amended; and the Commission by its Order of Amendment, dated February 11, 1947, a copy of which was attached as Exhibit F to "Exhibit 1" to the Motion to Amend Application to Enforce Plan, filed in this Court on February 13, 1947, having found that if, in the course of securing court approval and enforcement of said plan, it should appear that protracted litigation might ensue

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

over the question of the amount payable to the preferred stockholders of Engineers and thereby impede expeditious enforcement of the plan and compliance with the Act, it would be in conformity with said Act and the Commission's Findings and Opinion to separate the contested issue from the uncontested issues and consummate the uncontested portion of the plan; and counsel for Engineers in the course of this proceeding having stated to this Court that Engineers has determined that it desires to follow the alternative method of effectuating the plan through the use of an escrow; and counsel for the Commission having presented to this Court a form of proposed decree or order of this Court setting forth a proposed form of escrow agreement and such incidental changes in the carrying out of the plan which the establishment of the escrow involves, substantially as described in said Order of Amendment, said plan as amended by amendments to and including Amendment No. 6 thereto dated December 30, 1946, and supplemented to include an escrow agreement and certain incidental changes, being hereinafter called "Plan"; and Engineers having requested the Commission to apply to a Court to enforce and carry out the terms and provisions of the Plan; and the Commission having on January 9, 1947, filed with this Court an Application, amended as aforesaid, to enforce and carry out the terms and provisions of the Plan; and this Court by Order dated January 9, 1947, having fixed February 17, 1947, as the date for hearing upon the Plan and having prescribed the notice to be given of such hearing, the time within which any objections might be made to the Plan and the manner of making such objections; and it appearing from the affidavit of the Secretary of Engineers that due and sufficient notice of said hearing was given substantially in accordance with the provisions of said Order of January 9, 1947; and objections having been filed by certain stockholders of Engineers to the Plan; a hearing

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

on the Plan having been duly held by this Court in accordance with the provisions of said Order of January 9, 1947; and the Commission, Engineers and certain common and preferred stockholders of Engineers having appeared by their counsel and having been heard; and this Court having duly considered the Plan, the objections and the evidence, the Court being fully advised in the premises:

IT IS HEREBY FOUND, ORDERED, ADJUDGED AND DECREED:

1. The Court hereby adopts as its findings of fact and conclusions of law the findings of fact and conclusions set forth in the Findings and Opinions of the Commission dated December 5, 1946 and January 8, 1947, being Exhibits B and E to the Commission's application herein, except insofar as said findings and conclusions of the Commission relate to the payment to the preferred stockholders of any amounts in excess of $100 per share and accrued dividends and are inconsistent with the opinion of this Court issued May 15, 1947.

2. Subject to the terms and conditions of the Commission's Order of January 8, 1947, as amended by its said Order of Amendment of February 11, 1947, the Plan is approved as fair and equitable and as necessary or appropriate to effectuate the provisions of Section 11 of the Act except that it is not intended to approve the allowance or payment to Engineers preferred stockholders of any amounts in excess of $100 per share and accrued dividends. It is directed, however, that allowance or payments to Engineers preferred stockholders shall be made as provided in and subject to the provisions of paragraph 6 below, and preferred stockholders shall have the right to receive under the provisions of the Escrow Agreement provided for in said paragraph 6 such additional amounts, if any, as may ultimately be determined to be payable to them as provided therein, said Escrow Agreement is approved as fair and

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

equitable and as necessary or appropriate to effectuate the provisions of Section 11 of the Act and as a means of protecting the respective interests of all classes of stockholders of Engineers pending disposition of any appeals from this order which may raise the question of the rights of preferred stockholders of Engineers to receive any amounts in excess of $100 per share and accrued dividends.

3. Subject to the terms and conditions of the Commission's Order of January 8, 1947 and its Order of Amendment of February 11, 1947, this Court, for the purposes of carrying out the terms and provisions of said Plan, hereby takes exclusive jurisdiction of Engineers and its assets wherever located.

4. Engineers shall retain possession of its assets for the purpose of carrying out the terms and provisions of the Plan and of this Order, or any subsequent order herein; and Engineers may enter into any transactions not inconsistent with the Plan, including the filing of any appropriate application or declaration with the Commission in conformity with the Act and the rules, regulations and orders promulgated and issued by the Commission thereunder, in all cases where such filing and the entry of appropriate orders with respect thereto would be required if this Court had not taken such jurisdiction.

5. Engineers, acting by or through its officers and directors, is hereby authorized, ordered and directed to take and to cause to be taken as soon as practicable all action necessary to carry into effect and fully to consummate the steps and transactions provided in the Plan, except the allowance or payment to Engineers preferred stockholders of any amount in excess of $100 per share and accrued dividends, to comply with all orders of this Court and the Commission relative thereto, except as aforesaid and subject to the provisions of paragraph 6 below.

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

6. Engineers shall consummate those provisions of the Plan dealing with the retirement of its outstanding preferred stocks in the following manner:

(a) By exchanging with holders of warrants to acquire shares of common stock of Gulf States Utilities Company (a subsidiary of Engineers, hereinafter called "Gulf States") said shares of Gulf States common stock for whole shares of Engineers preferred stock, assigning to each share of Gulf States common stock the value of $11.50 per share and to each share of Engineers preferred stock the value of $100 per share plus accrued dividends to the expiration date of the warrant, provided that, on the basis of the relative values above stated, the value of the whole shares of Engineers preferred stock surrendered in exchange shall not exceed the value of the shares of Gulf States common stock which the warrant holder is entitled to and intends to acquire, but to the extent that the value of such shares of Engineers preferred stock surrendered in exchange is less than the value of such shares of Gulf States common stock to which the warrant holder is entitled and intends to acquire, the difference shall be paid by the warrant holder to Engineers; and provided, however, that any holder of Engineers preferred stock who surrenders his stock in exchange for Gulf States common stock will, in respect of such surrendered shares, have the right to receive the same amount which the holders of such preferred stock not so surrendering their stock will receive in addition to $100 per share plus accrued dividends;

(b) By depositing in trust for the benefit of Engineers preferred stockholders who shall not have surrendered their preferred stock in exchange for Gulf

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

States common stock with The Chase National Bank of the City of New York an amount equal to $100 per share, plus accrued dividends to the date of such deposit in respect of each such share to be paid to them upon surrender of their certificates for preferred stock;

(c) By depositing with said The Chase National Bank of the City of New York in escrow the sum of $4,000,000 in cash pursuant to the provisions of the Escrow Agreement attached hereto as Exhibit 1 and made a part hereof.

Upon deposit of the amounts specified in (b) and (c) above, the rights and claims of the holders of shares of Engineers preferred stock shall cease and determine except their rights and claims in respect of said deposited amounts.

7. All creditors and security holders of Engineers and all other persons be and they hereby are enjoined and restrained from doing any act or taking any action, interfering with, or tending to interfere with these proceedings or with the carrying out of this order or any part thereof, including the commencement or prosecution of any action, suit or proceeding at law or in equity or under any statute in any court or before any executive or administrative officer, commission or tribunal, other than proceedings before the Commission, or this Court or the Circuit Court of Appeals or other appellate court as may be appropriate under the Act or the rules and regulations promulgated thereunder.

8. The Court reserves jurisdiction (1) to enter such supplemental orders or decrees and to give such other and further relief as may be necessary or appropriate to enforce and carry out the provisions of the Plan, including approval of any alternative methods of meeting the cash

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

requirements of the Plan that may be proposed by Engineers and approved by the Commission and (2) to enter findings of fact and conclusions of law with respect to the disputed issue as to whether the fair and equitable standard of Section 11(e) requires or permits payment to preferred stockholders of any amounts in excess of $100 per share and accrued dividends.

BY THE COURT

.....

United States District Judge

Dated, ..., 1947

Exhibit 1

Escrow Agreement.

....., 1947.

THE CHASE NATIONAL BANK OF
THE CITY OF NEW YORK,
11 Broad Street,
New York 15, N. Y.

Dear Sirs:

1. The undersigned, Engineers Public Service Company (Incorporated) (Engineers) herewith hands you as Escrow Agent hereunder, its check in the amount of $4,000,000, which is the amount required to be deposited in escrow by the Engineers' "Plan Pursuant to Section 11(e) of the Public Utility Holding Company Act of 1935 for Divestment of Assets and Related Matters", as amended

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

by amendments to and including Amendment No. 6, dated December 30, 1946, as changed to include this Escrow Agreement and certain program changes incidental thereto (which amended Plan, with such changes, is hereinafter referred to as "the Plan"), a copy of which Plan has been delivered to you. Said sum of $4,000,000 is made up of the following amounts:

(a) The sum of $3,204,795, being an amount equal to $5 per share in respect of 143,951 outstanding shares of the $5 Dividend Convertible Preferred Stock ($5 Preferred) of Engineers; $10 per share in respect of the outstanding 183,406 shares of $5.50 Cumulative Dividend Preferred Stock ($5.50 Preferred) of Engineers; and $10 per share in respect of the 65,098 outstanding shares of $6 Cumulative Dividend Preferred Stock ($6 Preferred) of Engineers.

(b) The sum of $484,325, being an amount equal to simple interest for three years at a rate per annum of 4.76% in the case of the Engineers $5 Preferred, 5% in the case of the Engineers $5.50 Preferred, and 5.45% in the case of the Engineers $6 Preferred on the amounts set forth in (a) above in respect of each of said series.

(c) The sum of $310,880, to provide for the payment of all fees and other compensation and all remuneration or expenses claimed or hereafter claimed by any persons in connection with the Plan, the transactions incident thereto and the consummation thereof approved by the Securities and Exchange Commission (hereinafter called the Commission).

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

2. Upon delivery to you of an opinion of independent counsel (as defined in paragraph 6 hereof), accompanied by a certified copy of the order or decree involved,

(A) to the effect (1) that the District Court of the United States for the District of Delaware in Civil Action No. 995 has entered a decree or order approving the Plan, including the payment to holders of Engineers preferred stock of the amounts, below specified, equal to the respective redemption premiums on their shares, with interest thereon, and directing its enforcement, (2) that no holder of common stock of Engineers has made timely appeal from such decree or order or, in the alternative, that a holder or holders of common stock of Engineers has made such a timely appeal but that the appellate court or courts have approved said decree or order approving the Plan entered by said District Court as aforesaid, and (3) that such decree or order has become final as against the holders of common stock of Engineers and is no longer subject to appeal by them; or

(B) to the effect (1) that said District Court in said Civil Action has entered a decree or order approving the Plan in all respects other than the payment to holders of Engineers preferred stock of the amounts below specified and directing its enforcement to the extent so approved but disapproving or failing to approve the payment of such amounts; (2) that timely appeal has been made from such decree or order in so far as it disapproves or fails to approve the payment of such amounts, and that an appellate court has reversed such decree or order in so far as it disapproves or fails to approve the payment of such amounts and the District Court

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

on mandate of such appellate court has entered a decree or order approving such payment to the holders of Engineers preferred stock; and (3) that such decree or order directing such payment to holders of the preferred stock has become final as against the holders of preferred and common stock of Engineers and is no longer subject to appeal by them; or

(C) to the effect that an order of the Commission in the proceedings now pending before it in file No. 53-132 or in consolidated proceedings including file No. 53-132, file No. 70-1149, file No. 70-1150 and file No. 70-1419 or in any other proceedings under section 11(b), section 11(d) or section 11(e) of the Public Utility Holding Company Act of 1935, or an order or decree of any court having jurisdiction, has been entered, has become final and is no longer subject to appeal, which Commission order or court order or decree either approves an amended plan providing for, or otherwise provides for or directs, the payment to the holders of Engineers preferred stock of at least the amounts below specified;

then you shall release and pay over to the holders of Preferred Stock out of the amounts deposited with you pursuant to clauses (a) and (b) of paragraph 1 hereof, the amount of $5 per share in respect of each share of $5 Preferred, the amount of $10 per share in respect of each share of $5.50 Preferred and the amount of $10 per share in respect of each share of $6 Preferred, plus in each case an amount equal to simple interest, computed on the basis of 360 days per year, on the amount so paid at a rate per annum equal to 4.76% in the case of the Engineers $5 Preferred, 5% in the case of the Engineers $5.50 Preferred, and 5.45% in the case of the Engineers $6 Preferred from the date hereof to the date

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

of such payment. Such payment is to be made by mailing the same to the persons who were the registered holders or assignees of registered holders of such Preferred Stock at the time their certificates for such stock were surrendered, either in exchange for Common Stock of Gulf States Utilities Company or upon payment to them of $100 per share and accrued dividends, all as provided in the Plan. You shall be entitled to rely upon a list or lists furnished you by The Chase National Bank of the City of New York and Stone & Webster Service Corporation, Transfer Agents for the Preferred Stock, or either of them, as to the names of such registered holders or their assignees at the time of such surrender and their mailing addresses. Any balance of the sum deposited with you pursuant to clause (b) of paragraph 1 hereof shall be paid over to Engineers.

3. Upon delivery to you of an opinion of independent counsel (as defined in paragraph 6 hereof), accompanied by a certified copy of the order or decree involved, to the effect that an order of the Commission in the above mentioned proceedings now pending before it or in any other proceedings under section 11(b), section 11(d) or section 11(e) of the Public Utility Holding Company Act of 1935, or an order or decree of any court having jurisdiction, has been entered, has become final and is no longer subject to appeal, which Commission order or court order or decree directs or permits the distribution to holders of Preferred Stock of some part of the amount deposited pursuant to clauses (a) and (b) of paragraph 1 hereof, but less than the amounts specified in paragraph 2 hereof, you shall release and pay over to the holders of Preferred Stock entitled thereto, pursuant to the terms of such order or decree, in the manner provided in paragraph 2 hereof, the respective amounts to which such holders shall be entitled pursuant to such order or decree, and you shall release and pay

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

over to Engineers the balance of said sum deposited pursuant to clauses (a) and (b) of paragraph 1 hereof.

4. Upon delivery to you of an opinion of independent counsel (as defined in paragraph 6 hereof), accompanied by a certified copy of the order or decree involved, to the effect that an order of the Commission in the above mentioned proceedings now pending before it or in any other proceedings under section 11(b), section 11(d) or section 11(e) of the Public Utility Holding Company Act of 1935, or an order or decree of any court having jurisdiction, has been entered, has become final and is no longer subject to appeal, which Commission order or court order or decree determines or finds that the holders of Preferred Stock are not entitled to receive any amounts in addition to the amount of $100 per share plus accrued dividends to be allowed to Preferred Stockholders on exchange of shares of Preferred Stock for shares of Gulf States Common Stock or to be deposited in trust for Preferred Stockholders who shall not have so exchanged their shares of Preferred Stock, all as provided in the Plan, you shall release and pay over to Engineers all sums deposited with you pursuant to clauses (a) and (b) of paragraph 1 hereof.

5. Upon delivery to you of (a) a certified copy of the order of the Commission in the above mentioned proceedings approving payment to specified persons of fees and other compensation, remuneration and expenses, and (b) an opinion of independent counsel to the effect that such order has become final and not subject to appeal, you shall release and pay over to the persons designated in said order out of the amounts deposited pursuant to clause (c) of paragraph 1, the respective amounts specified in said order, and after deducting the amount of your fees and expenses and the compensation of your counsel in accordance with the provisions of paragraph 8 hereof, you shall pay over to Engineers any balance of said sum.

Notice by Securities and Exchange Commission of Presentment of Order and Proposed Order (Cont'd)

6. The term "independent counsel" as used herein shall mean counsel selected by you who shall not have entered their appearance in the above mentioned proceedings before the Commission or in the above mentioned court proceedings as counsel for any party or participant, but who may be counsel regularly retained by you.

7. You shall not be liable for any action taken or omitted to be taken by you hereunder in good faith, or for any act, mistake or omission of any agent employed by you. You shall be fully protected in any action taken or omitted to be taken pursuant to advice of counsel.

8. You shall be entitled, subject to the approval of the Commission, to reasonable compensation for your services hereunder and reimbursement of your reasonable expenses, including fees and disbursements of your counsel and any independent counsel selected by you for the purposes of paragraphs 2, 3 or 4 hereof, and for the payment of such compensation or reimbursement, you shall have a lien upon any amounts deposited with you pursuant to clause (c) of paragraph 1 hereof.

9. You may, at any time, resign by giving 30 days' notice in writing to Engineers of your intention so to do. In case of any such resignation, or in case you shall become unable to act hereunder, Engineers will promptly appoint a successor Escrow Agent, which shall be a trust company or bank with trust powers having its principal office in the Borough of Manhattan, City and State of New York and having a capital and surplus of more than $1,000,000. Upon payment of any sums held by you hereunder to any such successor Escrow Agent, you shall be discharged from all further liability hereunder, and the successor Escrow Agent shall become the Escrow Agent hereunder with like effect as if orginally designated Escrow Agent hereunder. IN THE MATTERS OF:	
ENGINEERS PUBLIC SERVICE COMPANY	File No. 54-132
EL PASO ELECTRIC COMPANY	File No. 70-1149
GULF STATES UTILITIES COMPANY	File No. 70-1150

Hearing Rooms A and B,
Securities and Exchange Commission Building,
Philadelphia, Pennsylvania.
Tuesday, November 20, 1945.

Met, pursuant to notice, at 10 a.m.

Before:

ALLEN MAC CULLEN, Trial Examiner.

Appearances:

BERNARD S. KANTON and HARLOW B. LESTER, on behalf of the Securities and Exchange Commission.

MUDGE, STERN, WILLIAMS & TUCKER, by WILLIAM E. TUCKER, 20 Pine Street, New York City, on behalf of the Applicant.

LAWRENCE R. CONDON, Attorney for Thomas W. Streeter, Columbian National Life Insurance Company, and others.

FRANCES H. SCHEETZ, Evans, Bayard & Frick, 1335 Land Title Building, Philadelphia, Pa., on behalf of Home Insurance Company, City of New York Insurance Company, National Liberty Insurance Company of America, The New Brunswick Fire Insurance Company, The Homestead Fire Insurance Company, and The Georgia Home Insurance Company.

PROCEEDINGS

The Examiner: Gentlemen, if you are ready we will proceed.

This is a hearing under order of the Commission dated October 15, 1945, and supplemental order dated October 26, 1945, postponing the hearing to this date, upon an application filed by Engineers Public Service Company, a registered holding company, pursuant to Section 11(e) of the Public Utility Holding Company Act of 1935, for divestment of its interest in El Paso Electric Company and Gulf States Utilities Company, subsidiaries of Engineers; and upon declarations filed pursuant to Section 7 of said Act by El Paso and Gulf for the purpose of facilitating the effectuation of the plan proposed in the application filed by Engineers, the Commission having by its order consolidated the proceedings on the application filed by Engineers and upon the declarations filed by El Paso and Gulf.

Copy of the order of Commission dated October 15, 1945, when presented by counsel to the Commission will be incorporated in the record as Commission's Exhibit No. 1-A, and copy of the supplemental order dated October 26, 1945, will be received as Commission's Exhibit No. 1-B.

I have before me an application filed by Thomas W. Streeter by his attorney, Lawrence R. Condon, requesting a limited appearance in this case. Mr. Lester, do you have any questions to ask Mr. Condon?

Mr. Lester: I believe Mr. Kanton has some questions.

Mr. Kanton: Mr. Streeter is a director of Engineers, is he not, Mr. Condon?

Mr. Condon: He is, Mr. Kanton, and he owns, as the application states, 50 shares of the $5.50 preferred and 150 shares of the $6 preferred stock. I am advised and believe he owns no common stock.

Mr. Kanton: Do you represent any other preferred stockholders, sir?

Mr. Condon: I do.

Mr. Kanton: Could you give us the list, please?

Mr. Condon: Lillian C. Streeter, the owner of 200 shares of $5 preferred, Mrs. Ruth C. Streeter, the owner of 300 shares of $5.50 preferred, Frank Streeter, Henry Streeter, Thomas W. Streeter, Jr., the owners of 100, 200, and 200 shares respectively of the $5.50 preferred, Henry Streeter, Frank Streeter, and Thomas W. Streeter, Jr., the owners of 100, 100 and 100 shares respectively of the $6 preferred stock, the Columbian National Life Insurance Company of Massachusetts, the owner of 100 shares of $6 preferred stock, 200 shares of $5.50 preferred, and 450 shares of $5 preferred.

Those are the only ones that I represent at this time, but I anticipate that there will be others, and I would request leave to make a further statement with respect thereto at a subsequent date.

Mr. Kanton: Mr. Condon, have you entered into any arrangements with Mr. Streeter, with respect to the fee that you are to receive in this proceeding?

Mr. Condon: The only arrangements, Mr. Kanton, have not been formalized, but have been discussed along these lines—that I am to receive a fee of not to exceed 75 cents per share for the shares represented and not to exceed 25 cents per share for expenses, costs and disbursements, from those clients that I act for. In addition, Mr. Streeter, the dissenting director, discussed with the Board, as I am told, the Board of Engineers, the matter of a contribution, if I may use that term, by the Engineers Company to Mr. Streeter and his group of stockholders in a sum of $5,000, which was the subject of resolution by the Engineers Board. The resolution in its original form was not satisfactory, and I have not seen the resolution that was adopted yesterday, although Mr. Streeter advised me with respect to it orally. Because of the doubt of a number of stockholders that I would represent I have not committed myself to continue indefinitely as counsel for the preferred stockholders, and the statement which I made concerning the number of stockholders for whom I am acting of necessity suggests that these arrangements are still in their formative state. The provision with regard to the $5,000 payment to Mr. Streeter and his group of preferred stockholders was born, as I am told and believe, of a contention made by Mr. Streeter that he felt it unfair and inequitable, in light of the problems that existed concerning the rights of the preferred stockholders here, to have the company have the benefit and the services of most eminent counsel acting on behalf of the common stockholders and have the preferred shareholders, who have a very substantial stake in this proceeding, have no representation. I have acted for Mr. Streeter before, and he consulted me some time early in September with respect to the problem, and I have discussed it with him on a number of occasions. My principal concern was never to have the Engineers Company in a position to fairly say that the $5,000 which was apparently appropriated for a contribution to Mr. Streeter's group of preferred stockholders would ever be considered as the limit of the Engineers' liability for counsel fees and expenses should this Commission

and/or a court of competent jurisdiction decide that the services of counsel either in contributing to the solution of the problems here or in the achievement of objectives favorable to the preferred stock, should warrant a higher fee. I believe that that condition was met at least in part by an amendment to the proposed resolution adopted at the Board meeting yesterday. I am delighted to answer any further questions, Mr. Kanton.

Mr. Kanton: I only have one more question, Mr. Condon. Would Mr. Streeter be available to testify at this proceeding if he were requested to do so?

Mr. Condon: At any time, on any reasonable notice, we will be very glad to produce him without any subpoena or just on your request or the request of any other counsel here.

Mr. Kanton: Thank you, Mr. Condon.

The only other question I would have is of Mr. Scheetz. I think it would be helpful if he would state for the record the exact holding that he represents at this time.

The Examiner: I will question him further. We will finish with Mr. Condon first. Have you any further questions you want to ask Mr. Condon?

Mr. Kanton: No.

The Examiner: Mr. Tucker?

Mr. Tucker: No.

The Examiner: Mr. Condon, representing Mr. Streeter and the others represented by you, we will grant you limited participation in these proceedings in accordance with Rule 17 of our Rules of Practice.

I also have an application for leave to be heard by Mr. Francis H. Scheetz, of the firm of Evans, Bayard & Frick, representing Home Insurance Company, City of New York Insurance Company, National Liberty Insurance Company of America, The New Brunswick Fire Insurance Company, The Homestead Fire Insurance Company, and The Georgia Home Insurance Company. Have you any questions you want to ask Mr. Scheetz, Mr. Kanton?

Mr. Kanton: The one I just asked, and I thought it would be helpful, Mr. Scheetz, if you would just state the

holdings of these particular insurance companies for the record.

Mr. Scheetz: Mr. Examiner, the group of insurance companies which I represent are in what is known as the Home Insurance group. Collectively they own 7300 shares of preferred, divided as follows:

Home Insurance Company, 2,000 shares of 6 per cent preferred and 2,000 shares of 5½ per cent preferred;

City of New York Insurance Company, 500 shares of 5½ per cent preferred;

National Liberty Insurance Company of America, 1,000 shares of 6 per cent preferred;

The New Brunswick Fire Insurance Company, 1,000 shares of 5½ per cent preferred;

The Homestead Fire Insurance Company, 500 shares of 5½ per cent preferred;

The Georgia Home Insurance Company, 300 shares of 6 per cent preferred.

I might add that our firm is also counsel for Tradesman's National Bank & Trust Company of Philadelphia, which holds approximately 2500 shares of preferred in sundry trust accounts. They have not filed a request for leave to be heard, but I am authorized to speak for them and it may be that they will request leave to be heard later on.

The Examiner: Any further questions, Mr. Kanton?

Mr. Kanton: No.

The Examiner: Mr. Tucker?

Mr. Tucker: No.

The Examiner: Mr. Scheetz, we will grant you limited participation in accordance with Rule 17 of our Rules of Practice to represent the stockholders mentioned by you.

I also have a letter signed by Julian D. Anthony, vice-president of Columbian National Insurance Company, asking leave to be heard. Is Mr. Anthony present?

Mr. Condon: Mr. Anthony has sent me authorization in writing which I have here and will be very glad to exhibit to your Honor and counsel, retaining me to act for

the Columbian National Life Insurance Company, and I stated that among the stockholders that I represented.

The Examiner: Mr. Condon, we have already granted you limited participation in the proceedings.

You have no further questions you want to ask Mr. Condon in connection with that, have you, Mr. Kanton?

Mr. Kanton: No, sir.

The Examiner: You may proceed, Mr. Kanton.

Mr. Kanton: Mr. Examiner, I would like to have marked for identification and offer in evidence as Commission's Exhibit No. 1-A, the notice of filing of plan under Section 11(e) of the Act and declarations to effect related transactions, report of consolidating proceedings, and the order for hearing on consolidated matters, issued by the Commission on the 15th day of October, 1945, and contained in Commission Docket No. 54-132-1.

(Commission's Exhibit 1-A is received in evidence.)

Mr. Kanton: A copy of this order was published in the Federal Register on Friday, October 19, 1945, in Volume 10, No. 206, on page 13034, as Federal Register Document 45-19136. Copies of this order, bearing the title, "Holding Company Act Release No. 6131," was issued to the press on October 16, 1945, and given out to the Commission's mailing list on the same date. I now offer it in evidence as Commission's Exhibit No. 2-A.

The Examiner: The exhibit will be received and marked Commission's Exhibit 2-A.

(Commission's Exhibit 2-A is received in evidence.)

Mr. Kanton: Mr. Examiner, I would like to have marked for identification and to offer in evidence as Commission's Exhibit 1-B the order postponing this hearing, which was originally set for November 13, 1945, and was postponed to this date, November 20, 1945, by order of the Commission of October 26, 1945.

The Examiner: That will be marked Commission's Exhibit 1-B and received in evidence as such.

(Commission's Exhibit 1-B is received in evidence.)

Mr. Kanton: This order, postponing the hearing, is contained in Commission Docket No. 54-132-1. A copy of this order postponing the hearing was published in the Federal Register on Wednesday, October 31, 1945, Volume 10, No. 214, on page 13,484; as Federal Register Document No. 45-20,003. Copies of this order postponing the hearing were released to the press on Monday, October 29, 1945, and given to the Commission's mailing list on the same date. This copy bears the title of Holding Company Act Release No. 6168. I now offer this in evidence as Commission's Exhibit No. 2-B.

The Examiner: It will be received as Commission's Exhibit No. 2-B.

(Commission's Exhibit 2-B is received in evidence.)

Mr. Kanton: That is all I have at this time, Mr. Examiner. I take it the applicant companies have the burden of going forward at this time, so, Mr. Tucker, will you take over.

The Examiner: You may proceed, Mr. Tucker.

Mr. Tucker: I will ask Mr. Benjamin to take the stand and be sworn.

Whereupon,

RICHARD N. BENJAMIN

was called as a witness on behalf of the Applicants and, having been duly sworn, was examined and testified as follows:

Direct Examination

By Mr. Tucker:

Q. What is your full name?

A. Richard N. Benjamin.

Q. And in what capacity are you connected with Engineers Public Service Company?

Richard N. Benjamin—Direct Examination (Cont'd)

A. I am secretary of Engineers Public Service Company, 90 Broad Street, New York, New York. I am also secretary of three of the subsidiaries of Engineers Public Service Company, namely, Virginia Electric & Power Company, Gulf States Utilities Company, and El Paso Electric Company. I am also secretary of Epsco, Incorporated, the mutual service company of the system.

Q. I show you the documents entitled, "Plan pursuant to Section 11(e) of the Public Utility Holding Company Act of 1935 for divestment of assets and related matters," which was filed by Engineers Public Service Company with the Securities and Exchange Commission on September 10, 1945; amendment No. 1 thereto, filed on September 13, 1945; amendment No. 2, filed on October 17, 1945; amendment No. 3, filed on November 10, 1945; declaration of Gulf States Utilities Company on Form U-1, filed September 14, 1945; amendment No. 1 on Form U-1A, filed November 10, 1945; declaration of El Paso Electric Company on Form U-1, filed September 14, 1945; and amendment No. 1 on Form U-A, filed November 10, 1945; and I ask you if these were prepared under your direction and if you believe the statements therein to be correct?

A. They were prepared under my direction and I believe the statements contained therein are correct.

Mr. Kanton: Mr. Tucker, I don't know what form of procedure you are following, but do you intend to qualify Mr. Benjamin as an expert in any capacity?

Mr. Tucker: No, I didn't intend to; I don't think his testimony involves any expert testimony. I am not asking him for his opinions on any subject. You may object to any questions if they involve expert testimony if I do not qualify him.

Mr. Kanton: In other words, you do not expect to ask him any questions of a financial nature which would necessitate the opinion of an expert on accounting matters.

Mr. Tucker: I don't think so. I think he is testifying from facts. That is certainly true in substance.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. You speak of competitive bidding. Have you made a comparison of the total expenses of issuing the warrants as against the expenses that would be entailed if the Gulf States common stock were sold by public offering or by competitive bidding, and checking that against what you would receive possibly through the warrants as against what you would receive if this Gulf States common stock were sold to the public?

A. We have not made a comparison of the expenses, no.

Q. So it is possible then that more money may be realized by the sale of the Gulf States common stock less the expenses that may go with the underwriting than could be realized through the issuance of the warrants to the Engineers' common stockholders?

A. Yes, I think it is posible that the company itself would receive more cash, but, as I pointed out, you are taking away from the common stockholder the opportunity to participate in this Gulf States common stock.

Q. Couldn't he, if there was a public offering or an underwriting, repurchase?

A. Yes.

Q. If we use that word?

A. Yes, and pay the underwriting discount in so doing.

Q. And also, as you put it, get the preferred stock out of the picture? and perhaps get all the other expenses needed in the present proposal?

A. I think it would raise more cash.

Q. In other words, these things have to be weighed one against the other to see which would benefit the Engineers' stockholders?

A. That is right.

Q. Isn't it possible under present market conditions for Engineers to get at least $28,000,000 to $30,000,000 for the sale of the Gulf States common stock? This is your opinion based on your personal analysis and from looking at other analyses by people competent and qualified to make such analyses?

Richard N. Benjamin—Cross Examination (Cont'd)

A. I wouldn't want to put a figure on what we could get by competitive bidding now.

Q. You could get more than $21,000,000?

A. Yes, I think so.

Q. Have any efforts been made to sell the property of Gulf States to any of the surrounding utility companies down in that area?

A. Not to my knowledge.

Q. Were any offers made by the utilities companies which surround the Gulf States properties?

A. I don't know of any.

* * * * * *

[R. p. 266] By Mr. Kanton:

Q. Have your estimates shown that the present earnings and dividend declaration policy of Virginia will continue?

A. Based on the estimate for 1946 that was referred to this afternoon, it appears likely that the dividend policy could be continued through 1946.

Q. What about the present level of earnings?

A. In speaking of that I had in mind the present level for common stock and surplus.

Q. Could you tell me at this time whether it will be higher or the same as the present levels?

A. Well, I would like to see completed the 1945 actual statement of earnings before I answer that question. There has been considerable discussion about what items are properly includable, and there are a good many questions regarding taxes that are not yet settled.

Q. Do you have any opinion of your own at this time? I mean, you stated that you believed the dividend declaration policy will continue, but you have no opinion as to the present level of earnings being continued or being higher or lower?

A. I would rather not say at this point whether it would be higher or lower.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Do you have any opinion or any reason to believe that the present level of earnings of Gulf and El Paso will be the same in 1946 as they are at present?

A. Well again, based on the estimate for 1946, I think it likely that the dividend policy of Gulf States would be maintained.

Q. What percentage is that, approximately, of earnings, Mr. Benjamin?

A. I was just going to check the freeze on that Gulf States. Based on our estimate for 1946 I think that Gulf States can maintain the same dividend policy during 1946.

Q. What percentage is that of earnings? Is it 80 per cent approximately, the same as Virginia, or is it more or less?

A. We are limited to 75 per cent by that dividend freeze. I would say it was slightly under 75 per cent during 1945.

Q. Do you think that will be the same in 1946?

A. I think it would be a slightly less percentage in 1946.

Q. Why is that?

A. Based on the estimate, in the earnings for 1945 there are some non-recurring earnings due to this amortization of emergency plant facilities, and I think that the percentage will be approximately the same in 1946.

Q. Could you do the same for El Paso, Mr. Benjamin?

A. Based on the estimate for 1946, I think that the same dividend policy in El Paso can be maintained.

Q. What percentage is that?

A. In speaking of the same dividend policy, I have referred to the one set forth in the accompanying letter to the Plan where it was stated that Gulf States is presently paying common dividends at an annual rate approximating 80 cents per new share and El Paso at an annual rate approximating $1 per new share, which translated into Engineers common stock is 20 cents a share because the El Paso new stock is to be distributed on the basis of one-fifth of a share of El Paso for each share of Engineers common stock.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Yes, I recall it, Mr. Benjamin, but I was just wondering, in line with our testimony with reference to Virginia and Gulf, if you could give me your estimate or your opinion as to how the present dividend declaration policy and level of earnings for El Paso in 1946 will compare with those of 1945.

A. In 1945 the actual dividends paid by El Paso, Texas, on the common stock were at a rate higher than the 20 cents per new share that I just referred to. There was a dividend of $6 per share paid on March 15th, 1945; 62½ cents on June 15th, 1945; 62½ cents on September 14th, 1945; and 62½ cents on December 14th, 1945. That is on the old shares of stock.

Q. What percentage of earnings for 1945 is that?

A. I will have to figure it out if you will give me a few minutes.

Q. All right, sir.

A. Applicants' Exhibit No. 50 shows the balance for common stock and surplus in El Paso Electric Company for 1945, with the last two months estimated, of $525,600. I would like to check this figure of dividends paid. According to my pencil figures here El Paso Electric Company paid out in dividends on its common stock during 1945 $1,180,250.

Q. Was that more than the earnings?

A. That is more than the estimated earnings for 1945 available for the common stock.

Q. Is that the usual practice of Engineers with El Paso?

A. It is not the usual practice of Engineers' subsidiaries. This dividend paid in March of 1945 was due in part to the fact that there was only one dividend paid in 1944, namely, 62½ cents, and in part to the fact that the transportation property had been sold the previous year.

Q. What would you say is the usual or the average dividend policy for El Paso, if we consider this to be an unusual dividend payment during the year of 1945?

A. Well, I believe that a dividend at a rate specified in this letter to the common stockholders would be a normal dividend rate for El Paso.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Would that be about 80 per cent of the current earnings of the company?

A. Well, if we apply that rate to the 1945 estimate, $1 per new share of El Paso common stock would be equivalent to $381,994 and the estimated earnings available for the common stock for 1945 were $525,600, so that is approximately 75 per cent.

Q. Assuming the 75 per cent figure, do you think that that would be the estimated dividend declaration policy of El Paso during 1946?

A. I would expect, if our estimate is correct, that the dividend rate would be approximately the same as this so-called normal rate of dividends that I just referred to during 1946.

By Mr. Tucker:

Q. 20 cents on the new stock?

A. 20 cents on the new Engineers stock.

By Mr. Kanton:

Q. How do you estimate the level of earnings for 1946 for El Paso, the same or higher than in 1945?

A. Based on the estimate we made for 1946, the level of earnings would be slightly higher than in 1945.

Q. Is it possible that the dividends would be slightly higher, correspondingly? I say possible.

A. It is possible. I was just going to look at the construction requirements but I think it is safe to say it is possible that they might be higher.

Q. Would you say, since the time you have been with the company, it has been the policy of the company—and I am speaking now generally and I just want a rough estimate from you—for Engineers to take up 80 per cent in dividends from its operating companies based on the then current level of earnings for each one of its operating companies?

A. I just couldn't guess at a percentage, Mr. Kanton.

Richard N. Benjamin—Cross Examination (Cont'd)

I think it has been the policy of the Engineers' companies as a rule not to declare out all of the earnings.

Q. In a particular year?

A. That is right, except for an extraordinary situation.

Q. In other words, not 100 per cent?

A. Except in an extraordinary situation like the El Paso one that I just referred to.

* * * * *

[R. p. 274] By Mr. Kanton:

Q. Have you consulted with any preferred stockholders or common stockholders about any of the elements of this Plan?

A. I have talked with a good many stockholders and representatives of brokerage firms who have called up and asked questions about it. I have gotten quite a few phone calls at the office asking me to explain various parts of the plan, how it worked, and things of that sort.

Q. That is after the plan was filed?

A. That is right.

Q. I am speaking of before the plan was filed. Did you consult with any preferred or common stockholders to see if what you had in mind for the plan would meet with their approval?

A. No, I did not.

* * * * *

[R. p. 281] By Mr. Kanton:

Q. You testified that a recent check shows 1,069 individual common stockholders hold an aggregate of 139,315 shares of preferred stock of all classes and that you assume that this option will interest a substantial number of the stockholders?

A. That is correct, I did.

Q. Is it also true, because of the assignment feature of the warrants, many preferred stockholders may find it advantageous to acquire such warrants on the market and to exercise those warrants through the exchange option?

A. I think so.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. You testified that the original plan contemplated offering the Gulf States warrants at $10 a share, which would have necessitated a bank loan of $6,000,000.

A. That is correct.

Q. And you further testified that you were anxious, or, rather, the Board of Engineers was anxious, to keep the subscription price to your stockholders as low as possible because of the "burden" which it imposes on them in order "to maintain their interest in the properties which now constitute the Engineers system." How do you distinguish the payment of $10 a share and $11.50 a share any more of a burden on the Engineers common stockholders?

The Witness: Would you read the last part of that question, please?

(The record is read.)

The Witness: I don't know what you mean, Mr. Kanton.

By Mr. Kanton:

Q. Well, you considered the payment of $10—let me put it this way. Do you consider the payment of $10 by the common stockholder to be a burden?

A. Well, certainly any amount that they put up is a burden.

Q. If they had to put up $1, is it a burden?

A. Well, I guess it would be to some of them.

Q. In other words, any payment is a burden to a common stockholder?

A. I think so.

Q. Why is this payment being made by the common stockholders?

A. The payment is being made to provide funds to carry out this plan.

Q. Who will that benefit eventually?

A. I think it is a matter of necessity that funds be provided in order to carry out this liquidation plan. Now, the liquidation plan was filed because of the Public Utility Hold-

ing Company Act and this is one means of working out the liquidation of Engineers which is made necessary because of the Public Utility Holding Company Act.

Q. My question was: Whose benefit will—

Mr. Condon: May I ask that the answer be stricken as not responsive, and let's have the question re-read to the witness, please.

Mr. Kanton: Excuse me. Off the record.

(Discussion off the record.)

The Examiner: The motion is granted. Strike it from the record.

Mr. Kanton: Read the question.

(The question was read, as follows:)

"Q. Who will that benefit eventually?"

A. The exercise of these warrants—I am just trying to think out the answer to your question—will provide sufficient cash which, together with the bank loan, will pay the preferred stockholders $100 a share and accrued dividends. Therefore—you speak of benefit. I don't quite follow you.

Q. I distinguish it as you used it, as a burden.

A. Well, I think if the common stockholder had his choice he would not put up any money at all, but would prefer to have the Engineers with all three subsidiaries continuing in operation.

The Examiner: Off the record.

(Discussion off the record.)

The Witness: Let me try to answer the question again.

Mr. Kanton: Go right ahead.

The Witness: To the extent that the Engineers common stockholder gets the Gulf States common stock, which he does get by exercising these warrants, he gets a security. However, he has to put up cash in order to get the security.

The Examiner: To retire the preferred stock?

The Witness: To retire the preferred stock, but I do not believe that it is to be considered of benefit to the com-

mon stockholder to have to put up this money. Now, he does put it up in order to protect his interests in the whole situation.

By Mr. Kanton:

Q. What do you mean "the whole situation"?

A. In the Gulf States stock. In other words, if he wants to participate in the future growth of Gulf States Utilities Company, the only way he can do it is to put up $11.50 per share. If he doesn't want to participate in the growth of that particular company, he sells his warrant and lets somebody else put up the money.

Q. Then if he is considering that—and you are speaking for all of the common stockholders—then it is not a burden; it is a benefit to him?

A. It is something he has to do in order to protect his interests, I think.

Q. In other words, if Engineers, or the common stockholders, doesn't want to distribute the common shares of one of its utilities in order to pay off the preferred stockholders, no matter what the price is, $100, or whatever the fair value is, instead of paying cash they would have to issue the common stock of one of their utilities, or sell it, is that correct?

A. When this stockholder bought his common stock when the company was first formed, he bought it with the idea that he would not have to pay off this preferred stock until it suited him to pay off the preferred stock. Now, we have a Public Utility Holding Company Act and the Act says that you can not retain certain companies, in fact you can't retain more than one integrated system.

Q. Correct.

A. And I believe that, as I have testified, when you get down to one system there is no economic justification for keeping Engineers. Now, in order to protect his interests you ask the stockholder to put up $11.50 per share. It is

true he gets his Gulf States common stock, but the only reason he gets it is because he puts up the money to get it. Now, if that is a benefit to require him to pay off the preferred stock ahead of him, I just don't see it.

Q. Well, if he had the cash in the treasury he wouldn't have to put it up, would he?

A. If Engineers had $39,000,000 in cash in the treasury, no, he wouldn't have to put it up.

Q. And if they didn't have $39,000,000 in cash, and conditions weren't as good, you would have to distribute the common stock of one of the utility companies, or perhaps two of the utility companies' common stocks, is that correct, in order to comply with the Act?

A. I don't know what you mean by "distribute". You mean if Gulf States common stock were worth, say, $10 a share, you would have then to add El Paso Electric Company, perhaps, or Virginia to it?

Q. I didn't mean the worth of the preferred or the common, I wasn't referring to that. In order to satisfy the claim, no matter what it is, if you didn't have the cash and you couldn't raise the cash by sale, you would have to distribute the common stock equity that Engineers now has in the utility companies, is that correct?

A. Well, the only assets we have are those common stock equities and we would have to pay off the preferred stock.

Q. Therefore, in order to protect that common stock equity, not having sufficient cash, the common stockholder is called upon to put up a sufficient amount of cash in order to protect that equity?

A. That is right, to protect himself, that is right.

Q. That is right. Is that a burden on him to protect himself?

A. I think it is a burden.

The Examiner: I think that is more or less argumentative. I think the whole thing here is perfectly obvious as to what the answer is. Mr. Benjamin's idea of it is that

the common stockholder has to assume a burden to derive a benefit.

The Witness: That is right.

The Examiner: Now, whether the words used are right or not, I don't know that it make any difference. I think the record is perfectly clear, whether you want to call it a burden or a benefit. I think that is his idea of it. The common stockholder assumes the burden to derive the benefit. I think we don't want any more on that, do we?

By Mr. Kanton:

Q. Is it not possible for the common stockholders to sell their warrants at a price above $11.50 if they care to?

A. Yes. I think that there will be a market in these rights and undoubtedly some of them will sell.

Q. Isn't that the reason the price of $11.50 was set?

A. It is always advisable to have a margin between the price at which the warrant can be exercised and the expected market value of the underlying security in order that the warrants will be traded in and exercised.

Q. Now, just back on this one point, if you have the common stockholder of Engineers here with a warrant in his hand and he considers this possibility: If I put up $11.50 and I pay for this warrant and I get a share of Gulf States common stock, it is because I believe that that is a sound company and that whatever investment I have in there and put in addition will become better as the years go on. If he feels that, in his estimate, the converse is true, he won't put up the $11.50 and will sell it for whatever additional amount he can get over $11.50, is that correct?

A. I think that is the line of reasoning he would follow.

Q. But the underlying reason of the whole thing is to get $11.50 in order to pay off the preferred stock?

A. That is the reason we are issuing the warrants.

Q. Now, when you speak of this burden what stockholders do you have in mind particularly that this would work

a burden to? Do you mean the small stockholders or the large stockholders?

A. Well, I think it is a relative matter. I think even a small stockholder may find it a burden and perhaps to him, relatively speaking, it will be just as much of a burden as to a large stockholder. I don't think you can generalize too much. Certainly the people who own very large blocks of stock will have to undertake a major financing operation to raise the funds. On the other hand, a man who owns 100 shares of stock still has to put up $11.50 and that may be a burden on him.

Q. Have you spoken to any stockholders with reference to this so-called burden?

A. No, I haven't.

Q. Why do you assume, then, that it is a burden? Are you assuming how you would feel in the matter?

A. Yes. I own a few shares and even that amount will be a burden.

Q. Do you know of any of the other members of the Board of Directors who have spoken to common stockholders of Engineers about this Plan to have warrants for the distribution of the Gulf States common stock?

A. There again I think Mr. Barnes may have spoken to some of them, but I don't know of any others.

Q. Well, in other words, you don't know, or I think you have testified that the Board of Directors doesn't know, which of the stockholders would want to retain their interests in Gulf, El Paso or Virginia, that it is a matter entirely with the stockholders, that some may want to retain in all and some may want to retain in some or some may not want to retain in any, is that correct?

A. That is correct. I assume that is the case. I have no basis for knowing how they are going to react. I assume, because of the large number of stockholders, that some of them are bound to act one way and some another, but that is the only basis I have.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. But the basis of your feeling here is based on your own reaction, apparently?

A. No. I just know that the amounts involved, where we have some large stockholders, will be substantial, Mr. Kanton, and I would think that even with the small stockholders that to raise money is not easy, and in the case of every one of our stockholders I just assume that as a general proposition.

Q. Do you think it would be difficult for an Engineers common stockholder who purchased his stock at 1¼ or 2—would he have any difficulty in raising money with the common stock now selling around $35?

A. Well, unless he sells some of his Engineers common stock to get the money I don't know why he wouldn't be in the same position as somebody else, except that the stock is worth more on the market.

Q. At the present market don't you think that if the warrants were issued at $13 a share they would still have a ready market?

A. I think that is possible.

Q. Well, isn't it true that as long as the price of the Gulf States common stock may exceed the option price within the time limit of the warrants some of them will pay something for it, especially since we can agree that the Gulf States common stock will be selling above the option price? Is that a fair statement, Mr. Benjamin?

A. Well, I don't know that I agreed that it would sell above $13 option price, but assuming for the moment that it does sell above that, I think, so long as there is a reasonable value to the warrants themselves, that the bulk of the warrants will be exercised, and the only reason I can see why anybody would not exercise their warrant or sell their warrant would be because they either didn't pay any attention to the offering or were away, or something of that sort.

Q. Well, in these situations I think it is correct to state that the warrants fluctuate more than the price of the stock involved, isn't that correct, depending on the time limits and other factors?

Richard N. Benjamin—Cross Examination (Cont'd)

A. You say the value of the warrants fluctuate more than the value of the stock?

Q. The price of the warrants fluctuates more than the stock involved?

A. Well, I don't know that that is a fact.

Q. Well, isn't it true, based on your analysis and the recent Paine Webber report, if you consider that to be reliable, that if these Gulf States common stocks have a market price ranging anywhere from, say, $16.50 to $20, it would be very easy to dispose of the warrants at around $13?

A. Well, I think if the Gulf States common stock sold $2 or $3 or $4 above the subscription price, that the warrants would have a definite market va[illegible] and I think the bulk of them probably would be exercise[illegible]

I don't take any responsibility for Paine Webber's valuation. I don't know that you want to go into that.

Q. How did you arrive at the magic figure of $11.50?

A. I don't know anything magic about it, Mr. Kanton. We started out with $10 and put up the proposition of a $6,000,000 bank loan and after discussion with the staff cut that bank loan in half and thereby raised the $10 figure to $11.50.

Q. Well, let's use the other magic figure. How did you get $10 to start with? Why not $5?

A. Because we wanted to have a bank loan that would liquidate out in a relatively short period of time.

Q. Well, considering this fact, supposing you felt you didn't want a bank loan, would you raise the price to $13 if you could get it?

A. I don't know what you mean by supposing we didn't want a bank loan.

Q. Well, do you want a bank loan?

A. We want a bank loan for $3,000,000.

Q. Why?

A. Because any lesser amount would require increasing the subscription price from $11.50 to some higher figure.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Well, let's start all over again. We are chasing ourselves.

Mr. Tucker: Do we have to do that?

Mr. Kanton: Yes. I think it is quite important. I am trying to find out what is going on here, or what was going on in the mind of the Board of Directors with reference to this bank loan.

By Mr. Kanton:

Q. It seems when you arrived at the price of $10 it was because of the bank note, and because of the bank note you got the price of $10. Now, where did you start?

A. We started with a bank loan of $6,000,000, which we thought could be paid off in a relatively short period of time, and the net result was that we needed the balance, which figured out to be $10 a share.

Q. Well, supposing you didn't want a bank note, how would you start in?

Mr. Tucker: If he can make that supposition.

Mr. Kanton: Yes, I think he can.

Strike that from the record. Let me ask you this.

By Mr. Kanton:

Q. Why do you consider it necessary to have a bank note of $6,000,000 or $3,000,000?

A. The bank note is only necessary because we need that additional money if the subscription price is $11.50, and we have testified before that we did not want to impose any greater financial burden on the common stockholder than $11.50 per share. We started out with $10 and we increased it to $11.50 because we thought that to cut the bank loan in half would be helpful.

Q. How did you get the $10 again? Because of the bank note of $6,000,000?

A. That is right.

Q. You figured a bank note of $6,000,000. You dropped the bank note to $3,000,000, you get $11.50?

A. That is right.

Q. If the bank note disappears you get $13?

A. Yes.

Q. Now, I can't see the difference in how you acquire cash from your common stockholders. If you need, say, $13 a share or $14.50 a share, can't you distribute Virginia or Gulf and El Paso together, because the money so received will be used to discharge the claims of the Engineers' preferred stockholders, in any event?

A. You can raise enough money to pay off the preferred stock by selling Gulf and El Paso, certainly, at $13.

Q. If you distributed Virginia, Gulf States and El Paso for $14.50 a share, based on warrants, rather, would you consider that a burden to the Engineers' stockholders?

A. Yes.

Q. Why? Just because of the $14.50 compared with the $11.50?

A. That is right.

Q. And compared with the $10.00?

A. That is right—it is $3.00 more than $11.50—$14.50.

Q. In other words, when you get down to the basis of this, you feel it is to the advantage of the Engineers' common stockholders to keep the corporate entity alive for three years, by having a note outstanding, either for $3,000,000 or an additional amount, at the rate of 1½ percent, plus the expenses that will be entailed in keeping Engineers alive in the sense of section 42 of the Delaware corporation law? Is that correct?

Mr. Tucker: In the early part of that, you have "keeping it alive" without any reference to Section 42, and I think that is confusing to the witness.

The Witness: I think it is to the advantage of the common stockholder to have Engineers liquidate by borrowing the $3,000,000 on the bank loan, and any additional amount that may be necessary, rather than calling on the common stockholder to put up that cash at this time.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Kanton:

Q. Now, what is the advantage?

A. He doesn't have to put up any money at this time.

Q. You mean the additional money over $11.50?

A. That is right.

Q. That is the advantage, because you assume any money put up is a burden?

A. That is right.

Q. And that is the only one?

A. Yes. I think we get this collateral tax advantage that we talked about before, but that is the primary reason.

Q. The collateral tax advantage from Virginia?

A. From the fact that he doesn't get dividends from Virginia, that is right.

Q. Are there any other tax advantages? How about the sale of the Puget stock? Is that carried over? Could that be used, possibly, the loss arising from the sale of Puget?

A. I don't think that that is required, but I would much prefer you asked Mr. Ratcliffe about the tax questions, because he knows about them.

Mr. Tucker: Mr. Ratcliffe will be here tomorrow.

Mr. Kanton: Thank you, Mr. Tucker.

* * * * *

[R. p. 302] By Mr. Kanton:

Q. In setting the price at $11.50 for the Gulf States warrants, you said you considered as an important factor that "many of our stockholders prefer, during this period of high personal income taxes, to have an investment which would yield capital appreciation rather than dividend income," and that therefore because of the relatively high tax rates applicable to income, as compared with no tax for capital appreciation until their securities are sold, and then a net tax for long term holdings of only 25 percent of such capital gain—when you speak of many stockholders who

would prefer during this period of high personal income taxes, etc., to whom are you referring, and what period do you have in mind?

A. Well, that is a generalization, Mr. Kanton, based on the fact that there are many large stockholders among our common stockholders, and I just assumed that they would prefer to take this Virginia common stock at the termination of the liquidation of Engineers, and if they then decided to sell it, take a capital gain on it, rather than getting the dividends during the period, and paying a very high rate of tax on those dividends.

Q. Well, that is a very important assumption, Mr. Benjamin. Did you speak to many of the stockholders?

A. I did not speak to any of them.

Q. In other words, you make the statement "Many of our stockholders prefer, during this period, etc.,"—you are speaking as if you had consulted with them, but you have testified that you did not. You are basing it entirely on your own opinion that if you were a large stockholder you would make that a consideration?

A. That is correct.

Q. Well, don't you realize that in these tax situations involving 25 percent of taxable gains, it would vary with an individual common stockholder, whether he is a large stockholder or a small stockholder?

A. I realize that fully, Mr. Kanton,—and one other thing I pointed out was that this leaves the choice up to the stockholder himself. In other words, he may have a situation where he prefers to take the Virginia common stock, which would be non-taxable to him at the time he receives it, and keep it until such time as he has a tax loss to offset whatever gain he might have in disposing of it.

Q. That is correct, Mr. Benjamin, but you said this was one of the important factors you took into consideration when you set the price at $11.50, and I can't see that consideration. Could you please amplify your remarks in that respect, based on this quotation I gave from your previous testimony here?

A. Well, I made that assumption, Mr. Kanton.

Q. It was your own personal assumption?

A. That is right.

Q. Would you say that your main consideration,—and when I use the word "your" I mean the Board of Directors of Engineers—in setting forth the proposals under this Plan, based upon certain income tax advantages that would fall to the Engineers' stockholders, either the preferred or common?

The Witness: Would you read that question, please?

(The question is read.)

The Witness: I frankly don't understand that question, Mr. Kanton. Could you rephrase it?

By Mr. Kanton:

Q. Let me see if this statement would help you:

It seems, from reading your testimony and the exhibits placed into evidence to supplement it, that every consideration was given to the deferring of the payment of taxes until such time as the—and I am quoting now—"tax rates are lower, or until he"—meaning the common stockholder—"has a tax loss to offset the gain?"

A. That is right.

Q. I am referring specifically to the result of taxable gains to the Engineers' common stockholder, in respect to distribution of the warrants to purchase Gulf States common, the exercise of such warrants, and the distribution of the El Paso common and the distribution of the Virginia common. As a matter of fact, you specifically stated in your testimony,—and I quote again:

> "Any increase in the value of the Virginia common stock during the period preceding the distribution of that stock will not result in a tax on the Engineers' common stockholder at the time of the distribution, whereas, if the Virginia common stock were distributed to the Engineers' stockholder im-

mediately, he would become subject to taxes on the dividend income."

Then you further stated that—and again I quote:

"These relatively large unit holdings indicate ownership by people of substantial means, many of whom, in all probability, would prefer to have capital appreciation, rather than dividend income."

Now, my question to you is this: Would you say that the Board of Directors' main consideration in setting forth the proposals in this Plan has been based upon certain income tax advantages which would fall to the Engineers' stockholders, either preferred or common?

A. Well, I would like to break that question down into two parts, if I might.

Q. Go right ahead, Mr. Benjamin.

A. Certainly one of the important considerations in this Plan was whether or not the distribution of these various securities through rights, stock dividends and final liquidation, would be non-taxable to the common stock holders.

That was one of the most important factors that had to be taken into consideration, and as the Plan was originally set up, and as it is now set up, we have been advised by our tax counsel that there is no tax to the stockholders at the time of the receipt of these securities.

As to the second part of the tax saving, namely, the non-receipt by the common stockholder during the liquidation period, of the Virginia dividends, I considered that was a collateral advantage that the stockholder got.

I think the primary consideration was not to require the common stockholder to put up any more money than was necessary, in order to provide the funds for the payment of the preferred stock.

Q. Well, with reference to the Virginia common stock, is this the reason—and I underline "the", why Engineers

did not consider the selling or the distribution of its common stock through the exercise of warrants by its common stockholders—the tax benefit, I mean?

A. No, I don't think so, Mr. Kanton. I think that the reason was the one we have been discussing this evening, that, to repeat it again, we did not want to require the common stockholder to put up any more money than was absolutely necessary.

Q. Did this tax factor have any bearing upon whether the Virginia stock should be issued at this time?

A. I don't think so.

Q. Well, don't you think a person who has a relatively large unit holding would prefer to have capital appreciation rather than dividend income?

A. Yes, I think he would.

Q. And aren't about 84.77 per cent of the Engineers common stockholders considered to be holders of large units of holdings?

A. Well, the Applicant's Exhibit 16 shows that 84.77 per cent of the record holdings represent holdings of 101 shares or more. That was your question, wasn't it?

Q. Yes, that was my question. Well, then, considering this fact, would you say that was one of the reasons that Engineers has not considered the selling or the distribution of the Virginia common stock through the exercise of warrants, because of these tax advantages? You see, I am using the quotes that you put in the record when you stated —and I quote again: "These relatively large unit holdings,"—and that is this 84.77 per cent—"indicate ownership by people of substantial means, many of whom, in all probability, would prefer to have capital appreciation rather than dividend income."

Now, assuming that—and you did assume it—did you have any basis, or did you have any reason for saying that that is a reason, or one of the reasons for not wanting to distribute the Virginia common stock as part of this Plan?

Richard N. Benjamin—Cross Examination (Cont'd)

A. I think that that is a collateral advantage that goes along with the plan, Mr. Kanton.

You asked me earlier, I think, before the recess, what would happen if all of Engineers' liabilities had been liquidated, and I said that, after they had been liquidated, I think Engineers itself would be liquidated. In other words, Engineers would not be continued for the purpose of giving this collateral advantage to the large stockholders. It is just one of the incidental advantages that crops up because of the principal purposes of keeping Engineers in a state of liquidation for a period of not exceeding three years.

• • • • •

Hearing on December 18, 1945.

[R. p. 313]

RICHARD N. BENJAMIN

Cross Examination (Resumed)

Mr. Kanton: Mr. Examiner, I would like to incorporate by reference the 1944 Form U-5-S statement of Engineers filed in Commission's dockets No. 30-105-2 which is the first duplicate copy. I haven't been able to obtain the original, so, this being an exact copy, I am offering this in place of the original.

• • • • •

[R. p. 321] By Mr. Kanton:

Q. Mr. Benjamin, do you know who Pratt Brothers are who are located at 90 Broad Street, New York, New York?

A. Pratt Brothers to the best of my knowledge is a nominee for clients of Investors Records Corporation which corporation handles the affairs of certain individuals in the Stone family.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Is that the Stone and Webster Corporation?

A. I do not know who their present clients are. I speak only as to my own knowledge from the time prior to 1938. I know at that time they were.

Q. I notice also, on page 27 of the Form U-5-S, that Mr. Whitney Stone and Whitney Stone & Edward C. Brewster, executors of the estate of Charles A. Stone, also have their addresses, care of the Investors Record Corporation.

Do you know whether these two listings here on page 27, care of the Investors Corporation, also involve holdings by these people and their associates, and that these people are connected with the Stone and Webster interests?

Mr. Tucker: Now, will you show him the record that you are talking about and let him see what it is.

Mr. Kanton: Surely. I am sorry.

The Witness: Mr. Whitney Stone is President of Stone and Webster Incorporated. Mr. Edward C. Brewster is a relative of Mr. Whitney Stone's by marriage, and I do not know Mr. Brewster's present occupation. I think he is in the armed forces.

By Mr. Kanton:

Q. But he was connected with the Stone and Webster interests?

A. At one time he was connected with Stone and Webster.

Q. Will you turn to Exhibit J-8, Mr. Benjamin, please. As I understand it, this is a letter addressed to Engineers Public Service Company by Investors Records Corporation and signed by P. M. Skillin, the Treasurer.

This letter is in answer to an inquiry addressed by Engineers Public Service Company to its twenty largest holders, asking them to list the individuals who have interests or beneficial interests in the common stocks or preferred stocks of Engineers, is that correct?

A. That is correct.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. And this letter, if we glance at it, is three pages and it shows on the second page the common stock owners, with the address in each case in care of Investors Records.

Now, will you go down that list on that page and tell me to the best of your knowledge whether any of these people listed here, or the interests listed, have been at any time connected with the Stone and Webster interests, or are at present connected with such interests.

A. Well, the first item on this list is the Estate of Charles A. Stone. Mr. Stone was one of the founders of Stone and Webster Incorporated.

Whitney Stone is the next name on the list. He is as I have just stated, President of Stone and Webster Incorporated. Anne M. Stone is the next name on the list. She is the wife of Whitney Stone.

Margaret S. Winthrop is the next name on the list and she is the sister of Whitney Stone.

Janet S. Brewster is the next name on the list and she is another sister of Whitney Stone.

Stone Farm Association is the next name on the list and I do not know the present stock ownership or interest in that Association, but the last information I had, some years ago, that was owned by members of the Stone family or trust.

The next item on the list is Whitney Stone trustees under deed of trust dated January 17, 1922 for the benefit of Charles A. Stone, Jr.

Mr. Charles A. Stone, Jr., is a brother of Whitney Stone.

The next item on the list is Whitney Stone, et al, trustees under deed of trust dated June 16, 1926.

I do not know anything more about that trust than what is stated here, that Mr. Stone is a trustee.

The last information I had on that, I think, that was a trust for the benefit of members of the Stone family.

The next is another trust for the benefit of Whitney Stone as trustee and apparently there are other trustees, for the benefit of Diana Brewster. I do not know who Diana Brewster is. Whitney Stone, et al——

Q. Excuse me just a minute. Isn't Diana Brewster a niece of Mr. Stone?

A. She may be. I don't know. I never saw that name before other than this correspondence.

Whitney Stone, et al, trustees under deed of trust dated December 27, 1938 for the benefit of Virginia W. Brewster. I do not know who Virginia W. Brewster is.

Q. What are the total common holdings that you see appearing on that page, Mr. Benjamin?

A. 202,625 shares.

Q. What percentage of the total outstanding shares of common stock of Engineers would that amount to?

A. Slightly over 10 per cent.

Q. Will you now turn to Exhibit J-12.

A. Yes.

Q. Which is a letter addressed to Engineers Public Service Company from Accounting Service Corporation, is that correct?

A. Yes.

Q. Signed by Donna E. Shay, the agent.

Turning to page 2 of this five page letter, I notice that under the owners of common stock we have listed certain people and certain trustees estates.

Glancing over this list, Mr. Benjamin,—and these common stock holdings extend on pages 2, 3 and the top of page 4—can you tell me if any of these people listed there are connected in any way or have been connected with the Stone and Webster Interests?

A. The first name on the list is Mabel W. Harte, and I do not know who this person is.

Q. Do you think Mr. Barnes might know?

A. He might. I don't know.

Q. Go ahead.

A. The next on the list is Edwin S. Webster, Jr., Richard Harte, and Lawrence J. Webster, trustees under declaration of trust dated April 2, 1919 for the benefit of Francis W. Hiam.

The only person on that list that I know is Mr. Edwin S. Webster, Jr., who is partner, Kidder, Peabody.

Mr. Webster, Jr., is the son of Edward S. Webster, who is one of the founders of Stone and Webster.

Q. Let's look through this list generally without taking up each specific item and tell me which names you recognize as connected or having been connected with the Stone and Webster interest. We, of course, see on page 2 that Mr. Edwin S. Webster, Jr.'s name appears in six of the seven items in the trust estate as set up.

Now, could you turn to the next page.

A. There is another trust at the top of the next page in which appear the names of Edwin S. Webster and Edwin S. Webster, Jr. Those are the only two people in that list that I have any knowledge of.

The next is Chestnut Hill Farm Association, and it states here that that is a personal holding company whose stock is owned by a list of people and trusts.

The first one is Edwin S. Webster. The second one is Jane de P. And then there are four trusts of which Mr. Edwin S. Webster, Jr., is one of the trustees.

The next page is Suffolk Corporation, another personal holding company in which it lists the stock owned by Jane de P. Webster, and then there are four trusts in which the name of Edwin S. Webster, Jr. appears as trustee, and another trust under the will of Russell Robb.

Q. Do you know who Mr. Robb is?

A. It is my understanding Mr. Robb was one of the original partners of Stone and Webster.

Q. What are these total holdings of common stock listed on Exhibit J-12?

A. On page No. 3, which is attached to this letter, there is a column headed "True Owner" against which is total common shares held in the name of Edwin S. Webster, Jr., 37,100 shares.

Q. Looking at these pages again, Mr. Benjamin, we also notice, do we not, that there are certain shares held under

the Chestnut Hill Farm Association and the Suffolk Corporation, totaling approximately 72,000 shares held by certain of these individuals you have mentioned before; is that correct?—and which amount is not included in the 37,100 share figure which you just gave me.

A. I think, from reading this letter, that these shares you have referred to relate to the participation in the shares of Chestnut Hill Farm Association by these various individuals.

Q. But these various individuals if we look at the Chestnut Hill Farm Association on the Suffolk Corporation appear to be generally made up of people who have been or are associated with the Stone and Webster interests, is that correct, Mr. Benjamin?

A. The only ones I know about are Mr. Edwin S. Webster and Edwin S. Webster, Jr.

(Discussion off the record.)

By Mr. Kanton:

Q. Mr. Benjamin, also looking at Exhibits J-8 and J-12 and the preferred stock holdings thereunder specifically the $5, $5.50 and the $6 preferred, do you find on glancing through these exhibits that the people you just spoke about as being connected or having been connected with the Stone and Webster also appear as connected with certain stock interests of Engineers Public Service Company?

A. Yes. On Exhibit J-8, page 3, it appears that Stone Farm Association owns 500 shares—or did at December 31—all of this information is as of December 31, 1944—owned 500 shares of the $6 preferred that the Whitney Stone *et al.* trustees under deed of trust dated June 16, 1926 owned 690 shares or a total of 1,190 shares, that the estate of Mary L. Stone owned 4,200 shares of $5.50 preferred, and Mary L. Stone was the wife of Charles A. Stone.

Stone Farm Association owned 900 shares of the $5.50 preferred. The trust of June 16, 1926 owned 300 shares.

And there is another trust, Whitney Stone, *et al.*, trustees under deed of trust, dated December 22, 1924 for the benefit of Marion S. Hince, 25 shares, and another trust of the same date for the benefit of Catherine S. Rentoul.

(Discussion off the record.)

The Witness: 25 shares, or a total of 5,450 shares of $5.50 stock, and it also shows that there were 3,100 shares of $5 preferred stock owned by some of these same persons and trusts that we have already referred to.

Over on Exhibit J-12 it appears from this Exhibit that Chestnut Hill Farm Association owns 5,700 shares of the $5 preferred stock, that another trust which Mr. Webster and Mr. Webster, Jr. are trustees owned fifty shares or a total of 5,750 shares.

By Mr. Kanton:

Q. Mr. Benjamin, turning now to Applicant's Exhibit No. 43, which shows the twenty largest holders of record of Engineers common stock as of October 31, 1945, we have already discussed the holdings of Pratt Brothers, care Investors Record Corporation, who as of this date owned 90,643 shares.

The next name that appears there is Kidder, Peabody and Company, Boston, Massachusetts. Isn't one of the members of this firm Mr. Edwin S. Webster, Jr.?

A. It is my understanding that he is.

Q. He is what?

A. It is my understanding that he is.

Q. Connected with——

A. That he is a partner of Kidder, Peabody.

Q. And Kidder, Peabody owns 79,532 shares.

Do you know who Labb & Company is of Boston 6, Massachusetts?

A. I believe that they are a nominee for an investment trust in Boston but I don't know the name of the trust.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Who is Frank J. Gould?

A. He is an individual who I believe at the present time is in France. I don't know much about Mr. Gould.

Q. Wasn't he formerly one of the owners of Virginia Electric and Power Company?

A. I have heard that he was. I don't know the facts in connection with that.

Q. Which company is now controlled by Engineers. And is he or was he connected with the Stone and Webster interests?

A. Not to my knowledge.

Q. I believe it is true that Mr. Gould, when he sold his interests in what is commonly known as Vepco to the Engineers Public Service Company, received in exchange Engineers common stock, is that correct?

A. I don't know.

Q. We also find appearing on page 1 of Exhibit 3, the names of Whitney Stone & Edward C. Brewster, executives, Estate of Charles A. Stone, holding 37,935 shares and Edwin S. Webster, Jr., care of Mr. George W. Elwell, Accounting Service Corporation, holding 34,200 shares.

On the top of the second page we find that Clarence J. Shearn, trustee under declaration of trust by Stone & Webster, Incorporated, dated February 14, 1938, New York, New York, holding 23,335 shares.

Is it not true that J. M. Forbes was at one time a partner with the Stone & Webster Company?

A. I don't know whether he was or not, Mr. Kanton.

Mr. Condon: Couldn't we get a stipulation on that on the record if it is a fact.

(Discussion off the record.)

By Mr. Kanton:

Q. Will you answer it now? You have been advised.

A. It is my understanding that J. M. Forbes was the grandfather of W. Cameron Forbes, who was a partner of Stone & Webster at one time.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Is Cameron Forbes now a member of the firm of Forbes and Company?

A. I don't know.

Q. I also notice on page 2 of Exhibit 43 the name of Mrs. Jane de P. Webster, care of Mr. Elwell, care of Accounting Service Corporation, Boston, Massachusetts.

Do you know if she is connected or was connected, either through a family relationship or business relationship with the Stone & Webster interests?

A. It is my understanding that she is the wife of Mr. Edwin S. Webster, Sr.

Q. And the next name I am referring to is Margaret S. Winthrop, care of Investors Record Corporation, New York, New York, the owner of 15,563 shares.

Could you tell me if she has been connected with the Stone and Webster interest either in a business capacity or through a family relationship?

A. She is the sister of Whitney Stone.

Q. And we also have appearing on page 2 Mr. Whitney Stone, care of Investors Records Corporation, the owner of record of 15,463 shares.

Now, if we look at Exhibit 43 again, is it true, Mr. Benjamin, that Pratt Brothers, Kidder, Peabody and Company, Whitney Stone & Edward C. Brewster, et cetera, Edwin S. Webster, Clarence J. Shearn, trustee under declaration of trust by Stone & Webster, J. M. Forbes and Company, Mrs. Jane de P. Webster, Margaret S. Winthrop, Whitney Stone, and possibly Mr. Frank J. Gould, have at one time or another been connected either through business or family relationships with the Stone and Webster interests?

A. I would like to exclude from the list of names you read Mr. Gould and J. M. Forbes and Company, because I don't know what the situation is with respect to those two names other than what I have already told you.

The other names you mentioned—you had quite a few of them there—Pratt Brothers we have already covered.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Kidder, Peabody.

A. Kidder, Peabody, Mr. Edwin S. Webster, Jr. I believe is a partner of that firm, and Whitney Stone Trustee and Edwin S. Webster we have already spoken of.

Mr. Shearn as trustee under this declaration of trust is connected by reason of this trust through a business relationship with Stone and Webster.

Mrs. Webster, Margaret S. Winthrop and Whitney Stone we have already covered. Looking through this list and excluding the parties we have just mentioned, to the best of your knowledge and ability, can you tell me if there are any other names listed here-on that have been or are connected with the Stone and Webster interests?

A. I don't see any other names that might have had any connection with Stone and Webster, to the best of my knowledge.

Q. Do you know of any other holders, from looking at the stock books of the Engineers Company, to the best of your recollection, that own shares of common stock in Engineers, who may have been or who are connected either in a business capacity or through family relationship, with the Stone and Webster interests?

I mean you won't find that in the material you have before you, but do you have any other information?

A. Mr. Kanton, I haven't looked over the Engineers stock list with that purpose in mind and I don't feel I can answer.

Q. Mr. Benjamin, referring now to Exhibit No. 44—this is just a point to clear up in my mind.

This Exhibit is entitled "50 of the Largest Holders of Common Stock Who Also Hold Preferred Stock, Eliminating Common Holders only as of October 31, 1945."

Q. Could you tell me what the last part of that statement means "Eliminating common holders only?"

A. The purpose of this exhibit which was prepared at your request was to show the 50 largest holders of common stock who also held preferred. This is not a list of the 50

largest holders of common stock. It is only a list of those holders who also own some preferred stock, according to the records of the company, and eliminating common holders only means that it eliminates those of the largest holders who do not own any preferred. Do I make myself clear?

Q. Looking at this exhibit, do you know from your information, if there would be a material change if an exhibit were prepared showing a list of the 50 largest preferred stockholders who also own common stock?

A. The 50 largest preferred stockholders who also own common stock.

Q. Correct.

Q. I have no idea what that list would show. I assume that it would be different—materially different.

Q. You think it would be materially different?

A. I don't know. I just don't know who the 50 largest holders of preferred stock are.

Q. I mean just from looking at this, does this appear to you that the preferred stock holders here appear to be holders of large amounts of preferred stock?

Mr. Tucker: You are referring now to——

Mr. Kanton: Exhibit 44.

The Witness: We have in the record a list of the 20 largest holders of each class of preferred stock, and looking at Applicant's Exhibit 40, the holdings run from 2,170 shares down to 500.

Looking at 41, which is the $5.50, they run from 10,295 shares down to 1,100, and looking at Applicant's Exhibit 42, which is the $5, they run from 5,750 down to 1,100.

Looking at the holdings on Applicant's Exhibit 44 of preferred stock, I find that some of these same holdings appear.

The only one I—N. J. Forbes and Company, for example, has 10,295 shares of $5.50 preferred and that name appears on both lists.

Q. Kidder, Peabody and Company apparently does too, Whitney Stone, and Pratt Brothers.

A. Some of the names appear to be duplicated. On the other hand there are some rather small holdings of preferred stock. One as low as ten shares. Josephthal, for example. I think the lists would show a different result.

Q. Mr. Benjamin, would you now turn to Exhibit 41 which is the 20 largest holders of record of Engineers $5.50 preferred. The third item appearing on the bottom of page 1 of this Exhibit is Mrs. Clara D. Kellog. Can you tell me who she is?

A. I believe she is the wife of Charles W. Kellog, one of the Directors of Engineers.

Q. How about the Cyrus W. Ferris, care of Stone & Webster and Blodgett, Inc? Do you know who he is? He is the last name appearing on page 2 of Exhibit 41.

A. I believe he is the Vice President of Stone and Webster and Blodgett, Incorporated.

Q. Referring to Exhibit No. 45, Mr. Benjamin, entitled "Engineers Public Service Company—Common stock balance as of June 30, 1945."

Just for the record, it is true, is it not, that this exhibit shows the holdings of Engineers common stock and certain "street" names but does not show otherwise the beneficial owners of record, is that correct?

A. Yes. If by "street" names you mean the names of brokers of whom the transfer agent has knowledge. It does not show the beneficial ownership.

Q. Does it also show the names of nominees?

A. No. We asked the transfer agent to include in this list only the names of brokers that he knew of his own knowledge to be brokers.

Q. Looking at Exhibit 45, there is no way of distinguishing whether any of these holdings may be beneficial holdings of the names listed here, is that correct, Mr. Benjamin?

A. The only way we have of getting any information on the beneficial holdings is this letter that we send out annually in connection with U.5-S.

Richard N. Benjamin—Cross Examination (Cont'd)

Some of these people that are on this list did have stock in their name at December 31, 1944, so that you get a little check perhaps on what their beneficial holdings were at that time. It doesn't mean that they are necessarily the same now.

* * * * *

[R. p. 370] By Mr. Kanton:

Q. Exhibit 13 shows the common stock prices up to November 20, 1945. Can you tell me what the price is now on the market and the high for this year so far? That is just to bring the records up to date.

(Discussion off the record.)

By Mr. Kanton:

Q. What was the high so far this year?

A. The high so far this year was 37 and last night's close was 33½.

* * * * *

[R. p. 376] By Mr. Kanton:

Q. Can you please tell me, for the record, what provision has been made in the Plan for any payment of interest with respect to any additional amount that may have to be payable over $100 per share, plus accrued dividends to the preferred stockholders?

A. I would say that there was no provision in the Plan for that at the present time except to the extent of the third paragraph of Part II of Division C of the Plan, where it is stated that Engineers agrees that in the event the Commission shall, in any findings, find that it is not fair and equitable to the persons affected, that Engineers shall pay to its preferred stockholders no amount in addition to $100 per share plus accrued dividends to the date of deposit then Part II is automatically amended to provide for the payment of such additional amount as the Commission shall

specify and if the Commission specifies the payment of interest, I would think that section would cover it.

Q. In other words, you are leaving it within the province of the Commission to determine if any interest payment is to be paid on this additional amount of over $100 a share, plus accrued dividends.

Mr. Tucker: Subject to our reservation to contest it?

Mr. Kanton: Oh, sure. That is not the point. The point is, as I have stated the question that it is entirely within the province of the Commission as you have stated, whether any interest is payable on this additional amount, if any.

Mr. Tucker: I still make the statement. You say, "Entirely within the province of the Commission."

I say it is not entirely within the province of the Commission because we are reserving the right to contest it.

By Mr. Kanton:

Q. No provision has been made for any payment of interest on any amount that may be found to be fair and equitable over $100 per share plus accrued dividends.

Mr. Tucker: I think you are getting into a discussion of legal problems with the witness on that subject. He has given you the provision of the plan and he has told you that he understands that if the Commission shall find that interest shall be payable in addition to $100 per share plus accrued dividends, the plan will be automatically provided for it, and I say that is, of course, subject to our reservation of the right to contest it.

The rest, it seems to me is a legal question.

* * * * * *

[R. p. 413] By Mr. Kanton:

Q. In your testimony regarding the price ranges of the preferred stock of Engineers, on their respective issue dates, up to November 1, 1945, you made the statement

with respect to the $5 dividend preferred stock, that the reason it sold above $100 in 1928, 1929, and 1930 was "due to the conversion privilege which then existed."

And you said the same thing with respect to the $5.50 dividend preferred stock, with respect to its excess in value in 1929 and 1930 being due to stock purchase warrants attached thereto.

Would you please explain for the record what you mean when you say that the excess in value over $100 per share was due to certain rights attached to the security?

A. Well, the $5 stock was convertible into common stock at that time, and this conversion privilege added value to the preferred stock.

In other words, as the price of the common stock went up the conversion privilege became more valuable.

Q. That wasn't the only reason then that, as you put it, it was due to the conversion privilege or the stock purchase warrants. It may have been due to other factors, isn't that correct?

A. Perhaps the condition of the market at that time.

Mr. Scheetz: While we are on that, could we have for the record the conversion rate if it was a fixed rate. If it was a sliding scale I don't know whether it is feasible.

Mr. Kanton: I think it was attached to the charts that were put in, is that correct, Mr. Benjamin?

The Witness: Well, the charts show the number of shares that were converted. The charter amendment shows the basis of the conversion.

Mr. Scheetz: If that is so, Mr. Benjamin, that is all right. Then I will find it.

Mr. Tucker: I might also add for the information of counsel that all of that information is also contained in detail in these annual reports, and all of the annual reports are in from the beginning.

Mr. Scheetz: Thank you, Mr. Tucker.

The Witness: You will notice that the $5 stock in 1929 went up to approximately $123 a share, and I believe that

the reason it went that high was because of the conversion privilege.

By Mr. Kanton:

Q. I am just trying to get clear what you testified to, but you stated "it was due to the conversion privilege."

Is that the only factor that was involved that made the $5 dividend preferred stock sell as high as 123 in 1929? Weren't there other conditions involved, or other factors?

A. I think that was the factor that made it go that high, Mr. Kanton.

Q. That high above what?

A. Above what it ordinarily would have sold for on a straight yield basis.

Q. What would it have sold for at that time?

A. I can't give you the exact figure.

Q. Weren't the preferred stocks at that time all selling above $100 per share? By that I mean preferred stock on the same dividend yield and the same comparative quality as the preferred stock of Engineers?

A. Well, the $5.50 preferred stock which has a higher dividend rate than the $5 stock was selling in 1929 at one point at a high of 109 so that I think it is a fair assumption that the reason $5 stocks sold higher was because people gave weight to the conversion privilege.

Q. With respect to the $5.50 you say it went as high as 109 in 1929 and that was due to the stock purchase warrants? If there weren't any stock purchase warrants would that have gone has high as 109? What I am really getting at, Mr. Benjamin, is your exact phraseology of your testimony with reference to these privileges that you just spoke about. You don't mean that it was due to these things? This was one of the factors that perhaps added value to the securities in question at that time, is that correct?

A. I think that is a correct statement.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. You testified that as of June 30, 1945, Virginia Gulf and El Paso had $2,773,000 of free earned surplus and Engineers had $7,095,000 of free earned surplus or a total of $9,868,000 which could have been declared out in common stock dividends.

I would appreciate it if you would tell me again why you consider that important as bearing upon the Plan that we now have before us.

Mr. Tucker: You haven't got a page reference that the witness could look at, have you, Mr. Kanton?

Mr. Kanton: Frankly, I am sorry, I don't.

(Discussion off the record)

The Witness: I think the only bearing that that statement has on the present situation is that by reason of the fact that these dividends have not been paid, the security behind the presently outstanding preferred stock has been kept up to that extent.

By Mr. Kanton:

Q. You mean the common stock? Is that what you just said?

A. Preferred stock I said.

Q. Well, doesn't it also increase the value of the common stock?

A. Yes, it does.

Q. Were you prevented from paying out this sum of money?

A. No.

Q. Why didn't you pay it out?

A. Well, the directors of Engineers have adopted a policy of not declaring dividends on the common stock because of the uncertainties due to the Holding Company Act.

Q. What do you mean by that exactly?

A. Well, the future of Engineers has been uncertain because of the requirements of the Public Utility Holding Company Act requiring divestment, and so forth, and the

orders of the Commission that have been issued and pending the final work-out of the Plan, this money has been kept in the system rather than having been paid out.

Q. Are you trying to say in effect that the money was being kept in in order to pay out the preferred stockholders?

A. That is what the money is going to be used for.

Q. Is that the reason it wasn't paid out in dividends?

A. Yes. I think it was one of the principal reasons.

Q. Can you tell me the purpose of Exhibit 30 again please?

A. Exhibit 30 shows the amount that has been left in the system over the period of years shown in the exhibit, and to the extent that it was left in, it has accomplished the same result that I just testified to on this free earned surplus that we talked about.

If it had been left in for other reasons, the amount over and above the free earned surplus has been left in because of freezes and the two figures you just mentioned have to do only with free earned surplus.

Q. The money that is left in has added not only to the value of the common but also to the preferred stock.

A. It has added to the value of both classes stock.

Q. I think you testified this morning that if this money had been paid out as dividends to the Engineers common stock the effect would be that on the final dissolution and liquidation of Engineers, if there was no cash available, some other method would have to be found as for instance the payment to the preferred stockholders of either with the common stock of one of the Utility Companies, or the sale of such stock in order to generate cash to pay off their claim, is that correct?

A. The preferred stockholders claim would certainly have to be paid in one way or another.

Q. Isn't it true that it would have to be paid in one of the methods I have just used rather than with cash if there was no cash available?

Richard N. Benjamin—Cross Examination (Cont'd)

A. If there was no cash available it would have to be paid off either through securities or through the sale of securities to raise cash.

Q. Isn't it true that a dividend policy, as you tried to explain is the purposes of Exhibit 30, of any corporate management of any company is one of the risks an investor takes into account when he purchases a security in such a company?

A. That is true.

Q. Therefore, don't you think the preferred stockholders of Engineers should be in a position to be compensated for their risk as well as the common stockholders?

A. I don't know just what you mean by that, Mr. Kanton. The preferred stockholders have received full dividends on their preferred stock.

Q. What I mean is this: You tried to point out by Exhibit 30 that by holding back the payment of dividends on the common stock you have increased the value of the preferred stock and also increased the value of the common stock. I asked you, isn't it true that a dividend policy is one of the risks an investor takes, meaning a preferred stock investor or a common stock investor and my final question was, if that is one of the risks he takes shouldn't he be in a position to be compensated for that risk because that is one of the risks he took?

A. The basic difference between a preferred stockholders risk in that regard and a common stockholders risk is that a preferred stockholder would have first call on those earnings and dividends and whenever dividends are declared they must first go to the preferred stockholder.

Q. That is right.

A. So the degree of risk is considerably less in the preferred stock.

Q. But if the dividend policy of a company is to hold back dividends it would accrue to the benefit of the preferred stockholders. If the dividend policy of a company is to hold back the payment of its dividends to its common

stockholders, as you have just testified, it would be to the benefit of the preferred stockholders, is that correct?

A. I say that the effect of keeping this money in the system has been to increase the security behind the preferred stock.

Q. I asked you before, isn't that one of the risks that a preferred stockholder takes into account when he purchases a security—the dividend policy of the company, the corporate management of the company—and then I asked you shouldn't he be compensated for that risk if it ultimately comes to his benefit?

(Discussion off the record.)

The Witness: I think that the first part of your question as to whether or not a preferred stockholder takes into account the risk in whether or not he is going to receive dividends, and the corporate management, and so forth is correct.

I think a preferred stockholder does take those things into account.

The second part of your question you asked me whether he should be compensated for the risk he takes. I always understood that he got full compensation for whatever risk he took by buying a security with a fixed dividend rate on it and apparently whatever price he paid for the stock he thought was a fair price in view of all the risks that he took.

By Mr. Kanton:

Q. Yes, but doesn't he look to the company balance sheet to see if there is the assets and the cash to pay his dividends?

A. Absolutely should.

Q. And if he sees a company that has $14,000,000 in cash that isn't being paid out in dividends he would like to become a preferred stockholder in that company as contrasted to a company that doesn't have any cash?

A. Because he is relatively sure of getting his dividends on the preferred stock and in the event the company is

liquidated he is relatively sure of getting whatever amount is payable to him in liquidation, yes.

Q. The only point I have in bringing this out: if it is finally decided that the preferred stockholders of Engineers should be compensated on a going concern basis—and I am not saying what the answer is—we don't know at this time—but if that is the answer, don't you think that one of the elements that should be considered is the present condition of engineers as it is today?

A. I think if the decision is going to be made on the supposition that Engineers is going to continue in business—and I suppose that is what you mean by a going concern basis——

Q. That is correct.

A. All those factors would have to be taken into consideration.

Q. On page 127 of the transcript, Mr. Benjamin?

A. I have it.

Q. You were asked the question in what alternative ways Engineers could comply with that order of the Commission, dated September 16, 1942, which requires the divestment of its interest in Gulf States and El Paso and you answered that: "There were four ways, the first being Engineers could sell its interest in Gulf States to the public through competitive bidding for cash and with the proceeds retire the Engineers preferred stock and distribute the El Paso common stock to its common stockholders.

"Second, Engineers could file a one stock plan whereby a new class of common stock would be issued to replace the present preferred and common stock of Engineers on such basis as might be determined to be fair and equitable.

"Third, Engineers might exchange the common stocks of Gulf States and El Paso or a portion thereof, with or without cash, for the preferred stock of Engineers, and such prices as might be found to be fair and equitable.

"And, fourth, Engineers might divest itself of Gulf States and El Paso in accordance with a plan such as that now under consideration."

Q. I take it then that you, or rather the Board of Directors, considered these four possibilities as a Plan to be proposed before this Commission, is that correct, Mr. Benjamin?

A. I think these Plans have been discussed with the Board informally from time to time, yes.

Q. Were any other plans considered, or were these the only four that were considered?

A. There have been a good many plans that have been considered by the management, and the Board has discussed some of these plans. Whether or not they have discussed all of them, I don't know.

Q. I mean recently. Of these four plans they have considered recently they have decided on Plan No. 4, is that correct?

A. The 3 Holding Company Plan was one that has been considered for sometime in addition to the ones that are mentioned here.

Q. Would you say that of the four plans mentioned the first three should have been discarded because from the tax standpoint they would not be favorable to the Engineers common stockholders?

A. I believe that that was not the reason why these plans were discarded.

Q. Isn't it true, or would you know if it is true, that Plan No. 4 would be more advantageous from a tax standpoint than the first three plans?

A. I don't know the answer to that.

Q. Would Mr. Radcliffe know that?

A. He might.

Q. Also isn't it true that, considering these four plans that you mentioned in your testimony, that under the first three the present common stockholders of Engineers would

lose control of Gulf States and El Paso which they would not do under Plan 4 which is now under consideration?

A. Under Plan 1 where Gulf States would be sold through competitive bidding, the Engineers common stockholders would only have an opportunity to acquire an interest in that stock by going out and buying it in the open market.

Q. We can assume in that case that they have lost control. Considering the present engineers common stockholders as a group?

A. The one stock plan which is the second Plan would result certainly in a dilution of the interest of the present common stockholders in El Paso and Gulf States, also ultimately in Virginia.

Q. I think that by that you mean that a majority of the so-called new common stock that could have been issued under that Plan would go to the preferred stockholders.

A. I wouldn't say what the percentage would be, whether it is a majority or a minority, but in any event the common stockholders would get less than they get under this plan.

Q. Correct.

A. The third Plan, if Gulf States and El Paso or a portion of them were exchanged for the preferred stock obviously the common stockholders would have considerably less interest in those two companies.

Q. You testified on page 123 that when Engineers has divested itself of El Paso and Gulf States, there would no longer be any justification "economically or otherwise" for the continuation of Engineers as the parent of Virginia only.

Could you please explain for the record what you mean by "Economically or otherwise" in detail?

A. Well, I can't see any advantage to any one in continuing Engineers as a holding company over one subsidiary, namely, Virginia.

Q. That is economically?

A. I can't see any reason for continuing them——

Q. Is that what you meant by economically or otherwise?

A. Economically I meant that all it would do would be to add expenses, and so far as I could see, without any particular result being gained from those expenses.

Q. Well, if the actual or present capitalization of Engineers were continued, do you think that Virginia could support it?

A. I haven't analyzed that, Mr. Kanton, but I think even if it could it wouldn't change my feeling on the subject.

Q. That it wouldn't be economically desirable?

A. I don't see any advantage to it.

Q. If it were not for the Holding Company Act, do you think it would be economically desirable to eliminate Engineers as a corporate entity?

A. I think if Engineers were allowed to retain Gulf States, El Paso and Virginia, that there would be some advantage in maintaining Engineers.

Q. And also Puget, Savannah and the rest of the companies which you distributed?

A. That is correct.

Q. However, there is no order of the Commission directed to Engineers requiring it to cease to be a corporate entity, is that correct?

A. That is my understanding.

Q. However, as you stated, Engineers business is not economically desirable any more. However, isn't it possible under the charter of Engineers to voluntarily liquidate Engineers at this time?

A. I think it is open to any Delaware Corporation to liquidate voluntarily with the consent of its stockholders if it so desires.

Q. And it so provided in the Engineers charter?

A. I assume so. Let me look at the charter. I think that is a legal question. I think it is provided in the Delaware law to that effect that any corporation can dissolve.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. I think we can all agree—counsel and yourself and the other counsel here, that it is provided in the Engineers charter.

Mr. Tucker: I won't agree to it because I don't think it is so.

Mr. Kanton: Let me finish the question.

By Mr. Kanton:

Q. —that it is possible under the charter for Engineers to voluntarily liquidate its business at this time?

A. As I understand it, I think it is possible under the Delaware law. I haven't found it in the charter yet.

(Discussion off the record.)

By Mr. Kanton:

Q. What I am really getting at is this: Has Engineers considered the voluntary liquidation of itself as a corporate entity?

A. The Engineers management and Board of directors has filed this plan, when it filed this plan, for the complete liquidation of Engineers, because of the requirement to divest itself if the Act is upheld, of Gulf States and El Paso, and therefore the whole plan was looked at as a unit, because the Directors feel, I am sure, that there is no purpose served in continuing Engineers with just the one subsidiary. You asked me whether——

Q. You considered such action. The answer is——

A. Considered a voluntary action.

Q. The answer is yes or no?

A. The answer is no.

Q. If it is true that the Act has made it economically or otherwise desirable to dissolve Engineers as a corporate entity, isn't it true that Engineers still has the right and the power by vote of its common stockholders, under Delaware law, to voluntarily liquidate the company?

Mr. Tucker: I think he is asking the witness for a legal conclusion and I object to the question.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Tucker: If you want to go into his recollection of what my opinion said, it was a very elaborate opinion as I remember it—10 or 12 pages long—and I doubt if he has a very accurate recollection. I know I haven't. It dealt with the thing rather exhaustively.

Mr. Kanton: I think that the question of paying the preferred stockholders $100 plus accrued dividends has a fundamental basis somewhere, either legally or from a financial point of view. Now, if it was picked up from the charter, and you pointed to a specific provision of the charter, I asked you just now to tell me what it was, and you said you don't care to tell me. Now, I went to the witness to ask him what his recollection was. He is on the stand and I told him that there is nothing in the testimony so far to indicate to us how Engineers or its Board of Directors arrived at $100 per share plus accrued dividends, and as was agreed upon by yourself and the Trial Examiner, I was willing to go along back to the time when this was considered by the Board of Directors, and that is what I am attempting to do now as to what took place at that time and how they arrived at $100 per share plus accrued dividends.

Mr. Tucker: Well, go ahead with your examination then.

(The question was read.)

The Witness: To clear up one thing, you said, "You and the other directors." I am not a director. My recollection is that he told us that this was an involuntary liquidation, in his opinion, and that under the charter—and my recollection is that it is this Section 3 that you refer to—that they were entitled to receive just $100 plus accrued dividends.

By Mr. Kanton:

Q. Did he refer to any other part of Section 3 of Division A as being applicable to the payment of these preferred stockholders?

A. I don't remember, Mr. Kanton. That opinion was pretty long.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. When that statement was given to the Board of Directors, did they consider from the point of view of the preferred stock, that the preferred stock was giving up certain rights, to which a preferred stockholder would be entitled, if he remained in the enterprise, or, in other words, did the Board of Directors, after this opinion was given to them, did they attempt to evaluate the Engineers' preferred stock on a going concern basis? I mean, trying to find out whether the stock was worth, say $80, $90, $100, or more than $100?

A. I don't recall anything of that nature.

Q. In other words, when this was considered, after Mr. Tucker's opinion was given to the Board of Directors, they considered it and adopted it as their opinion?

A. That is right, they adopted the Plan with those provisions in it.

Q. In other words, the Board of Directors gave all their weight to this one factor, the involuntary liquidation provision?

A. I don't know what weight they gave the factors, Mr. Kanton. All I know is that Mr. Tucker's opinion was presented and discussed, and as a result of that presentation the Board adopted the Plan.

Q. Was anything else discussed in the nature of what should be paid to the preferred stockholders, after Mr. Tucker gave this opinion?

A. Well, Mr. Streeter objected to that basis, and I understand he thought they were entitled to more than $100.

Q. What did the other directors say?

A. The other directors thought that Mr. Tucker's opinion was correct, and decided to follow his opinion.

Q. And no attempt was made to evaluate the preferred stocks on any basis, at that time?

A. I don't recall anything of that nature.

Q. When did this occur, Mr. Benjamin?

Richard N. Benjamin—Cross Examination (Cont'd)

A. At——The meeting at which the Plan was adopted was held on September 5, 1945.

Q. And you can't recall at this time whether the Board of Directors considered anything else but Mr. Tucker's opinion as to what should be paid to the Engineers' preferred stockholders?

A. I think they relied mainly on Mr. Tucker's opinion.

Q. Mainly?

A. There may have been some other discussion in which they indicated that they thought that this treatment of the preferred stockholders was the appropriate treatment under the circumstances.

Q. Did they consider the market prices of the Engineers' preferred at that time, on September 5, 1945?

A. I don't recall whether they did or not. One of the directors may have mentioned—I am not going to guess at it. I don't recall that they did.

Q. Discuss the market price?

A. The market price.

Q. Did they discuss anything else? You said they discussed mainly the liquidating provision, the involuntary liquidation provision, as expressed in the charter. What were the other considerations that you recall that they discussed in reference to arriving at $100 per share plus accrued dividends for the Engineers' preferred stockholders?

Would the minutes of that meeting of September 5 refresh your recollection?

A. No, they would not. I have just looked at them and they don't disclose any details of the discussion. No, as I recall it, the principal basis on which this was decided was the opinion of counsel.

Q. Well, I don't want to press the matter, Mr. Benjamin. I understand you say it was the main contection, or principal contention. I want to know whether any other ideas were expressed in reference to the preferred stock

in arriving at this $100 plus accrued-dividends price, other than Mr. Tucker's opinion?

A. That is all I recall at the moment.

[R. p. 143] By Mr. Kanton:

Q. Were any financial statements or reports of studies submitted to the Board of Directors on September 5, when this matter was considered, as to what price should be paid the preferred stockholders of Engineers?

A. I can check that matter. I don't recall at the moment. I can check that matter by reference to the folder for that particular meeting.

Q. Would your minutes show how long this meeting consumed?

A. No.

Q. They would not show that?

A. It doesn't show the time.

Q. Do you happen to recall?

A. Well, as I recall, that meeting lasted about an hour to an hour and a half,—something in that neighborhood.

Mr. Kanton: That is all I have, Mr. Examiner.

Mr. Scheetz: May I ask one or two questions?

By Mr. Scheetz:

Q. Mr. Benjamin, do you remember when Mr. Tucker's opinion was furnished? That is, his written opinion?

A. When it was furnished?

Q. Yes.

A. Yes, it was furnished just, I think, about a week before this directors' meeting of September 5th.

Q. Had there been a previous oral opinion of the same effect?

A. No, I don't think so. Mr. Tucker was asked to give the directors this opinion and he spent considerable time in preparing that opinion.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Then when was the present plan formulated, substantially as it is now? When was it first formulated?

A. I think this warrant plan, Mr. Scheetz, referring to this Section 11(e) Plan, has had its inception about in the middle part of June of this year. You asked me whether Mr. Tucker had given us an oral opinion. By that I assumed you were talking about the Board of Directors, and I think that he had advised us, the officers of the Company, for some time, that it was his opinion that the preferred stock was entitled to $100 a share and accrued dividends.

Q. At the time of the inception of the warrant plan, had you already had an indication from Mr. Tucker as to the value to be put on the preferred?

A. The amount which they were entitled to receive?

Q. Yes.

A. Well, that is not a new question. Under all of the plans that we had discussed, the liquidating holding company plan, and all the others, it has always been stated that the position of the Company is that the preferred stockholders were to receive $100 a share and accrued dividends.

Mr. Tucker: And no more?

The Witness: That is right.

Mr. Scheetz: That is all.

Mr. Kanton: Mr. Tucker, I think you stated you would make available to us that written opinion that was submitted to the Board of Directors?

Mr. Tucker: Well, Mr. Benjamin can make it available to you. I submitted it to the Board and it is in their records.

Mr. Kanton: You have no objection to it, do you?

Mr. Tucker: No.

Mr. Kanton: I would like to reserve,—or will you, if you wish, Mr. Tucker, reserve an exhibit number and submit that at the next meeting.

Mr. Tucker: I have no objection.

Richard N. Benjamin—Cross Examination (Cont'd)

The Examiner: Applicant's Exhibit No. 38 will be reserved for a copy of the opinion of Mr. Tucker.

(Applicant's Exhibit No. 38 is RESERVED as noted.)

By Mr. Condon:

Q. Mr. Benjamin, you are familiar with the technique of drafting plans in corporate reorganizations and liquidations, are you, from your past experience?

A. Yes, I have had some experience.

Q. And you have worked with lawyers in connection with the drafting of such plans?

A. Yes.

Q. And has it been your custom and practice to keep what is commonly known as a tickler, to show the historic development of the various steps of the Plans, and drafts and things of that sort?

A. No, I have kept, sometimes, drafts, early drafts of plans, but we don't have any system about it.

Q. Is it a fact that you have in your files drafts of all the plans that have been projected by either counsel or employees of the Engineers Company, and/or by the directors?

A. I would say we had drafts of some of them—I wouldn't go so far as to say we have all of them.

Q. Well, the more important ones?

A. I think we have some drafts of the more important ones, yes.

Q. And do you have collected the memoranda of discussions had with various officials of the Engineers and counsel for Engineers, and with one or more of the directors of the Company, concerning the development of the Plans as they have progressed?

A. I don't have any memoranda of that sort.

Q. Do you have any records of conversations and discussions at which these things were considered?

A. You said the directors and officers and who else?

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Employees and counsel.

A. I don't think I have any memoranda on those subjects.

Q. Do you have a record of amendments and changes as to specific paragraphs and sections of the plans and things of that sort?

A. I don't believe I quite understand what you mean.

Q. Well, when you say this warrant plan was promulgated some time in June, of 1945,—now, who prepared that original draft, if you know? It had to start somewhere.

A. Well, I can tell you a little about that. I had been down here at the SEC discussing another plan with them, and at a conference with the head of the Utilities Division the suggestion was made that perhaps we should give some consideration to a warrant plan.

Some other companies had adopted such a plan and it was suggested that we give consideration to that type of plan.

We did give consideration to it and decided that that was a workable plan, and then we worked out the figures in connection with that and went ahead on that basis.

Q. Now, when you say "we" gave consideration, will you state for the record who was included in that plural pronoun?

A. Mr. Barnes, Mr. Tucker, Mr. Hastings and the other executives in the New York Office.

Q. No, who actually undertook the chore of preparing an outline or resume of the steps and the Plan itself? Did you do that?

A. I guess I did do that.

Q. In Mr. Tucker's office, was it?

A. I think it was in my own office. I can't recall whether Mr. Tucker was in my office at the time or not, but we had a very brief statement of the steps to be followed. It wasn't what you would call the Plan, but it was a statement of the steps.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Now, from June, 1945, until the Plan as presently submitted to the Commission as filed, with the amendments, were there any changes made as a result of discussions had by this group of people that you mention, or with others, or did it still remain in its initial form without change?

A. Oh, no; there were changes made in it. As I testified today, our original Plan, prior to its being filed, contemplated the issuance of Gulf States common stock under rights, the sale of Gulf States stock under rights, at $10 a share, and that involved a $6,000,000 bank loan. We changed that to $11.50 and a $3,000,000 bank loan. We introduced the idea of exchanging Engineers' preferred stock for Gulf States' common stock after the original filing had taken place. We changed the three-week period to a ten-day period, as I explained in the testimony.

Q. Other than you have testified to on your direct, Mr. Benjamin, can you think of any other changes that were made, of substance, or have you fairly stated them all, between June and October?

A. I think I have fairly stated them all.

Q. I will ask you again—you don't keep a tickler with the chronological development of changes and amendments, —or you didn't in this instance?

A. No, I do not. I keep a record of conversations with the SEC staff. I mean, when I get back to my office, I usually put down my best recollection of what developed at the conference, so that I can keep clear on what the decisions are.

Q. And when you amend drafts of a Plan or exhibits to a Plan, do you keep any record of the changes, and why you have made the changes?

A. No.

Q. I noticed on some of your exhibits, "Fifth Draft". By way of illustration, what would have happened to the four prior drafts, and why did you have a fifth draft of a particular exhibit?

Richard N. Benjamin—Cross Examination (Cont'd)

A. Well, because every time somebody looks at one of these drafts, they think of something else.

Q. And by "somebody" you mean the group of people?

A. I would pass it around the office for comments, and to the SEC for their comments, and Mr. Tucker, and I would work on it, and even we get different ideas sometimes, after we look at it again.

Q. How many plans were actually submitted by Engineers to this Commission or the staff for consideration, other than the one now before the Commission for formal action?

A. I couldn't answer that question.

Q. Who could answer it, Mr. Benjamin?

A. Well, I don't know—perhaps Mr. Barnes has a more accurate memory than mine, but there were so many plans that have been discussed.

We started in discussing plans with the SEC I think as far back as 1941, and there have been all sorts of variations of them, and there just have been quite a few of them, that's all.

Q. There were records made of all these changes and developments since 1941, every time you or Mr. Barnes discussed the matter with someone here in the Commission?

A. I wouldn't say every time. My practice is to make a record of conversations on those plans.

Q. Would you have available your memoranda of those conversations and bring them with you when you resume for cross-examination?

A. Yes, sir.

Mr. Condon: That is all.

(Witness excused.)

Richard N. Benjamin—Direct Examination (Cont'd)

Hearing on December 17, 1945.

[R. p. 160]

RICHARD N. BENJAMIN,

was called as a witness on behalf of the Applicants and, having been previously sworn, resumed the stand and testified as follows:

Direct Examination (Continued)

By Mr. Tucker:

Q. Mr. Benjamin, I show you Amendment No. 4 to the Plan Pursuant to Section 11(e) of the Public Utility Holding Company Act of 1935 for Divestment of Assets and Related Matters which was filed today. The original Plan and the three amendments thereto were filed as Applicant's Exhibits Nos. 1, 2, 3 and 4.

Was Amendment No. 4 prepared under your direction, and do you believe the statements contained therein to be correct?

A. Yes, this was prepared under my direction and I believe the statements contained therein to be correct.

Mr. Tucker: I would like to offer as Applicant's Exhibit No. 39, Amendment No. 4, and have it marked.

(Applicant's Exhibit No. 39 is marked for identification.)

The Examiner: If there is no objection, that will be received as Applicant's Exhibit No. 39.

(Applicant's Exhibit No. 39 is received in evidence.)

By Mr. Tucker:

Q. What changes are accomplished by this amendment?

A. The changes effected are as follows:

1. A new step was added to Part I of the Plan, namely, Step 9 which provides that within 60 days after the Plan

becomes effective, the officers of Engineers Public Service Company (Incorporated) will file, without further action by the Directors or Stockholders of Engineers, a Certificate of Dissolution in the Office of the Secretary of State of the State of Delaware, and other supporting dissolution papers will be filed whereupon the Directors of Engineers would become trustees to take charge of the assets of the Company and to carry on such business as may be necessary to effect the final settlement of the unfinished business of the Company during the period specified by the Delaware law for dissolved corporations.

2. Part III of the Plan was eliminated.

3. The proviso in the third paragraph of Part II of Division C was eliminated which stated that in the event that any order of the Commission provided that Engineers should pay to its Preferred Stockholders any amount in addition to $100 per share plus accrued dividends to the date of deposit Engineers would be deemed to be a party aggrieved pursuant to Section 24 of the Act and could contest such an order pursuant to that Section and a new proviso was substituted in lieu thereof which reserves the right of Engineers to contest before the Commission or any court any finding or order of the Commission as a result of which Engineers should be directed or required to pay any amount in addition to $100 per share plus accrued dividends to the date of deposit.

4. The financial statements attached as Exhibits A through E were eliminated, it being the purpose to file these exhibits subsequently at this hearing.

5. Certain other changes were made in order to bring the statements up to date and to make the statements consistent with the other changes.

Q. Have there been any developments in connection with The Western Public Service Company since November 20, 1945?

A. Yes, on December 3, 1945, Engineers received five bids for the purchase of either the capital stock or the assets of The Western Public Service Company.

The Board of Directors of Engineers, at a meeting held that day, authorized the acceptance of the bid of William C. Gilman and associates for the capital stock of The Western Public Service Company. This bid was in the amount of $843,000.

A contract was signed the same day by Mr. Gilman and Engineers. Pursuant to the contract Engineers will also receive at the Closing Date cash equal to the principal amount of a demand note of $508,800 from Western to Engineers and in addition adjustments for net current assets and other items provided for in the contract as a result of which Engineers' cash will increase by approximately $1,500,000.

It is expected that the closing will take place in January, 1946. The differences between the pro forma statements contained in the Plan and the expected actual result are so minor that it was not deemed necessary to make any change in these pro forma statements.

Q. Do you have with you statements showing the twenty largest stockholders of record on October 31, 1945, of the three classes of Preferred Stock and of the Common Stock of Engineers?

A. Yes.

Q. Were these statements prepared under your supervision and do you believe them to be correct?

A. Yes.

Mr. Tucker: I would like to offer these in evidence at this time and ask that they be marked Applicant's Exhibit No. 40.

The Examiner: No. 40 will be a reference to the $6 Preferred Stock.

(Applicant's Exhibit No. 40 is marked for identification.)

Richard N. Benjamin—Direct Examination (Cont'd)

The Examiner: If there is no objection, that will be received as Applicant's Exhibit No. 40.

(Applicant's Exhibit No. 40 is received in evidence.)

Mr. Tucker: I offer as Applicant's Exhibit No. 41 the same with respect to the $5.50 Preferred Stock.

(Applicant's Exhibit No. 41 is marked for identification.)

The Examiner: If there is no objection, that will be received as Applicant's Exhibit No. 41.

(Applicant's Exhibit No. 41 is received in evidence.)

Mr. Tucker: As Applicant's Exhibit No. 42 the same with reference to the $5 Preferred Stock.

(Applicant's Exhibit No. 42 is marked for identification.)

The Examiner: If there is no objection, that will be received as Applicant's Exhibit No. 42.

(Applicant's Exhibit No. 42 is received in evidence.)

Mr. Tucker: As Applicant's Exhibit No. 43, the same with respect to the Common Stock.

(Applicant's Exhibit No. 43 is marked for identification.)

The Examiner: If no objection, that will be received as Applicant's Exhibit No. 43.

(Applicant's Exhibit No. 43 is received in evidence.)

By Mr. Tucker:

Q. Do you have with you a statement showing fifty of the largest holders of Common Stock of Engineers who also held Preferred Stock of Engineers as of October 31, 1945?

A. Yes.

Richard N. Benjamin—Direct Examination (Cont'd)

Q. Was this statement prepared under your supervision and do you believe it to be correct?

A. Yes.

Mr. Tucker: I offer as Applicant's Exhibit No. 44 a statement of the 50 largest holders of Common Stock, eliminating Common stockholders only as of October 31, 1945.

(Applicant's Exhibit No. 44 is marked for identification.)

The Examiner: Hearing no objection, that will be received as Applicant's Exhibit No. 44.

(Applicant's Exhibit No. 44 is received in evidence.)

By Mr. Tucker:

Q. Do you have with you a statement showing Common Stock held by brokers as of June 30, 1945?

A. Yes.

Q. Was this statement prepared under your supervision and do you believe it to be correct?

A. Yes, to the extent that the names of brokers are known to the Transfer Agent. This statement contains the names and addresses of certain brokers together with their record holdings of Common Stock of the Company as of June 30, 1945, and was prepared at my request by the Transfer Agent.

This statement does not purport to contain the names of all brokers who hold Common Stock of the Company but is limited to the names of brokers who are members of an Exchange and certain other holders whom the Transfer Agent had knowledge were brokers.

Mr. Tucker: This statement of Engineers Public Service Company, Common Stock balances as of June 30, 1945, giving the names of brokers with the explanation that the witness has made, I offer as Applicant's Exhibit No. 45.

(Applicant's Exhibit No. 45 is marked for identification.)

Richard N. Benjamin—Direct Examination (Cont'd)

The Examiner: Hearing no objection, it will be received as Applicant's Exhibit No. 45.

(Applicant's Exhibit No. 45 is received in evidence.)

[Note: R., pp. 168-171—Engineers Annual Reports for 1925 through 1932 introduced and received in evidence as Exhibits 37M-37T.]

[R. p. 172] By Mr. Tucker:

Q. Do you have a statement which supersedes Exhibit E attached to the Plan as originally filed?

A. Yes, I have a statement showing income statements of Gulf States for the years 1939 through 1945 with the last two months of 1945 estimated which is a revision of Exhibit E to the Plan as originally filed. The principal change effected by this new exhibit is to reflect an increase in the item "reduction in Federal excess profits taxes resulting from amortization of emergency facilities" from $544,100 to $1,254,290. This change arose by reason of the fact that subsequent to the preparation of the first exhibit the President, on September 29, 1945, terminated the period for amortizing emergency facilities and Gulf States elected to take all of the credit for the period ending on September 29, 1945.

Q. Was this statement prepared at your direction and do you believe it to be correct?

A. Yes, it was so prepared and I believe it to be correct.

Mr. Tucker: This statement which the witness has described, we offer as Applicant's Exhibit No. 48.

(Applicant's Exhibit No. 48 is marked for identification.)

The Examiner: Hearing no objection it will be received as Applicant's Exhibit No. 48.

(Applicant's Exhibit No. 48 is received in evidence.)

Richard N. Benjamin—Direct Examination (Cont'd)

By Mr. Tucker:

Q. Do you have another statement covering this same period for Gulf States Utilities Company?

A. Yes, I have a statement covering the same period for Gulf States which applies to taxes, the tax reduction resulting from amortization of emergency facilities and reflects amortization of plant acquisition adjustments as a deduction from income. This statement was prepared in this form at the request of the Staff.

Q. Do you believe this statement to be a correct statement of income for these years set up on the basis requested by the Staff?

A. Yes.

Mr. Tucker: I offer this as Applicant's Exhibit No. 49.

(Applicant's Exhibit No. 49 is marked for identification.)

The Examiner: Hearing no objection it will be received as Applicant's Exhibit No. 49.

(Applicant's Exhibit No. 49 is received in evidence.)

By Mr. Tucker:

Q. Do you have with you a statement relating to income of El Paso Electric Company?

A. Yes, I have income statements for the years 1939 through 1945, last two months of 1945 estimated, of El Paso Electric Company, pro forma, giving effect to present fixed charges and preferred dividends and proposed number of shares of Common Stock.

Q. Was this prepared at your direction and do you believe it to be correct?

A. Yes.

Mr. Tucker: This statement I offer as Applicant's Exhibit No. 50.

(Applicant's Exhibit No. 50 is marked for identification.)

Richard N. Benjamin—Direct Examination (Cont'd)

The Examiner: Hearing no objection, it will be received as Applicant's Exhibit No. 50.

(Applicant's Exhibit No. 50 is received in evidence.)

By Mr. Tucker:

Q. Do you have with you a financial statement which supports Schedule J of Applicant's Exhibit No. 9?

A. Yes. I have a statement which is headed Engineers Public Service Company Incorporated and Subsidiary Companies Consolidating Income Statement for the 12 months ended June 30, 1945 showing tax adjustment applied against taxes and reflecting amortization of plant acquisition adjustments as a deduction from income.

Q. Was this prepared at your direction and do you believe it to be correct on the basis you just outlined?

A. Yes, it was so prepared and I believe it to be correct.

Mr. Tucker: This statement I offer as Applicant's Exhibit No. 51.

(Applicant's Exhibit No. 51 is marked for identification.)

The Examiner: Hearing no objection, it may be received as Applicant's Exhibit No. 51.

(Applicant's Exhibit No. 51 is received in evidence.)

By Mr. Tucker:

Q. Do you have with you a similar statement supporting Schedule J-1 of Applicant's Exhibit No. 9?

A. Yes, I do.

Q. Was this prepared at your direction and do you believe it to be correct on the basis stated?

A. Yes, it was so prepared and I believe it to be correct.

Mr. Tucker: This statement I offer as Applicant's Exhibit No. 52.

(Applicant's Exhibit No. 52 is marked for identification.)

Richard N. Benjamin—Direct Examination (Cont'd)

The Examiner: Hearing no objection it will be received as Applicant's Exhibit No. 52.

(Applicant's Exhibit No. 52 is received in evidence.)

By Mr. Tucker:

Q. Do you have income statements of Virginia Electric and Power Company for the years 1944 and 1945?

A. No, these statements are in the process of preparation.

Mr. Tucker: If the Examiner please, I would like to have reserved for this statement, when it is prepared, Applicant's Exhibit No. 53.

The Examiner: I understand there is no objection. Applicant's Exhibit No. 53 will be reserved for that purpose to be incorporated in the record as received, after being duly marked, without reopening the hearing.

(Applicant's Exhibit No. 53 is RESERVED, as noted.)

* * * * *

[R. p. 184] By Mr. Tucker:

Q. Do you have with you a statement which summarizes the Common Stock issues of Engineers?

A. Yes, I have a statement which shows that.

Q. Was it prepared under your supervision, and do you believe it to be correct?

A. Yes.

Mr. Tucker: I offer this statement of summary of the Common Stock issues of Engineers Public Service Company as Applicant's Exhibit No. 54.

(Applicant's Exhibit No. 54 is marked for identification.)

The Examiner: Hearing no objection, it will be received as Applicant's Exhibit No. 54.

(Applicant's Exhibit No. 54 is received in evidence.)

By Mr. Tucker:

Q. What does this exhibit show?

A. This exhibit shows that 1,274,240 shares of Common Stock were issued for cash, either directly or on conversion of Preferred Stock which had been sold for cash, aggregating $38,294,679.85, an average of $30.05 per share and that 99,708½ shares were issued as stock dividends through capitalization of surplus at $10 per share; 535,638 shares were issued in exchange in connection with acquisitions at an average price of $35.03 per share based on market of Engineers Common Stock at the time, and that the balance was issued in conversion of scrip at an average rate of $10 per share, or an average for all issues of Common Stock of $30.40 per share.

Mr. Kanton: May I ask, Mr. Tucker, what the purpose of this exhibit is?

Mr. Tucker: I think it speaks for itself but it is for the purpose of showing what was paid for the Common Stock that is outstanding now of Engineers Public Service Company.

Mr. Kanton: Bearing upon what aspects of the Plan, sir?

Mr. Tucker: Bearing upon the question of how much would be paid to the Preferred stockholders for retirement of their Preferred Stock.

Mr. Condon: May I inquire of this witness with one question with your permission, Mr. Tucker?

Mr. Tucker: Yes, surely.

Mr. Condon: Mr. Benjamin, with respect to these exhibits that were offered today and to a substantial extent at the last hearing, is it not the fact that these were all prepared, or most of them were prepared in connection with the preparation for these hearings rather than having been data that was submitted to the Board of Directors of Engineers on or about September 5, when the Plan was approved?

The Witness: I don't like to answer a question quite as broad as that. I would say that certainly most of these exhibits have been prepared since September 5.

Mr. Condon: Would you have a record of which of your exhibits that have already been received in evidence were prepared prior to September 5?

The Witness: I can't answer that question without going back through all of these exhibits.

Mr. Condon: Perhaps you could consider it and then later on state for the record.

The Witness: I would be glad to.

Mr. Condon: Thank you.

The Examiner: Anything further on direct, Mr. Tucker?

Mr. Tucker: Yes, there is, Mr. Examiner.

(Discussion off the record.)

By Mr. Tucker:

Q. Mr. Benjamin, you have before you certain statements which I understand are breakdowns of some figures previously given and which you have heretofore delivered to the staff of the Commission, have you not?

A. I do.

Q. These breakdowns were prepared under your direction and do you believe them to be correct?

A. Yes, sir.

Mr. Tucker: Mr. Examiner, I offer under one cover as one exhibit the breakdown that the witness has just testified with respect to, as Applicant's Exhibit No. 55.

(Applicant's Exhibit No. 55 is marked for identification.)

Mr. Tucker: These are described as Engineers Public Service Company Detail of Expenses 12 Months Ended June 30, 1945—Actual; Engineers Public Service Company Pro Forma Detail of Expenses After Consummation of Parts I and II of the Plan; Engineers Public Service Com-

pany Detail of Taxes—Other 12 Months Ended June 30, 1945 Actual and Pro Forma; Engineers Public Service Company Computation of Reduction in Federal Income Taxes Based on Engineers and Virginia Electric and Power Company Filing a Consolidated Federal Income Tax Return in 1946.

The Examiner: Hearing no objection they will be received as Applicant's Exhibit No. 55.

(Applicant's Exhibit No. 55 is received in evidence.)

Mr. Tucker: Now, I would like to offer the Divestment Orders in Engineers Section 11 proceeding. I offer as Applicant's Exhibit No. 56 Holding Company Act Release No. 2897.

[Note: H. C. A. Rel. No. 2897 is reported at 9 S. E. C. 764 (1941).]

(Applicant's Exhibit No. 56 is marked for identification.)

The Examiner: Hearing no objection it will be received as Applicant's Exhibit No. 56.

(Applicant's Exhibit No. 56 is received in evidence.)

Mr. Condon: What was the date of that?

Mr. Tucker: That was released——

Mr. Kanton: July 23, 1941.

Mr. Tucker: It was released July 24. I guess it was entered the day before.

Mr. Kanton: Yes.

Mr. Tucker: And as Applicant's Exhibit No. 57 Holding Company Act Release No. 3230. That was released December 31, 1941.

(Applicant's Exhibit No. 57 is marked for identification.)

The Examiner: Hearing no objection, that will be received as Applicant's Exhibit 57.

(Applicant's Exhibit No. 57 is received in evidence.)

Richard N. Benjamin—Direct Examination (Cont'd)

Mr. Tucker: As Applicant's Exhibit No. 58 Holding Company Act Release No. 3245. That was released on January 6, 1942.

(Applicant's Exhibit No. 58 is marked for identification.)

[Note: H. C. A. Rel. No. 3245 is reported at 10 S. E. C. 904 (1941).]

The Examiner: Hearing no objection that will be received as Applicant's Exhibit No. 58.

(Applicant's Exhibit No. 58 is received in evidence.)

Mr. Tucker: And as Applicant's Exhibit No. 59 Holding Company Act Release No. 3796 which was released on September 17, 1942, having been actually dated September 16, 1942.

(Applicant's Exhibit No. 59 is marked for identification.)

The Examiner: Hearing no objection that will be received as Applicant's Exhibit No. 59.

[Note: H. C. A. Rel. No. 3796 is reported at 12 S. E. C. 41 (1942).]

(Applicant's Exhibit No. 59 is received in evidence.)

Mr. Tucker: As Applicant's Exhibit No. 60, Holding Company Act Release No. 3835, released on October 7, 1942 and actually dated October 6, 1942.

[Note: H. C. A. Rel. No. 3835 is reported at 12 S. E. C. 269 (1942).]

(Applicant's Exhibit No. 60 is marked for identification.)

The Examiner: Hearing no objection that will be received as Applicant's Exhibit No. 60.

(Applicant's Exhibit No. 60 is received in evidence.)

Richard N. Benjamin—Direct Examination (Cont'd)

By Mr. Tucker:

Q. Mr. Benjamin, would you describe the relationship between El Paso Natural Gas Company and Engineers Public Service Company?

A. The present relationship?

Q. No. What is the history of that relationship?

A. Engineers relationship with El Paso Natural Gas Company began around 1930 when Engineers loaned certain money to El Paso Natural Gas Company in order to assist them to make an extension to their lines.

At that time Engineers received an option to purchase 85 per cent of the outstanding common stock of that company, and Phelps Dodge Corporation, which also advanced money had a 20 per cent interest in that option.

In 1936 it became necessary for Engineers to exercise this option, but by that time Public Utility Holding Company Act had been passed and Engineers was advised by counsel that it would be inadvisable to exercise that option and acquire the stock. As an alternative to that——

Q. At that time was Engineers Public Service Company a registered holding company?

A. No. That was prior to the time that Engineers Registered. Engineers didn't register as a holding company until February 1938.

Q. Well, go ahead.

A. At that time an arrangement was worked out with Clarence J. Shearn, who acted as independent trustee, to exercise this option, and a five-year trust agreement was worked out pursuant to which it was expected that the shares of El Paso Natural Gas stock would be sold.

The trustee exercised an option to acquire 57,119 shares of El Paso Natural Common Stock at 25. That was on April 27, 1936, total cost of $1,427,975.

This stock was split three for one, so that the trustee received 171,357 shares representing an average cost of $8.33 a share. This stock was sold in three separate blocks.

The first block, 60,000 shares was sold in September 1936 at $19 a share, total proceeds of $1,137,952.

A second block was sold, 60,000 shares at 25, in August 1937, on which was realized $1,497,410, and the final block of that stock was sold in March 1944, 51,357 shares at 29.661 a share, total of $1,523,300.

By that time the trust arrangement with Mr. Shearn had been terminated. Engineers had previously taken over the direct title to that stock pursuant to an exemption that existed in the Holding Company Act Rules at that time, so that that last sale was made by Engineers, itself.

Since that time Engineers has had no connection with El Paso Natural Gas Company.

Q. How much profit did Engineers make on those sales?

A. Engineers made a profit of $2,730,787 from those three sales.

Q. If it had held the stock at the present time what would be the value of the stock?

Mr. Condon: Based on what, Mr. Tucker?

Mr. Tucker: Based on the market on the New York Stock Exchange.

By Mr. Tucker:

Q. That is approximately, at the present time; if you know it.

A. I don't know the price today, but recently, quite recently, the El Paso Natural Gas stock has sold at 47. If you assume a price of 47 that block of 171,357 shares would have a market value of slightly over $8,000,000 which would represent approximately $6,600,000 over and above Engineers' cost.

We realized a profit of $2,700,000 so that the difference between what we actually did realize and what we would realize if we sold the stock at 47, would be approximately $4,000,000.

Mr. Condon: Mr. Tucker, may I inquire as to the purpose of this line of inquiry?

Mr. Tucker: Yes, I am perfectly willing to state what I hope to gain by it. Our position is that Engineers was forced to sell that stock by impact of the Act, that it was prohibited from acquiring the stock at the time that the option matured, by virtue of the operation of Section 4, and so that it would not acquire it in violation of the law it set up this trust arrangement, and that if it hadn't been for the Act, it would have continued to hold the stock, and that that again is another sacrifice that the Common Stock of Engineers had incurred by reason of the impact of this Act.

Mr. Kanton: Isn't this all a matter of public record, Mr. Tucker?

Mr. Tucker: It may be but it isn't in the record.

Mr. Kanton: Is there any record you can incorporate by reference instead of putting these figures in through the witness?

Mr. Tucker: I don't think so. Not that we could collect together in one spot. I think that we are certainly entitled to that purpose that I have stated for putting that evidence in.

Mr. Kanton: I am not trying to foretell your proposed testimony. Are you planning to do this with every company that Engineers is being required to dispose of its interest under the Holding Company Act?

Mr. Tucker: I think we have got a good deal of that information already in the record but I am certainly not resting on my main case here today, and what I may do in the future would be what I feel I ought to do to protect the situation.

Mr. Kanton: Isn't this a matter that is all being taken up now by the Supreme Court of the United States and will be decided by them?

Mr. Tucker: Not at all, as I view it. It would be a different question than that. We were ordered in these orders that have just gone into the record, among other things, to dispose of the tag-end of this stock, 51,000 shares.

To that extent it might be said to—well, I don't think it is even involved in that. I think these considerations are quite different and I don't think it was made an issue in that case whether the El Paso Natural Gas Stock should be sold or whether it shouldn't.

In any event, it is a moot question at this time because it has already been sold and the case was argued.

I certainly wouldn't be trying to argue that to the Supreme Court under those circumstances.

Mr. Condon: Let me see if I read your mind correctly here. This testimony is being offered to show the alleged sacrifices being visited upon the Common because of the impact of the Act and therefore it is probative of the claim of the directors of Engineers that the Preferred stockholders should not receive more than a hundred, is that the purpose?

Mr. Tucker: It has a bearing on that issue. I am not saying it is probative of this or that. It has a bearing on what is fair and equitable to be received under this plan by both the Preferred stockholders and the Common stockholders.

Mr. Kanton: Mr. Tucker, if you will refer to Exhibit 59 which is Holding Company Act Release No. 3796 issued under date of September 17, 1942 by the Commission, you will find on page 58 thereof that Engineers is to sever its relationship with El Paso Natural Gas Company.

Mr. Tucker: I admitted that a few minutes ago, and I said that it operated to the extent that we had stock at the time that this order was issued of which we had then, as I say, 51,000 odd shares to require us to divest ourselves of it, and that since that time and before the argument of the Supreme Court we had.

And you are asking me was it involved in the Supreme Court case; my answer is, it wasn't because we had sold it before and I would have readily admitted that it was a moot question and wouldn't apply to the Supreme Court.

Mr. Kanton: Does that also apply to the properties of Savannah, Key West and Puget?

Mr. Tucker: I think so. I don't know why I should be answering such questions. I certainly don't want to prejudice myself by flash answers on legal propositions.

Mr. Kanton: I just wanted to state this, Mr. Tucker. I am quite agreeable to your putting something in the record that should go in. I just wanted to know for the purposes of the record why you were putting it in and you told me that and I asked one more question whether you had in mind doing that with other properties.

Mr. Tucker: As to that, I don't care to take a position at this time unless the Examiner forces me to take a position. I don't quite see why I should.

Mr. Scheetz: In view of the explanation made of the reasons for this testimony, I move that it be stricken out as not probative to anything bearing on the fairness of this plan.

Mr. Condon: I think we are getting pretty far afield here. I didn't object to the receipt of these releases in the beginning because I didn't want to unduly interfere with counsel's examination, but I don't see that that has any relevance or materiality to the issue before this Commission —that is, what is fair and equitable to pay to the Preferred stockholders here. If we are to have to re-live the integration proceedings of the Engineers Public Service Company and the divestment of all the subsidiaries here as proof of the alleged burdens that have been borne by the Common, arguendo, they should be at least in part borne by the Preferred.

I think that that is outside the scope here of our inquiry and I join in Mr. Scheetz' objection and ask that the exhibits be stricken.

Mr. Kanton: Mr. Examiner, I had no objection to Mr. Tucker putting in through Mr. Benjamin the evidence he did.

The Examiner: We are dealing with two questions.

Mr. Kanton: This is in line with the question of whether I will take an objection to this line of testimony. That is the reason I asked Mr. Tucker if he intended to do this with every company.

I think if burdens the record and it has no materiality. I have no objection to letting this stand, but I would object if this sort of testimony by Mr. Benjamin were to continue.

Mr. Tucker: Wouldn't it be logical to save that objection until I offer some?

Now, does the Examiner care to hear me.

I understand that the point you are making—you are a little confused and I wanted to get it clear. You talked about putting in these releases. You certainly don't object to having releases received as evidence. You are not asking to have them stricken.

Mr. Condon: I don't think they have to be put in evidence. If you want them they can be incorporated by reference for whatever materiality the Commission may want to give them.

The Examiner: They are already in the record.

Mr. Tucker: If you are making a motion to strike——

Mr. Condon: I did make a motion to strike and asking that the testimony be stricken.

The Examiner: Let us confine ourselves to the two issues.

Are you objecting now to the releases that were offered as Exhibits 57, 58, 59 and 60?

Mr. Condon: I object to the testimony of the witness Benjamin and the releases offered while he is a witness with respect to the matter of the El Paso Natural Gas Company, wherein Mr. Benjamin was asked to and did describe the matter of the relationships, the past history, and so on, between Engineers and El Paso Natural Gas Company on the grounds that the same are not relevant and material to the issues before this Commission with respect to what is fair and equitable to be paid to the Preferred stockholders under the plan as filed.

Mr. Tucker: You are confused again because I offered no exhibits with respect to El Paso Natural Gas Company at all except as they were included incidentally in the September release.

The Examiner: Let us shorten this. I will overrule the objection to the exhibits. I will hear your objections to Mr. Benjamin's testimony on the El Paso Natural Gas situation.

Mr. Condon: Mr. Tucker has stated in answer to counsel's inquiry that the purpose of this line of testimony with regard to the El Paso Natural Gas Company is to show first that there was a loss sustained presumably by Engineers, through the enforced sale of Engineers' interest in El Paso through the medium of the trusteeship of Mr. Shearn to which reference has been made and through the actual sale of the remaining stock by Engineers, itself.

His contention, if I understand it correctly, is that:

(1) But for the impact of the Act, that those sales would never have occurred. That the Engineers presumably would have retained that stock, and that if they had retained that stock looking at the present market value of El Paso Natural Gas Company at 46 or 47, whatever Mr. Benjamin said, there was a potential loss that had been visited upon Engineers of some five or six million dollars.

I say that all of that is irrelevant and immaterial to the inquiry before this Commission with respect to the fairness and equitability of the plan insofar as it pertains and relates to the Preferred stockholders of Engineers and I ask that the testimony be stricken.

Mr. Tucker: Does the Examiner care to hear me on the subject?

The Examiner: I will hear Mr. Kanton first. He has taken a different position.

Mr. Kanton: I have Mr. Examiner. I have no objection to the testimony placed in evidence by Mr. Benjamin.

Mr. Scheetz: Mr.. Examiner, I am not standing on protocol but as a matter of fact, my objection was made first and went solely to the line of testimony and not to the releases. I think I stated my reasons but if I didn't it was simply this: that it is wholly speculative as to whether or not they would have sold—I understood Mr. Benjamin to say that if they had held the stock and sold it today they would have had a profit of so much.

Now, we are asked to throw ourselves back to a prior period and compare a loss sustained then with something that might have happened in the future, and one has only to think on and on as Mr. Kanton suggested, if they came in here and took that up with each property in succession we would be wholly in the realm of speculation and I think this is the time to stop it now.

* * * * *

[R. p. 207] The Examiner: While I have expressed myself in this matter that it is a question of whether the Commission will go into this, nevertheless I am going to deny the motion to strike and let the matter go to the Commission.

Mr. Condon: May I have an exception, Mr. Examiner?

(Discussion off the record.)

By Mr. Tucker;

Q. Was the sale of the El Paso Natural Gas Company stock, with respect to which you have just referred, based upon advice of counsel that you couldn't continue to hold it under the Holding Company Act?

A. To which sale are you referring?

Q. The various sales.

A. The three sales.

Q. The three sales?

A. That is correct.

Mr. Tucker: I have no further questions.

Mr. Kanton: I would just like to ask one or two questions on this line now that the testimony has been admitted into evidence.

[R. p. 208]

Cross Examination.

By Mr. Kanton:

Q. Didn't Engineers consider the sale of these securities at the time to be in the best interests of all the security holders meaning the preferred and common of Engineers and didn't they consider that they were receiving a good price for them?

A. Well, so far as the first two sales were concerned, Mr. Kanton, they were made while this stock was under a five-year trust agreement with Judge Shearn, and it was our understanding at the time trust agreement was set up that we were to dispose of that stock during the five year period, and the two sales that were made were made on the basis of the market price at the time the sales were made and it was considered then as the market price, it would be a good time to dispose of those blocks.

I think if it hadn't been for the restrictions of the Act we probably would not have sold the stock at that time.

Q. You didn't answer my question.

Mr. Condon: I ask that the last portion of the answer be stricken as a volunteered statement and not responsive.

The Examiner: Read it.

(Question read.)

Mr. Condon: I think that is not responsive, purely a volunteered statement by this witness.

The Examiner: I will grant the motion to strike.

Mr. Tucker: Just those words.

The Examiner: Just the last sentence of the answer.

Mr. Reporter, will you read the question?

(Question read.)

The Witness: It is my understanding that the management of Engineers at that time thought that the price at which the securities were sold was a fair price at that time. In other words, that was the market price at that time.

By Mr. Kanton:

Q. When were those two sales made exactly?
A. 1936 and 1937.
Q. Before the Engineers registered?
A. That is correct.
Q. When was the last sale made?
A. 1944.
Q. What date?
A. March 21, 1944.
Mr. Kanton: That is all I have.

By Mr. Lester:

Q. Mr. Benjamin, as I recall, the sale of that third block of El Paso Natural Gas stock was subject to a good deal of study and investigation between the executives of Engineers including yourself and members of the staff of the Commission?

A. That is correct.

Q. And those plans and discussions were over a period of months, is that correct?

A. That is correct.

Q. And initially you filed a plan under Section 11(e) which embodied an exchange offer of the El Paso stock with preferred stockholders of Engineers?

A. That is right.

Q. Later on, due to a fluctuation in the market price,—the upward or downward—that is the ratio was changed—thus making the exchange offer unfeasible, and thereafter you sold the stock on the open market?

A. That is right. We asked for bids for that block of stock from people who purchased it for investment.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Do you recall what price you got on that last block?

A. Yes, I have a price. I just——

Mr. Tucker: I think you have testified as to the price.

The Witness: I have it right here.

By Mr. Lester:

Q. If you will just give me the market quotation. That is what I wanted.

A. We received a price of 29.661 per share for that stock.

Mr. Tucker: That is the 51,000 odd shares?

The Witness: That is right.

(Discusion off the record.)

By Mr. Lester:

Q. Mr. Benjamin, what was the price at which the stock was sold?

Mr. Tucker: He just gave it.

Mr. Lester: I didn't hear it. What was it?

Mr. Condon: 29.661.

By Mr. Lester:

Q. As a matter of fact the management of Engineers considered that a pretty good price at that time, didn't they?

A. It was a pretty good price considering the market at that time, yes.

Q. The sale of the El Paso stock was ordered in the Commission's order of September 16, 1942, was it not?

A. That is right.

Q. And before you sold the El Paso stock you had been granted an extension of time within which to comply?

A. We were granted one year's extension on the September 16, 1942 order.

Q. And subsequently you were granted a six months' extension and then another six months?

A. I guess that is right. There were two six month extensions.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Would you say that Engineers was under any real pressure to sell the El Paso Natural Gas stock when it was sold?

A. I think it was a matter of judgment, Mr. Lester, as to what the best time to sell would be, looking toward the possibility that the constitutionality of the Act might be upheld, and since we had been advised by counsel that if the Act were held to be constitutional we would not be allowed to retain this stock, it was deemed best to sell it at that particular time.

Q. As a matter of fact, the case was on appeal to the Circuit Court of Appeals, wasn't it at that time?

A. You may be right. I am not just sure of the timing.

Q. The record will show that of course. And was there any threat on the part of the staff that we would go to court and make you sell this if you didn't do it right then?

A. I haven't heard any threats from the staff.

Q. As a matter of fact, wasn't the management of Engineers a little bit afraid that the market might fall off so you wouldn't get 29½?

A. I don't recall any feeling of that sort.

Q. You did feel at the time that it was a good price?

A. Well, I remember Mr. Kayser testifying at the 11(e) hearing when we were considering the exchange and he was most optimistic about the future of El Paso Natural Gas Company.

Mr. Lester: I remember that, Mr. Benjamin.

The Examiner: Is there anything further?

Mr. Condon: I will wait until we cross examine Mr. Benjamin at a later date.

Mr. Tucker: I was just going to suggest that that is all for the moment of Mr. Benjamin and the staff has suggested that I finish up with the direct that I had at the moment and that was Mr. Barnes' testimony, and I will call him as a witness.

D. C. Barnes—Direct Examination

[R. p. 213] Whereupon,

D. C. BARNES,

was called as a witness on behalf of the Applicants and, having been duly sworn, was examined and testified as follows:

Direct Examination

The Examiner: Give your full name, address and occupation to the reporter.

The Witness: Donald C. Barnes, President of Engineers Public Service Company, 90 Broad Street, New York, New York.

The Examiner: All right, Mr. Tucker.

By Mr. Tucker:

Q. What is the current market price of your preferred stock of Engineers Public Service Company, Incorporated?

A. The last sale on the New York Stock Exchange of the $5 preferred stock on December 15, 1945, was at 105. For the $5.50 preferred stock 105⅝.

The $6 preferred stock didn't sell on December 15 but the bid price on that date was 106½. The asked price was 107½.

Q. What has been the maximum market price at which these stocks have sold on the New York Stock Exchange this year?

A. The maximum price reported for the $5 dividend stock was 106, $5.50 dividend stock 108, the $6 dividend stock 109.

Q. Do you think these prices have been affected by the impact of the Public Utility Holding Company Act of 1935?

A. Yes, I think these prices reflect the uncertainty in the minds of investors as to whether as a consequence of the impact of Section 11 these stocks will be retired at $100 a share or at some premium in excess of this amount up to, but not exceeding the voluntary redemption premium,

namely $5 for the $5 dividend stock and $10 for the $5.50 and the $6 dividend stock.

Q. If the Public Utility Holding Company Act should be repealed tomorrow, what effect do you think it would have on the market prices of these preferred stocks?

Mr. Condon: I object to that question on the ground that it is speculative in character and irrelevant and immaterial to the inquiry before this Commission.

The Chairman: I will sustain the objection.

Mr. Tucker: Will the Examiner save my exception?

The Examiner: Yes, sir.

Mr. Kanton: Mr. Examiner, I don't know if I can say anything at this time, now that you have made a ruling, but I think the witness is perfectly qualified to give his opinion as to what effect he thinks the repeal of the Public Utility Holding Company Act would have on the market prices of these preferred stocks.

I don't see the basis of Mr. Condon's objection.

Mr. Condon: It seems to me that if we are going to get into the speculative field here—I didn't object to the preliminary questions because he is stating—and undoubtedly correctly—what he believes to be the market prices of the preferred stocks.

I think when the witness is asked to express a view as to what would happen to the market prices if the statute were repealed I feel that we are getting away off the beam. That is my only objection.

If staff counsel wish that type of testimony I will withdraw the objection.

Mr. Kanton: It is not that I wish it. It is that in order for the Commission to make a determination of these securities, if it does so on a going concern basis, and if you will look at some of our recent releases, Mr. Condon, you will see that they do assume in our cases, beginning with United Light and Power case, what effect ex the impact of the Act would have on a security.

Mr. Condon: Yes, but I don't feel, Mr. Kanton, that the two points are akin. I feel the Commission is under a duty as it has to indicate the value of a security and to evaluate it regardless of the liquidation of Engineers Company or other companies in a comparable status and to evaluate it on a going concern basis. If that question were asked perhaps I would not object.

The Examiner: I am going to let Mr. Barnes answer the question and then entertain a motion to strike it.

By Mr. Tucker:

Q. Will you answer the question, Mr. Barnes?

A. In the current market based on the present level of earnings I would expect each of the series to sell somewhat above its voluntary redemption price. The excess, however, would be small and would represent the discount of the present dividend yielded for such time as the company might require to effect a refunding of these issues at a lower dividend rate.

The Examiner: Now, Mr. Condon, do you want to move to strike the answer?

Mr. Condon: No.

(Discussion off the record.)

The Examiner: Then, as I understand it, Mr. Condon, you are withdrawing your objection to the question?

Mr. Condon: Yes, I withdraw it.

By Mr. Tucker:

Q. Do you think such a market price would under the condition assumed in the last question represent the fair value of these three series of preferred stock?

A. If by fair value is meant a value which will be maintained as an average for an indefinite time in the future my answer is no, but if it is intended to mean what a willing buyer would pay and what a willing seller would take in today's market for such securities, my answer is yes.

D. C. Barnes—Direct Examination (Cont'd)

The future market price level of these securities if they were continued outstanding without the impact of the Public Utility Holding Company Act, could move from its present level in only one direction, since the voluntary redemption price acts as a stopper to prevent any material rise in price over the respective voluntary redemption price, whereas adverse conditions which we are bound to meet from time to time in the future as we have in the past would be reflected in declines in prices from this top level.

It is of course impossible to predict at this time whether the future has in store as severe declines as those indicated in the chart showing the company's price level of the preferred stock since if was issued—company's Exhibits Nos. 26, 27 and 28.

The factors which might affect the future price level adversely are: (1) continued inflation. The country is now facing wide-spread demands from labor for 30 per cent increase in wages. The former chairman of the War Labor Board has indicated that in his opinion, in a five-year period, wages may be expected to go up as much as 50 per cent.

If any such inflation spiral is in store for us it will affect adversely the market prices for fixed income securities, particularly in regulated industries where there is an inevitable time lag in securing increased rates to cover increased costs.

(2) Periodic depressions. I do not believe that it is possible to develop a regulated economy which will continuously balance supply and demand. When these get out of balance to an extent that causes decreased employment, it is a characteristic of human nature which I do not believe can be changed to conserve resources and limit spending which further aggravates the dislocation of supply and demand.

We have had these cycles periodically in the past and I believe there is every reason to expect a continuance of

them in the future. We have expanded our productive capacity in the last six years to provide the requirements of war and have built up a deficit in so doing of some $300,000,000,000.

During this period the supply of goods for civilian requirements has been withheld to a large extent and in the immediate future production to fill this demand may be expected to continue productive activity at a high level.

When this deferred demand has been satisfied we will be faced with the problem of readjusting supply to demand, and in my opinion it is reasonable to expect that during such readjustment we may have another of the periodic depressions.

(3) Possibilities of Government competition. There is agitation in Congress and elsewhere for substantial hydro developments by the Federal Government on rivers not only in areas adjacent to Gulf States Utilities Company, where the Southwestern Power Authority has been organized and is functioning but also in the territories served by the Virginia Electric and Power Company, where developments have already been approved by Congress on the Roanoke River, although appropriation has not as yet been made.

Further developments have been recommended by the army engineers or studied by them for hydro plants on the James River and the Rappanhannock River in Virginia. If such developments follow the pattern of those in the Northwest it will affect adversely the market prices for utility stocks in the areas affected.

(4) Adverse changes in the policy of regulatory authorities. If the principles of rate regulation advocated by some of the more radical exponents of regulation are later adopted by authorities having jurisdiction in the area served by Engineers subsidiaries, it would also have an adverse effect on securities of companies doing business in those areas.

(5) Nuclear energy. The effect on value of utility securities if nuclear energy becomes commercially usable in the utility industry is impossible to predict.

These adverse factors which I have just referred to are common to the utility industry generally and are no more imminent in the areas served by our subsidiaries than they are generally throughout the country so that present price levels of securities reflect the extent to which the investing public is presently appraising these hazards, but to say that these prices reflect reasonably foreseeable future values is obviously not correct as only the future can disclose what these later values may be.

The Examiner: We will excuse you now, Mr. Barnes.

(Witness excused.)

Mr. Tucker: Mr. Examiner, I understand that so-called Exhibit No. 38 was mailed down to be incorporated in the record under what we understood was a reservation. If it isn't a fact that that was done and there was no reserve number for it, I now offer the Opinion, which by the way the staff of the Commission asked that we put in, as Applicant's Exhibit No. 38.

Mr. Condon: Mr. Examiner, at page 146 of the transcript Mr. Tucker is right, there was a reserved No. 38 for this exhibit. It was my understanding from the colloquy that the offer was to be made at a subsequent hearing. I have no objection to the fact that it was filed down to the Commission and has already been marked provided we can note an objection to that.

The Examiner: You may note your objection if you have any, Mr. Condon.

Mr. Condon: I object to the receipt in evidence of Exhibit No. 38 as proof of any of the facts contained therein or as legal conclusions other than the expressions of Mr. Tucker's personal opinion.

I do not object to its receipt merely as a document subject to those two limitations, which was before the Board of

Directors of the Engineers Company at the time it adopted the plan filed with this Commission.

Mr. Scheetz: Mr. Examiner, I concur in that objection to the extent that I think the opinion should be received for a limited purpose. I think it is entirely appropriate to introduce it as the document which was before the Board of Directors or the management of Engineers when they considered the plan but I don't believe that it should be regarded as proof of the validity of the conclusions that are in there.

Mr. Tucker: Mr. Examiner, even though technically, this exhibit, if it had been received, would have the effect that these gentlemen just suggested, I wouldn't think it was ethical for me to take a position in view of the circumstances under which it was put on the record, which would be the basis of a claim that the facts stated in there were to be proved by that opinion or that the legal conclusions were to be established in that opinion and I am perfectly willing to say on the record that I will never undertake to have that kind of result come from the admission of this exhibit.

Mr. Scheetz: I am sure you wouldn't, Mr. Tucker. I merely wanted to have the record straight.

The Examiner: With that understanding I understand there is no objection to the exhibit being referred for these limited purposes and it will be received as Applicant's Exhibit No. 38.

(Applicant's Exhibit No. 38 is received in evidence.)

• • • • •

[R. p. 222]

RICHARD N. BENJAMIN,

was recalled as a witness on behalf of the Applicants, and having been previously sworn, was examined and testified further as follows:

Cross Examination

By Mr. Kanton:

Q. Has any consideration been given to the disposal of the Norfolk Gas property of Virginia prior to the consummation of the Plan?

A. Not to my knowledge.

Q. You realize, of course, that our order of September 16, 1942 requires Engineers to dispose of this property?

A. That is correct. I realize that.

Q. And I take it from your answer that the Board of Directors in considering the plan now before us didn't give any consideration to the disposal of this manufactured gas business?

A. That is right.

Q. Have any efforts been made to sell this manufactured gas of Virginia?

A. No, I don't believe any efforts have been made. Not to my knowledge in any event.

Q. No consideration whatsoever has been given to the disposal of this interest?

A. That is correct so far as I know. I must repeat that, because I don't know what has gone on in the mind of the President of the operating company, Mr. Holtzclaw, but so far as I know that statement is correct.

Q. Isn't it reasonable to assume that if he had any ideas like that he would communicate with Mr. Barnes or other senior officers of Engineers?

A. That is right.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Have any efforts been made to sell the steam, water or manufactured ice property of Gulf?

Mr. Tucker: So far as steam is concerned we weren't ordered to dispose of them.

By Mr. Kanton:

Q. I amend my question to include the water and manufactured ice properties of Gulf.

A. The ice properties in Gulf States have all been contracted for sale so that Gulf States, after the end of this year, will no longer have any ice business.

Q. Could you explain that more fully, Mr. Benjamin.

A. Well, we have reached agreements for the sale of these ice properties. I am not sure whether or not the transfer has actually taken place but I think that they will take place before the end of this year.

I can give you a little more information on that if you would like to have it.

Q. I would.

A. The Groveton Ice Vault and Refrigerating Equipment has already been sold for a total price of $1,500.

Q. When was that sold?

A. In the last month or two. Very recently.

Q. That hasn't been the subject of the filing of an application before this Commission has it?

A. No. Signed agreements have been entered into to sell the ice manufacturing equipment and ice storage vaults in connection with the ice business in Calvert, Huntsville, Conroe and Navasoto, to the Texas Utilities Company of Dallas for a total consideration of $65,000 and negotiations have been entered into for the sale of the ice manufacturing equipment in Orange, Texas for a total price of $20,000.

These negotiations are not concluded yet but it is expected that they will all be concluded by the end of this year.

Q. Does that comprise all the manufactured ice properties of Gulf? Are there any left?

A. No other ice properties.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Do you happen to know if the Texas Public Utility Company of Dallas is a utility company of a registered holding company under the Act?

A. I don't know what their affiliations are.

Q. As far as the water properties of Gulf are concerned no effort has been made to sell them, Mr. Benjamin?

A. That is correct.

Q. Has any consideration been given to such sale?

A. Not to my knowledge.

* * * * *

[R. p. 231] By Mr. Kanton:

Q. As of September 30, 1945, how much cash did Virginia have available for the payment of dividends on its common stock?

(Discussion off the record.)

The Witness: There are two dividend freezes applicable to Virginia Electric and Power Company. One is the freeze that was put on in the merger agreement of 1944 and the other is the freeze that was put on by the fifth supplemental indenture in March 1945.

Under the first freeze—well, I guess for the purpose of answering your question, all you are interested in is what is the maximum amount that could be paid out in dividends at that time.

By Mr. Kanton:

Q. Yes. We are now taking the date of September 30, 1945.

A. There was a balance available for common dividends at that time of $1,628,905.96.

There was declared at the November meeting of the Virginia Board of Directors a dividend of $1,175,370, which left a balance of $453,535.96.

* * * * *

Richard N. Benjamin—Cross Examination (Cont'd)

[R. p. 233] By Mr. Kanton:

Q. What percentage of earnings were paid up by Virginia in the past couple of years to Engineers? I am including in there the free earnings and not those subject to the freezes that you spoke of a while ago?

A. As I say, the first freeze started in 1944. Under that freeze we had more of a difference between what was actually paid and what could have been paid, but as I just told you about the present freeze, it is at the moment more restrictive than the merger freeze. They have paid all but $453,000 out of this balance that they could pay.

Q. I was interested in a percentage figure roughly. What percentage of the free earned surplus and the free earnings a year were paid up by Virginia to Engineers?

A. That would take a little time to figure out, Mr. Kanton. I would be glad to do that but the thing that confuses it in my mind is that this freeze started in the middle of the year. If you wanted to take this figure from October——

Q. Give me an approximate figure.

A. Here is one year's period, October 1, 1944 to September 30, 1945 in which this latest freeze was in effect. During that period there was a net income available for common dividends before the freeze of $4,590,000.

Now, the freeze was $660,000 plus $900,000. Total freeze for that period of $1,560,000.

A. In the neighborhood of 80 per cent in the last year.

Q. Do you think that has been the approximate amount of dividends being taken up by Engineers from Virginia in the past couple of years?

A. I think it is in that neighborhood but I could check it specifically if you want to get an exact figure.

Q. I don't think that is necessary. This $1,560,000 which you gave me as the freeze from October 1, 1944 to September 30, 1945.

A. That is right.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. When is that freeze or part of that freeze to come off from the earnings of Virginia?

A. That freeze is broken down in two parts. The first one is $55,000 a month. It continues for 25 full months after September 30, 1944. That is two years and one month so that would be October 31, 1946. That would be when that $55,000 freeze would come off.

Q. What would the freeze be at October 31, 1946 again, please?

A. That would run $75,000 a month for a considerable period after that. That is the freeze that runs for 116 months after September 30, 1944.

Q. I was interested in the total freeze as of October 31, 1946.

A. As of September 30, 1946 would be another year, and I think that would—just a minute. That would be an additional $1,560,000.

Q. So the freeze as of October 31, 1946 would be—the total figure I mean.

A. $3,250,000. In other words, there is another month in there. You said October 31.

Q. I don't recall exactly which one of the freeze provisions of the indenture is from the merger but I believe there is a provision—correct me if I am mistaken—that about $550,000 is to be taken off the freeze as of November 1, 1946, is that correct?

A. I don't recognize that figure. You say that $550,000 —$55,000 a month is what it is.

Q. I see. Thank you. You testified that it would not be feasible to combine parts I and II of the Plan because if there was any protracted delay pending the determination of this so-called premium question, the Company would suffer by reason of holding approximately $14,000,000 of idle cash which it could not put to work, and also by paying dividends on the preferred stock outstanding, is that correct, Mr. Benjamin?

A. Yes.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. What do you mean by protracted delay? How could that come about, in your opinion?

A. There are a good many ways protracted delay could come about. One thing I had in mind in connection with that testimony was that it might take even the Commission longer to decide that point than it would to decide some of the other features of the plan.

Q. Let's assume the Commission decides it in its own course of time, what do you have in mind thereafter when you say "protracted delay"?

A. Litigation.

Q. On whose part?

A. On the part of either class of stockholders or the company that happens to be dissatisfied with the opinion of the Commission.

Q. In other words, if the Commission were to issue an order that you would have to pay more than a hundred dollars per share plus accrued dividends, it is your opinion I think and the opinion of the Board of Directors of Engineers that they would appeal such an order, is that correct?

A. I think that the company has reserved its right to do that. I don't think that anybody has made any commitment at this time that the company would appeal such an order.

Q. Some common stockholder might appeal the order. In other words, it is a matter of question on that score?

A. I think so.

Q. And I suppose when you also say "protracted delay" you have in mind that perhaps some preferred stockholder might appeal in case the Commission decided that the preferred stockholders were only entitled to a hundred dollars per share plus accrued dividends?

A. I think that is a possibility.

Q. Is it possible to pay out now any of this $14,000,000 in cash as dividends to the Engineers' common stockholders?

A. Yes, I think it is. Engineers has an earned surplus; at June 30 the earned surplus was $7,095,000, so that I think it is possible for Engineers to pay out a common dividend.

Q. Do you think they would pay out a common dividend during this period?

A. I don't think so.

Q. Why not?

A. Because we had this plan on file which contemplates the use of the money.

Q. For this particular purpose of paying off the preferred stockholders?

A. That is right.

Q. You have said that they could use this cash for the payment of dividends. Couldn't they also use that cash to call part of the preferred stocks as provided in the charter, I believe?

A. I think the company could make a voluntary redemption of part of the preferred stock if they desired to.

Q. Can you tell me which of the following, which I will mention, you think most important for keeping Engineers in existence after say Parts I and II of the Plan are consummated—the delay in the determination of what the fair value may be to be paid to the Engineers preferred stockholders, or the $3,000,000 loan, or the possible tax benefits to Engineers in keeping it alive as a corporate entity?

A. By "keeping Engineers alive" you mean as reflected in Amendment No. 4?

Q. That is correct.

A. I think the principal reason is to provide a means for paying off the $3,000,000 bank loan. In connection with that I have in mind that there will be probably a delay in the determination of the amount to be payable to the preferred stockholders. Therefore, my own feeling is that the $3,000,000 bank loan will not delay any further the final liquidation of Engineers.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Well, if there were no need for the $3,000,000 bank note and there was no delay in the determination of the so-called premium question, from your testimony I gather there would be no reason for keeping Engineers in existence for any purpose after the sale of Gulf and El Paso?

A. I think when Engineers' liabilities are finally determined,—and so far as I know the two liabilities that I have in mind, the $3,000,000 bank loan and this possible contingent liability in connection with the preferred stock—as soon as those are cleared up Engineers would be liquidated. As a matter of fact the way I understand it, from explanation by counsel, when Engineers files this Certificate of Dissolution the Trustees' only power is to continue the corporation for the purpose of liquidating and winding up the affairs of the company.

Q. That is correct, Mr. Benjamin, except that I don't believe you answered my question. I am saying: Suppose there was no delay on the so-called premium question and it was found that no note were needed, my question is, right then and there, would there be any reason for keeping Engineers in existence for any purpose after the sale of Gulf and El Paso?

A. I also testified that it would be advantageous to certain stockholders to receive the Virginia common stock at the end of this period rather than now, and get a capital gains instead of a dividend during that period, but if these two elements were out of the way that you mentioned, I don't believe that Engineers would be continued.

Q. This element you just spoke of, about the capital gains tax, you mean to certain common stockholders of Engineers?

A. That is right.

Q. You mean certain large common stockholders of Engineers?

A. Well, it affects large stockholders. It also effects small stockholders to the extent that when they receive the common stock of Virginia they will get that stock,

according to opinion of counsel, without any tax at the time they receive it, and therefore if this stock is worth more at the end of a year or two they will not have to pay a tax at that time and it might be beneficial for them to delay paying tax until a later time.

Q. Isn't it true, Mr. Benjamin, if you assume there was no delay in determining the so-called premium question, and there is no need found for the $3,000,000 note, aside from your so-called tax benefits, Engineers would be liquidated as and of that time?

A. I think that is right. In other words, because of the procedure set forth in Amendment No. 4 I think that would be the only alternative to Trustees.

Q. That was my original question. If we can do away with two of these problems, Engineers can be liquidated forthwith on the consummation of Parts I and II, if these two problems were not included?

A. I think that is right.

Q. And the possibility of any tax benefits to the Engineers' common stockholders would not be taken into consideration, or would be taken into consideration?

A. I don't think that would be reason enough for continuing the corporation.

Q. You don't know the answer to that legally?

A. No.

Q. But assuming that there was no legal barrier for you to continue Engineers in existence, and these two problems as we have just discussed them, were taken care of, do you have any opinion at the present time, or do you know the opinion of the Board of Directors of Engineers as to whether they might not consider the advisability of continuing Engineers as a corporate entity for the benefit of certain of its common stockholders, for whatever tax advantages may be available at that time?

The Witness: Will you read that question back, please?

(The question is read.)

The Witness: No; as I have testified before I think that there is no business purpose served in continuing Engineers, and I think, if these two problems were settled that Engineers would not be continued.

Mr. Scheetz: May I ask a question, Mr. Kanton?

I am a little bit confused by your reference to the continuation of Engineers as a corporation. Are you talking about the period of the trusteeship and the deferring of the distribution of its assets, or are you actually talking about a deferment of the dissolution?

Mr. Kanton: I am talking about a deferment of the liquidation. The plan provides, as now amended, that the dissolution is to take place 60 days after the consummation of Part I of the Plan.

Mr. Scheetz: So that we are talking about the period of trusteeship.

Mr. Kanton: That is correct, sir.

* * * * * *

[R. p. 251] By Mr. Kanton:

A. You could raise the cash by selling the Virginia common stock under rights.

Q. Do you know in your opinion any objection to such a procedure?

A. Yes, I do. I think that I developed pretty fully in my direct examination that we think that $11.50 a share is enough of a burden to put on the common stockholder in connection with these rights, and we would not like to increase that amount, either by increasing the amount to buy Gulf States, or by adding some other security to it. We think that the Plan as set up is a fair way of accomplishing this result, and we also believe that the bank loan is a pretty short-term bank loan and there should not be any objection. I mean we think it is a fair way to work it out.

Q. Do you think that the Engineers' common stockholders, during this period you have in mind, are not paying

1½ per cent on a sum of money that they have or they can put up themselves, and thereby forego any interest and the expense of keeping Engineers alive during this period?

A. The expenses of keeping Engineers alive during this one year are not very heavy.

Q. Let's assume it is three years or two years.

A. Well, the same thing applies to two years. I don't believe the expenses are very heavy during that period, and we think the common stockholders will get enough collateral advantage out of it to make it worth while.

Q. Do you mean by collateral advantage, tax advantage?

A. Yes.

Q. Is that the only collateral advantage you have in mind?

A. And also not having to put up the $3,000,000. You say they have to pay 1½ per cent interest for this $3,000,000?

Q. I didn't say they have to pay 1½ per cent interest. It is provided and proposed in the Plan that they pay 1½ per cent. That is a correction, Mr. Benjamin.

A. Under the Plan Engineers would pay 1½ per cent interest for this $3,000,000 loan. If common stockholders put up this $3,000,000 they would either have to borrow the money, in which event I assume they could not borrow it on as favorable a basis as Engineers, or they would have to give up the opportunity to have that money invested in some other securities, and I would think they could invest it in securities with a higher return than one and a half per cent.

Q. Then you did consider the question of whether perhaps Virginia might be issued through the sale of warrants?

A. No.

Q. Aren't you in effect now—I am not trying to put words in your mouth—weighing the advantages of the present proposal as against the proposal I just presented to you?

A. Well, certainly I think we have weighed the advantages of having the $3,000,000 bank loan, as opposed to

Richard N. Benjamin—Cross Examination (Cont'd)

charging the common stockholders more in the way of warrants, whether for Gulf, El Paso and/or Virginia.

Q. That is the so-called burden that the common stockholder has to pay?

A. That is right.

Q. As you put it, because he has to put up $11.50 in order to get the preferred stock out of the picture?

A. That is right.

Mr. Tucker: Wouldn't it be well to break off at this point?

Mr. Kanton: Yes, I was just going to suggest it.

* * * * *

[R. p. 256] By Mr. Kanton:

Q. Did the Engineers board have in mind the continuation of Engineers as a corporate entity at the time the proposed note was drawn up, that is, back on September 17, 1945?

A. Well, under the original plan, as you know, it was proposed to dissolve and liquidate or merge Engineers at the expiration—in fact, the way it was stated was within one year after the liabilities of Engineers had been determined and provided for so that it was in the original plan the intention to keep the full corporate existence of Engineers alive during that period.

* * * * *

[R. p. 262] By Mr. Kanton:

Q. If you admit that you could get more money by selling the Gulf States common stock as such rather than by the issuance of warrants to the Engineers common stockholders, did the Engineers' management consider the selling of Gulf States common stock by public offering or by competitive bidding?

A. The purpose of offering the common stock of Gulf States to the Engineers' common stockholders under war-

rants is to give the Engineers' common stockholders an opportunity to keep their proportionate investment in the picture. If the stock were sold at competitive bidding an underwriting commission would have to be paid and the common stockholder would have no choice if there were cash left over, over and above the payment of preferred stock, to simply receive cash.

Q. For the basis of my next question, assuming the low figure of $20 per share in the recent estimate of Paine Webber, if Engineers were to offer the Gulf States common stock for the market by public offering or by competitive bidding, including underwriting and all expenses attendant to that, don't you think they would be able to get more than the $21,000,000 they will get if they issue the Gulf States warrants at $11.50 a share?

A. Obviously the company would get more cash by selling Gulf States common stock at competitive bidding than it would through offering it to the common stockholders at $11.50 per share.

Q. Wouldn't that also make it possible to forego any borrowing of $3,000,000 by a note?

A. Yes.

Q. Have you considered that possibility?

A. Yes.

Q. You testified that the reason you didn't consider such a possibility feasible was because you wanted to keep the present Engineers common stockholders who wanted to maintain their interest in Gulf States to have an opportunity of purchasing by warrant this Gulf States common stock so if they wanted to keep it they could do so by exercising those warrants?

A. That is right.

Q. And that is the only reason?

A. Yes, that and to save the underwriting commission that would be payable in the event they were sold at competitive bidding.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. You speak of competitive bidding. Have you made a comparison of the total expenses of issuing the warrants as against the expenses that would be entailed if the Gulf States common stock were sold by public offering or by competitive bidding, and checking that against what you would receive possibly through the warrants as against what you would receive if this Gulf States common stock were sold to the public?

A. We have not made a comparison of the expenses, no.

Q. So it is possible then that more money may be realized by the sale of the Gulf States common stock less the expenses that may go with the underwriting than could be realized through the issuance of the warrants to the Engineers' common stockholders?

A. Yes, I think it is posible that the company itself would receive more cash, but, as I pointed out, you are taking away from the common stockholder the opportunity to participate in this Gulf States common stock.

Q. Couldn't he, if there was a public offering or an underwriting, repurchase?

A. Yes.

Q. If we use that word?

A. Yes, and pay the underwriting discount in so doing.

Q. And also, as you put it, get the preferred stock out of the picture? and perhaps get all the other expenses needed in the present proposal?

A. I think it would raise more cash.

Q. In other words, these things have to be weighed one against the other to see which would benefit the Engineers' stockholders?

A. That is right.

Q. Isn't it possible under present market conditions for Engineers to get at least $28,000,000 to $30,000,000 for the sale of the Gulf States common stock? This is your opinion based on your personal analysis and from looking at other analyses by people competent and qualified to make such analyses?

Richard N. Benjamin—Cross Examination (Cont'd)

A. I wouldn't want to put a figure on what we could get by competitive bidding now.

Q. You could get more than $21,000,000?

A. Yes, I think so.

Q. Have any efforts been made to sell the property of Gulf States to any of the surrounding utility companies down in that area?

A. Not to my knowledge.

Q. Were any offers made by the utilities companies which surround the Gulf States properties?

A. I don't know of any.

* * * * * *

[R. p. 266] By Mr. Kanton:

Q. Have your estimates shown that the present earnings and dividend declaration policy of Virginia will continue?

A. Based on the estimate for 1946 that was referred to this afternoon, it appears likely that the dividend policy could be continued through 1946.

Q. What about the present level of earnings?

A. In speaking of that I had in mind the present level for common stock and surplus.

Q. Could you tell me at this time whether it will be higher or the same as the present levels?

A. Well, I would like to see completed the 1945 actual statement of earnings before I answer that question. There has been considerable discussion about what items are properly includable, and there are a good many questions regarding taxes that are not yet settled.

Q. Do you have any opinion of your own at this time? I mean, you stated that you believed the dividend declaration policy will continue, but you have no opinion as to the present level of earnings being continued or being higher or lower?

A. I would rather not say at this point whether it would be higher or lower.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Do you have any opinion or any reason to believe that the present level of earnings of Gulf and El Paso will be the same in 1946 as they are at present?

A. Well again, based on the estimate for 1946, I think it likely that the dividend policy of Gulf States would be maintained.

Q. What percentage is that, approximately, of earnings, Mr. Benjamin?

A. I was just going to check the freeze on that Gulf States. Based on our estimate for 1946 I think that Gulf States can maintain the same dividend policy during 1946.

Q. What percentage is that of earnings? Is it 80 per cent approximately, the same as Virginia; or is it more or less?

A. We are limited to 75 per cent by that dividend freeze. I would say it was slightly under 75 per cent during 1945.

Q. Do you think that will be the same in 1946?

A. I think it would be a slightly less percentage in 1946.

Q. Why is that?

A. Based on the estimate, in the earnings for 1945 there are some non-recurring earnings due to this amortization of emergency plant facilities, and I think that the percentage will be approximately the same in 1946.

Q. Could you do the same for El Paso, Mr. Benjamin?

A. Based on the estimate for 1946, I think that the same dividend policy in El Paso can be maintained.

Q. What percentage is that?

A. In speaking of the same dividend policy, I have referred to the one set forth in the accompanying letter to the Plan where it was stated that Gulf States is presently paying common dividends at an annual rate approximating 80 cents per new share and El Paso at an annual rate approximating $1 per new share, which translated into Engineers common stock is 20 cents a share because the El Paso new stock is to be distributed on the basis of one-fifth of a share of El Paso for each share of Engineers common stock.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Yes, I recall it, Mr. Benjamin, but I was just wondering, in line with our testimony with reference to Virginia and Gulf, if you could give me your estimate or your opinion as to how the present dividend declaration policy and level of earnings for El Paso in 1946 will compare with those of 1945.

A. In 1945 the actual dividends paid by El Paso, Texas, on the common stock were at a rate higher than the 20 cents per new share that I just referred to. There was a dividend of $6 per share paid on March 15th, 1945; 62½ cents on June 15th, 1945; 62½ cents on September 14th, 1945; and 62½ cents on December 14th, 1945. That is on the old shares of stock.

Q. What percentage of earnings for 1945 is that?

A. I will have to figure it out if you will give me a few minutes.

Q. All right, sir.

A. Applicants' Exhibit No. 50 shows the balance for common stock and surplus in El Paso Electric Company for 1945, with the last two months estimated, of $525,600. I would like to check this figure of dividends paid. According to my pencil figures here El Paso Electric Company paid out in dividends on its common stock during 1945 $1,180,250.

Q. Was that more than the earnings?

A. That is more than the estimated earnings for 1945 available for the common stock.

Q. Is that the usual practice of Engineers with El Paso?

A. It is not the usual practice of Engineers' subsidiaries. This dividend paid in March of 1945 was due in part to the fact that there was only one dividend paid in 1944, namely, 62½ cents, and in part to the fact that the transportation property had been sold the previous year.

Q. What would you say is the usual or the average dividend policy for El Paso, if we consider this to be an unusual dividend payment during the year of 1945?

A. Well, I believe that a dividend at a rate specified in this letter to the common stockholders would be a normal dividend rate for El Paso.

Q. Would that be about 80 per cent of the current earnings of the company?

A. Well, if we apply that rate to the 1945 estimate, $1 per new share of El Paso common stock would be equivalent to $381,994 and the estimated earnings available for the common stock for 1945 were $525,600, so that is approximately 75 per cent.

Q. Assuming the 75 per cent figure, do you think that that would be the estimated dividend declaration policy of El Paso during 1946?

A. I would expect, if our estimate is correct, that the dividend rate would be approximately the same as this so-called normal rate of dividends that I just referred to during 1946.

By Mr. Tucker:

Q. 20 cents on the new stock?

A. 20 cents on the new Engineers stock.

By Mr. Kanton:

Q. How do you estimate the level of earnings for 1946 for El Paso, the same or higher than in 1945?

A. Based on the estimate we made for 1946, the level of earnings would be slightly higher than in 1945.

Q. Is it possible that the dividends would be slightly higher, correspondingly? I say possible.

A. It is possible. I was just going to look at the construction requirements but I think it is safe to say it is possible that they might be higher.

Q. Would you say, since the time you have been with the company, it has been the policy of the company—and I am speaking now generally and I just want a rough estimate from you—for Engineers to take up 80 per cent in dividends from its operating companies based on the then current level of earnings for each one of its operating companies?

A. I just couldn't guess at a percentage, Mr. Kanton.

Richard N. Benjamin—Cross Examination (Cont'd)

I think it has been the policy of the Engineers' companies as a rule not to declare out all of the earnings.

Q. In a particular year?

A. That is right, except for an extraordinary situation.

Q. In other words, not 100 per cent?

A. Except in an extraordinary situation like the El Paso one that I just referred to.

* * * * *

[R. p. 274] By Mr. Kanton:

Q. Have you consulted with any preferred stockholders or common stockholders about any of the elements of this Plan?

A. I have talked with a good many stockholders and representatives of brokerage firms who have called up and asked questions about it. I have gotten quite a few phone calls at the office asking me to explain various parts of the plan, how it worked, and things of that sort.

Q. That is after the plan was filed?

A. That is right.

Q. I am speaking of before the plan was filed. Did you consult with any preferred or common stockholders to see if what you had in mind for the plan would meet with their approval?

A. No, I did not.

* * * * *

[R. p. 281] By Mr. Kanton:

Q. You testified that a recent check shows 1,069 individual common stockholders hold an aggregate of 139,315 shares of preferred stock of all classes and that you assume that this option will interest a substantial number of the stockholders?

A. That is correct, I did.

Q. Is it also true, because of the assignment feature of the warrants, many preferred stockholders may find it advantageous to acquire such warrants on the market and to exercise those warrants through the exchange option?

A. I think so.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. You testified that the original plan contemplated offering the Gulf States warrants at $10 a share, which would have necessitated a bank loan of $6,000,000.

A. That is correct.

Q. And you further testified that you were anxious, or, rather, the Board of Engineers was anxious, to keep the subscription price to your stockholders as low as possible because of the "burden" which it imposes on them in order "to maintain their interest in the properties which now constitute the Engineers system." How do you distinguish the payment of $10 a share and $11.50 a share any more of a burden on the Engineers common stockholders?

The Witness: Would you read the last part of that question, please?

(The record is read.)

The Witness: I don't know what you mean, Mr. Kanton.

By Mr. Kanton:

Q. Well, you considered the payment of $10—let me put it this way. Do you consider the payment of $10 by the common stockholder to be a burden?

A. Well, certainly any amount that they put up is a burden.

Q. If they had to put up $1, is it a burden?

A. Well, I guess it would be to some of them.

Q. In other words, any payment is a burden to a common stockholder?

A. I think so.

Q. Why is this payment being made by the common stockholders?

A. The payment is being made to provide funds to carry out this plan.

Q. Who will that benefit eventually?

A. I think it is a matter of necessity that funds be provided in order to carry out this liquidation plan. Now, the liquidation plan was filed because of the Public Utility Hold-

ing Company Act and this is one means of working out the liquidation of Engineers which is made necessary because of the Public Utility Holding Company Act.

Q. My question was: Whose benefit will——

Mr. Condon: May I ask that the answer be stricken as not responsive, and let's have the question re-read to the witness, please.

Mr. Kanton: Excuse me. Off the record.

(Discussion off the record.)

The Examiner: The motion is granted. Strike it from the record.

Mr. Kanton: Read the question.

(The question was read, as follows:)

"Q. Who will that benefit eventually?"

A. The exercise of these warrants—I am just trying to think out the answer to your question—will provide sufficient cash which, together with the bank loan, will pay the preferred stockholders $100 a share and accrued dividends. Therefore—you speak of benefit. I don't quite follow you.

Q. I distinguish it as you used it, as a burden.

A. Well, I think if the common stockholder had his choice he would not put up any money at all, but would prefer to have the Engineers with all three subsidiaries continuing in operation.

The Examiner: Off the record.

(Discussion off the record.)

The Witness: Let me try to answer the question again.

Mr. Kanton: Go right ahead.

The Witness: To the extent that the Engineers common stockholder gets the Gulf States common stock, which he does get by exercising these warrants, he gets a security. However, he has to put up cash in order to get the security.

The Examiner: To retire the preferred stock?

The Witness: To retire the preferred stock, but I do not believe that it is to be considered of benefit to the com-

mon stockholder to have to put up this money. Now, he does put it up in order to protect his interests in the whole situation.

By Mr. Kanton:

Q. What do you mean "the whole situation"?

A. In the Gulf States stock. In other words, if he wants to participate in the future growth of Gulf States Utilities Company, the only way he can do it is to put up $11.50 per share. If he doesn't want to participate in the growth of that particular company, he sells his warrant and lets somebody else put up the money.

Q. Then if he is considering that—and you are speaking for all of the common stockholders—then it is not a burden; it is a benefit to him?

A. It is something he has to do in order to protect his interests, I think.

Q. In other words, if Engineers, or the common stockholders, doesn't want to distribute the common shares of one of its utilities in order to pay off the preferred stockholders, no matter what the price is, $100, or whatever the fair value is, instead of paying cash they would have to issue the common stock of one of their utilities, or sell it, is that correct?

A. When this stockholder bought his common stock when the company was first formed, he bought it with the idea that he would not have to pay off this preferred stock until it suited him to pay off the preferred stock. Now, we have a Public Utility Holding Company Act and the Act says that you can not retain certain companies, in fact you can't retain more than one integrated system.

Q. Correct.

A. And I believe that, as I have testified, when you get down to one system there is no economic justification for keeping Engineers. Now, in order to protect his interests you ask the stockholder to put up $11.50 per share. It is

true he gets his Gulf States common stock, but the only reason he gets it is because he puts up the money to get it. Now, if that is a benefit to require him to pay off the preferred stock ahead of him, I just don't see it.

Q. Well, if he had the cash in the treasury he wouldn't have to put it up, would he?

A. If Engineers had $39,000,000 in cash in the treasury, no, he wouldn't have to put it up.

Q. And if they didn't have $39,000,000 in cash, and conditions weren't as good, you would have to distribute the common stock of one of the utility companies, or perhaps two of the utility companies' common stocks, is that correct, in order to comply with the Act?

A. I don't know what you mean by "distribute". You mean if Gulf States common stock were worth, say, $10 a share, you would have then to add El Paso Electric Company, perhaps, or Virginia to it?

Q. I didn't mean the worth of the preferred or the common, I wasn't referring to that. In order to satisfy the claim, no matter what it is, if you didn't have the cash and you couldn't raise the cash by sale, you would have to distribute the common stock equity that Engineers now has in the utility companies, is that correct?

A. Well, the only assets we have are those common stock equities and we would have to pay off the preferred stock.

Q. Therefore, in order to protect that common stock equity, not having sufficient cash, the common stockholder is called upon to put up a sufficient amount of cash in order to protect that equity?

A. That is right, to protect himself, that is right.

Q. That is right. Is that a burden on him to protect himself?

A. I think it is a burden.

The Examiner: I think that is more or less argumentative. I think the whole thing here is perfectly obvious as to what the answer is. Mr. Benjamin's idea of it is that

the common stockholder has to assume a burden to derive a benefit.

The Witness: That is right.

The Examiner: Now, whether the words used are right or not, I don't know that it make any difference. I think the record is perfectly clear, whether you want to call it a burden or a benefit. I think that is his idea of it. The common stockholder assumes the burden to derive the benefit. I think we don't want any more on that, do we?

By Mr. Kanton:

Q. Is it not possible for the common stockholders to sell their warrants at a price above $11.50 if they care to?

A. Yes. I think that there will be a market in these rights and undoubtedly some of them will sell.

Q. Isn't that the reason the price of $11.50 was set?

A. It is always advisable to have a margin between the price at which the warrant can be exercised and the expected market value of the underlying security in order that the warrants will be traded in and exercised.

Q. Now, just back on this one point, if you have the common stockholder of Engineers here with a warrant in his hand and he considers this possibility: If I put up $11.50 and I pay for this warrant and I get a share of Gulf States common stock, it is because I believe that that is a sound company and that whatever investment I have in there and put in addition will become better as the years go on. If he feels that, in his estimate, the converse is true, he won't put up the $11.50 and will sell it for whatever additional amount he can get over $11.50, is that correct?

A. I think that is the line of reasoning he would follow.

Q. But the underlying reason of the whole thing is to get $11.50 in order to pay off the preferred stock?

A. That is the reason we are issuing the warrants.

Q. Now, when you speak of this burden what stockholders do you have in mind particularly that this would work

a burden to? Do you mean the small stockholders or the large stockholders?

A. Well, I think it is a relative matter. I think even a small stockholder may find it a burden and perhaps to him, relatively speaking, it will be just as much of a burden as to a large stockholder. I don't think you can generalize too much. Certainly the people who own very large blocks of stock will have to undertake a major financing operation to raise the funds. On the other hand, a man who owns 100 shares of stock still has to put up $11.50 and that may be a burden on him.

Q. Have you spoken to any stockholders with reference to this so-called burden?

A. No, I haven't.

Q. Why do you assume, then, that it is a burden? Are you assuming how you would feel in the matter?

A. Yes. I own a few shares and even that amount will be a burden.

Q. Do you know of any of the other members of the Board of Directors who have spoken to common stockholders of Engineers about this Plan to have warrants for the distribution of the Gulf States common stock?

A. There again I think Mr. Barnes may have spoken to some of them, but I don't know of any others.

Q. Well, in other words, you don't know, or I think you have testified that the Board of Directors doesn't know, which of the stockholders would want to retain their interests in Gulf, El Paso or Virginia, that it is a matter entirely with the stockholders, that some may want to retain in all and some may want to retain in some or some may not want to retain in any, is that correct?

A. That is correct. I assume that is the case. I have no basis for knowing how they are going to react. I assume, because of the large number of stockholders, that some of them are bound to act one way and some another, but that is the only basis I have.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. But the basis of your feeling here is based on your own reaction, apparently?

A. No. I just know that the amounts involved, where we have some large stockholders, will be substantial, Mr. Kanton, and I would think that even with the small stockholders that to raise money is not easy, and in the case of every one of our stockholders I just assume that as a general proposition.

Q. Do you think it would be difficult for an Engineers common stockholder who purchased his stock at 1¼ or 2 —would he have any difficulty in raising money with the common stock now selling around $3?

A. Well, unless he sells some of his Engineers common stock to get the money I don't know why he wouldn't be in the same position as somebody else, except that the stock is worth more on the market.

Q. At the present market don't you think that if the warrants were issued at $13 a share they would still have a ready market?

A. I think that is possible.

Q. Well, isn't it true that as long as the price of the Gulf States common stock may exceed the option price within the time limit of the warrants some of them will pay something for it, especially since we can agree that the Gulf States common stock will be selling above the option price? Is that a fair statement, Mr. Benjamin?

A. Well, I don't know that I agreed that it would sell above $13 option price, but assuming for the moment that it does sell above that, I think, so long as there is a reasonable value to the warrants themselves, that the bulk of the warrants will be exercised, and the only reason I can see why anybody would not exercise their warrant or sell their warrant would be because they either didn't pay any attention to the offering or were away, or something of that sort.

Q. Well, in these situations I think it is correct to state that the warrants fluctuate more than the price of the stock involved, isn't that correct, depending on the time limits and other factors?

Richard N. Benjamin—Cross Examination (Cont'd)

A. You say the value of the warrants fluctuate more than the value of the stock?

Q. The price of the warrants fluctuates more than the stock involved?

A. Well, I don't know that that is a fact.

Q. Well, isn't it true, based on your analysis and the recent Paine Webber report, if you consider that to be reliable, that if these Gulf States common stocks have a market price ranging anywhere from, say, $16.50 to $20, it would be very easy to dispose of the warrants at around $13?

A. Well, I think if the Gulf States common stock sold $2 or $3 or $4 above the subscription price, that the warrants would have a definite market value, and I think the bulk of them probably would be exercised.

I don't take any responsibility for Paine Webber's valuation. I don't know that you want to go into that.

Q. How did you arrive at the magic figure of $11.50?

A. I don't know anything magic about it, Mr. Kanton. We started out with $10 and put up the proposition of a $6,000,000 bank loan and after discussion with the staff cut that bank loan in half and thereby raised the $10 figure to $11.50.

Q. Well, let's use the other magic figure. How did you get $10 to start with? Why not $5?

A. Because we wanted to have a bank loan that would liquidate out in a relatively short period of time.

Q. Well, considering this fact, supposing you felt you didn't want a bank loan, would you raise the price to $13 if you could get it?

A. I don't know what you mean by supposing we didn't want a bank loan.

Q. Well, do you want a bank loan?

A. We want a bank loan for $3,000,000.

Q. Why?

A. Because any lesser amount would require increasing the subscription price from $11.50 to some higher figure.

Q. Well, let's start all over again. We are chasing ourselves.

Mr. Tucker: Do we have to do that?

Mr. Kanton: Yes. I think it is quite important. I am trying to find out what is going on here, or what was going on in the mind of the Board of Directors with reference to this bank loan.

By Mr. Kanton:

Q. It seems when you arrived at the price of $10 it was because of the bank note, and because of the bank note you got the price of $10. Now, where did you start?

A: We started with a bank loan of $6,000,000, which we thought could be paid off in a relatively short period of time, and the net result was that we needed the balance, which figured out to be $10 a share.

Q. Well, supposing you didn't want a bank note, how would you start in?

Mr. Tucker: If he can make that supposition.

Mr. Kanton: Yes, I think he can.

Strike that from the record. Let me ask you this.

By Mr. Kanton:

Q. Why do you consider it necessary to have a bank note of $6,000,000 or $3,000,000?

A. The bank note is only necessary because we need that additional money if the subscription price is $11.50, and we have testified before that we did not want to impose any greater financial burden on the common stockholder than $11.50 per share. We started out with $10 and we increased it to $11.50 because we thought that to cut the bank loan in half would be helpful.

Q. How did you get the $10 again? Because of the bank note of $6,000,000?

A. That is right.

Q. You figured a bank note of $6,000,000. You dropped the bank note to $3,000,000, you get $11.50?

A. That is right.

Q. If the bank note disappears you get $13?

A. Yes.

Q. Now, I can't see the difference in how you acquire cash from your common stockholders. If you need, say, $13 a share or $14.50 a share, can't you distribute Virginia or Gulf and El Paso together, because the money so received will be used to discharge the claims of the Engineers' preferred stockholders, in any event?

A. You can raise enough money to pay off the preferred stock by selling Gulf and El Paso, certainly, at $13.

Q. If you distributed Virginia, Gulf States and El Paso for $14.50 a share, based on warrants, rather, would you consider that a burden to the Engineers' stockholders?

A. Yes.

Q. Why? Just because of the $14.50 compared with the $11.50?

A. That is right.

Q. And compared with the $10.00?

A. That is right—it is $3.00 more than $11.50—$14.50.

Q. In other words, when you get down to the basis of this, you feel it is to the advantage of the Engineers' common stockholders to keep the corporate entity alive for three years, by having a note outstanding, either for $3,900,000 or an additional amount, at the rate of 1½ percent, plus the expenses that will be entailed in keeping Engineers alive in the sense of section 42 of the Delaware corporation law? Is that correct?

Mr. Tucker: In the early part of that, you have "keeping it alive" without any reference to Section 42, and I think that is confusing to the witness.

The Witness: I think it is to the advantage of the common stockholder to have Engineers liquidate by borrowing the $3,000,000 on the bank loan, and any additional amount that may be necessary, rather than calling on the common stockholder to put up that cash at this time.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Kanton:

Q. Now, what is the advantage?

A: He doesn't have to put up any money at this time.

Q. You mean the additional money over $11.50?

A. That is right.

Q. That is the advantage, because you assume any money put up is a burden?

A. That is right.

Q. And that is the only one?

A. Yes, I think we get this collateral tax advantage that we talked about before, but that is the primary reason.

Q. The collateral tax advantage from Virginia?

A. From the fact that he doesn't get dividends from Virginia, that is right.

Q. Are there any other tax advantages? How about the sale of the Puget stock? Is that carried over? Could that be used, possibly, the loss arising from the sale of Puget?

A. I don't think that that is required, but I would much prefer you asked Mr. Ratcliffe about the tax questions, because he knows about them.

Mr. Tucker: Mr. Ratcliffe will be here tomorrow.

Mr. Kanton: Thank you, Mr. Tucker.

* * * * *

[R. p. 302] By Mr. Kanton:

Q. In setting the price at $11.50 for the Gulf States warrants, you said you considered as an important factor that "many of our stockholders prefer, during this period of high personal income taxes, to have an investment which would yield capital appreciation rather than dividend income," and that therefore because of the relatively high tax rates applicable to income, as compared with no tax for capital appreciation until their securities are sold, and then a net tax for long term holdings of only 25 percent of such capital gain—when you speak of many stockholders who

would prefer during this period of high personal income taxes, etc., to whom are you referring, and what period do you have in mind?

A. Well, that is a generalization, Mr. Kanton, based on the fact that there are many large stockholders among our common stockholders, and I just assumed that they would prefer to take this Virginia common stock at the termination of the liquidation of Engineers, and if they then decided to sell it, take a capital gain on it, rather than getting the dividends during the period, and paying a very high rate of tax on those dividends.

Q. Well, that is a very important assumption, Mr. Benjamin. Did you speak to many of the stockholders?

A. I did not speak to any of them.

Q. In other words, you make the statement "Many of our stockholders prefer, during this period, etc.,"—you are speaking as if you had consulted with them, but you have testified that you did not. You are basing it entirely on your own opinion that if you were a large stockholder you would make that a consideration?

A. That is correct.

Q. Well, don't you realize that in these tax situations involving 25 percent of taxable gains, it would vary with an individual common stockholder, whether he is a large stockholder or a small stockholder?

A. I realize that fully, Mr. Kanton,—and one other thing I pointed out was that this leaves the choice up to the stockholder himself. In other words, he may have a situation where he prefers to take the Virginia common stock, which would be non-taxable to him at the time he receives it, and keep it until such time as he has a tax loss to offset whatever gain he might have in disposing of it.

Q. That is correct, Mr. Benjamin, but you said this was one of the important factors you took into consideration when you set the price at $11.50, and I can't see that consideration. Could you please amplify your remarks in that respect, based on this quotation I gave from your previous testimony here?

Richard N. Benjamin—Cross Examination (Cont'd)

A. Well, I made that assumption, Mr. Kanton.

Q. It was your own personal assumption?

A. That is right.

Q. Would you say that your main consideration,—and when I use the word "your" I mean the Board of Directors of Engineers—in setting forth the proposals under this Plan, based upon certain income tax advantages that would fall to the Engineers' stockholders, either the preferred or common?

The Witness: Would you read that question, please?

(The question is read.)

The Witness: I frankly don't understand that question, Mr. Kanton. Could you rephrase it?

By Mr. Kanton:

Q. Let me see if this statement would help you:

It seems, from reading your testimony and the exhibits placed into evidence to supplement it, that every consideration was given to the deferring of the payment of taxes until such time as the—and I am quoting now—"tax rates are lower, or until he"—meaning the common stockholder—"has a tax loss to offset the gain?"

A. That is right.

Q. I am referring specifically to the result of taxable gains to the Engineers' common stockholder, in respect to distribution of the warrants to purchase Gulf States common, the exercise of such warrants, and the distribution of the El Paso common and the distribution of the Virginia common. As a matter of fact, you specifically stated in your testimony,—and I quote again:

> "Any increase in the value of the Virginia common stock during the period preceding the distribution of that stock will not result in a tax on the Engineers' common stockholder at the time of the distribution, whereas, if the Virginia common stock were distributed to the Engineers' stockholder im-

mediately, he would become subject to taxes on the dividend income."

Then you further stated that—and again I quote:

"These relatively large unit holdings indicate ownership by people of substantial means, many of whom, in all probability, would prefer to have capital appreciation, rather than dividend income."

Now, my question to you is this: Would you say that the Board of Directors' main consideration in setting forth the proposals in this Plan has been based upon certain income tax advantages which would fall to the Engineers' stockholders, either preferred or common?

A. Well, I would like to break that question down into two parts, if I might.

Q. Go right ahead, Mr. Benjamin.

A. Certainly one of the important considerations in this Plan was whether or not the distribution of these various securities through rights, stock dividends and final liquidation, would be non-taxable to the common stockholders.

That was one of the most important factors that had to be taken into consideration, and as the Plan was originally set up, and as it is now set up, we have been advised by our tax counsel that there is no tax to the stockholders at the time of the receipt of these securities.

As to the second part of the tax saving, namely, the non-receipt by the common stockholder during the liquidation period, of the Virginia dividends, I considered that was a collateral advantage that the stockholder got.

I think the primary consideration was not to require the common stockholder to put up any more money than was necessary, in order to provide the funds for the payment of the preferred stock.

Q. Well, with reference to the Virginia common stock, is this the reason—and I underline "the", why Engineers

did not consider the selling or the distribution of its common stock through the exercise of warrants by its common stockholders—the tax benefit, I mean?

A. No, I don't think so, Mr. Kenton. I think that the reason was the one we have been discussing this evening, that, to repeat it again, we did not want to require the common stockholder to put up any more money than was absolutely necessary.

Q. Did this tax factor have any bearing upon whether the Virginia stock should be issued at this time?

A. I don't think so.

Q. Well, don't you think a person who has a relatively large unit holding would prefer to have capital appreciation rather than dividend income?

A. Yes, I think he would.

Q. And aren't about 84.77 per cent of the Engineers common stockholders considered to be holders of large units of holdings?

A. Well, the Applicant's Exhibit 15 shows that 84.77 per cent of the record holdings represent holdings of 101 shares or more. That was your question, wasn't it?

Q. Yes, that was my question. Well, then, considering this fact, would you say that was one of the reasons that Engineers has not considered the selling or the distribution of the Virginia common stock through the exercise of warrants, because of these tax advantages? You see, I am using the quotes that you put in the record when you stated —and I quote again: "These relatively large unit holdings,"—and that is this 84.77 per cent—"indicate ownership by people of substantial means, many of whom, in all probability, would prefer to have capital appreciation rather than dividend income."

Now, assuming that—and you did assume it—did you have any basis, or did you have any reason for saying that that is a reason, or one of the reasons for not wanting to distribute the Virginia common stock as part of this Plan?

Richard N. Benjamin—Cross Examination (Cont'd)

A. I think that that is a collateral advantage that goes along with the plan, Mr. Kanton.

You asked me earlier, I think, before the recess, what would happen if all of Engineers' liabilities had been liquidated, and I said that, after they had been liquidated, I think Engineers itself would be liquidated. In other words, Engineers would not be continued for the purpose of giving this collateral advantage to the large stockholders. It is just one of the incidental advantages that crops up because of the principal purposes of keeping Engineers in a state of liquidation for a period of not exceeding three years.

* * * * *

Hearing on December 18, 1945.

[R. p. 313]

RICHARD N. BENJAMIN

Cross Examination (Resumed)

Mr. Kanton: Mr. Examiner, I would like to incorporate by reference the 1944 Form U-5-S statement of Engineers filed in Commission's dockets No. 30-105-2 which is the first duplicate copy. I haven't been able to obtain the original, so, this being an exact copy, I am offering this in place of the original.

* * * * *

[R. p. 321] By Mr. Kanton:

Q. Mr. Benjamin, do you know who Pratt Brothers are who are located at 90 Broad Street, New York, New York?

A. Pratt Brothers to the best of my knowledge is a nominee for clients of Investors Records Corporation which corporation handles the affairs of certain individuals in the Stone family.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Is that the Stone and Webster Corporation?

A. I do not know who their present clients are. I speak only as to my own knowledge from the time prior to 1938. I know at that time they were.

Q. I notice also, on page 27 of the Form U-5-S, that Mr. Whitney Stone and Whitney Stone & Edward C. Brewster, executors of the estate of Charles A. Stone, also have their addresses, care of the Investors Record Corporation.

Do you know whether these two listings here on page 27, care of the Investors Corporation, also involve holdings by these people and their associates, and that these people are connected with the Stone and Webster interests?

Mr. Tucker: Now, will you show him the record that you are talking about and let him see what it is.

Mr. Kanton: Surely. I am sorry.

The Witness: Mr. Whitney Stone is President of Stone and Webster Incorporated. Mr. Edward C. Brewster is a relative of Mr. Whitney Stone's by marriage, and I do not know Mr. Brewster's present occupation. I think he is in the armed forces.

By Mr. Kanton:

Q. But he was connected with the Stone and Webster interests?

A. At one time he was connected with Stone and Webster.

Q. Will you turn to Exhibit J-8, Mr. Benjamin, please. As I understand it, this is a letter addressed to Engineers Public Service Company by Investors Records Corporation and signed by P. M. Skillin, the Treasurer.

This letter is in answer to an inquiry addressed by Engineers Public Service Company to its twenty largest holders, asking them to list the individuals who have interests or beneficial interests in the common stocks or preferred stocks of Engineers, is that correct?

A. That is correct.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. And this letter, if we glance at it, is three pages and it shows on the second page the common stock owners, with the address in each case in care of Investors Records.

Now, will you go down that list on that page and tell me to the best of your knowledge whether any of these people listed here, or the interests listed, have been at any time connected with the Stone and Webster interests, or are at present connected with such interests.

A. Well, the first item on this list is the Estate of Charles A. Stone. Mr. Stone was one of the founders of Stone and Webster Incorporated.

Whitney Stone is the next name on the list. He is as I have just stated, President of Stone and Webster Incorporated. Anne M. Stone is the next name on the list. She is the wife of Whitney Stone.

Margaret S. Winthrop is the next name on the list and she is the sister of Whitney Stone.

Janet S. Brewster is the next name on the list and she is another sister of Whitney Stone.

Stone Farm Association is the next name on the list and I do not know the present stock ownership or interest in that Association, but the last information I had, some years ago, that was owned by members of the Stone family or trust.

The next item on the list is Whitney Stone trustees under deed of trust dated January 17, 1922 for the benefit of Charles A. Stone, Jr.

Mr. Charles A. Stone, Jr., is a brother of Whitney Stone.

The next item on the list is Whitney Stone, et al, trustees under deed of trust dated June 16, 1926.

I do not know anything more about that trust than what is stated here, that Mr. Stone is a trustee.

The last information I had on that, I think, that was a trust for the benefit of members of the Stone family.

The next is another trust for the benefit of Whitney Stone as trustee and apparently there are other trustees, for the benefit of Diana Brewster. I do not know who Diana Brewster is. Whitney Stone, et al,——

Q. Excuse me just a minute. Isn't Diana Brewster a niece of Mr. Stone?

A. She may be. I don't know. I never saw that name before other than this correspondence.

Whitney Stone, et al, trustees under deed of trust dated December 27, 1938 for the benefit of Virginia W. Brewster. I do not know who Virginia W. Brewster is.

Q. What are the total common holdings that you see appearing on that page, Mr. Benjamin?

A. 202,625 shares.

Q. What percentage of the total outstanding shares of common stock of Engineers would that amount to?

A. Slightly over 10 per cent.

Q. Will you now turn to Exhibit J-12.

A. Yes.

Q. Which is a letter addressed to Engineers Public Service Company from Accounting Service Corporation, is that correct?

A. Yes.

Q. Signed by Donna E. Shay, the agent.

Turning to page 2 of this five page letter, I notice that under the owners of common stock we have listed certain people and certain trustees estates.

Glancing over this list, Mr. Benjamin,—and these common stock holdings extend on pages 2, 3 and the top of page 4—can you tell me if any of these people listed there are connected in any way or have been connected with the Stone and Webster Interests?

A. The first name on the list is Mabel W. Harte, and I do not know who this person is.

Q. Do you think Mr. Barnes might know?

A. He might. I don't know.

Q. Go ahead.

A. The next on the list is Edwin S. Webster, Jr., Richard Harte, and Lawrence J. Webster, trustees under declaration of trust dated April 2, 1919 for the benefit of Francis W. Hiam.

The only person on that list that I know is Mr. Edwin S. Webster, Jr., who is partner, Kidder, Peabody.

Mr. Webster, Jr., is the son of Edward S. Webster, who is one of the founders of Stone and Webster.

Q. Let's look through this list generally without taking up each specific item and tell me which names you recognize as connected or having been connected with the Stone and Webster interest. We, of course, see on page 2 that Mr. Edwin S. Webster, Jr.'s name appears in six of the seven items in the trust estate as set up.

Now, could you turn to the next page.

A. There is another trust at the top of the next page in which appear the names of Edwin S. Webster and Edwin S. Webster, Jr. Those are the only two people in that list that I have any knowledge of.

The next is Chestnut Hill Farm Association, and it states here that that is a personal holding company whose stock is owned by a list of people and trusts.

The first one is Edwin S. Webster. The second one is Jane de P. And then there are four trusts of which Mr. Edwin S. Webster, Jr., is one of the trustees.

The next page is Suffolk Corporation, another personal holding company in which it lists the stock owned by Jane de P. Webster, and then there are four trusts in which the name of Edwin S. Webster, Jr. appears as trustee, and another trust under the will of Russell Robb.

Q. Do you know who Mr. Robb is?

A. It is my understanding Mr. Robb was one of the original partners of Stone and Webster.

Q. What are these total holdings of common stock listed on Exhibit J-12?

A. On page No. 3, which is attached to this letter, there is a column headed "True Owner" against which is total common shares held in the name of Edwin S. Webster, Jr., 37,100 shares.

Q. Looking at these pages again, Mr. Benjamin, we also notice, do we not, that there are certain shares held under

the Chestnut Hill Farm Association and the Suffolk Corporation, totaling approximately 72,000 shares held by certain of these individuals you have mentioned before; is that correct?—and which amount is not included in the 37,100 share figure which you just gave me.

A. I think, from reading this letter, that these shares you have referred to relate to the participation in the shares of Chestnut Hill Farm Association by these various individuals.

Q. But these various individuals if we look at the Chestnut Hill Farm Association on the Suffolk Corporation appear to be generally made up of people who have been or are associated with the Stone and Webster interests, is that correct, Mr. Benjamin?

A. The only ones I know about are Mr. Edwin S. Webster and Edwin S. Webster, Jr.

(Discussion off the record.)

By Mr. Kanton:

Q. Mr. Benjamin, also looking at Exhibits J-8 and J-12 and the preferred stock holdings thereunder specifically the $5, $5.50 and the $6 preferred, do you find on glancing through these exhibits that the people you just spoke about as being connected or having been connected with the Stone and Webster also appear as connected with certain stock interests of Engineers Public Service Company?

A. Yes. On Exhibit J-8, page 3, it appears that Stone Farm Association owns 500 shares—or did at December 31—all of this information is as of December 31, 1944—owned 500 shares of the $6 preferred that the Whitney Stone *et al.* trustees under deed of trust dated June 16, 1926 owned 690 shares or a total of 1,190 shares, that the estate of Mary L. Stone owned 4,200 shares of $5.50 preferred, and Mary L. Stone was the wife of Charles A. Stone.

Stone Farm Association owned 900 shares of the $5.50 preferred. The trust of June 16, 1926 owned 300 shares.

Richard N. Benjamin—Cross Examination (Cont'd)

And there is another trust, Whitney Stone, *et al.*, trustees under deed of trust, dated December 22, 1924 for the benefit of Marion S. Hince, 25 shares, and another trust of the same date for the benefit of Catherine S. Rentoul.

(Discussion off the record.)

The Witness: 25 shares, or a total of 5,450 shares of $5.50 stock, and it also shows that there were 3,100 shares of $5 preferred stock owned by some of these same persons and trusts that we have already referred to.

Over on Exhibit J-12 it appears from this Exhibit that Chestnut Hill Farm Association owns 5,700 shares of the $5 preferred stock, that another trust which Mr. Webster and Mr. Webster, Jr. are trustees owned fifty shares or a total of 5,750 shares.

By Mr. Kanton:

Q. Mr. Benjamin, turning now to Applicant's Exhibit No. 13, which shows the twenty largest holders of record of Engineers common stock as of October 31, 1945, we have already discussed the holdings of Pratt Brothers, care Investors Record Corporation, who as of this date owned 90,643 shares.

The next name that appears there is Kidder, Peabody and Company, Boston, Massachusetts. Isn't one of the members of this firm Mr. Edwin S. Webster, Jr.?

A. It is my understanding that he is.

Q. He is what?

A. It is my understanding that he is.

Q. Connected with——

A. That he is a partner of Kidder, Peabody.

Q. And Kidder, Peabody owns 79,532 shares.

Do you know who Labb & Company is of Boston 6, Massachusetts?

A. I believe that they are a nominee for an investment trust in Boston but I don't know the name of the trust.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Who is Frank J. Gould?

A. He is an individual who I believe at the present time is in France. I don't know much about Mr. Gould.

Q. Wasn't he formerly one of the owners of Virginia Electric and Power Company?

A. I have heard that he was. I don't know the facts in connection with that.

Q. Which company is now controlled by Engineers. And is he, or was he connected with the Stone and Webster interests?

A. Not to my knowledge.

Q. I believe it is true that Mr. Gould, when he sold his interests in what is commonly known as Vepco to the Engineers Public Service Company, received in exchange Engineers common stock, is that correct?

A. I don't know.

Q. We also find appearing on page 1 of Exhibit 3, the names of Whitney Stone & Edward C. Brewster, executives, Estate of Charles A. Stone, holding 37,935 shares and Edwin S. Webster, Jr., care of Mr. George W. Elwell, Accounting Service Corporation, holding 34,200 shares.

On the top of the second page we find that Clarence J. Shearn, trustee under declaration of trust by Stone & Webster, Incorporated, dated February 14, 1938, New York, New York, holding 23,335 shares.

Is it not true that J. M. Forbes was at one time a partner with the Stone & Webster Company?

A. I don't know whether he was or not, Mr. Kanton.

Mr. Condon: Couldn't we get a stipulation on that on the record if it is a fact.

(Discussion off the record.)

By Mr. Kanton:

Q. Will you answer it now? You have been advised.

A. It is my understanding that J. M. Forbes was the grandfather of W. Cameron Forbes, who was a partner of Stone & Webster at one time.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Is Cameron Forbes now a member of the firm of Forbes and Company?

A. I don't know.

Q. I also notice on page 2 of Exhibit 43 the name of Mrs. Jane de P. Webster, care of Mr. Elwell, care of Accounting Service Corporation, Boston, Massachusetts.

Do you know if she is connected or was connected, either through a family relationship or business relationship with the Stone & Webster interests?

A. It is my understanding that she is the wife of Mr. Edwin S. Webster, Sr.

Q. And the next name I am referring to is Margaret S. Winthrop, care of Investors Record Corporation, New York, New York, the owner of 13,563 shares.

Could you tell me if she has been connected with the Stone and Webster interest either in a business capacity or through a family relationship?

A. She is the sister of Whitney Stone.

Q. And we also have appearing on page 2 Mr. Whitney Stone, care of Investors Records Corporation, the owner of record of 15,463 shares.

Now, if we look at Exhibit 43 again, is it true, Mr. Benjamin, that Pratt Brothers, Kidder, Peabody and Company, Whitney Stone & Edward C. Brewster, et cetera, Edwin S. Webster, Clarence J. Shearn, trustee under declaration of trust by Stone & Webster, J. M. Forbes and Company, Mrs. Jane de P. Webster, Margaret S. Winthrop, Whitney Stone, and possibly Mr. Frank J. Gould, have at one time or another been connected either through business or family relationships with the Stone and Webster interests?

A. I would like to exclude from the list of names you read Mr. Gould and J. M. Forbes and Company, because I don't know what the situation is with respect to those two names other than what I have already told you.

The other names you mentioned—you had quite a few of them there—Pratt Brothers we have already covered.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Kidder, Peabody.

A. Kidder, Peabody, Mr. Edwin S. Webster, Jr. I believe is a partner of that firm, and Whitney Stone Trustee and Edwin S. Webster we have already spoken of.

Mr. Shearn as trustee under this declaration of trust is connected by reason of this trust through a business relationship with Stone and Webster.

Mrs. Webster, Margaret S. Winthrop and Whitney Stone we have already covered. Looking through this list and excluding the parties we have just mentioned, to the best of your knowledge and ability, can you tell me if there are any other names listed here-on that have been or are connected with the Stone and Webster interests?

A. I don't see any other names that might have had any connection with Stone and Webster, to the best of my knowledge.

Q. Do you know of any other holders, from looking at the stock books of the Engineers Company, to the best of your recollection, that own shares of common stock in Engineers, who may have been or who are connected either in a business capacity or through family relationship, with the Stone and Webster interests?

I mean you won't find that in the material you have before you, but do you have any other information?

A. Mr. Kanton, I haven't looked over the Engineers stock list with that purpose in mind and I don't feel I can answer.

Q. Mr. Benjamin, referring now to Exhibit No. 44-J this is just a point to clear up in my mind.

This Exhibit is entitled "50 of the Largest Holders of Common Stock Who Also Hold Preferred Stock, Eliminating Common Holders only as of October 31, 1945."

Q. Could you tell me what the last part of that statement means "Eliminating common holders only?"

A. The purpose of this exhibit which was prepared at your request was to show the 50 largest holders of common stock who also held preferred. This is not a list of the 50

largest holders of common stock. It is only a list of those holders who also own some preferred stock, according to the records of the company, and eliminating common holders only means that it eliminates those of the largest holders who do not own any preferred. Do I make myself clear?

Q. Looking at this exhibit, do you know from your information, if there would be a material change if an exhibit were prepared showing a list of the 50 largest preferred stockholders who also own common stock?

A. The 50 largest preferred stockholders who also own common stock.

Q. Correct.

Q. I have no idea what that list would show. I assume that it would be different—materially different.

Q. You think it would be materially different?

A. I don't know. I just don't know who the 50 largest holders of preferred stock are.

Q. I mean just from looking at this, does this appear to you that the preferred stock holders here appear to be holders of large amounts of preferred stock?

Mr. Tucker: You are referring now to——

Mr. Kanton: Exhibit 44.

The Witness: We have in the record a list of the 20 largest holders of each class of preferred stock, and looking at Applicant's Exhibit 40, the holdings run from 2,170 shares down to 500.

Looking at 41, which is the $5.50, they run from 10,295 shares down to 1,100, and looking at Applicant's Exhibit 42, which is the $5, they run from 5,750 down to 1,100.

Looking at the holdings on Applicant's Exhibit 44 of preferred stock, I find that some of these same holdings appear.

The only one I—N. J. Forbes and Company, for example, has 10,295 shares of $5.50 preferred and that name appears on both lists.

Q. Kidder, Peabody and Company apparently does too, Whitney Stone, and Pratt Brothers.

A. Some of the names appear to be duplicated. On the other hand there are some rather small holdings of preferred stock. One as low as ten shares. Josephthal, for example. I think the lists would show a different result.

Q. Mr. Benjamin, would you now turn to Exhibit 41 which is the 20 largest holders of record of Engineers $5.50 preferred. The third item appearing on the bottom of page 1 of this Exhibit is Mrs. Clara D. Kellog. Can you tell me who she is?

A. I believe she is the wife of Charles W. Kellog, one of the Directors of Engineers.

Q. How about the Cyrus W. Ferris, care of Stone & Webster and Blodgett, Inc? Do you know who he is? He is the last name appearing on page 2 of Exhibit 41.

A. I believe he is the Vice President of Stone and Webster and Blodgett, Incorporated.

Q. Referring to Exhibit No. 45, Mr. Benjamin, entitled "Engineers Public Service Company—Common stock balance as of June 30, 1945."

Just for the record, it is true, is it not, that this exhibit shows the holdings of Engineers common stock and certain "street" names but does not show otherwise the beneficial owners of record, is that correct?

A. Yes. If by "street" names you mean the names of brokers of whom the transfer agent has knowledge. It does not show the beneficial ownership.

Q. Does it also show the names of nominees?

A. No. We asked the transfer agent to include in this list only the names of brokers that he knew of his own knowledge to be brokers.

Q. Looking at Exhibit 45, there is no way of distinguishing whether any of these holdings may be beneficial holdings of the names listed here, is that correct, Mr. Benjamin?

A. The only way we have of getting any information on the beneficial holdings is this letter that we send out annually in connection with U-5-S.

Richard N. Benjamin—Cross Examination (Cont'd)

Some of these people that are on this list did have stock in their name at December 31, 1944, so that you get a little check perhaps on what their beneficial holdings were at that time. It doesn't mean that they are necessarily the same now.

• • • • •

[R. p. 370] By Mr. Kanton:

Q. Exhibit 13 shows the common stock prices up to November 20, 1945. Can you tell me what the price is now on the market and the high for this year so far? That is just to bring the records up to date.

(Discussion off the record.)

By Mr. Kanton:

Q. What was the high so far this year?

A. The high so far this year was 37 and last night's close was 33½.

• • • • •

[R. p. 376] By Mr. Kanton:

Q. Can you please tell me, for the record, what provision has been made in the Plan for any payment of interest with respect to any additional amount that may have to be payable over $100 per share, plus accrued dividends to the preferred stockholders?

A. I would say that there was no provision in the Plan for that at the present time except to the extent of the third paragraph of Part II of Division C of the Plan, where it is stated that Engineers agrees that in the event the Commission shall, in any findings, find that it is not fair and equitable to the persons affected, that Engineers shall pay to its preferred stockholders no amount in addition to $100 per share plus accrued dividends to the date of deposit then Part II is automatically amended to provide for the payment of such additional amount as the Commission shall

specify and if the Commission specifies the payment of interest, I would think that section would cover it.

Q. In other words, you are leaving it within the province of the Commission to determine if any interest payment is to be paid on this additional amount of over $100 a share, plus accrued dividends.

Mr. Tucker: Subject to our reservation to contest it?

Mr. Kanton: Oh, sure. That is not the point. The point is, as I have stated the question that it is entirely within the province of the Commission as you have stated, whether any interest is payable on this additional amount, if any.

Mr. Tucker: I still make the statement. You say, "Entirely within the province of the Commission."

I say it is not entirely within the province of the Commission because we are reserving the right to contest it.

By Mr. Kanton:

Q. No provision has been made for any payment of interest on any amount that may be found to be fair and equitable over $100 per share plus accrued dividends.

Mr. Tucker: I think you are getting into a discussion of legal problems with the witness on that subject. He has given you the provision of the plan and he has told you that he understands that if the Commission shall find that interest shall be payable in addition to $100 per share plus accrued dividends, the plan will be automatically provided for it, and I say that is, of course, subject to our reservation of the right to contest it.

The rest, it seems to me is a legal question.

* * * * * *

[R. p. 413] By Mr. Kanton:

Q. In your testimony regarding the price ranges of the preferred stock of Engineers, on their respective issue dates, up to November 1, 1945, you made the statement

with respect to the $5 dividend preferred stock, that the reason it sold above $100 in 1928, 1929, and 1930 was "due to the conversion privilege which then existed."

And you said the same thing with respect to the $5.50 dividend preferred stock, with respect to its excess in value in 1929 and 1930 being due to stock purchase warrants attached thereto.

Would you please explain for the record what you mean when you say that the excess in value over $100 per share was due to certain rights attached to the security?

A. Well, the $5 stock was convertible into common stock at that time, and this conversion privilege added value to the preferred stock.

In other words, as the price of the common stock went up the conversion privilege became more valuable.

Q. That wasn't the only reason then that, as you put it, it was due to the conversion privilege or the stock purchase warrants. It may have been due to other factors, isn't that correct?

A. Perhaps the condition of the market at that time.

Mr. Scheetz: While we are on that, could we have for the record the conversion rate if it was a fixed rate: If it was a sliding scale I don't know whether it is feasible.

Mr. Kanton: I think it was attached to the charts that were put in, is that correct, Mr. Benjamin?

The Witness: Well, the charts show the number of shares that were converted. The charter amendment shows the basis of the conversion.

Mr. Scheetz: If that is so, Mr. Benjamin, that is all right. Then I will find it.

Mr. Tucker: I might also add for the information of counsel that all of that information is also contained in detail in these annual reports, and all of the annual reports are in from the beginning.

Mr. Scheetz: Thank you, Mr. Tucker.

The Witness: You will notice that the $5 stock in 1929 went up to approximately $123 a share, and I believe that

the reason it went that high was because of the conversion privilege.

By Mr. Kanton:

Q. I am just trying to get clear what you testified to, but you stated "it was due to the conversion privilege."

Is that the only factor that was involved that made the $5 dividend preferred stock sell as high as 123 in 1929? Weren't there other conditions involved, or other factors?

A. I think that was the factor that made it go that high, Mr. Kanton.

Q. That high above what?

A. Above what it ordinarily would have sold for on a straight yield basis.

Q. What would it have sold for at that time?

A. I can't give you the exact figure.

Q. Weren't the preferred stocks at that time all selling above $100 per share? By that I mean preferred stock on the same dividend yield and the same comparative quality as the preferred stock of Engineers?

A. Well, the $5.50 preferred stock which has a higher dividend rate than the $5 stock was selling in 1929 at one point at a high of 109 so that I think it is a fair assumption that the reason $5 stocks sold higher was because people gave weight to the conversion privilege.

Q. With respect to the $5.50 you say it went as high as 109 in 1929 and that was due to the stock purchase warrants? If there weren't any stock purchase warrants would that have gone has high as 109? What I am really getting at, Mr. Benjamin, is your exact phraseology of your testimony with reference to these privileges that you just spoke about. You don't mean that it was due to these things? This was one of the factors that perhaps added value to the securities in question at that time, is that correct?

A. I think that is a correct statement.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. You testified that as of June 30, 1945, Virginia Gulf and El Paso had $2,773,000 of free earned surplus and Engineers had $7,095,000 of free earned surplus or a total of $9,868,000 which could have been declared out in common stock dividends.

I would appreciate it if you would tell me again why you consider that important as bearing upon the Plan that we now have before us.

Mr. Tucker: You haven't got a page reference that the witness could look at, have you, Mr. Kanton?

Mr. Kanton: Frankly, I am sorry, I don't.

(Discussion off the record)

The Witness: I think the only bearing that that statement has on the present situation is that by reason of the fact that these dividends have not been paid, the security behind the presently outstanding preferred stock has been kept up to that extent.

By Mr. Kanton:

Q. You mean the common stock? Is that what you just said?

A. Preferred stock I said.

Q. Well, doesn't it also increase the value of the common stock?

A. Yes, it does.

Q. Were you prevented from paying out this sum of money?

A. No.

Q. Why didn't you pay it out?

A. Well, the directors of Engineers have adopted a policy of not declaring dividends on the common stock because of the uncertainties due to the Holding Company Act.

Q. What do you mean by that exactly?

A. Well, the future of Engineers has been uncertain because of the requirements of the Public Utility Holding Company Act requiring divestment, and so forth, and the

orders of the Commission that have been issued and pending the final work-out of the Plan, this money has been kept in the system rather than having been paid out.

Q. Are you trying to say in effect that the money was being kept in in order to pay out the preferred stockholders?

A. That is what the money is going to be used for.

Q. Is that the reason it wasn't paid out in dividends?

A. Yes. I think it was one of the principal reasons.

Q. Can you tell me the purpose of Exhibit 30 again please?

A. Exhibit 30 shows the amount that has been left in the system over the period of years shown in the exhibit, and to the extent that it was left in, it has accomplished the same result that I just testified to on this free earned surplus that we talked about.

If it had been left in for other reasons, the amount over and above the free earned surplus has been left in because of freezes and the two figures you just mentioned have to do only with free earned surplus.

Q. The money that is left in has added not only to the value of the common but also to the preferred stock.

A. It has added to the value of both classes stock.

Q. I think you testified this morning that if this money had been paid out as dividends to the Engineers common stock the effect would be that on the final dissolution and liquidation of Engineers, if there was no cash available, some other method would have to be found as for instance the payment to the preferred stockholders of either with the common stock of one of the Utility Companies, or the sale of such stock in order to generate cash to pay off their claim, is that correct?

A. The preferred stockholders claim would certainly have to be paid in one way or another.

Q. Isn't it true that it would have to be paid in one of the methods I have just used rather than with cash if there was no cash available?

Richard N. Benjamin—Cross Examination (Cont'd)

A. If there was no cash available it would have to be paid off either through securities or through the sale of securities to raise cash.

Q. Isn't it true that a dividend policy, as you tried to explain is the purposes of Exhibit 30, of any corporate management of any company is one of the risks an investor takes into account when he purchases a security in such a company?

A. That is true.

Q. Therefore, don't you think the preferred stockholders of Engineers should be in a position to be compensated for their risk as well as the common stockholders?

A. I don't know just what you mean by that, Mr. Kanton. The preferred stockholders have received full dividends on their preferred stock.

Q. What I mean is this: You tried to point out by Exhibit 30 that by holding back the payment of dividends on the common stock you have increased the value of the preferred stock and also increased the value of the common stock. I asked you, isn't it true that a dividend policy is one of the risks an investor takes, meaning a preferred stock investor or a common stock investor and my final question was, if that is one of the risks he takes shouldn't he be in a position to be compensated for that risk because that is one of the risks he took?

A. The basic difference between a preferred stockholders risk in that regard and a common stockholders risk is that a preferred stockholder would have first call on those earnings and dividends and whenever dividends are declared they must first go to the preferred stockholder.

Q. That is right.

A. So the degree of risk is considerably less in the preferred stock.

Q. But if the dividend policy of a company is to hold back dividends it would accrue to the benefit of the preferred stockholders. If the dividend policy of a company is to hold back the payment of its dividends to its common

stockholders, as you have just testified, it would be to the benefit of the preferred stockholders, is that correct?

A. I say that the effect of keeping this money in the system has been to increase the security behind the preferred stock.

Q. I asked you before, isn't that one of the risks that a preferred stockholder takes into account when he purchases a security—the dividend policy of the company, the corporate management of the company—and then I asked you shouldn't he be compensated for that risk if it ultimately comes to his benefit?

(Discussion off the record.)

The Witness: I think that the first part of your question as to whether or not a preferred stockholder takes into account the risk in whether or not he is going to receive dividends, and the corporate management, and so forth is correct.

I think a preferred stockholder does take those things into account.

The second part of your question you asked me whether he should be compensated for the risk he takes. I always understood that he got full compensation for whatever risk he took by buying a security with a fixed dividend rate on it and apparently whatever price he paid for the stock he thought was a fair price in view of all the risks that he took.

By Mr. Kanton:

Q. Yes, but doesn't he look to the company balance sheet to see if there is the assets and the cash to pay his dividends?

A. Absolutely should.

Q. And if he sees a company that has $14,000,000 in cash that isn't being paid out in dividends he would like to become a preferred stockholder in that company as contrasted to a company that doesn't have any cash?

A. Because he is relatively sure of getting his dividends on the preferred stock and in the event the company is

liquidated he is relatively sure of getting whatever amount is payable to him in liquidation, yes.

Q. The only point I have in bringing this out: if it is finally decided that the preferred stockholders of Engineers should be compensated on a going concern basis—and I am not saying what the answer is—we don't know at this time—but if that is the answer, don't you think that one of the elements that should be considered is the present condition of engineers as it is today?

A. I think if the decision is going to be made on the supposition that Engineers is going to continue in business—and I suppose that is what you mean by a going concern basis——

Q. That is correct.

A. All those factors would have to be taken into consideration.

Q. On page 127 of the transcript, Mr. Benjamin?

A. I have it.

Q. You were asked the question in what alternative ways Engineers could comply with that order of the Commission, dated September 16, 1942, which requires the divestment of its interest in Gulf States and El Paso and you answered that: "There were four ways, the first being Engineers could sell its interest in Gulf States to the public through competitive bidding for cash and with the proceeds retire the Engineers preferred stock and distribute the El Paso common stock to its common stockholders.

"Second, Engineers could file a one stock plan whereby a new class of common stock would be issued to replace the present preferred and common stock of Engineers on such basis as might be determined to be fair and equitable.

"Third, Engineers might exchange the common stocks of Gulf States and El Paso or a portion thereof, with or without cash, for the preferred stock of Engineers, and such prices as might be found to be fair and equitable.

Richard N. Benjamin—Cross Examination (Cont'd)

"And, fourth, Engineers might divest itself of Gulf States and El Paso in accordance with a plan such as that now under consideration."

Q. I take it then that you, or rather the Board of Directors, considered these four possibilities as a Plan to be proposed before this Commission, is that correct, Mr. Benjamin?

A. I think these Plans have been discussed with the Board informally from time to time, yes.

Q. Were any other plans considered, or were these the only four that were considered?

A. There have been a good many plans that have been considered by the management, and the Board has discussed some of these plans. Whether or not they have discussed all of them, I don't know.

Q. I mean recently. Of these four plans they have considered recently they have decided on Plan No. 4, is that correct?

A. The 3 Holding Company Plan was one that has been considered for sometime in addition to the ones that are mentioned here.

Q. Would you say that of the four plans mentioned the first three should have been discarded because from the tax standpoint they would not be favorable to the Engineers common stockholders?

A. I believe that that was not the reason why these plans were discarded.

Q. Isn't it true, or would you know if it is true, that Plan No. 4 would be more advantageous from a tax standpoint than the first three plans?

A. I don't know the answer to that.

Q. Would Mr. Radcliffe know that?

A. He might.

Q. Also isn't it true that, considering these four plans that you mentioned in your testimony, that under the first three the present common stockholders of Engineers would

lose control of Gulf States and El Paso which they would not do under Plan 4 which is now under consideration?

A. Under Plan 1 where Gulf States would be sold through competitive bidding, the Engineers common stockholders would only have an opportunity to acquire an interest in that stock by going out and buying it in the open market.

Q. We can assume in that case that they have lost control. Considering the present engineers common stockholders as a group?

A. The one stock plan which is the second Plan would result certainly in a dilution of the interest of the present common stockholders in El Paso and Gulf States, also ultimately in Virginia.

Q. I think that by that you mean that a majority of the so-called new common stock that could have been issued under that Plan would go to the preferred stockholders.

A. I wouldn't say what the percentage would be, whether it is a majority or a minority, but in any event the common stockholders would get less than they get under this plan.

Q. Correct.

A. The third Plan, if Gulf States and El Paso or a portion of them were exchanged for the preferred stock obviously the common stockholders would have considerably less interest in those two companies.

Q. You testified on page 123 that when Engineers has divested itself of El Paso and Gulf States, there would no longer be any justification "economically or otherwise" for the continuation of Engineers as the parent of Virginia only.

Could you please explain for the record what you mean by "Economically or otherwise" in detail?

A. Well, I can't see any advantage to any one in continuing Engineers as a holding company over one subsidiary, namely, Virginia.

Q. That is economically?

A. I can't see any reason for continuing them——

Q. Is that what you meant by economically or otherwise?

A. Economically I meant that all it would do would be to add expenses, and so far as I could see, without any particular result being gained from those expenses.

Q. Well, if the actual or present capitalization of Engineers were continued, do you think that Virginia could support it?

A. I haven't analyzed that, Mr. Kanton, but I think even if it could it wouldn't change my feeling on the subject.

Q. That it wouldn't be economically desirable?

A. I don't see any advantage to it.

Q. If it were not for the Holding Company Act, do you think it would be economically desirable to eliminate Engineers as a corporate entity?

A. I think if Engineers were allowed to retain Gulf States, El Paso and Virginia, that there would be some advantage in maintaining Engineers.

Q. And also Puget, Savannah and the rest of the companies which you distributed?

A. That is correct.

Q. However, there is no order of the Commission directed to Engineers requiring it to cease to be a corporate entity, is that correct?

A. That is my understanding.

Q. However, as you stated, Engineers business is not economically desirable any more. However, isn't it possible under the charter of Engineers to voluntarily liquidate Engineers at this time?

A. I think it is open to any Delaware Corporation to liquidate voluntarily with the consent of its stockholders if it so desires.

Q. And it so provided in the Engineers charter?

A. I assume so. Let me look at the charter. I think that is a legal question. I think it is provided in the Delaware law to that effect that any corporation can dissolve.

Q. I think we can all agree—counsel and yourself and the other counsel here, that it is provided in the Engineers charter.

Mr. Tucker: I won't agree to it because I don't think it is so.

Mr. Kanton: Let me finish the question.

By Mr. Kanton:

Q. —that it is possible under the charter for Engineers to voluntarily liquidate its business at this time?

A. As I understand it, I think it is possible under the Delaware law. I haven't found it in the charter yet.

(Discussion off the record.)

By Mr. Kanton:

Q. What I am really getting at is this: Has Engineers considered the voluntary liquidation of itself as a corporate entity?

A. The Engineers management and Board of directors has filed this plan, when it filed this plan, for the complete liquidation of Engineers, because of the requirement to divest itself if the Act is upheld, of Gulf States and El Paso, and therefore the whole plan was looked at as a unit, because the Directors feel, I am sure, that there is no purpose served in continuing Engineers with just the one subsidiary. You asked me whether——

Q. You considered such action. The answer is——

A. Considered a voluntary action.

Q. The answer is yes or no?

A. The answer is no.

Q. If it is true that the Act has made it economically or otherwise desirable to dissolve Engineers as a corporate entity, isn't it true that Engineers still has the right and the power by vote of its common stockholders, under Delaware law, to voluntarily liquidate the company?

Mr. Tucker: I think he is asking the witness for a legal conclusion and I object to the question.

Mr. Kanton: I would be willing to accept your answer to that, Mr. Tucker.

Mr. Tucker: I am not on the witness stand. I think I have gone far enough in my legal conclusions here today without going any further but you are asking a purely legal question.

The Examiner: It is simply a question whether they can under Delaware law dissolve.

Mr. Tucker: That is what he is asking this lay witness to answer.

Mr. Kanton: Let's remember what happened at this opening session. I asked this witness what the Board of Directors considered when they were going to file this Plan and what they were going to pay the preferred stockholders and he said they considered the legal opinion of Mr. Tucker.

On the basis of that opinion they considered it was fair and equitable. We are not questioning their right now to pay $100 per share to the preferred stockholders. I said did Mr. Tucker point out to you the basis for that? He said, yes, the involuntary liquidation provisions of the charter. That is right in the record here. I am assuming the witness here as an officer of Engineers has considered that. I am also wondering, have they also considered, as this group of managers of Engineers, the right and the power that the common stockholders of Engineers have to voluntarily liquidate the company?

Mr. Tucker: That is not the question. He has already answered that. He said they didn't.

As to the voluntary liquidation—now you are asking him a purely legal question.

The Examiner: You are asking him now if under Delaware laws they can voluntarily liquidate. Isn't that a pure legal question. It calls for an interpretation of Delaware law, doesn't it? That is the way I look at it.

Mr. Kanton: Yes. As I said, before, I would be willing to forego asking the question of this witness if Mr. Tucker would undertake to answer the question on the record.

Mr. Tucker: You know the answer just as well as I do and there is no need to mess up the record by our conclusions as to Delaware law.

Mr. Kanton: Then we will assume it is yes.

(Discussion off the record.)

By Mr. Kanton:

Q. Turning to Exhibit No. 14 now, Mr. Benjamin, will you tell me why these four companies were chosen: Houston Lighting and Power Company, Indianapolis Power and Light Company, and Tampa Electric Company?

A. These are four operating public utility companies whose securities are distributed to the public, and we thought that they were fairly representative companies.

Q. Did you choose them?

A. I think Mr. Barnes chose them.

Q. And you concurred in his choice?

A. I did.

Q. Did you attempt to find out if the same business conditions exist in Gulf as exist in these four companies?

A. No, I did not.

Q. Do you know if the franchises are comparable?

A. No, I do not.

Q. Do you know if the Commission regulations are comparable?

A. Houston Lighting and Power is the only one. That is a company that is located very close to Gulf States, and so I think that may be comparable in that point of view.

Q. But there is a possibility that these companies may not be comparable in a lot of these factors that I have just mentioned, is that correct?

A. That is correct.

Q. Exhibit 15, Mr. Benjamin. Would you please explain the source of this exhibit for the record?

A. These are all of the companies, to the best of my knowledge, whose securities have been outstanding in the hands of the public, and which have been offered to the

public recently at either competitive bidding or through underwritings.

There have been some since that time, but those I don't believe have been out long enough for the purpose of making this comparison.

Q. What is the significance of that Public Utility Company Index which has an asterisk mark next to it? Where did you get that, sir?

A. That is one of the S. E. C. statistical publications. I have a copy of it here if you would like to see it.

Q. Will you give me the name please?

A. (Handing).

(Discussion off the record.)

By Mr. Kanton:

Q. Can you tell me when Engineers Management first decided to liquidate Engineers as a going concern?

A. I can't give you any exact date, Mr. Kanton. As far back as 1941, the summer of 1941, consideration was given to this so-called three holding company Plan which would, if carried have resulted in the final liquidation of Engineers as a going concern.

Q. I didn't mean that. When did Engineers management finally decide to liquidate Engineers as a going concern. You will remember that in the Plan as first filed there was a question of whether Engineers would be finally liquidated, or that it might be merged with Virginia.

I also recall, from reading past records, that at the time of the Western Public Service Company case Engineers took the position that at that time it had not decided to finally liquidate itself as a corporate entity, is that correct?

A. I think that is right, Mr. Kanton. At that time there was a substantial tax advantage in the picture.

Mr. Tucker: You mean by "in the picture" resulting from consolidated returns?

The Witness: That is right.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Kanton:

Q. Can't we say that when the Board of Directors first made up its collective mind to finally liquidate and dissolve Engineers was as of the date of the Amendment of December 14, 1945.

Mr. Tucker: You are referring to Amendment No. IV?

Mr. Kanton: That is correct, Mr. Tucker.

The Witness: I think under the Plan as originally filed the Board of Directors had determined that the business of Engineers, as such, would cease, as a result of the Plan.

The merger alternative was in the picture as a possibility. It was not until this last Amendment was adopted that the decision was made to dissolve Engineers as a part of Part I of the Plan, and to eliminate the merger possibility from the picture.

By Mr. Kanton:

Q. As I understand the Plan, as originally filed without Amendment No. 4, it had part III, which at that time said Engineers would be liquidated and dissolved or merged, so as the Plan was originally filed the Board of Directors at that time had not made up its collective mind as to whether Engineers would be continued as a going concern or not, is that correct? I am just trying to get a date.

A. You speak of Engineers continuing as a going concern. Even under the merger alternative there was no continuance of the business of Engineers. It is possible that it would have been merged with Virginia but there was no business of Engineers left. The business of Engineers as a public utility holding company would certainly disappear even under the merger alternative.

Q. That is true. I don't want to get into another legal argument as to whether a merger keeps a company alive or whether the dissolution means the death of the company. What I want to know is when did the Engineers management first decide that it wanted to say it wanted to dissolve

Engineers as a corporate entity. Wasn't that on December 14, 1945 when they decided to file Amendment No. 4?

A. That is when the final step was taken to dissolve Engineers as a part of this plan, that it right.

* * * * *

[R. p. 435] By Mr. Kanton:

Q. Mr. Benjamin, turning now to Exhibit No. 29, the average market price of preferred stocks of Engineers, I would like to ask you this question: If you were an investor in the market, and you were looking for a security with quality and earning capacity comparable with the present Engineers preferred stock, would you have an exhibit like Engineers Exhibit No. 29 prepared in order to determine whether you would buy such a security?

A. I think if I were purchasing a security I would be interested in the past history of that security, and I might be interested in this information.

Q. You would have an exhibit like that prepared then, is that correct?

A. I think I would take——

Q. The factors in this exhibit.

A. —the factors into consideration.

Q. And you do take such factors into consideration when you purchase stocks for your own benefit, is that correct?

A. Yes, I take them into—past fluctuations in market prices of securities that I bought.

Q. And the volume?

A. Well, in my own personal case, I buy so few securities that I don't go into quite as much detail as that.

Q. In determining whether you should buy a security, would you place a lot of weight on an exhibit of this kind or would you take a look at the present earnings of the company and the present market conditions?

A. I think the present condition of the company is more important than what has happened in the past.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. So you wouldn't put much weight on this type of exhibit then if you were going to purchase——

A. It is hard to say how much weight you would put on it.

Q. I am asking you. If you were purchasing a security today say of comparable earnings and quality as Engineers preferred stock in today's market how much weight would you give an exhibit of this kind if it was before you?

A. I don't think I would give as much weight to it as I would to present conditions.

Q. In other words, you would give more weight?

A. To present conditions.

Q. And isn't earnings the most important factor you would consider when purchasing a security—earnings of the company?

A. Yes, I think it is the most important.

Q. You would look at earnings coverages?

A. Yes, I would.

Q. Has any estimate been made to show the earnings per share on the preferred stock in 1945 on a corporate and a consolidated basis, of the Engineers preferred stock?

A. We have in the record the earnings statements for Gulf States and El Paso for 1945, with the last two months estimated. We do not have in the record yet the earnings statements for Virginia.

Q. Do you think you could supply us with the information when available?

A. Yes, I think so.

Q. Such estimates of the preferred shares?

A. The coverage on the preferred shares.

Q. Yes.

A. Yes, sir.

Q. Could you do that on the basis of the weighted average dividend for the three shares of preferred stock also?

A. Let me see that I understand what you mean. The coverage on the——

Q. Well, the weighted average—by the weighted average I meant—say you took the three shares together and they have, as I figured it out, 5.33.

A. That is approximately correct.

Q. I was wondering if you could do it on that overall basis too?

A. I think so.

Mr. Kanton: Could we reserve an exhibit for that?

The Examiner: Do you want to offer that, Mr. Tucker?

(Discussion off the record.)

Mr. Tucker: I am advised that there are certain complications in connection with that matter that will have to be considered before we would prepare that kind of exhibit. And I would prefer not to reserve an exhibit number at this time, but let us see what we can work out on if we can solve some of the problems we will produce what we have and tell you what it is at the time. Is that satisfactory?

(Discussion off the record.)

Mr. Tucker: I will reserve an exhibit number for the kind of statements which the record shows the counsel for the Commission desires to have put into the record as Applicant's Exhibit No. 63.

The Examiner: I am going to ask him to do that.

(Applicant's Exhibit No. 63 is RESERVED, as noted.)

Mr. Condon: Would you mind stating the specific——

The Examiner: I just had in mind asking him to state specifically what he wants. Did you finish, Mr. Tucker?

Mr. Tucker: No, I hadn't finished.

The Examiner: Go ahead and finish.

Mr. Tucker: I haven't any objection to his saying what he wants. Perhaps that would be logical before making the rest of my statement.

Mr. Kanton: Complying with the Trial Examiner's request, I have in mind an exhibit showing the earnings per share on the preferred stocks on a corporate and con-

solidated basis for 1945 pro forma, and also based on the weighted average dividends for the three series of preferred stocks, and also may I request at this time an exhibit prepared on the same basis, except only on your estimate for the year 1946.

Mr. Tucker: Those figures will be combined in one exhibit. What I am not clear about, Mr. Condon, and Mr. Scheetz, is whether you want the opportunity of seeing these before they go in, or whether you are willing to have them go in under the reserved number when they come in?

(Discussion off the record.)

Mr. Tucker: It will be understood as I get it then that these exhibits will come in as Applicant's Exhibit No. 63 and that either Mr. Condon or Mr. Scheetz shall have the right to move to strike after they come in.

Mr. Scheetz: One question: Will that be on the basis of showing excess profits taxes for 1945, and of course without them for 1946, and if so, can the amount of excess profits taxes payable at 45 be shown separately?

Mr. Kanton: I have no objection to that, counsel.

The Examiner: We will reserve Applicant's Exhibit No. 63 then for that purpose, with the understanding that after Mr. Condon and Mr. Scheetz have reviewed those statements, if they desire to move to strike they can do so. Otherwise, they will be incorporated in the record after being duly marked.

* * * * * * *

[R. p. 441] By Mr. Kanton:

Q. Would you say, Mr. Benjamin, that in evaluating the amount that is proposed to be given to the Engineers preferred stockholders the Board of Directors of Engineers gave all the weight to one factor, namely, the involuntary liquidating preference as contained in the charter.

Mr. Tucker: I object. He is asking for a disclosure of

what was in the minds of the Board of Directors when they approved this Plan, as I understand his question.

The Examiner: Read the question.

(Question read.)

The Examiner: If he has any knowledge on that I think he can answer that, Mr. Tucker. He may not know but if he does know I think he can answer it.

Mr. Tucker: I don't see how he can possibly know the answer to that question.

The Examiner: Let him say that.

Mr. Tucker: All right.

The Examiner: I will overrule the objection and if the witness has any knowledge on the subject, let him answer it.

The Witness: I don't know whether all of the weight was given to that particular point, Mr. Kanton, by the Directors.

Mr. Tucker: Have you finished?

The Witness: No.

All I can say as to the opinions of the Board of Directors is what I heard them say at various meetings, as well as I can remember what they said, and there was a great deal of discussion, and as I told you at the November 20 hearing, my recollection at that time was that the greatest weight, according to their statements, was given to Mr. Tucker's opinion.

Mr. Tucker's opinion is in the record and covers a great many aspects of this problem. As I recall the opinion one of the statements in there is that in his opinion this is an involuntary liquidation, and that in that event the preferred stockholders are entitled to $100 a share and accrued dividends.

By Mr. Kanton:

Q. Then the Board of Directors adopted Mr. Tucker's opinion to the extent of considering the present plan before

us as an involuntary liquidation of Engineers, is that correct?

A. The directors with the exception of Mr. Streator agreed with Mr. Tucker's opinion and so stated, and thereupon adopted the Plan.

Q. Do you recall, at the November 20 meeting, I asked you if any consideration were given to the value of the preferred stocks of Engineers, whether market value, fair value, or any value?

A. Well, I recall some discussion at some of these meetings, at which the market value of the preferred stock was referred to. I believe it was Mr. Streator at one of the meetings who referred to the fact that the preferred stock was selling in excess of $100 a share, so that I am quite sure that the directors were aware of the market value of Engineers preferred stock.

Q. You were present at these discussions?

A. I was.

Q. Did you have any ideas or did you have any considerations which you expressed to the directors at that time? In other words, did you partake in this discussion?

A. I did not partake in the discussion that I recall except to answer specific questions. I don't recall any of those at this time.

* * * * *

[R. p. 444]

Re-direct Examination

By Mr. Tucker:

Q. Now, Mr. Benjamin, on your cross examination, you were asked with respect to the Norfolk Gas properties. I think you said there had been no consideration given to this sale, is that true?

A. Yes, sir.

Richard N. Benjamin—Re-direct Examination (Cont'd)

Q. Isn't it true that in the Supreme Court of the United States there were issues with respect to the decision of this Commission as to the Norfolk Gas properties?

A. There is an issue pending concerning the Norfolk Gas properties before the Supreme Court.

Q. Which may possibly send consideration of that matter back to this Commission for reconsideration?

A. That is my understanding.

Q. Now you had some discussion about the risk of the preferred stockholders that I didn't think was left particularly clearly on the record. The exhibit that you were referring to in that comection had to do with dividends that the common stock could have declared out, or that could have been declared out, and the common stock get the benefit of them, which were not declared out. Isn't that true?

A. No. I think the exhibit that we were referring to was the one that showed the amounts left in the operating companies and the holding company for all reasons.

Some of them could not have been declared out because of dividend freezes, and some of them could have been declared out, over and above the freezes.

Q. So that you have no segregation in that exhibit, and perhaps not in the case, with respect to what could have been declared out and what could not be declared out to the common stock?

A. Yes, I testified on November 20 that there was $2,773,000 of free earned surplus at June 30, 1945 in Virginia, Gulf and El Paso, and Engineers parent company had $7,095,000 of free earned surplus.

Q. So on the assumption that the free surplus in the subsidiaries could have been declared out, and the assumption that the surplus of Engineers is available for dividends, the common stock could have taken out something like—just give me an estimate of the total of those figures?

A. Could have taken out the $9,868,000.

Q. To the extent that that was not declared out to the common stock, didn't it benefit the preferred stock?

A. I think it did.

Mr. Kanton: And the common stock, Mr. Benjamin?

Mr. Tucker: Well, the common stock didn't get the money. It was left in.

Mr. Kanton: I am asking the witness if you don't mind. I think you testified before that——

The Witness: I think that leaving the money in the company had some benefit on the common stock, although the common stockholders could have gotten the money the other way but I think it did benefit the relative strength—it increased the strength of the Engineers system.

By Mr. Tucker:

Q. If it had been declared out in dividends to the common stock, the common stockholders had that money to do with as they will, then it would not have benefited the preferred stock any extent?

A. That is correct.

Mr. Condon: They would have had the money they would have received less the taxes they had to pay.

Mr. Tucker: That is true of anything you receive in the world these days.

(Discussion off the record.)

By Mr. Tucker:

Q. You referred a little while ago to my opinion, Mr. Benjamin, that was submitted—I think the opinion was dated July 26 as I recall. Exhibit No. 12 is it, Mr. Benjamin?

A. No. It is Exhibit No. 38.

Q. Referring to Exhibit No. 38, did that opinion also consider broadly the fairness and equitableness of paying $100 plus accrued dividends to the preferred stock overall?

A. It did.

Q. And wasn't reference made in that opinion to the price that the preferred stock of all series was sold at——

Mr. Condon: Mr. Examiner, may I note a——

The Examiner: Let Mr. Tucker finish his question. Mr. Tucker, proceed.

By Mr. Tucker:

Q. —by the preferred stockholders, among other things.

Mr. Condon: May I note an objection on the ground that it calls for a statement of the conclusion of the witness characterizing an exhibit that is in evidence.

The Examiner: On cross examination the witness was questioned regarding this and I think Mr. Tucker has a right to go into it further on redirect examination.

The point was certainly raised on cross examination.

Mr. Condon: As I view it, all Mr. Tucker is doing is calling the witness' attention to specific abstracts from that opinion.

The Examiner: On cross examination he was asked about some of the very things that Mr. Tucker is asking him about now. If Mr. Tucker wants to go into it further I think he has a right to do it on redirect.

Mr. Condon: If the Examiner wishes to hear it—I feel that on cross examination perhaps a slightly different rule would apply than on redirect. After all he is Mr. Tucker's witness.

Mr. Tucker: It was gone into on cross and the subject didn't come up until then.

The Examiner: I feel it is proper. Do you want to make an objection?

Mr. Condon: I did object, but in view of the Examiner's ruling I shall take no exception.

The Witness: Would you repeat the question please?

(Question read.)

The Witness: Reference is made to this on page 13.

Richard N. Benjamin—Re-direct Examination (Cont'd)

By Mr. Tucker:

Q. Didn't the opinion also refer to the cost of the preferred stock in the market?

A. That is correct.

Q. Weren't there several other factual situations that were referred to therein?

A. There were several other factual situations such as the non-payment of dividends on the common stock of Engineers, and additional facts.

Q. And didn't the opinion say, Mr. Benjamin, that in my opinion the mere fact of the presence of the liquidation provisions in the charter would not be perhaps controlling but that overall it seemed to me, under all the facts, that the payment of $100 and accrued dividends would be fair and equitable?

A. You did state that in the opinion.

Q. Now, would you look, Mr. Benjamin at page 236 of the record, and you will see a statement in there about $55 a month in connection with the freeze. Will you state what the record shows and whether or not that record correctly states what you intended to say?

A. Mr. Kanton made a reference to $550,000 figure and I answered that "I don't recognize that figure." The record says "You say that $550,000—$55 a month is what it is." What I stated at that time was that $55,000 a month is what it is.

Q. Instead of $55 a month?

A. That is correct.

Q. Will you look at page 260. I think you will see a question and answer with a line down the side of the page. Would you describe that and make any statement about it that you care to make?

A. The following question and answer appears on page 260.

"Question: But that is only an assumption, the 2½ years like all other estimates. It may take a shorter period

or a longer period I suppose, depending on the condition of the market and how much cash can be generated from Virginia."

Q. That is the question, is it?

A. And the answer quoted here is, "That is true."

I did not catch the qualification "depending on the condition of the market" and I understood the question to mean depending on how much cash can be generated from Virginia.

(Discussion off the record.)

By Mr. Tucker:

Q. Mr. Benjamin, will you look at page 270 and you will see a question there with a line down the side. Will you explain what that is?

A. This was a discussion about El Paso common stock dividends, and Mr. Tucker asked: "20 cents on the new stock?" and the answer as quoted here is "20 cents on the new Engineers stock."

What I meant to say at that point was that it was 20 cents per share of Engineers stock, although the dividend would be on the El Paso Common stock.

In other words, the dividend rate that we were discussing was a dollar on the new El Paso common stock which is the equivalent stated in terms of number of shares of Engineers stock, 20 cents.

Q. Yesterday Mr. Kanton asked you if you could get for him, as I understood it, some information with respect to percentage of dividends usually declared out by the companies for some period in the past.

Will you explain what you understood him to ask for and what you have there? Percentage of earnings available for dividends?

A. Since Mr. Kanton made that request I have had prepared a statement that shows the balance for common stock of the three companies, excluding reduction in taxes due

to amortization of emergency facilities, and the freeze on those three companies.

Based on that statement, I find that for the years '42 through '45 on El Paso, the common dividends paid represented 96 per cent of the balance for those years. As I explained before, there was an extraordinary dividend in El Paso in 1945.

Gulf States, the comparable percentage would be 75 per cent, and in Virginia the comparable percentage would be 67 per cent.

Mr. Kanton: One question: Without that so-called extraordinary dividend payment on El Paso what would the average be? Have you computed that?

The Witness: I haven't computed that. That dividend was $900,000 which represents almost half of the $2,025,000 paid during that period.

Mr. Kanton: When was it paid?

The Witness: That dividend was paid in the early part of 1945.

Mr. Kanton also asked me yesterday to calculate how much money would be put up under the warrants by the holders of over 500 shares. That figure is $15,934,500.

Mr. Kanton: During the recess that we are now going to take for lunch, I think it would be to the advantage of all of us, including yourself, if you could give me the average dividend coming up on El Paso excluding that extraordinary dividend in 1945.

* * * * *

[R. p. 454] The Witness: Mr. Kanton asked me to calculate the percentage on El Paso, including the $900,000 special dividend.

That percentage is 53 percent after excluding that dividend.

Mr. Kanton: Over what period was that?

The Witness: A four-year period, 1942 through 1945.

* * * * *

Jason C. Leighton—Cross Examination

[R. p. 455]

JASON C. LEIGHTON,

a witness produced by Mr. Tucker, and called by the Commission, is examined and testified as follows:

Cross Examination

* * * * *

[R. p. 461] By Mr. Kanton:

Q. The estimated cash income from July 1 to December 31, 1945, inclusive, in the sum of $1,515,545, can you tell me with reference to that figure how actual operations compare with this estimate as given here?

A. I think they are practically as we estimated because that is made up of dividends to be declared out by the operating companies. There has been no change in the plans for those dividend payments.

Q. So this estimate now, you think, will be a fact?

A. Practically as is, yes.

Q. Referring now to Engineers' Exhibit "B", which is the pro forma balance sheet consolidated as of June 30, 1945, giving effect to the consummation of parts 1 and 2 of the plan, I refer you to the item listed under El Paso, and marked "Special Funds". Can you tell me how this item arose, Mr. Leighton?

A. Yes. $800,000 of that represents the proceeds from the sale of the transportation properties in 1943 that were deposited with the trustees under the mortgage. $220,000 roughly, the difference, represents the amount we put up with the trustee in 1945 to make up for the difference in the 15 per cent maintenance clause and the actual maintenance for El Paso for that year.

Q. Isn't it a fact that the cash on hand both in the special fund and in current assets is after payment of the special dividend that Mr. Benjamin testified?

A. Certainly.

Q. What is happening to the $800,000, Mr. Leighton.

A. We are taking steps now to prepare a certificate to be presented to the trustee covering the construction that is available up to December 31, which can be used to reduce this amount.

We are also, or the company is also putting in a new addition to its boiler plant, which is going to cost some $600,000, and as that money is expended out of current cash, we will then get it back from the trustees through the release of these funds in escrow.

Q. Referring now to Note "A" to this exhibit, can you tell me the present status of the studies referred to before the State Regulatory Body, that is Sub-paragraph 2 under Note "A"?

A. Yes, that applies to the gas property in Norfolk of the Virginia Electric and Power Company. The studies have been completed and filed with the State Body, and in September of this year, we charged off some $93,000 to earned surplus, to set up a reserve to offset the amount we found was 100.5 on this study.

That has not yet been approved by the State Commission, but we have no reason to believe that it will be disapproved.

Q. You have discussed the matter with them?

A. Surely.

Q. And an order or some form of announcement will be forthcoming from the Virginia Commission in the near future?

A. I presume so, in some time.

Q. It is a statement appearing under Note "D" here to the effect that there is a contingent asset of approximately $3,740,000 representing possible refunds of federal income and excess profits taxes.

Please explain the basis for this possible refund and who is to get it.

A. At the time the Virginia Electric & Power Company filed its consolidated return, consolidated with Engineers for the year 1944, it was necessary for us to estimate the

loss which would be sustained for tax purposes on the sale of the transportation properties on December 31, 1944, in Richmond and Norfolk. At that time, based on figures that were available, it was believed that we were safe in assuming there would be a loss, a tax loss of $2,405,000, and the tentative return on March 15 was made up on the basis of that loss.

Consequently, the consolidated returns showed a tax payable of some $4,000,000 for 1944. Subsequent to that time, Mr. Radcliffe spent some eight or nine months building up a story as to what could be a real tax loss on the sale of those properties, and in August, 1945, the final returns for 1944 were filed, which showed a tax loss of $12,171,000 on the sale of these properties.

Consequently, the return as filed showed no taxes payable, and resulted in not only the reduction of the $4,000,000 we had set up in 1944, but also certain carry-backs under the excess profits tax laws to prior years. In August, I believe it was, Virginia reversed through a credit to surplus and a charge to accrued taxes of some $2,800,000. The March 15 payment of $1,000,000 had been made, and we filed a claim for refund for that amount, so that is in this $3,700,000 that we talk about as being a contingent asset, and we now have in mind before the end of the year to comply with the auditor's recommendations to reverse the million dollar payment back to earned surplus. There will then be some $2,700,000 of carry-backs which will be due to Virginia primarily if and when the tax loss as claimed is allowed.

Q. Have you any intimation when it might be allowed?

A. Well, we should hope the 1944 return might be examined in the early part of 1946, but that may take some time before that question is finally settled.

Q. Could you tell me—I couldn't exactly keep track of your figures there. Could you give me the sum that is possibly returnable as a refund here?

A. Around a million dollars. That is the payment we made in March 15, 1945.

Jason C. Leighton—Cross Examination (Cont'd)

Q. Is that in addition to the $3,740,000?

A. No, that is a part of it.

Q. So that the total cash refund approximately from your testimony would be a million dollars?

A. Based on the payment we have already made.

Q. That is correct.

A. And then there would be a refund for prior years based on the tax loss as claimed.

Q. How much do you estimate that to be, Mr. Leighton?

A. As I say, it is some $2,700,000 of additional refund due to the carry-back provisions of the law.

Q. This million and two million seven makes a possible cash refund of $3,700,000?

A. In time, yes, sir.

Mr. Scheetz: Mr. Kanton, could I ask Mr. Leighton a question off the record?

The Examiner: Off the record.

(Discussion off the record.)

The Examiner: Mr. Leighton, there were certain questions asked you off the record. Do you want to make any statement in connection with your previous statement on the subject?

The Witness: Yes. If and when these tax refunds are approved and paid over to Engineers Public Service Company, the parent of the consolidated return, we would have in mind applying to the SEC for exemption to their rule as to allocation of taxes on consolidated returns to allow Virginia to get their proper proportion of this refund.

The balance would go to Engineers as Engineers Virginia Western Public Service and Missouri Service were all the companies in the consolidated return. We have sold Missouri Service, expect to sell and have a contract signed for the sale of Western Public Service Company, so that all of that portion would have come back to Engineers. Therefore, all the proceeds from this tax refund will remain in the Engineers system.

Jason C. Leighton—Cross Examination (Cont'd)

By Mr. Kanton:

Q. Isn't it a fact though that any refund which is finally determined to be payable by the Internal Revenue Department will accrue to the benefit of the Engineers common stockholders or the Virginia common stockholders if at that time El Paso and Gulf States are out of the Engineers system?

A. That is correct.

Q. Referring to the next page of notes, to Exhibit "B", specifically, Note 1——

The Examiner: Off the record.

(Discussion off the record.)

By Mr. Kanton:

Q. Could you please explain this note in connection with Applicant's Exhibit No. 9, Schedule "F"?

A. I have Schedule "F". But what page is it on?

Q. Page 7.

A. There are no notes. These are journal entries.

Q. I am sorry. I meant Journal Entry No. 1 instead of Note 1.

Can you give me that explanation just for the record, please?

A. May I have the question again, please?

Q. Please explain exactly if there is a tie-in between Schedule "F" of Exhibit 9 and Schedule "B", Page 7, of Applicant's Exhibit 47.

A. Yes.

Q. And I am referring specifically to Journal Entry No. 1.

A. Yes, that is the explanation I have just given you, that is I have used a million dollars instead of the actual $959,250 as applying to Virginia alone, but the explanation is the same. That is, the $959,000 was the portion that we paid in March 15, 1945, first payment for 1944 taxes, of which we have now filed a claim for refund, including the

$959,000, plus Engineers' portion which makes it roughly a million dollars, which we trust some time we will get back.

Q. In Journal Entry 2 on this page, you have an item of $2,570,000 as utility plant debit. Is that approximately the amount of increase in utility plant of Vepco?

A. That is the estimated amount they expect to spend during this year. I don't know whether that is just the amount or not. I haven't compared it with any later figures, but there has been very little change in their expenditures over what they estimate.

Mr. Condon: May I have the answer read, please?

(Answer read by the reporter.)

By Mr. Kanton:

Q. Referring now to Journal Entry 3 on the same page, will you please explain the conception of the special fund of $92,000 and the release of this item by the sale of Western items.

A. Yes. At the time Engineers sold its investment in the common stock of the Western Public Service Company, Maryland, to the Public Utility District of Nebraska, it was necessary for the company to put up surety bonds of some $350,000 covering the liability for so-called municipal bonds which the old Maryland Company owed, which the new company did not assume, and also, about $50,000 assumed tax liabilities; and the insurance company insisted on our putting up funds to the amount of $92,000 in escrow.

We are now in the process of getting those funds released through the fact that all the municipal bonds will have been paid off before the end of this month, and the tax liability runs out early in 1946.

Q. Is there any additional amount plus this $92,000 that will need be paid on payment of the municipal bonds of Western on consummation of this sale?

A. That has nothing to do with the $92,000. The Western Public Service Company of Delaware has paid up these municipal bonds out of their own cash.

Q. I was referring to the municipal bonds now outstanding that I thought were going to be taken up by Engineers when the sale of the Laramie properties is consummated.

A. No, I just said, the Western Public Service Company, the present company, has paid off all of those bonds, so that Engineers have nothing to take up as a liability.

Q. What are the proceeds that you expect to receive from the proposed sale of Western?

A. Well, we put in the pro forma entries a million, five hundred thousand, and it would be practically that amount.

Q. Does this affect some of your pro forma accounting entries, namely, with respect to the sale of Western?

A. The change is very small and we do not think it will.

Q. You do not think any changes need be made to these entries now?

A. I do not.

Q. On Page 8 of Applicant's Exhibit No. 47, Journal Entry No. 7, would you say that the distribution of the stock of El Paso represents a return of capital?

A. Yes, that is why we propose charging it to capital surplus.

Q. Do you consider the same to be the effect of the distribution of the stock of Gulf States?

A. No, I do not. In so far as the sale of the rights go. There we were actually selling rights for an amount in excess of what the Gulf States cost us, and we felt it was proper to credit that difference to earned surplus.

Q. Do you recall Mr. Benjamin's testimony this afternoon that he considered the distribution of Gulf and El Paso as a distribution in liquidation, and that was because he had received advice of counsel to that effect. For accounting purposes, you do not recognize that, but you distinguish one as a distribution of stock?

A. Yes, sir, I take it as a sale because of the warrant in the Gulf States situation.

Mr. Tucker: Before you answer the question, Mr. Benjamin did not testify that he consulted me with respect to Gulf States being in partial liquidation.

Mr. Kanton: I don't think it would serve our purpose to argue the point, but as I recall it, I asked him if he had received advice of counsel to that effect and as I remember it, he said he did.

Mr. Tucker: I remember quite to the contrary.

Mr. Kanton: Well, we will let the record speak for itself.

Mr. Tucker: Can't you re-word your question to avoid that. Otherwise, I think we have to look in the record.

Mr. Kanton: Let me re-state the question.

By Mr. Kanton:

Q. Do you consider the distribution of the stock of El Paso as a return of capital, and you do not consider the distribution of the stock of Gulf States as a return of capital? In one case you do and in the other case you do not, is that correct?

A. That's right, for accounting purposes at least.

Q. And with respect to El Paso, such an accounting entry would be proper as you propose here?

A. It would.

Q. Is it not permissible also to make this charge to earned surplus?

A. It is certainly permissible, but I do not believe proper.

Q. Why is that?

A. I think it is a dividend in liquidation which ordinarily is charged against capital surplus where you have capital available for that purpose.

Q. So, in other words, if Gulf States were considered to be a dividend in liquidation, you perhaps would make the same charge as you propose to make here with respect to El Paso.

A. If we did that, we would have a credit to surplus of around nineteen or twenty million dollars for the sale of the rights.

Jason C. Leighton—Cross Examination (Cont'd)

Mr. Tucker: Speaking about the sale of the rights, I am somewhat confused. Would you explain that?

The Witness: I mean the money that we get.

Mr. Tucker: From the sale of the stock?

The Witness: From the Gulf States warrants.

Mr. Tucker: From the exercise of the warrants.

The Witness: That is probably right.

Mr. Tucker: Very well.

By Mr. Kanton:

Q. Then I take it you would have an objection to this amount being charged to earned surplus?

A. What company?

Q. El Paso.

A. If the Commission felt that ought to be done, I would have no objection, but I still feel that is not proper. In this respect, I might say I have consulted with three accounting experts of Lybrand, Ross Bros. & Montgomery, and they all say I am right.

Q. Could you tell me again, just referring to the Gulf States transaction, why you are crediting earned surplus with the proceeds received from the warrants?

A. Because we are receiving an amount in excess of what the Gulf States stock cost us.

Q. And you consider that a sale?

A. It is for this purpose.

Q. Assuming, Mr. Leighton, that the preferred stock were to remain outstanding but that the El Paso common stock were to be distributed as a dividend in partial liquidation to the Engineers common stockholders, would you still charge capital surplus with such distribution of the El Paso common stock?

A. Offhand, I don't see how Engineers could declare a partial dividend in liquidation while preferred stock was outstanding.

Q. You mean to the common stockholders?

A. That's right.

• • • • •

[R. p. 475]

SAMUEL E. RATCLIFFE

having been duly sworn, was examined and testified as follows:

Direct Examination

* * * * * *

[R. p. 478] By Mr. Tucker:

Q. Mr. Ratcliffe, have you made a determination of the tax savings to the consolidated group of which Engineers is a common parent, resulting from the filing of consolidated returns under Federal Income Tax Laws?

A. Yes, sir, I have.

Q. Would you state please what those tax savings have been?

A. Engineers Public Service Company first became a qualified common parent of an affiliated group that would permit it to file a consolidated return in the year 1931, and consolidated returns were filed for the includible corporations in that group for the years 1931, 1932, and 1933.

The savings to the group for those three years, as the result of filing consolidated returns, was some $302,000. Consolidated returns, except for railroad corporations, were not permitted after the year 1933, until the year 1941, for excess profit tax purposes, and beginning 1942, both normal tax and excess profit tax purposes.

For the years 1941 to 1944, the savings to the group resulting from the filing of a consolidated return, was some $1,616,000, so that for the seven years that I have enumerated, the savings have been $1,918,000.

For the year 1945, present estimates indicate the consolidated savings will amount to some $312,000. That is a savings to the group in reduction in taxes through the filing of the consolidated return for 1945.

Q. Now, Mr. Ratcliffe, assume that as provided in this plan, El Paso and Gulf go out of the picture, would there

be any particular savings in connection with consolidated returns by Engineers and Virginia?

A. There would be no savings to the system through having Engineers and Virginia file a consolidated return, that is, which would warrant the continuation of Engineers over Virginia.

Q. Let us pass that for the moment and will you tell us what the savings would be. Be specific about what happens with reference to the savings.

A. I don't understand your question.

Q. I asked you to assume that El Paso—you say there would not be enough to warrant something, and I say I am not interested in what your opinion is as to whether there would be enough to warrant something. I am asking you what they would be if you had just Virginia under Engineers, what the consolidated tax picture would be under those conditions with respect to the savings that would be made because of a consolidated return.

A. If Engineers were continued as a separate company, there would be a savings to the group of approximately $102,000, predicated on the payment of approximately $3,000,000 of dividends by Vepco up to Engineers.

Mr. Kanton: Are you reading from Page 4 of Applicant's Exhibit 55, Mr. Ratcliffe?

The Witness: I think I am now. That's right.

But looking at it from the system as a whole, there would be no real tax savings to the group because naturally the expenses of Engineers would not all be returned in the form of reduced taxes in a consolidated return.

By Mr. Kanton:

Q. When you speak of savings to the group, what do you have in mind, just Engineers and Virginia, if they existed?

A. Engineers and Virginia.

The Examiner: Let Mr. Tucker finish his examination.

Mr. Kanton: I thought you were finished, Mr. Tucker. I am sorry.

Mr. Tucker: I don't know whether I am or not, but I will turn him over to you when I am through with him.

By Mr. Tucker:

Q. Do you mean by that that if the expenses of maintaining Engineers as a single system amounted to the figure you mentioned, $102,000, then there could be no possible saving because that would offset the savings from this consolidated return; is that what you mean?

A. Not exactly.

Q. If it is not, tell me what you do mean.

A. What I mean is that if your expenses were $102,000, you could not get a tax reduction equivalent to $102,000, so that you would be out of pocket, the difference between the expenses of continuing the corporation and what reduction you would get in the form of taxes through those expenses.

Mr. Tucker: You may cross-examine.

[R. p. 482]

Cross Examination

By Mr. Kanton:

Q. The expenses, I take it, you mean are $132,000 as is shown in Page 2 of Applicant's Exhibit 55. Is that the figure you had in mind when you were comparing the tax savings with the cost of keeping Engineers in existence, Mr. Ratcliffe?

A. I do not have those statements before me.

That is correct, those expenses, together with the estimated dividends.

Q. However, if Engineers is kept alive, under this plan to the extent that it is legally dissolved and it is to be liquidated over a period of three years, during this period of time, can Engineers file a consolidated return with Virginia? Do you know the answer to that?

A. Under the tax law in that case, Engineers would be considered as an association and an association for tax

purposes is considered to be a corporation. Therefore, there would be no difference taxwise, whether Engineers continued as a corporation or continued as it is proposed under the plan.

Q. So if——

A. That is, so long as they do not distribute any of their Virginia stock.

Q. That is correct.

Now, assume the figures are correct on Pages 2 and 4 of Applicant's Exhibit No. 55, and the tax law were to continue in effect as you have estimated here on Page 4, based on the 1946 taxes, if Engineers were to consider filing a consolidated return, during these next three years, which as you just testified they could, they still would be gaining $101,000 or $102,000, is that correct, even though they have these expenses of $132,000.

A. The difference between what the tax would be if both Engineers and Virginia file separate returns, and what the tax would be if they joined in the consolidated return, would be a reduction of $101,000 on these figures.

Q. In your opinion then, if Engineers were to continue along the lines proposed in this plan, you would recommend that they file a consolidated return on that basis, because of the probable saving of $101,000, assuming of course we have the same income tax rates in effect say for 1946, 1947, and 1948, is that correct?

A. On the basis of the present tax law, yes.

Mr. Scheetz: May this be off the record?

The Examiner: Off the record.

(Discussion off the record.)

By Mr. Kanton:

Q. Isn't it true with respect to Page 4 of Applicant's Exhibit No. 55, that the $101,000 saving obtained is based on the income tax rates for 1946?

A. They are based on the present income tax rates. I don't know what they will be for 1946.

Q. You mean including the excess profits tax?

A. There are no excess profits. It is the Revenue Act of 1945, which these figures are used for that basis. Of course, Congress could pass a new Revenue Act next year and change the rates.

Q. But it is on that basis?

A. That's right.

Mr. Scheetz: I would not have asked the question that way. I am referring to your testimony generally, Mr. Ratcliffe, when you first indicated the saving on filing consolidated returns, you were then speaking of the year 1946 with the Revenue Act of 1945 as the basis?

The Witness: I don't know just what part of my testimony you have reference to.

Mr. Tucker: He is referring to the first question that I asked you, I think.

Now, that was the actual saving under the income tax laws as they existed at the time the consolidated returns were filed?

The Witness: That's right. That is the actual savings that have realized in past years on the tax laws in effect for the respective years.

Mr. Scheetz: That was not the thing I was referring to.

By Mr. Scheetz:

Q. I was referring, Mr. Ratcliffe, to your testimony as to what the savings would be if the group were composed of just Virginia and Engineers, and I think you referred to this saving of $101,000, but you did not identify it with reference to any act or any year, and I was simply trying to peg it.

In the end of your testimony, you did refer to Exhibit 55, which does show that it is 1946, and I simply wanted to tie those two things together.

A. I will say that what I had reference to was to the year 1946.

The Examiner: Based on the 1945 tax law.
The Witness: That is correct.
Mr. Scheetz: Thank you.

By Mr. Kanton:

Q. Now, in that connection, Mr. Ratcliffe, carrying this one step further, will you turn to Page 6 of Applicant's Exhibit 15-A, Sub-paragraph 4 thereon:

"Engineers has a net capital loss carry-over from 1944 in excess of $31,000,000."

Would you please explain that for the record.

A. That carry-over stems from the capital loss which was suffered in the year 1944, when Engineers Public Service Company sold its investment in stock of Puget Sound Power & Light Company. The capital loss was some $33,000,000, and the difference between that $33,000,000 and the $31,000,000 represents the portion of the capital loss which was used to set off against capital gain, originating principally from the sale of the El Paso natural gas stock, and under the tax law, that carry-over, we have five years in which we can avail ourselves of its use.

Q. How about the sale of the Savannah properties or assets?

A. That sale took place of course this year, and this loss will be available to apply against any gain that may result.

In other words, that loss can be carried forward for five years to set off against capital gains.

Q. Now, my question is do you think in your opinion that you will ever have occasion to use this net capital loss for the next three years assuming that Engineers is in existence during this period.

A. As I say, it can only be used against capital gains, and unless Engineers was to sell Virginia stock, why, I can not conceive how they would have a capital gain.

Q. Other than through the sale of Virginia, you mean after the distribution of El Paso and Gulf, they only have Virginia, and if they distributed Virginia as the final liqui-

dating dividend to its final common stockholders, in your opinion they would not have any opportunity to use this net capital loss during the next three years.

A. On the basis of the existing law, no.

The Examiner: Let us take a short recess right now.

(Whereupon a short recess was taken after which the hearing was resumed.)

The Examiner: The hearing is in order.

By Mr. Kanton:

Q. Referring again to this net capital loss of $31,000,000, could you tell me if that can be applied to the sale of Western if a profit is realized on Western?

A. Oh, yes.

Q. Can it also be applied to or will it be applied to the sale of the warrants and the proceeds thereof resulting in a gain to Engineers over and above the cost that Engineers had in acquiring Gulf?

Mr. Tucker: You say the sale of the warrants. Let us keep the record clear. We are not going to sell the warrants. The exercise of the warrants, but not the sale of the warrants, please.

By Mr. Kanton:

Q. All right. Let us call it the exercise of the warrants. I have no objection to amending my question to that extent.

A. The exercise of the Gulf States warrants taxwise is a sale by Engineers of its holdings in Gulf States stock. Any gain that might be realized taxwise through that sale can be used against this operating loss or net capital loss carryover, can be used to offset such gain.

Q. You say it can be?

A. It can be.

Q. Is there an alternative, sir? When you use the word "can", can you do something else rather than offset it against this capital loss?

A. If you had other capital losses in 1945, those would first be used to set off against capital gain that might result from the sale of Gulf stock. Furthermore, it would be possible, if the company so elected, to proceed under Supplement R, in which case you could postpone the tax consequence of the profit resulting from the sale of Gulf States' stock.

Q. You mean postpone it as far as the Engineers common stockholders are concerned or the Engineers as a corporation?

A. As a corporation. The Engineers as a corporation.

Q. Referring now to subparagraph——

Mr. Scheetz: Mr. Kanton, before you leave that, since Mr. Ratcliffe has mentioned it, would you follow through on that, Mr. Ratcliffe.

If you do postpone it, am I correct in saying that it then goes to reduce the cost basis for tax purposes of the remaining assets of Engineers?

The Witness: That is correct; to avail yourself of that provision, you must elect to follow through the regulations prescribed by the Commission, which have the effect of reducing the tax cost basis of the remaining assets.

By Mr. Kanton:

Q. Referring now to subparagraph 5 on this page 6, could you please explain that for the record?

A. The deficit in accumulated earnings and profits computed on a tax basis of Engineers Public Service Company is created entirely because of the loss of some $33,000,000 which Engineers suffered in the sale of Puget Sound Power & Light Company stocks in the year 1944.

Q. I am not quite clear on that. Is that $2,000,000 reflected in any way in the $31,000,000, or is that two different figures?

A. It is $20,000,000.

Q. I beg your pardon. Is that $20,000,000 in any way reflected in the $31,000,000 figure?

Samuel E. Ratcliffe—Cross Examination (Cont'd)

A. The $31,000,000 is a result of the $34,000,000 figure.

Q. That's right, and——

A. And the $31,000,000 is a balance of the $34,000,000.

Q. That is correct.

Would you turn to page 13, please, of the same exhibit, 15-A.

A. Yes.

Q. About the 11th line down, beginning with the sentence:

> "The expenditure will be in accordance with an order of the Securities and Exchange Commission as defined above, and which will satisfy the requirements of Section 371(f) summarized above, and recites that such expenditure by Engineers is necessary or appropriate to the integration or simplification of the holding company system of which Engineers is a member."

While I have just given you this particular quote, and which I am going to ask you to explain, I would appreciate it if you would read the text that goes before it and explain for the record what you mean by integration or simplification there, what you had in mind.

A. That is quoting from the law.

Q. In other words, you have considered whether this is a proceeding of integration or simplification, which is Section 11(b)(1) or 11(b)(2), the same tax law would be in effect, is that correct?

A. No, the phraseology of those terms are terms as used in the Internal Revenue Code.

Q. Have you been acquainted or advised by counsel, by Mr. Lynch or Mr. Tucker whether this is to be considered an integration proceeding or simplification proceeding or both?

That is what I have in mind. I can not just tie this sentence in with what is preceding it and what follows, and if you will just give an explanation in the record of what

you are trying to get at here, I would appreciate it very much.

A. Well, what we are trying to say here is that the expenditure that would be made, would be in accordance with an order of the Securities and Exchange Commission, which would satisfy this Section 371(f) of the Internal Revenue Code, and in order to satisfy that provision of the tax law, the order of the Commissioner must recite that such expenditure is necessary as appropriate to the integration or simplification of the holding company system.

Q. In other words, if it is integration, 11(b)(1), and if it is simplification, 11(b)(2), if you are acquainted with those sections of the Public Utility Holding Company Act. Is that the idea?

A. That is true.

Q. Turning to the next page, page 14, I would appreciate it if you would explain for the record subparagraph 5, and advise me whether that has been pointed out to the preferred stockholders of Engineers.

A. The preferred stockholders have been advised that in the opinion of counsel, the exchange would be non-taxable. A number of preferred stockholders have inquired as to the treatment, and they have all been told, and it is my understanding that when the Plan is consummated, the stockholders would be fully advised of the tax consequence and how they should treat it.

Q. Will they be advised, in other words, before the exchange is to take place? Is that what you have in mind, notifying the Engineers preferred stockholders that they have this tax advantage before the exchange is made? Is that correct?

A. That is correct.

Mr. Tucker: Just to clarify the record, we included that in the letter that was sent out explaining the second amendment, when the preferred stock as an exchange was brought into the picture.

Mr. Kanton: Thank you, Mr. Tucker.

Samuel E. Ratcliffe—Cross Examination (Cont'd)

Mr. Tucker: And I think that is already in the record.

By Mr. Kanton:

Q. Turning to the next page, page 15, the third paragraph thereon, Mr. Ratcliffe, could you also explain for the record if there is a difference taxwise, if the distribution of the El Paso common stock were distributed in partial liquidation or sold and net proceeds were realized?

A. May I have that question again, please?

The Examiner: Read the question, Mr. Reporter.

(The question is read.)

The Witness: A difference to whom?

By Mr. Kanton:

Q. First to Engineers and second to the Engineers common stockholders.

A. If there was a sale of stock, then to the extent Engineers might realize a gain, there would be a tax, unless the transaction took place during the period when Engineers could avail itself of this net loss carry-over. In the case of the shareholder, if that cash were distributed by Engineers to the shareholder, it would not be taxable to him because I am assuming that Engineers would not have in the interim sufficient transactions resulting in gains which would eliminate the $20,000,000 of deficit in accumulated earnings and profits. The exception to that would be that to the extent Engineers had earnings and profits for the year of the distribution, then to that extent, the dividend would be taxable to the shareholder.

* * * * * *

[R. p. 498] By Mr. Condon:

Q. Mr. Ratcliffe, in connection with your $31,000,000 net loss carry-over, have you prepared, or if not, have you considered the preparation of any figures as to how Engineers could best put that net loss carry-over to use and

how it was going to avail itself during the period of these proceedings and the proceedings in the period following the decision of the Commission?

A. Well, as I say, it can only use it in the event it has a capital gain, and it has been used thus far to offset in part capital gains that have arisen from dispositions of securities.

Q. I understand that, but prospectively, have you anything in mind or has the Board of Engineers anything in its mind as to how this $31,000,000 loss may be still used in the future?

A. I can not speak for the Board of Directors, but as I say, unless Engineers were to sell some of its holdings of Virginia stock, I know of no occasion that they could have a capital gain of sufficient amount that would be material against which this loss could be used.

Q. What part of the loss would be included in connection with the sale of the Gulf States stock?

A. Whatever the tax gain is that results from the sale of the Gulf States stock.

Q. Do you know what that is, and have you any idea——

A. It is substantially the credit to surplus in these entries.

Q. Approximately?

A. That is true.

Q. Do you know how much it is approximately? Approximately $2,000,000?

A. That is correct.

Q. Now, what will the tax savings be? Will that be the amount?

A. It would be 25 per cent of $2,000,000.

Q. Using $2,000,000 as a base, the net tax savings would be approximately half a million dollars?

A. That is correct.

Q. Now, suppose they sold Virginia stock, do you know what the tax savings to Engineers would be on that transaction?

A. It will all depend on what you sold Virginia stock for.

Q. Can you take some arbitrary figure, please, presumably above cost, and give us an estimate of how much of the remaining net loss carry-over might be used in connection with the sale of Virginia stock?

A. Well, we have $31,000,000 against which we would use this $2,000,000, leaving $29,000,000 and you could have a $29,000,000 capital gain. Then you would have a savings of 25 per cent of $29,000,000 or $725,000.

Q. $725,000 or $7,000,000?

A. $7,000,000. Excuse me.

* * * * *

Re-direct Examination

[R. p. 504] By Mr. Tucker:

Q. You answered some questions by Mr. Condon with respect to offsetting, if that is the proper word, the profit that might be gained in Gulf States against this Puget loss. That is the subject matter of some of your questions, is that correct?

A. Yes.

Q. Isn't it true that if this transaction, that Gulf States transaction, comes within Supplement R, that you have no occasion to use any of that loss in that case?

A. You would have no occasion to use the loss in that case, but in availing yourself of that privilege, you would have to reduce the basis of your assets, your remaining assets.

Q. You mean by the remaining assets——

A. Of Engineers.

Q. Which would be the Virginia stock?

A. Yes, sir.

Q. I don't know where I am going, but would it make any difference if you ultimately distributed that stock to

the common stockholders of Engineers, what your tax base was?

A. No, it would not.

Mr. Tucker: That is all.

The Examiner: Mr. Scheetz has a few questions.

[R. p. 505] *Re-cross Examination*

By Mr. Scheetz:

Q. Mr. Ratcliffe, has any use been made of Supplement R heretofore so that the present cost basis of remaining assets to Engineers would be reduced?

A. No, sir.

* * * * *

Hearing on January 3, 1946.

RICHARD N. BENJAMIN

[R. p. 513] The Witness: * * * May I make a statement?

The Examiner: Yes.

The Witness: * * * [R. p. 514] At the November 20th hearing Mr. Kanton asked me to supply him with the source of Applicant's Exhibit No. 13. The source of this data was the Commercial and Financial Chronicle.

* * * * *

[R. p. 516] The Witness: Another matter that has transpired since the last hearing, to which I would like to call attention, is that Virginia Electric and Power Company has paid off $5,100,000 principal amount of notes, paying off the latest maturities first. This takes care of all the maturities in 1949 and subsequent thereto. It is expected that Virginia Electric and Power Company will negotiate shortly for the refinancing of the balance of approximately

6,500,000 of notes over a 10-year period at a lower interest ate.

One of the items in the pro forma statements was a con-mplated pension payment of $1,342,000 to certain trans-ortation employees. This proposed payment was con-mplated upon the expectation that a ruling could be btained from the Treasury Department that the entire ayment could be deducted as an expense during 1945. We ave recently received a ruling from the Treasury Depart-ent to the effect that this payment could be deducted over 10-year period. Therefore it is not planned to make this ension payment, and such payment was not made during 945, but the pensions will be paid to the employees cur-ntly when the respective employees go on the pension lls. These pension payments to which I have just re-rred relate to pensions payable to former employees of irginia Electric and Power Company who were between e ages of 60 and 65 at the time the transportation prop-ties were sold in 1944 and 1945. These pensions will be id to such former employes when such employes are re-ed by the transportation companies.

Mr. Sheetz: Mr. Benjamin, as a result of the withdrawal these employes from your regular pension plan will that sult in a compensating adjustment of your contributions your former plan?

The Witness: No, because our regular pension plan came effective July 1, 1945.

Mr. Condon:

Q. Mr. Benjamin, you state the Treasury Department led in effect that the payment of $1,342,000 proposed to made in 1945 could only be deducted by Virginia over 10 year period?

A. That is correct.

Q. It is correct to assume that the annual cost to Vir-nia, assuming the normal expectancy of life and other ctors implicit in such a situation, that that would affect

the earnings of Virginia in a downward direction to the extent of $134,200 a year?

A. Well, I can't give you the exact figure as to what the cost would be over this period during which the pensioners are still receiving pensions. We believe that the cost would be less to the Company by paying it out over a period than to make such a lump sum payment at this time, in view of the Treasury Department's ruling.

Q. Well, you get tax credit to the extent of these payments, according to the ruling, each year, over a period of ten years?

A. That is right, on the basis of the new tax rates.

Q. Do you have any estimate of basic cost after taxes to Virginia of this plan to provide for the transportation employes in the age brackets to which you have referred?

A. I don't know of any such estimate, but I will be glad to check further and see if there is one available.

By Mr. Scheetz:

Q. Is the $1,342,000 an actuarial estimate before taxes?

A. The $1,342,000 is our estimate of what it would cost to purchase these pensions from an insurance company, plus the amount necessary to reimburse the recipients for their income taxes.

* * * * *

[R. p. 520]

D. C. BARNES,

a witness previously sworn, was recalled and testified further as follows:

Cross Examination

* * * * *

[R. p. 521] By Mr. Kanton:

Q. Mr. Barnes, you recall that when Mr. Benjamin originally testified in this proceeding he advised us to the best

of his knowledge as to what the Board of Directors of Engineers considered at the September 5, 1945, meeting with respect to the adoption of the present Section 11(e) plan now pending before us. On cross-examination I asked him several questions and the witness deferred to you, and the questions that I had asked him were to the effect that in your considerations at that time and the adoption of the present plan I wanted to know what the Board of Directors considered or what you considered in arriving at $100 per share plus accrued dividends for the preferred stockholders.

A. In order to give you a complete answer to that I think perhaps I ought to sketch some of the background prior to that meeting. The first discussions as to major divestment plans were had at meetings of the Board in 1941. Subsequent to the interim opinion of the Commission giving their interpretation of Big B I believe the directors were concerned only with developing a plan which would preserve the greatest value for the stockholders and which distributed it fairly between the various classes of stockholders. They have always felt that such a plan should preserve, as far as possible, the interests of the common stockholders in the companies in which they chose to invest, leaving to them the decision as to when and if they should sell their interest. One-stock plans were considered and rejected because of the conclusion that the inevitable changes in future market values would make whatever allocation was adopted ultimately inequitable to one class or the other. At that time all of the directors felt that the provisions of the charter established the basis of allocation between the stockholders and none questioned that such divestments would constitute involuntary liquidation under the charter entitling the preferred stockholders to $100 a share and accrued dividends and no more.

The liquidating holding company plan which we presented to the staff of the Commission in August, 1941, had been discussed fully with the directors and no one ques-

tioned the fairness of its provisions paying off the preferred stock at $100 per share plus accrued dividends and no more. At that time Engineers preferred stock was selling in the market under $90 and in my opinion the market then reflected approximately their fair value, but I am sure that all of the directors would have felt that it would have been unfair to require the preferred stockholders to take anything less than $100 a share and accrued dividends. Subsequent discussions were had with the Board in 1943, prior to submitting this plan to the staff in September, 1943, and again the fairness of the proposed payment of $100 per share and accrued dividends and no more was not questioned by any director.

In February, 1944, the directors approved an application to the Securities and Exchange Commission for permission to expend up to $4,000,000 for the purchase of preferred stock at prices up to $100 per share and no more. The directors understood that this maximum price was consistent with the provision in the pending 3-holding-company plan and agreed that it would be unfair to pay more for such purchases than might shortly be required to be taken by the remaining preferred stockholders under the plan.

In June, 1944, the directors approved a plan for El Paso Electric Company of Delaware to liquidate and pay off its preferred stockholders at $100 per share and accrued dividends and no more, although the stock was currently selling at a premium and although the company had retired on tenders 11,713 shares in 1941 at an average premium of some P2 points.

On February 27, 1945, the directors, without objection, authorized the officers to proceed with the plan to retire shares of preferred stock on a pro rata basis at $100 per share plus accrued dividends by the use of approximately $8,500,000 of cash. At that same meeting the directors approved, without objection, the letter in the annual report to stockholders for 1944 which contained statement shown

on page 7 therein of the intention of the company to seek approval of the Securities and Exchange Commission to the 3-holding-company plan if it became necessary or desirable to do so, and that plan proposed the retirement of the preferred stock at $100 per share and accrued dividends. No stockholder, on the receipt of this report, made any protest.

The directors have been advised from time to time of discussions had by the officers with members of the staff of the Securities and Exchange Commission and the suggestion made by some of them that the Commission might require payment of some amount in excess of $100 a share and accrued dividends, but not in excess of the voluntary redemption price. They were informed of the dissenting opinion in our El Paso Delaware liquidation case and of the opinion of the Supreme Court in the Otis case in January, 1945, but as I recall it there was no expression on the part of any director of doubt as to the fairness of our plan to limit the payment to the preferred stockholders to $100 a share until the board meeting on May 24, 1945, at which Mr. Streeter raised the issue and asked if there was not some way in which the directors would not have to take a position as to whether or not it would be fair to pay the preferred stockholders a premium. Mr. Coonley stated that he thought it was the responsibility of the directors to recommend what, with their more intimate knowledge of the affairs of the company, they considered to be fair. Having in mind the statement of the Supreme Court in the Otis case to the effect "enforcement of an overriding public policy should not have its effect visited on one class with a corresponding windfall to another class of security holders," I pointed out to the directors the losses that were being borne by the common stockholders as a result of the Section 11 order. I presented to them a statement showing the sales of securities and assets from the time the holding company Act was passed up to May, 1945, and pointed out that the common stockholders had been

deprived through such sales of the benefits of diversity which would otherwise have accrued to their interest, the benefits which would have come from channeling the large flow of earnings available for effective financing in the individual subsidiary companies from time to time without impairment of uniform flow of common dividends, the loss of economies to be derived from a supervisory mutual service organization, the loss of opportunity to realize the increment in value resulting from growths in the existing properties as evidenced by the developments in the Puget Sound situation since its divestment in 1943, the sacrifice which the common stockholders had made in foregoing common dividends in order to accumulate funds with which to pay off the preferred stock, and in this connection I presented a statement showing the amounts accruing to the interests of Engineers common stockholders and undistributed in the system from September, 1935, through March, 1945, aggregating over $22,000,000 at that time, and it now aggregates over $25,000,000.

I pointed out the further burden which was proposed to be put on the common stockholders to provide $10 a share, the amount provided in the plan then under consideration, for the balance of the funds required to retire the preferred stock, and that such retirement of the preferred stock would cause them to lose the leverage which they had and presumably were seeking when they made their investment in Engineers common stock.

In contrast to the sacrifices by the common stockholders I pointed out that the preferred stock would certainly be getting a windfall if they were paid any more than $100 a share and accrued dividends, particularly in view of the record of the market value of the preferred stock in the past, and the fact that much of its present market value was attributable to the sacrifices made by the common stock and to war earnings.

I stated that I thought the directors should have the advice of counsel and that I would ask Mr. Tucker to pre-

pare a memorandum for them. This was prepared and presented to them by Mr. Tucker in person on July 26, 1945. That is Applicant's Exhibit No. 38. Mr. Tucker answered various questions and a full discussion was had.

On September 5, 1945, a meeting of the Board was held to authorize the filing of the present plan. At that meeting I called on each director individually to express his opinion, which they did. I do not recall now the particular points made by each director, but I do recall the statement made by Judge Wilson in substantially these words: "The purpose for which the company was organized has been frustrated by the Holding Company Act and hence the fair thing to do is to return to the preferred stockholders the money which they put into the enterprise."

The other statements were all favorable to approval of the plan, with the single exception of Mr. Streeter.

The directors had three months in which to consider the premium issue as raised by Mr. Streeter, and a month to consider Mr. Tucker's opinion, before acting formally on the plan. I am sure all of the directors desire to do only what is fair as between the various classes of stockholders and that their action on this plan reflects their honest opinions without regard to their personal interests.

Q. During this period from 1941 to the time the plan was filed and, more specifically, say, from May, 1945, up to the time the plan was filed, what stockholders did you personally speak to regarding the filing of the present plan?

A. All of our stockholders had been notified in the 1943 and 1944 annual reports of a possible plan for further disposition of the assets of the company if it became necessary or desirable to do so in view of the S.E.C.'s order in our Section 11 proceedings.

Q. Did you speak to any large stockholders of Engineers?

A. Yes, I did.

D. C. Barnes—Cross Examination (Cont'd)

Q. Did you speak to any large stockholder who represented the Stone & Webster interests?

A. Yes, following the directors' meeting I discussed—

Q. Which directors' meeting, sir?

A. The directors' meeting to which you referred in your question, in May, 1945. I discussed two plans for the first time with outside stockholders. Those were what we have called the preference common plan, and the other, the warrant plan. The first discussion which I had was with Mr. Edwin S. Webster, Jr., on May 28th, the directors' meeting having been, as I recall it, on May 24th. I also discussed the two plans at this time with Mr. W. T. Crawford, a Vice President of Stone & Webster, in order to enlist his support. After I had explained the two plans to Mr. Edwin S. Webster, Jr. he stated that he greatly preferred the preference common plan because the warrant plan would impose a substantial burden on him, but that if I felt that it was in the interest of the stockholders to follow the warrant plan he would not oppose the program. The following day I stopped off in Boston on my way to Cape Cod and discussed the two plans with Mr. Edwin S. Webster, Sr., Mr. Henry G. Bradley and Mr. James Orr. They stated that they thought the plan was a fair one and although it would require the putting up of considerable cash, which would be a burden, they would not oppose it. Some weeks later I discussed the warrant plan with Colonel Whitney Stone, when he was in New York on leave. By that time we had had further conferences with the staff and had concluded that it was hopeless to pursue further the preference common plan. And let me remark that the warrant plan was originally suggested to us by the staff at the time we were discussing and pressing for the preference common plan, which was an alternative plan that we had picked up because we could get no encouragement on the liquidating holding company plan. Colonel Stone indicated that he would not oppose the plan. These were all of the large stockholders whom I knew personally.

D. C. Barnes—Cross Examination (Cont'd)

In addition, I recall a discussion which I had with a small stockholder from Brooklyn whose name I don't recall, who called on me to discuss the prospects of his investment, and I asked him what his reaction would be to such a plan, and his reply in substance was that he thought it was fair and that while it would burden him to raise the money necessary to exercise his warrants he felt that that was preferable to selling out part of his interest to other investors.

Up to this time we were considering a subscription price of only $10 a share. Since the plan was mailed out to the stockholders on September 10, 1945, we have had a number of contacts with stockholders both in person and by letter, and the reaction generally has been favorable, with only three letters complaining as to the proposed treatment of the preferred stockholders and only one letter in which a stockholder has suggested that the subscription price of the warrants be increased to avoid a bank loan. No stockholder has suggested the sale through public offering of any of the portfolio securities.

Q. Do you know if any of the other members of the board of directors also had discussions with common and preferred stockholders of Engineers?

A. I don't know whether they have or not, with one exception. Mr. Streeter, I know, discussed it with Drew Fletcher.

Q. With respect to this preference common plan, could you just give us very briefly what that plan entailed, Mr. Barnes?

A. Yes. The preference common plan was a modification in form of the liquidating holding company plan, designed to avoid the objections that had been raised that it was inconsistent for the Securities and Exchange Commission to create new holding companies when their objective was to eleminate many of the existing ones. The preference common plan was originally adopted in the case of Philadelphia Electric Company. The proposed form

of adaptation to our situation contemplated that the existing common stock brackets of Virginia, Gulf States, and El Paso, be broken down or reclassified into preference common stock and common stock, that the preference common stock would be exchanged pro rata with the preferred stockholders of Engineers, and the common stock would be exchanged pro rata with the common stockholders of Engineers, with a provision in each of the charters requiring that no common dividends be paid until the preference common had been retired. So that all of the earnings that might be available for dividends in these three subsidiary companies would be applied first to the payment of dividends on the preference common and then to the extent available applied to the retirement of the preference common itself. So that on the basis of the estimates that were then made in some five or six years the preference common would have been liquidated out and Engineers common stockholders would have the had the full equity interest in these three subsidiary companies and would have been in a position to start receiving common dividends.

Q. Would the preference common have had a vote in the charters? Would the charters of the three operating companies provide for a vote for the preference common stock? Do you recall?

A. I don't recall whether we got as far as determining whether or not voting rights should be given to the preference common stock.

Q. But on an over-all basis, under the so-called preference common plan, the preference common stock which would perhaps have been given entirely to the preference preferred stockholders of Engineers—over a period of five or six years these preference common stockholders would have been paid out?

A. That is correct—at $100 a share.

Q. Plus accrued dividends?

A. Plus accrued dividends, and no more.

D. C. Barnes—Cross Examination (Cont'd)

Q. You testified this morning, Mr. Barnes, in relating to the general background leading up to the filing of this plan, that no one questioned the fact that this was an involuntary liquidation that Engineers had in mind, that is, from the period that you first started discussing this plan in 1941 up to the time you filed it. Is that correct?

Q. Well, I don't know that that is correct, up to the time we filed it. The statement that I made earlier this morning was that when we were considering the plan in 1941 nobody considered that there could be any question but what it was an involuntary liquidation.

Q. You mean by "no one" the Board of Directors or the stockholders?

A. That is correct.

Q. The stockholders?

A. No, either in the Board of Directors or the stockholders.

Q. Do you recall in the matter of Western Public Service Company, File No. 70-453, where the Commission denied your application to reacquire your preferred stock? The reason I am referring to that case is because I have before me the brief of Mr. Tucker which was filed previous to the oral argument in that case, and I am specifically referring to page 10 where, in introducing this subject of reacquiring the preferred stock of Engineers, he made the following statement in his brief on page 10; "The contract preferences of preferred stock on liquidation do not furnish a fair standard for the treatment of preferred stockholders in a reorganization necessitated solely by Section 11." And then he went on to say, on the following page, page 11, "Requirements long imposed after any contractual rights of preferred stockholders viz-a-viz common stockholders had been established"—that in such a case liquidation preferences which stockholders agreed should govern in case the enterprise should fail "are only one of many factors to be taken into consideration in determining what is a fair and equitable adjustment of the rights of

security holders under these unforeseen circumstances". Now, in the light of that statement and in the light of your remarks this morning, do you recall that at the time of this proceeding the Engineers preferred stock was selling around 60, and I believe the Engineers Board of Directors or the management took the position that even if a Section 11 proceeding were pending at that time it would not be fair to pay the Engineers preferred stockholders out at $100 because of what you considered at that time to be the fair value, which was around 60. Is that correct, Mr. Barnes?

A. I think that is substantially correct. Let me state the situation as I understood it at that time. At the time of this hearing that you speak of there was very little, if any, market equity for the common stock in Engineers Public Service Company, and following the decision of the Securities and Exchange Commission in the United Light and Power case—I may be wrong as to the particular case, but some precedents that had been set by the Securities and Exchange Commission—I think led Mr. Tucker to feel and led us to feel that where there was not sufficient equity to take care of the common stockholders under the so-called fair and equitable standards the charter contract provisions might not be followed. That seems to me an entirely logical conclusion to reach. The situation as I see it in the United Light and Power case, for example—there were not sufficient assets to cover the common stock. If the charter had been followed legally the preferred stockholders would have taken all of the assets and the common stockholder would have lost 100 percent of his interest. In the situation that we are facing today there are sufficient assets to take care of the common stock, so that that problem is not facing us.

Mr. Condon: Do you mean the preferred stock, Mr. Barnes, instead of the common? You said there are sufficient assets to take care of the common.

The Witness: No, I think you have got to decide at the present time whether the enforcement of the contract rights

on the preferred stock is inequitable and unfair, and the maximum amount that can be claimed as being unfair to the preferred stockholders is from 5 percent to 10 percent of the amount of their contract rights.

By Mr. Kanton:

Q. When you speak of the United Light and Power case I take it you are speaking of what we know as the second United Light and Power case, the one involving the preferred stocks which were paid out 95 percent of the assets of the company and which went to the Supreme Court under the name of Otis & Company versus S. E. C.?

A. That is correct. I had in mind particularly the quotation in reference to "an overriding public policy should not be enforced against one class of security holders with a windfall for another class."

Q. In response to my question, Mr. Barnes, you just told me that because of what you considered to be the prevailing opinion around the time that the Western case was before the Commission, your counsel, the Board of Directors and yourself considered it fair to only pay the preferred stockholders whatever you considered or whatever was considered to be the fair value of the preferred stock.

A. No. I think at that time the majority of the Board of Directors would have felt that the preferred stockholders should have had the involuntary liquidating price.

Q. Well, wasn't it the position of counsel for Engineers at that time that it wouldn't be fair to pay the voluntary or involuntary liquidation price when the stock was selling around 60?

A. That was Mr. Tucker's opinion and that was my opinion at that time.

Q. But that was the position that was taken before this Commission?

A. That is correct.

Q. Was that against the opinion of the rest of the Board of Directors?

A. Well, I don't think the Board of Directors ever read Mr. Tucker's brief.

Q. But throughout your testimony and also the brief the position taken was as I have just stated it. Now my question is, Mr. Barnes, did the Board of Directors of Engineers fully agree with that position or did they disagree? Was there a divergence of opinion at that time?

A. Well, I don't think that was an issue that ever came up before the Board of Directors at that time.

Q. In other words, as you are testifying now, that was the position taken by yourself and Mr. Tucker at that time?

A. Well, that wasn't an issue in the case at that time, as a matter of fact. The issue in the case was whether or not we should be allowed to buy preferred stock from preferred stockholders who were seeking a market for their stock. It wasn't a question of what should be taken as an action by the Board of Directors as to payment of the preferred stockholders in the event of liquidation or compliance with Section 11.

Q. I am afraid, Mr. Barnes, that it was quite an issue in the case, because your testimony brings that out—Mr. Tucker's oral argument and Mr. Tucker's brief does make that point. In fact, the Commission's decision goes into it quite fully as to whether Engineers should be allowed to reacquire its preferred stock in the light of the Section 11 problems that the Commission was faced with at that time and which were decided by the Commission later on.

A. That was an issue, but I still assert that it wasn't an issue as to whether the preferred stockholders in the ultimate liquidation proceedings should be paid off at their contract price or at some other price.

Q. Well, if this pending proceeding were presented to the Commission at the time the Western case was before the Commission would it be your position to pay the preferred stockholders $100 per share plus accrued dividends, or, rather, give them the fair value, which, say, was determined to be 60.

A. I think the position of the Board would be that they should receive $100 a share and accrued dividends.

Q. Why do you say you think?

A. Because I can't speak for the rest of the directors other than from my observation of the discussions that have been had when I was at the Board meetings.

Q. But it wouldn't have been your position or Mr. Tucker's at that time, would it, sir?

Mr. Pickering: I object to that question calling for what Mr. Tucker's opinion might have been. The witness can't testify what someone else's position might have been.

The Examiner: I will sustain the objection.

Mr. Kanton: I will amend the question.

By Mr. Kanton:

Q. That would be your position at that time?

A. My position would be that if there weren't sufficient assets to give the common stockholder anything, it would be fair and equitable to give him a small percentage in order to give him a run for his money, so to speak, in the future.

Q. Let's assume that there were sufficient assets, and I think the case brings that out, that there were some assets for the common stockholders. Would you say that if there were sufficient assets that you would have recommended that the preferred stockholders only get $60 rather than $100 per share?

A. No, I would not.

Q. You would recommend that they get $100 per share?

A. That is right, if there was sufficient assets to take care of the preferred stock and leave some for the common stock.

Q. If you think the fair value of the present preferred stocks were only, say, $50 or $60, would you still recommend that the preferred stockholders receive $100 per share plus accrued dividends?

D. C. Barnes—Cross Examination (Cont'd)

A. If there were sufficient assets for the common stock, yes.

Q. That wasn't my question. I am assuming that there are sufficient assets for both the preferred and common stockholders but I am saying it is determined that the fair value was only around $50 or $60. Would you still recommend that the preferred stockholders receive $100 a share plus accrued dividends?

A. I certainly would.

Mr. Pickering: I object to that question as assuming an impossible situation. You can't have it both ways.

The Examiner: I didn't understand that the question was both ways. I think Mr. Kanton's question was assuming that there were assets sufficient to cover preferred and common stock.

Mr. Pickering: He said "not sufficient".

Mr. Kanton: No, I said "sufficient".

Mr. Pickering: Well, assuming there were assets to cover them and then that the preferred stock was worth only $50 or $60—it is inconsistent.

The Examiner: I think the record is perfectly clear.

I think Mr. Barnes' position is this, that if there were not sufficient assets to cover the preferred stock, that he would then favor paying the preferred stock less than $100 a share and give the common stockholders, as he said a moment ago, a run for their money. I think that is the expression he used. But if there are sufficient assets to cover the preferred and common, then, regardless of the value of the preferred stock, his position is that they should be paid, the preferred stockholders should be paid $100 and accrued dividends.

Is that your position, Mr. Barnes?

The Witness: That is correct.

The Examiner: And that is your position then and now, as I understand it?

The Witness: That is right.

D. C. Barnes—Cross Examination (Cont'd)

By Mr. Kanton:

Q. Mr. Barnes, did you speak to any preferred or common stockholders of Engineers with respect to whether they were in favor of exchanging their preferred stock interests for the Gulf States warrants?

A. No, I did not ask anybody whether they were in favor of doing it, but I told several stockholders we had amended the plan to provide for that.

Q. Mr. Benjamin testified on direct that he considered it an important factor for setting the price at $11.50 for the Gulf States warrants that "many of our stockholders preferred during this period of high personal income taxes to have an investment which would yield capital appreciation rather than dividend income." On cross examination he stated that his previous statement was a generalization based on the fact that there are many large common stockholders and that he just assumed that they would prefer to take this Virginia common stock at the termination of the liquidation of Engineers rather than get the dividends during the three-year period and pay a very high rate of tax on those dividends. Do you, as president of the Company, assume the same generalizations and make the same assumptions that Mr. Benjamin did with respect to this phase of the plan?

A. Well, I think it is axiomatic, Mr. Kanton, any stockholder whose income last year—and we were talking about this plan when we had last year's taxes—who had a personal income, I think it is of over $14,000, would be better off to take his income through capital appreciation than he would through dividends, and many of our stockholders have incomes substantially greater than that. We have had examples of the efforts that people go to in seeking that kind of investment in, for example, the sale of our Savannah property, where the purchasers felt that it was a very desirable investment because it offered them an opportunity to get capital appreciation and not income. The

same thing is true of the people to whom we sold Missouri Service Company and Northern Kansas Power. The same is true of the people who have contracted to buy our Western Public Service (Delaware) property.

Q. Aren't your generalizations and assumptions only with reference to large stockholders? Does it necessarily have to apply to all stockholders, to small stockholders? Because of the illustrations you have just given me, the Donner interests, and the people who bought the Northern Kansas property, and the people who were interested in the Western properties, those are people of substantial means who have large holdings in companies.

A. Well, as I said in my previous answer, as I recall the figure, everybody who has an income of over $14,000—we have an exhibit that shows the distribution of holdings of our stock. It is Applicant's Exhibit No. 16, which shows that 84.77 per cent of our stock is held in blocks of over 100 shares. That indicates concentrated holdings of 84 per cent of our stock and presumably in order to make a substantial investment the owners must on the average be fairly well to do.

Q. You mean in order to buy a hundred shares' worth of common stock of Engineers?

A. I don't limit my amount to 100 shares. The amounts that I have cited are those that have bought over a hundred shares, and 72½ per cent out of the 84.77 per cent hold 500 shares or over.

Q. Then your generalizations and Mr. Benjamin's generalizations are made on the basis that large stockholders would be interested in tax advantages through the proposal we are speaking of now, but that neither you nor he did speak to any stockholders, large or small, on this particular phase of the plan?

A. That is correct, and I don't think we needed to talk to anybody because we haven't been paying dividends on our common stock since 1932, and we get very few com-

plaints because people are not getting dividends. They are perfectly satisfied to see the appreciation in capital and to take their gains in that form.

Mr. Condon: Mr. Barnes, were there any 102 proceedings instituted against the company by the Bureau of Internal Revenue during this period, to your knowledge?

The Witness: No, there were none.

Mr. Condon: Did the question come up in connection with the audit of your returns annually?

The Witness: I don't think the question has ever been raised. I think the Internal Revenue Bureau recognized the fact that this company was faced with the necessity of liquidating under the Holding Company Act and that it needed to accumulate cash in order to retire its preferred stock in order to permit distribution of its assets.

Mr. Condon: Were any statements made by any officer of the company to the Bureau of Internal Revenue with respect to the accumulation of earnings in this company?

The Witness: We filed all the returns, of course, as required by the statute.

Mr. Condon: Were there any supplemental statements or affidavits, to your knowledge?

The Witness: No, I don't think there were any.

By Mr. Kanton:

Q. Mr. Benjamin testified that one of the principal factors considered by the Board of Directors in formulating the present plan was that the present Engineers common stockholders want to continue their interest in the three operating companies, namely Gulf, El Paso, and Virginia. Do you recall his testimony?

A. Yes, I do recall his testimony.

Q. And I take it that is your opinion?

A. I have so testified this morning.

Q. And the basis for that opinion is what, sir?

A. Merely an analysis of what any person's reaction is if you make an investment in a security, particularly a

holding company security. You make that investment because you like the character of securities in the portfolio of that company. Therefore the natural feeling of the owner of the holding company security is that he would like to continue his interest in the properties that constitute that system.

Q. Well, aren't you assuming that a holder in a holding company would also want to be a holder in the subsidiary companies—a direct owner? Don't you think there might be a distinction in the mind of, say, the Engineers common stockholder? Could there also be a distinction of whether he wanted to hold only Virginia or Virginia and Gulf and not El Paso?

A. Well, I think that is something for him to decide. I think it is—not the duty, exactly, but I think it is desirable policy, we will say, for the officers in setting up a plan to conform to this Section 11 order, to make it possible for the stockholders to continue their investment if they desire to do so or to make the decision that they don't want to do it, and not have the officers make that decision for them.

Q. But in any of your discussions with the large stockholders did they show any preference to retaining their interests in these three operating companies I have just mentioned?

A. No, they did not. That question has never been suggested to me, and until you indicated by your line of questioning of Mr. Benjamin that you thought our policy in this matter may have been influenced by what you described as the Stone & Webster interests, it was the first time that that thought had ever been put into my mind and I can assure you that I don't think there is any substance in it in fact.

Q. I didn't try to intimate that you were influenced or Mr. Benjamin was influenced by the Stone & Webster interests. All I am trying to do here right now, and what I

have been trying to do, is get the facts, and the only way I can get the facts is to ask the people who come before us to testify. And the fact that I ask you a particular line of questioning does not mean I feel one way or the other. It is for the Commission to decide how it feels after getting all the facts before it, and it makes its decision upon that. Is that clear?

A. In making my statement I merely wanted to answer what anybody might draw as an implication from the questions that you asked. I don't resent or object in the least to your asking the questions. I want to—

Q. I thought you intimated that it was my intimation.

A. I want to make it perfectly clear, definite, and emphatic that there isn't anything to the implication that might be carried by that line of quesioning.

Q. Regarding the dissolution of EPSCO, Incorporated, the mutual service company, of its service contracts with Virginia, Gulf States, and El Paso, can you, tell me first, briefly, how EPSCO at the present time operates?

A. EPSCO has a treasury department headed by Mr. Leighton, which supervises the accounting procedures in the subsidiary companies. I don't know how broadly you want me to go into the detail of the work——

Q. Just generally, the services they perform.

A. They perform supervisory accounting service and treasury service for the subsidiary companies. We have a corporation department headed by Mr. Benjamin which handles the records, corporate records, and does much of the corporate work in connection with mortgages, new financing, work of that character for the subsidiary companies. We have a statistical and research department headed by Mr. Hastings, who has handled for the subsidiary companies depreciation studies, rate studies, pension studies, developed the present pension plan. They also prepare statistical and financial analyses of the performances of the subsidiary companies. Under the executive department, that has shrunk to the point where now we

have Mr. Hanlon, the vice-president, who supervises the operations of Gulf States and El Paso, the two Southwestern subsidiaries, and I supervise the operations of Virginia Electric & Power Company, which is our only remaining subsidiary.

. . . . . .

[R. p. 567] By Mr. Kanton:

Q. Throughout the plan, as detailed, and the testimony to date, it is provided as a condition to Part One of the plan, that "there shall be no court enforcement, therefore, in a court of competent jurisdiction and until the Commission is so requested by the company." Can you tell me what your intentions are at the present time for requesting the Commission to apply the court enforcement as provided under Section 11-E of the Act?

A. Yes. If the Supreme Court decision is adverse to the position taken by the company, in the litigation now under consideration by the United States Supreme Court, the company will forthwith file a request with the Commission, asking them to request the District Court to enforce the Commission's order.

Q. In other words, if the decision is not favorable to Engineers, it is the intention of the Board of Directors to amend the plan to so provide?

A. That is correct.

Q. Under Part Two of the plan, it is provided that "Engineers agrees that in the event the Commission shall, in its opinion, find (1) that the plan is not fair and equitable to the persons affected, and (2) shall, in its order, specify an amount in addition to $100 per share, that Engineers should pay its preferred stockholders, Part Two of the plan becomes automatically amended so that Engineers is to pay to its preferred stockholders such additional amount as the Commission shall have so specified."

Now, if the Commission only found that the plan is not fair and equitable to the persons affected and did not order

or specify an amount in addition to $100 per share, that Engineers should pay, as I understand it, the plan in such event does not become automatically amended; is that correct?

A. I should think that was the language.

Q. Well, no. This is an important point, Mr. Barnes. I hope I have made myself clear. In other words, if the Commission finds that the plan is not fair and equitable but does not order or say that Engineers should pay more than $100, then this automatic amendment does not come into effect, is that correct?

A. Well, if they find the plan is not fair and equitable, I do not think they approve the plan, do they?

Q. No, they do not. The plan is denied. But assuming they do not order that Engineers pay any more but do not say anything about that, my question is, does the automatic amendment come into play?

(Discussion off the record)

Mr. Tucker: Well, Part One of the plan, of course, provides that the preferred stockholders shall be paid $100 and accrued interest to the date of deposit per share.

Part Two of the plan says that Engineers shall not pay anything in addition to the amount just specified and says that Engineers believes that is fair and equitable.

Then Part Two of the plan provides: "To the end that there may be determined by the Commission in the proceedings in connection with Part Two of this plan, the amount, if any, which, in the opinion of the Commission is fair and equitable to Engineers, shall pay to its preferred stockholders, in addition to $100 per share plus accrued dividends to the date of deposit provided to be paid under Part One of the plan, then, Engineers agrees that if the Commission in any findings or order respecting Part Two shall find that it is not fair and equitable to the persons affected thereby, that Engineers shall pay to its preferred stockholders no amount in addition to $100 per share and shall

in such findings or order specify an amount in addition thereto, which Engineers should pay to its preferred stockholders." Then the plan will be automatically amended to cover such payment.

It seems to me that is entirely clear. I do not understand what it is that you do not understand about it.

Mr. Kanton: I just want the record to be clear. Supposing the Commission does not find or order or specify any amount over $100 but finds the plan to be unfair and unequitable as now constituted. My question is, is the plan then automatically amended?

Mr. Tucker: Well, obviously not.

Mr. Kanton: That is all I wanted to know.

(Discussion off the record)

Mr. Tucker: The Commission has in many cases that I have seen, said that they would find a plan was fair and equitable if certain things were done, if the plan were amended, so that certain things were done. You have no question but what they have that power?

Mr. Kanton: That is correct.

Mr. Tucker: Well, they could say here exactly the same thing, that they thought the plan would be fair and equitable if it provided that there should be paid X dollars in addition to the $100 per share. Then would come into play the automatic amendment.

(Discussion off the record)

By Mr. Kanton:

Q. You recall that there was a discussion at our last meeting, Mr. Barnes, and during that discussion Mr. Tucker said that the Commission can order the payment of interest for any additional amounts as found to be payable over $100 per share plus accrued dividends to the preferred stockholders, subject, of course, to the right of Engineers to contest. Now, I just would like to clear up one point. Does this also provide that the Commission may, in its

determination, say that Engineers should also continue to pay dividends to its preferred stockholders during this period?

A. After they have had the principal?

Q. Yes. Well, not after they have had the principal. The question is, if the Commission finds that $100 per share plus accrued dividends is not fair and equitable but some additional amount during the time, say, that this point is contested and, say, $100 per share has been paid, is it also your intention that the automatic amendment should provide; that is, in the event the Commission does so provide, that dividends shall also be paid during this period until a final determination is made as to what is the fair and equitable amount to be paid to the preferred stockholders of Engineers?

(Discussion off the record.)

(The last question was read back by the reporter.)

The Witness: I think the plan is perfectly definite in saying that if Part One of the plan has been approved by the Commission, then any amount that the Commission either by opinion or order says shall be paid to the preferred stockholders in addition to $100 a share, will be incorporated in the plan by an automatic amendment, that we will, of course, reserve our right to contest such a provision, and if the Commission should hold, for example, in the example which you cite, that the preferred stockholders, having gotten the $100 a share, should get a premium, and in addition to the premium, six per cent while the thing was being liquidated, plus six per cent on the premium, I think we would contest that and I think the courts would support us.

Q. Suppose the Commission in its consideration, does not see fit to combine Parts One and Two of the plan as now constituted but is of the opinion that Parts One and Two should be consolidated, and in so finding, also makes the determination that $100 per share plus accrued dividends is not fair and equitable, but that some additional

amount should be paid. On such a consideration, has Engineers or the Board of Directors given any thought to such a possibility and the fact that they may have to consider the combining of Parts One and Two and the payment to the preferred stockholders as one entire plan?

A. Yes, we have given consideration to that. The reason that we broke the plan up was because we thought that that was the fair and equitable way in which the plan should be handled, that there was $100 a share coming to the preferred stockholders plus accrued dividends without any question either by them or by the common stockholders or by the company. That was admitted. Therefore, we should be allowed to go ahead and pay that amount.

Then as to the amount in dispute, that could be carried out in due course without burdening the company with continuing $14,000,000 of cash in its treasury not at work. Now, as an example to show the reasonableness of that position, I would like to cite what the Commission permitted Electric Bond and Share Company to do. They let them pay $30 a share on their preferred stock and save the interest or the dividends that were payable on that thirty per cent of the preferred stock that was outstanding. Now, we are asking the same thing here, except that they give us the opportunity to pay down $100 on the preferred stock and save the dividends that have to be paid while this premium question is being determined.

Q. Not that I want to get into a discussion of the Electric Bond and Share case, with which I am familiar—isn't it true that in that case the company only had $30 to pay the preferred stockholders and not the full amount, and that the second part of that plan, if consummated, would generate sufficient cash in order to pay off the stockholders?

A. Well, I do not see any difference in principle between paying down $30 a share on the stock and paying down $100 a share. In one case you have $30 a share and in the other case you have $100. The principle, it seems to me, is identical.

D. C. Barnes—Cross Examination (Cont'd)

Q. Except that in that case, Electric Bond and Share did not tell the Commission that they thought $100 per share was a fair and equitable amount that should be paid, but left it for the Commission to decide, is that correct?

A. No, I do not think that it has been left to the Commission to decide.

Q. We will not go into that but I think that is the answer, Mr. Barnes.

[R. p. 575] By Mr. Kanton:

Q. Referring to the Plan as filed, Mr. Barnes, Division E, ——

A. (Interposing) As amended?

Q. Yes, sir. (Continuing)—the last sentence in the first paragraph thereunder "No amendments to the Plan or any part thereof shall be made without the consent or agreement of Engineers."

Could you tell me if this in any way affects the automatic amendment as provided under Division C of the Plan?

A. I don't know what the language is, but I am sure that it wasn't intended that it should.

Q. In other words, it means any other amendment, other than provided for the automatic amendment?

A. That is correct.

Q. Part 3 of the Plan originally provided that Engineers will be dissolved and liquidated, or Engineers could have been merged with Virginia.

Could you tell me what change in circumstances brought this amendment about?

A. I think there were two reasons that caused this change in the Plan. In discussions with the staff of the Commission of the Plan when it had part 3 incorporated in it, the staff urged that the Company include a provision in the Plan that would give the Commission jurisdiction to order the elimination of Engineers within a specified time, if the Company didn't go ahead and do it under Part 3.

Another factor was the change in the tax situation that developed from the time the Plan was originally drafted. At that time we were inclined to think that the final distribution of the Virginia stock to Engineers' stockholders, if done as a liquidation, might be a taxable transaction to the Engineers' common stockholders, and therefore we contemplated the possibility of accomplishing this through a merger with the Virginia Electric and Power Company, and thus avoid any immediate tax liability for Engineers' common stockholders; subsequent to the filing of the Plan, discussions were had by tax counsel with the Bureau, and it is my understanding that as a result of those discussions, counsel was satisfied that no substantial tax advantage would be had by following the merger route.

Therefore, we concluded to meet the idea of the Commission, the staff of the Commission, the simple thing to do was to provide for the immediate dissolution of Engineers, which would give full assurance of the point that the staff was pressing, and abandoned the idea of merger.

Q. When you say "the staff was pressing" do you mean that the staff, in your discussions with them, made certain suggestions?

A. Exactly. I don't mean they were attempting to use any influence; they were trying to be helpful in suggesting to us that we put such a provision in.

Q. Wasn't, if I recall some of those conversations, wasn't it more in line of getting Engineers out of the picture as quickly as possible?

A. The staff has always pressed for that.

Q. And under the present proposal, as distinguished from the original proposal, Engineers will still be in existence for the same length of time, say perhaps three years after the consummation of this Plan?

A. No, I think that is not correct. Engineers will be dissolved forthwith on completion of Step 1 of the Plan, within, I think it is, 60 days, as provided in this amendment.

Q. That is correct, Mr. Barnes.

D. C. Barnes—Cross Examination (Cont'd).

A. A dissolution certificate will be filed in the State of Delaware.

Q. At any rate, as I see the purpose of this amendment, the only thing that it accomplishes is that the dissolution takes place 60 days after the consummation rather than right after the three-year period when all the affairs of Engineers are finally liquidated?

A. Well, apparently the staff felt that they didn't have sufficient assurance that Engineers would be liquidated even then, because, as I understood their request or suggestion, it was that we incorporate a provision in there submitting to the jurisdiction of the Commission, if we had not, in the specified time, liquidated.

Q. If the tax benefits which may have been obtained by Engineers through a merger had not changed, would Engineers have provided for this amendment, outside of what the staff suggested?

A. If the distribution of the Virginia stock to Engineers' stockholders in final liquidation had been a taxable transaction, I think we would have stuck to the merger route, in order to avoid such tax liability.

Q. Then would you say the over-riding weight, then, was the change in tax circumstances?

A. I think so. That, and to meet the ideas of the staff and the Commission.

Mr. Scheetz: Could we be informed at this time as to when these conversations with the staff occurred, with relation to the November hearings?

Mr. Kanton: Well, these conversations have been going on with the Engineers' people, I would say, prior to the filing of the Plan and once or twice thereafter, and we did mention—of course, subject entirely to the discretion of Engineers, that there was no assurance in the Plan as filed that Engineers would be dissolved under the filing.

We did suggest at one meeting, as was done in another case—I think Electric Bond and Share, where it was provided that if within a certain time after the consummation

of the Plan the holding company did not finally liquidate, the Commission was authorized to go into Court, and it was so stipulated; to force the liquidation.

We just discussed those matters generally and we didn't urge or suggest what should be done, we just gave our opinion and said,—Had they considered it.

Mr. Scheetz: You misunderstood my question, and since Mr. Barnes is under cross-examination by you, I was merely asking you whether it couldn't be placed on the record as to when the conversations to which Mr. Barnes had alluded took place, with reference to the November, 1945 hearings,—before or after.

Mr. Kanton: I really don't recall. Perhaps Mr. Barnes does.

The Witness: My recollection is that in the conference which Mr. Benjamin attended here in Philadelphia, and at which I was not present, but which he told me about on his return, the suggestion was made by the staff—and it was long before the November hearing,—and the same suggestion was repeated subsequently when I was down here in a conference with representatives of the staff, and that may have been subsequent to the November hearings. I am not certain as to that.

Mr. Condon: Mr. Barnes, isn't it a fact that that discussion with respect to the problem of dissolution of Engineers to which you have made reference, was taken up even before the actual drafting of the Plan?

The Witness: I think it may well have been, Mr. Condon. I am not clear as to the date but, if that is important, Mr. Scheetz, I think we can find it in our memoranda.

Mr. Scheetz: What I did want to know, Mr. Barnes, was, whether any discussions with the staff held since the November meeting accounted for this.

The Witness: No, I think it was the discussions prior.

D. C. Barnes—Cross Examination (Cont'd)

[R. p. 586] By Mr. Kanton:

Q. Mr. Barnes, in Applicant's Exhibit No. 1, Exhibit A thereof, page 1 and Exhibit B, page 2, there is a statement made at the bottom of these exhibits, which reads as follows:

"It is the opinion of Company counsel that no such redemption premium is payable."

Can you tell me why that footnote was put in there, sir?

A. Well, I suppose it is put in there so that the pro forma statement will correctly reflect what the accountants were attempting to show, and it calls attention to the fact that there is no provision made in the balance sheet for any redemption premiums, and it carries the footnote that counsel has advised that such a redemption premium is not payable.

Q. Isn't it also the opinion of the Board of Directors and officers of Engineers that no such redemption premium is payable?

A. Yes, it is.

Q. Well, I was just wondering why the opinion of the Board of Directors wasn't put in here, rather than the opinion of counsel?

A. Well, I think it is customary in these financial statements, when we make a reservation of that kind, to refer to the opinion of counsel and not to the opinion of the Board. There was no attempt on the part of the Board to duck any responsibility for the statement.

* * * * * *

[R. p. 590] By Mr. Kanton:

Q. You mentioned something this morning about Virginia paying off a $5,100,000 note. I believe it was Mr. Benjamin who mentioned that.

A. That is correct.

Q. Could you tell us some of the details of that transaction, Mr. Barnes?

D. C. Barnes—Cross Examination (Cont'd)

A. I will be glad to tell you all of the details of it. Virginia Electric & Power Company had notes outstanding of some $11,580,000. As a result of the sale of the railway property and as a result of tax credits resulting from the sale of the railway property and as a result of tax credits resulting from the end of the war emergency period, Virginia found itself with an extraordinary large amount of cash on hand, something over $9,000,000 of cash on hand, estimated at December 31. This was the estimate that was made early in December. The company's net current position at September 30 showed net current assets of some $7,200,000. The cash that we received from the acceleration of these war emergency tax credits was cash that we had counted on in scheduling the maturity of many of these notes in the future. We had anticipated that as the war continued and as we get these tax savings we would apply the cash derived from that source to the meeting of the maturing notes in the future, and those maturities were quite heavy on that account. Having anticipated the receipt of this cash, it seemed appropriate to use the excess amount of it to retire outstanding indebtedness. Under the terms of our bank notes we can redeem outstanding notes with the use of cash derived from operation in the system and any cash other than that derived from the sale of securities bearing a lower interest rate for the retirement of outstanding notes without the payment of any premium, provided that we retire the notes in the reverse order of their maturity, taking the last call first. We concluded, after viewing the cash situation and discussing the matter with the Virginia directors that we would call the last maturities of the existing serial notes which are all the maturities from 1949 on, in the amount of $5,100,000, and that was done on December 31. The company had certain advantages which it obtained from anticipating the payment on that date as against carrying it over into the next year in that we have a tax in Virginia of .2 per cent, on, I think it is intangibles. It covers cash in the bank, in any event, so

that this cash, this $5,100,000 had it stayed in the bank, we would have had a tax liability of some $10,200 on account of that asset.

It is our intention after the first of the year to negotiate with the banks for either a resetting or a refunding of the remaining $6,480,000 of notes which have just under a five-year maturity, to extend those over a 10-year period with semi-annual maturities in equal amounts, with a reduction in interest rate.

Q. Could you tell me how many notes exactly went to make up this $5,100,000? Was that one note or more than one note?

A. Well, they were serial notes, you understand. The Northwestern Mutual Life Insurance Company held ten notes, as I recall the number, maturing serially beginning in 1949 and running through to 1959. Those notes were in the aggregate amount of $4,000,000. Those were paid off to the Northwestern Mutual Life Insurance Company.

Q. What interest rate did those notes bear?

A. Those bore 2⅝ per cent.

Then we had the remainder of the paydown with a February 1, 1949 maturity, bearing interest at the rate of 2¼ per cent. The bulk of those notes—I say the bulk, 40 per cent, the largest single item in those notes, as I recall it, was held by the First National Bank of Boston. The remainder, the remaining 60 per cent of the $1,100,000, was distributed among local banks in Virginia.

Q. When was it first decided to pay off these notes, that is by the Board of Directors of Virginia?

A. The Board of Directors of Virginia at a meeting of the directors held on November 16, authorized the officers in their discretion to pay down up to $5,100,000 of the notes indebtedness of the company.

Q. Did you know that at that time?

A. I was present at the meeting and recommended that the directors authorize the officers to make such paydown.

Q. On November 16, 1945?

A. That is correct.

Q. Did you also consider the possibility of declaring a dividend on that money up to Engineers in order to provide, perhaps, sufficient funds in order to forego the borrowing of any note from the Chase National Bank as provided in this plan?

A. That suggestion was conveyed to me and I considered it and was greatly shocked at the suggestion, because I thought that that's what we were here for. It was my understanding that one of the purposes of the Holding Company Act was not to bleed the subsidiary companies in order to take care of requirements of the parent company, and in view of Virginia's capital structure and the efforts that they are all making to build that up it didn't seem appropriate to me to consider paying any more than the normal dividends out of Virginia, particularly if the purpose of that was to help out a holding company.

Q. Well, eventually the common stockholders of Engineers will, in effect, be the common stockholders of Virginia?

A. That is correct, but we also have some preferred stockholders and some bondholders who are concerned about the financial integrity of the company.

Q. You mean of Virginia?

A. Of Virginia.

Q. I believe when you testified last time, Mr. Barnes, you were asked the following question by Mr. Tucker:

> "If the Public Utility Holding Company Act should be repealed tomorrow, what effect do you think it would have on the market prices of these preferred stocks?"

And you answered:

> "In the current market, based on the present level of earnings, I would expect each of the series to sell somewhat above its voluntary redemption price.

The excess, however, would be small and would represent the discount of the present dividend yield for such time as the company might require to effect a refunding of these issues at a lower dividend rate."

Are you saying in effect here that in the absence of the Holding Company Act the credit of the company would be such that the preferred would be refundable?

A. Yes, I think it would, in this market.

Q. Now, if the Act continued in effect, and there were no imminence of Engineers disposing of El Paso and Gulf States, what do you think the market prices of the Engineers preferred stocks would be? That is, in your opinion? Does your assumption predicate that Engineers would be permitted to continue to own El Paso, Gulf States and Virginia?

A. That is right. Without fear of being required to divest itself of them?

Q. Well, not forever and ever—just no imminence of it at the particular time that we have under my question. Say in the present market.

A. Well, I don't know what you mean by "imminence," Mr. Kanton. If the investors were assured that Engineers was not going to be forced to liquidate as a result of the impact of the Act I think in the present market the preferred stocks would sell as I have testified at slightly above their redemption prices.

Q. Therefore would you say that the only reason that you think the preferreds are not selling above their respective all prices in the present market is because of the pendency of the present Section 11 preceeding now before this Commission?

A. Well, I think it is due to the fact that Engineers in the investors' mind is going to be required to divest itself of its properties and to liquidate, and that the holders of the preferred stocks will not get an opportunity to continue their investment, and therefore they are not willing to pay premium over the redemption price.

D. C. Barnes—Cross Examination (Cont'd)

Q. I don't believe you have answered my question. Let me try to state it again, Mr. Barnes. In light of what you answered me previously, would you say that the only reason that you think the preferreds are not selling above their respective call prices, as you have just testified, in the present market, is because of the pendency of the present Section 11 proceedings now before this Commission?

Mr. Tucker: What do you mean by "the pendency of the present proceedings"? Do you mean the case before the Supreme Court or the plan?

Mr. Kanton: The plan. I said "Section 11 proceedings."

Mr. Tucker: I know but there is also a Section 11 proceeding before the Supreme Court that is undecided, and I wanted to be clear you were not referring to that. You are referring to the plan?

Mr. Kanton: That is correct, Mr. Tucker.

The Witness: I think the depressive factor on the price of the preferred stocks is not this application that we are making under Section 11 (e), but is the effect of Section 11 on the continuity of Engineers Public Service Company as a holding company.

By Mr. Kanton:

Q. Well, it is practically the same thing, it is the enforcement of Section 11 and the filing of this plan in order to comply with Section 11?

A. I think it is due to Section 11, and not the plan.

Q. Then you would say that the only reason that the preferreds are not selling above their respective call prices in the present market is because of the pendency of the Section 11 proceeding, as you put it?

A. That is correct.

Q. Well, anyway, whether the Act was in effect or not, under present market conditions the preferreds would be held down in any event by their respective call prices?

A. That is right.

D. C. Barnes—Cross Examination (Cont'd)

Q. Now, if we will use the following as a definition of fair value, "Fair value is a value arrived at by capitalizing reasonably foreseeable earnings at an appropriate rate determined by what informed buyers would pay and informed sellers would ask for comparable securities of like terms and investment quality," would your answer be the same to the question that Mr. Tucker asked, "Do you think that such a market price would, under the conditions assumed in the last question represent the fair value of these three series of preferred stock?"

A. That is a rather long hypothetical question to answer offhand, Mr. Kanton. Let me see if I have your hypothesis in mind. You want to capitalize the reasonably foreseeable earnings?

Q. At an appropriate rate.

A. At an appropriate rate. You don't define what an appropriate rate is?

Q. I said, "determined by what informed buyers would pay and informed sellers would ask for comparable securities of like terms and investment quality."

A. Well, in my opinion securities are not valued on the basis of reasonably foreseeable earnings. I think they are valued a good deal more on the basis of past performance. They have built up a record of earnings in the past. I don't think the person who is going to sit down and value a security is going to arrive at his decision on the basis of estimating that the earnings for the next five years are going to be a stipulated amount. He can't predict that far ahead. He knows what they have been in the past, he knows what the immediate trend and the immediate outlook is, and he arrives at his conclusion as to value on the basis of such factors as that.

Q. What I had in mind was this. I repeat again the question Mr. Tucker asked you, "Do you think that such a market price would, under conditions assumed in the last question, represent the fair value of these three series of preferred stock?" You answered, if you recall, "If by fair

value is meant the value which will be maintained as an average for an indefinite time in the future, my answer is No. But if it is intended to mean what a willing buyer would pay and a willing seller would take in today's market for such securities, my answer is Yes."

Now, I was just using a different definition than you were to fair value, and I was asking you on the basis of that assumption if you would adopt it, would your answer still be Yes?

A. Well, the fair value as you have defined it contemplates capitalizing reasonably foreseeable earnings at an appropriate rate that willing buyers and sellers would adopt. Now, I think in a free market where people are not forced to buy and where people are not forced to sell that the market value reflects fair value, and people in deciding whether they are going to buy or not—I don't think they arrive at their value by taking a piece of paper and putting down that the earnings for the next five years are going to be thus and so; they say that, "We know what the property has done in the past, we know the outlook for the future, and on that basis we are willing to buy this or willing to sell it at that price." And that is the present price. I don't think that there is any formula that you can get that is going to set a value today that is going to be the value in the future.

Q. Well, the only distinction I was making in my so-called definition was that you were relying more on market value being determinative of fair value, where I was not, as you will recall from the definition I gave you. I was just wondering if fair value was determined that way and market value, of course, being just an element, would your answer still be "Yes" to Mr. Tucker's question?

A. It would be yes, with the same qualifications that my answer in here has, that if I valued the property today on any basis of valuation that would be what I considered a fair value on that basis today, but it would not be, in my opinion, a fair value that you could assume would continue over a period of years in the future.

Q. Well, using your definition of "fair value" and my so-called definition, on any basis, then, you would expect in the current market and the present level of the earnings, that each of the preferred series would be expected to sell somewhat above their respective voluntary redemption prices?

A. I so testified, if I understand your question.

Q. That is correct. You also testified—and I quote—"The future market price level of the securities, if they were continued outstanding without the impact of the Public Utility Holding Company Act, could move from its present level in only one direction, since the voluntary redemption price acts as a stopper to prevent any material rise in price over the respective voluntary redemption prices."

Well, with reference to that statement about the market prices only being able to move in one direction, outside the impact of the Public Utility Holding Company Act, isn't it true that under the present market conditions you would have to refund the preferred stocks of Engineers at the present time?

A. If there were no Public Utility Holding Company Act today I think Engineers would refund the outstanding preferred stock.

Q. Well, then, when you say it only can move in one direction, that statement, in the light of your present answer, is not exactly true, because under present market conditions, outside the impact of the Act, these preferreds would be taken out of the picture?

A. They wouldn't move in any direction if they were refunded, so that if they move they can only move in one direction.

Q. You went on to testify that, "It is impossible to predict at this time whether the future has in store for us as severe declines, as those indicated in the charts showing the price level of the preferred stock since it was issued.

What did you mean exactly, when you said "It is impossible to predict at this time?"

D. C. Barnes—Cross Examination (Cont'd)

A. I meant just that, Mr. Kanton. We have introduced the Company's exhibits, Nos. 26, 27 and 28, which show wide fluctuations in the market value of the preferred stocks of Engineers Public Service Company.

I am satisfied that in the future we are going to have, if the stocks continue out, a repetition of fluctuations, but whether to the extent shown in these charts as having occurred in the past or not, is something that nobody can predict at this time.

Q. However, as you testified before with reference to these specific preferred stocks, under present market conditions, this particular group of preferred stocks under present market conditions, would be refunded, and the possibility of what would happen in the future would not play such an important part?

A. That is correct, as far as the present stockholders are concerned, unless they elected to exchange their stock for a lower dividend yield stock.

Q. You also testified, Mr. Barnes, as to certain factors which might affect future price levels.

I take it you are speaking in that instance of both the preferred stocks and the common stocks of Engineers?

A. I was speaking, in this instance, of the preferred stock, but obviously, anything that affects the preferred stock adversely affects the common stock even more adversely.

Q. With respect to your remarks about continued inflation, in your considerations of this matter, did you also consider possible deflation in the immediate future?

A. I don't think we are headed for deflation in the immediate future.

Q. It is your opinion that it would be inflation?

A. I think we are facing inflation. We have already had a substantial amount of it, and I think we are facing further inflation.

Q. Regarding the 30 percent demands of labor, do you think that labor will get their demands to this extent?

D. C. Barnes—Cross Examination (Cont'd)

A. No, I don't think they will get the full amount, but I think they will get substantial increases, which they have already.

Q. Of 10 percent or 15 percent?

A. I would say fifteen percent as a minimum, based on the awards that I have seen so far.

Q. Can you tell us specifically what awards you have in mind?

A. Yes, I have particularly in mind the awards that some of the Oil companies have made to their employees.

Q. Have you had any recent discussions with employees, among your operating companies?

A. Yes, we gave the employees in Gulf States a wage increase which they haven't accepted yet, which is subject to vote still, of 15 percent.

The El Paso Union has accepted a 13.8 percent increase. Those are the only two that we have had any results from negotiating with.

Q. Is it true that if there are any wage increases, that they would ultimately be reflected in your rates, or at least be considered in rate proceedings by a State Commission which has jurisdiction over rates?

A. Well, they are an element, of course, in operating expenses, but you realize that it is very difficult to secure increases in rates. A substantial time must elapse after the company has been burdened with increased costs, before it can get Commissions to take the necessary action to give the companies relief. Fortunately, the progress of the industry up to date has been such that there have only been relatively few instances where it has been necessary to increase rates, but there is a limit to the extent that you can go without requiring an increase in rates to compensate.

Q. In other words you say there is a time lag between the time that the employees of a utility company get their increase and the time that a State Commission which has jurisdiction over rates can consider it?

D. C. Barnes—Cross Examination (Cont'd)

A. That is correct.

Q. But, in the long run, whether it is a year or two, that matter is usually taken up?

A. Well, I would say that it might be longer than that if there was a progressive series of rate increases made.

Q. Turning now to your remarks regarding periodic depression, would you say that, in the next few years, there would be an indication of a high level of productive activity?

A. Yes, I think I mentioned in here that there had been a pent-up demand as a result of war activities. The statement that I made was "During this period the supply of goods for civilian requirements has been withheld to a large extent and in the immediate future, production to fill this demand may be expected to continue productive activity at a high level."

Q. Do you think this period of high productive activity will continue, say for the next two or three years?

A. I don't like to predict the number of years, Mr. Kanton, because I don't set up to be a prophet, but I can readily conceive that by the end of three years we will have caught up with our consumer demand, and will be geared up to excessive production which would be very difficult to readjust back to a more normal level of consumer demand.

Q. And you expect, then, after this period of high productivity of next going into a readjustment period?

A. That is right.

Q. Do you have in mind the cycle running from the 20's through the 30's and up to the present time—the high, the low, and then the come-back?

A. Well, that is one cycle that we have been through in that period, and in past history we have been through other cycles in earlier periods.

Q. And is that what you are trying to state here in effect, that this is the possible cycle that we may be entering into at this time?

D. C. Barnes—Cross Examination (Cont'd)

A. Yes, I think we are in a boom period at this time, and I think we are going to have depression periods in the future and then after that we will have boom periods again.

Q. With respect to your remarks regarding the "possibilities of Government competition", is it generally true that in the areas where there have been Federal hydro-developments, that the respective market prices of a utility company have been adversely affected?

Mr. Condon: Do you mean the plant, the equipment or the stocks?

Mr. Kanton: I am talking about the securities, as compared with other securities where there isn't any Federal hydro-development.

The Witness: Well, I might cite to you as an example, a company that has suffered from that—one with which I was connected for a great many years, some thirty-one years, as I recall it,—namely Puget Sound Power & Light Company.

They have a $5 dividend preferred stock selling in the current market at $109 a share.

The call price is $110 a share. It is a good preferred stock, it deserves a much higher investment rating, but I think the reason that it has as low an investment rating as it has—and that is also true of the common stock of the company—is because of the threat of Government competition.

Q. My question was of a general nature, not specific.

A. Well, I thought I could best answer your general question by a specific example.

Q. Well, on an over-all basis, have you made any comparison of securities held by utility companies served by Federal hydro-developments, with other companies that supply their own electricity, or get it from a private source?

A. Well, you take what happened down in the Tennessee Valley authority.

There the Government went into this extensive hydro-development project and has taken over all of the private

utility industry in the State of Tennessee—the Government or the local governments,—and the prices that were paid for those properties, in my judgment, were less than the fair values of the properties that were taken over.

Q. What are the probabilities of Federal Hydro-developments in the areas now served by the Gulf, El Paso and Virginia?

A. In the properties served by El Paso, the Government has already developed a plant at Elephant Butte. There are no immediate projected developments, that constitute any threat, as far as I can see, to the El Paso plant. The presence of the government dam at Elephant Butte, what effect it may later have on the municipal authorities at El Paso remains to be seen, and I can't predict, but I can say that in 1943, I think that is the date, having negotiated with the City Council of the City of El Paso for the sale of our electric properties in El Paso, because of the desire of some parts of the community to go into government ownership, when the matter was put up to popular vote it was turned down. How long that condition will continue I don't know. I hope it does indefinitely. In the Gulf States area the government is projecting a development on the Neches River at the so-called Rockland Dam development of some 13,060 kilowatts. At McGee's Bend on the Angelina River, which is right near the Neches River, a development of 23,220 kilowatts. There are two other small developments proposed on the Neches River, one known as Dam A and the other known as Dam B with 4108 and 4800 kilowatts, respectively. The government is also projecting a development on the Brazos River known as the Whitney development, with some 30,600 kilowatts installation proposed.

Q. Are these just proposals or are they being put into effect?

A. They are projects that have been surveyed by the War Department and the Neches Rockland dam development and the Angelina development are being tentatively worked on at the present time.

D. C. Barnes—Cross Examination (Cont'd)

Q. Has Congress appropriated money for them, Mr. Barnes?

A. They have not appropriated the money for the developments as yet. However I think they have appropriated money for engineering surveys. On the Whitney development on the Brazos River I can't tell you exactly the status of that project, but it is one of the active projects.

In Virginia, on the Roanoke River, there is a proposed development at Bugs Island which has an ultimate capacity of 114,000 kilowatts, and in the deficiency bill that passed Congress just before the close of the year there was $1,000,000 included for costs of survey by the Army. That is one of the projects that have been recommended for development by the Army Engineers. There are other developments proposed by the Army on that same river consisting of Smith Mountain, 33,000 kilowatts, Leesville, 16,000 kilowatts, Tabor, 10,000 kilowatts, Melrose, 34,500 kilowatts, Randolph, 24,000 kilowatts. There is also a development proposed at Gaston of 54,000 kilowatts, and one at Roanoke Rapids of 58,100 kilowatts. Then there are two small developments on the James River that are proposed, one known as the Cathwright and the name of the other I don't find. They are both relatively small developments.

Q. What are the possibilities of development in any of these areas referred to as affecting the operation of any of the three utility operating companies of Engineers?

A. What are the prospects?

Q. In the next five years.

A. I think it is reasonable to expect in the next five years that Congress will appropriate money for further hydro developments in the areas served by our three subsidiaries. I think the Bugs Island development on the Roanoke River is a development that is quite likely to go through. I think that the McGee's Bend and Rockland developments in the Neches River in the Gulf area are quite likely to be accomplished. I might say for your in-

formation that we have been trying to buy from the government a surplus power plant located at Lake Charles, Louisiana, and the Reconstruction Finance Corporation has tentatively accepted our proposal for the purchase of that plant, but under the statute they have to give notice to the public agencies, and they have the option to take the property at the same price bid by any private interest. And so far we have not been able to get clearance on the Lake Charles power station because of the indicated desire on the part of government agencies to preserve that for operation in connection with government hydro developments in that area.

Q. With respect to the present Congress' action, having in mind the Missouri Valley project and the St. Lawrense project, do you think that that action indicates that there will be any hydro development in the near future?

A. I think there will be hydro development on the Missouri Valley. As I understand the problem in Congress, it is largely a question of whether the development should be done by an authority, such as was done on the Tennessee River with T. V. A., through the creation of a so-called Missouri Valley Authority, or whether the project shall be constructed by the War Department without the creation of any authority, and operated by the Department of the Interior, Power Division.

Q. If an electric company has the monopoly which they usually do to operate in a certain area, how does Federal hydro development affect it? Assuming, first, that it does, and then assuming it does not, purchase power from the Federal hydro development.

A. I think, again, the best way to answer that question is to be specific and take the case of the Northwest. In the Northwest, when the government came out and built Grand Coulee and Bonneville it provided a tremendous stimulus to the people who were anxious to form public power districts and go into public operation of utility businesses, and with that background they have been endeavoring to

secure public support to take over all of the private utility properties in the State of Washington and conduct the operations through public utility districts.

Q. I didn't have that in mind as the purpose of my question. I was assuming just that there was Federal hydro development in an area.

A. Well, that is the answer to your question.

Q. And your answer is, of course, that that leads to power districts?

A. That is correct. It did the same thing in Nebraska.

Mr. Scheetz: Might I suggest a question, Mr. Kanton, at this point?

The Witness: May I finish the answer?

Mr. Scheetz: Excuse me.

The Witness: And it is also being attempted today in Arizona.

Mr. Scheetz: Would it be appropriate to ask Mr. Barnes to comment on the success which those power districts have had in Washington?

The Witness: Well, so far they have not been very successful. They attempted to condemn from Puget Sound Power & Light Company, by piecemeal condemnation, five or six—I have forgotten now the exact number of counties served by Puget Sound Power & Light Company. Because of severance damages that were awarded, for attempting to take the property in pieces, those districts were unable, with one exception, to finance the cost of the combination award. The one exception was Clallum County, which is at the extreme end of the Puget Sound Power & Light system, over on the Olympic Peninsula. In the case of the Washington Water Power Company, they have been successful in condemning three of the counties served by the Washington Water Power Company, and whether they have actually taken over and begun the operation or not I don't know, but I think they are in a position to complete those acquisitions. Recently they condemned the property of the Portland General Electric Company in Clark County, and

it is my understanding that a bond house has agreed to provide the requisite funds to pay the condemnation award, but a suit has been brought to enjoin the transaction on the ground that the proposed bonds were not authorized by a vote, if I am correctly informed. I would say that they are making progress out there but making it probably slowly.

Mr. Scheetz: Isn't it correct to say that, generally speaking, the Puget Sound properties are still intact and no important pieces have been carved out of them?

The Witness: That is correct, but it has suffered the threat of being torn asunder, and its securities and its security holders have suffered accordingly.

By Mr. Kanton:

Q. Even in areas where we have Federal hydro development, is not the rate of return fixed by the State Commission?

A. In Texas we have no State Commission, you understand, so that no rate of return is fixed in Texas by a State Commission.

Mr. Condon: Isn't that done by the district court in Texas?

The Witness: No, I think the municipalities have the right to regulate rates.

Mr. Condon: Subject to review by the district court?

The Witness: Mr. Tucker will have to answer that. We have never got to the ease in our experience in Texas where we had to take an appeal. We have made it our business to sit down with the commissions and regulatory authorities and regulate our business on a sound and sensible basis.

By Mr. Kanton:

Q. The purpose of my question was just of a general nature, whether it is a district court, a regulatory body, or a state body that fixes the rate. Any rate fixing body

which determines the rate of return for a utility, wouldn't they take into consideration whether energy was being supplied by a Federal hydro development of whether it was coming from a private source, and in the long run perhaps not affect the rate of return to the private utility?

A. No, I don't think that the rate commission is in a position to protect the private utility from encroachment of government ownership. It generally takes the form of either threatened competition or actual competition, and in most of the States the commissions have no jurisdiction, certainly as to a Federal project they would have none.

Q. Aside from the fact of the encroachment of public district ownerships I had in mind just areas where there is Federal hydro development. Isn't the rate of return still fixed on whatever bases are taken into consideration in rate determinations?

A. As I said in my testimony, if that is what we are discussing, the possibilities of government competition, the presence of government hydro development in an area is not of itself a menace, and no immediate menace is evidenced by our experience so far in El Paso. There the government, in connection with an irrigation project, put in a hydro-electric development and El Paso Electric Company worked out a contract with the consent of the City of El Paso and buys a substantial amount of power from this hydro development. But the danger of that development being there is that there is always the urge on the part of certain of the citizens to say, "Well, why don't we take this God-given power that the government is willing to give to us for nothing and go into business for ourselves?"

Q. In other words, the effect, to your way of thinking, is that the development of hydro in a particular area by the Federal government leads to these other ramifications as you have just explained them?

A. That is correct.

Q. Speaking of adverse changes in the policy of regulatory authorities, will you explain, please, or amplify your remarks in this connection?

A. Yes. As I just mentioned a few moments ago, in all the situations where we are operating it has been our policy to cooperate with the Commission in endeavoring to follow rate policies which are fair both to the consumer and to the investor, and by following such a procedure we have been able to get along without the necessity of litigation, and we have gotten fair results for the investors, and we have had fair rates for the consumers. There is a move on the part of some regulatory exponents to apply harsh standards of regulation that would be a severe burden on our properties and on the industry generally if they were universally adopted, and I have in mind particularly in that, reference to the adoption of straight line depreciation retroactively.

Q. Well, can you foresee any adverse changes in the policy of regulation in the next five years?

A. Well, I can see a trend to it in certain quarters. Now, how far it is going I don't know. As I said earlier, I don't attempt to be a prophet and don't care to put myself in the position of attempting to be one.

Q. I gather from your testimony with respect to nuclear energy as a factor which might affect future price levels that it is impossible for you to make any prediction at this time?

A. That is correct.

Q. You testified that "the adverse factors which I have just referred to"—I take it you are speaking of the five factors you have just spoken about—"are common to the utility industry generally and are no more imminent in the area served by our subsidiaries than they are generally throughout the country, so that present price levels of securities do reflect the extent to which the investing public is presently appraising these hazards, but to say that these prices reflect reasonably foreseeable future values is obviously not correct, as only the future can disclose what these latter values may be."

D. C. Barnes—Cross Examination (Cont'd)

Will you admit, Mr. Barnes, that to the extent that these factors which you have discussed and which we have discussed again, are foreseeable, that the present market does reflect and weigh them accordingly?

A. Yes, I think it does.

[R. p. 618] By Mr. Kanton:

Q. Mr. Barnes, in the considerations that the Board of Directors and you as a member of the Board of Directors discussed before the filing of this plan, was it your general opinion that liquidation of Engineers was the only practical method that you knew of to carry out the objectives of Section 11?

A. Yes, I think it was.

Q. Could it be done in other ways?

A. Yes, we could have sold the securities of Gulf States and El Paso and continued to hold Virginia.

Q. You also could have merged or consolidated Engineers and Virginia or sold any of the assets or distributed any of the assets in other different ways than as proposed herein?

A. Having first sold Gulf and El Paso, we could have merged Virginia and Engineers as an alternative method.

Q. Why did the Board of Directors think that the machinery of liquidation should be availed of if there are other practical ways of carrying out the objectives of Section 11?

A. Well, if your first question related to carrying out the objectives of Section 11, I want to change my answer in which I said that Engineers could have been continued as a holding company over Virginia alone because I do not think that would have carried out the objectives.

Q. You mean it is your belief that under the Holding Company Act, Engineers could not be continued in existence as a holding company over Virginia alone?

A. If it were, I do not think it would be carrying out the objectives of Section 11. In other words, I think that would be an unnecessary complication of corporate structure because it would serve no useful purpose and would merely burden the investors with the expense and cost of maintaining an extra corporation without any compensating benefit.

Q. I do not think you quite got the intent of my question. Let me try it again. Why did the Board of Directors think that the use of the machinery of liquidation should be availed of if, as you have just testified, there are other practical ways of carrying out the objectives of Section 11 which as you put it, and which we know, is to get rid of Gulf States and El Paso?

A. Well, I am not sure that I understand the purport of your question. It seems to me that the disposition of the properties that we are required to divest ourselves of under Section 11 constitutes a liquidation. You might sell the properties to some new security holders but it seems to me, in my lay mind, that would be a sale in partial liquidation of the holding company business, so I do not see how you are going to conform to Section 11 without following the procedure of liquidation.

Q. Liquidation to your mind meaning whether you sell the assets, distribute the assets or merge the company—it means to you under the objectives of Section 11 that you were, in effect, liquidating the company?

A. That is correct.

Q. Did the Board of Directors, including yourself, think that the liquidation preference of the Engineers preferred stock furnished the overriding standard for the treatment of the preferred stockholders in this proceeding?

A. I think the directors recognized that what you refer to as the liquidating preference is the contract right under the charter. I think the Board of Directors figured that that should be considered in the light of what was fair and equitable.

D. C. Barnes—Cross Examination (Cont'd)

Q. And you gave, as I understand from Mr. Benjamin's testimony and from hearing the opinion of Mr. Tucker, the main weight to that consideration, the liquidation preference as providing the fair and equitable treatment of the preferred stock?

A. I think after weighing what was fair and equitable, the directors were all convinced that it was fair and equitable to the preferred stockholders to receive the involuntary redemption price.

Q. As provided in the charter?

A. As provided in the charter.

Q. Isn't it true, Mr. Barnes, when you speak of a proposed dissolution and liquidation of Engineers as being an involuntary liquidation, this is in your own mind as a layman—don't you have in mind the Federal bankruptcy laws of Chapter Ten of the Bankruptcy Act or any financial failure of the company?

A. No, I do not in my own mind analyze it in that regard. In my mind it seems to me that had the draftsmen of the charter had that solely in mind, they would have so stated in drafting the charter. They made the charter broader than that so it would cover any involuntary liquidation of the property whether from bankruptcy, receivership or from any other cause, and what carried weight in my mind was, what I think, the Chief Justice said in the Otis case—he pointed out that the language should not be restricted or that the application of the charter should not be restricted merely because the Public Utility Holding Company Act had not been passed at the time the charter was drawn, that is was, in effect—he did not use this language but I am paraphrasing it—like an insurance company saying that they could not pay death benefits to a person who was killed by an atomic bomb because they did not know there was an atomic bomb at the time they wrote the policy.

Q. Wasn't the Chief Justice's decision in the Otis case a minority opinion?

D. C. Barnes—Cross Examination (Cont'd)

A. His was a minority opinion but there is nothing to show that the rest of the court did not follow him on that particular point.

Q. Then it is your opinion, as I understand it, and the opinion of the Board of Directors, that this is a possible situation which the parties had in mind when they entered into this charter and formed Engineers?

A. I cannot speak for the rest of the directors but I feel very strongly that the people who drew the charter of Engineers did not intend to limit it solely to a bankruptcy or a receivership proceeding.

Q. In other words, you feel that the use of the language "liquidation", voluntary or involuntary notwithstanding, does not have in mind only Federal bankruptcy or financial failure of a company, that perhaps something else may arise; is that correct?

A. Yes, I think in my mind liquidation means disposal of the assets and it can be done either voluntarily, in which case if the common stockholders elect to do it, they should pay a premium to the preferred stockholders. If it is done involuntarily, without their desire, then, in my opinion, the people who drew the charter intended that the preferred stockholders should only receive $100 a share.

Q. The Holding Company Act did not take away the right, as you understand it, from the common stockholders to voluntarily liquidate this company, did it?

A. Not in the least.

Q. And that if the common stockholders of Engineers today wanted to voluntarily liquidate Engineers, they could?

A. Certainly they could.

Q. Then do you consider Section 11 a situation where the company is in financial difficulty in the ordinary sense?

A. Not in the least.

Q. And you do not consider Engineers to be in financial difficulties at the present time?

A. Well, not in the way of financial difficulties as ordinarily expressed. In other words, they are not embarrassed to pay their debts. They are suffering financial reverses as a result of the impact of the Holding Company Act.

Q. I would like to read to you a statement made by counsel for Engineers, Mr. Tucker, at the time he argued the Western Public Service Company case before this Commission. I am referring to Page 10 specifically of his oral argument, the second paragraph thereon, and I quote: "Section 11 is not a situation where the company is in financial difficulty in the ordinary case and it certainly would be so in our case because we have no bonds, we have no bank debts. We just have preferred stock. It is an arbitrarily and forced statutory determination of the enterprise and it has no relation whatsoever to any factors which the parties could have had in mind when they entered the enterprise."

Also, just previous to that statement by Mr. Tucker, he made another statement and I quote: "When you act under the bankruptcy laws of Chapter Ten on account of the financial failure, the stockholders must have been deemed to have had the financial failure of their organization in mind when they acquired their investment."

This information that I am reading is contained in Commission's Docket No. 70-453-1-2, which is the first duplicate copy. I may state for the record that I tried to find the original docket but I could not. Therefore, I used this first duplicate copy.

In the light of the remarks of Mr. Tucker which I just read to you, do you still think that this is a situation that the parties had in mind when they entered into the charter and formed Engineers, and also——

A. May I answer that first?

Q. Yes, sir.

A. I do not think they had the Holding Company Act specifically in mind when they framed the charter but I do think they had in mind that the involuntary liquidation

provision should apply in a case of involuntary liquidation, whether by bankruptcy or otherwise.

Q. What about his statement, "When you act under the bankruptcy laws of Chapter Ten, the stockholders must be deemed to have had the financial failure of their organization in mind when they acquired their investment"?

A. I do not know what that means.

Q. Referring now to Amendment No. 4, Paragraph 9, Part One of Division C, the paragraph beginning that "Within sixty days after Part One of the plan becomes effective . . . Engineers shall, without further action by the directors or stockholders of the Engineers", take certain steps to provide for the dissolution of Engineers. Can you tell me what rule or provision of law the Board of Directors had in mind when you set up the four steps specified under this Paragraph 9 for dissolution of Engineers?

A. I think they relied on the legal knowledge of their counsel, Mr. Tucker.

Q. And they adopted his recommendation to that effect?

A. I think so.

Q. Did Mr. Tucker advise you whether he was relying to any extent upon Section 39 of the Delaware Corporation Law?

A. It is my understanding that Mr. Tucker was following the procedure that we followed in the case of Puget Sound Power and Light Company where we had a Section 11-E plan approved by the Securities and Exchange Commission and the company took certain corporate action in Massachusetts in accordance with the order of the court.

Q. In other words, the plan as now set forth does not provide for any stockholder's vote for either the dissolution of Engineers or the naming of a board of trustees to carry out the proposed liquidation after the dissolution?

A. That is correct.

Q. What is meant in the plan and in the statement which follows in Paragraph 9 where it is stated that in the liquidation of the debts and obligations of Engineers from the

estate of Engineers, it shall only be "other than the shares of the common stock of VEPCO"?

A. Well, I think the purpose of that is to impose on the trustee the burden of liquidating the debts and obligations of Engineers out of the income derived from the common stock of Virginia Electric and Power Company, so far as they could do it, to the extent that in final liquidation the largest number possible of shares of Virginia Electric Power Company common stock should be distributed to the Engineers common stockholders.

Q. In other words, does this foreclose the trustees from selling any common stock of VEPCO?

A. Not at all. It just says, to the extent possible to liquidate the debts; that is, other than the shares. If it is not possible to liquidate debts and obligations without disposition of the stock of Virginia Electric Power Company, presumably they would be required to do so.

Q. Is it the purpose of this provision to say, in effect, to the trustees, "You have a three-year period within which to liquidate Engineers. During that period, try to generate enough cash from Virginia in order to pay off all the obligations of Engineers and by so doing, at the end of the three-year period, liquidate Engineers and turn the Virginia common stock over to the present common stockholders of Engineers"?

A. As far as it can be done.

Q. Of course, does this foreclose the trustees from ever selling any of the common stock of Virginia during this three-year period?

A. It does not foreclose them if it is necessary to do that in order to liquidate the debts and obligations, provided it could not have been done from some other source.

Q. Meaning Virginia?

A. Meaning Virginia.

Q. In other words, it is just a warning to the trustees?

A. I think it is a direction of how to conduct the trust. The purpose of the statement in here is to direct the trus-

tees in the operation of this trust to apply the income of the trust as far as possible to the payment of debts and obligations of the trust.

Q. And this was adopted by the Board of Directors?

A. That is correct.

Q. Except, of course, Mr. Streeter who objected?

A. Mr. Streeter did not vote because he had not been in receipt of a draft of the proposed amendment in sufficient time to give the matter consideration.

Q. But the six other directors who perhaps will all be trustees, with the except of Mr. Hanlon, all voted for this provision?

A. That is right.

Q. Correct me if I am mistaken, Mr. Barnes, but it appears from the testimony given and the exhibits placed in evidence in this proceeding, that Engineers is apparently giving lip service to the proposal of selling its Virginia common stock for the use of any payment to be made to its preferred stockholders and instead is just attempting to keep the corporate entity of Engineers going in one form or another in order to permit VEPCO to generate sufficient cash to meet any of these payments so that if the final liquidation of Engineers occurs as proposed several years after the consummation of Parts One and Two of the plan, the Virginia common stock will be distributed to the Engineers common stockholders just as it is today.

A. I do not know what you mean by giving lip service. There is no attempt to give lip service to anything. This is a straightforward, honest plan designed to meet the requirements of Section 11. It is also designed, as far as possible, to protect the interests of all classes of the stockholders, preferred as well as common, to do what the directors thought was fair for the preferred stockholders. They thought that it was in the interest of the common stockholders to conserve the trust as far as possible and to see that they got continuance of their interest in the subsidiary companies, and this is part of that same program.

D. C. Barnes—Cross Examination (Cont'd)

Q. The overriding idea that I had in mind here was then, as we discussed it before, is to keep Virginia intact as it is today?

A. As far as it can be done.

Q. And get cash some place else?

A. And get cash from the earnings of Virginia.

Q. But if it becomes necessary to sell any of the common stock of Virginia in order to liquidate Engineers finally, it will be done?

A. That is correct.

Q. Why was the statement placed in the plan—and I am paraphrasing—that upon the dissolution of Engineers, no common stockholders of Engineers shall have any right to require any different method of liquidation than the one which would attempt to distribute as many of VEPCO common shares as possible to the Engineers common stockholders? What is the purpose of that provision?

A. I think that was largely designed to prevent strike suits.

Q. You mean individual or small groups of stockholders trying to tell the trustees to sell. Well, under the formula that this is set up, stockholders cannot be in a position to advise the trustees or make the trustees sell any of the VEPCO common stock if the Commission approved the plan as now filed.

A. That is correct. The common stockholders' recourse, as I understand it, ceases when the plan becomes effective, when the dissolution certificate has been filed. Then it becomes the responsibility of the trustees.

Q. In other words, the only reason that this was included was in order to prevent, as you put it, strike suits?

A. I would like to check with Mr. Tucker on that. He is fully qualified to answer that.

Mr. Tucker: Well, the ordinary liquidation—if a stockholder wants to insist on it—is one where the liquidation is in cash and he gets cash money. That was one thing that we did not want to happen in this situation. To the ex-

tent possible, as Mr. Barnes has explained, we wanted to distribute the common stock of Virginia Electric Power Company to the common stockholders of Engineers. Now, we wanted to preclude any stockholder coming in and insisting on the sale and the distribution of the cash, and this was an attempt to do that.

* * * * *

[R. p. 635] Mr. Kanton: At this time, I would like to offer in evidence certain releases which I think have some bearing upon the proceeding here and to which specific references have been made by counsel and myself during the time that this proceeding has been in progress.

I would now like to introduce into evidence as Commission's Exhibit No. 3, the Holding Company Act Release No. 1453 which is contained in the volume numbered Four-SEC-619. I attempted to get a copy of this release from the Publications Division but they say none is available, so I would like to incorprate by reference, if counsel will concur, this opinion which is contained in the Commission's Volume 4, Page 615.

The Examiner: Is there any objection?

Mr. Tucker: Well, I would like to examine them to see what it is all about. (Book handed to counsel) What is the purpose of the offer? What do you expect it to show?

Mr. Kanton: It is serving the same purpose in bringing the record up to date, to show how many shares of preferred stock of Engineers have been acquired and the opinions of the Commission in either granting the re-acquisition of preferred shares or turning it down.

Mr. Tucker: Well, I have no objection.

The Examiner: I understand there is no objection. That it will be incorporated in the record by reference as Commission's Exhibit No. 3.

(Commission's Exhibit No. 3 is incorporated by reference.)

Mr. Kanton: I would now like to offer as Commission's Exhibit No. 4, Holding Company Act Release 2699 issued

under date of April 16, 1941 by this Commission, permitting Engineers to reacquire and retire no more than 5,000 shares of its preferred stock.

Mr, Tucker: May I see that? (Paper handed to counsel.) I have no objection.

Mr. Condon: No objection.

The Examiner: That will be received in the record as Commission's Exhibit No. 4.

(Commission's Exhibit No. 4 is received in evidence.)

Mr. Kanton: I now would like to offer in evidence as Commission's Exhibit No. 5, Holding Company Act Release No. 4114, dated February 15, 1943 by the Commission, wherein the Commission held that the reacquisition of the preferred stocks at that time would not conform to the fair and equitable standards of Section 11 and that they were, therefore, prohibited.

Mr. Condon: Is that the 35,000 shares with respect to the Western application?

Mr. Kanton: That is correct.

Mr. Tucker: No objection.

The Examiner: That will be received in the record as Commission's Exhibit No. 5.

[Note: H. C. A. Rel. No. 4114 is reported at 12 S. E. C. 804 (1943).]

(Commission's Exhibit No. 5 is received in evidence.)

Mr. Kanton: I now offer in evidence as Commission's Exhibit No. 6, the release bearing the number 4997, issued by the Commission on April 14, 1944 and permitting Engineers to reacquire on the open market preferred stock not in excess of $4,000,000.

The Examiner: Any objection?

Mr. Tucker: No objection.

The Examiner: It will be received in the record as Commission's Exhibit No. 6.

(Commission's Exhibit No. 6 is received in evidence.)

* * * * *

Hearing on January 4, 1946.

RICHARD N. BENJAMIN,

resumed the stand and testified further as follows:

Cross Examination

* * * * *

[R. p. 681] By Mr. Condon:

Q. Mr. Benjamin, I have before me and hand you your Exhibit Number or Applicant's Exhibit No. 31, which is a letter to stockholders by Engineers Public Service, dated September 10, 1945, and I direct your attention to this sentence:

> "Further consideration and discussion with personnel of the staff and the Commission of that liquidating holding company plan led to the conclusion by the directors that such a plan would not be likely to receive the approval of the Commission under the conditions existing in the Engineers System."

and I ask you to examine that and see if I have read it correctly?

A. Yes, you have read it correctly.

Q. Now, is it not a fact that your company considered a number of different plans and proposals with respect to the provisions of the Public Utility Holding Company Act of 1935, commencing, let us say, in or about 1939 or 1940 and continuing down until the time the plan was filed in the instant case?

A. I think that is true, except that I don't recall any prior to 1941.

Q. 1941. I accept your amendment. Now, is it not the fact that the decisions with respect to all of those proposals as to whether to proceed with the filing of plans or not to proceed with them were vested in the sound, independent decision of your Board?

A. That is correct.

Q. There would have been nothing to have prevented the Engineers' Board from filing a three-holding-company plan and asking the Commission to set a hearing, if it so chose?

A. That is correct. My understanding is that any company can file a Plan under Section 11(e) if it so desires.

Q. And would your answer be the same with respect to the other considerations for disposing of proposals that faced Engineers between 1941 and 1945 with respect to the freedom and liberty of action on the part of your Board?

A. That is correct.

Q. Now, commencing with 1941, would you state in a general way whether or not there was any basic principle that guided the acts and the decisions of the Board of Engineers as to the method of treatment of the preferred stock?

A. To the best of my knowledge, every Plan that was considered by the Board of Directors of Engineers for full compliance with the Holding Company Act contemplated the payment to the preferred stockholders of $100 per share, plus accrued dividends.

Q. Never anything more?

A. Not to the best of my recollection.

Q. Is it fair to state that the dominant principle that guided the Board in its decisions with respect to its several plans—and I do not mean formal plans, but considerations of plans—was to preserve for the common stockholders the equities in the going concerns that would be left if, as and when it became necessary to dispose of Engineers?

A. Would you read that question, please?

(The question was read by the reporter.)

THE WITNESS: I think that is correct.

By Mr. Condon:

Q. Do you recall your testimony that there were four different ways that this preferred stock problem might have been treated? I do not wish to refer you to the detail, Mr. Benjamin?

A. I do recall.

Q. Just the substance of it?

A. I do recall it.

Q. Now, did you mean to suggest that those were the only four ways that occurred to the Engineers' Board or to the management to deal with this problem of the preferred stock?

A. No, I think there were other ways that might be used. I did not mention here the three-holding-company plan, for example.

Q. Would you state now for the record what additional ways occurred to you as to what treatment might be accorded to the preferred stock in connection with your Plan, other than those you have already mentioned?

A. When you speak of what treatment might be accorded the preferred stock, I do not quite understand your question, Mr. Condon.

Q. Are you unfamiliar with that term, the treatment to be accorded the preferred stock?

A. I did not mean that, but I was not clear as to your question. I hate to ask to have it read again.

Mr. Condon: Yes, please read it.

The Examiner: Will you read the question back to Mr. Benjamin?

(The question was read by the reporter.)

"Q. Would you state now for the record what additional ways occurred to you as to what treatment might be accorded to the preferred stock in connection with your Plan, other than those you have already mentioned?")

By Mr. Condon:

Q. By way of illustration, if this will assist you, Mr. Benjamin, did you give any consideration to a one-stock Plan? Did you give any consideration to a package plan?

A. Both those plans were mentioned.

Q. All right. Now, would you continue? Tell us what additional ways or methods might have been employed by

the Board to take care of the preferred stock, other than the ones reflected in the present plan filed in September?

A. Well, another possible plan would be the so-called Preference-Common Plan, similar to the Philadelphia Electric Plan.

Q. Yes.

A. That was adopted by this Commission. Commonwealth & Southern has recently proposed a plan whereby the stocks would be put up in trust for a period of five years, and the common stockholders given the right to take down their pro rata portion of the underlying securities upon payment of the preferred stock, I believe. I am not too familiar with the terms of that plan, but——

Q. That is near enough for identification purposes. Can you think of any others?

A. That is all I can think of now, Mr. Condon.

Q. Yes. Now, will you state for the record what one or more of those proposals were given consideration by the Engineers' Board, and state when that was done?

A. (No answer).

Q. Let us take them one at a time. Did the Board of Directors ever consider a one-stock plan?

A. I do not recollect that any formal presentation of a one-stock plan was made to the Engineers' Board or discussed by them on that basis. I believe that the general subject of one-stock plan has been discussed from time to time, but I cannot give you any definite dates or statements concerning that.

Q. Yes. Now, have you had occasion to review the minutes of the Board of Directors of the Engineers Company since 1941 on, recently, Mr. Benjamin?

A. Yes. I went through the minutes from 1941 on.

Q. Yes. Were you kind enough to send me over copies of those?

A. Yes.

Q. Is it your best recollection that there is any reference to a one-stock plan in any of those minutes?

A. I don't recall seeing any reference to a one-stock plan in the minutes itself.

Q. No. Let us talk about the package plan. When, if at all, did the Board consider a package plan for the preferred stock,—and I ask you whether or not there is any reference to that in the minutes of the Board of Directors from 1941 to date?

A. No, I don't believe there was any reference to a package plan in the minutes of the Board of Directors of Engineers during that period.

Q. Now, other than the Plan that was filed, do you know whether it was considered by the Board?

A. Well, I think it was discussed in a general way with the Board from time to time, as one of the means which companies had been using for a compliance with the Act, but I don't believe there was any particular plan ever proposed.

Q. Do you have any independent recollection, Mr. Benjamin, as to when and under what circumstances the package plan was discussed with the Board or at a Board meeting?

A. No, not other than what I have just stated; I don't have any idea as to dates, or——

Q. Could you fix the year? Was it done in 1945 or 1944 or 1943?

A. Well, I think that when these other plans were discussed, there was some general discussion about other ways that it could be done, and at the moment the particular plan that was being considered was the one that appeared to be the best one from the point of view of the directors.

Q. You mean the Plan as filed?

A. The Plan as filed, and the previous plans that had been discussed with the Directors, such as the Three-holding-company Plan and the Preference Common Plan, and things of that sort.

Q. Now, was the Three-holding-Company Plan discussed with the Directors?

A. Yes, that was discussed with the Directors.

Q. Can you distinguish that in your own mind, between that Plan and, say, the Package Plan?

A. Yes, I think there is a distinction.

Q. In other words, from the standpoint of the degree of interest and consideration by the Board?

A. Well, I think the Three-Holding-Company Plan was the one that the Board thought was the best plan to follow, and therefore that was the one that was considered at that time.

Q. Most carefully?

A. Well, I would not say most carefully. I think the other plans were considered, but the Board felt, I gather from statements I heard made there, that they thought the Three-Holding-Company Plan was the best plan to follow.

Q. Now, did you keep the minutes of these meetings, Mr. Benjamin?

A. Yes, I did.

Q. Was it the custom and practice for you to omit discussions about plans from the minutes of the meetings of the Board?

A. Well, I did not record all of the discussions made at these meetings, because they were general in character, and I put down, to the best of my ability, the specific data, when the specific data was presented, but did not always do that. In other words, sometimes Mr. Barnes would have a statement of general interest that he would discuss with the Board, and I would not make any particular record of that statement.

Q. What data was mentioned to the Board with respect to the Package Plan, Mr. Benjamin?

A. Well, I don't believe any formal plan or any formal draft of a plan was presented with respect to the Package Plan. I think that the feeling was that both the Package Plan and the One-Stock Plan involved a determination of values in the future which was very difficult to establish with any degree of certainty, and that the Three-Holding-

Company Plan, for example, avoided the need of that, because the preferred stockholders would get the amount to which they were entitled, in the opinion of the Board, as I understood it from conversations, namely, the involuntary liquidating price.

In other words, they would be paid off in cash, and there would be no need of taking the uncertainties of the future into consideration.

Q. Mr. Benjamin, is it not a fact that another concept which the majority of your Board had was to resolve all the uncertainties as to future earnings and prospects in favor of the common stockholders, and to restrict the preferred to $100 and accrued dividends?

A. Will you read that, please?

(The question was read by the reporter.)

The Witness: Well, it seems to me that the purpose of the Board was to see that the preferred stockholders received the amount to which the Board thought they were entitled, and that they felt that, for example, no dividends would be paid in on the common stock, and that all of the equity behind the preferred stock would be kept there until this commitment to the preferred stockholders had been met.

By Mr. Condon:

Q. I believe, with respect to that, you testified in response to one of Mr. Kanton's questions, that the principal objective, aside from the tax technique, implicit in the retention of dividends, was to provide a fund to pay off the preferred stock. Is that clear in your mind?

A. I think that was the—I don't recall that I testified to that but in any event I think that one of the principal purposes in retaining the cash in Engineers was to provide funds to pay off the preferred stock.

Q. Yes. Now, coming back to this consideration that you say the One-Stock Plan and Package Plan had, you said that the Board felt that they wanted to provide for what they felt the preferred was entitled to receive, some such

language as that. I am not quoting your precise words—is that the substance of your testimony?

A. Yes, I think so.

Q. Yes. Now, will you state for the record just what was before the Board of Directors in the way of financial data, statistical reports, studies, analyses, surveys and any other material of like tenor, and effect, upon which the Board acted in reaching the conclusion as to just what it was that the preferred was entitled to get?

A. Well, I think that prior to the time we filed our El Paso (Delaware) application with the Commission, that——

Q. That was in 1944?

A. In 1944—that everyone had in mind, as far as I know, that the amount to which the preferred stockholders were entitled was $100 a share in case of an involuntary liquidation.

Q. That was just because of the provisions of the Charter; is that right?

A. The Charter provisions, and also the cases that had come before the Commission here. It was not until there was a dissenting opinion in the El Paso (Delaware) case that this question was raised.

Q. That is, Commissioner McConnaughey's dissent?

A. That is correct.

Q. Do you recall the date of that opinion or the time of its approximate release, Mr. Benjamin?

A. Well, it was in late 1944.

Q. It was the latter part of 1944?

A. That is right.

Q. Yes.

A. And the Board of Directors was advised of this dissenting opinion, and then, to the best of my recollection, none of the directors raised the question about any additional amount being payable until the May, 1945 meeting, when Mr. Streeter raised the question.

Q. Mr. Benjamin, I do not wish to interrupt you, but my question related to the data and statistical reports,

analyses, surveys, studies, and data of that type that the Board had before it in deciding on the question as to the amount to which the preferred was in its judgment entitled.

I do not wish to stop you. If you feel that you wish to continue, I do not want to preclude you, but I think if you can focus your answer more directly on the question, it might help.

A. Well, I was giving a little of the background, and your question relates to the data presented to the directors on the basis of which they arrived at this decision and——

Q. The decision in September and also prior decisions, if there were any?

A. That is what I thought you referred to.

Q. Yes.

A. The prior decisions under the Three-Holding Company Plan and the various plans that had been presented, all of which had this same factor in there, and the reason I gave that background was to bring out that there was a feeling on the part of everyone on the Board, I believe, that the preferred stockholders were entitled to receive their contract obligations.

Q. As they were advised?

A. As they were advised, and they—after the dissenting opinion of Commissioner McConnaughey and after the Otis case, which was brought to their attention, then statements were presented to show what the management felt had a bearing on the fairness of living up to the contract provisions, and the only statements that I recall that were presented to the Board were the statements showing the amount of dividends, amount of earnings which had been left in the operating properties, the sales by the company of various properties since the Holding Company Act was passed, the financial statements that were included in the plan itself, as originally filed.

Q. Anything else?

A. I am just trying to think. (Referring to papers.) There was considerable discussion, I recall, of the present

market prices of both the preferred stock and the common stock. Mr. Tucker's opinion, which was a most important consideration, I believe, in the Directors' decision—of course, I don't know what their motives and thoughts were, but this opinion, as you know, was presented to the Board, and in it Mr. Tucker pointed out some of the reasons which led him to the conclusion that it was fair and equitable to pay $100 and accrued dividends and no more, and among those considerations was the contract, and it was that the liquidation of Engineers was an involuntary liquidation, and that to pay the premiums would be to throw the entire burden arising from the Act on the common stockholders, and that the circumstances under which the preferred stock was issued, and its course in the market since its issuance, lead to the conclusion that the preferred stockholders would be fairly treated if they received $100 per share.

In connection with that he mentioned some of the history of the preferred stock, with which, I believe, all the directors were familiar of their own knowledge.

He also referred to this dividend statement and the fact that Engineers' common stock has not received any dividends since 1932.

Q. Those are all the statements you recall?

A. Those are all the statements I recall at the moment, Mr. Condon.

Q. Mr. Benjamin, have you fully and fairly stated, to the best of your knowledge, information and belief, each and all of the data and material that was before the Board of Directors of Engineers at the time it made its decision in or about September of 1945, to pay the preferred stockholders $100 plus dividends accrued, as set forth in the Plan?

A. That is all, to the best of my knowledge, information and belief,—yes; yes, sir.

Q. Mr. Benjamin, does it not impress you that this was rather a one-sided consideration, and that each and every one of these points that you have mentioned were argu-

ments as to why the common stock should receive all the benefits and the preferred get none?

A. No, sir; it does not impress me that way.

Q. It did not then and it does not now?

A. What you are asking me is whether the consideration given by the Board of Directors was taking into consideration only the interests of the common stockholders?

Q. Yes.

A. No, sir, I think that is not true.

Q. Mr. Benjamin, is not the contention that amounts were left in Engineers and not paid out in dividends a reason why the common should be favored?

A. Read that.

(The question was read by the reporter.)

By Mr. Condon:

Q. According to your concept of this.

A. I don't know that I understand that, Mr. Condon. Let me see if I can try to answer it. The leaving of the funds in the operating company and in the holding company, I think, increased the equity behind the preferred stock and increased the possibility—probability—that they would receive the amount to which they were entitled.

Q. Yes. Now, was that the exhibit that you prepared, and which was submitted here in evidence with respect to the total amounts of moneys left in the companies, the operating companies, and in Engineers before the Board at the time of the plan?

A. I think that statement was presented to the Board by Mr. Barnes in substantially that form, Mr. Condon, and not brought down quite as far. An earlier draft of that same statement, I think, was presented to the Board. Mr. Tucker referred to a figure of $22,000,000 in his opinion, and I think that the difference between the $22,000,000 and the amount shown in this exhibit is due to the lapse of time between the preparation of the two exhibits.

Mr. Scheetz: Mr. Condon, could we have that exhibit identified? I believe it is Exhibit 30.

Mr. Condon: 30.

By Mr. Condon:

Q. Now, when is your best recollection as to when the prior draft of Exhibit 30 was submitted to the Board, at what meeting?

A. I think that statement was presented at the May 24, 1945 meeting, and the figures were brought down through March, 1945.

Q. Is that the meeting at which Mr. Streeter voiced his first formal dissent to the proposal to limit the preferred to $100?

A. Yes, I think that is correct.

Q. That is the meeting referred to by Mr. Barnes in his testimony yesterday?

A. Yes.

Q. Now, was there any exhibit submitted to the Board at or about that time or prior or subsequent thereto about the total amount of property sold by the Company since the Holding Company Act became effective?

A. I think that statement was presented at the same——

Q. At the same meeting?

A. At the same meeting.

Q. Were the financial statements presented at that late meeting?

A. The financial statements included in the plan, you mean?

Q. Or drafts, or something of that sort?

A. (No answer).

Q. When I say "at that meeting," Mr. Benjamin, I am not restricting you to the May meeting—either prior or subsequent thereto is what I am concerned about.

A. I don't believe that the financial statments were presented at the May meeting. There were presented at that meeting copies of two possible plans. One was the so-called

Preferenee Common Plan and the other was the Warrant Plan. I don't believe those statements were presented at that time. There was a draft of the Plan presented to the Board at the July meeting, and I don't know whether the financial statements were in that plan or not.

Q. Is it not your best recollection that they were not?

A. Well, they certainly were not presented in the form as finally filed, because Exhibit B for example, refers to an adjustment made on the books of Virginia in August. I cannot recollect whether they were presented in draft form or not.

Q. Now, is it the fact that whether or not they were presented at the July meeting or the September meeting, the financial statements annexed to the Plan were the only statements that were submitted of a financial character, the statements submitted to the Board were the only statements of a financial character that you can recall, as having been considered by the Board in fixing what the Board felt the preferred was entitled to get?

A. Well, you say, are those the only financial statements that were presented to the Board. I would like to point out that at every meeting of the Board the customary procedure is to present fairly detailed financial statements covering the operations of the Engineers' System, including the so-called White report and other data, bringing the financial information of the company up to date. I mean, that is one of their regular duties, and I think the directors keep advised of the financial situation of the Company and its subsidiaries. Other than that I don't recall any other financial statements being presented.

Q. Now, coming to Mr. Tucker's opinion, Mr. Benjamin, you said that you were impressed that that was the most important consideration, as far as you could read the minds of the directors. I know you cannot speak for them, but is that a fair statement of your understanding?

A. It seemed to me, from listening to the discussions at the various meetings, and particularly those at the July

26 and September 5 meetings, that the directors placed—the directors who voted in favor of the plan—placed great weight on Mr. Tucker's opinion, and in the statements made by Mr. Tucker in his opinion, I know——

Q. The statements, or his conclusions?

A. Well, I think that they were relying on the advice of their counsel and Mr. Leighton, for example, if I remember, stated that he considered the directors should rely on the opinion of its counsel, Mr. Tucker. Some of the other directors stated that they agreed with Mr. Tucker's opinion, and Mr. Kellogg stated that the 11(e) Plan seemed to him to be a dissolution of the Company and an involuntary one, and therefore he thought the preferred stockholders were entitled to $100 a share, but all of those statements were in accord with Mr. Tucker's opinion, and I got the impression that they relied quite heavily on Mr. Tucker.

Q. Did you get the impression that Mr. Kellogg was wholeheartedly behind Mr. Tucker's opinion?

A. Well, there were certain aspects of Mr. Tucker's opinion that Mr. Kellogg had raised some question about, but, as I recall it, none of them had to do with the matter of the amount of the payment to the preferred stockholders.

Q. You mean he did not object to the $100, but he objected to other things?

A. In the first instance, I think he objected to the filing of the plan at all at this time.

The Witness: Off the record for a minute.

The Examiner: Off the record.

(Discussion off the record.)

The Examiner: On the record.

Mr. Condon: I would like the record to indicate that the witness was refreshing his recollection from a letter written by Mr. Kellogg to Mr. Barnes, dated July 27, 1945.

The Witness: Subsequent to the July 26th meeting, Mr. Kellogg spoke to Mr. Barnes and stated that the preferred stock matter, in his mind, was as follows:

He stated that he thought the 11(e) plan——

By Mr. Condon:

Q. Excuse me, Mr. Benjamin, for interrupting you. I plan to use that letter. I do not object to your reading from it. I was trying to get you to tell us what Mr. Kellogg said at the meeting of directors before the date of the letter. Now, if that letter fairly represents Mr. Kellogg's position, at the meeting, as you recall it, I have no objection.

A. Well, I do not believe that Mr. Kellogg raised any of these points at the meeting. I think he raised them subsequent to the meeting.

Q. All right.

A. That is my belief.

Mr. Condon: Would you mind letting me mark that letter for identification, because I plan to question Mr. Barnes about it at a subsequent time. May this be marked as Preferred Stockholders' Exhibit 12 for identification?

The Examiner: Preferred Stockholders' Exhibit 12 for identification. That is a letter from Mr. Kellogg to——?

Mr. Condon: Mr. Barnes,—dated July 27, 1945.

(Preferred Stockholders' Exhibit No. 12 is marked for identification.)

Mr. Condon: Off the record.

The Examiner: Off the record.

(Discussion off the record.)

The Examiner: On the record.

By Mr. Condon:

Q. Now, you recall quite clearly the conversations and discussions that took place at those two meetings on the 26th of July and the 5th of September, last summer?

A. I recall certain of them, Mr. Condon. I don't recall all of the discussion there. I will do the best I can to remember them.

Richard N. Benjamin—Cross Examination. (Cont'd)

Q. Now, can you tell us, using your best recollection of your judgment, would you say that very substantial weight was placed by the directors on Mr. Tucker's conclusion that as a matter of contract, according to his interpretation of it, the preferred was only entitled to $100 plus accrued dividends? Was that a substantial consideration or just a trivial and minor one?

A. Well, I certainly would not say it was a trivial or minor one, Mr. Condon. I think that they felt, in the way they expressed themselves, that it was fair to the preferred stockholders to pay what Mr. Tucker had advised them was their contract right, in the light of all the circumstances that were under consideration.

Q. Now, what were those circumstances, Mr. Benjamin? You note Mr. Tucker's opinion, he refers to circumstances and statements that he is going to discuss orally. Do you recall what those circumstances were and what these oral discussions that were not included in the opinion referred to were?

A. Well, I remember Mr. Wilson making the statement that he considered that the business enterprise of Engineers had been frustrated, and that therefore he felt and believed that the money should be returned to the preferred stockholders without the payment of any premium.

Q. All right. Is that a circumstance that was discussed or is that a conclusion that was expressed?

A. I think there was some discussion at that meeting about the business enterprise of Engineers having been terminated or required to be terminated by the Holding Company Act.

Q. Yes. Now, was there any discussion of the circumstance that the common stockholders were going to have ultimately distributed to them the common stocks of the three operating subsidiaries? Was that circumstance considered?

A. Yes.

Q. What was said about that?

A. Mr. Streeter stated that he opposed any plan which proposed retiring the preferred stock at par instead of its call price as, in his opinion, an attempt to retire the preferred stock at par, while the equity in the companies remained with the common stockholders, would not be the involuntary liquidation referred to in the charter of the company, and that such a partial retirement of the outstanding capital stock would, in his opinion, create a windfall for the common stockholders at the expense of the preferred stockholders.

He also stated that even if the partial liquidation of the capital stock were the involuntary—partial retirement of the stock were the involuntary—just a minute now. (Just strike that out.

No,—he also stated that it would be highly inconsistent to rely on the Public Utility Holding Company Act as authority for the action while the Company continues to assert in the Supreme Court that the Act is unconstitutional.

Q. By "authority for the action" you mean the authority of the Board paying $100 to the preferred, is that right, Mr. Benjamin?

A. Well, I think what he meant was that it was inconsistent to file an 11(e) Plan and pay off the preferred stock as an involuntary—result of the involuntary liquidation of the Company, when the Company was claiming that the Holding Company Act was unconstitutional.

Q. Yes. Now, coming back to those circumstances referred to in your testimony, and in Mr. Tucker's opinion, and with further reference to what he said he was going to discuss orally with the Board of Directors, would you elaborate on that? Can you think of any other circumstances that were mentioned?

A. I think I have already referred to Mr. Kellogg's statement that the 11(e) Plan seemed to him to be a dissolution of the Company, and since such dissolution was contrary to the interests of the Company and undertaken solely due to the requirements of law, it seemed to him to be

clearly involuntary, and therefore, as the charter provides, the preferred stockholders are entitled to $100 a share only.

I recall that Mr. Barnes advised the directors of this dividend statement that was heretofore referred to and the sales of the properties, and that Engineers had been required to dispose of many of its properties.

Q. We have covered that, Mr. Benjamin.

A. Yes.

Q. But I am trying to find out what else you remember.

A. Mr. Barnes stated that it was his opinion that inasmuch as this was an involuntary liquidation, and since an agreement had been made with the preferred stockholders at the time the stock was sold to pay them $100 in the event of an involuntary liquidation, that it was fair to pay that amount to the stockholders, and he also stated the——

Q. That is the so-called contract theory?

A. Well, he was describing the contract and he said he thought it was fair to live up to the contract.

Q. Yes. Now, I am trying to get you to come back to the circumstances that were referred to in your testimony and Mr. Tucker's opinion, as to the suggestion that the preferred would be well treated if they got $100. You mentioned a moment or two ago the circumstances under which the preferred stock was issued. Do you recall that testimony?

A. Yes, sir.

Q. Now, is it not a fact that that preferred stock was issued for cash at par or 99½, I think, in the case of one of the series, two at par or 100 and one at 99½?

A. I think that is correct.

Q. That was not the circumstance, was it, that weighed heavily in the minds of the Board in deciding that the preferred was entitled to only 100?

A. Well, I don't remember whether that was mentioned or not, Mr. Condon.

Q. You mentioned in your testimony a few moments ago the circumstances under which the preferred stock was

issued. Now, I am asking you what the circumstances were that were so extraordinary?

A. Well, nothing extraordinary about them, except for the fact that the stock was not sold in excess of $100 a share. In other words, the stockholders paid approximately $100 a share for it.

Q. Actually $100 for two of the series and $99.50 for the third?

A. Yes.

Q. We will keep the record straight on that.

A. Right.

Q. All right. Now, was it your impression that that fact that the preferred did not pay more than par for the stock weighed in the minds of the directors?

A. Well, I think that was a consideration. How important it was, I don't know, Mr. Condon. I remember the statement was made that if the Holding Company Act had been passed the day after the stock had been issued, that the stockholders should be entitled to—the preferred stockholders should expect to get their capital or their investment back and I think that may have been one of the considerations. I am not too clear on that.

Q. You would not be confusing that with part of Judge Healy's opinion in the United Light & Power case, would you?

A. I would not be confusing it with that. I recall reading Judge Healy saying the same thing.

Q. Did he say that before your meeting or afterwards?

The Examiner: Off the record.

(Discussion off the record.)

The Examiner: On the record.

Mr. Condon: What is the last question, Mr. Reporter?

(The pending question was read.)

The Witness: I don't know.

Richard N. Benjamin—Cross Examination (Cont'd).

By Mr. Condon:

Q. Now, did the circumstance that the preferred stock sold below par for a number of years, say from 1932 to from then on, weigh heavily, according to your impression, with the directors in fixing the amount of $100, which they felt the preferred was entitled to?

A. I think that subject was discussed, Mr. Condon. I don't know how heavily it weighed in the minds of the directors.

Q. Do you recall any comments by any of the directors as to the degree of importance, if any, to be given to such a statement or contention?

A. No, I don't recall any.

Q. It made no impression on your mind particularly, is that correct?

A. That is correct.

Q. Now, have you fully and fairly stated for the record everything that you can recall in the way of discussions that took place at the meetings on the 26th of July and the 5th of September, with respect to what the Board had in mind and before it in deciding that the preferred was entitled to the $100?

A. That is all that I recall now, Mr. Condon.

Q. Would it be fair to say that you have reviewed the minutes of the meetings of the Board and your notes from which minutes were prepared, and all other data in aid of refreshing your recollection, and may your answer be viewed in that perspective?

A. I think that is a fair statement.

* * * * *

(Formal matter concerning adjournment for luncheon omitted.)

[R. p. 709] By Mr. Condon:

Q. Mr. Benjamin, shortly before we reconvened this hearing this afternoon, you made a statement to me that

you wished to either correct or amplify an answer to a question that I propounded this morning concerning the considerations for which the several series of preferred stock in Engineers were issued. Would you so do?

A. In response to one of your questions this morning, in which you asked whether or not all of the Engineers preferred stock had been issued for cash, I answered in the affirmative. It is true that some shares of each series were sold for cash. All of the $5 stock and the $6 stock was sold for cash.

Q. At what prices? Is there any correction in price?

A. No, in the case of the $5 stock, it was originally sold to the public at $100 a share. In the case of the $6 stock, it was originally sold to the public at $100 a share. In the case of the $5.50 dividend stock, 130,000 shares were sold to the public at $99.50 per share. There were additional shares issued in exchange for Puget Sound Power & Light Company securities, and they were fixed on the books of Engineers at $99.50 per share. There were 92,364 shares of this stock issued in the first instance, and later on a few additional shares were issued in connection with that exchange, all at $99.50.

Mr. Kanton: Were there not warrants issued with the $5.50 preferred stock?

The Witness: The $5.50 cumulative dividend preferred stock did carry with it warrants for the purchase of common stock.

Mr. Kanton: Which were never exercised?

The Witness: None of those warrants were ever exercised.

By Mr. Condon:

Q. Would you state for the record, if you know, the date of the issuance of that block of, you say, 92,000?

A. They were issued in——

Q. Approximately.

A. 1928.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Does that clarify the record?

A. Yes, sir.

Q. This morning, Mr. Benjamin, at one point you mentioned among the plans that you said had been explored—if I might use that term—or considered was the so-called preferred common plan; do you recall that?

A. The preference common plan, yes, sir.

Q. The preference common plan. Now, would you state briefly when that was considered?

A. For the first time?

Q. Yes. Fix the approximate time of the consideration of that type of treatment for the preferred stock of Engineers.

The Witness: Off the record.

(Discussion off the record.)

The Examiner: On the record.

The Witness: In referring to my file of drafts of plans, I find a draft dated July 8, 1943, which involves the preference common idea.

By Mr. Condon:

Q. Now, would you state what you mean by the preference common idea, very briefly?

A. This type of plan involved the creation in the operating company of preference common and common stock, the preference common to go to the preferred stockholders of Engineers and the common stock to go to the common stockholders of Engineers. Now, that plan was developed in more detail in May, approximately May of 1945.

Q. Now, is it fair to say, Mr. Benjamin, that the effect of a preference common plan is to give the preferred stock of Engineers a right to participate in the continuing enterprise in principle?

A. It gives them a right to participate in a security in the operating company, but the provisions of this preference common plan were that all of the earnings available for the common stock, payable in the way of dividends,

would be applied first to the payment of a fixed rate of dividends on the preference common stock and then to the payment of that preference common stock, with no dividends being payable on the common stock of the operating company.

Q. And by payment to the preferred stock, you mean the voluntary retirement?

A. No. It means payment at the rate of $100 a share.

The Examiner: What were the provisions for the retirement of that preference common stock, if any?

The Witness: The provisions for the retirement of the preference common stock were that they would be retired at the equivalent of $100 per share.

The Examiner: At any time at the option of the company?

The Witness: At any time at the option of the company.

By Mr. Condon:

Q. Is that the 1943 memorandum you are referring to or the spring of 1945 memorandum?

A. I think that both plans contemplated that. I see a reference here in the 1943 memorandum that they were redeemable at par and no dividends on the common until the preference common is retired, through application of excess cash, and I know that was the intent of the 1945 plan, that they would be retired at the par value.

Q. Did both the 1943 and the 1945 plans, as you have outlined them, anticipate an 11(e) proceeding by the company?

A. Yes, they both anticipate that.

Q. Now, in giving us the list of plans that you say had been considered, did you omit to mention what we might call the "partial payment and reduction of par value plan"?

A. Yes. I overlooked—I think your question this morning was what other ways would there be of complying with the section, and I named several additional ways, and I neglected to name one that was considered by the Board of

Richard N. Benjamin—Cross Examination (Cont'd)

Engineers in the early part of 1945. It is really two plans, but substantially the same idea in both plans.

Q. Would you state, if you will, the time of their consideration by the Board and refer me to the meeting?

A. At a meeting held on February 2, 1945, the Board authorized, subject to the consummation of the sale of Savannah Electric & Power Company securities, the use of $7,849,100 of cash of Engineers to make a payment in partial liquidation of $20 per share on all of the shares of preferred stock of this company, with a 20 per cent reduction in the dividend rate, and a $20 reduction in the redemption price and liquidating value of each of such shares and directed the officers to formulate plans in connection therewith.

Mr. Kanton: When was that, Mr. Benjamin, again?

The Witness: February 2, 1945.

By Mr. Condon:

Q. Now, did I understand you to say that one of the facets of that plan was to reduce by $20 the voluntary redemption price to the extent of $20 for each series?

A. That was the suggestion at that time, yes, sir.

Mr. Tucker: Wait a minute. The voluntary redemption: is that what you asked?

The Witness: That is right.

Mr. Condon: That is what Mr. Benjamin testified to and what he stated and I believe to be the fact. Am I wrong?

Mr. Tucker: All right.

Mr. Kanton: Is that the first time that the Board of Directors ever considered using excess cash to make a pro rata down payment on preferred stock?

Mr. Condon: Off the record.

The Examiner: Off the record.

(Discussion off the record.)

The Witness: Well, I recall at the time of the purchase of preferred stock, 35,000 shares, that Judge Healy made

Richard N. Benjamin—Cross Examination (Cont'd)

the suggestion that a pro rata pay-down on the preferred stock be made.

By Mr. Condon:

Q. You do not mean the purchase, the proposed purchase, Mr. Benjamin, of the 35,000 shares?

A. That is correct. Judge Healy mentioned this as one of the possibilities.

Mr. Kanton: Were you present at the——

The Examiner: One minute. Did Mr. Benjamin finish?

The Witness: Yes.

The Examiner: You said Judge Healy considered it. When and where? I do not think his answer gives that.

The Witness: I said that he made that statement in connection with the order that was issued denying Engineers' application to reacquire 35,000 shares of preferred stock.

The Examiner: That is referred to in Commission's Exhibit No. 5, is it?

The Witness: That is correct.

Mr. Kanton: Do you happen to recall, Mr. Benjamin, at the time of the hearing in the Western case just referred to, when Mr. Barnes was asked a question of this nature by Mr. Tucker, which I will give you in a moment, and which is contained on pages 111 and 112 of the official report of those proceedings on March 20, 1942:

"Q. Mr. Barnes, have you given consideration to the possibility of using your excess cash to make a pro rata pay-down of all the preferred stock?

"A. Yes, we have considered this suggestion, but it seems to be an extremely complicated one from a legal point of view. Our lawyers advise that it would involve, first, a partial liquidation and under the law this could not be accomplished without a majority vote of the common stock, and in my opinion such a vote could not be obtained because it is in effect buying in the stock at the rate of $100 a share at a time when the price in the market is much lower.

"Such a partial liquidation, even if voted by the common stockholders would not be at all satisfactory unless it were accompanied by a radical reclassification of the preferred stock so as to reduce proportionately the liquidation value, the redemption price, and the dividend rate.

"Counsel advises that such a reclassification could only be accomplished under the Delaware law by a charter amendment which would be approved by a majority of the preferred stock, which means a majority of the common stock, and here again, in my opinion, such a program would not receive the requisite approval."

Do you recall that, Mr. Benjamin?

The Witness: Yes, sir.

Mr. Kanton: Does that refresh your recollection as to whether any consideration may have been given prior to this time by the Board of Directors to such a proposal?

The Witness: Well, I can not say, Mr. Kanton, whether that was discussed by the Board of Directors or not. I assume that the Board was kept fully advised of the proceedings in this preferred stock case at the meetings because that was the practice of Mr. Barnes, to do so. Other than that, I don't have any further recollection of discussions on that point at the directors' meetings.

Mr. Kanton: But would you not take it from the question and answer which I have just read that there probably was some discussion on that possibility, but it was turned down for the reason stated by Mr. Barnes?

The Witness: I think that is probably correct.

By Mr. Condon:

Q. Coming back to the other methods of treatment or the possible methods of treatment for the preferred, Mr. Benjamin, among others, you referred this morning to the one-stock plan and the package plan. Was there any consideration given to a partial exchange between the preferred of Engineers and the stock of Gulf States and El Paso, and if

that be the fact, would you state when consideration was given to that and what happened to that proposal?

A. Before I answer that question, could I complete the answer to your previous question?

Q. I thought that you had; I am sorry.

A. No, I had not. At this meeting of February 2, 1945, to which I referred, the directors authorized the officers to file an amendment to the application to the Securities and Exchange Commission for permission to purchase shares of the preferred stock of this company at a price not to exceed $100 per share plus accrued dividends, requesting authorization to reduce the price from $100 per share to $80 per share. The reason for that was that with the $20 pay-down the directors wanted to keep the same proportionate top figure on the preferred stock. Then at a meeting held on February 27, 1945, the directors authorized the officers to proceed with the plan to retire shares of preferred stock of this company on a basis of $100 per share and accrued dividends by the use of approximately nine and a half million dollars of cash of this company.

A cash statement showing the effect of the payment and partial liquidation of $20 per share on the outstanding stocks was presented to the meeting. It was stated by the president that he proposed to discuss this matter further with the Commission before filing an application.

That completes the answer to your question about the two plans that were considered in the early part of 1945.

Q. Before renewing my preceding question, historically what happened to the preference common plan? When was that proposal or consideration abandoned? Was that the last, preceding, or the predecessor of the warrant plan which came up in June?

A. Yes, it was the predecessor of the warrant plan.

Q. Now, in the preference common plan the Board still adhered to the maximum of $100?

A. That is correct.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. And when I say "maximum of $100" I mean plus accumulated dividends.

A. Yes.

Mr. Condon: Now, Mr. Reporter, would you be kind enough to read and transpose the question that I asked Mr. Benjamin when he had not completed his answer to the preceding question?

(The question referred to was read, as follows:)

"Q. Coming back to the other methods of treatment or the possible methods of treatment for the preferred, Mr. Benjamin, among others, you referred this morning to the one-stock plan and the package plan. Was there any consideration given to a partial exchange between the preferred of Engineers and the stock of Gulf States and El Paso, and if that be the fact, would you state when consideration was given to that and what happened to that proposal?"

The Witness: I don't recall the presentation to the Board of any plan for the exchange of Engineers preferred stock for Gulf States and El Paso common stock. I do recollect a suggestion made for such a plan, but it is not clear to me whether or not that plan was discussed by the Board itself.

By Mr. Condon:

Q. Would the effect of that suggestion that you say had been made have been to give the preferred stock a participation in the continuing enterprise, if carried out?

A. If the preferred stockholders exchanged their stock for the common stocks of Gulf States or El Paso, or both, they would have continued in the operation of those—participating in the operation of those companies.

Q. Now, you say the suggestion was made, Mr. Benjamin. Would you fix the approximate time, according to your best recollection, as to when that was made?

A. Well, it was made several years ago and——

Q. Could you be more definite?

Mr. Condon: This is off the record.

The Examiner: Off the record.

(Discussion off the record.)

The Examiner: On the record.

The Witness: My best recollection of when that suggestion was first made was that it was made in 1941. Since that time the suggestion has been made again, but no formal plan, to the best of my knowledge, has been presented to the Engineers Board of Directors. The Engineers Board of Directors were aware of the possibility of the exchange plan as well as the one-stock plan, but my impression of their attitude, gathered from my best recollection of their remarks, is that they felt that those plans had features to them that were not as readily determinable as would be the case in the other plans which the Board from time to time did consider and look upon favorably.

Q. And that one feature, Mr. Benjamin, was the leverage for the common stockholders, was it not?

A. I would say that the one feature was that—the certainty of giving the preferred stockholders the amount to which they were entitled or are entitled is the outstanding feature of the three-holding-company plan and the other plans that have been filed since that time. The one-stock plan and the exchange plan require a determination of factors now which may vary considerably in the future.

Q. And the Board wanted to avoid any such calculation?

A. The Board wanted to give the preferred stockholders the amount to which they were entitled, and they thought the clearest way of doing it was the plans that they had favored.

Q. The Board wanted to avoid calculating the effect of the continuing enterprise in so far as the common stockholders were concerned?

A. It was not——

Q. Valuation and so on?

A. It was not my understanding that they were seeking to avoid the responsibility or the work involved or the expense of making such calculations. My understanding

of their feeling is that they felt that such calculations were necessarily uncertain because of the unknown factors which exist in any situation.

Q. At all events, they did not make those calculations?

A. That is correct, Mr. Condon.

Q. Now, do you recollect a proposal that was considered some time in or about June, 1943, of offering to the preferred stockholders of Engineers in exchange, on substantially the following basis: for each share of $6 preferred, two shares of El Paso Natural Gas common, plus $30 in cash; for each share of $5.50 preferred, two shares of El Paso Natural Gas common, plus $25 in cash; and for each share of $5 Engineers preferred, two shares of El Paso Natural Gas and $22 in cash. Do you recollect that?

A. Yes, I do.

Q. Was that considered by your Board?

A. Yes, that was considered and the plan was filed with this Commission in connection with that exchange.

Q. Yes. Now, that, to the extent that it provided the Engineers preferred stockholders with stock in the El Paso Natural Gas Company, gave them a modest stake in a continuing venture, did it not?

A. Yes, it did.

Q. Now, that plan failed of action, did it not, for reasons that you would state for the record?

A. Yes, the plan failed because at the time the exchange date arrived the offer became unattractive to the preferred stockholders on the basis of market quotations at the time.

Q. For the preferred?

A. Yes, sir. There were some 2,000 shares, I believe, of Engineers preferred stock that had been deposited in exchange for the El Paso Natural stock, but in view of the fact that this was unfavorable to the preferred stockholders, the exchange was called off.

Mr. Condon: Yes.

The Examiner: Why was it unfavorable to the preferred stockholders?

Richard N. Benjamin—Cross Examination. (Cont'd)

The Witness: On the basis of existing market prices, they could have done better to have sold their Engineers preferred stock on the market and purchased El Paso Natural Gas on the market.

By Mr. Condon:

Q. Is it the fact, Mr. Benjamin, that the aggregate value of the exchange proposal in each case for each series amounted to less than $100 per share of Engineers preferred?

A. That is my recollection, Mr. Condon.

Q. And that was an element also that the Board considered as being desirable from the standpoint of the common stockholders of Engineers?

A. Well, this was a voluntary exchange offer that a preferred stockholder could take or not as he saw fit. To the extent that the preferred stock was retired through this exchange at less than $100 it benefited the remaining preferred stockholders and, of course, the common stockholders.

Q. This proposal of exchange indicated a willingness on the part of the Board to permit the preferred to have a modest continuing stake in the enterprise, provided it did not cost more than $100; is that a fair statement?

A. I don't believe that an offer would have been made to the preferred stockholders which would have been in excess of $100.

Mr. Kanton: Is it not true, Mr. Benjamin, that during the time this case was considered the market prices ranged from a low of $40 for the $5 preferred stock to a high of $74 for the $6 preferred stock?

The Witness: I don't recall what the market prices were at that time, Mr. Kanton.

Mr. Kanton: I was reading from Footnote 19 of Release No. 4559 in the matter that Mr. Condon is questioning you about with the question about approving the plan as

proposed, which you are discussing at this time, and that Footnote 19 appears on page 8 of Release No. 4559. Do you wish to look at it, Mr. Benjamin?

The Witness: Yes.

(Mr. Kanton hands the witness a paper.)

The Witness: Yes, it appears that that was the range of the market prices of the preferred stock, a low of $40 for the $5 preferred and a high of $74 for the $6 preferred.

Mr. Kanton: If counsel does not mind my interrupting at this time, I think this would be the proper place to offer in evidence as Commission's Exhibit No. 7 this Holding Company Act Release No. 4559.

Mr. Condon: May I see it, Mr. Kanton?

(Mr. Kanton hands Mr. Condon a paper.)

Mr. Condon: No objection.

The Examiner: It will be received as Commission's Exhibit No. 7.

Mr. Scheetz, I assume you have no objection?

Mr. Scheetz: No objection, sir.

(Commission's Exhibit No. 7 is received in evidence.)

By Mr. Condon:

Q. Mr. Benjamin, do you recall any proposals along this same line for exchanging Gulf stock for the preferred of Engineers, and if you do, will you state when those considerations came about and what happened to that method of treatment for the preferred stock of Engineers?

A. I don't recall any specific proposals put up to the Board of Directors of Engineers, Mr. Condon. I think that that method of compliance has been discussed from time to time in the Board, but I don't recall any specific proposal.

Q. Mr. Benjamin, in your testimony here do you suggest that the management—and in that I include Mr. Barnes, yourself, and other officers and employees, as contra-distinguished from directors, even though I know that some overlap—that the management considered a number of

these matters that we have outlined and that they were not presented to the Board.

A. There undoubtedly have been variations of some of the major types of plans that the management has worked on and not presented to the Board because they had not been fully thought out. However, I believe, to the best of my recollection, that every major type of method of compliance has been brought to the attention of the Board and discussed with them. In other words, I know that Mr. Barnes has mentioned plans filed by other companies and methods followed by them, and I am quite sure the Board has been kept fully advised of each general type of plan that has come along.

Q. Could you fix with any degree of definiteness when the Board was advised of the suggestion of having an exchange of Gulf States stock for Engineers preferred, and if so, where it finds reflection in the minutes?

A. I can not point to any reflection in the minutes of reference to that plan, Mr. Condon. As I have stated before, I think the first time that suggestion was made was in 1941, and I don't remember whether that was discussed with the Board at that time, although I assume it was because I know Mr. Barnes has had the policy of keeping the Board fully advised of discussions on this subject.

The Examiner: Was it the general policy to have discussions at the Board—informal discussions, if you please, at the Board meetings, which were not recorded in the minutes of the Board?

The Witness: Oh, yes, that is the policy. I have not attempted to place in the minutes all of the discussions that have been had but have tried to reflect action taken by the Board on specific matters, and therefore there were many discussions that have not been reflected in the minutes.

The Examiner: Was it the general policy of the company to have the management first consider the various plans and then submit them to the Board?

The Witness: Yes, I would say that was true.

Richard N. Benjamin—Cross Examination (Cont'd)

The Examiner: Did any of these plans originate in the Board itself?

The Witness: I don't believe so.

The Examiner: It was generally done by a suggestion or, rather, by suggestions from the management?

The Witness: That is true.

By Mr. Condon:

Q. Is it not the fact that there was no formal plan ever submitted to the Board of a one-stock variety by the management or anyone else?

A. That is correct so far as Engineers is concerned. As you know, there was a one-stock plan on Puget Sound Power & Light Company.

Q. Is your answer the same with respect to a package plan and a partial exchange plan?

A. So far as the three principal subsidiaries are concerned, yes.

Q. Now, for the purpose of the record is it fair to state that in principle the one-stock plan, the package plan, and the partial exchange plan are more or less variations of the same concept of giving the preferred stock a stake in the continuing enterprise in one form or another?

A. I think that is true.

The Examiner: I gather from your testimony, Mr. Benjamin, that it was the idea of the management and of the Board as well that the preferred stock should be retired rather than treated otherwise. Is that the substance of your testimony?

The Witness: That is correct.

By Mr. Condon:

Q. In May of 1945 when, according to your testimony, the proposal was made to distribute to the preferred stockholders of Engineers $30 a share in cash in partial liquidation and to reduce the dividend rates of each series of pre-

ferred 30 per cent and provide for new dividend rates, did not the matter of a new redemption premium come up for consideration, in May, 1945?

The Witness: Will you read that, please?

(The question was read.)

The Witness: At that time there were three plans under consideration, one of which was the plan to which you refer, and that plan did contemplate a reduction in the premium for voluntary redemption of 30 per cent.

By Mr. Condon:

Q. In other words, the $5 stock would have a new redemption premium of $3.50 and the other two series would have a redemption premium of $7, is that right?

A. That is right.

Q. Now, is it not the fact, Mr. Benjamin, that that consideration came up after the decision of the Supreme Court of the United States in the Otis case?

A. I think so. The Otis decision came out in the early part of the year, did it not? January, 1945.

Q. Is that a fact, then?

A. That this came up for consideration after that?

Q. Yes.

A. Well, this $30 plan was a continuation of the plan to which I referred.

Q. The partial payment plan, Mr. Benjamin?

A. The partial payment plan. That was considered by the Board of February 2, 1945. This particular development of it did occur subsequent to the Otis case.

Q. Now, was that brought up to the Board or was this something that was just the concern of the management?

A. I think that at the May 24 meeting Mr. Barnes referred to previous plans that we had considered, one of which was this partial pay-down plan and the $30 plan was a continuation of the $20 plan spoken of sooner, and after consideration of that, that was the meeting at which the

preference common plan and the warrant plan were presented to the directors.

Q. In answer to my question, was this matter of recasting the redemption figures on the preferred brought up at the directors' meeting in May?

A. I think it was brought up in February, at the February meeting, and whether or not it was repeated at the May meeting, I don't recall. That would only be a partial solution of the Section 11(e) problem, and in my recollection, the directors felt that it would be better to have an overall plan rather than the partial plan.

Q. Now, was Mr. Tucker consulted by your Board or by the management with respect to this proposal to recast the premium provisions, revising them downward percentage-wise?

A. Yes, I think he was.

Q. Did you participate in any discussions or meetings at which Mr. Tucker was present when the Otis case came up for consideration on that point? A. Well, I don't recall any discussion of the premium reduction in connection with the discussion of the Otis case.

Q. That was not discussed?

A. I would not say the Otis case was not discussed. It was discussed, and this partial pay-down plan was also discussed, it being, as I understand it, the opinion of counsel, of Mr. Tucker, that to the extent this statement was made, it was an involuntary liquidation and therefore it was retained, I believe.

Mr. Condon: May it be stipulated by counsel that the opinion in the Otis case was handed down by the Supreme Court of the United States on or about January 29, 1945?

Mr. Tucker: I will not stipulate it because I do not know whether anybody has a copy of it.

Mr. Condon: Subject to verification and check, would you so agree, Mr. Tucker?

Mr. Tucker: If it does you any good, I will so stipulate. I have no independent recollection of it.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Condon: I did not mean that, and if there is a correction, we will correct it. I know it came down about then, but I think that is close to it. If it is not correct, we will make it right.

By Mr. Condon:

Q. Mr. Benjamin, is it not a fair statement to say that while your management considered numbers of proposals only certain of those were submitted in any formal way for action by the Board, concerning the method of treatment to be accorded the preferred stock of Engineers in connection with the Public Utility Holding Company Act?

A. Well, I think that every plan that the management considered, except for minor variations which occurred in between meetings, was discussed by the Board in a general way. I can not say how many of them were presented formally, but I am quite sure that the Board was advised of any major plan that the management had worked up.

Q. Yes, and who decided which were major and which were minor?

A. Well, Mr. Barnes.

Mr. Tucker: Mr. Condon, could I just break in to say that I find in my July 26 opinion, applicant's Exhibit 38, a reference to the Otis case, and I say in there that it was decided January 29, 1945. I unquestionably had the opinion before me when I wrote that opinion, so I am willing to stipulate that that is the date it was decided.

Mr. Condon: All right.

By Mr. Condon:

Q. No one in the management would gainsay Mr. Barnes' decision in that regard, would they, Mr. Benjamin?

Mr. Kanton: I did not hear that question.

The Examiner: Read that question back.

(The question is read.)

Mr. Condon: If that question is embarrassing, Mr. Benjamin, I will withdraw it.

Richard N. Benjamin—Cross Examination (Cont'd)

The Witness: It is not embarrassing. Mr. Barnes' judgment is so sound that I very seldom disagree with him.

By Mr. Condon:

Q. I suppose you work pretty closely with Mr. Barnes and know how he looks at problems like this, do you?

A. I work very closely with Mr. Barnes.

Q. Now, is it not the fact that Mr. Barnes philosophically felt that all of the securities in the Engineers family in the operational zones should be retained for the common stock?

A. I don't know what you mean by "philosophically", Mr. Condon. Let me try to express an answer to your question, if I get the import of it.

I think that all of the plans that the Board has shown a desire to follow contemplates the retirement of the preferred stock at $100 per share and the distribution to the common stockholders of the underlying common stocks.

Q. Now, the only exception to that that you have mentioned, and I would be very glad to have you supplement it, if there are any others to that determination, was the wee small stake in El Paso Natural Gas where the cash and the stock had an aggregate value substantially less than $100, is that right.

A. That is right. The interest in that company was too small to contemplate a distribution to the common stockholders.

Q. In other words, it was so inconsequential that the preferred stockholders could have it and it would not do them any harm?

A. Well, I don't know about that.

Mr. Tucker: I do not think he ought to be required to answer that kind of a question.

The Examiner: You object to it?

Mr. Tucker: Yes, I object.

The Examiner: I will sustain the objection.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. Is it not the fact that the management did not want to offer the preferred any participation in the underlying securities so that they might participate in the future and growth of the three main operational companies of Engineers?

A. Well, I think the directors felt that, from the discussions that I have heard among them, the preferred stockholders were entitled to receive the amount to which we referred before and that that could be paid off in cash and that the common stockholders should forego any dividends until the obligation to the preferred stockholders had been satisfied.

Q. Is the effect of your answer, Mr. Benjamin, to say yes to my question without using that word?

Mr. Tucker: What word do you refer to?

Mr. Condon: The word "y-e-s".

Mr. Tucker: I do not think he can——

Mr. Condon: I think it is a perfectly proper question. The question was simple and Mr. Benjamin is a very intelligent witness, and I have not pressed for yes or no answers here, but I may have to.

Mr. Tucker: You go ahead and press for them. I will reserve my right to let him explain what he means by yes or no; if he needs to qualify it, I think he ought to do it.

The Witness: I am sorry. I thought I answered the question.

The Examiner: Read the pending question.

(The testimony referred to was read, as follows:

"Q. Is it not the fact that the management did not want to offer the preferred any participation in the underlying securities so that they might participate in the future and growth of the three main operational companies of Engineers?

"A. Well, I think the directors felt that, from the discussions that I have heard among them, the preferred stockholders were entitled to receive the amount to which we

referred before and that that could be paid off in cash and that the common stockholders should forego any dividends until the obligation to the preferred stockholders had been satisfied.

"Q. Is the effect of your answer, Mr. Benjamin, to say yes to my question without using that word?")

The Witness: Well, I can not answer that question yes unqualifiedly because I think the way your question was worded implies that the directors were trying to stop the preferred stockholders from having a participation in the growth of the properties. I think that the directors thought that the preferred stockholders were entitled to receive payment in cash to the amount of their obligation, of the company's obligation to them.

By Mr. Condon:

Q. Mr. Benjamin, are you familiar with the backgrounds of your several officers and directors in a professional way, their connections with utilities and things of that sort?

A. In a general way, yes.

Q. By way of illustration, I heard Mr. Barnes say yesterday that he was connected with the Puget Sound Company for 31 years or thereabouts. Do you recollect that?

A. Yes, I do.

Q. Now, do you know where Mr. Barnes was gainfully employed prior to his connection with Puget Sound?

Mr. Tucker: If you really want to get that expeditiously, I think you might get it from Mr. Barnes.

Mr. Condon: I thought maybe I could get it because of Mr. Benjamin's familiarity. I am not going into this in extenso, Mr. Tucker.

Mr. Tucker: All right.

Mr. Condon: I may ask Mr. Barnes too, but I thought a brief statement by Mr. Benjamin might suffice.

The Witness: Well, Mr. Barnes——

The Examiner: Let me ask you this question before you answer that:

Richard N. Benjamin—Cross Examination (Cont'd)

Have you any knowledge of Mr. Barnes' previous experience or are you merely taking this from the records?

The Witness: I have no personal knowledge of Mr. Barnes' experience prior to 19—well, as I recollect, my first contact with Mr. Barnes was in 1932.

By Mr. Condon:

Q. Do you know as a matter of general information in connection with the discharge of your duties with the company about Mr. Barnes' background and experience?

A. I have heard him testify several times to that.

Q. Yes. When did he come with the Engineers Public Service Company?

A. Well, Mr. Barnes was elected president of Engineers on December 20, 1937, the same day I was elected secretary.

Q. Prior to that, for some 30 years he was with the Puget Sound Company?

A. No, just prior to that, he was with Stone & Webster Service Corporation, and prior to that he was with Engineers Public Service Company.

Q. Do you know the approximate dates of these connections?

The Examiner: Now, do you know it? Close the book. Do you know it?

Mr. Condon: He is secretary of the company, Mr. Examiner. I do not believe that he has to have intimate, personal knowledge of all these things. It is a matter of company records.

The Examiner: I know, but Mr. Barnes is here. I do not see why you want hearsay testimony when Mr. Barnes is here to give you the testimony.

Mr. Condon: We are trying to clear away a lot of things. I thought Mr. Benjamin could certainly answer.

The Examiner: If he has any independent recollection, let him answer it. If he has not, Mr. Barnes is here and can testify.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Condon: The difficulty is, while Mr. Barnes is here the other directors and officers are not, except Mr. Benjamin or Mr. Murphy, so I am going to inquire about these other people in a brief way.

The Examiner: Let him answer from his own recollection, if he has any.

The Witness: To the best of my recollection, Mr. Barnes was with Engineers Public Service Company and/or Engineers Public Service Company, Inc., for three or four years prior to his going with Stone & Webster Service Corporation.

By Mr. Condon:

Q. When did he go with Stone & Webster Service Corporation?

A. Well, I would say in the neighborhood of 1934 or 1935, somewhere around there.

Q. And he was there approximately how long?

A. Two or three years.

Q. Now, as far as you know, you characterize Mr. Barnes as a very competent, able, experienced, resourceful utility man, would you?

A. I certainly would.

Q. Now, do you know Mr. Howard Coonley?

A. Yes.

Q. Would you state briefly Mr. Coonley's connection with the system?

A. Mr. Coonley is a director of Engineers Public Service Company. That is his only connection with the Engineers System.

Q. Was he a utility man at any time?

A. No. He is the head of the Walworth Manufacturing Company. I don't know whether his title is president or chairman of the Board, but he occupies some position like that.

Q. Do you know who nominated him as a director of the Engineers Public Service and the circumstances of the selection?

The Examiner: Off the record.

(Discussion off the record.)

The Examiner: On the record.

The Witness: I think that Mr. Barnes suggested the name of Mr. Coonley.

By Mr. Condon:

Q. Now, what about Mr. Thomas J. Hanlon, who, I noticed in your 1944 annual statement, is also a vice-president? Is he the gentleman who was referred to yesterday by Mr. Barnes as being an executive of the Virginia company?

A. No, sir. He is an executive of the Mutual Service Company in New York.

Q. By Mutual you mean EPSCO?

A. EPSCO, Inc., yes, sir.

Q. What is his background, very briefly, as far as you know it?

A. Well, he was with the Tampa Electric Company for a good many years, and he came to New York approximately around 1931 to work for Engineers and/or the Mutual Service Company.

Q. Now, Charles W. Kellogg is the gentleman who wrote that letter marked as Preferred Stockholders' Exhibit 12 for identification this morning. He is a director?

A. That is right.

Q. Was he ever an officer or other functionary of Engineers?

A. Yes, he was. He was president of Engineers.

Q. From when to when?

A. I can not give you the dates without——

Q. Approximately.

The Examiner: Mr. Benjamin, you can refer to the minutes and get that or the annual reports.

The Witness: All right.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. Can you state approximately without reference to the records, and if you can not, we will supply it in some other way.

A. Well, I would rather refer to the records if I could.

Mr. Condon: Off the record.

(Discussion off the record.)

The Examiner: On the record.

The Witness: Mr. Kellogg was president of Engineers in 1925 and remained president until Mr. Tuell was elected president, at which time he became chairman of the Board of Directors. He remained as chairman of the Board of Directors until, I think, June, 1939, at which time he became president of the Edison Electric Institute.

By Mr. Condon:

Q. So that for virtually the entire period from the organization of Engineers down to 1938 or 1939 Mr. Kellogg was either president or chairman of the Board?

A. That is correct.

Q. And he still is a member?

A. He is still a director, that is correct.

Q. Now, Mr. Jason C. Leighton is the gentleman who testified here at one of the last sessions and his background is covered in the testimony?

A. That is correct.

Q. And he is an employe of the company?

A. That is correct.

Q. And has been for many years?

A. That is correct.

Q. Now, Mr. Charles G. Wilson, will you identify him? He has been referred to as "Judge" at various times in this record. Would you tell us a little about his background?

A. Well, Mr. Wilson is a director of Virginia Electric & Power Company, as well as a director of Engineers. He

was formerly a practicing attorney, and I believe has been retired for some years. I don't know how many years.

Q. Formerly an attorney, one of the attorneys for the Virginia Company?

A. I don't believe he was ever an attorney for the Virginia Company, but I don't know.

Q. Do you know whether he is employed by any of the companies in the Engineers System or by the Engineers Public Service Company?

A. I believe he is retired now, not employed.

Q. Is he advanced in years?

A. I don't know his exact age, but he is over 65, I would say.

Q. Now, Mr. Streeter has been a director for about how long?

A. Well, Mr. Streeter was a director of several of the subsidiary companies prior to the time when local directors were elected to those boards, and he has been a director of Engineers, I think, since approximately 1938 or 1939.

Q. That is near enough. Now, have you filed any statement showing the stock holdings of these directors of Engineers Public Service Company?

A. I have not filed any statements, but each director is required to file such statements, and I believe they have done so.

Q. Are they in the U-5-S statements?

A. I do not think they are in the U-5-S statements. Their holdings are reflected in the proxy statement that is sent out, however.

Q. Do you know in a general way what their holdings are?

A. Well, I could give you the information as of the date of the last proxy statement.

The Examiner: We will take a short recess at this time.

(Whereupon a short recess was taken after which the hearing was resumed.)

Mr. Condon: May the record show that my question was prompted by a desire on the part of counsel to avoid exam-

ining certain records which I know are here in the Commission and with the thought that Mr. Benjamin might have the data readily available? If it is not readily available, I withdraw the question.

The Witness: I now have the data that you requested, Mr. Condon. The last proxy statement sent out by Engineers was for the April 16, 1945 annual meeting and this showed the stockholdings of the directors of Engineers as of February 1, 1945.

By Mr. Condon:

Q. May I see it, please?

(Discussion off the record.)

Mr. Condon: May this be incorporated by reference, from Securities and Exchange Commission File No. 53-47-1, and I am looking at the first duplicate, proxies statement by Engineers Public Service Company, Page 3?

The Examiner: Which is a list——

Mr. Condon: Which purports to set forth a list of the directors; Mr. Barnes, Mr. Conley, Mr. Hanlon and the others with their principal occupations, dates of their becoming directors, securities beneficially owned and other data.

The Examiner: No objection?

Mr. Tucker: No objection.

The Examiner: It will be incorporated in the record by reference.

* * * * *

[R. p. 752] By Mr. Condon:

Q. With respect to the matter of voting rights of the stockholders here, Mr. Benjamin, the preferred stockholders have had no rights to vote here, exercisable rights since 1937, is that right?

A. That was the date when all the accrued dividends were paid up, I believe, and at that time their voting rights ceased.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. And the only period of time that the preferred had any rights to elect a minority of the Board was during the period of 1935, 1936 and part of 1937, while there were arrearages on the preferred, is that right.

A. I am not exactly certain of the dates.

Q. Sounds approximately right?

A. Sounds approximately correct.

Q. So it is a fact that from 1925, the date of inauguration of the organization of Engineers down to about 1935, 1936 and 1937—and the records would show—the preferred had no rights to elect directors and have not had since 1937 and do not now have any rights exercisable by them; is that a fact?

A. That is correct.

Q. From your knowledge of the workings of the affairs of Engineers, is it not a proper statement to say that Mr. Barnes is the spark plug in the organization and he is the dominant figure who generates the ideas and proposals and suggests things to both management and the Board of Directors?

A. Mr. Barnes is the head of the organization and is the person most directly responsible, in my opinion, for seeing that the organization is run properly. He generates many, many ideas but I would say that some of the other members of the organiaztion generate some ideas.

Q. They are always cleared, however, with Mr. Barnes?

A. That is correct.

Q. If Mr. Barnes had any decided opinion with respect to those ideas that were generated by some of the subordinates that were in conflict with those ideas, is it fair to say that the employees would cease and desist?

A. Yes, it is his responsibility to run the organization.

Q. Mr. Benjamin, Mr. Kanton developed at some length in the testimony a series of undertakings by the Engineers company to secure the elimination of the preferred stock from this picture, and I believe he started back in or about the year 1940 or 1941. Do you recall that testimony either given by you or elicited from Mr. Barnes?

Richard N. Benjamin—Cross Examination (Cont'd)

A. Are you referring to the various——

Q. Proposed purchases and payments on account of stock and retirements and partial retirements and so on.

A. Yes, sir.

Q. You have that testimony generally in mind?

A. I think Mr. Barnes reviewed that pretty much in detail yesterday.

Q. Is your recollection of the facts similar to Mr. Barnes' testimony?

A. Yes.

Q. Didn't you say that the record of activities on the part of the management of Engineers suggests a rather persistent effort during the last four years to get rid of the preferred stock in this situation?

A. Yes.

Q. Is it not a fair statement that it also indicates very definite and positive determination on the part of the management of the Engineers company to acquire the preferred stock as far below $100 a share as possible?

A. Well, Engineers has had more cash than was required for the operation of its business or those of its subsidiaries by reason of sales of securities and withholding of dividends and the Board has had several of these plans to acquire preferred stock with this cash and when the preferred stock was selling in the open market at less than $100, the cash was used in some instances to acquire the preferred stock at less than $100. Does that answer your question?

Q. I guess so. Do you recall any thought of ever paying the preferred stockholders anything in excess of $100?

A. No.

Q. That was never in the minds of the Board or the management as far as you know, was it?

A. No, it was always thought that since any overall plan that might be developed would contemplate the payment of $100, that it would not be fair to pay any more than that to the other stockholders.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Scheetz: You said "Paid to the other stockholders", did you not?

The Witness: To other preferred stockholders.

By Mr. Condon:

Q. The only opinion of counsel that the company directors received via the September 5th plan was Mr. Tucker's opinion of July 26th, is that not so?

A. With relation to the amount payable to the preferred stockholders?

Q. Yes, that is all we are talking about, Mr. Benjamin.

A. I think that is the only written opinion Mr. Tucker gave. I am not sure whether or not he gave verbal opinions part of that time.

Q. It is a fact, is it not, that some of the directors had copies of the Otis decision in the Supreme Court given to them or sent to them?

A. I do not remember.

Q. Do you know whether or not anyone suggested securing any legal opinion from other counsel that would propound the rights and interests of the preferred stockholders vis-a-vis the common, prior to the adoption by the Board of the plan on September 5, 1945?

A. No, the only suggestion of that sort was made in connection with Mr. Streeter's suggestion concerning yourself.

Q. Other than that, there was none?

A. That is correct.

Q. Were you aware of the existence of the problem, and when I say you, I mean the Board of Directors, to the best of your knowledge, information and belief, aware of the existence of the claim that might be asserted by the preferred stockholders that they were entitled to going concern value of this preferred stock or the fair value of the stock prior to the adoption of the plan on September 5th?

A. Well, I think the directors were aware of the fact that there was a difference and could be a difference of opinion between the preferred stockholders and the common stock-

holders as to what would be the fair and equitable treatment of the preferred stockholders, and therefore when Mr. Streeter made the suggestion that someone be employed, namely, yourself, to represent the position of the preferred stockholders, the directors agreed to that suggestion.

Q. When was that suggestion first made by Mr. Streeter, if you remember?

A. Mr. Streeter made that suggestion definitely at the October 25, 1945 meeting but Mr. Streeter had indicated earlier that he was opposed to the plan. In fact, he voted against it.

Q. My question was, did the Board, prior to the time of the adoption of the plan, consider the possibility of having an opinion that would present to the Board the arguments in favor of paying the preferred stockholders more than $100 a share?

A. I do not believe that that was discussed, Mr. Condon.

Q. Mr. Streeter's suggestion was made about five or six weeks after the plan was adopted, isn't that true?

A. That is true.

Q. And that was a suggestion that also was not to advise the Board with regard to a plan that was already filed with the Commission but rather to attempt to protect the rights of the preferred stockholders against the action of the Board subsequent to the filing of the plan, isn't that a fact?

A. Well, it was to represent the position of the preferred stockholders at this hearing before this Commission.

Q. Did you have drawn to your attention or did the Board, to your knowledge, have drawn to its attention the decision of this Commission in the American Light and Power case?

A. I saw the decision.

Q. I think the correct designation is American Power and Light.

Mr. Barnes: November 1, 1945.

Mr. Sheetz: Referring to Release No. 6176 bearing date of November 1, 1945 with a supplemental finding in Release No. 6201 dated November 8, 1945.

Richard N. Benjamin—Cross Examination (Cont'd)

(Discussion off the record.)

The Witness: I think the Board was advised of that decision. I think Mr. Barnes advised them of that decision but I am not entirely clear on that point. I would rather have you check that point with Mr. Barnes.

By Mr. Condon:

Q. Were you present at any meeting at which this decision was discussed?

A. I think Mr. Barnes mentioned it at a meeting of the Board of Directors and that it was briefly discussed, I do not know in how much detail.

Q. Do you recall at what meeting?

A. No, I do not.

Q. Didn't you view that as a rather important landmark in the development of this particular problem that was so important as to occupy one whole step in your plan?

A. Well, it certainly was an important decision, Mr. Condon. I think there were certain differences between that decision and the problem that is being considered now.

Q. Did you find any reference to that in your minutes, Mr. Benjamin?

A. No, I do not believe there was any reference to it in the minutes.

Q. Do you recall on or about the 15th of December when the Board adopted, Mr. Streeter not voting, the fourth amendment to the plan which provides for the elimination of Step Three and the trustee arrangement about Part One: do you recall the fourth amendment?

A. Yes, I do.

Q. Did you have a legal opinion at or about that time from Mr. Tucker?

A. Yes, we did.

Q. Would you produce it, please?

A. Yes, I have a copy of Mr. Tucker's opinion dated December 11, 1945, addressed to the Board of Directors of Engineers.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Condon: May I have that marked for identification as Preferred's Exhibit 13?

The Examiner: Let it be so marked.

(Preferred Stockholders' Exhibit 13 is marked for identification.)

By Mr. Condon:

Q. Is it a fact that Preferred Stockholders' Exhibit No. 13 for identification was submitted to the Board of Directors on or about the date of adoption of Amendment No. 4?

A. Yes; it was mailed to them two or three days before the meeting and considered at the meeting.

Q. Did you notice, Mr. Benjamin, that that opinion makes no reference whatever to the American Power and Light decision of the Commission?

A. There is no reference in here to the American Power and Light decision.

Q. Can you state to the best of your knowledge whether the Board at any time between the 5th of September and the present has sought from Mr. Tucker or any other attorney an opinion with regard to the rights of the preferred stockholders here with respect to the payment of any excess over $100 which they may be entitled to receive?

A. Mr. Tucker was not asked to furnish any additional written opinion. He was present at this meeting of December 15, 1945 and recommended this amendment, so that I think the directors assumed, as I did, that his opinion on that subject had not changed since his previous opinion.

Q. Although it was not discussed?

A. I do not recall any specific discussion at that time.

The Examiner: Do you recall at that meeting whether Mr. Tucker was asked any opinion as to the effect of the American Power and Light decision on the plan?

(The question was read by the reporter.)

The Witness: Yes, Mr. Tucker was asked by the directors as to his opinion as to the effect of the American Power

and Light decision on the Engineers plan. Mr. Tucker pointed out distinctions between the American Power and Light situation and the Engineers situation. That was oral.

By Mr. Condon:

Q. Not mentioned in the opinion?

A. That is correct.

Q. Mr. Benjamin, in connection with your testimony given at this session and at prior sessions in these proceedings, certain exhibits were introduced while you were on the witness stand as having been prepared by you or under your supervision and direction, and I would like you to state, if you will, which of those exhibits now in evidence were prepared prior to September 5th and were before the Board for their consideration. As an aid in your so doing, you mentioned this morning the financial schedules that were attached to the plan on September 5th and had been in some rough draft form or something like that for a month or so prior. You mentioned the sales of the properties of the Engineers system since the Act became effective and I believe the third one represented a total figure of amounts of earnings left in the system. Would you supplement those three by any additional items that were before the Directors and considered by them in connection with the adoption of the plan on September 5th?

(Whereupon a short recess was taken.)

By Mr. Condon:

Q. Mr. Benjamin, I asked you to be prepared to answer that question in substance a matter of a week or so ago, did I not?

A. Yes, sir.

Q. And agreeable to my request, you prepared a memorandum dated 12-27-45 in which you have set forth the

various Applicant's exhibit numbers and a more or less descriptive characterization of the contents of each?

A. That is right.

Q. Other than the three items to which I made reference in the question, is it the fact that the only additional exhibits or data that were submitted to the Board with respect to your exhibits in evidence, is the tax letter from Mr. Lynch dated August 31, 1945, which was apparently prepared prior to the 5th, Exhibit No. 15-A?

Mr. Tucker: I suggest we tie the numbers to the exhibits if they are exhibits.

Mr. Condon: I would be very glad to adopt that suggestion.

By Mr. Condon:

Q. Exhibit 15-A, Exhibit 31 being the first letter of the Engineers common stockholders which was apparently in draft form on the 5th, according to this memorandum?

A. Yes.

Q. And Exhibits 33, 34, 35, 36 and 37 which were the charters of Engineers, Gulf States, El Paso, Virginia and the annual reports of Engineers. Mr. Tucker's opinion of course you mentioned which is Exhibit 38. And I hand you back the memorandum and ask you if I have correctly set forth the items that you have indicated were before the Board on September 5th insofar as they flowered into exhibits by the company in this proceeding.

A. Well, my check mark against the charters of the four companies was not meant to imply that the charters of these companies were actually presented to the Board. I assume that they were prepared considerably before this plan came up, naturally, and I assume that they were available information and not prepared in connection with this hearing, of course. The annual reports of Engineers have, of course, all been presented to the Board of Directors at the time they were being considered in their respective lights.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. There was no annual report being considered, then, was there?

A. No, but the annual reports that are exhibits are over a period of years in the past and every one of those annual reports had been presented to the Board prior to the time they were mailed out to the stockholders, and what I meant to imply by this check was that the Directors had seen those reports and presumably were aware of the information in the reports.

Q. The 1944 one they had seen in the spring of 1945 and the preceding annual reports in the following spring, the next succeeding year that the annual report is supposed to come?

A. That is right.

Q. My question was, Mr. Benjamin, what additional exhibits other than the ones that we mentioned are now exhibits in this case, were before the Board at the time they adopted the plan on September 5th? Do you know of any others that have been mentioned or identified from your memorandum?

A. No, other than the ones that I referred to in my testimony this morning.

Q. I set those forth in my question, did I not?

A. If you did, I missed it.

The Examiner: Mr. Condon mentioned Exhibit 15-A. How about 15-B? 15-A, as I understood it, was the opinion of Mr. Lynch as to the tax gain to common stockholders. How about preferred stockholders?

The Witness: 15-B was dated September 26, 1945.

The Examiner: After the meeting?

The Witness: Yes.

By Mr. Condon:

Q. How long did your meeting last on September 5th, do you recall approximately? I think you said an hour and a half?

A. Yes, to the best of my recollection.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. During the course of your testimony on both direct and on prior cross-examination, you have suggested various arguments which you have contended supported the decision of the Board in adopting this plan on September 5th, is that a correct statement?

A. I tried to state the reasons that appeared to me to be the reasons the Directors arrived at the decision they made in connection with the adoption of this plan.

Q. You made certain assumptions according to your testimony, did you not?

A. Yes, I have.

Q. And you testified that a number of those assumptions were based upon what you thought would be the reactions of stockholders and others; do you recall giving that testimony?

A. Yes, I do.

* * * * *

Hearing on January 5, 1946

[R. p. 771]

RICHARD N. BENJAMIN,

previously sworn, resumed his testimony.

Cross Examination (resumed)

By Mr. Condon:

Q. I ask Mr. Benjamin the same questions with respect to it as I did with regard to Exhibit 7 for identification, asking if his answers are the same.

A. Yes, they are.

Mr. Condon: May it be marked for identification, sir?

The Examiner: Let it be marked Preferred Stockholders' Exhibit 7-A for identification.

(The document referred to is marked as Preferred Stockholders' Exhibit 7-A for identification.)

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. Mr. Benjamin, under cross-examination by Mr. Kanton you stated in substance that you had expressed a lot of opinions on what the preferred stock or the common stock would or would not do or would or would not like and the record indicates that you admitted that many of your answers were based on personal assumptions. Do you recall that line of interrogation by Mr. Kanton?

A. Yes, I do.

Q. Now is it the fact that in so far as the preferred stockholders are concerned, who own no common stock in the Engineers enterprise, that you never talked to any of those preferred stockholders to get directly from them their views with respect to this plan? Is that a fact?

A. That is correct.

Q. Did you hear the testimony of Mr. Barnes with regard to the stockholders that he discussed the matter of the plans with?

A. Yes, I did.

Q. Did you notice that he did not testify that he had talked to any preferred stockholders that didn't own common stock?

A. Well, I know that Mr. Barnes testified that he spoke to several stockholders. I don't know whether some of the people he talked to owned preferred stock and not common stock. I know that some of the people he talked to were holders of common stock.

Q. Yes. Well now, you remember he said he spoke of Edwin S. Webster, Jr., and a gentleman from Stone & Webster, Mr. Crawford, and a stockholder from Brooklyn whose name eluded him when he testified, quite naturally so?

A. Yes. He said he spoke to Mr. Orr in Boston. I don't know what Mr. Orr's interests are.

Q. Mr. Orr in Boston?

A. Yes.

Q. Did he testify to that?

Mr. Kanton: Yes.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. You don't know what Mr. Orr's holdings are?

A. No. He is connected with the Railway & Light Securities Company, I think, and I don't know what their stock holdings are.

Q. Well, with the possible exception of Mr. Orr is it the fact that you and apparently Mr. Barnes never discussed the problem with any preferred stockholder who didn't own common, that is with respect to the plan?

A. These reactions that the particular stockholders—we will call them the ordinary preferred stockholders?

Mr. Tucker: I have no objection to the question as far as it concerns Mr. Benjamin, but I don't think you ought to include Mr. Barnes in your question.

Mr. Condon: All right.

By Mr. Condon:

Q. How about you, Mr. Benjamin?

A. I have not. Mr. Streeter, of course, is a director of the company. I don't recall whether he owns any common stock or not. He does own preferred stock.

Q. That is right. Well you noticed on that proxy statement that was incorporated by reference yesterday that, I think Mr. Streeter is the owner of certain shares of preferred and owns no common, is that it?

A. That is my recollection.

Q. As a matter of fact he is the only fellow like that on your Board, isn't that so?

A. Could I look at that proxy statement?

Q. Yes. I think that is a correct statement, with the possible exception of Mr. Wilson.

A. It appears from this proxy statement that Mr. Wilson owns only preferred stock.

Q. Yes. Do you happen to know as a matter of fact whether Mr. Wilson now owns any common stock or whether his family owns any common stock?

A. I don't recall anything that indicates that he does or his family owns any.

Q. Do you know from your experience and general knowledge in matters of corporate reorganization that it is quite customary for the management of companies acting for all the stockholders to talk to representatives of different classes to get their opinions?

A. I guess that has been done in many cases, Mr. Condon.

Q. Do you know whether or not the management conferred with any of the large institutional holders of these preferred shares, like Mr. Scheetz's clients or like the Columbian National Life Insurance Company that I am acting for?

A. Well, I think Mr. Barnes talked to representatives of the Columbian Insurance Company.

Q. About this plan?

A. After the plan was filed.

Q. I am talking about prior to its promulgation and filing, Mr. Benjamin. I thought you understood that.

A. I don't know of any large preferred stockholders which this plan was discussed with prior to its filing.

Q. Or small ones either?

A. That is correct.

Q. Isn't that quite unusual from your experience and knowledge of financial affairs and reorganizations of this magnitude?

A. I wouldn't say it was unusual, Mr. Condon, where the applications are filed with a public body and the opportunity for hearing is given to all preferred stockholders to express their points of view and notice given to them.

Q. I was talking about the unusual feature of not taking it up with substantial holders of preferred stock in advance of decision on the plan.

A. I don't agree that it is unusual, Mr. Condon. I think that in many cases that is done and in many other cases it is not done. We have had other plans that we have filed before the Commission and I don't know that any discus-

sions have been had with large stockholders the feeling being, I believe, that all stockholders would have perfect freedom opportunity to appear and if they objected to the plan to make their objections known.

Q. Is your reluctance to say that it is unusual born of the experience that you have had in the Engineers System or are you expressing your views as to your general knowledge of the technique employed outside the Engineers System in other cases?

A. Well, I don't know what the technique employed in other systems is, Mr. Condon.

Q. Your Board knew and recognized a very sharp issue here, did it not, between the rights of the preferred to claim sums in excess of $100?

A. They certainly did.

Q. And the position taken by the majority of your Board?

A. They certainly did.

Q. They didn't see fit to give the preferred stockholders who had such a huge stake in this an opportunity to present their views prior to the promulgation of the plan?

A. No, they did not.

Q. All the Board decided was to give them an opportunity to come in and complain, is that right?

A. Well, if I can express it a little differently, I think that they thought from the expressions I heard at the meetings that the preferred stockholders would have a perfectly free opportunity to come in at the hearings and express their views.

Q. And they gave the preferred stockholders the opportunity of battling the resources of the Engineers System in a contest that was unequal, is that the effect of the Board's action here?

Mr. Tucker: I think I ought to object to the characterization of the contest as being unequal.

The Examiner: I think I will sustain the objection to that, Mr. Condon. I don't see any particular justification

for that. Certainly, the preferred stockholders have an equal opportunity with the company here.

Mr. Condon: Mr. Examiner, I wasn't referring to the inequality of the contest here. I was referring to the inequality of the opportunities provided to come in and present their views to the Board, the inequality of opportunity to have counsel come in and express an opinion that might differ, with the greatest respect to Mr. Tucker, and other points of that type. I don't feel that the Board of Directors here are entitled to any encomiums because they have done what the statute requires to give the preferred their day in court.

The Examiner: I think you can accomplish the same thing leaving out your expression as to the unequal opportunities.

Mr. Condon: All right, sir.

The Examiner: We are only answered back and I don't know that we accomplish anything by resorting to language of that type.

Mr. Condon: I shall withdraw the question.

By Mr. Condon:

Q. Mr. Benjamin, Mr. Kanton in his cross-examination interrogated you with respect to how it was that the Board of Engineers arrived at the price of $10 initially for the Gulf States warrants. Do you recollect that general line of inquiry by staff counsel?

A. Yes, I do.

Q. What was the total amount of cash that the Engineers Board felt it would have to raise to retire its preferred stock incident to this proposed plan in the over-all aggregate? Don't mind the odd dollars. And I suggest that it was approximately $36,000,000 or $39,000,000.

A. Well, approximately $39,000,000 preferred stock outstanding and it was estimated that it would be approximately $15,000,000 in the treasury of Engineers by the end of 1945.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. $15,000,000 or $14,000,000?

A. Well, between $14,000,000 and $15,000,000 in cash.

Q. That is near enough. That left to raise approximately $25,000,000?

A. That is right.

Q. Was the reasoning of the Board something like this—that in order to retire the preferred we are going to need $39,000,000 and we have $14,000,000 approximately in cash now and we will have another $1,000,000 by the end of the year so that our actual cash requirement will be $25,000,000 and if we get a bank loan of $6,000,000—that was the initial proposal—and have a little bit less than 2,000,000 shares of Gulf, that fixes the price of $10 a share in round numbers? Isn't that about the way the corporate mind worked on that problem?

A. (No response.)

Q. I am not quarreling about $1,000,000 one way or another. I am just trying to get principles.

A. I think that is right.

Q. So that if I understand it, the Board decided that what it needed to retire the preferred took the cash on hand estimated to be increased by earnings during the year 1945, took the bank loan that it decided that it should get, $6,000,000, and then divided the difference by the total number of shares of Gulf and arrived at the $10 figure?

A. That is right.

Q. Now there was no attempt on the part of the Board to make any study or to have a studied conclusion that that $10 represented the value of that share of Gulf States that would be acquired as a result of the issuance of the warrant?

A. No, that is right.

Q. Was there any effort on the part of the Board to decide prior to September 5 just what a warrant to acquire such a share of stock at that price was actually worth?

A. No. It was felt at the time that there would be sufficient excess over the subscription price to make the warrant of value so that the warrant privilege would be exercised.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. The effect of that answer is that the value of a share of Gulf States stock was in excess of $10; is that right?

A. That is right.

Q. Were there any studies made, analyses, or considerations of that type given to the problem of what actually in truth and in fact a share of Gulf States was worth?

A. Well, this comparison of the four listed stocks contained in Applicant's Exhibit 14 was prepared in the first instance in the spring and that indicated that on the basis of those securities and the prices at which they were selling the Gulf States common stock would probably initially sell for somewhere in the range of $15 to $16, somewhere in there, in any event, at a price which would give a value to the warrant itself.

Q. You have not forgotten, unless I misunderstood, that that was not one of the papers that was before the Board when they made their decision, Mr. Benjamin, is that correct? Do you remember that list that you gave me yesterday?

A. That is right. I don't know that that particular statement was presented to the Board. It may be that Mr. Barnes advised the Board of his consideration of this problem.

Q. Were you ever present when he did?

A. Well, I was present at those meetings, Mr. Condon, and I have tried to the best of my ability to remember everything that transpired at those meetings and I can't say with certainty whether he did or did not make that statement.

Q. At all events, that comparison of those four stocks that you say was initially gotten in the spring was rather a slender substitute for any real attempt on the part of the Board to value Gulf States stock, isn't that so?

A. I don't believe that that would be considered a valuation of the Gulf States stock in the sense that you referred.

Richard N. Benjamin—Cross Examination (Cont'd).

Q. To the extent that Gulf States stock had a value in excess of $11.50, that excess represented something to the common stockholders who received the Gulf States stock and to the preferred group of preferred stockholders who also owned common stock, isn't that a fact?

A. You said represents something of value to those?

Q. Something, yes. I am coming to just what that something is. It represented something to those stockholders?

A. It represented something to the common stockholders, yes sir.

Q. And to the preferred stockholders who owned common?

A. So far as their common stock holdings were concerned, yes.

Q. Now, is it your testimony that at the time the Board adopted this plan it didn't know just what that something amounted to? Is that the effect of your testimony?

A. I think that the Board did not know exactly what this would be worth, Mr. Condon, when the warrant plan was considered; that they felt, so far as I can tell, during those discussions that the warrant would have a value and therefore a warrant plan would be a feasible plan.

Q. And to the extent that this something that these stockholders were going to get was greater, the prospects of the non-exercise of the warrants in question would grow less, isn't that a fair conclusion from the facts?

A. Yes, I think so, as long as there is a substantial value to the warrant that the warrants would undoubtedly be exercised by everyone who was aware of their right. In other words, no one is going to let a right like that lapse.

Q. Yes, and your testimony given under Mr. Kanton's cross-examination was to the effect that the only way you could conceive—I am not quoting—of anyone not exercising the warrant was just not being around to do it.

A. That is right.

Q. Isn't that the effect of what you testified?

A. That is right.

Q. The Board knew it was giving out something valuable, isn't that so?

A. That is right.

Q. Did the Board consider the possibility that the number of warrants that would not be exercised by the common stockholders and by the preferred stockholders who owned common stock would be so fractional and so inconsequential in number that the effect of that would be to deprive the ordinary preferred stockholders from any right to participate in the Gulf States enterprise?

Mr. Tucker: I don't understand your question. I don't see how the witness can understand it.

Mr. Condon: Why don't you let him speak for himself, Mr. Tucker?

Mr. Tucker: All right.

The Examiner: I think the question is perfectly clear, Mr Tucker. It is to me. If Mr. Benjamin doesn't understand it he can so state and the question can be modified or read back to him as he pleases.

The Witness: Will you read it back?

(The record was read.)

The witness: Frankly, I will refer back to the testimony that I have given previously. What I had intended to state at that time was that the only people who would not exercise or sell their rights would be those to whom the matter had not come to their attention for one reason or another. Some common stockholders may not wish to exercise the warrants because of the requirement to put up the cash and it is expected that there will be trading in the warrants and that those would be sold and an opportunity given to preferred stockholders to purchase the warrants. I don't believe the warrants that will not be exercised, to which you referred in your question, would have any effect one way or another. In other words, I don't believe they would be sold, because those are the people who are not aware of the fact that they

have the warrant coming to them, for some reason or other. That is the way I feel about that.

By Mr. Condon:

Q. Let me see if I understand that answer. You are saying that the warrants would not be exercised here only due to the fact that the money was not there to do it, because they were so valuable, but there may be a class of common stockholders that does not like Gulf States?

A. That is right.

Q. And would wish to make a profit by selling their rights because of the valuable donation that they have received from the Board of Directors? Is that the effect of your answer?

A. I think the effect of my answer is that the common stockholder who does not wish to exercise his warrants would sell them to somebody else.

Q. Yes, and the price that those warrants would command will, to a substantial extent, depend upon what that something was over $11.50 that the common stockholders and the preferred stockholders who owned common got from the Board as a result of the plan; isn't that a fact?

A. That is right.

Q. So the ordinary preferred stockholder is faced with either of two contingencies if I am not in error—and you correct me if I am. He either will be unable to buy the warrants or he will have to pay the price to get them, is that right? Is that the lot of the ordinary preferred stockholder here?

A. He will either have to buy them or pay the price to get them? I don't understand that, Mr. Condon.

Q. The first part was he will either not be able to buy them or if he can he will have to pay a price to get them.

A. That is right, unless he has previously bought common stock.

Q. You don't know, you have no idea, have you, how many common stockholders will sell their warrants?

Richard N. Benjamin—Cross Examination (Cont'd)

A. No, sir.

Q. That is a matter of pure speculation?

A. That is right.

Q. If it happens that the common stockholders here felt that Gulf States had prospects and a great future before it, that it was in a good territory, well and capably run by competent executives who were familiar with the utility business, and that the earnings were running upgrade and that the thing looked right rosy, they wouldn't sell, would they?

A. Not if they had the money.

Q. And the group of stockholders who are interested in capital appreciation rather than income taxes are not likely to sell, are they?

A. Well, I don't know about that group, Mr. Condon.

Q. Oh, you don't know about that great big group that is going to put up about 14/22nds of the money, that group of 1,022 stockholders that own 75 or 80 per cent of this stock that were more interested in capital appreciation than they were in paying income taxes on dividends? You have forgotten that group, have you?

A. No, it isn't that I have forgotten the group. I am just wondering what the effect would be on them selling. Your question was they wouldn't want to sell the warrants or they wouldn't want to exercise them?

Q. I am asking you if you think they have planned to sell their rights.

A. If they sold their warrants, they would not obviously acquire the Gulf States common stock and——

Q. (Interposing) And they wouldn't have these tax advantages that are so important, would they, Mr. Benjamin?

Mr. Tucker: I didn't hear that last question. I wish you would keep your voice up just a little bit.

(The question was read.)

Richard N. Benjamin—Cross Examination (Cont'd).

The Witness: Well, if they exercise the warrants and get the Gulf States stock, they will start to get dividends on that Gulf States stock.

The Examiner: I don't think that answers the question, Mr. Benjamin. I think you probably know the answer to the question. The question was, if they sell these warrants, they will have to pay income taxes on their profits, won't they? Isn't that a fact?

The Witness: That is what I am not clear about, Mr. Examiner.

The Examiner: That is the substance of Mr. Condon's question as I see it.

The Witness: I will have to look at Mr. Lynch's opinion. I am not sure of it.

Mr. Condon: Exhibit 15 and 15-A.

(Discussion off the record.)

The Examiner: Let us get back on the record and get back to the pending question.

(The record was read, as follows:

"Q. And they wouldn't have these tax advantages that are so important, would they, Mr. Benjamin?")

The Witness: I think that some of the stockholders who desire to avoid receipt of income and prefer to take a capital gain might well sell their warrants, Mr. Condon.

By Mr. Condon:

Q. How substantial do you think that group would be, Mr. Benjamin?

A. (No response.)

Q. Do you think that would be a great body of this group of 1,000 holders who own 82 per cent or 78 per cent of the stock of Engineers?

Mr. Tucker: Mr. Examiner, I object to the question. It seems to me we are getting into a lot of speculation.

The Examiner: I agree with you.

Mr. Tucker: I don't know how this witness can possibly know.

The Examiner: I agree with you.

Mr. Tucker: He can not possibly know what the motives of 26,000-odd or whatever the number of stockholders is are going to be. I don't see why we can't argue that from the probabilities and speculate on it in our briefs without having the witness try to speculate on that kind of thing.

Mr. Condon: Mr. Tucker, in answer to that we have a situation here where 1,022 stockholders own 74 plus or minus per cent of the common stock according to the exhibits and the testimony. Now we have a very cohesive group that has been talked about by Mr. Barnes in the person of Edwin S. Webster, Jr., and the vice-president of the Stone & Webster interests in Boston and maybe others.

Mr. Tucker: All right. Now if Mr. Barnes was told by those stockholders what they were going to do about this thing and why, I think that would be perfectly proper because I don't think it would be speculation.

Mr. Condon: It is perfectly proper cross-examination to develop whatever facts this witness knows or has knowledge of in the light of the testimony that one of the important considerations of this plan, were tax considerations. There isn't any question about that in the record.

Mr. Tucker: Not a bit.

Mr. Condon: There isn't any question in the record that the tax considerations were designed and calculated to protect and look after the interests of this group of 1,000 stockholders.

Mr. Tucker: That, I don't agree to.

Mr. Condon: I think that that is a fair conclusion.

The Examiner: Mr. Condon, your recent questions have not dealt with facts from this witness. I think Mr. Tucker's objection to it is that you have called on the witness to

make certain suppositions about things that he probably knows nothing about.

Mr. Condon: All right.

The Examiner: Now whether he has discussed this with these stockholders and they have determined or advised him what they are going to do, you have not asked him that.

Mr. Condon: All right. I will withdraw the question.

The Examiner: You have asked him assuming thus and so, what would happen. That calls for pure speculation on the part of this witness.

Mr. Condon: Mr. Examiner, this witness was permitted to testify on direct examination to a group of the most fantastic assumptions that were all based on this witness's determination of what he thought the stockholders would do. I feel that on cross-examination I ought to be able to probe in the same direction. It was developed by Mr. Kanton on cross-examination that a very substantial portion of this witness's testimony about what the common would do and about what the preferred would do was all based on his own judgment without any conversations with any of the preferred stockholders at all. I don't believe that I should be precluded, when it was developed on direct. Mr. Kanton was permitted to do it on his cross-examination. I don't intend to pursue it unduly but I do feel at this point, where the question has come up as to these warrants and what is going to be available for the ordinary preferred stockholders, that we have a right to probe the knowledge of this witness and further perhaps his assumptions if they can be developed. If we can't assume it in this case, perhaps that will have some bearing on the validity of the extent to which the Commission will give any consideration to his other assumptions, which may be more important.

I will withdraw the question but I do feel that I ought not to be kept down unduly where we have precedent in this very proceeding before your Honor, both on direct and on other cross-examination.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. Now, Mr. Benjamin, you testified in this proceeding that an important consideration in this plan was designed to make it possible for common stockholders or certain of the common stockholders in the higher income brackets to take advantage of the tax opportunities which the Board felt were afforded in the plan. Is that a fair statement?

A. That is right.

Q. The opinion of Mr. Lynch, Exhibits 15-A and B relate in a general way to some of the tax advantages, isn't that true?

A. That is true.

Q. And it was pointed out very definitely to these common stockholders who acquired warrants and then got the Gulf stock, that it would be a tax-free transaction, isn't that so?

A. That is right.

The Examiner: That is, if they exercised the warrants?

Mr. Condon: Yes, if they acquire the stock.

The Examiner: You said got the warrants. I am adding to that if they exercise the warrants it is a tax-free transaction.

Mr. Condon: All right, Mr. Examiner.

By Mr. Condon:

Q. You understood what I meant, Mr. Benjamin?

A. That is right.

Q. And acquired the stock in Gulf?

A. That is right.

Q. Is it your considered opinion that a substantial block of this group who were designed by the plan to benefit by the tax advantages with regard to this Gulf exchange are going to forego those advantages and sell those warrants in the market?

Richard N. Benjamin—Cross Examination (Cont'd)

A. I think it depends on the individual case, Mr. Condon, and I don't know how many of them would want to sell and how many would want to exercise the warrants.

Q. So you have very carefully conceived a very fine technique taxwise to benefit a large group of holders of large blocks of its Engineers stock and you don't have any idea as to whether they are going to be interested in availing themselves of it or not, is that your testimony?

A. It puts the choice up to them as to whether or not they want to avail themselves of it.

Q. Yes. Now you have not forgotten that you told us a little while ago that these stockholders were getting something over $11.50, is that right?

A. That is right.

Q. And to the extent that something is over $11.50, these warrants are going to give these stockholders a chance to make a profit, isn't that so?

A. I think that is right.

Q. Yes. Do you say that you have imposed a burden on that group of stockholders, Mr. Benjamin?

A. (No response.)

Q. What is the answer to that question, Mr. Benjamin?

A. Well, I think it imposes a burden on the common stockholder to be required to put up $11.50 a share, Mr. Condon.

Q. And to get his bait back in a very handsome profit within 10 days thereafter, is that the kind of a burden that your heart bleeds for for these stockholders?

A. When the Engineers common stockholder purchased his common stock originally, Mr. Condon, he thought that he was going to be able to continue out ahead of him, senior securities. Now the situation is such that the senior securities have to be paid off.

Q. They have to be paid off?

A. I believe they do.

Q. That is your understanding of this?

A. My understanding is that certainly the senior obligations have to be paid off, yes, sir, and he is now required to put up this money that he did not think he had to put up when he first bought the Engineers common stock. He has also had an interest in Gulf States common stock through Engineers. Now he is being given the opportunity to buy that common stock but in order to buy it from the company he has to put up enough to pay off the senior obligations.

The Examiner: Mr. Benjamin, may I interject a question? Your statement is that the preferred stock must be paid off. Have you not previously testified that the preferred stock might have been taken care of in other ways than being paid off? I don't know whether you meant that or not.

The Witness: By being paid off I meant that the preferred stock obligation must be taken care of, Mr. Examiner.

The Examiner: You didn't mean then paid off, is that right?

Mr. Condon: Not paid off in cash.

The Witness: Not necessarily paid off in cash, no.

The Examiner: I wanted to clear up the record with respect to that. I didn't know whether that was your conclusion or not.

By Mr. Kanton:

Q. Is that the opinion of all the members of the Board of Directors?

A. Which, Mr. Kanton?

Q. That the senior securities as you have just put it, or the senior obligations, have to be taken care of at this time?

A. Well, it is my understanding that the majority of the Board of Directors believe that this is an involuntary liquidation, Mr. Kanton, and that in an involuntary liquidation the senior securities have to be provided for.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. That wasn't my question. My question was, do all the members of the Board of Directors, with the exception of Mr. Streeter, believe that the senior obligations must be taken care of at this time? Is that Mr. Kellogg's opinion?

A. I think Mr. Kellogg believes, from his letter and conversation and statements that I have heard him make, that this is an involuntary dissolution of Engineers and I am quite certain he feels that the senior securities have to be taken care of.

Q. At this time? Did he say that they have to be taken care of at this time?

Mr. Tucker: You are raising the question about the Supreme Court case?

Mr. Kanton: No. No, I am not. I am not.

Mr. Tucker: That was one objection Mr. Kellogg had.

By Mr. Kanton:

Q. Didn't Mr. Kellogg offer his opinion to the effect that he was not of the mind that the plan should be presented now and that the preferred stock of Engineers could be taken care of?

A. Could I look at Preferred Stockholders' Exhibit——

Q. I am not referring to any Preferred exhibit because it is not in evidence.

A. I am trying to refresh my recollection.

The Examiner: If you want to refer to Mr. Kellogg's letter——

Mr. Kanton: That is entirely up to you. I am not referring to any matter that is not being put in as evidence.

The Witness: May I see a copy of that?

The Examiner: You may see a copy of Mr. Kellogg's letter if you want to refresh your recollection for a minute. That is perfectly all right.

The Witness: Mr. Kellogg said in this letter of July 27 that he did not agree that it might not be possible to pay preferred dividends after Gulf and El Paso are disposed

of, but I didn't understand from that that he thought there was any reason for not continuing with the liquidation of Engineers. Certainly I have gotten entirely the other impression from him.

By Mr. Kanton:

Q. Well, isn't his opinion that Gulf States and El Paso —I am just referring now to your testimony alone—could be disposed of pursuant to your plan and that it is not such an important question, as you put it, to take care of the preferred stock of Engineers at the same time?

A. Well, I would hate to speak for Mr. Kellogg.

Q. I just want your opinion.

A. But I don't believe—my own opinion is that there would be no purpose served in retaining Engineers over Virginia.

Q. But referring back to my question, you don't know the answer. In other words, you don't know whether that is what Mr. Kellogg had in mind?

A. I think Mr. Kellogg had in mind that there would be no purpose served in Engineers' continuing too because he voted for this plan and so far as I know is in entire agreement with it.

Q. Did Mr. Kellogg ever express to you in one form or another that the present structure of Engineers, only with Virginia, could support the preferred stock of Engineers?

A. Well, he makes that statement in this letter, that he thinks that the preferred dividend requirements could be met with Engineers being solely over Virginia.

Q. In other words, outside of your last remark, all the directors except Mr. Streeter are in full accord with the plan as now filed and as amended?

A. That is correct. That is my understanding.

Mr. Kanton: Go ahead.

The Examiner: We will take a short recess at this time.

(Whereupon a short recess was taken after which the hearing was resumed.)

Richard N. Benjamin—Cross Examination (Cont'd)

The Examiner: I believe you were through, Mr. Kanton, when we recessed, were you not?

Mr. Kanton: Yes, sir.

The Examiner: All right, Mr. Condon.

By Mr. Condon:

Q. Mr. Benjamin, coming back to this question I asked you a little while ago, to your best judgment whether or not the common stockholders of Engineers and the preferred stockholders who owned common stock would be expected to exercise their warrants and acquire Gulf stock, did I understand you to say that you felt that you didn't know what they would do or you had no impression of what they would do?

A. I do not know what they will do, Mr. Condon.

Q. Mr. Benjamin, I have before me page 545 of the stenographic transcript and it was the cross-examination of Mr. Barnes by Mr. Kanton. I ask you if you recall this testimony given by Mr. Barnes Thursday and I now read from page 545:

"By Mr. Kanton:

"Q. Mr. Benjamin testified that one of the principal factors considered by the Board of Directors in formulating the present plan was that the present Engineers common stockholders want to continue their interest in the three operating companies, namely, Gulf, El Paso, and Virginia. Do you recall his testimony?

"A. Yes, I do recall his testimony.

"Q. And I take it that is your opinion?

"A. I have so testified this morning.

"Q. And the basis for that opinion is what, sir?

"A. Merely an analysis of what any person's reaction is if you make an investment in a security, particularly a holding company security. You make that investment because you like the character of securities in the portfolio

of that company. Therefore the natural feeling of the owner of the holding company security is that he would like to continue his interest in the properties that constitute that system."

Did you hear Mr. Barnes testify to that effect Thursday?

A. Yes, I did.

Q. Did you testify, as this question indicates, accordingly at a prior date?

A. Yes, sir, I think I did.

Q. Is your opinion different now than what it was when you gave that testimony?

A. No.

Q. Is your opinion now at variance with the testimony of Mr. Barnes?

A. No.

Q. Then what is the answer to the question as to whether you feel in your judgment that these common stockholders of Engineers and the preferred stockholders of Engineers who own common will exercise these warrants and acquire Gulf States stock?

A. Well, I think it is impossible for me to say how many stockholders will exercise the warrants and how many will sell. I would expect that a great many of them would exercise the warrants in order to continue their interest in the operating subsidiaries, but I can't say what that percentage will be or speculate on that percentage. I think that the Board of Directors felt that the common stockholders would like to continue their interest in these operating companies and wanted to give them the opportunity of doing so and if they do not choose to exercise that opportunity they can do one of two things—they can sell their Engineers common stock now——

Q. Common stock?

A. I mean if they didn't want to continue their interest in the Engineers System they could go out and sell their common stock now. If they didn't want to continue their interest in Gulf States but did want to continue it in El Paso

and Virginia, they could sell their warrants in Gulf States. I don't know just what the reaction of each individual stockholder would be. I think that most of them will exercise their warrants, but I don't know.

Q. Now let's come to this common stockholder of Engineers and consider him as well as the preferred stockholder who owns common. Let's assume that he isn't too happy about getting into Gulf States. If he sells his warrants for an amount of something in excess of $11.50 he will have to do it during this 10-day period provided by the plan, isn't that so?

A. That is right.

Q. So to the extent that he makes——

A. Let me make one amendment to that. If there is a when issued market prior to that he could sell it in that time, too.

Q. But it would be within a comparatively short span of time?

A. That is right.

By Mr. Tucker:

Q. Isn't it true that the 10 days have now been made 12?

A. That is right.

By Mr. Condon:

Q. Now you are reasonably familiar with the provisions of the Internal Revenue Code in so far as sales of securities are concerned, aren't you, Mr. Benjamin?

A. In a general way.

Q. Yes, and you know that if he sold that warrant and made a profit of something above $11.50, he might have to report that as a short-term gain, isn't that so?

Mr. Tucker: We have opinions on the tax problem in here. I don't think this witness ought to be asked legal questions of that kind. I object.

Mr. Condon: Mr. Tucker, this witness was asked by you a multiplicity of questions over objection and he was qualified as an expert and this is a very simple problem.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Tucker: I object. I think you are calling for a legal conclusion and we have an opinion of my firm in here as to the tax problems and I think you ought to look to that for the tax problems.

Mr. Kanton: Mr. Examiner, may I make a suggestion that if this question is answered specifically in this tax opinion will Mr. Tucker please point it out? Perhaps we can get the answer that way.

Mr. Tucker: I have no objection to his quoting from the opinion. That is a legal conclusion that is founded on knowledge of the law.

The Examiner: Then your question calls for his conclusions on a legal question, that is, the effect of the income tax on this proposition. By reason of that I sustain Mr. Tucker's objection.

By Mr. Condon:

Q. Have you filled out your own income tax returns, Mr. Benjamin?

A. Yes, I fill out my own.

Q. And you are generally familiar as any laymen would be with the requirements of the Internal Revenue Code where you acquire a security and then sell it within six months, as to what that constitutes, are you not?

A. Yes.

Q. And that is normally a short-term gain, is it not?

A. Well, I don't know. I never had a situation where I acquired a warrant and sold the warrant, so I don't know what the effect is.

Q. This is novel to you?

A. It is, yes sir.

Q. Now is it your impression that that point is covered in Mr. Lynch's opinion, Exhibits 15-A and B?

Mr. Tucker: I object to giving his impression. I think he ought to look at the opinion.

By Mr. Condon:

Q. Please do so, Mr. Benjamin, and point out where that question is answered.

A. (No response.)

Q. Mr. Benjamin, during the noon recess, if you find it convenient, would you look at Mr. Lynch's opinion, being your Exhibits 15-A and B, and be prepared to point out if it is there any reference to the answer to this question, to-wit, assume that a common stockholder of Engineers and a preferred stockholder of Engineers who held common stock decided to dispose of his warrant, whether or not that transaction taxwise would constitute a long-term capital gain or a short-term capital gain or what it would constitute taxwise?

A. I shall be glad to look in Mr. Lynch's opinions and see if I can find an answer to that question.

Q. You testified in effect, Mr. Benjamin, that there was no attempt on the part of the Board to appraise or evaluate the Gulf States common stock or the value of the warrant. Is that correct, incident to the plan?

A. There was no attempt to make an appraisal of the stock except to the extent that was indicated, that it would be in excess of the initial——

Q. $10?

A. In excess of the initial market price of Gulf States over the warrant price.

Q. Is your answer the same with respect to a similar question concerning El Paso and Virginia?

A. Yes.

Q. There were no studies, appraisals, estimates or things of that sort made with respect to breaking down the values of these stocks in these different companies?

A. Well, Mr. Barnes made an estimate of the values of these three securities for his use and I believe that a statement was presented at the meeting of May 24th which indicated at that time the warrant plan contemplated both El Paso and Gulf States and a statement was presented to show the excess over the $10 a share.

Q. I hand you a memorandum bearing date 5/24/45 and ask you if this is the memorandum to which you have just made reference?

A. That is one of the sheets, I think, of the memorandum. I think there were one or two other sheets presented at that time.

Mr. Condon: This is off the record.

(Discussion off the record.)

Mr. Condon: Let's get back on the record, please.

By Mr. Condon:

Q. Mr. Benjamin, in colloquy off the record in which Mr. Barnes was kind enough to participate it appears that there were four sheets prepared for discussion at the meeting on submission to the Board in the latter part of May 1945 relating to the general subject matter of your previous answer. Would you be kind enough to produce those for our inspection at the next session? I understand that the papers are in New York but that they can be made available on Monday.

A. I think I can get them some time Monday.

Q. Or whenever we reconvene. Other than the statements that you have referred to constituting the four sheets identified by Mr. Barnes, there were no other studies made along that line of which you are aware?

A. That is right.

Q. I am asking the question with regard to all three companies.

A. I understand that.

Q. Now you made a statement a little while ago when the Examiner interrogated you with respect to it about paying off the preferred stock. Do you recall that?

A. Yes.

Q. Do you recall that exchange between the Trial Examiner and yourself?

A. I do.

Q. Isn't it a fact that the Board of Directors of Engineers might have given the preferred stock a right to participate in Gulf States by means of the warrant plan, if it had chosen to do so?

Richard N. Benjamin—Cross Examination (Cont'd)

A. I am just trying to see how that would work. I don't know any legal obstacle to that procedure offhand.

Q. You see no objection to it?

A. I wouldn't say that. I see no reason why it could not have been done.

Mr. Kanton: What did you have specifically in mind there, Mr. Condon, the distribution of the Gulf States common and the El Paso common to the preferred stockholders at certain values which were determined to be fair values for those securities, or the distribution of the common stocks of these two companies that I have just mentioned through the same warrant plan that is proposed now for the common stockholders?

Mr. Condon: Well it would be to include that group of preferred stockholders who own no common stock in the over-all right to participate in a continuation of the enterprise by acquiring securities in the subsidiaries.

Mr. Kanton: You mean to say the respective portion of whatever their interest is now in the total enterprise?

Mr. Condon: Yes.

Mr. Kanton: I see.

By Mr. Condon:

Q. Yesterday, Mr. Benjamin, you gave us a list of all the considerations that you could recall and by reference to the minutes of the meetings of the directors and your notes that were contemplated and considered by the Board in arriving at this plan. Do you recall giving that list, including Mr. Tucker's opinion and the contributions, the matter of retention of dividends, and that list? Do you recall that?

A. I think I gave that information to the best of my recollection as to which was based on expressions made by the directors that I could recall.

Q. Yes. Now since your testimony of yesterday have you had occasion to consider your testimony and do you

wish to add to that list? Have you thought of anything other or further than you have already testified?

A. I have not thought of anything additional, Mr. Condon.

Q. Can you state what considerations were given for the loss faced by the preferred stockholders with respect to their investment?

A. You mean by having the preferred stock retired?

Q. Retired at $100.

A. Well, I think my own feeling is that——

Q. (Interposing) I am asking you what the Board did, Mr. Benjamin, please, on that question.

A. I would like to strike that answer then. To the best of my recollection from discussions which I have heard at these meetings I think that the Board felt that since the liquidation of the company was required, that all classes of stockholders including the preferred would receive the amount which they were entitled to receive and that it would require the cessation of the interest of these preferred stockholders and the common stockholders in Engineers.

Q. Mr. Benjamin, my question was whether to your knowledge there were any discussions by the Board with respect to weighing the loss of the preferred stockholders' investment as a result of the proposed payment to them of $100 a share.

A. I don't recall any on that particular point.

Q. Was any consideration given by the Board of Directors to the different dividend rates on the three series of preferred stock in arriving at the price of $100 a share?

A. No, I don't think so.

Q. Do you recall any discussions at the Board meetings suggesting considerations given to the rights and risks of the preferred from an investment value standpoint?

A. Well, not expressed in those terms, Mr. Condon. The only thing I can recall is a discussion of the price at

which the stock was issued and some discussion of the cost of the market prices of that stock during the years.

Q. Other than that?

A. That is all I can recall.

The Examiner: In substance, your testimony is that the Board considered that the preferred stockholders were entitled to receive $100 and accrued dividend and nothing else; and that no other consideration was given as to how that might affect them, is that true?

A. No, I don't think that is true. I think that they took into consideration the other circumstances to which I have referred before.

The Examiner: What other circumstances?

The Witness: The fact that——

The Examiner: That they had only paid $100 or $99.50, as the case might be?

The Witness: That was one of the factors.

The Examiner: And the market value in the past, the market price in the past?

The Witness: And the fact that the company had been required to dispose of many of the enterprises into which it had gone and in fact that the equities had been built up behind the preferred stock, and things of that sort, Mr. Examiner.

The Examiner: But they didn't take into consideration or give any thought at all to the present value of the preferred stock in considering the amount that was to be paid the preferred stockholders?

The Witness: Well, the present market value of the preferred stock that was referred to——

The Examiner: I am not talking about the market value.

The Witness: I don't recall any discussion as to the present value.

The Examiner: I am not talking about the market value. They made no attempt to evaluate the preferred stock?

The Witness: I don't recall any discussion on that point, Mr. Examiner.

The Examiner: They just simply relied on Mr. Tucker's opinion and as I understand the testimony the opinion of the majority of the Board that in any event the preferred stockholders, as a class, were entitled to receive $100 and accrued dividends and no more, is that right?

The Witness: That is right. They thought it was fair to meet the contract provision.

The Examiner: And they did not think it was necessary for them to go into the equitable situation, if you please?

The Witness: No, sir, I wouldn't say that. I think they did consider the equitable consideration. I think Mr. Tucker's opinion went into that quite fully.

The Examiner: Wasn't Mr. Tucker's opinion based largely on the contract right of the preferred stockholder of $100?

The Witness: No, sir. He had several other considerations in that opinion, Mr. Examiner.

The Examiner: He dealt about the losses suffered by the common stockholders?

The Witness: Those were in there, yes sir.

The Examiner: But did he mention in there any losses suffered by the preferred stockholders or that might be suffered by the preferred stockholders in being required to get rid of their investment at this time? He didn't make any mention of that in there, did he?

The Witness: I don't think he said anything about cessation of the investment of the preferred stockholders, if that is what you are referring to.

The Examiner: That is what I am referring to.

The Witness: No, sir.

The Examiner: In other words, they made no attempt at all to arrive at the value of the preferred stock, the investment value of the preferred stock at this time, but relied entirely upon the contract rights to pay them $100 and accrued dividends?

The Witness: No, sir, I don't believe that is the case.

Richard N. Benjamin—Cross Examination (Cont'd)

The Examiner: Did they attempt to evaluate the preferred stock in arriving at the $100? I think your answer was no, isn't that correct?

The Witness: That is correct.

The Examiner: Then how did they give any consideration to anything else?

(No response.)

The Examiner: Let me ask you this before you answer that.

Why did you decide to pay the $5.50 preferred stock $100 and pay the $6 preferred stock $100? Why didn't you make a differentiation between the two?

(No response.)

The Examiner: I am asking if they considered that. That is my question.

The Witness: Mr. Condon asked me the same question, I think exactly the same question. I said they did not consider any difference in the treatment for the three series of preferred stock, so that the only thing——

The Examiner: So that the only thing they gave consideration to then was the contract right as expressed by the charter of the corporation?

The Witness: No, sir. Would you let me——

The Examiner: I wish you would clear that up because it is not clear to me.

Mr. Tucker: My opinion is in the files here as an exhibit and I think it ought to speak for itself. That was one of the considerations according to the exhibit, which is No. 38. There were a lot of other things considered in there besides the contract. In fact, if anybody would take the trouble to read my opinion they would see that I said in that opinion quite frankly that I didn't think that that was the sole consideration. I think the difficulty is that my opinion has not been read, but you have been asking the witness to characterize it. I said that that was one of the considerations and that taking all of the considerations it

seemed to me even in view of the Otis case that it was fair and equitable to pay them $100 and accrued dividends and I say that when you say that I pinned it on the contract alone, you are not properly characterizing my opinion because I did quite the opposite.

The Examiner: Off the record.

(Discussion off the record.)

The Examiner: Back on the record.

The Examiner admits that he has not seen or read a copy of Mr. Tucker's opinion because it was not given to him. A copy has now been handed to him and I will take the opportunity to read it just as soon as I can.

My questions to the witness, Mr. Benjamin, were whether the Board itself at the meetings at which you were present discussed this question of a differentiation between the $5.50 and the $6 preferred stock.

The Witness: To the best of my recollection they did not discuss that point, Mr. Examiner.

The Examiner: They relied then entirely upon Mr. Tucker's opinion or upon their own opinion that the preferred stock was only entitled to their contract rights, is that right?

The Witness: In the light of the circumstances mentioned in Mr. Tucker's opinion and the other circumstances that I have referred to from time to time in my testimony.

The Examiner: I think I have covered that now.

By Mr. Condon:

Q. Mr. Benjamin, following the general line of inquiry of the Trial Examiner, it is a fact, is it not, that there was no consideration given by the Board in your presence to the determination of going concern value for the preferred stock?

A. That is correct. May I add, I think your question included, to the best of my recollection.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Yes. Do you recollect the position taken by Mr. Streeter here?

A. Yes, I do.

Q. Is it not the fact that Mr. Streeter, at or about the time that Mr. Tucker's opinion was submitted to the Board went on record as being against the Plan that was discussed which proposed retiring the preferred stock at par instead of its call price, he felt this was an attempt on the part of the common stockholders to retire the preferred stock at par, while the equity in the properties remained with the common stock? Do you recall his taking that position?

A. I do.

Q. And did he not take the position that he felt that this was not an "involuntary liquidation," as set forth and referred to in the charter of the company?

A. I recall his saying that this was not a liquidation at all. Let me look at that letter, Mr. Condon.

(Letter handed to the witness.)

The Witness: Thank you, Mr. Condon. That refreshes my recollection.

Mr. Streeter did make the statement that he did not consider this to be an "involuntary liquidation."

The Examiner: When he said that refreshes his recollection, he was referring to a memorandum which Mr. Condon handed him, a memorandum of Mr. Streeter's, dated July 26, 1945, as revised July 30, 1945.

By Mr. Condon:

Q. Was it not also Mr. Streeter's position at that meeting that the effect of the proposal to pay the preferred $100 a share was, in effect, merely a partial retirement of outstanding capital stock? I again hand you the memorandum. (handing paper to the witness).

Mr. Kanton: May I suggest that if counsel and the witness are willing, and the Examiner is willing, that this document being referred to between Mr. Condon and Mr.

Benjamin be identified, and perhaps placed in evidence, if they so wish?

Mr. Condon: I will be very glad to do it. I recognize the document as an exhibit might be hearsay, and consequently I didn't wish to offer it at this time. I would be very pleased to identify it as a memorandum.

By Mr. Condon:

Q. Mr. Benjamin, is the document which I now hand you, and which I have already identified by date and by office in response to the Examiner's question, a copy of a memorandum that you recognize as having been prepared by Mr. Streeter, and voicing his expressions of view at or about the time it purports to bear date?

A. Yes.

Mr. Condon: May I have it marked as Preferred Stockholders' Exhibit——

Mr. Tucker: You spoke something about a revision. What is the revision?

Mr. Condon: Revision as of July 30. It so states.

Mr. Tucker: What was the date of the meeting?

Mr. Condon: The 26th or 27th.

Mr. Tucker: So this could not have been anything Mr. Streeter had at the meeting. It is his recollection, frankly, of what he said at the meeting.

Mr. Condon: Are you telling me? I'll take your statement. Were you at the meeting?

Mr. Tucker: Yes, I was at the meeting.

Mr. Condon: Are you suggesting that that does not purport to represent the position taken by Mr. Streeter?

Mr. Tucker: I am only suggesting that it shows on its face that it was revised after the date of the meeting and it could not have been anything that Mr. Streeter had at the meeting under those circumstances.

Mr. Condon: You are arguing from the document. Let us talk to the witness. Let us continue the way I was.

Richard N. Benjamin—Cross Examination (Cont'd)

That brings into focus why I was not offering the document.

May this be marked as Preferred Stockholders' Exhibit 14 for identification, exclusive of the pencil notations which are for the assistance of examining counsel?

Mr. Tucker: May I see the pencil notations?

(Discussion off the record.)

(Preferred Stockholders' Exhibit No. 14 is marked for identification.)

By Mr. Condon:

Q. Mr. Benjamin, to digress a moment, I think I used the term "par value of the preferred stock." This stock is no par value, is it not?

A. That's right.

Q. I meant the price of $100 a share, and I would like the record to so indicate,—that counsel was inaccurate in his characterization.

Coming back to this meeting and your recollection of Mr. Streeter's position, is it a fact Mr. Streeter considered that the proposal was merely a partial retirement of outstanding capital stock and its preferred, of Engineers?

A. He made that statement.

Q. At the meeting?

A. To the best of my recollection he made that statement at the—I'm not sure which meeting, whether it was the July 26th meeting or the September 5th meeting—I think he did make that statement.

Q. At all events, it was made, according to your best recollection, prior to action of the Board in adoption of the Plan?

A. That's right.

Q. Did he also take the position that prior to September 5 and prior to the adoption by the majority of the Board that to retire the preferred stock here at $100 a share in the light of all the circumstances, would create a wind-

fall for the common stockholders at the expense of the preferred stockholders?

A. Yes, I recall his making that statement.

Q. Do you also recollect that he took the position that it was highly inconsistent on the part of Engineers to rely upon the Public Utility Holding Company Act as the authority for the action to pay the preferred off at $100 while continuing to assert in the Supreme Court of the United States that the Act itself was unconstitutional?

A. Yes, I recall his making that statement.

Q. Now, I hand you this memorandum which has been marked Preferred Exhibit 14 for Identification, and ask you to examine it and see if there is anything set forth therein that does not accord with your recollection of the contentions urged by Mr. Streeter prior to the adoption of the Plan on September 5th?

A. I see nothing in this memorandum that was not urged by Mr. Streeter.

Q. Thank you.

Mr. Condon: Do you have any questions about this, Mr. Tucker?

The Examiner: Do you want to offer this now?

Mr. Condon: I don't think it is necessary. I have no objection to offering it. I don't think it adds anything.

Mr. Kanton: I believe, as long as the contents have been put in through the witness, it is not necessary.

The Examiner: It is up to Mr. Condon.

Mr. Condon: I asked the last question to dispel the lingering doubt that apparently was in Mr. Tucker's mind.

By Mr. Condon:

Q. Mr. Benjamin, this document that has been identified as Preferred Stockholders' Exhibit 14 for identification, dated July 26, 1945, and revised July 30, 1945, could you state whether or not to the best of your knowledge, information and belief, that was prepared by Mr. Streeter and sent to Mr. Barnes and the other directors as representing

the position which he planned to take at the time of the vote on the adoption of the proposed plan?

A. That is my understanding.

(Discussion off the record.)

By Mr. Condon:

Q. Now, Mr. Benjamin, coming to your Plan, and more particularly that portion of Part 1 or Step 1 of the Plan that relates to the deposit of $100 per share and accrued dividends, to the date of the deposit, for the extinguishment of the interest of the preferred stock—do you have that provision in mind?

A. Yes, I do.

Q. Do you recall being interrogated by Mr. Kanton as to what protection the preferred stockholders would have, if any,—and I believe in your testimony you said you felt the retention of Virginia stock was all that the preferred stockholders were entitled to and that you had been so advised by counsel.

A. You are speaking now of the protection for payment in addition to the $100?

Q. Yes.

A. I don't recollect the exact phraseology, but the substance is that we believe that the Virginia common stock would provide adequate protection for this differential, yes, sir.

Q. Have you made any estimates as to the maximum amount of this so-called differential that is involved as one of the issues involved this proceeding, more particularly under Step 2 or Part 2?

A. We have considered that this liability, contingent liability, would not exceed $3,204,795 plus the possibility that the Commission might find that interest at some rate would be determined to be payable on that account.

Q. And at what interest did you estimate with regard to that possibility, Mr. Benjamin?

Richard N. Benjamin—Cross Examination (Cont'd)

A: Well, we thought that amount would not exceed six percent.

Q. Over how long a period did you make that estimate?

A. Over how long a period did we estimate that 6 percent might run?

Q. Yes. And on that base might it be applied?

A. Well, the base on which it would be applied is the $3,200,000 figure I just mentioned, approximately, and we thought that it was reasonable to expect that this matter would be settled within a two-year period.

Q. A two-year period?

A. A two or three-year period, somewhere in that neighborhood.

Q. Did the Board give any consideration to the possibility that a preferred stockholder who didn't own common might feel aggrieved at this proposal and refuse to acquiesce in the Board's decision to have a deposit made to cut off his rights, a deposit of $100, and be unwilling to turn in his certificate and might litigate this question and that he might be entitled to his 6 percent if he owned $6 series of the preferred, for this three-year period on the entire amount?

A. The Board gave consideration to the possibility that this plan would be litigated, Mr. Condon. I don't recall that any of the directors passed on this point in the way you outlined as a possibility, except that Mr. Streeter, I believe, did say that some preferred stockholder might object to the splitting of parts 1 and 2 of the Plan.

Q. Mr. Streeter brought out that, did he?

A. I think he did.

Q. When did he bring that up?

A. I think he brought it up at the last meeting on December 15.

Q. When?

A. December 15.

Q. What else did he say with respect to that same general subject matter, if you recall?

A. He said that if the preferred stockholders were successful in that contention, of course it would mean that the company would have to pay preferred dividends on all of the outstanding preferred stock until the matter was settled.

Q. And how much would that estimate, Mr. Benjamin, if it lasted three years? Would you do a little very simple arithmetic?

A. Well, the preferred stock dividends are all of the Engineers' stock outstanding, approximately—well, they actually were for the twelve months ended June 30, $2,119,092, so that if the payment of these dividends continued for two years, it would be $4,200,000.

Q. Three years, and it would be another $2,000,000?

A. That's right.

Q. In other words, Mr. Benjamin, if the Commission should not go along with your plan and should find it unfair and inequitable to leave it in the power of your Board to split what it might consider an obligation, it might happen that if this matter were litigated for two and a half or three years, it might add another four to six million dollars of dividends to your financial calculations? Is that a fair statement?

A. Well, I don't want to confuse, Mr. Condon, the—— You started out by asking me whether Virginia common stock was sufficient protection for the preferred stockholders. This is a little different situation. If parts 1 and 2 of the Plan are not split, then Engineers stays as it is until Part 2 of the Plan is finally settled. It is true that if the Commission does not find it fair and equitable to split 1 and 2, that preferred dividends are likely to go on, will go on; but if Part 1 is acted on separately and a Court order is obtained on that part of the plan, then it is the $3,200,000 figure, I believe, plus interest, which would be the amount against which you would offset the security of the Virginia Electric common stock. You mentioned one other possibility that some preferred stockholder might

not accept the $100, and I assume that was on the assumption that Part 1 of the Plan was split, is that correct? You started off by asking me—

Q. Either way—either it was or was not. It doesn't make any difference so far as my question is concerned. You can make either assumption.

A. If Parts 1 and 2 are not split, then there is no problem, I don't believe, because you have all the assets of Engineers that they have today to secure the preferred stock.

Q. And, in addition to that we have the problem of possibly two or three years' dividends that might range from four to six million dollars in excess of your calculations, depending upon how long the case was litigated, or took; isn't that a fair statement?

A. Well, you say "in excess of my calculations." The calculations I referred to was the premium point. I think we understand each other, though.

Q. That is the $3,200,000, and your calculations from the standpoint of possibilities, if I understand you, went no further than calculating a six percent interest rate on the $3,200,000 which you call the premium point; do I understand you correctly?

A. That is correct—

Q. Now, I am asking you if there are not other and further possibilities, and I am suggesting one, that the Commission should not split Parts 1 and 2, but should find it unfair and inequitable so to do, and should say "Until this question of how much in excess of $100 a preferred stockholder is entitled to receive, that it shall be the duty of Engineers to continue to pay him dividends?

A. That's right.

Q. How much might that amount to? And I ask you if that has been considered in your calculations?

A. Well, that is the annual dividend rate that we have already talked about, and that might, if this dragged on for two or three years, amount to four to six million dollars.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. And in your general financial considerations, that hasn't played any part, and didn't, in the minds of the Board? Isn't that a fair statement?

A. The Board felt that that was not a reasonable possibility.

Q. Were they advised by counsel on that point?

A. That point was discussed with Mr. Tucker.

Q. Did they find any reflection in any written opinion of Mr. Tucker's,—and I am referring to that July 26th opinion, 1945, Mr. Benjamin.

A. I do not believe that that point was covered in Mr. Tucker's opinion, but it was discussed at meetings, to the best of my recollection.

Q. At what meetings—and would you please refer——

Mr. Tucker: Why don't you let him finish. He says "To the best of my recollection"—something, and then you interrupted him.

Mr. Condon: I thought he had finished.

Mr. Tucker: Well, he hasn't.

The Witness: Well, will you read my answer?

(The record was read.)

By Mr. Condon:

Q. Had you finished your answer?

A. No. At the July 26th meeting when the draft of the Plan was put up for the first time in this form, it was explained why we had three parts to the Plan, and the purpose of putting the Part 2,—what is now Part 2 of the Plan, in Part 2, was to segregate this issue, so that Part 1 of the Plan could be carried through promptly and that this issue—they realized there might be and would be some difference of opinion on it—was put in this separate part of the Plan, and to the best of my recollection, that Plan was discussed with Mr. Tucker, and he said that he thought it was reasonable to expect that the Commission and the Court would permit this split, so that I think the directors had that very much in mind.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. You fix that time as the July 26 meeting, or thereabouts?

A. I think that is the first time that split came up, to the best of my recollection.

Q. When Mr. Barnes requested Mr. Tucker for an opinion, did he make that request orally or in writing?

A. I think he made it orally.

Q. Were you present when the request was made?

A. Well, at one of the directors' meetings—I am not sure just which one—I think Mr. Barnes stated that he would ask counsel to prepare an opinion on this whole subject. I am not sure just which meeting that was. I think it was a meeting in the Spring, but I am not sure just which one.

Q. Do you recall the points that Mr. Barnes asked Mr. Tucker to cover in his opinion?

A. Well, I think he asked him to cover primarily at this point the amount payable to the preferred stockholders.

Q. Do you recall whether or not he asked him, either at that time or at this July meeting, to give his opinion concerning the right of the Engineers Company to split this payment into two parts, part that it felt that it should pay now and what it might be called upon to pay at a later date, and not make any provision in the interim for the rights of the preferred stockholders?

A. I think that Mr. Tucker was asked to express his opinion as to the right of the Company to split Parts 1 and 2, and that Mr. Tucker answered that question to the effect that he thought the Company had a right to do it, and that the Commission and the Courts would find it fair and equitable to do so.

The Examiner: That was done orally at a meeting?

The Witness: Yes, sir.

The Examiner: There was no written opinion on that?

The Witness: I don't recall that.

Mr. Kanton: Wasn't there Parts 1, 2 and 3 at that time, Mr. Benjamin?

The Witness: Oh, yes.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. Now, I gather that, in response to the Examiner's question, that this particular point to which I have just made reference, was brought up at this meeting that you fix as on or about July 26th and that Mr. Tucker's opinion was not written, but it was a spontaneous expression by Mr. Tucker?

A. I don't think it was a spontaneous expression by Mr. Tucker, because I think Mr. Tucker had given consideration to it prior to that time, in connection with working on drafts of the Plan.

Q. Now, had he ever rendered any written opinion on that subject?

A. I don't think so.

Q. He had been working on prior drafts of the Plan; he had been working on them prior to July 26th, hadn't he, when he rendered his opinion?

A. Well, he certainly had been discussing them prior to that time, I think.

Q. You had drafts of that plan in June, didn't you, Mr. Benjamin?

A. Yes, I think we did.

Q. Did anyone bring up the question that some preferred stockholder might contend that he was being deprived of his property without due process of law if that technique were adopted by the Board of Directors and approved by the Commission?

A. No, I don't think so.

Q. Is that a new concept to you in this situation?

A. Yes, it is.

Q. Coming back to this question of securing the preferred stockholders to whatever amount, if any, this Commission may decide the preferred are entitled to receive in excess of $100, you answered Mr. Kanton to the effect that there was no security, is that correct? I think he brought it out in the question of the form of a trust or escrow. I don't mean to quote him.

Richard N. Benjamin—Cross Examination (Cont'd)

A. You mean the money that is actually put up with the Chase?

Q. I am talking about provision to protect the preferred stockholders in the event that the Commission should decide, and that that decision be upheld by the Court, that these preferred stockholders are entitled to something in excess of $100 a share plus accrued dividends, to the date of deposit?

A. Oh, yes.

Q. Do you recollect that line of inquiry by Mr. Kanton?

A. Yes.

Q. I believe he asked you in words or substance why there was no provision made to escrow funds or put something up in trust. Do you recall that?

A. Yes, sir; I do.

Q. Do you recollect that you said that you had been advised by counsel that it wasn't necessary?

A. I am not so clear on that recollection.

Q. What is the fact?

A. My recollection is that Mr. Tucker has told us that it was not necessary to escrow or put cash up in trust, but that the security represented by the Virginia stock would be sufficient protection.

Q. Isn't it the fact, Mr. Benjamin, that there is no statement to that effect in Mr. Tucker's opinion? And I am talking about the Tucker opinion of July 26th.

A. I don't believe that there was anything in his opinion on that.

Q. Didn't anyone have any idea about securing the preferred stockholders against contingencies by having such a trust fund or a sum put up in escrow?

A. I don't recall that anybody raised that question, Mr. Condon.

Q. Mr. Benjamin, I hand you a memorandum dated July 23, 1945, which is just three days before Mr. Tucker's opinion, and I refer you to Step 6, which reads as follows:

Richard N. Benjamin—Cross Examination (Cont'd)

"Engineers will deposit $3,204,890 in escrow to cover any liability for premiums on the retirement of preferred, if such liability is established in final adjudication."

And there is a very nice little pencil mark crossed through it.

Will you examine it and tell us the circumstances of the elimination of that proposal?

A. Well, some of the cases before this Commission,—I think Laclede was one of them——

Q. Laclede Gas Light?

A. I think that was one—it did have a provision for depositing funds in escrow to cover a similar contingent liability; and I believe that this was put in here——

Q. By whom?

A. By someone in the office, our counsel, either Mr. Tucker or Mr. Barnes or myself, in a tentative draft of a plan.

Q. Three days before Mr. Tucker's opinion?

A. This was three days before—just a minute. This original draft was dated July 13 and it is revised on July 23 to remove this step that refers to deposit of funds in escrow.

Q. Yes.

A. And if I could look at the later draft of plans that I furnished you——

Q. Yes sir—I will be very pleased to give them to you.

(Document handed to the witness.)

The Examiner: This memorandum that Mr. Benjamin is looking at,—just what is it?

Mr. Condon: I am going to identify it, Mr. Examiner. I would like the record to show that the memorandum to which I was addressing the witness's attention preliminarily is a memorandum supplied to me by him.

The Examiner: From the records of the Company or from what source?

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Condon: From the records of the Company, bearing date, typed, 7/13/45, and two pencil marks through the "13" and the figures "23" so that it reads 7/23/45 in the upper right-hand corner. And this memorandum is captioned "Engineers Public Service Company, liquidation plan (to be effective not earlier than January 1, 1946)" and consists of two sheets, the second of which is marked "Sheet 3."

I don't suggest that anything has been removed by that. I would just like to note that they are physically clipped and it is undoubtedly a typographical error.

By Mr. Condon:

Q. Mr. Benjamin, what you are looking for is the original draft, I hand that to you now, as being dated July 13, 1945, and bearing your initials under the date.

Would you look at that while you are examining the documents?

A. There were a good many drafts of plans along in this period. Apparently this revision of July 23 removed from the Plan the provision to put up $3,204,000 in escrow to cover liabilities for premiums.

Q. By "premiums", Mr. Benjamin, you mean whatever amount, if any, in excess of $100, this Commission might determine to be fair and equitable to be paid to the preferred; is that right?

A. That is correct. Well, on July 23, as I say, that provision was apparently removed, and to the best of my recollection, the reason it was removed was because it was no longer thought to be necessary to actually put the money up in escrow, that it would be sufficient protection, and would avoid the necessity of raising that much cash, to hold the Virginia common stock as security for that contingent claim.

Q. There was no thought about putting up Virginia common stock in escrow, of course, was there?

A. I can't recall whether that was suggested or not, but I did not believe that it was necessary to do that.

Q. You knew that the Commission had required that in the Laclede Gas Light case, didn't you?

A. Yes.

Q. And that provision was contained in the draft down to the 23rd of July; is that right?

A. That's right.

Q. Who struck it out?

A. Well, I probably did.

Q. You struck that out?

A. I probably struck it out after discussions with other people in the office.

Q. Well, with what other people did you discuss it?

A. Mr. Barnes, and, I think, Mr. Tucker.

Q. Well, is that your impression, that you did discuss it with Mr. Tucker?

A. Yes, that is my impression.

The Examiner: Was this memorandum used at a Board meeting or was it something prepared by the management and considered before the Board meeting?

The Witness: Well, it was prepared prior to the directors' meeting on July 26.

The Examiner: Was the striking out of that paragraph in there discussed with the Board?

The Witness: Well, I don't know that that matter was discussed, Mr. Examiner. I don't recall. I think the subject was discussed as to whether or not it would be sufficient protection to hold the Virginia common stock for the preferred stockholders' contingent claims, and the possibility of an escrow fund may have also been discussed as an alternative, but I don't ever recall anybody saying that they thought that that would not constitute sufficient protection for the preferred stockholders.

The Examiner: That contingency was considered by the Board, though, wasn't it? That is, the possible contingency of having to pay in addition to $100?

The Witness: Oh, yes, yes.

The Examiner: Was it the opinion of the Board that it was so remote that it wasn't necessary to set up a fund for that purpose?

The Witness: Oh, no, that wasn't it, Mr. Examiner.

The Examiner: Just what occurred at the Board, if you recall?

The Witness: My recollection of what transpired was that when the Plan was explained, the directors felt that the keeping of Virginia common stock would be adequate protection against any such claim.

By Mr. Condon:

Q. In other words, the preferred stockholders, to the extent that they were entitled to any excess above were to be reduced to the status of general creditors of Engineers? Is that the import of your answer to the Examiner?

A. (No answer.)

Q. And that, despite the fact that their securities were to be quarantined or insulated and delisted from the Exchange, deprived of negotiability, and all they have left was a lawsuit?

A. That is a pretty long question. Would you read it, please?

(The record was read.)

The Witness: I think that the directors felt—I know I feel that——

By Mr. Condon:

Q. Would you talk about the directors, please, Mr. Benjamin, with no disrespect to you, sir?

A. To the best of my recollection, I think the directors felt that there was such ample protection for the $3,204,000 contingent liability that there would be no question but that the preferred stockholders would be adequately protected.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Kanton:

Q. Is that going to appear upon your pro forma balance sheet as a contingent liability?

A. It already is.

By Mr. Condon:

Q. Did the directors have before them your proposed loan agreement with the Chase Bank at that time?

A. The directors knew that the Plan contemplated a loan. Let me see when that loan agreement was presented.

That loan agreement was presented at the directors' meeting held September 27, 1945.

Q. That was after the Plan was already adopted and filed with the Commission, wasn't it?

A. That's right.

Q. Then the directors couldn't have had in mind the provisions of the loan agreement which barred the sale of Virginia stock to the extent of $3,000,000 unless the proceeds were first applied to retire the bank loan; is that so, Mr. Benjamin?

A. I think that's right. The loan agreement itself wasn't presented until September 27, and I don't recall that that particular provision of the agreement was referred to at any earlier meeting.

Q. And was your answer the same with respect to an additional four and a half million that the company might have to borrow that in turn would have to be reimbursed from the sale of Virginia preferred stock before Virginia stock would be considered to be a free asset again?

Mr. Tucker: You say the sale of Virginia preferred stock?

Mr. Condon: I am sorry. Virginia stock. Thank you, Mr. Tucker.

The Witness: Well, as to the $4,500,000, Mr. Condon, $3,000,000 of that, approximately, could only be borrowed for the purpose of paying this amount we have been discussing, to the stockholders.

Mr. Tucker: You mean by that the $100 plus accrued dividends?

The Witness: No, sir; I mean the excess over $100. In other words, we propose to borrow $3,000,000 now for the purpose of raising funds to pay off $100.

Mr. Tucker: $3,000,000.

The Witness: That is the first $3,000,000. Then there is a second $3,000,000 so, to the extent of the first $3,000,000 the preferred stockholders are receiving that cash.

The second $3,000,000 is for the purpose of paying substantially all of the excess over $100 to the preferred stockholders.

The $1,500,000, just to complete the picture as to where that figure came from, was in case Western Public Service had not been sold, because we had been counting on $1,500,000 from that.

It is expected that that company will be sold this month, so that we won't need that extra $1,500,000.

Mr. Kanton: If that $1,500,000 is acquired from the sale of the Western Public Service, will you need the $3,000,000 on hand in order to pay off the preferred stockholders at $100 a share plus accrued dividends?

The Witness: Yes. In other words, our estimate of the cash at the end of 1945 included the proceeds from Western, and this $1,500,000 was just put in there to safeguard against the possibility it wasn't sold.

[R. p. 843] By Mr. Condon:

Q. Mr. Benjamin, before the luncheon recess we were talking about a memorandum dated 7/13/45 that had the date "13" crossed out and the figures "23" put on it, and it was captioned, "Engineers Public Service Company Liquidation Plan, to be effective not earlier than January 1, 1946."

Would you state from an examination of that document which you sent to me from the files of the company whether

or not that represents a subsequent draft to the memorandum dated 7/13/45, bearing your initials, to which I referred this morning, and which also came from the Engineers' files?

A. Yes, it is the same draft, marked to show certain changes.

Q. Yes.

Mr. Condon: Now, may I have marked as Preferred Stockholders' Exhibit 15A the one memorandum just referred to, bearing date 7/13/45?

Mr. Tucker: For identification?

Mr. Condon: For identification, and I ask that the one dated 7/23/45 be marked 15-B for identification.

The Examiner: Let them be so marked.

(Preferred Stockholders' Exhibits 15-A and 15-B are marked for identification.)

By Mr. Condon:

Q. Mr. Benjamin, you made the statement, referring to that document marked for identification, and I hand you Exhibit 15-B for identification of the preferred stockholders, dated July 23, 1945, and I ask you if that which I have just handed to you is a memorandum indicating the changes that were made on Preferred Stockholders' Exhibit No. 15-A, which is dated July 13, 1945, so that the record will be clear?

A. Yes, that is correct.

Q. Mr. Benjamin, was any notice of amendment No. 4 to the Plan filed here that was adopted on or about December 15, 1945, given to the stockholders of Engineers, either common or preferred?

A. No.

Q. You recognize, do you not, that that amendment No. 4 purports to restrict the rights and privileges of the stockholders, both common and preferred, with respect to substantive rights under the Plan?

A. We discussed the possibility of giving notice and felt that the changes were not such that it would affect the rights of either class of stock adversely.

Q. Did you receive an opinion to that effect?

A. We discussed it with Mr. Tucker, our counsel, and that was his opinion.

Q. That was an oral opinion also?

A. Yes.

Q. Was it discussed at the same time that the stockholders were not to have any right to demand anything other than Virginia stocks from the liquidating trustees as and when they were prepared to wind up their functions as such?

A. That is correct.

Q. This morning we were discussing the question as to whether or not Mr. Lynch's tax opinion, Applicant's Exhibit 15-A in evidence covered the situation with respect to whether or not the sale of a warrant by a common stockholder of Engineers, or a preferred stockholder who owned common stock would be considered tax-law-wise a long term capital gain or otherwise. Do you remember that inquiry?

A. Yes, I do.

Q. And I asked you if you would examine Mr. Lynch's opinion and refer by page and paragraph number, if you would, to the section of the opinion which you feel, if you do, covers the point. Will you do so?

A. Yes. I looked at Mr. Lynch's opinion during the lunch hour and found the following statement on page 8 of Applicant's Exhibit 15-A:

> "For the purpose of determining capital gains and losses on the sale of warrants for the period during which was held the Engineers' stock in respect of which the warrants were issued is to be added to the period during which the warrants were held"

and then it goes on to show that the basis of his opinion is Code Section 117(h)(3).

[R. p. 850] Mr. Condon:

Q. You knew that in connection with its bank loan, did you not, and in the retirement of its prefefred, it was going to pay the premium on that preferred?

A. Yes, I did.

Q. Did your Board know that?

The Examiner: When?

Mr. Condon: At the present time, so far as he knows.

The Witness: I don't know whether they know about that or not, Mr. Condon.

By Mr. Condon:

Q. Was that brought to the attention of the Board by anyone, as far as you know?

A. I don't recall whether it was or not.

Q. With respect to the Engineers' System, the Engineers Public Service Company, it has no bonds outstanding, has it, or debt?

A. That is correct.

Q. Would you say that it was an enterprise that was soundly conceived?

A. Yes, I think so.

Q. And you testified yesterday that it was soundly managed?

A. Yes.

Q. Competent people, not only in the holding company system, but also in its subsidiary operating companies?

A. Yes.

Q. Is it in sound financial condition and is it solvent?

A. Yes, I think it is.

Q. Would you say that the three utility operating subsidiaries were growing enterprises, with good prospects?

Richard N. Benjamin—Cross Examination (Cont'd)

A. Yes, I think the operating subsidiaries have good possibilities of growth. There are certain other factors that you have to keep in mind in connection with that. I think they are sound operating companies.

Q. Before the Public Utility Holding Company Act, there was no thought of liquidation on the part of Engineers, was there?

A. No, I don't think so.

Q. Is it the general impression of the Board that the earnings of the operating subsidiaries will increase? Are they optimistic?

A. I don't know.

Q. You are not able to answer that question?

A. I don't know what the opinion of the Board is as to the future trend of earnings of Engineers and its subsidiaries.

Q. Well, as far as the prognostications are concerned, let us take 1946. Would you say that they were on the upturn, the net earnings?

A. The estimates indicate that for the three operating companies, the balance for common stock and surplus in each case will be larger in 1946 than in 1945.

* * * * *

[R. p. 853] Mr. Condon:

Q. You heard Mr. Barnes testify, I think, on cross-examination, with respect to a possible refunding of the Engineers' preferred stock ex—the existence of the Public Utility Holding Company Act?

A. Well, I heard him testify that he thought the refunding could be done on the basis of present market conditions, ex—the Public Utility Holding Company Act.

Q. Was there any exploration with respect to the possibility in that regard in this case, Mr. Benjamin, as far as you know of?

A. You mean any time limit?

Richard N. Benjamin—Cross Examination (Cont'd).

Q. No, no. I mean, did you explore that possibility here?

Mr. Tucker: You say "ex—the Act". We have the Act.

Mr. Condon: I am just asking him if he explored the possibility of what rate it might have been refunded, Mr. Tucker.

The Witness: I have not personally, but I think Mr. Barnes has.

By Mr. Condon:

Q. Inclusive of the Act, there is no present danger of any default or bankruptcy or financial misfortune that faces the Engineers' System, as far as you know, or the company in particular?

A. No.

Q. It is a solvent, sound, going concern?

A. Yes.

[R. p. 856] By Mr. Condon:

Q. Mr. Benjamin, in response to questions propounded to you by staff counsel, you gave some testimony with respect to the matters of freezes, more particularly concerning Virginia and more particularly a 1944 freeze and a 1945 freeze.

A. Yes, sir; I did.

Q. If my memory serves me correctly, the 1944 freeze was $55,000 a month or thereabouts and it ends in or about the month of September, 1946, is that right, this year?

A. (No answer.)

Q. I have here the fifth supplemental announcement, and certainly in one page it will give us the whole picture. Will you look at that, if you will?

A. The first $55,000 a month freeze in the case of Virginia runs out 25 calendar months after September, 1944, which is approximately October, 1946.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. That is this coming October?

A. Yes, sir.

Q. Of this year?

A. That is correct.

Q. All right. Now, will you tell us about the second freeze, its amount and expiration date, approximately?

A. The second freeze is at the rate of $75,000 a month and it runs for 116 months after September, 1944. That is a period of nine years and eight months after September, 1944.

Q. That would run into some time in 1954?

A. May, 1954.

Q. Now, I have handed to you what purports to be a copy of a fifth supplemental indenture dated March 1, 1945, captioned "Virginia Electric and Power Company, to Chase National Bank of the City of New York, Trustee, relating to an issue of First and Refunding Mortgage Bonds, Series E, 2¾ percent, due March 1, 1975, and supplementing and modifying indenture dated November 1, 1935, as heretofore supplemented and modified."

A. (Examines.)

Q. I ask you if this is a copy of the document that I have identified that you supplied me with from the files of Engineers.

A. Yes.

Q. Now, I address your attention particularly to page 67, page 68, and the first two lines of page 69, more particularly article designated 4, captioned "Additional covenants of the Company," and I ask you whether or not that paragraph is the section of the indenture relating to the freezes with respect to which you have just testified?

A. Yes, it is.

Mr. Condon: I offer that in evidence, with the right on the part of any counsel to offer the balance of the document if they feel that it is relevant and material to the issue.

Mr. Tucker: No objection.

Richard N. Benjamin—Cross Examination (Cont'd)

The Examiner: That will be received in evidence as Preferred Stockholders' Exhibit No. 16.

(Preferred Stockholders' Exhibit 16 is received in evidence.)

[R. p. 861] By Mr. Condon:

Q. You also indicated, or testified that freezes pertaining and relating to Gulf and El Paso—am I correct?

A. Yes, sir.

Q. Would you state as precisely as you can for the record, the facts with regard to the freezes of those two companies?

A. First, taking up Gulf States, there is a freeze of $18,190 a month for the first 120 full months after October 31, 1944.

That is a period of ten years, so that that freeze would expire approximately in November of 1954.

In addition, there is a further restriction on the payment of common dividends. Common dividends may not be paid in an amount in excess of 75 percent of the net income available for dividends on the common stock if, after giving effect thereto, the aggregate of the following: (1) common stock capital account, (2) earned surplus account, and (3) capital surplus account, is less than 25 percent of the aggregate of (a) the principal amount of then outstanding debt, (b) preferred stock capital account, excluding premiums and assessments on capital stock account, (c) common stock capital account, (d) earned surplus account, and (e) capital surplus account.

Q. With respect to those two so-called freezes, is the first freeze coincident to a financial transaction affecting Gulf? If it is, will you state the facts pertaining to it?

A. Yes, it is.

In October, 1944, Gulf States issued 120,000 shares of $4.40 dividend preferred stock, partly in exchange for former Series of the preferred stock and partly sold for cash.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Will you please continue, Mr. Benjamin.

A. That is all.

Q. Have you finished?

A. Yes, sir.

Q. With respect to the sale of 120,000 shares of $4.40 preferred stock, will you state for the record what number of shares were sold for cash and the amount thereof, and what number were used in exchange for the outstanding preferred theretofore existing?

A. Yes, I would be glad to.

68,855 shares of the old preferred stock, and by that term I mean the $6 dividend and the $5.50 dividend preferred stock, being 68.86 percent of the 99,994 shares outstanding, were deposited for exchange.

The underwriters purchased the balance, namely, 51,145 shares of the new preferred stock.

Q. Was there any premium on that stock?

A. That stock was sold to the public at $106 a share.

Q. With respect to the old $6 dividend and the $5.50 dividend preferred stocks of Gulf, did that require the payment of any premium by the company?

A. The shares that were not exchanged were redeemed and the voluntary redemption premium paid.

Q. What did that amount to?

A. In the case of the $6 preferred stock it was $110 per share, the voluntary redemption price, and in the case of the $5.50 preferred stock, $108 per share.

Q. Were those transactions effectuated, you say, in the Fall of 1944?

A. That is right.

Q. Mr. Benjamin, in regard to the restriction on the payment of common dividends, would you state briefly the circumstances of that restriction and when it runs out? I am talking about Gulf, of course.

A. The limitation on it in which the 75 percent figure is used, remains so long as any shares of the new preferred stock remain outstanding. That is correct, there is no limit on that.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Kanton:

Q. Isn't there a time limit to the extent that if and when this present series of $4.40 preferred stock is refunded, that that restriction will be eliminated?

A. I think that is correct. So long as any of these particular shares are outstanding—to be absolutely certain of that I would like to check the charter. Do we have a copy of it?

Q. It is in the record.

A. The charter says that so long as there are any shares of the preferred stock are outstanding,—and the $4.40 preferred stock is the first series of it—so I would think so long as there is any preferred stock outstanding, that would apply.

Q. Of this particular series?

The Examiner: He said of any series.

The Witness: No, no. Of any series.

By Mr. Kanton:

Q. But if the Company wished to call this series of $4.40 preferred stock and issue an entirely different series, this restriction would not apply?

Mr. Tucker: It would have to go further than that. Mr. Benjamin is pointing out that we would have to amend the charter and set up a new class of preferred stock in order to get rid of this provision, because it applies to any series of preferred stock as it is now set up in the charter.

Mr. Kanton: That is correct.

The Witness: It is my understanding that the charter could be amended in the event all this particular series was redeemed.

Mr. Kanton: That is what I wanted.

By Mr. Condon:

Q. Now, Mr. Benjamin, would you be kind enough to give us the factual data of a comparable character with regard to El Paso?

A. In the case of El Paso Electric Company, the restriction on the payment of common dividends is that dividends can only be paid out of earnings accumulated since December 31, 1939, after deducting past maturities of the principal amount of the note issued at the time of the issuance of the initial 15,000 shares of $4.50 dividend preferred stock.

The amount of that note was $1,000,000 and it was payable, according to its terms, $70,000 on each June 1 and December 1 in each calendar year from 1941 to 1946 inclusive, and on June 1, 1947, and $90,000 on November 1, 1947, so that that freeze would run out November 1, 1947.

Q. In other words, you have paid down over 80 percent of that note to date in round figures?

A. The entire note has actually been paid but the freeze works in accordance with the terms of the original note.

Q. Would you state briefly the circumstances of the issuance of the 15,000 shares of $4.50 series of preferred stock of El Paso in 1941?

A. On January 7, 1941, I believe was the closing date in connection with the sale of $6,500,000 of First Mortgage Bonds, Series A, 3¼ percent, due November 1, 1970, and 15,000 shares of $4.50 dividend preferred stock of El Paso Electric Company.

These securities were sold to the public and the proceeds used to redeem Series A 5 percent bonds due 1950 in the amount of $8,000,000, to redeem 7,785 shares of preferred stock bearing a dividend rate of $6, and at the same time a $1,000,000 note was issued.

Q. What did the $6,500,000 First Mortgage Series A 3¼ percent bonds yield to El Paso? They were sold above par, were they not?

A. They were sold at a price to the Company of 104¼ and sold to the public at 106.

Q. Now, tell us a litle bit about your retirement of your 7,785 shares of $6 preferred stock. Did that carry a premium too?

Richard N. Benjamin—Cross Examination (Cont'd)

A. That was redeemed at the call price of $110 per share.

Q. That was done in what year, you say?

A. 1941.

Q. Have you fully and fairly stated for the record all the facts that you know of or about concerning the freezes of these three companies?

A. Well, there is only one other thing I would like to point out, and that is that there are really two freezes in existence on the Virginia Company. You asked me about the one in the fifth supplemental indenture, but I think it is necessary to keep in mind the freeze that was established by the merger agreement dated April 1, 1944.

Q. Well, is that an additional freeze, Mr. Benjamin, or is there a certain amount of overlapping there?

A. Well, there is a considerable amount of overlapping.

Q. Would you state the facts as briefly as you can for the record?

A. The merger freeze, April 1, 1944——

Q. By "the merger freeze" you mean the union between the Virginia Company and the Virginia Public Service?

A. Virginia Public Service. It provides that earnings available for the common stock, beginning with the period October 1, 1943, are available, less certain specified deductions. Now, the $55,000 a month and the $75,000 a month deductions were first put on by this freeze and they ran eleven months, when the next freeze was put on.

Q. You mean they ran concurrently?

A. No, sir; they were in existence eleven months before the fifth supplemental freeze was put on. There are some differences in the deductions, the principal one being that there is deducted from operating revenues for the purpose of the fifth supplemental freeze the cost of electricity purchased and rentals paid, in one of the calculations.

Under the fifth supplemental freeze the earnings available for the payment of dividends begin to accrue October 1, 1944, instead of October 1, 1943, as was the case in the other freeze.

Just to give you an idea of how they have worked out up to this point, under the so-called merger freeze, there was a balance through September 30th, 1945 of $1,997,000.

Q. Balance of what, Mr. Benjamin?

A. Balance available for common dividends.

Q. All right.

A. And under the fifth supplemental freeze there was a balance available of $1,628,905, a difference of some $360,000.

Q. Do you care to make any other or further statement of an explanatory character or do you feel that the record in its present state sets forth the information concerning these freezes regarding these three companies?

A. I think the record sets it forth correctly.

Q. There is no freeze on Engineers earnings, is there?

A. No, sir.

Q. Mr. Benjamin, I hand you a photo print of your exhibit 30 and ask you to examine it, if you will, and I ask you to state for the record with respect to your freeze testimony and translating it in the aggregate for the Virginia, the Gulf and the El Paso companies, what amounts of your aggregate consolidated figures, being the sum of $24,552,162.60 was represented by freeze income, approximately?

A. I will be glad to. Just a moment.

(Examines papers.)

As of June 30, 1945, Gulf States had $608,000 of free earned surplus.

At the same date, El Paso Electric Company had $284,000, and at the same date Virginia Electric and Power Company had $1,886,000, a total of $2,778,000.

At the same date Engineers Public Service Company had earned surplus of $7,095,000 against which there was no dividend freeze.

Q. If I understand your testimony correctly and my arithmetic is reasonably accurate, Mr. Benjamin, it would appear then that the aggregate of free earned surplus of

the parent company and its three subsidiaries equalled approximately $9,800,000 in round figures?

A. That is correct.

Q. And that the frozen earnings that were retained would represent the difference between that approximately $10,000,000 and the $24,952,000 figure, or approximately $14,952,000, is that substantially accurate?

A. Just one other problem here, and that is—that is accurate as to Engineers, Virginia, Gulf States and El Paso, but this applicant's exhibit contains a reference to the Western Public Service Company (Delaware) and that amount is $204,213, and there is no freeze against that company.

The Examiner: You say this Applicant's Exhibit. What is the number?

The Witness: Applicant's Exhibit No. 30—I'm sorry. I think you ought to add $204,000 to that.

I would like to point out that these freezes have not been in existence all the way back. I don't know just what effect that would have. In other words, it is possible that some of these amounts shown for the earlier years might have been paid out in dividends if the directors desired to do so, but those figures that I gave you are the latest ones that I have.

By Mr. Condon:

Q. Other than the $204,000 amount for the Western Public Service which I find to be included in your consolidated figure of $24,552,000, were my summarizations arithmetically substantially correct?

A. Yes.

Q. Mr. Benjamin, you were giving us figures as of June 30, 1945; is that correct?

A. Yes, sir.

Q. What effect, if any, does this payment of the $5,100,000 on these serial notes or prepayment, so far as Virginia is concerned, have on this exhibit?

A. I don't quite understand your question. Do you mean what effect would it have on the balances available for common stock had this note been paid off earlier? Because this is an historical record of the amounts accruing to the Engineers common stockholders. Or do you mean how much of a reduction in interest charges would be made by the payment of the bank loan?

Q. Well, will there be any effect on the free earned surplus of Virginia as a result of this payment?

A. I don't believe it would affect the freeze at all, Mr. Condon.

Q. It would not?

A. No.

Q. Do you know whether or not the directors contemplated or have contemplated making a capital contribution to Virginia from Engineers incident to the refunding of the outstanding notes rather than refunding them? By the notes, I mean the serial notes of the Virginia company.

A. You mean the $5,100,000 that has been paid off?

Q. I am talking about the prospective balance that is to be prospectively refunded.

A. I haven't heard any suggestion that would be done.

Q. Would you see any objection to that?

A. To Engineers making a capital contribution to Virginia rather than refunding the notes themselves?

Q. So that Virginia could use the money to refund the notes.

A. Could use the money so they would not have to refund the notes?

Q. Pay off the notes, retire the notes, to be more accurate.

A. Well, I haven't heard any suggestion as to that. I think Virginia is capable of refunding the notes on the basis of its own credit, and I don't see any reason why Engineers should make that contribution.

Q. Regardless of the necessity, do you see any objection to it, to put some of that spare cash to work if the directors wanted to do it?

Richard N. Benjamin—Cross Examination (Cont'd)

A. In the light of the pending plan, I would say that there would be an objection to making that contribution.

Q. Apart from the plan, Mr. Benjamin.

A. That would be a pretty low rate for Engineers to get on the contribution it made, I should think. In other words, if the only purpose of it was to avoid having Virginia borrow for a 10-year period on bank loans at low interest rate, I should think it would be preferable to have Virginia make the borrowing.

Q. Have you no objection to it that you can see except that the directors mightn't want to do it?

A. I think it is an entirely possible transaction, Mr. Condon. It could be done if the directors thought it advisable to do so.

Q. The directors of the Board of Engineers have made contribution or contributions in the past to Virginia, haven't they?

A. Yes, they have.

Q. In what amounts and on what dates? A. There was a contribution made in connection with the merger of Virginia Public Service.

Q. Was that the contribution that was originally planned at $4,000,000 and thereafter reduced to $2,500,000? A. Well, I am not sure of the answer to that question. Let me state the circumstances.

Q. If you will.

A. Engineers contributed to the capital of Virginia $1,500,000 in cash in 1938 and $1,000,000 in cash in 1941. In connection with the merger in 1944 the Engineers purchased the common stock of Virginia Public Service for $2,500,000 and also a claim that Virginia Public Service had and took in place of that additional shares of common stock of Virginia and also made a cash contribution of $2,500,000.

Q. A total of $5,000,000 in the aggregate?

A. Yes, sir.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. That adds up, if my arithmetic is correct, contributions of $7,500,000 in a period of approximately seven years?

A. That's right.

Q. Will you give us the data, if you have it available, with regard to contributions to Gulf?

A. In 1938 the Gulf States Utilities Company, Baton Rouge Electric Company, and Louisiana Steam Generating Corporation were combined. Engineers contributed the capital stocks of Baton Rouge Electric Company and Louisiana Steam Generating Corporation to Gulf States Utilities Company and purchased from Baton Rouge Electric Company just prior to that transaction the bus properties of that company. Now, the amounts——

Q. Approximately.

A. I will have to look them up.

The Examiner: We will take a short recess.

(Whereupon a short recess was taken after which the hearing was resumed.)

The Witness: I now have the information you requested, Mr. Condon. The amount of the contribution made by Engineers to Gulf States in 1938 was $4,101,000.

By Mr. Condon:

Q. Any subsequent to that?

A. No.

Q. Would you give us the same information with respect to El Paso, please?

A. In 1941, at the time of this—I guess it was in December 1940, just prior to this financing, El Paso Electric Company (Delaware), contributed the capital stock of Mesilla Valley Electric Company to El Paso Electric Company (Texas).

Q. Is that all?

Richard N. Benjamin—Cross Examination (Cont'd)

A. That is all, except that Engineers contributed approximately $1,000,000 to El Paso (Delaware) just prior to the time of its dissolution.

Q. Can you give us a dollar value as far as you can on that Mesilla Valley stock?

A. Yes, the book value of that contribution was $848,000.

Mr. Tucker: You understood him to say that wasn't made by Engineers? You aren't including those, are you?

Mr. Condon: Perhaps I am.

Mr. Tucker: I want to make sure. He said it was expressly made by El Paso (Delaware).

Mr. Condon: A wholly-owned subsidiary of Engineers.

The Witness: Well, at that time Engineers owned well over 90 per cent of the common stock.

Mr. Kanton: Wouldn't it be best to explain in the record here that El Paso at that time was not directly owned by Engineers but was held through El Paso of Delaware?

The Witness: Well, let me make a little further statement. In 1940 Engineers owned over 90 per cent of the common stock of El Paso Electric Company (Delaware). El Paso Electric Company (Delaware) owned all of the common stock of El Paso Electric Company (Texas), El Paso and Juarez Traction Company, Mesilla Valley Electric Company. El Paso (Delaware) was the company that made the contribution to El Paso (Texas).

* * * * *

[R. p. 877] By Mr. Kanton:

Q. It is a fact, is it not, but for the decision of the majority of the Board of Directors there is no necessity for eliminating the preferred stock at this time? In other words, other methods might have been employed to provide for the preferred stockholders than the method contemplated by the plan?

A. I think I have stated before in answer to your questions that there are other methods that could be used, and when you ask whether there is no necessity for eliminating

the preferred stock at this time, if it hadn't been for the action of the Board of Directors, there would be no plan and presumably the preferred stock would not be eliminated at this time.

Q. In other words, the effect of what the majority of the Board did was to anticipate turning over the enterprise to the common stockholders and to deprive the preferred stockholders of the benefit of any participation in the continuing enterprise?

A. Well, you say anticipate. Bear in mind this whole situation. This plan will not be carried out unless the Supreme Court rules adversely to the company's petition in the Section 11(b)(1) case. If they do rule adversely to the company, the company will be forced to dispose of Gulf States and El Paso. So that to the extent you say anticipate, I think that this so far is preliminary to action which will have to be taken if an adverse ruling is received from the Supreme Court.

Q. Are you suggesting that the directors would have to pay off the preferred stock if an adverse ruling is encountered by the Engineers Company from the Supreme Court?

A. Well, I meant to state that the Engineers preferred stock would have to be provided for, not necessarily paid off in cash, in the event that Engineers was liquidated.

By Mr. Condon:

Q. Well, isn't it a fact that what the Board of Directors of Engineers has done here was merely to decide voluntarily that this was the way they wished to eliminate the preferred stock from the picture?

Mr. Tucker: Just a minute, before you answer that. I am not so sure that that isn't asking for a legal conclusion of the witness.

Mr. Condon: I think it is a very practical conclusion, voluntary.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Tucker: I think it is a legal conclusion, whether this is a voluntary act. There have been plenty of decisions that an 11(e) plan——

Mr. Condon: I wasn't talking about voluntary or involuntary vis-a-vis the act. I am talking about a voluntary decision as to how to dispose of the preferred stock.

Mr. Tucker: Make it clear.

Mr. Condon: I thought the witness understood it. If he didn't, I am sure he does now, Mr. Tucker.

The Witness: I think that this plan was chosen by the directors as a method by which the company could comply with the order of this Commission if upheld by the Supreme Court. There were other methods but they chose this method.

* * * * *

[R. p. 881] By Mr. Condon:

Q. Are the tax consequences of what you call a purchase and what you have described as an exchange the same, in your opinion?

Mr. Tucker: I object.

The Examiner: I will sustain the objection on that.

By Mr. Condon:

Q. Have you been advised by tax counsel, Mr. Benjamin, with respect to whether or not there is a difference?

A. Well, I have seen the opinion of Mr. Lynch which stated that the exchange of preferred stock with the warrant for Gulf States common stock is a non-taxable exchange so far as the preferred stockholder is concerned. I am not entirely clear as to what the tax effect of it is or what Mr. Lynch has advised as to the tax effect of acquiring the Gulf States stock for cash.

* * * * *

Richard N. Benjamin—Cross Examination (Cont'd)

[R. p. 886] By Mr. Condon:

Q. With respect to this matter of the proposed deposit by the company with Chase Bank, if I understand your plan correctly, when that deposit is made with the Chase Bank by Engineers and five days' notice given, the preferred stocks become frozen and non-negotiable; is that correct?

A. I don't know whether they would be non-negotiable or not, Mr. Condon. It is my understanding that the transfer books would be closed on those securities on the day of deposit, and certainly there wouldn't be—I don't believe there would be any more trading in the securities on the Stock Exchange.

Q. As a matter of fact, your plan anticipates applications to delist the three series of preferred from the Exchange, isn't that so?

A. That's right.

Q. As contradistinguished from that situation, the Engineers common stock will remain actively marketed, will it not?

A. Certainly.

Q. You are not going to move to strike or delist that, are you, during this period that may ensue from the time of deposit until this matter is finally wound up?

A. No.

Q. And the fortunate stockholders who exercise their warrants will only get a new share of Gulf stock that you are going to promptly list on the New York Stock Exchange, are you?

A. Yes.

Q. And the poor preferred stockholder will not have any market, will he, for his security if he doesn't choose to come in and accept the $100 that you have deposited for him in the Chase Bank?

A. Well, the preferred stockholder is getting his capital back, Mr. Condon, and he can——

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Would you please answer if he has a market?

A. He has no market, no listing market.

Q. Has he any market, listed or unlisted?

A. I don't know whether it is a negotiable security or not. It seems to me it has a value that a person might be able to realize on if someone else wished to purchase it.

Q. Have you considered, and has the Board considered, the plight of the preferred stockholder who may not wish to acquiesce in the decision of the majority of the Board and take his $100, what he is to do in the next year or two or three that you have mentioned?

A. The Board is aware of the fact that the preferred stockholder is entitled to receive the $100 per share. I don't know whether they have considered the possibility of a person not coming in to get the $100.

Q. As far as you know that was never considered by the Board?

A. So far as I know, I don't recall any discussion on that.

(Formal matter relating to adjournment omitted.)

Hearing on January 7, 1946

RICHARD N. BENJAMIN

* * * * *

[R. p. 894]

Cross Examination (Resumed)

By Mr. Condon:

Q. Did the management employ the same degree of skill and give as much attention and consideration to the problem of making a fair estimate for the year 1946 as they have in prior years, and did they follow the same procedure?

A. That is my understanding, Mr. Condon.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Kanton:

Q. Does it appear to you that these estimates for 1946 are reasonably sound estimates?

A. May I have that question again?

(The question is read.)

The Witness: These estimates were prepared in the first instance by the operating personnel of the company, and so far as I know are sound estimates.

By Mr. Kanton:

Q. And they have been reviewed by the management of Engineers?

A. They have been reviewed by the management of Engineers.

Q. And that has been the practice in the Engineers System ever since it has been in existence?

A. I do not know how far back it goes, Mr. Kanton, but so far as I know that has been the practice in the Engineers for many years.

Q. At least since you have been a member?

A. At least since I have been with the organization, yes, sir.

Q. Do you think these estimates are as accurate as estimates can be expected to be?

A. I think so, Mr. Kanton.

Q. These estimates are, in effect, the operating budget estimates, are they not, for the three operating companies of Engineers?

A. That is correct.

Q. With respect to your operating budget estimates in the past for each particular year following that for which they have been made, can you tell me how they have been in the past, as far as the management of Engineers being a prognosticator of future earnings?

Richard N. Benjamin—Cross Examination (Cont'd)

A. You mean how accurate the estimates have been in the past compared with the actual results?

Q. That is correct.

A. I couldn't answer that question without going back and actually comparing the estimates with the actual, Mr. Kanton. In recent years the effect of the very high rate of excess profits taxes has served to minimize any variation between the estimates and the actual results so far as final balances are concerned.

Q. Aside from the excess profits tax, how are they stacked up?

A. The only estimates that I have compared recently with actual are ones that were put in at the request of the Public Utilities Division some years back, I think just about the time when we were first entering the war, and I recall that two of the major companies, El Paso and Gulf States, were reasonably close to the estimate of operating revenues. Virginia was somewhat further off, but I can't tell you with any degree of certainty just how those estimates compared with the actual in the past.

Q. May I ask you this question, Mr. Benjamin: We will take a luncheon recess sometime today, and could you during that time just glance at the operating budgets as estimated by the utilities companies and the management, say, from 1940 up to the present year, and compare them with actual earnings, et cetera, and give me your opinion as to how these prognostications by the management of Engineers have stacked up with their operating budgets for the next proceeding year?

A. I will attempt to do that, Mr. Kanton.

The Examiner: Is there any objection to this exhibit that has been offered?

Mr. Scheetz: No objection.

The Examiner: Hearing none, it will be received as Applicant's Exhibit 63.

[R. p. 897]

By Mr. Tucker:

Q. Mr. Benjamin, I hand you three sheets, and will you generally describe them with reference to the statement that you made in connection with Exhibit No. 63 so far as the 1946 estimates are concerned. Say what they are.

A. The first of these statements is marked "El Paso Electric Company, Estimated Income Statement, Year 1946, and Income Statement, Year 1945, last two months estimated." The 1946 column contains the same figures as are contained in the Exhibit 63 with respect to 1946 and represents the estimate for such income for that year.

Mr. Tucker: I would like to offer that exhibit as Applicant's Exhibit No. 65.

The Examiner: Any objection?

Hearing none, the exhibit will be received as Applicant's Exhibit 65.

(Applicant's Exhibit No. 65 is received in evidence.)

By Mr. Tucker:

Q. Will you describe the next statement that I hand you?

A. The next statement is headed "Gulf States Utilities Company, Estimated Income Statement for the Year 1946 and Pro Forma Income Statement for the Year 1945, last two months estimated." Pro forma refers to footnote A which states as follows: "Excludes reduction of $1,254,290 due to accelerated amortization of emergency facilities."

The column 1946 gives the management's estimate of income for the year 1946 and contains the same figures as are shown in Applicant's Exhibit 63 relating to 1946.

Q. And the estimates that you made with reference to it in that connection apply also to this estimate so far as Gulf States is concerned?

A. That is correct.

Mr. Tucker: I offer that statement as Applicant's Exhibit No. 66.

Richard N. Benjamin—Direct Examination (Cont'd)

By Mr. Tucker:

Q. Will you describe the next one I handed you?

A. The next one is headed "Virginia Electric & Power Company, Estimated Income Statement Year 1946 and Pro Forma Income Statement Year 1945 as per adjustments indicated in footnotes and excluding transportation operations for three months ended March 31, 1945 (last two months estimated)."

Q. Did you mention the name of the company?

A. Virginia Electric & Power Company. The column headed 1946 contains the management's estimate of income for the year 1946 and the same figures appear as are contained on Applicant's Exhibit 63 relative to 1946 estimated income. These figures in Applicant's Exhibit 63 are contained on page 5 thereof.

Mr. Tucker: I offer this as Applicant's Exhibit No. 67.

By Mr. Condon:

Q. Mr. Benjamin, I understand that Applicant's Exhibits 65, 66 and 67 were prepared by the operating heads of the several companies you have mentioned with respect to which the statement purports to represent pro forma income for 1945 and estimated for 1946?

A. That is correct.

Q. And they have each and all been reviewed by your management?

A. That is correct.

Q. And are the facts to the best of your knowledge, information, and belief as set forth therein, subject to your reservation with regard to the estimated features of the three statements, true and correct?

A. Yes, they are.

The Examiner: Hearing no objection, they will be received as Applicant's Exhibits 66 and 67, Gulf States being No. 66 and Virginia Electric & Power No. 67.

(Applicant's Exhibits Nos. 66 and 67 are received in evidence.)

Mr. Tucker: I want to be sure, Mr. Examiner, that No. 65 was actually received. I understand that is a fact?

The Examiner: Yes, that was received in the record separately from 66 and 67.

Mr. Tucker: All right. Then that is all for the moment.

The Examiner: Mr. Condon, you may proceed.

Mr. Condon: May it please the Examiner, you no doubt will remember the colloquy of counsel that took place at a prior hearing with respect to Exhibits 65, 66, and 67 and page 5 of Exhibit 63, Applicant's exhibits. I think the record should show that by agreement of all counsel and with the approval of the Examiner, in view of the fact that the data submitted represents the estimates as testified to by Mr. Benjamin, that counsel not cross-examine with respect thereto.

The Examiner: I understand that is agreeable to other counsel, and it is so ordered.

Mr. Kanton: That is right so far as I am concerned.

But the material contained in the exhibits mentioned by Mr. Condon is still subject to being included in the record and to be given whatever value or consideration may be given by the Commission.

Mr. Condon: That is true.

Mr. Scheetz: I agree.

Mr. Condon: Mr. Examiner, at the last session of court I was interrogating Mr. Benjamin with respect to a memorandum dated July 26, 1945, and revised July 30, 1945, and I was requested either by Mr. Barnes or Mr. Tucker—and I don't know whether it got into the record—to ascertain from Mr. Streeter if he had a copy of his memorandum of July 26. I agreed to do so, and I did. I reached him on the telephone on Saturday night at his home and he didn't have any files or papers, but he said that his best recollection is that he was leaving at that time to go on a holiday, that he wrote a longhand letter to Mr. Barnes of which he kept no copy. He asked Mr. Barnes to have his memorandum, which I believe to be this revised memorandum, typed and sent

to the other directors, which I understand from Mr. Benjamin's testimony he did. I regret to say that Mr. Streeter does not have any copy of the July 26, 1945, original memorandum.

At this time in view of the fact that I interrogated Mr. Benjamin with respect to it, and in view of the fact that I am not too satisfied with the state of the record with regard to the contents of this memorandum having been before the directors, I offer it now in evidence, not as proof of any of the facts contained therein or as proof of any of the conclusions set forth, but merely to show Mr. Streeter's position as recorded in this memorandum as having been before the Board prior to September 5, and for no other purpose.

Mr. Kanton: Prior to and including?

Mr. Condon: Prior to and including September 5.

Mr. Tucker: I have no objection to its receipt for that purpose, and if it will avoid any embarrassment, I would like to say on the record that I am not particularly concerned because the original memorandum is not available for the reason I was present at the meeting myself and this, I think, substantially reports the position that he took at the meeting, and I don't think the other is particularly important and I will make no point about it.

The Examiner: Understanding there is no objection, that will be received as Preferred Stockholders' Exhibit No. 17.

Mr. Tucker: For the purposes mentioned.

Mr. Condon: For the limited purposes mentioned.

(Preferred Stockholders' Exhibit No. 17 is received in evidence.)

Richard N. Benjamin—Cross Examination

Cross Examination (Resumed)

[R. p. 902] By Mr. Condon:

Q. Mr. Benjamin, do you recall whether or not the directors made any estimate as to the number of warrants for the acquisition of Gulf States stock that might be available for the purchase by preferred stockholders who owned no common?

A. I am quite sure that they made no such estimate.

Q. As I understand from your testimony at a prior session, it was the determination of the Board not to apply for the when issued trading rights on the New York Stock Exchange to the warrants?

A. No, sir; that hasn't been put up to the Board yet. This development of difficulty has occurred since the last meeting of the Board so the Board had not considered that question. The question is still not entirely answered because I haven't been able to talk to Mr. Laufer.

Mr. Tucker: Mr. Laufer is who?

The Witness: He is in the Trading and Exchange Division of this Commission.

Based on advice received from the New York Stock Exchange Commission, I think that when issued trading properly would not be permitted under the circumstances where the Engineers Board would have the right to withhold the mailing of warrants.

By Mr. Condon:

Q. With respect to that problem, if it be a fact that no applicaton is made for when issued trading privileges of the warrants, what consideration have you given as to how, if at all, a preferred stockholder of Engineers owning no common might hope to acquire a warrant if one were available?

A. I think that there might be an over-the-counter market in this when issued trading. I am not sure as to

what the rules of the Commission would be as affecting that type of transaction, and I can't say whether or not there would be an over-the-counter market.

Q. Would that require a special application to the Commission for the purpose of conducting a market in those warrants?

A. No, I don't believe there is any provision for Commission approval in connection with over-the-counter trading other than the general regulation that the Commission has over all brokers and dealers.

Q. That would increase the difficulties of a preferred stockholder of Engineers owning no common, would it not, in knowing about market prices and knowing where to buy if the warrants were available and so on?

A. He would not have the benefit of a listed market with published quotations in the daily press, but there frequently are just as good markets in the over-the-counter market.

Q. In other words, he would have to try and keep abreast of the market of those warrants and through what we call sheets, Mr. Benjamin.

A. Either through the sheets or through contact with his own broker.

Q. You testified several times with respect to an essential objective of the Board of Engineers to retain for the common stockholders their interest in the three companies, the operating companies. Do you recall giving that testimony in general?

A. Yes, I do.

Q. Can you tell us what considerations, if any, were given by the management or by the Board as to the matter of future stock control by the common stockholders of Engineers over those three companies, anticipating the final conclusion of these proceedings before this Commission with respect to the plan?

A. Well, if I understand your question to mean what considerations did the directors of Engineers give to the

persons or groups, or something of that sort, who control the three operating subsidiaries—is that the point of your question?

Q. Where the future control of those three operating subsidiaries, to-wit, Virginia, Gulf, and El Paso, might reasonably be expected to lie upon the completion of these proceedings.

A. I don't recall any discussion on that point, Mr. London. I assume that the directors—I guess I shouldn't make any assumption as to what they had in mind, but the effect of stock distribution would be to have the present common stockholders continue their interest in it, and I don't believe the discussions went any further than that. I don't recall any.

Q. Do you recall testifying that a group of the common stockholders of Engineers, including those common stockholders of Engineers who also own preferred stock, would put up approximately $14,000,000 of the $22,000,000 that might be realized from the sale of the Gulf States warrants? Do you recall giving that testimony in general?

A. Yes.

Q. Do you recall how large a group that you estimated would put up that $14,000,000, or how small the group was—let me put it that way.

A. So far as number of stockholders were concerned?

Q. Yes.

A. That figure of approximately $14,000,000 to which you have just referred I believe had reference to the holders of over 500 shares, and Applicant's Exhibit 16 shows that 338 stockholders of record owned 72.54 per cent of the total common stock of Engineers.

Q. In other words, Mr. Benjamin, if I understand your testimony, in that Exhibit 16 of yours to which you have made reference, 338 stockholders out of a total of 13,391 will put up 14/22 of the money, if they decide so to do, to acquire the Gulf States stock. Is that a fair statement?

A. Well, that is the result that would take place if all of these stockholders exercised their warrants.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Kanton:

Q. That number of 338, doesn't that include Street names and brokers?

A. Oh, yes, it does. We have an exhibit in here which shows the 50 largest holders in brokerage names, and I think it would be well to point out that these 338 stockholders, so-called, are 338 record holders, and in many cases one record holder may represent many stockholders who own the beneficial interest.

By Mr. Condon:

Q. They would only report the number of stockholders owning over 500 shares; isn't that so, Mr. Benjamin?

A. That's right. Now, let me see if I understand your question. It would only show the number of record holders owning over 500 shares; that's right.

Q. Let us assume, for the sake of this question, that this group of 338 stockholders, plus or minus, felt that it was economically advantageous to exercise the warrants and acquire the Gulf States stock; it might happen that this comparatively small group would wind up in ownership of approximately 65 per cent to 68 per cent, if my arithmetic is correct, of the total outstanding shares of Gulf?

A. Somewhere in that neighborhood.

Q. When I said small group, you knew I meant a small number; I didn't mean in amount or dollars, dollar value.

A. I understand that.

Q. Was any consideration given to the same type of calculation that we have been indulging in here with regard to future control of El Paso, assuming that the plan were consummated and there was the distribution in partial liquidation of your 1/5 shares of El Paso to the common stockholders, how that would leave the control of El Paso.

A. Well, I think a pro rata distribution of that sort, Mr. Condon, would be bound to result in the same proportionate interest as is now held.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. You testified in response to one of Mr. Kanton's questions that if it should happen that this Commission or a court should determine that the preferred stockholders here were entitled to more than a hundred plus accumulated dividends to the day of deposit, that it might be necessary to sell some Virginia stock to make up the required amount, or testimony to that general effect. Do you recall that?

A. Just a minute. Will you read that question?

(The question is read.)

The Witness: I remember testifying to the effect that if the bank loan, additional bank loan, which was made to make this payment to the preferred stockholders had not been paid off by the termination of the three-year period, that it probably would be necessary to sell some shares of Virginia common stock to liquidate that bank loan.

By Mr. Condon:

Q. As I recall it, you testified that to that extent it would be cutting off the participation by the common stockholders in that stock of the Virginia Company which you considered an important element of the plan. Do you recall giving that testimony?

A. Yes, I do.

Q. When you say that if the bank loan hadn't been paid off prior to the time that a decision became essential with regard to whether or not Virginia stock should be sold, you mean if the time had not arrived where enough income had been generated from Virginia and received by Engineers to accomplish that objective; is that correct?

A. That's right.

Q. And if that objective had not been achieved and it finally became essential for Engineers to make a decision with respect to Virginia stock, is it not a fact that consideration was given to the possibility of disposing of Engineers stock through a warrant method the same as you have done with the Gulf States stock?

Richard N. Benjamin—Cross Examination (Cont'd)

A. You mean Virginia stock?

Q. Virginia stock. By the warrant method as you have done or planned to do here with Gulf.

A. You ask whether consideration was given to that warrant method?

Q. Yes.

A. Well, I recall some suggestion having been made, and it is not clear to me just who made the suggestion that Virginia stock be sold under warrants to obviate the necessity for the bank loan. I don't recall any similar suggestion being made as to the sale of what I think everyone has considered would be a very small amount of stock to pay off what is expected to be a small balance in the bank loan. In other words, I know I have always thought that at the end of the three-year period the bank loan would be at a small principal amount and therefore it probably would be better to dispose of these few shares by an outright sale to the public.

Q. In other words, the number of shares that would be required to be sold to the public would be so inconsequential in the aggregate compared with the entire block of Virginia shares that would be distributed to the common stockholders of Engineers, that it would be expeditious to just sell them without getting the money from the common stockholders of Engineers?

A. That has been my understanding of it.

Q. But if that block of stock of Virginia that had to be sold was more substantial than you envisioned, would you see any objection to the plan of having the Engineers Board give the opportunity to the Engineers common stockholders by warrant method to acquire the requisite Engineers stock as you have done with the Gulf States stock at the end of the three-year period?

A. You mean barring legal considerations, by which I mean that this plan does not contemplate the issuance of any warrants, and I don't know what the status would be if the Court had approved the plan and the plan had been

in operation. I think disposition of interests by warrants would be a feasible method of doing it if the amount involved were large enough.

Q. And the effect of that would be to keep the same relative proportion of percentage control in Virginia as you have testified would exist in cases of the Gulf and El Paso?

A. Yes, in so far as the stockholders wanted to continue that interest.

Q. You were interrogated by staff counsel with respect to why it was that the Board chose the warrant method of disposing of Gulf States stock instead of having some competitive bidding, or something to that effect, to dispose of it in a block to raise money; and do you recall whether or not you gave any testimony as to whether or not such competitive bidding would yield a higher aggregate sum to Engineers on an over-all basis than this method of warrant disposition?

A. Yes, I believe I said that to the extent that the warrant itself had any value, it might be reasonably expected that a group of underwriters would be willing to purchase the stock at a price in excess representing the value of this warrant, less whatever commission the underwriting group thought that they were entitled to by reason of taking the risk of purchasing this block of stock.

Q. Approximately how many warrants will there be in round figures here?

A. Well, to be exact 1,999,968.

Q. Can you say approximately 2,000,000 warrants? Would that be near enough?

A. In speaking of warrants I mean rights because one warrant may represent——

Q. Two million rights approximately?

A. Approximately 2,000,000 rights.

Q. If those rights had an interest of "X," and putting aside for the moment the matter of commissions, to the extent that "X" represented a dollar or multiple thereof,

the Engineers Public Service Company could receive from underwriters or a group of underwriters an amount in excess of the amount expected from its shareholders in cash and quickly and with a minimum of trouble. Is that a fair statement?

A. Well, I don't know that I can go along with the "minimum of trouble," but I think such a sale could be accomplished.

Q. And if a right was worth $2, they might anticipate an extra $4,000,000—and I am putting aside the commissions and other items of expense that might be coincident with such an undertaking—is that correct?

A. I think that is right.

Q. If a right was worth four, there might be an additional 8,000,000; is that so?

A. That's right.

Q. Do you have any idea what the underwriting commission or the underwriting expense would be for such a plan?

A. Just a minute.

The Examiner: We will take a short recess.

(Short recess.)

Mr. Condon: Will you read the question?

(The question is read.)

The Witness: It is difficult to estimate what commission an underwriting group would seek on an issue of this sort. I have before me a copy of statement marked "Financial data on security issues of Electric and Gas Utilities for the period from January 1, 1945, to June 30, 1495," issued by this Commission. In this release there are four common stock issues.

Mr. Tucker: Do you want to identify that by release number?

The Witness: It doesn't have a release number. Namely, Laclede Gas Light Company common stock, $4 par, which

was sold to the public at $5 a share. On that issue the underwriters took a spread of .560, which is approximately 11 per cent.

By Mr. Condon:

Q. Is that item 95 of that memorandum that you are talking about?

A. Yes, it is.

Q. All right.

A. The next item is No. 102, which is the Lake Superior District Power Company common stock, which was sold to the public at $22.50 a share, and on which the underwriters took a spread of $1.34, which is approximately 6 per cent of the public offering price.

The next on the list is 106, Mobile Gas Service Corporation common stock, which was sold to the public at $17 per share on which the underwriters took a spread of 0.971, or approximately 5.7 per cent of the offering price.

The last item on the list, 108, is Pacific Gas & Electric common stock, which was sold at $38.25 a share to the public and the underwriters had a spread of 1.483, or approximately 3.9 per cent of the public offering price.

Q. Are you familiar with those companies, Mr. Benjamin, sufficiently to express your view as to which of those companies, if any, are comparable to the situation with respect to Gulf?

Mr. Tucker: You mean most comparable, nearest to it.

Mr. Condon: Yes.

The Witness: Well, Laclede is a gas company, and so is Mobile. I don't know a thing about Lake Superior District Power Company, so that the only one that seems to be comparable is P. G. & E.

By Mr. Condon:

Q. Do you think that Laclede is fairly comparable to the Gulf situation from your knowledge of the Laclede Gas Light Company, or do you have any knowledge about it?

Richard N. Benjamin—Cross Examination (Cont'd)

A. I don't have any knowledge about Laclede Gas Light Company on the basis of which to make any comparison between the two.

Q. Do you have any knowledge or enough knowledge to express an opinion with regard to P. G. & E. and its comparability in a general way to the Gulf situation?

A. Well, I haven't made any comparison between the two companies, Mr. Condon, so I can't tell. It would be foolish to make any guess as to how comparable these companies are. I do know that Pacific Gas & Electric has a substantial electric business, but I don't know the proportion of gas to electric, nor a good many other factors in the picture.

By Mr. Kanton:

Q. Exhibit 14, which refers to Houston Lighting & Power Company, Idaho Power Company, Indianapolis Power & Light Company, Tampa Electric Company, and which companies the management of Engineers thought worthy of comparison for the purposes that this exhibit was put in, do you know offhand—I haven't checked this, Mr. Benjamin—whether any of these companies recently had any financings?

A. Well, Idaho Power and Houston Lighting & Power were both sold at competitive bidding. All of Idaho Power Company stock was sold that way, to my understanding, and approximately half of Houston Lighting & Power stock was sold in that fashion.

Q. Could you give us the same percentage figures, if you have them available, comparable to the questions that Mr. Condon just asked you with reference to the common stock financings appearing on the Commission release referred to above?

(Discussion off the record.)

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. You have no idea of what the cost, underwriting cost, was in connection with the Idaho Power and Houston Lighting & Power sales?

A. No, but they can readily be ascertained from the releases of this Commission issued in connection with them.

Q. Was any attempt made on the part of the Board or the management of Engineers to ascertain what the underwriting expense would be on Gulf?

A. Not to my knowledge.

Q. Are you able to draw any conclusions from the figures that you have just recited as set forth on this release of the Commission as to what a fair underwriting expense might be for a sale of approximately 2,000,000 shares of Gulf?

A. I would rather not do it, Mr. Condon, until I had more information.

Q. Well, we will defer that line of inquiry for the time being. What additional information, Mr. Benjamin, would you need in order to express a fair statement?

A. Well, I would like to look at the most recent offerings and see what the underwriting commissions would be. Of course, that is not any guarantee of what the spread would be in this particular case, but it might give some clue as to the general scope of the range.

Q. Well, to come back for a moment to the same problem, the highest percentage cost that you have mentioned here was Laclede Gas Light common and that ran at 11 per cent, and applying that to 2,000,000 shares of Gulf, the underwriting expense would approximate $2,100,000 in figures, $2,200,000?

A. No, it would be 11 per cent of whatever the public offering price would be on that stock, Mr. Condon, so that if you took an offering price of $16 a share, it would be $1,760,000.

Q. You take $11.50 a share?

A. Oh, I see what you mean. If the public offering price were $11.50 a share?

Q. Yes, a little over $2,200,000, in round figures.

A. I am sorry, that previous figure I gave was wrong. If you took $11.50 a share for the full amount of Gulf States common stock, the total proceeds would be in the neighborhood of $22,000,000, roughly, and 10 per cent would be $2,200,000, and another 1 per cent would be $220,000.

Q. It is not terribly far in excess of $2,200,000, is that a fair statement? We have been taking a figure of $2,000,000. I am not trying to pin you down to the fine points of arithmetic, just getting principles here.

Now, that was the highest percentage figure I think you mentioned, 11 per cent, isn't that so?

A. That is right.

Q. The lowest was the Pacific Gas & Electric of 1.483, and let us call that 1.5 for the facility of calculation then.

A. You are speaking in the latter case of dollars. It is 3.9 per cent in percentages.

Q. 3.9? I am sorry. Make it 4 per cent?

A. Yes, sir.

Q. Now, would you permit me to do the same arithmetic and correct me if I am in error. Assuming the price of 11.50 and assuming the same approximately 2,000,000 shares, your expense for underwriting would approximate something less than $1,000,000?

A. That is correct.

Mr. Tucker: Now you are starting to talk about expense of underwriting. Of course, Mr. Benjamin's testimony relates only to spread and not to the expense involved in the transaction.

The Witness: That is right.

Mr. Condon: I am talking about the underwriting expense, meaning the fee that would be charged by the underwriters.

Mr. Tucker: Just so that it is clear. You used the expression "expense" and that is something in addition.

Mr. Condon: Yes.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. Now, to the extent that the Company decided to place a value on the Gulf States stock in excess of $11.50 a share in their bargainings here or in their offerings to underwriters, the underwriting expense, as we have just defined it for the record would be increased percentage-wise accordingly; is that right?

A. That is correct. You speak of bargaining with the underwriters. I don't want to quibble. You mean the offers they would be willing to accept from underwriters?

Q. Correct. Now, is it a fair statement to say that taking the highest percentage of 11 per cent that you have mentioned, that for every dollar of sales price in excess of $11.50 the Engineers Company would get 89 per cent of that excess—and I am putting aside, as I told you before the money or expenses or the expenses for whatever they may be of the mechanical carrying out of the undertaking.

A. In other words, every dollar of increased sales price with 11 per cent commission, the management would get 89 cents—that is right.

Q. Comparing it to the Pacific Gas & Electric, they would get 96 cents of every dollar of sales price in excess of $11.50?

A. That is right.

Q. I believe you testified that if the Commission were to permit the directors of Engineers to resolve themselves into a group of trustees in liquidation that the Engineers Company in liquidation have the privilege of filing consolidated returns with Virginia during the period of such trusteeship?

A. I believe Mr. Ratcliffe testified to that, but that is my understanding.

Q. Yes, and there was no time limit on that under the Internal Revenue Code, as you understand it?

A. Well, I will have to fall back on Mr. Ratcliffe's testimony. As I recall it, he stated that a company in dissolu-

tion had the same status as an existing corporation for the purpose of filing consolidated returns, and I don't know whether that three-year period in Delaware affects that or not, Mr. Condon.

Q. You were not advised as to that?

A. I have not checked that point with him.

Q. Assume for the purpose of this question, if you will, that the Commission does permit the Board to resolve itself into a group of Trustees, as anticipated by Amendment No. 4, and assume further that the Company, under the aegis of these Trustees, files consolidated returns with Virginia, have you estimated what the tax advantage to Virginia would be as a result of filing those returns, based upon your estimated income for the year 1946?

A. It is my understanding that Virginia Electric and Power Company would not receive any benefit from filing these consolidated returns, but that the only benefit which would be received in 1946 under the assumption that Engineers is a holding company over Virginia is a credit of approximately $100,000 due to the ability of the group to deduct Engineers' own expenses of approximately $132,000.

Q. Well, Mr. Benjamin, are you under the impression that Virginia would have no advantage of filing these consolidated returns because of the loss carry-overs of Engineers from Puget Sound?

A. Well, I can't go into any detail on the tax phase of it, Mr. Condon. I am sorry, but my understanding is that they do not gain any advantage in the saving of taxes from this consolidation during 1946 after Engineers is dissolved.

Q. Well, coming out of the advantages from Engineers' standpoint, you have mentioned the credit of $100,000 or thereabouts of Engineers' expenses that would be eliminated, as testified to in substance, by either Mr. Leighton or Mr. Ratcliffe—do you call that?

A. I don't recall whether they put that figure——

Q. $101,000 comes to my mind. I am not certain. I don't have the point of the record before me.

A. Yes, I recall that statement was made, that there would be a saving,—yes, sir.

Q. And that was $100,000 ex-estimated expenses of $132,000?

A. I don't know just what you mean "ex."

Q. What were the total estimated expenses of Engineers?

A. $132,000.

Q. Now, if I understand your testimony correctly—and if I understand one of your exhibits to which it refers correctly, that $132,000 estimate was the pro forma estimated expense of Engineers, assuming that steps 1 and 2 of the Plan now before this Commission had been concluded?

A. That is right.

By Mr. Kanton:

Q. Isn't it true, Mr. Benjamin, that during this three-year period, if either Engineers or Virginia realizes a capital gain, either one of them can offset it against the capital loss realized from the sale of Puget in 1944?

A. That is my understanding, Mr. Kanton. I believe Mr. Ratcliffe testified to the effect that under this plan that would not be necessary to avail himself of.

Q. Well, there is the possibility in this three years, that Virginia may have a capital gain, which they could offset by a capital loss, if Engineers and Virginia were filing consolidated returns?

Q. Yes, but it is also my understanding that under this Plan there would not be any tax payable anyway, if some of the Virginia common stock was sold during the period.

Q. I am not necessarily referring to Virginia common stock.

Mr. Condon: He is talking about capital assets.

By Mr. Kanton:

Q. Isn't that correct on that basis, Mr. Benjamin?

A. Well, I really would rather not answer that question affirmatively, Mr. Kanton—I am not sure.

Q. Can you answer that question now, Mr. Benjamin?

A. It is my understanding that capital gains realized by Virginia during the next few years could be applied against Engineers' capital loss in Puget.

Q. That is, if Engineers and Virginia are still filing a consolidated return?

A. That is correct.

Q. And that is for a five-year period from the time of the loss taken, which was 1944?

A. That is my understanding.

By Mr. Condon:

Q. Now, are you aware of the fact that if these consolidated returns are filed by Engineers and Virginia, what the effect of that will be upon the dividends declared by Virginia to Engineers, taxwise?

A. If the consolidated returns are continued to be filed?

Q. Yes.

A. It is my understanding that dividends paid by Virginia to Engineers would not be taxable.

Q. So that whatever earnings are generated from Virginia to Engineers during this period will come in to Engineers tax free, isn't that a fact?

A. That is my understanding.

Q. Now, there is a 2 per cent tax or penalty on Engineers for filing the return on a consolidated basis, is that not so, Mr. Benjamin?

A. I believe that is correct.

Q. So would you not say that there was a great advantage to Engineers' stockholders to have Engineers continue in that relationship as long as it was possible to so continue it, in view of the fact that $100,000 out of $132,000 of estimated or pro forma Engineers' expenses would be absorbed and all the dividends received by Engineers from

Virginia will come into it tax free with the exception of the 2 per cent penalty for filing consolidated returns?

A. Well, I don't believe that the $101,000 figure is an advantage if you have to spend $132,000 to get that advantage.

Q. Mr. Benjamin, that isn't my question.

Mr. Condon: (To the reporter) Will you please re-read it and see if we can't get a more direct answer?

(The question was read by the reporter.)

The Witness: No, I don't think so.

By Mr. Condon:

Q. Is the reason for your answer the difference between $101,000 and $132,000?

A. That is one of the reasons, Mr. Condon.

Q. Have you made any calculation as to the difference in taxes to the stockholders of Engineers and more particularly this rather small group of stockholders of Engineers, this 338 plus or minus group, as to whether or not the dividends coming from Virginia went to Engineers tax free with the exception of the 2 per cent penalty, or whether the dividends from Engineers was divided up among that group to the extent of approximately 65 per cent and became taxable in their hands, at ordinary income rates?

A. Well, I don't believe you can keep a corporation alive for the sole purpose of withholding dividends from the common stockholders. I think that, as I testified before, in response to several of Mr. Kanton's questions, the common stockholders to get a collateral tax advantage from the continuation of engineers during——

Q. I don't wish to interrupt you, Mr. Benjamin. My question was if you had made any calculations as to the difference, in the way of taxes?

A. I am sorry. I have not.

Q. You have a spread of $31,000 in that expense on the pro forma basis, if I understand that correctly?

A. That is correct.

Q. Are there other reasons why you feel it is desirable at the present time to make a change?

A. Well, I feel that, as my previous answer was an attempt to spell out that reason, I don't believe there is any justification for keeping Engineers alive for that purpose. I think it would have to have a business purpose for being kept alive, and I don't believe Engineers has such business purpose for being kept alive, other than the paying off of its obligations.

Q. Now, Mr. Benjamin, do you recall the Release of this Commission in the Western Public Service case? It is one of the Commission's exhibits, wherein the Commission made the statement in words or substance that "We note the statements of Engineers that they do not plan to liquidate Engineers." Do you recall that statement?

A. Yes, I do.

Q. Do you have in mind the letter that Mr. Kellogg wrote Mr. Barnes, in which he took Mr. Tucker to task in a most genteel way for suggesting that there might not be enough income coming up into the Engineers' treasury to take care of the preferred stock?

A. That is correct. I would like to make one further statement with reference to your previous question, however.

As I recall that Western case, Engineers preferred stock case, the testimony was to the effect that Engineers would not be liquidated within the near future because of savings contemplated from consolidated returns.

Q. Mr. Benjamin, would you let me direct your attention to page 11 of that release, and you watch me and see if I read the sentence from the opinion of the Commission correctly.

The Examiner: Which release is this, Mr. Condon?

Mr. Condon: This is Release No. 4114. It is in evidence.

The Examiner: That is Commission's Exhibit No. 5.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. (Continuing) "We take note also of Engineers' argument that the pending Section 11 proceedings is not likely to result in the 'liquidation' of Engineers, and that even if it does, the proper standard for the adjustment of rights of preferred stockholders is not the liquidation preference to which they would be entitled on a voluntary liquidation, liquidation in bankruptcy or a bankruptcy reorganization proceeding, but the fair value of their expectations in the absence of any such proceeding, taking into account their liquidation preferences as but one of many factors."

Have I read that correctly?

A. You certainly have.

Q. There was nothing said in there about immediate future or anything else, was there?

A. No, sir.

Mr. Tucker: Mr. Benjamin was talking about the testimony in the case. Maybe the testimony in the case is not fairly summarized there. I don't think it appears here whether it was or whether it was not. I presume it was, but there may have been a time limit.

Mr. Condon: I have no objection, Mr. Tucker, if you wish to show the testimony. I was relying on an exhibit here that is in evidence, and it was a finding of the Commission. I am assuming that the findings of the Commission are accurate. If you wish to challenge that, I am sure that I have no objection, if you wish to do it, to show whatever the fact is.

(Discussion off the record.)

Mr. Kanton: Just to try to clear up the facts as to what happened in that Western case, I am looking at page 15 of Mr. Tucker's brief, which is contained in File No. 70-453. He has a heading there which says, "The pending 11(b) proceeding is unlikely to result in a liquidation of Engineers."

The paragraph right under that reads:

"At the present time it would seem to us very doubtful that the Commission, quite irrespective of the problem of distribution as between the preferred and common stockholders, will wish to see Engineers liquidated in connection with the pending proceeding under Section 11."

Mr. Tucker: I don't like these partial quotations, without the context and I don't think they are fair. It may be perfectly fair but I want to know what were the reasons and I think it ought to go into the record in the same connection.

Mr. Kanton: I think you are quite correct. The first thing you gave as the reason was the filing of consolidated returns, because of the excess profits tax that was in existence at that time. The second reason you gave is that it is difficult to believe that the Commission would wish to insist upon a sale by Engineers under the present acutely depressed market conditions.

The third reason you gave was that it cannot, at the present time—that is, then—be assumed that Engineers might not be permitted to use funds derived from the disposition of some of its present subsidiaries to acquire additional properties, which would fit into an integrated system.

Then you concluded and said, in view of these factors it seems fair to say that the possibility that the Commission will regard the liquidaton of Engineers as a desirable end is at present quite remote.

Mr. Tucker: I still think that is a perfectly sound statement.

* * * * *

[R. p. 933] By Mr. Kanton:

Q. Do you recall the sentence that Mr. Condon just read to you from page 11 of Commission Release No. 4114, Mr. Benjamin?

A. Yes.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Tucker: Well, now, I object, just as a matter of orderly procedure, to a continuation of that matter.

Mr. Kanton: It isn't a continuation of that matter, Mr. Tucker. Just let me finish.

Mr. Tucker: It is obviously a continuation of it.

The Examiner: Let's see what Mr. Kanton has in mind first, Mr. Tucker.

Mr. Tucker: All right.

Mr. Kanton: I have in mind this, Mr. Examiner—Mr. Barnes and Mr. Benjamin have made a statement several times in the record that in all the considerations given to any filing of a Section 11(e) Plan before this Commission by the management of Engineers, that they have always considered the payment of $100 per share plus accrued dividends, to the preferred stockholders of Engineers to be the fair and equitable evaluation of their rights. I think we are all agreed on that.

Now, my only purpose in referring again to this sentence is to find out this,—at the time that this particular Western case appeared before this Commission, it was the position of Engineers' management that it wouldn't be fair to pay $100 per share plus accrued dividends, but whatever the fair value was, whether it was $60, $70 or $80, and in reference to that I would just like to refresh the witness's mind and even Mr. Tucker's mind as to certain statements made in his brief in that proceeding.

The Examiner: Put your question to the witness.

By Mr. Kanton:

Q. Mr. Benjamin, do you recall the proceeding in the Western Public Service Company matter before this Commission?

A. I do.

Q. Do you recall the brief of Mr. Tucker filed in that proceeding?

A. I have read it.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. On page 8 of said brief, which is contained in File No. 70-453——

The Examiner: (Interposing) Mr. Kanton, may I interrupt you there? Couldn't you accomplish that without quoting from the brief, and ask Mr. Benjamin if the Company at any other time considered giving the preferred stockholders any amount other than $100 and dividends?

Mr. Kanton: I did. I am just trying now to refresh his recollection.

The Examiner: What is his answer to that?

Mr. Kanton: His answer was "No" and I believe that there may have been some mistake.

The Examiner: That must have been some time ago. It wasn't recently.

Mr. Kanton: Well, it was several times. I have cross-examined Mr. Barnes and Mr. Benjamin.

The Examiner: All right. Put the question to him again now and let us see what his answer is.

By Mr. Kanton:

Q. Mr. Benjamin, in the consideration by the management of any Section 11(e) Plan filed before this Commission, did the management of Engineers always consider the payment of $100 a share plus accrued dividends to be the fair and equitable equivalent of the rights of the preferred stockholders of Engineers?

A. I think that in any Section 11(e) Plan that the management always contemplated the payment of $100 per share and accrued dividends to the preferred stockholders.

Q. Now, I just referred you to page 8 of Mr. Tucker's brief in the matter of the Western Public Service Company, and I would just like to quote a few pertinent passages beginning there.

A. May I go back on that question for one minute, that you just asked me?

Q. Yes, sir.

Richard N. Benjamin—Cross Examination (Cont'd)

A. Any Section 11(e) Plan that required the preferred stockholders to take certain securities, there was the 11(e) Plan in the El Paso Natural Gas case that varied from that, but that was a voluntary exchange offer to the preferred stockholders.

By Mr. Condon:

Q. That is the case, Mr. Benjamin, where they were going to get part cash and part securities?

A. That is right.

Q. I believe you testified the aggregate of what they would receive would be worth less than $100?

A. That is right.

By Mr. Tucker:

Q. Was that, as you recollect, an 11(e) Plan?

A. It was.

Q. The El Paso Natural Gas exchange for preferred stock?

A. I think it was.

By Mr. Kanton:

Q. Do you recall in this brief, Mr. Benjamin, that on page 8 there is an opening statement with certain remarks that were made therein to the following effect:

> "Effect of proposed purchase upon Section 11 Proceedings."

Now, the second paragraph thereunder reads as follows:

> "We contend, (1), whether or not Engineers is to be eventually liquidated as a result of the operation of Section 11, the proper standard for the adjustment of the rights of the preferred stockholders is not their liquidation preference as to which they would be entitled on a voluntary liqui-

> dation, in a liquidation in bankruptcy or in a bankruptcy reorganization proceeding, but the fair value of their expectations in the absence of any such proceeding, taking into account their liquidatoin preferences as but one of many factors."

Then, the fourth contention reads as follows, on page 9:

> "A cash distribution to preferred stockholders in partial liquidation would be inequitable, without some adjustment of their liquidation preference," etc., "since they are not fairly entitled to receive the full present liquidation preference of their shares, such a partial liquidation adjustment is not practical on a voluntary basis."

Then, on page 10 there is another opening statement made by Mr. Tucker which reads:

> "The contract preferences of preferred stocks on liquidation do not furnish a fair standard for the treatment of preferred stockholders in a reorganization, necessitated solely by Section 11."

Do you recall that?

A. Yes.

Q. Now, in the light of those statements, is it still your firm belief that Engineers or its management never took the position to pay the preferred stockholders of Engineers only $100 a share plus accrued dividends; or did they, during this time, when this case was before this Commission, say that it would be fair and equitable to pay them some sum less, if that were the fair value?

A. Well, it is my understanding of the Western case that that was purely a voluntary purchase program on the part of Engineers and that the preferred stockholders who desired to take advantage of that bid in the market could do so.

Q. I think that is a fair statement, but you did not answer my question, Mr. Benjamin.

I have repeated my question many times off the record and on the record. Is it true, in the light of what I have just read, that Engineers at the time of this proceeding said that it would be fair and equitable to pay the preferred stockholders less than $100 per share plus accrued dividends?

A. I think the directors felt at that time that it would have been fair to pay them less than $100 if they were willing to accept it themselves, but not to force them to take anything less than that.

That is the distinction that I draw between the two situations.

Q. I am talking about a Section 11(e) Proceeding, as I read here, and the paying off of all the preferred.

Would it have been fair at that time, in the minds of the Board of Directors to pay $100 per share plus accrued dividends?

A. I don't believe the Board of Directors would have filed an 11(e) Plan at that time which would have contemplated the payment of $100 a share and accrued dividends to the preferred stockholders.

Q. Why not?

A. Because on the basis of market conditions at that time, and on the basis that there were certain advantages in retaining Engineers which have been cited, the balance left for the common stockholder would have been very, very small.

Q. If the fair value were determined to be a lesser amount, and that was determined to be satisfactory to the Engineers' management, would they have filed it at that time?

A. Will you repeat that?

(The question was read by the reporter.)

Mr. Tucker: I object. I don't see how this witness can possibly say what the Engineers' management would have done at that time.

Mr. Kanton: I think that is a proper objection to my question. The only reason I asked the question is that the witness still has not answered my whole question that I asked originally.

Mr. Tucker: Then ask him another.

Mr. Kanton: I will ask him the same question.

By Mr. Kanton:

Q. In the light of the remarks I read from Mr. Tucker's brief and that I quoted to you, was it the position taken at that time, whether by Mr. Tucker or the Engineers' management, that it would not have been fair to pay the Engineers' preferred stockholders $100 per share plus accrued dividends in a Section 11(e) Proceeding?

A. Let me see. Let me see that (indicating).

(Discussion off the record.)

The Examiner: All right, Mr. Benjamin,—you may answer.

Mr. Condon: Mr. Examiner, may I ask to have that question re-read?

The Examiner: Will the reporter read the question?

(The question was read.)

The Witness: I think that was Mr. Tucker's position at that time, in the light of the circumstances at that time, Mr. Kanton.

By Mr. Kanton:

Q. Was that your position too?

A. I think that if an 11(e) Plan had been filed at that time by the management, that my position would have been the same as Mr. Tucker's.

Richard N. Benjamin—Cross Examination. (Cont'd)

Q. Do you know if Mr. Tucker discussed his position, so-called, with the Board of Directors of Engineers at that time on this particular point?

A. On this particular point to which you refer?

Q. Yes, sir.

A. I do not recall that he did. I remember Mr. Barnes testifying in an earlier session that he felt that the Board of Directors would not have approved a Section 11(e) Plan for filing that contemplated the payment of any less.

Q. Do you recall Mr. Barnes also testifying that he would not have gone along with such a plan providing for the payment of less than $100 per share plus accrued dividends?

A. Providing for the payment of less?

Q. Yes. In other words, so far, from what we have been able to gather, it has only been the opinion of Mr. Tucker and your opinion that that would have happened, is that correct?

A. Well, I don't want you to misunderstand my position. I said that if an 11(e) Plan had been filed at that time, that would have been the situation. I don't know that I would have been in favor of filing an 11(e) Plan at that particular time, Mr. Kanton.

Q. Referring to page 536 of the record, we find that in answer to a question that I asked Mr. Barnes on cross-examination along this same line that I am asking you, he said that it would not be fair to pay the voluntary or involuntary liquidation price when the stock was selling at 60, that it was Mr. Tucker's opinion, and that it was Mr. Barnes' opinion. You, I think, just testified that it would also have been your opinion?

A. That is right.

Q. And you say it would not have been the opinion of the Board of Directors at that time?

A. I don't know what their opinion would have been, Mr. Kanton. I recall Mr. Barnes testifying that that would

have been their position. All I know is that any over-all 11(e) plan that was ever discussed with the Board, to my knowledge, that contemplated the ultimate liquidation of Engineers had a provision in it for the payment of not less or more than $100 a share and accrued dividends.

Q. At the time of this proceeding, I take it, when Engineers' position was placed before this Commission in reference to this Western case, the management, so-called, of Engineers, comprising Mr. Barnes and yourself, as represented by counsel, Mr. Tucker, did take the position that it would not be fair to pay $100 per share plus accrued dividends?

A. That position was taken in reference to the standards that should be applied in a Section 11(e) Plan. That is my understanding, Mr. Kanton.

* * * * *

[R. p. 945] By Mr. Condon:

Q. Mr. Benjamin, is it a fair statement to say that at the time last September 5 when the directors decided to pay the $100 a share to the preferred stockholders of Engineers that they did not have before them any graphs, charts, or data with respect to future earnings or prospective earnings of Virginia, Gulf, and El Paso?

A. That is correct.

Q. Would you say that it was also a fair statement that it was the intent and purpose of the majority of the Board of Directors of Engineers to retain all future interests and increments in the enterprise for the common stockholders?

A. All future——

Q. Interests and increments.

A. Yes.

Q. I believe you testified, first, this Commission has never directed Engineers to liquidate and, second, that the Board of Engineers might have decided to liquidate the Engineers Company voluntarily; is that correct?

A. Yes.

Mr. Tucker: The Board of Directors? Did you say the Board of Directors might have decided?

The Witness: By that I assume you mean initiate action to cause the stockholders to voluntarily liquidate, yes.

By Mr. Condon:

Q. I believe you also testified that the Board of Engineers might have chosen to give the preferred stockholders a stake in the subsidiary companies had they so desired?

A. Yes, I think I testified that they could have chosen other methods to meet the obligation of the preferred stock other than pay them in cash.

Q. In other words, the effect of what you are saying is that the Board of Directors of Engineers chose this method as a means of limiting the preferred as to the receipt of $100 and accumulated dividends to the date of deposit?

A. I think that is right. In other words, the method followed by the plan provides for the payment in cash of the amount you stated and therefore limits them to that amount, yes, sir.

Q. The effect, Mr. Benjamin, of the Board's action in this respect would be to deprive the preferred stockholders of Engineers of any prospect of participating in the enterprise, its future earnings, and prospects.

A. So far as this plan is concerned, yes.

Q. They will have no further interest in the going concern activities of Virginia, Gulf States, and El Paso?

A. That is correct.

Q. Mr. Benjamin, at one point in your testimony, more particularly page 286——

The Examiner: Off the record.

(Discussion off the record.)

The Examiner: Mr. Benjamin, do you want to amend your answer in line with the off-the-record discussion as to

the possible other interests that the preferred stockholders might have other than receiving cash for their stock?

The Witness: Not as preferred stockholders, Mr. Examiner; the preferred stockholders who own common stock or acquire warrants will have the right to make that exchange but only because they own this common stock or buy the warrants.

By Mr. Condon:

Q. Mr. Benjamin, I have before me page 286 of the record of your testimony, and I would like to direct your attention to the part of your answer that commences at the fourth line from the top of that page:

> "Now, in order to protect his interests you ask the stockholders to put up $11.50 per share. It is true he gets his Gulf States common stock, but the only reason he gets it is because he puts up the money to get it."

Will you examine that answer that you gave and see if you wish the record to stand that the only reason that the common stockholder gets it—meaning Gulf States stock—is because he puts up the money to get it? Is that a fair statement?

A. Well, he gets the stock because he is a common stockholder of Engineers and the only way in which he can get it is to put up the $11.50 per share.

Q. Isn't it a fair statement to say, Mr. Benjamin, that the real reason why he is getting that Gulf States stock is because he is a common stockholder and in addition puts up $11.50 a share?

A. That's right.

Q. Isn't the important element there the fact that he is a common stockholder or a preferred stockholder who holds common stock?

A. I think the important reason is because he is a common stockholder.

Q. Yes. Now, you concede, do you not, that the Engineers Company could get more money in the aggregate for the shares that are being turned over to the common stockholders of Engineers and the preferred stockholders who own common stock?

A. I think, based on present market conditions, that the company could get more than that.

Q. There was no provision in the plan whereby the preferred stockholders who own no common are to be afforded such a privilege?

A. That's right.

Q. Do you recollect being interrogated by Mr. Kanton with respect to how, if at all, assuming an automatic amendment to the plan pursuant to step 4 or amendment 4, which amendment would be made subject to the reservation of Engineers to protest and to litigate—as to how the plan would get into court if the Engineers Company chose not to have it go to court? Whether it is your testimony or Mr. Barnes', at the moment I am not clear, but do you recollect being present when that testimony was given by either yourself or Mr. Barnes?

A. Yes, I recollect it. I am not too clear as to who gave the testimony or just the detail of it.

Q. You are cognizant, then, of the existence of the line of inquiry?

A. Yes.

Q. Suppose this Commission disallowed that portion of the plan that contemplated a deposit of $100 and accrued dividends and fixed an amount in excess of $100 and accrued dividends and provided that the plan be amended necessitating an additional deposit in excess of $100 plus accrued dividends that was more than your Board of Engineers felt that it wished to pay.

Mr. Kanton: May I make a suggestion? You are not saying that the Commission directed that the plan be amended?

Mr. Condon: The Commission found that it was unfavorable and inequitable not to provide that an additional sum in excess of $100 plus accrued dividends to the date of deposit, and that that anticipates an amount that the Board of Directors of Engineers was unwilling to accept. Has the Board given any consideration as to how, if at all, the plan as filed could be enforced by a United States District Court unless Engineers decided to accept that additional amount and seek court enforcement.

The Examiner: I am just wondering if, after all, that isn't a legal question. Mr. Tucker would have to decide whether or not this witness can answer that. If your question is if the Board gave consideration to that, he can answer it, but I don't think he can answer what they might do.

Mr. Condon: I was merely asking if the Board considered that problem.

Mr. Tucker: I was watching very carefully to see that he didn't get over the boundary on that score.

The Witness: If I understand the situation you describe, you are asking if the Commission found it unfair and inequitable ot approve Part 1 of the plan as now filed but stated Part 1 of the plan, which is the section that provides for this deposit, would have to be amended so as to provide for a larger payment, I don't believe the Board gave consideration to that possibility. That is a new thought to me certainly. I have never considered that possibility.

By Mr. Condon:

Q. Don't you think that is an important consideration, Mr. Benjamin, from the standpoint of the preferred stockholders here?

Richard N. Benjamin—Cross Examination (Cont'd)

A. Well, I think the preferred stockholders might well be interested in that possibility. It seems to me that the effect of that is to merge Parts 1 and 2 of the plan. It seems to me if the Commission felt that Part 1 of the plan was unfair and inequitable, they were not—I am not clear on that at all. I think that the preferred stockholders would be interested in having that done if the amount met with their approval.

Q. Isn't it a fact that that indicates to you in fairness the close interrelationship between steps 1 and 2 of the plan?

A. Well, there is no question but that Parts 1 and 2 of the plan are filed as one plan, and we have gone into the reasons as to why there were two parts to the plan. In order to expedite Part 1, Part 2 was set aside so that it could be dealt with separately, and it was considered possible that that would take longer to settle than Part 1 of the plan. The two parts are interrelated because they are part of one plan.

Q. Can't you see in the question I asked you previously the necessity for this Commission to make a decision on point 2 before it can find that point or step 1 is fair and equitable to the preferred stockholders in the light of the point that you say had not been considered by the directors?

A. No, I don't think so. I think that if the preferred stockholders receive immediately their $100 per share plus accrued dividends, that it is fair and equitable to pay them that amount at this time, and that the matter of the excess payment could be settled under Part 2 of the plan. I think that has been done in other cases before this Commission and I think it is fair to do it.

Q. Let us come back to my initial question: Suppose the Commission should find it unfair and inequitable to permit the preferred stockholders to be paid $100—and I am omitting accrued dividends to the date of deposit in this line of inquiry, if you will not object——

Mr. Tucker: You are omitting it but you are assuming you are saying it every time?

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Condon: Omitting it for the purpose of this inquiry only.

By Mr. Condon:

Q. —that the $5 preferred should receive $105, in other words $5 a share in excess of $100, and the other two series $10 a share, omitting again for the purpose of this line of inquiry the dividends to the date of deposit—now, is it your idea that this plan anticipates that the Engineers would then put $100 on deposit with the Chase Bank and then have a plan which could not be enforced in the District Court except with the acquiescence of the Engineers Company?

The Witness: May I have that question read?

(The question is read.)

The Witness: It is my idea of the situation that such a finding on the part of the Commission, that it would be unfair and inequitable to pay less than the figures you mentioned, $105, $110, would result in an automatic amendment of Part 2 of the plan. That was my understanding of the purpose of Part 2 of the plan. Engineers would not be able to put up $100 per share until the Court had approved Part 1 of the plan, and my understanding is that Engineers would be committed to going ahead with Part 2 of the plan if such an event took place.

By Mr. Condon:

Q. Let us stop at that. You say they are committed to go ahead by the plan. Committed by what?

A. That has been my understanding. I would like to discuss the matter with my counsel for a moment.

Q. Would you be kind enough to refer to the plan and discuss the matter with your counsel, because I think that is the important feature of our problem at this stage in the cross-examination.

* * * * * *

Richard N. Benjamin—Cross Examination (Cont'd)

[R. p. 978] By Mr. Condon:

Q. Coming to El Paso Natural Gas, Mr. Benjamin, do you recollect giving some testimony concerning that?

A. Yes, I do.

Q. Did the Engineers ever take up or apply to this Commission with regard to the trusteeship of Judge Shearn, concerning the shares of stock in El Paso Natural Gas?

Mr. Kanton: May I have that question read?

(The question was read.)

The Witness: Yes, they did.

By Mr. Condon:

Q. You testified here on direct examination that the Engineers Company made a trusteeship of the stock options with respect to the right to purchase El Paso Natural Gas stock or gave that testimony in substance, did you not?

A. That is right.

Q. Did the Engineers' Company execute a declaration of trust to Judge Shearn?

A. Yes, they did.

Q. Did the Engineers select Judge Shearn as trustee?

A. Yes, I think they did.

Q. Was the matter of the form of Trust instrument and its terms fixed by Engineers?

A. Well, I don't know how the terms were fixed, Mr. Condon. I wasn't with Engineers at the time.

Q. But you were there with Engineers during a part of this so-called trusteeship of the El Paso Natural Gas stock, Mr. Benjamin?

A. That is right.

Q. Do you know whether or not the choice of time of sale of El Paso Natural Gas that resulted from the exercise of the option and the sales price thereof was left to the discretion of Judge Shearn by the Engineers Company?

* * * * *

[R. p. 981] The Witness: It is my understanding that under the terms of the trust agreement any sale had to be approved by Engineers.

By Mr. Condon:

Q. Who put up the money for Mr. Shearn as trustee to exercise his option and so acquire the stock of El Paso Natural Gas?

A. Engineers Public Service.

Q. Was that done on a take-down basis, Mr. Benjamin?

A. Well, all of the options were exercised at one time. Is that the prrport of your question?

Q. I don't know what the fact is.

A. Yes, they were all exercised at one time.

Q. And the money flowed from Engineers to Judge Shearn as trustee and he, in turn, applied it to the purchase of the stock?

A. That is my understanding, although I am not familiar with the detail of that particular transaction.

Q. Now, you say that the matter of purchase, and the price was subject to approval or veto power or some such thought by the Engineers Company?

A. I was referring to the sales.

Q. Just the sales—not the purchase price,—but was that fixed in the option?

A. The option was one that Engineers held and they assigned the option to Judge Shearn and furnished him with the money, I believe, to exercise the option.

Q. Who made the decision, if you know, to exercise the option?

A. Oh, I don't know—I assume it was the Engineers, Board of Directors, but I don't know.

Q. As I believe you testified, there was no SEC order on that transaction?

A. No, that was before Engineers registered as a holding company.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Was it known at the time, or was the Engineers Company advised that it was a violation of Section 4 of the Act to participate in that transaction?

(Discussion off the record.)

The Examiner: On the record. Are you objecting to that question?

Mr. Kanton: I object to that question, Mr. Examiner, on the ground that it calls for a legal conclusion from this witness and on the further ground that it has occurred previous to the time that Engineers was a registered holding company and previous to the time that this witness was a member of the management of Engineers.

The Examiner: I will overrule your objection and let him answer whether it was a violation of Section 4. The question wasn't whether it was a violation. He was asked if Engineers was advised that it was a violation.

Now, Mr. Benjamin——?

Mr. Kanton: I want to take an exception to your ruling, Mr. Examiner.

The Examiner: Give Mr. Kanton an exception.

The Witness: I was not advised by counsel that this acquisition was a violation of the Holding Company Act.

The Examiner: The question wasn't were you advised by counsel. Were you advised by anybody?

The Witness: It was my understanding, or it has been my understanding that this acquisition by the trustee was——

The Examiner (Interposing) That isn't the question. The question is, were you advised by anybody that it was in violation of Section 4. You can answer that Yes or No.

The Witness: No.

By Mr. Condon:

Q. Do you know whether or not the Engineers Company was advised from anything that has come to your attention since you came with the Company?

A. When you say "this", you mean the acquisition by Judge Shearn of the stock of El Paso Natural Gas, sir?

Q. Under the circumstances under which they acquired it.

A. No.

Q. No opinion was ever rendered to that effect?

A. That it was a violation—no, sir.

Q. Was any opinion rendered to the contrary so far as you know?

The Examiner: One minute. I think his answer was that the Engineers was not advised at all in the matter.

Wasn't that your answer, Mr. Benjamin?

The Witness: I do not know what legal advice Engineers received in connectnion with the establishment of this trust and the acquisition of these shares.

By Mr. Condon:

Q. Do you know whether or not the Engineers made any attempt to sell its option, rather than transfer or assign it to Judge Shearn as trustee?

A. No.

Q. Have you examined the files of Engineers and familiarized yourself with this transaction sufficiently to say with a reasonable degree of certainty that no such attempt was made?

A. No, I couldn't answer that.

The Examiner: Wait a minute. Your answer then is "No", that you have not examined the files sufficiently to answer the question?

The Witness: Yes, sir.

By Mr. Condon:

Q. Could you refer to page 207 of the transcript of your testimony under examination by Mr. Tucker—and I refer you specifically to about the last eight or ten lines from the bottom of the page.

Richard N. Benjamin—Cross Examination (Cont'd)

Do you recall being asked by Mr. Tucker in words or substance whether or not Engineers had been advised that it was illegal for Engineers to hold that stock in El Paso Natural Gas Company?

A. Yes.

Q. Was that the subject of a written opinion?

A. No, I don't believe so.

Q. Did you so testify at page 207 of the record?

A. Whether it was written or not?

Q. No, no,—that Engineers received an opinion or advice that it could not acquire the stock or continue to hold the stock?

A. Well, what this refers to is whether Engineers could continue to hold the stock under the Holding Company Act.

Q. And you were advised that it could not?

A. That is right.

Q. Does that refresh your recollection as to whether at any time Engineers was advised that it was illegal to acquire the stock?

A. Well, it was my understanding that Engineers Public Service Company could not hold this stock and I assumed that it had been acquired legally, because I knew that we had counsel at the time that the agreement was entered into.

Q. Did you come across anything in the records of Engineers, Mr. Benjamin, to show why this complicated device of trusteeship was resorted to in 1936 rather than having Engineers exercise the option itself?

A. What was that again?

(The question was read by the reporter.)

By Mr. Condon:

Q. And acquire the stock directly at that time?

A. I don't recall any specific document as to that, Mr. Condon.

(Discussion off the record.)

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. Mr. Benjamin, I asked you before with respect to any application with respect to this Judge Shearn trusteeship arrangement having been made. I ask you again whether or not any formal application was made by Engineers, as far as you know, to this Commission, with respect to that trusteeship and the matters thereunto appertaining?

A. I don't know what transpired at that time, Mr. Condon. I don't recollect seeing any formal application in the files of the Company in connection with that, but I don't know what did happen at that time.

Mr. Tucker: Could I just help out?

I am willing to stipulate that there was no formal application, if that will help you any. There could not have been, because we were not a registered holding company, and there was no basis upon which we could have made such a formal application.

Will that satisfy you?

(Discussion off the record.)

Mr. Scheetz: My statement on that would be that I have no objection to such a stipulation if Mr. Condon and Mr. Tucker wish to so stipulate; my position being that the whole line of testimony on El Paso Natural Gas is irrelevant and that I am content with my exception, although I do think that Mr. Condon is within his rights.

The Examiner: All right, Mr. Condon. You may proceed.

By Mr. Condon:

Q. Just one final question in connection with that same subject matter, Mr. Benjamin.

Who fixed the period of five years of Judge Shearn's trusteeship, if you know?

A. I don't know.

(Formal matter relating to overnight adjournment omitted.)

VOLUME V

Certain Exhibits Filed with Securities and Exchange Commission (Cont'd)

Engineers' Exhibit No.		Index Page
38	Opinion of William E. Tucker to Board of Directors of Engineers Dated July 26, 1945	1722a
39	Amendment No. 4 to Application of Engineers Dated September 10, 1945 for Approval of Plan	1736a
40	20 Largest Holders of Record as of October 31, 1945 of Engineers' $6.00 Preferred Stock	1761a
41	20 Largest Holders of Record as of October 31, 1945 of Engineers' $5.50 Preferred Stock	1763a
42	20 Largest Holders of Record as of October 31, 1945 of Engineers' $5.00 Preferred Stock	1766a
43	20 Largest Holders of Record as of October 31, 1945 of Engineers' Common Stock	1769a
44	50 of the Largest Holders of Engineers' Common Stock who also Held Preferred Stock, Eliminating Common Holders Only, as of October 31, 1945	1772a
45	Engineers' Common Stock Holdings as of June 30, 1945	1776a
47	Engineers and Subsidiary Companies—Financial Statements	
	SCHEDULE A—Engineers balance sheet as at June 30, 1945, and income statement for the twelve months ended June 30, 1945, actual and pro forma giving effect to the consummation of Parts I and II of the Plan as proposed	1791a
	SCHEDULE B—Engineers and subsidiary companies consolidated balance sheet as at June 30, 1945 and consolidated income statement for the twelve months ended June 30, 1945, actual and pro forma giving effect to the consummation of Parts I and II of the Plan as proposed and to income tax adjustments made on the books of Virginia in August, 1945	1794a

Engineers' Exhibit No.		Index Page
	SCHEDULE C—Comparative balance sheets as at June 30, 1944 and June 30, 1945 and comparative income statements for the twelve months ended June 30, 1944 and June 30, 1945 for	
	C-1 Virginia	1800a
	C-2 Gulf States	1803a
	C-3 El Paso	1806a
	SCHEDULE D—Income statements for the years 1939 through 1944 for	
	D-1 Virginia	1808a
	D-2 Gulf States	1809a
	D-3 El Paso	1810a
49	Gulf States Utilities Company—Income Statements Years 1939 through 1945 (Last 2 Months of 1945 Estimated) Pro Forma Giving Effect to Present Fixed Charges, Preferred Dividends, Proposed Number of Shares of Common Stock, Applying Tax Reduction Resulting from Amortization of Emergency Facilities Against Taxes and Reflecting Amortization of Plant Acquisition Adjustments as a Deduction from Income	1811a
50	El Paso Electric Company—Income Statements Years 1939 through 1945, Pro Forma Giving Effect to Present Fixed Charges and Preferred Dividends and Proposed Number of Shares of Common Stock	1812a
51	Engineers and Subsidiary Companies—Consolidating Income Statement for 12 Months Ending June 30, 1945—Showing Tax Adjustment Applied Against Taxes and Reflecting Amortization of Plant Acquisition Adjustments as a Deduction from Income	1813a

Engineers' Exhibit No.		Index Page
52	Engineers and Subsidiary Companies Pro Forma Consolidating Income Statement for 12 Months Ended June 30, 1945, Giving Estimated Effect to the Consummation of Parts I and II of the Plan Showing Tax Adjustment Applied Against Taxes and Reflecting Amortization of Plant Acquisition Adjustments as a Deduction from Income	1815a
53	Virginia Electric and Power Company—Estimated Income Statement Year 1945 Excluding Transportation Operations for 3 Months Ended March 31, 1945 (Last 2 Months Estimated) and Pro Forma Income Statement Year 1944 Giving Estimated Effect as at January 1, 1944 to Merger and Sale of Transportation Properties	1818a
54	Engineers—Summary of Common Stock Issues	1820a
57	Release of Securities and Exchange Commission, Dated Wednesday, December 31, 1941, Containing Order Granting Applications and Permitting Declarations to Become Effective Pursuant to Sections 7, 10 and 12 of Public Utility Holding Company Act of 1935, and Order of Divestment Pursuant to Section 11(b)(i) of Said Act	1821a
63	Engineers' Income Statement Year 1945 (Last Two Months Estimated)	1825a
	Engineers' and Subsidiary Companies' Consolidating Income Statement Year 1945 (Last Two Months Estimated) and Engineers' 1946 Estimated Income Statement, and Engineers' and Subsidiary Companies' 1946 Estimated Consolidating Income Statement assuming Continuation of Engineers' System	1826a
65	El Paso Electric Company—Estimated Income Statement Year 1946 and Income Statement Year 1945 (Last 2 Months Estimated)	1830a
66	Gulf States Utilities Company Estimated Income Statement Year 1946 and Pro Forma Income Statement Year 1945 (Last 2 Months Estimated)	1831a

Engineers' Exhibit No.		Index Page
67	Virginia Electric and Power Company—Estimated Income Statement Year 1946 and Pro Forma Income Statement Year 1945 as Per Adjustments Indicated in Footnotes and Excluding Transportation Operations for 3 Months Ended March 31, 1945 (Last 2 Months Estimated)	1832a
68	Opinion of Mudge, Stern, Williams & Tucker to Engineers, Dated January 22, 1946	1833a
71	Engineers and Subsidiary Companies Pro Forma Balance Sheet Consolidated as at June 30, 1945 Giving Estimated Effect to (a) Sale of Investment in The Western Public Service Company, Operations from the Period July 1, 1945 to December 31, 1945 of Engineers and Virginia, Tax Adjustments by Virginia Resulting from Loss Claimed on Sale of Transportation Properties and Accelerated Amortization of War Facilities Due to Termination of War Emergency Period, Payment on December 31, 1945 of $5,100,000 Notes Payable of Virginia prior to Maturity and Miscellaneous Adjustments, and (b) the Consummation of Parts I and II of the Plan	1837a
73	Standard & Poor's Ratings—5 Public Utility Preferreds Used for Comparative Purposes with Engineers Preferreds—10 Medium-grade Selected Utility Preferred Stocks	1844a
74	Standard & Poor's Stock Quality Ratings	1845a
75	Standard & Poor's Market Ratings	1847a
76	Chart—Standard & Poor's Preferred Stock Yields, with Yield of Engineers $5 Preferred Superimposed	1849a
77	Comparative Study of Balance Sheet Items of 5 Public Utility Holding Companies with Engineers	1850a

Engineers' Exhibit No.		Index Page
78	Balance Sheet Items—Comparative Study of 5 Public Utility Holding Companies and Engineers Deducting Adjustment Accounts. 100.5 and 107 Both Including and Excluding Reserve Items	1851a
79	Amendment No. 5 to Application of Engineers Dated September 10, 1945 for Approval of Plan	1853a
80	2 Telegrams to William E. Tucker by Baker, Botts, Andrews & Walne relative to Amendment of El Paso Electric Company and Gulf States Utilities Company Charters	1914a
81	Amendment No. 6 to Application of Engineers Dated September 10, 1945 for Approval of Plan	1915a
82	Affidavit of Richard N. Benjamin as to Mailing of (1) Letter of D. C. Barnes, President, to Engineers' Stockholders, Dated December 20, 1946, and (2) Notice of Filing Notice and Order for Hearing and Order for Reopening Record of Securities and Exchange Commission Dated December 19, 1946	1933a
89	Opinion of William E. Tucker and T. Justin Moore addressed to the Board of Directors of Engineers Public Service Company Dated December 12, 1946	1949a

Preferred Stockholder's Exhibit No:		
12	Letter of C. W. Kellogg to Donald C. Barnes, President of Engineers, Dated July 27, 1945	1961a
12-A	Letter of D. C. Barnes, President of Engineers, to C. W. Kellogg, Dated July 31, 1945	1965a
13	Letter of W. E. Tucker to the Board of Directors of Engineers, Dated December 11, 1945, Relative to Amendment No. 4 to the Plan	1969a

Preferred Stockholder's Exhibit No.		Index Page
14	Statement of Thomas W. Streeter to Board of Directors of Engineers at Meeting held on July 26, 1945 in connection with Plan	1974a

36	List of Holders of Preferred Stock of Engineers Represented by Lawrence R. Condon	2122a

Home Insurance Company, et al. Exhibit No.		
1	List of Holders of Preferred Stock of Engineers Represented by Francis H. Scheetz, of Evans, Bayard & Frick	2125a

Commission's Exhibit No.		
6	Release of Securities and Exchange Commission (H. C. A. Release 499), dated April 15, 1944, relating to Proposed Purchase and Retirement of Preferred Stocks by Engineers	2128a
9	Letter of C. A. Johnson to B. S. Kanton, Securities and Exchange Commission, Relative to Formation of Common Stockholders' Committee	2147a
	Letter of C. A. Johnson to Securities and Exchange Commission Stating Objections to Amended Plan (referred to at oral argument of January 3, 1947, rec. 857a)	2148a

Hearing on January 8, 1946.

* * * * *

[R. p. 1014]

RICHARD N. BENJAMIN

resumed the stand and testified further as follows:

The Witness: Might I make a statement in response to some questions that Mr. Kanton asked me to get the answer to?

The Examiner: Yes. Go right ahead, Mr. Benjamin.

The Witness: Referring to Applicant's Exhibit No. 63, Mr. Kanton asked me to furnish him with certain calculations, the first of which is on page 1 of that exhibit, times Engineers preferred dividend earned, 2.57. The same calculation, excluding dividends from El Paso Electric Company in excess of $375,000 a year, in order to reflect the fact that there was an unusually large dividend from El Paso during 1945, gives a figure of 2.20.

Cross Examination (Resumed)

By Mr. Kanton:

Q. Excuse me, Mr. Benjamin, have you made the computation including the dividend for El Paso?

A. Yes, that was the first figure. That is 2.57.

Referring now to page 2, which is the consolidated income statements, times Engineers preferred dividend earned, 2.77.

Referring to page 4, which is the 1946 estimated, parent company, times Engineers preferred dividend earned—2.03.

Turning to page 5, which is the consolidated for 1946 estimated, times Engineers preferred dividend earned—3.39.

In addition, Mr. Kanton, and I believe Mr. Condon also, asked me to make a comparison of the estimates for the three operating companies with the actual results for those

companies for the years 1940 through 1945. I have that information in pencil form here with the exception of the 1945 estimate and actual for Virginia.

Q. I just wanted a general observation, Mr. Benjamin.

By Mr. Condon:

Q. Mr. Benjamin, are you including the estimates for the fiscal years?

A. Yes, sir.

Q. Thank you.

A. It is pretty hard to generalize on these results, Mr. Kanton, because the variations in particular years are fairly wide. In some years the estimates were very close to the final results and in other years they were not so close.

By Mr. Kanton:

Q. What years were they close?

A. I could give you the percent differential between the estimate and the actual very quickly for all these three companies.

Q. By that, you mean the first estimate made at the beginning of the year, not the one that were made to bring it up to date during the year in question, is that correct?

A. That is correct.

I have two comparisons here, one of the operating revenue estimate and the other of the balance for common estimate. If you would like, I would be glad to read off the percentage differentials on these companies.

Q. All right.

A. Taking El Paso first, and the operating revenues by years, the actual exceeded the estimate by the following percentages during those years:

4.2 percent.

Q. What year is that?

A. 1940. 1941, 10.1 percent; 1942, 4.6; 1943, 10.3; 1944, .8; 1945, 3.9.

Richard N. Benjamin—Cross Examination (Cont'd)

The balance for common, the actual exceeded the estimate by the following percentages:

1940, 17 percent; 1941, 11.4 percent; 1942, the estimate exceeded the actual by 7.4 percent; 1943, the actual exceeded the estimate 7.3 percent; 1944, 28 percent; 1945, 1.5 percent.

The Examiner: Those last two years, the actual was in excess of the estimate?

The Witness: Yes, sir, the last three years.

The Examiner: All right.

The Witness: Gulf States, taking first operating revenues, the estimate exceeded the actual by 1.6 percent in 1940. 1941, the actual exceeded the estimate by 4.5 percent; 1942, the estimate exceeded the actual by 6.1 percent; 1943, the actual exceeded the estimate by 6.3 percent; 1944, the actual exceeded the estimate 3.6 percent; 1945, the actual exceeded the estimate by 1.2 percent.

The balance for common in 1940, the estimate exceeded the actual by 10.0 percent; 1941, the estimate exceeded the actual by 30.2 percent; 1942, the estimate exceeded the actual by 2.7 percent; 1943, the actual exceeded the estimate by 4. percent; 1944, actual exceeded the estimate by 15.6 percent; 1945, the actual exceeded the estimate by 25.2 percent.

Virginia, in 1940, operating revenues, actual exceeded the estimate 3.6 percent; 1941, the actual exceeded the estimate 5.4 percent; 1942, actual exceeded estimate, 8.9 percent; 1943, actual exceeded estimate, 4.2 percent; 1944, actual exceeded estimate by 30.8 percent. I might add there that that was the year in which Virginia Public Service was merged. 1945 is not available.

By Mr. Condon:

Q. Didn't you have estimates for 1945?

A. I might explain that. We have the estimate and we have the actual operating revenues, but the accountants are still working on the income statement for 1945, so we do not have the balance for common.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Have you applied to your estimate made in January or February of 1945 your pro forma earnings figures for 1945, with the last two months estimated, and can you give us an estimate with regard to that?

A. I will be able to later in the day.

Q. Thank you.

A. The balance for common, the actual exceeded the estimate by 5.4 percent in 1940; in 1941, the estimate exceeded the actual by 20.1 percent; in 1942, the actual exceeded the estimate by 12.4 percent; 1943, the actual exceeded the estimate by 18.8 percent; 1944, which was the merger year, the actual exceeded the estimate by 24 percent. I hope to have the information on 1945 later.

By Mr. Kanton:

Q. Mr. Benjamin, after reading all those figures, I would like to go back to my original question.

Looking at these figures, what is your general observation with reference to the comparisons made as to whether such estimates have been good, excellent, or just fair?

A. I think they illustrate as to any particular year that the variations may be quite marked from the estimates.

Q. Were those variations brought about by the excess profits tax during that period?

A. In some cases they were brought about by the effect of taxes. In other cases, for instance, the $2,500,000 increase over the estimate in the operating revenues of Virginia for the year 1942 is brought about largely by uncontemplated increase in transportation revenues.

By Mr. Tucker:

Q. Due to the war?

A. Due to the war, that is correct.

By Mr. Kanton:

Q. Would you say, excluding the variable of the excess profits tax, that your estimates for the next succeeding

year were either good, excellent or fair? Did you take that into consideration, Mr. Benjamin?

A. Well, I know that the effect of the excess profits tax was to minimize any variations between the estimated net operating revenues and the actual because so much of the balance went in increased Federal income taxes.

There are uncertainties at the present time as there were uncertainties when each one of these estimates was made up, and I should say that they indicate to me that they are as good estimates as you can reasonably expect people to make.

Q. What do you mean, "as good"? Do you mean they are good, they are fair, or they are very good? Have you ever looked at other estimates made by other holding companies of their operating companies in order to know whether your estimates are better or not as good as others made?

A. No, I have not done that. I have not compared them with other utility systems' estimates.

Q. Well, then, your general observation is, I take it, that you don't know whether the predictions of the management of Engineers have been any good, is that correct?

A. All I can tell you are the results. In some years the results were very close and in other years, due to factors that were unknown at the time the estimates were made, they were fairly far off.

Q. Well, laying aside the unknown factors, which probably include for the most part the excess profits tax, would you not say that your estimates have been very good on the whole?

A. If you can except the unknown factors, yes.

Q. And excepting the unknown factors, would you say in your opinion, looking at these figures which you have just given us, and taking them for what they are, worth, that they are sound estimates made by a management doing this year in and year out, that these estimates are either,

again, good, excellent or fair? I would like your opinion on that question.

A. Well, I think they are good estimates, Mr. Kanton, if you can except the unknown factors that are not known at the time that the estimates are made, and that accounts for some of these large differentiations—factors that were not known at the time that the estimate was made. You never know when you make an estimate, of course, what those factors are. You find out during the year.

By Mr. Condon:

Q. And that works both ways, doesn't it, Mr. Benjamin?

A. Certainly.

By Mr. Kanton:

Q. Taking the El Paso operating revenue for the year 1944, when the actual exceeded the estimate by only .8 of 1 percent——

A. I think that was very good.

Q. What?

A. I think that was a very good estimate.

Q. Was there any reason why that estimate might have been very good, as compared to the estimate over the actual for Gulf on the balance for common during the year 1940? Was there, in other words, an unknown factor in the Gulf situation that you didn't contemplate, whereas in the El Paso situation in the year of 1944 which I have referred to, that didn't come about? Can you check your records for that, Mr. Benjamin?

A. In 1940, the estimate included an estimate for Federal income taxes—and this is Gulf States I am talking about—of $566,000. It developed that the actual taxes for the year were $681,000, which was a difference of $115,000. That was because of an increase in the rate of tax from 18 percent to 24 per cent.

Richard N. Benjamin—Cross Examination (Cont'd)

Now the dollar difference between the balance for the common and estimated was $226,000, of which $115,000 was due to that one factor.

Q. Outside of the Federal income taxes, excess profits taxes, et al. in this period, would you say that your estimates for operating revenues and expenses were on a conservative basis?

A. Well, based on the figures for these companies which covered a period during the war when business was increasing—and by business I mean operating revenues were increasing at a very rapid rate—the estimates were not as optimistic as the actual results showed, because business was increasing at that rate. Now when you get into other periods, when business is falling off, I don't know what the results would be; but taking this six-year period that we are discussing here, there are only two instances when the operating revenues were less than the estimate.

Q. What about the operating expenses? How did they size up?

A. Well, the only information I have here is the balance for common which is, after all charges and preferred dividends. In those cases the variations were more marked.

In the case of Gulf States, there were three years in which the balance for common was less than the actual and three years in which it was more.

In El Paso, there was one year when it was less, and in Virginia there was one year when it was less.

Q. On an over-all basis, aside from the general income taxes, just looking at the operating revenues and the operating expenses and the balance for common, and on that basis alone, would you say that the estimates made by the Engineers' management and its operating personnel were fairly reliable estimates and of a conservative nature?

A. I wouldn't like to go any further than to say that they were pretty good estimates.

Q. Would you say they were conservative?

A. Well, I——

Richard N. Benjamin—Cross Examination (Cont'd)

Q. As you just testified, have not the operating revenues exceeded your estimates for those years?

A. Yes, but as I pointed out these were years when operating revenues were increasing at a very rapid rate, and I suppose to the extent that the estimater did not get over-optimistic, they were in the middle of the road or conservative. I think they represented an attempt not to be swayed too much by over-optimism or pessimism.

Q. Well, the management had that factor in mind, that there was a war in progress and that perhaps operating revenues were going up, and instead of just jumping ahead they applied the conservative approach as borne out by the figures that you have just given for the record?

A. That is right. They estimated increases in operating revenues, which were not quite as great as the actual.

Mr. Kanton: That is all.

By Mr. Condon:

Q. Mr. Benjamin, you have before you column representations setting forth in a general way the substance of your testimony with respect to this subject-matter?

A. Yes, I have.

Q. Would you look at your six-year figures of operating revenues for El Paso and proceeding in a horizontal direction from left to right, is it not a fair statement that in each of the six years the estimates of the management as to gross revenues of El Paso were in each and every instance exceeded by the actual revenues, that the actual revenues did exceed the estimates made by the management for those six years?

A. That is right.

Q. Have you computed the degree or percentage of conservatism for the six-year period as an average?

A. No, I have not.

Q. Would you add, if you will, forgetting the fractions beyond the decimal points in each instance the 4, the 10, the 4, the 10, the 1 and the 3, and see if that does not suggest

to you on a six-year average that the management was conservative in computing the total operating revenues by something in excess of 5 percent a year?

A. That is correct.

Q. And that is disregarding the fractional additions and putting the most favorable of interpretations on the degree of conservatism possible in that respect, is that not true, Mr. Benjamin?

A. That is correct.

Q. Would you make the same calculation, if you please, with regard to the estimates vis-a-vis actual operating revenues in a horizontal way for Gulf States, and with respect to that I ask you if the estimates of the management were not on the conservative side to the extent of about 1.5 percent.

A. That is roughly 1.1 per cent.

Q. Now, assuming for the purpose of this question that your Virginia figure for 1945 as to the estimates of gross revenues or operating reveues vis-a-vis actual revenues involves no percentage variation whatever, just eliminate that from the calculation and reducing the number of years to five, is it not a fact that the management was conservative in its estimates by something approximating 10 percent on a five-year average, including in that, however, a very substantial under-estimate due in 1944 to the merger?

A. That is correct.

Q. Now, would you follow the same general method of procedure as far as El Paso is concerned, and proceeding in a horizontal way for your balance for common dividends, starting with the 17 percent excess over estimate for 1940 and continuing over to 1945, and let us have the percentage of conservatism of the management on a six-year basis?

A. It is something slightly under 10 percent.

Q. On the conservative side on a six-year average?

A. That is right.

Q. Now would you repeat the same process with respect to the balance for common as far as Gulf States is con-

cerned, as that indicates something less than one-half of one percent on the conservative side, isn't that so, Mr. Benjamin, on a six-year average?

A. On a six-year average, there is practically no difference.

Q. Well, just a shade on the conservative side, isn't that a fair statement?

A. I think that is right.

Q. Now you correct me if I am wrong. I am only doing a little mental arithmetic.

A. This is so close, I think you have to put the fractions in to be absolutely sure.

Q. Now, we are really getting down to fine points, aren't we? I have been giving you the breaks on the fractions here every time, have I not, Mr. Benjamin?

Mr. Tucker: I object.

Mr. Condon: I don't mean that in an offensive way.

Mr. Tucker: All right. I am afraid it might be misunderstood.

Mr. Condon: I have been asking him to ignore the fractions, which would only increase the degree of conservatism to the extent of the fractional additions for the number of years involved during the periods.

The Examiner: Are you moving to strike out this observation, Mr. Tucker?

Mr. Tucker: No. With that explanation, I am perfectly willing that the witness should answer it. He has already answered it in substance.

The Witness: It is about 1 percent on the conservative side.

By Mr. Condon:

Q. Would you make the same calculation, if you will, and the same basic assumption as far as Virginia is concerned, assuming that the estimate made in January or February of 1945 for the Virginia balance for common

equals the actual, and just reduce the period of years to a five-year average. That will give you something a little bit better than 6 percent on the average, on the side of conservatism, would it not?

A. I think it is near 8 per cent, Mr. Condon.

Q. I will accept your figures.

Now, let us go back. I have five items in your testimony that I think you might explain, if you will. You will note that the balance for common, actual, was 7.4 percent below estimates for the year 1942, if my rough-hewn notes are anywhere near accurate. Will you check that for the El Paso Company?

A. 7.4 percent, that is right.

Q. Could you state for the record, if there be a reason, the circumstances relating to the minus quantity there?

A. That was due primarily, I think, to an increase in tax rates which increased taxes $197,000 over the estimate.

Q. And that inaccuracy, if there be one, was due to the failure on the part of the directors, if there be a failure, in not knowing what percentage rates would be applied under the Revenue Act of 1942 by Congress to the revenues of the Company, is that right?

A. That is right.

Q. Other than that, are you conscious of any inaccuracy in the estimate with respect to the balance for common?

A. Not any other substantial item.

Q. Other than that one item, it appears that in the entire estimate of estimated operating revenues, vis a vis the actual revenues, that the balance for common, actual, versus estimated balance for common, that that was the only inaccuracy for the entire six-year period with respect to El Paso. Am I correct in that?

A. It was the only inaccuracy on the down side, Mr. Condon.

Q. Yes.

Richard N. Benjamin—Cross Examination (Cont'd)

A. But 1944, for example, showed a 28 percent increase over the estimate that was due to some non-recurring items that were not known at the time the estimate was made.

Q. I was talking on the side of conservatism, Mr. Benjamin. Am I correct in my statement?

A. You are correct as far as that goes.

Q. Would you look at the Gulf States figures. We see a minus figure for the year 1941, in other words, the operating estimates exceeded the actual by 1.6 percent, is that correct?

Mr. Kanton: Are you talking about operating revenues or balance for common?

Mr. Condon: I am talking about the operating estimates.

The Witness: 6.1 percent.

By Mr. Condon:

Q. Is that 1940, Mr. Benjamin?

A. 1942, weren't you talking about?

Q. I was talking about 1940.

A. You were right, then. I am sorry to have confused the record. It is 1.6 percent for 1940, that is right.

Q. You say that that was a pretty small over-estimate, wouldn't you?

A. I think that is a very close estimate.

Q. Considering the volume of business done by Gulf States in that year?

A. Yes.

Q. That is pretty close to a bullseye, isn't it?

A. I think so.

Q. Now will you look at the only other error, if it be one, which appears in the year 1942, wherein the management over-estimated the operating revenues by 6.1 per cent, if my figures are correct.

A. That is right.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Would you say that that was occasioned by the same circumstances, to wit, the impact of the Revenue Act of 1942?

A. No. That is the operating revenues, which is before taxes, and I have been advised that that was due to a war condition that arose at that time.

Q. What was that condition?

A. It was due to a reduction in the activities of the oil industry because of the torpedoing of tankers at that time. It was prior to the time the pipe lines had been constructed. Therefore, the operating revenues fell off, and one of the reasons they fell off was because of that.

Q. Now, with the exception of the years 1940, when there was an over-estimate of 1.6 per cent, and 1942, when there was an over-estimate of 6.1 per cent for the reasons that you have just stated, in the other four years the board was on the conservative side, as you testified; is that right?

A. That is right.

Q. Will you look at the balance for common on Gulf States and explain the reason for the over-estimate to the following extent—in 1940 of 7.9 percent; in 1941 of 30.2 percent, and in 1942 of 2.7 percent, if my figures are correct.

A. Yes. I think I already gave Mr. Kanton the information on 1940. That was the case when the Federal taxes were off by $115,000 due to an increase in tax rates. In 1941, there was an estimated Federal income tax of $907,000. and an actual of $1,625,000, or an increase of $718,000 in taxes, which is larger than this $570,000 excess of the estimate over the actual. In 1942, there was no particular explanation. That is pretty close to the estimate really.

Q. Now as to 1941, the extra $718,000 was due to an increase in tax rates, was it, enacted by an amendment to the Revenue Act of 1940 by Congress in the year 1941 made applicable to revenues for the calendar year 1941?

A. I am not clear when it was enacted, but I assume that it was enacted after the estimate was made.

Q. Is that a fair statement?

Richard N. Benjamin—Cross Examination (Cont'd)

A. Yes.

Q. Will you look, if you will, at the Virginia balance for common and there I see but one instance, to wit, 1941, where the balance for common did not exceed actually what the management estimated it should be. Would you tell us, if you know, the reason for that situation, or could you relate it taxwise to the same circumstances as I have just mentioned to you for the same year with respect to Gulf States?

A. There was $1,500,000 increase in taxes over the estimate due to this same tax law that we were just discussing.

Q. Would you say it fair then that that accounted for the bulk of this over-estimate?

A. Yes, I think so. The over-estimate was only $669,000.

Q. Is it not a fact, Mr. Benjamin, that for the last years —1943, 1944, and 1945—in no case was there any instance of over-estimate by the management?

A. That is correct.

Mr. Condon: That is all I have on that point.

The Witness: Mr. Kanton asked me to furnish him with a statement showing the percent of earnings of El Paso Electric Company available for dividends on the common stock, after taking into account the freeze, which had been paid out in dividends.

During the year 1940, 50.9 percent was paid out. During the year 1941, 63.8 percent; and for the two years cumulative, 1940 and 1941, 58.5 percent. In 1942, 73.4 percent, and for the three years cumulative, 62.9 percent.

For the year 1943, 83.7 percent; cumulative for the four years, 68.6 percent.

For the year 1944, 16.3 percent; cumulative for the five-year period, 56.7 percent.

For the year 1945, 190.4 percent; cumulative for the six-year period, 83.1 percent.

* * * * * * *

[R. p. 1034] Mr. Tucker: Of the transcript of the testimony in the case of the Western Public Service Company and

Richard N. Benjamin—Cross Examination (Cont'd)

Engineers Public Service Company, Docket No. 70-453, the hearing held in Philadelphia on March 22nd, 1942, I would like included in the matter mentioned the following:

Page 105, excluding the first ten lines;
The whole of page 106;
The whole of page 107;
The whole of page 108;
The whole of page 109;
The whole of page 110;
The whole of page 111;
The whole of page 112 excluding the last eight lines;
The first seven lines on page 113;
The whole of page 121 excluding the first five lines;
The whole of page 122;
The whole of page 123;
The whole of page 124 excluding the last 12 lines;
The whole of page 125 excluding the first 2 lines;
The whole of page 126;
The whole of page 127;
The whole of page 128;
The whole of page 129;
The whole of page 130 excluding the last 6 lines;
The last three lines on page 142;
The whole of page 143;
The first five lines on page 144;
The whole of page 151 excluding the first 8 lines;
The first 4 lines on page 152.

Mr. Condon: Mr. Tucker, could I ask that these be taken up one at a time because I think we may have to have different conditions that we would like to urge or that I would like to urge with respect to the receipt or the incorporation of some that might not apply to the others.

Mr. Tucker: By taking them up "one at a time" you mean for me to stop here so far as the transcript is concerned?

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Condon: If you have finished what you would like to incorporate by reference from the transscript, then I would like to make this statement.

Mr. Tucker: I have finished what I want from the transcript.

Mr. Condon: Well, I do not feel that it is necessary or proper that we assent to this incorporation, I do not object to it on condition that the portions of the transcript so incorporated by reference shall be deemed as evidence in this proceeding and the questions and answers as though they had been propounded to Mr. Barnes as a witness before you, Mr. Examiner, in this particular matter.

I think a different rule will have to apply to the documents that Mr. Tucker plans to offer from now on.

Mr. Tucker: If I understand what you mean by that, I accept it. You mean that you would like them incorporated just as though they had been asked questions and answered in this proceeding?

Mr. Condon: As though Mr. Barnes were asked the questions that are set forth and as though he made the answers that are referred to in his testimony in a proceeding before Mr. MacCullen.

Mr. Tucker: I accept that condition.

* * * * *

[R. p. 1054] The Examiner: On the record. I am going to overrule your motion, Mr. Kanton, and yours, Mr. Scheetz; and grant the offer as made, that the pages as enumerated by Mr. Tucker will be incorporated for all purposes and that the pages enumerated by Mr. Tucker from the oral argument and from the brief will be incorporated for the limited purposes expressed by him.

(The incorporation by reference, as above set forth, is noted.)

Mr. Scheetz: I was not aware, Mr. Examiner, that I made any motion. I simply made a comment on why I thought the evidence was relevant.

Richard N. Benjamin—Cross Examination (Cont'd)

The Examiner: I think the record will show your position, so I don't think anything further need be said.

You may proceed with your cross-examination, Mr. Condon.

(Formal caption omitted.)

By Mr. Condon:

Q. Mr. Benjamin, just before the recess you gave testimony of some financial data concerning El Paso Electric that was requested by Mr. Kanton, and you had prepared a statement of percentage of earnings of El Paso Electric available for dividends on the common after taking into account the freeze or freezes, as you testified?

A. That is right.

Q. In order to bring your testimony into focus here, where you said "paid out in dividends" in 1940, 50.9 per cent, if I understood your testimony correctly, will you assume a hypothetical figure of $100,000 of earnings of El Paso and let us assume for this calculation that $25,000 of that $100,000 represented a sum that would have to be retained because of the freeze. Does that 50.9 per cent mean that what would be available for dividends would be 50.9 per cent of $75,000?

A. 50.9 per cent would be the per cent of the $75,000 paid out in dividends.

Q. And your testimony then with respect to the several percentages in the different years in question can be applied to that example in the same way?

A. That is correct.

Q. Now you said this morning that you were going to secure a comparison of the estimate of the Engineers board of gross earnings and balance for common, testimony with respect to which you gave concerning Virginia with the exception of the year 1945 compared with actual figures for 1945, with the last two months thereof estimated.

Richard N. Benjamin—Cross Examination (Cont'd)

Would you now state, if you have those figures, what the percentage variation was in the Virginia figures, estimated operating revenues, with the actual?

A. I have obtained from the Virginia Electric directors' report the estimate that was made for 1945 earnings. The operating revenues estimated were $40,830,000. Comparing that with the figure shown in Applicant's Exhibit 67, I find the figure of $40,425,000 for the 12 months 1945, with the last two months estimated. That is a difference of $405,000 excess of the estimate over the actual.

The balance for common stock was estimated in the last year of $5,167,100. This compares with a figure of $4,023,000 in Applicant's Exhibit No. 67. In order to make the two figures comparable, there should be added to that latter figure $1,170,000, which is the tax reduction due to special amortization during 1945, which was not included in the estimated figure; so that the difference between the two figures on comparable bases is only $26,000.

The estimate does include the $1,170,000, but the actual does not. In order to make the two figures comparable we should make that adjustment and find a difference of $26,000, which is an excess of the actual over the estimate.

Q. In other words, looking at the balance for common, the directors again erred, if at all, on the conservative side by $26,000?

A. That is right.

Q. In other words, there was $26,000 more actually available on the balance for common than they estimated?

A. That is right.

Q. And on an estimate of $5,167,000, what percentage margin of error in that calculation is involved?

A. One-half of one per cent.

Q. Looking at your operating figures, am I correct in saying that the margin of inaccuracy there was slightly under one per cent?

A. Approximately, right.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Would you say that it was possible for human beings engaged in matters of this magnitude to come much closer in their prognostications, Mr. Benjamin?

A. I certainly wouldn't expect them to.

By Mr. Kanton:

Q. Mr. Benjamin, you gave us the percentage of earnings available for dividends for El Paso from 1940 to 1945 and the average paid out after the freeze for this six-year period came out to 83.1 per cent. Is that correct?

A. That is correct.

Q. Now if we look at Applicant's Exhibit No. 63, page 4 thereof, we find under the statement marked "Income, dividends from El Paso", for the year 1946, an estimated figure of $375,000.

Could you tell me approximately what percentage of earnings will be available for dividends based on your estimates for El Paso for 1946?

(No response.)

Q. Mr. Benjamin, you realize that my question is that I want that percentage figure over and above the freeze?

A. That is right. I was trying to determine what the freeze would be in 1946.

The balance shown on page 5 of Applicant's Exhibit 63 for El Paso available for the common stock is $633,400, against which there would be a freeze of $140,000; so that there would be a balance over and above the freeze of $493,000, so $375,000 would be approximately 76 per cent.

Q. That is approximately what Engineers has been taking up from Virginia and Gulf States and will be approximately what they expect to take up next year, is that correct, Mr. Benjamin, percentagewise?

A. I think in that general neighborhood.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. Mr. Benjamin, do you recall some colloquy either on or off the record between yourself, Mr. Barnes, and myself concerning the questions which I asked you with respect to testimony given by Mr. Barnes concerning some financial compilations and the data prepared by the management and submitted by the management to the board of directors of Engineers in or about the latter part of May, 1945, at a meeting of the board?

A. I do.

Q. Do you recall Mr. Barnes stating either on or off the record that it was his impression that there were four sheets which had been prepared and submitted to the board?

A. I do, yes.

Q. I now hand you four sheets, the first one being dated 5/24/45 in pencil, with the date 5/23/45 in type, the 23 being stricken, the first one being captioned "Plan of liquidation, Engineers Public Service Company;" the second sheet being captioned "Engineers Public Service Company and subsidiary companies development plan;" the third sheet bearing the same caption and the fourth sheet likewise bearing the same caption. I ask you if, to the best of your knowledge, information and belief those are the four sheets to which reference was made?

A. Yes, I think they were.

Mr. Condon: May I ask that these four sheets be marked as a single exhibit, Preferred Stockholders' Exhibit 18 for identification?

The Examiner: Let the document be so marked for identification.

(Preferred Stockholders' Exhibit 18 was marked for identification.)

By Mr. Condon:

Q. Mr. Benjamin, will you state briefly for the record who prepared Preferred Stockholders' Exhibit 18 for identification and the circumstances of the preparation?

Richard N. Benjamin—Cross Examination (Cont'd)

A. I think Mr. Barnes prepared these statements or that they were prepared at his request.

Q. From the records of the company in so far as they refer to figures and data?

A. Oh, I assume so.

Q. And they were submitted to the board?

A. To the best of my recollection they were, Mr. Condon.

Q. Was there any discussion with respect to those that comes to your mind?

A. No, I don't recall any discussion on them. To the best of my recollection Mr. Barnes explained them, but I don't know about discussion.

Q. You have no reason to doubt the accuracy of the figures, the calculations, set forth in those memoranda?

A. No.

Q. Now you were referring to certain estimates of independent analysts concerning asset value of one or more of the operating companies of the Engineers system. Do you recall that?

A. Yes, I do.

Q. You had a black book that you were kind enough to let me have and examine, and it contained a number of such estimates?

A. Yes.

Q. I draw your attention specifically to the fourth sheet of this Exhibit 18 for identification, wherein are set forth references to Carl M. Loeb, Rhoades & Company, Ira Haupt & Company, and Bear, Stearns & Company; and ask you if those are three of the estimates of independent analysts which you made reference to?

A. Yes, those were three of the estimates. I am not sure that all of them are in this black book, but those are certainly three of the estimates that were looked at.

Q. Thank you. Mr. Benjamin, did the Engineers Public Service Company ever have an appraisal made of the Vir-

ginia Company, an engineering appraisal, and, if so, will you state when?

A. I believe there was an appraisal made many years ago, Mr. Condon, and the only recent one I know about is the one made for the properties of the Virginia Public Service Company, of which I furnished you a copy.

Q. And that is the appraisal of Slaughter, Seville & Blackburn on a portion of the Virginia Public Service property that has been marked for identification?

A. That is right.

Q. Was there any other appraisal that you know of except this old appraisal?

A. Of the Virginia Electric property itself?

Q. Yes.

A. There was one other of the Virginia Public Service. Stone & Webster Engineering made one at approximately the same time that Slaughter, Seville & Blackburn made their first appraisal.

Q. Can you fix the time approximately on that, roughly?

A. Well, roughly, I think it was within the last five years. Reference to the Slaughter report, I think, would show the date.

Q. Was it more or less contemporaneous with the Slaughter report?

A. I think it was, and I think the results were approximately the same, in other words, the values.

Q. They reached about the same conclusions?

A. I think that is right.

Q. Was there an old appraisal on the Virginia Electric & Power Company?

A. Virginia Electric & Power?

Q. Yes, prior to the Slaughter appraisal.

A. There was an old one, I think.

Q. Could you fix the date of that?

A. I think it was in the neighborhood of around 1925 or somewhere around there.

Q. Quite a long time ago?

A. Yes, sir.

Q. Was that at or about the time of the incorporation of the Engineers Company?

A. Engineers was incorporated about that time, yes, sir.

Q. Who made that appraisal, if you recall? Was that a Stone & Webster appraisal also?

A. I think the appraisal was made by this Blackburn firm at that time, but the information concerning that is contained in the prospectus of the Virginia Company issued in connection with the merger.

Q. Do I understand that that early appraisal was brought down to date by additions to property and plant account and subtraction from depreciation, amortization, retirement, etc., and it was brought down pretty much to 1944?

A. I think that that was done in that same prospectus to which I referred.

Q. And those proceedings were before this Commission, were they?

A. Oh, yes.

Q. Mr. Benjamin, have you ever had in the Engineers System while you have been connected with it, with respect to the Virginia, the Gulf and the El Paso properties, any rate proceeding initiated by a regulatory body?

A. Not to the best of my knowledge.

Q. In your annual statements which are in evidence in this proceeding, reference from time to time has been made to the matter of rate adjustments. Would you state for the record in a general way just how these rate matters have been handled by the Engineers management in the absence of any such proceedings initiated by regulatory bodies?

A. The customary practice of the Engineers subsidiaries to the best of my knowledge has been to confer with the State authorities and work out on a voluntary basis

rate reductions when conditions permit such reductions; and the companies have followed a policy of making such reductions at intervals from time to time.

Q. In more or less round table discussions?

A. I think that is the way it is usually handled, Mr. Condon.

Q. Have you participated in those?

A. No, I have not.

Q. Mr. Benjamin, I hand you your Exhibit No. 29 and I ask you to state briefly just how you prepared that exhibit, which is captioned "Engineers Public Service Company, Incorporated, average market price of preferred stocks based on total transactions on the New York Stock Exchange." Do you have a copy of that before you?

A. Yes, I do. The way this exhibit was prepared was to take, for example, for the purpose of illustration, the $5 stock for the year 1928. There were 41,000 shares of that stock sold on the New York Stock Exchange.

Q. In what year?

A. 1928. We took the average monthly low of that stock, took the monthly low for each month during the year and averaged it, and in that case obtained a figure of 93.45 as the average monthly low. We did the same thing with the high and got a figure of 98.30, and then averaged those two figures. We multiplied that by the number of shares sold and obtained a yearly average sale of $3,930,875. We did the same thing for each year through the first half of 1938. That was labeled the conversion period.

During that period 341,900 shares were sold, and the yearly average sales totaled $20,835,626, which gave an average figure for the period of $60.94.

We did the same thing for the so-called post-conversion period and obtained an average of $80.30.

By Mr. Kanton:

Q. The past conversion period covers what?

Richard N. Benjamin—Cross Examination (Cont'd).

A. Beginning July 1, 1938, through the first ten months of 1945. During that period we arrived at the figure of $80.30 and the average for the entire period was $67.16.

We did the same thing for the other two periods.

By Mr. Condon:

Q. What was the purpose of your preparing this memorandum in this exhibit, Mr. Benjamin?

A. The only purpose that I know of for which this exhibit was prepared was to show what on the average the stock had been traded at, at what prices, during the period during which it was outstanding.

Q. If I recall your testimony, this was not one of the comparatively few exhibits of yours that was before the board of directors of Engineers at the time that they adopted the Plan?

Mr. Tucker: I object to the characterization. I think that is a question for argument.

The Examiner: I will sustain the objection.

Mr. Tucker: I don't object to your saying that it was not one of those that was before the board, but this characterization is unfair.

Mr. Condon: Do you feel that the characterization in this instance is unfair, Mr. Tucker?

Mr. Tucker: I think it is purely a question of argument and I think those things ought to be said on argument and not asked of the witness.

Mr. Condon: I will amend my question by the elimination of the two words "comparatively few".

By Mr. Condon:

Q. I ask you the same question and ask you for your answer, Mr. Benjamin.

A. No, this was not presented to the board prior to September 5, 1945.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Do you really believe that this presents a fair picture to the Commission with respect to the preferred stock?

A. Well, I certainly wouldn't want to put in an exhibit, Mr. Condon, that didn't present a fair picture. I think this presents a fair picture of what happened in these securities over the period, and that is the only purpose I had of putting it in.

Q. You reached back into the past, back into 1928, and brought it down over this period, carried it through the depression, the impact of the Holding Company Act so-called, and you feel that this exhibit has connotations from which this Commission can draw certain conclusions as to what subject?

A. I think it illustrates somewhat the same thing as the charts that show the course of the preferred stock in the market over this period. This gives an average price at which the securities were traded and it may be of interest to the Commission.

Q. What does it add to your graphs?

A. I think the only thing it adds is to show the average over the period, Mr. Condon.

Q. Mr. Benjamin, I hand you Applicant's Exhibit 45, or if you have it before you, will you please examine it?

A. I do have it.

Q. It is captioned "Engineers Public Service Company, common stock balances as of June 30, 1945." It is my understanding that that represents common stock standing in the name of brokers or brokerage firms as of that date. Is that correct?

A. That is right.

Q. Can you tell us whether or not you have put on your list of 50 largest common stockholders the brokerage houses whose names appear on Applicant's Exhibit 45 in the amounts or the number of shares set forth as being in the name of those brokerage firms or financial houses as set forth in Exhibit 45?

A. When you speak of the 50 largest holders, you are referring to Applicant's Exhibit 44?

Q. Yes.

A. There was no attempt to eliminate from the 50 largest holders any brokers' names, so that this list of 50 largest holders does include brokers who held stock of record.

Q. Was there any attempt made to ascertain from those brokers or financial houses listed on Exhibit 45 as to the actual holders of those stocks?

A. No.

Q. No beneficial owners?

A. No, we have not.

Q. Mr. Benjamin, I hand you a photostatic copy of a document bearing the following capition: "Engineers Public Service Company certificate of amendment of certificate of incorporation, proof of February 13, 1945," the original of which I think you supplied me with at my request; and I ask if you will state the circumstances of the preparation of that proposed amendment to your charter, if you know them?

A. At a meeting of the directors of Engineers held February 2nd, 1945, the directors authorized, subject to the sale of Savannah securities, the use of $7,849,000 of cash to make a payment in partial liquidation of $20 per share on all of the shares of preferred stock of this company, and it was the purpose of the preparation of this certificate of amendment to carry out that plan.

Later on, in fact later that same month, the directors authorized the officers to retire shares rather than to follow this procedure of paydown.

Q. Would you be kind enough to tell me, Mr. Benjamin, at that meeting on February 2, 1945, just what plan the directors decided upon in greater detail than a partial liquidation of $20 per share? How was that to be carried out? Tell us what you recall about it, and I wish you would

refer to the minutes of that meeting if you need to refresh your recollection.

A. I don't have the minutes before me, but I have a note here as to the action taken at that meeting. The proposal was to make a payment in partial liquidation of $20 per share for all of the shares of the preferred stock, with a 20 per cent reduction in the dividend rate and a $20 reduction in the redemption price and liquidating value of each of the shares.

Q. And this document to which I have just referred you was an amendment to your certificate of incorporation in line with that general purpose?

A. Yes, I think it was.

The Examiner: Mr. Condon, you referred to an amendment to the certificate of incorporation. I am assuming that you mean a proposed amendment?

Mr. Condon: That is what I referred to.

The Examiner: It was not actually an amendment?

Mr. Condon: No, sir. I had identified this as a certificate of amendment, proof of February 13, 1945. I did not intend to suggest that the amendment had been carried through. I thought Mr. Benjamin understood that.

By Mr. Condon:

Q. Did you not, Mr. Benjamin?

A. Yes.

The Examiner: I wanted the record to show that it was a proposed amendment and not an actual amendment.

Let us take a short recess.

(A short recess was had.)

The Examiner: All right, Mr. Condon.

By Mr. Condon:

Q. Mr. Benjamin, who drew this proposed certificate of amendment?

Richard N. Benjamin—Cross Examination (Cont'd)

A. Mr. Tucker.

Q. Are you aware of the fact that at various places at points in this amended certificate of Engineers that new insertions and new paragraphs appear that are quite different in form as well as in substance from those presently contained in the actual certificate of incorporation of Engineers?

A. Yes, the provisions are different.

Q. Will you be kind enough to look at page 12 of your draft, and more particularly a new paragraph, Roman numeral VII, captioned "Return of preferred stock capital." Do you have that before you?

A. Yes.

Q. When did Mr. Tucker prepare this proposed certificate of amendment to the charter of Engineers? At or about the date it purports to bear, about February 13, 1945?

(No response.)

Q. I draw your attention to the statement at the top, which says "Proof of February 13, 1945."

Mr. Tucker: Mr. Examiner, I am the last person in the world to try to restrict anybody on cross-examination so long as I think it is within the bounds of reason, but this cross-examination relates to a subject that I think the witness will say never reached the point even of specific consideration of an actual plan to go to the board of directors.

From what has been said on the record it seems to me that it is perfectly clear that on the issues of this case as to whether or not this Part 1 or Part 2, whatever you please, is a fair and equitable plan, it has no bearing on the subject. I think it is just a waste of valuable time, and I object to the whole line of testimony.

The Examiner: What is the purpose of the questions, Mr. Condon?

Mr. Condon: Mr. Examiner, the testimony is clear that on February 2, 1945, the directors of Engineers adopted a resolution to use nearly $8,000,000 in cash to make a partial

payment in liquidation of $20 a share for the Engineers' preferred stock. That was adopted and approved by the board of directors. As part of the action generated by that resolution was prepared this draft of an amended certificate of incorporation, and I am going to show with respect to this particular paragraph that somebody must have felt that when the stockholders acquired their preferred stock they didn't bargain in the light of the Public Utility Holding Company Act of 1935 at all, because this new section or Article VII on page 12 specifically refers to an entirely different method of treatment, as I would like to show by reading paragraph VII.

It is captioned "Return of preferred stock capital."

The Examiner: Let me ask you this, Mr. Condon, before you go any further.

Mr. Condon: Yes.

The Examiner: Was this proposed amendment ever offered to the board or considered by the board?

Mr. Condon: Well, it clearly appears that the board started on a course of action here, and I want to show that this document anticipates the payment of $20 a share and the reduction——

Mr. Tucker: (interposing) Excuse me. Could I interrupt just a moment? I object to this going on the record.

Mr. Condon: Mr. Tucker made a statement, and I am answering his statement as to why it is relevant and material and perfectly proper cross-examination.

The Examiner: I am asking you if this proposed amendment was ever submitted to or considered by the board. Can you answer that?

Mr. Condon: I don't know that yet, Mr. Examiner. I asked Mr. Benjamin to supply me with matters relating to former plans, minutes of the board of directors, and other things; and I came across this resolution of February 2, 1945, to which he has testified, whereby the board decided to initiate the action to use $8,000,000 in cash to make a partial payment in liquidation of $20 a share.

Richard N. Benjamin—Cross Examination (Cont'd)

Now I want to show that pursuant to that resolution there was prepared an amendment to the charter which clearly shows that at that time, in February, 1945, it was not understood that the stockholders had contracted with the idea of the Public Utility Holding Company Act in mind, but a whole new section was incorporated in this amendment which was designed to permit the board to do exactly what it did on the 5th of September, 1945, by changes in the charter.

The Examiner: That was something that Mr. Tucker himself might have had in mind or might have given consideration to or might have thought of at that time, but does that bind the company that he did that in his office? I can't see that it does.

Mr. Condon: You have had a statement here by Mr. Tucker today that when they choose him as counsel they are bound by what he does.

The Examiner: Now wait a minute.

Mr. Tucker: I object to that statement with regard to me. I never made such a statement and I never would make such a statement.

Mr. Condon: Mr. Tucker, did you say—

The Examiner: One minute. I think the record is perfectly clear on that. The record is perfectly clear to me and I think it is perfectly clear to the Commission that when Mr. Tucker gets on his feet here and says that as counsel, "I bind the company to do so and so", that is one thing; but when Mr. Tucker does something in his office entirely separate and apart from a hearing or entirely separate and apart from a board meeting, I think it is an entirely different situation.

Mr. Condon: Mr. Examiner, I feel that where the testimony shows that the board acted and directed that certain procedure be followed, that steps pursuant to the resolution of the board are perfectly proper whether they are done and executed by counsel for the company. This is an important change in this charter because it envisions exactly

what is going to happen here if the Commission approves this Plan, to wit, that when the preferred stockholder gets $100 at the liquidation preference, all these other things go out, and that by amending the charter in that respect and inserting a new paragraph, we have a right to show and to argue therefrom that there was nothing whatever in the minds of the stockholders originally when they contracted with the Company with respect to the liquidating preference with regard to the holding company at all.

The Examiner: All right, Mr. Kanton.

Mr. Kanton: I would just like to ask a question of Mr. Tucker that would perhaps clear up this whole matter. I am not going into the merits of what you and Mr. Condon were arguing, but, Mr. Tucker, I would like to know if, under Delaware law, a charter amendment of the type under question now could be accomplished unless it was approved by a majority of the preferred stockholders as well as a majority of the common stockholders.

Mr. Tucker: I think so. I think it could be arrived at or accomplished by a Section 11 proceeding before this Commission, under which the Federal power would override the State law.

Mr. Kanton: You mean as part of a Section 11 proceeding?

Mr. Tucker: As part of a Section 11(e) plan, as something that we would submit voluntarily and hope to get the stockholders to approve, both common and preferred, a majority of them. I don't think it was within the bounds of reason——

Mr. Kanton: Off the record a minute, please.

(Discussion off the record.)

Mr. Tucker: With respect to this particular proposed amendment that I am objecting to evidence with respect to on the ground that it has no bearing on these issues, the board of directors did pass that resolution. I was consulted about it, to the best of my recollection, after the resolution was adopted, but I won't bind myself as to that.

In any event, I endeavored to sit down and in a charter amendment which could be incorporated as an exhibit to a Section 11(e) plan, if one was ever drafted for the purpose, what the thing would look like.

If it is not in the record, it can be very easily put in the record that we never did get to drafting an 11(e) plan with respect to that particular document. That particular document never came to the attention of the board of directors. Soon after that document was prepared we prepared another amendment—maybe you have not got that; I don't know. Maybe it didn't get to proof form, but we were working on preliminary things to see if we could arrive at something that would work this thing out.

What bearing, I repeat, has that kind of an intermediate thing that never did get to the board of directors for approval? What bearing does that kind of thing that never was made the subject of an application down here have on the fairness and equitableness of this plan?

I still urge my objection.

Mr. Condon: Mr. Examiner, we have in evidence Mr. Tucker's opinion, Applicant's Exhibit 38, upon which the board acted. Here is a document drawn by Mr. Tucker from which it can be fairly argued that he recognized the necessity for a charter amendment under the facts as here presented to this Commission before this Company could pay $100 and no more to the preferred stock. I wish to argue that when a corporation drafts a certificate of incorporation and thereafter amends or purports to amend the certificate in a certain way, it places a construction on its own organic law which has evidentiary value for this Commission in these proceedings, and this is a recognition by Mr. Tucker that the charter as presently constituted and in effect and in evidence in this proceeding is wholly inadequate and was never calculated to cover the kind of a situation presented to this Commission or this amendment under the new section would not have been required at all.

Richard N. Benjamin—Cross-Examination (Cont'd)

I feel that we should be permitted to develop that through this witness with respect to this particular paragraph because of its importance.

The Examiner: In view of the fact that this proposed amendment was never submitted to the board, I cannot see that it is official in any sense of the word and I cannot see that it has any bearing at all on the fairness and equitableness of the present plan. I therefore sustain Mr. Tucker's objection.

Mr. Condon: I respectfully except.

The Examiner: I will grant you an exception.

Mr. Condon: I would like to have this document which I have identified marked for identification as Preferred Stockholders' Exhibit No. 19 for identification, exclusive of the pencil notations which are counsel's.

The Examiner: Let it be so marked.

(Preferred Stockholders' Exhibit 19 was marked for identification.)

Mr. Condon: I respectfully except to the Examiner's ruling, and at this time I would like to make an offer of proof on the record with respect to paragraph VII appearing on page 12, page 13, and the first 2 lines on page 14. In lieu of my reading that new article into the record, I ask leave for the stenographer to copy it physically into the record as part of my formal offer of proof.

The Examiner: If there is no objection to that, it will be done.

Mr. Tucker: I don't think so, but just let me see. I am preparing amendments, preparing plans——

I haven't any objection that it be incorporated in the record as part of Mr. Condon's offer of proof.

(The Paragraph VII referred to is as follows:)

"VII. Return of Preferred Stock Capital. This Corporation may at its option, as expressed by resolution of its Board of Directors, at any time or from time to time,

pay to the holders of the shares of all series of the preferred stock, without distinction between series, out of net earnings or earned surplus of this Corporation or from surplus created by a reduction in capital of this Corporation or otherwise, amounts in partial liquidation of, and as a return of capital represented by, the preferred stock, to an aggregate amount not exceeding any cash from time to time available to the Corporation which in the opinion of the Board of Directors cannot, because of the provisions contained in the Public Utility Holding Company Act of 1935, be advantageously used in the business of this Corporation. If and when such payments to the holders of the preferred stock shall aggregate $100 a share, such payment shall be deemed to be in complete liquidation and discharge of the preferred stock, and upon the making of the final payment in the manner hereinafter provided and provision for any dividends accrued and in arrears upon such preferred stock, all rights of the holders of the shares of preferred stock as stockholders of this Corporation shall cease and determine; and this Corporation shall, as a condition to the right of the holders of any shares of preferred stock to receive any such final payment, require the surrender for cancellation of the certificate representing such shares. The term "unreturned capital" in respect of any shares of preferred stock, as used in this Article Fourth, shall be deemed to be the sum of $100 per share, less the amount of any payment or the aggregate of any payments made in respect of such share as in this Paragraph VII provided for. Notice of any such proposed payment in respect of the preferred stock shall be given by this Corporation by mailing (to the extent permitted by law), a copy of such notice at least thirty days prior to the date fixed for such payment to the holders of record of shares of preferred stock at their addresses, respectively, appearing on the books of this corporation. On or prior to any date fixed for such payment, this Corporation shall deposit in trust with a solvent bank or trust company doing busi-

ness in the Borough of Manhattan, City and State of New York or the City of Boston, Commonwealth of Massachusetts, funds sufficient for such payment, and from and after the date fixed for such payment, such deposit having been made by this Corporation, the amount of any such payment shall be deemed to have been made to the holders of the preferred stock and the unreturned capital represented by each share of such preferred stock reduced accordingly. This Corporation shall not, however, have the right to make any payment in partial liquidation of the preferred stock pursuant to this Paragraph VII unless full cumulative dividends on the preferred stock accrued or in arrears to the date fixed for such payment shall have been paid or declared and set apart for payment.

"This Corporation shall require as a condition precedent to the receipt by the holder of any share of preferred stock of any payment in partial liquidation thereof and return of capital thereon, pursuant to this Paragraph VII, the surrender of the certificate representing such share in exchange for a new certificate reflecting such payment and indicating the amount of unreturned capital in respect of such share and the amount per annum of the preferential dividend upon such share after giving effect to such payment, and other changes resulting from such payment, as contemplated by this Paragraph VII; and this Corporation may withhold the payment of further dividends on such shares pending such exchange."

By Mr. Condon:

Q. Now, Mr. Benjamin, is it your impression that that document was never submitted to any of the directors of Engineers Public Service?

A. Other than any of the directors who happened also to be in the offices of the company, some of them may have seen that.

Q. Is it your impression that that was never submitted to Mr. Streeter?

Richard N. Benjamin—Cross Examination (Cont'd)

A. I don't recall that it was.

Q. Is that your best recollection?

A. That is my best recollection.

Q. What about Mr. Kellogg?

A. I don't believe he ever saw it, to my knowledge anyway.

Q. Are you aware of the fact that from the minutes of the Engineers board after February 2nd there was nothing whatever said about any rescinding of that resolution to which you have just made reference to use the $7,849,000 plus or minus to make a payment in partial liquidation on the preferred stock?

A. Well, it is my understanding that the resolution adopted at the February 27 meeting, 1945, superseded the February 2nd resolution and it is possible that that February 2nd resolution was never formally rescinded, but it was my understanding that that was the purpose of the directors in voting this resolution on February 27.

Q. Was the resolution on February 2 about this $7,800,000 ever rescinded formally or informally on your records, Mr. Benjamin?

Mr. Tucker: I object. That calls for a legal question purely and simply. It is whether it is a revocation by implication, a repeal by implication.

Mr. Condon: I am asking the Secretary of the Company, Mr. Tucker, to point it out in the records.

Mr. Tucker: You were asking him for a legal conclusion. If you would like to read the question back, I will see whether that isn't true.

By Mr. Condon:

Q. Will you restrict your answer to what the records show, Mr. Benjamin?

Mr. Tucker: Then I withdraw my objection under those condition.

The Examiner: Read the question back.

Richard N. Benjamin—Cross Examination (Cont'd)

(The reporter read as follows:)

"Q. Was the resolution on February 2 about this $7,800,000 ever rescinded formally or informally on your records, Mr. Benjamin?"

Mr. Tucker: You are confining yourself to what the records show and not drawing a conclusion as to whether it was rescinded or wasn't, Mr. Benjamin? I don't know that the witness knows about the legal effect of a revocation by implication, and I think that is involved.

By Mr. Condon:

Q. Is there anything on the records, Mr. Benjamin, that you have before you or know about that refers to the rescission of that resolution?

A. In so many words?

The Examiner: Well, expressly.

The Witness: Expressly?

The Examiner: Was it expressly revoked?

The Witness: I don't have the minutes of that meeting before me, but I do have a summary of the minutes of that meeting, and the summary makes no reference to a vote which, by its words, states that the previous resolution to which you referred was rescinded.

* * * * *

[R. p. 1086] By Mr. Condon:

Q. Mr. Benjamin, you have given some testimony with respect to the matter of a pension plan in so far as appertaining and relating to the Virginia Company and provision made for faithful retainers of the transportation company.

You stated that the Treasury Department had disallowed the deduction during the calendar year 1945, and stated that it had to be pro rated over a ten year period, if my memory is correct. Is that so?

A. That is right, they said that you couldn't deduct it all in the year 1945, but only a tenth of it.

Q. Yes, and I asked you whether or not that suggested to you that the total over-all single premium cost of $1,342,000 was to be divided by ten or whether there would be any less figure on a pro rated ten-year basis. You promised to get us the data with respect to it. If you have done so, will you state the fact for the record?

A. Yes, I will be glad to.

The bid of the insurance company for this amount of insurance was $958,469. The difference between that figure and the $1,342,000 was the amount in cash proposed to be paid to these employees to reimburse them for their own income tax liability.

I made a further check to see about how much this would cost annually—it is pretty difficult to figure because during the early part of the period all these people would not be on the pension roll, but the maximum amount in any one year, in other words, if all of these employees went all at once, it is estimated that it would cost $85,978 a year. The best estimate is that that would be the maximum and that this payment would run off in about twenty years, of course, reducing in the latter years as the pensioners died.

Q. Yes, what proportion of the annual charges would be really tax dollars, Mr. Benjamin, based upon the rates of 1946 as you estimate them to apply?

A. Well, the 38 percent rate would apply to this $85,000 payment, so that would give a tax credit of approximately $32,000 which would make the net cost of this maximum figure somewhere in the neighborhood of $50,000.

Q. Have you reflected that cost in your estimate for 1946 on Exhibit 63?

A. I don't know whether it is in there or not. I doubt very much whether that expense is in there, because this matter just came up. We just received a ruling quite recently.

Q. In all events, the amount involved would not substantially affect the result?

A. No, it is small.

Richard N. Benjamin—Cross Examination (Cont'd)

(Discussion off the record.)

Mr. Condon: Mr. Examiner, at this time I would like to offer in evidence Preferred Stockholders' Exhibit 12 for identification, as Preferred Stockholders' Exhibit 12, for the limited purpose of showing the attitude and ideas of Mr. Kellogg as expressed in his letter to Mr. Barnes on July 27th, 1945, and not as proof of any of the facts set forth or contained therein, or not in support of the conclusions which he asserts.

For that limited purpose, I would like to have that document in evidence.

The Examiner: No objection?

Mr. Tucker: No objection on that condition.

The Examiner: Frankly, the Trial Examiner has some doubt as to the materiality of Exhibits 12 and 14, but 14 is already in and there is no objection to 12. There has been no objection raised to this, therefore I will admit it; but I do want the record to show that I have some doubt as to the materiality of it.

Preferred Stockholders' Exhibit 12 will be received in the record.

(Preferred Stockholders' Exhibit No. 12 is received in evidence.)

Mr. Condon: Now, as part of the same transaction and again for the limited and restricted purpose, i. e. not as proof of any of the facts contained therein or not being bound by any of the conclusions set forth therein, but merely to show the attitude of Mr. Barnes, I would like to offer as Preferred Stockholders' Exhibit No. 12-A the reply of Mr. Barnes to Mr. Kellogg, dated July 31, 1945.

Mr. Kanton: May I make this suggestion, Mr. Condon? Wouldn't it be advisable to present these two documents to the witness Benjamin in order for him to determine whether they are true and exact copies of the originals?

Mr. Condon: He gave them to me as such.

The Examiner: There is no proof of record that that is so, other than as to 12. I think he did identify that.

By Mr. Condon:

Q. Mr. Benjamin, you have heard the colloquy of counsel. Isn't it a fact that you did send these documents to me as far as you recall and that they represent true and correct copies of the originals, to the best of your knowledge, information and belief?

A. Yes, sir.

The Examiner: No objection?

(No response.)

The Examiner: The Trial Examiner makes the same comment with respect to 12-A that he did to 12 and 14.

However, there is no objection, so it will be received in the record as Preferred Stockholders' Exhibit 12-A.

(Preferred Stockholders' Exhibit No. 12-A is received in evidence.)

Mr. Tucker: I may want to supplement both of those things by Mr. Barnes, but maybe that isn't material at this time.

By Mr. Condon:

Q. Mr. Benjamin, I think it is a fair statement, is it not, that the Board of Directors of Engineers were quite conscious as to the existence of this problem as to how much the preferred stockholders were to get?

A. Yes.

Q. As a matter of fact, that was the one item in the Plan that occasioned the most discussion and concern?

A. I think that is right.

Q. Did the Board understand that that problem would involve questions both of fact and of law?

A. (No answer.)

Richard N. Benjamin—Cross Examination (Cont'd)

Q. As far as you know?

Mr. Tucker: Oh, I object I object. That is a legal conclusion directed to the mind of a layman.

Mr. Condon: I think that this witness can state what he heard at the directors' meetings, if he did.

Mr. Tucker: Why don't you ask him that, then, what he heard that had a bearing on that subject?

The Examiner: I will sustain the objection to the question as it is now.

By Mr. Condon:

Q. Mr. Benjamin, did you hear any conversations at directors' meetings which suggested that there would be problems of fact involved in the determination of the rights of the preferred stockholders here?

A. Well, I heard many discussions, Mr. Condon. I can't state whether they were expressed in those terms. I don't recall anybody saying that there were questions of fact involved, although I know that the directors did discuss many facts in connection with their consideration of the problem, such as the ones that we have talked about during this hearing.

Q. Do you recall any discussions by the directors as to what would have to be shown by the preferred stockholders to entitle them to more than $100, if anything?

A. What type of proof would have to be put in by the preferred stockholders?

Q. Yes.

A. Well, I recall Mr. Streeter's comments and remarks as to what his opinion was concerning the rights of the preferred stockholders, that this was not a liquidation and things of that sort, and I assumed from that that the directors understood that that might be one type of proof that the preferred stockholders would attempt to make at the hearing.

Q. Did the majority of the Board go into that at all? And see what proof was available to support such a contention?

Richard N. Benjamin—Cross Examination (Cont'd)

The Examiner: Before you answer that, in your previous answer you said you heard Mr. Streeter make some comments to this not being a liquidation. Did you mean that, or not an involuntary liquidation or a voluntary liquidation?

The Witness: No. I have heard Mr. Streeter say that he didn't consider this a liquidation at all.

The Examiner: All right. You may answer the question.

Will you read the question.

(The question was read.)

The Witness: The majority of the Board heard Mr. Streeter's comments and some of them expressed themselves as being in disagreement with that position, but I don't know that any discussion took place as to the type of proof that would be introduced.

By Mr. Condon:

Q. Now, the majority of the Board knew that the amount involved was something in excess of $3,000,000, did it not, so far as you know?

A. I think they did.

Q. And they knew that the problem was a difficult one?

A. I think they did.

Q. Did the majority of the Board recognize its importance to the preferred stockholders?

A. Yes, I think they did.

Q. Did the majority of the Board have in mind that step 1 of the Plan contemplated a cutting off of dividends during the litigation period if the Plan were approved in that form by the Commission?

A. When you speak of the "litigation" do you mean litigation of Part 1 of the Plan or litigation of Part 2?

Q. Both.

A. I think they realized that the preferred stock would receive $100 per share and would receive no further divi-

Richard N. Benjamin—Cross Examination (Cont'd)

dends if Part 1 of the Plan were approved separately from Part 2, and that Part 2 at the same time might be litigated. That was clear, I think.

Q. Did the Board discuss the possibility that the preferred stockholders would need an expert to show the going concern value or the fair value of this preferred stock, the going concern value ex—the provisions of the Public Utility Holding Company Act of 1935?

A. I don't recall that there was any discussion of that point. The only comment I recall that Mr. Streeter made in that connection was that he didn't think that there would be much proof needed at the hearing, that it was a matter for the Commission. I believe he said he thought it was a matter of law. That is the best of my recollection.

Q. You are not suggesting that Mr. Streeter said that he thought the preferred stockholders shouldn't be protected by the Commission?

A. No, no, not at all. I was just talking about the only reference that I recall as to the type of evidence that the preferred stockholders might need at the hearing.

Q. Isn't it the fact that he had the impression in the summer of 1945 or the early Fall that it was essentially a matter of legal argument and nothing else?

A. I think he felt that way about it.

Q. And the other directors shared his view, is that right?

A. Well, I am getting a little confused here as to just what you are directing your question to. If you are talking about the proof at the hearing, that is one thing; but I think the directors of the Company felt that the plan was fair and I don't believe they discussed in any great detail the method or the actual proof that would be presented at the hearing.

* * * * *

[R. p. 1106] By Mr. Scheetz:

Q. Mr. Benjamin, so that you and I will understand each other, when I use the term "management", I mean to

refer to the executive officers of Engineers, and when I refer to the directors I mean to refer to them as a body, including those officers who are directors, and if occasion arises to differentiate between the majority of the Board and individual directors, we will do so.

A. All right.

Q. If you will keep me straight on that, I will keep you straight.

There is testimony that Virginia contemplates a refunding of its bank loan at a lower interest rate. Are there pending any plans for the refunding of any of the other debt securities or preferred stock of Virginia, Gulf States, or El Paso?

A. No, there are not.

Q. Have there been any conversations on any such refunding looking to the future?

A. No, not recently, Mr. Scheetz.

Q. Had the merger feature, that is the feature which provided for a possible merger between Virginia and Engineers, been retained in the present plan, would there have been any refunding or exchange offered for the Virginia preferred in connection with any such merger?

A. I don't believe so. There was no discussion as to that possibility.

Q. Exhibits 26, 27, and 28 of Engineers furnish the volume of trading for the three series of Engineers preferred stocks up through 1944. Have you the volume of trading for those three series for 1945?

A. Yes, I have obtained that information.

Q. Will you give it first for the entire year and then if you have the figures for the first eight months of 1945, and then for the last four months?

A. In the $6 stock, there were 5,580 shares traded on the New York Stock Exchange during 1945. In the $5.50 stock, 15,890 shares were traded; and in the $5 stock, 17,430 shares.

Richard N. Benjamin—Cross Examination (Cont'd)

For the period prior to September 1, 1945, there were 3,230 shares of $6 stock; 11,900 shares of $5.50; and 11,580 shares of $5 stock.

For the last four months of the year, there were 2,350 shares of $6 stock; 3,990 shares of $5.50 stock; and 5,850 shares of $5 stock traded on the New York Stock Exchange.

Q. In response to my request yesterday, have you ascertained the volume of trading in the common stock of Engineers comparable to that given for the preferred stocks in Exhibits 26, 27, and 28?

A. Yes, I have that information from 1930 through 1945.

Q. Will you state it here?

A. During 1930, 555,500 shares of common stock were traded on the New York Stock Exchange.

1931, 24,700 shares
1932, 38,000 shares
1933, 104,600 shares
1934, 41,200 shares
1935, 68,600 shares
1936, 103,700 shares
1937, 78,000 shares
1938, 980,100 shares
1939, 1,442,800 shares
1940, 535,600 shares
1941, 289,500 shares
1942, 239,600 shares
1943, 1,236,800 shares
1944, 1,446,900 shares
1945, 1,217,200 shares

Q. Do you have it split for the first eight months and the last four months of 1945?

A. Yes. For the first eight months of 1945, the figure was 872,900 and the balance for the last four months of the year was 344,300.

Q. Was was the source of your information?

A. This information for the trading in the common stock on the New York Stock Exchange was obtained from the Bank and Quotation Record.

Q. And for the preferred stock?

A. I believe that information was obtained from the Commercial and Financial Chronicle.

Q. Will you please turn to Engineers' Exhibit 14?

A. Yes, I have that.

Q. There is shown the average times earnings ratios of four selected companies on various bases, ranging from a low of 13.18 on one basis to a high of 16.82 on another basis. The averages range from a low of 14.44 to a high of 16.04. Is that not correct?

A. That is correct.

Q. As I understand it, Exhibit 14 is intended to show that the value of the Gulf States common stock would at least reach into the levels of those ratios, is that correct?

A. Will you read that again, please?

(Question read.)

By Mr. Scheetz:

Q. If we are using a times earnings factor.

A. Yes.

Q. It was not, however, intended to indicate a maximum ceiling or that a higher ratio must not be applicable to Gulf States, was it?

A. That is correct.

Q. Will you please turn to Engineers' Exhibit 47, Schedule D-2, which sets forth income statements for the years 1939 through 1944 for Gulf States.

Now, yesterday when you were comparing earnings experience with earnings forecasts for Virginia, Gulf States, and El Paso, you brought out that the operating revenues and that income available for common dividends for Gulf States for 1942 had been depressed because of the effect of submarine warfare on the oil industry in that area. Can you give us any estimate of the effect on operating revenues for that year dollarwise resulting from that depression in the oil industry?

Richard N. Benjamin—Cross Examination (Cont'd)

A. The only indication I have of the effect of that particular item is that the companies' estimate for operating revenues for that year was $13,395,000 and the actual operating revenues were $12,572,000; so that there was a difference of $823,000 between the estimate and the actual.

I can't say just how much of that differential was due to the factor that you refer to, but I believe that a substantial portion of it was.

Q. Do the operating revenues for the other years set forth in Schedule D-2 reflect any abnormality not already covered by the footnotes or your testimony which, as I recall, covered the unexpected rate of increases due to the war?

A. I can't think of any other unusual events.

Q. Will you please answer the same questions as to the Virginia revenues as shown on Schedule D-1 of Exhibit 47?

A. I don't know of any unusual factors that were not either referred to in my testimony yesterday or covered by the footnotes to Schedule D-1.

Q. Will you do the same for El Paso as shown on Schedule D-3 of Exhibit 47?

A. I think the same general factors referred to in connection with Virginia apply to some extent to El Paso, namely, the effect of the war on the transportation and other business of the company. Other than those, I don't see anything unusual. I don't know of anything unusual that is not referred to in the footnotes and the testimony.

Q. Will you now turn to Schedule A, Page 1, of Exhibit 47. There appears on that page the following footnote: "Redemption premiums up to $3,204,795 may be payable to the preferred stockholders if the Securities and Exchange Commission and the courts so determine. It is the opinion of company counsel that no such redemption premium is payable."

Now that note, as phrased seems to me to be predicated on the contingent payment of a redemption premium as if on a voluntary call for redemption without regard for any

other theory on which an additional payment may be made to the preferred. Does it have that connotation to you?

A. I think so.

Mr. Tucker: Just a moment. Would you read that question and answer back to me, Mr. Reporter?

(Question and answer read.)

The Witness: Could I continue that answer a little further?

Mr. Scheetz: Perhaps you might wait until I have asked you the next question.

The Witness: All right.

By Mr. Scheetz:

Q. At Pages 821 and 822 of the notes of testimony, in response to a question as to the estimated maximum amount of the differential which may be payable under Part 2 of the plan, you said in substance, "We have considered that this contingent liability would not exceed $3,204,795 plus the possibility of interest." I might say that that is not an exact quotation but I will show you just the testimony in just a moment if you wish to see it.

At Page 834 on this same subject, Mr. Condon asked you whether your reference to "premium" meant whatever amount, if any, in excess of $100 the Commission might determine to be fair and equitable to be paid to the preferred, and you replied, "That is correct."

Do you wish to see those references?

A. No, I recall that testimony.

Q. Now, in view of your testimony, should not the footnote in Schedule A of Exhibit 47 and any similar footnotes, if there are any in any of Engineers' exhibits, be revised to show that that item is intended to cover the estimated maximum contingent liability under Part 2 on any theory that might ultimately prevail?

A. I think that this amount that is referred to as a contingent liability, which is the amount of the redemption

premiums on the three series of preferred stock, the amount that has been considered by the directors of the company—all of the directors of the company—to be the maximum amount which would be payable to the preferred stockholders with the exception that some interest might be allowed on that amount.

I think it would be more accurate to state that this has reference to the amount, if any, allowed or found by the Commission and the courts to be the amount over $100. per share and accrued dividends which it would be fair and equitable to pay to the preferred stockholders.

The Examiner: Is that based on the theory that in no event would the company be liable to pay more than their redemption price on the preferred stock as shown by the charter in the event of a voluntary liquidation?

The Witness: That is right.

By Mr. Scheetz:

Q. Have you completed your answer?

A. Yes.

Q. At the session on January 4, 1946, you testified about an authorization by the Engineers' Board adopted February 2, 1945, to pay $20 per share on the preferred stock.

A. That is correct.

Q. The testimony appears at the foot of Page 713, at the top of Page 714, and also on Page 718 of the notes of testimony. On Page 714 you make the statement that there was to be a 20 per cent reduction in the redemption price and liquidating value of each share, and that the officers were directed to formulate plans in connection therewith.

Will you refer to that?

Mr. Tucker: Will you wait just a moment before you answer that question?

Are you going into that proposed amendment that Mr. Condon attempted to talk about yesterday?

Mr. Condon: And was precluded from doing so.

Richard N. Benjamin—Cross Examination (Cont'd).

Mr. Scheetz: Not yet, Mr. Tucker. I will come to a question which I think will raise that question, but I think that the next few questions——

Mr. Tucker: I am inquiring your purpose of going into it to see if I want to make the same objection I made to Mr. Condon.

Mr. Scheetz: I don't want to preclude you but I think if you will let me ask a few more questions you will still have the same opportunity to do that.

By Mr. Scheetz:

Q. Now, let me direct your attention to some further questions and answers on Page 714:

"By Mr. Condon:

"Q. Now, did I understand you to say that one of the facets of that plan was to reduce by $20 the voluntary redemption price to the extent of $20 for each series?

"A. That was the suggestion at that time, yes, sir.

"Mr. Tucker: Wait a minute. The voluntary redemption; is that what you asked?

"The Witness: That is right.

"Mr. Condon: That is what Mr. Benjamin testified to and what he stated and I believe to be the fact. Am I wrong?

"Mr. Tucker: All right."

By Mr. Scheetz:

Q. Now, that statement is not clear to me. Suppose $20 were paid under the proposed plan, what would be the resulting position of a share of preferred if later there were an involuntary redemption or a voluntary redemption?

Mr. Tucker: Now, just a moment before you answer that question.

Richard N. Benjamin—Cross Examination (Cont'd)

Are you going to attempt to do anything more in this connection than to clarify the record?

Mr. Scheetz: That is all, Mr. Tucker.

Mr. Tucker: All right, I have no objection for that purpose.

A. This plan, as I recall it, contemplated a $20 reduction in the voluntary redemption price, and by that I mean in the case of the $6 stock, a reduction from $110 a share to $90 a share; and a reduction in the liquidating value of the same amount, which would reduce the liquidating value from $100 a share to $80 a share, and if subsequently to the first $20 payment the Board decided to redeem voluntarily the remaining amount of the preferred stock, the voluntary redemption price of $90 a share would have been paid.

If there were subsequent payments in partial liquidation of $20 per share four different times, so that the entire amount would be paid off, the plan contemplated that that would involve the elimination of the preferred stock and no premium would be payable.

By Mr. Scheetz:

Q. May I interrupt you there? Suppose that payments had been made in a total of $80. That would leave a residual of $30, wouldn't it?

A. On a voluntary basis, yes, sir.

Q. And the door was never closed to a voluntary redemption as long as there was something left to be paid on the stated value of the preferred?

A. That is right.

Mr. Scheetz: Now, Mr. Tucker, in this next question maybe I encroach on that field. If you think I am——

Mr. Tucker: I am watching you.

By Mr. Scheetz:

Q. Yesterday you heard Mr. Condon make an offer of proof of a proposed amendment to the Engineers' charter

designed to provide for such partial payments. The document was identified as Preferred Stockholders' Exhibit No. 19 and I believe that the offer was confined to Section VII of Division A beginning on Page 12 of that Exhibit 19 for identification.

Division A of Part 4 of the Engineers' charter, Applicant's Exhibit 33 in this proceeding, deals with voluntary redemption features of the preferred.

A. You are referring to the present charter?

Q. Yes.

A. What was that question?

(Question read as follows: "Division A of Part 4 of the Engineers' charter, Applicant's Exhibit 33 in this proceeding, deals with voluntary redemption features of the preferred.")

The Witness: If that is Division A of Article IV, Subparagraph IV deals with that.

By Mr. Scheetz:

Q. Did the proposed amendment as drafted, Preferred Stockholders' Exhibit 19 for identification, include an amendment to that portion of the Engineers' charter dealing with voluntary redemption?

Mr. Scheetz: That is the only question I am going to ask him.

Mr. Tucker: You are still fairly on a clarification of the record. I don't think I ought to object. After all, it is in the record and if it isn't clear it ought to be made clear.

(Discussion off the record.)

Mr. Condon: May I say on the record, Mr. Scheetz, that I had planned to go into the entire problem presented by Exhibit 19 for identification and I restricted my offer to that one article in my offer of proof because it had been developed preliminarily in the examination of Mr. Benjamin. I was mindful of the ruling of the Examiner that I was not to be permitted to continue the examination and I took an exception.

Richard N. Benjamin—Cross Examination (Cont'd)

At a later time I may very well renew my offer either through another witness or otherwise.

The Examiner: Read the last question.

(Question read.)

A. Yes.

By Mr. Scheetz:

Q. I gather from your testimony that you have participated extensively in the development of the recommendations made by the management to the directors with respect to various plans, including the plan which is the subject of this proceeding?

A. Yes, I think that is correct.

Q. And also in the preparation of such documents as were presented to the directors and the exhibits introduced by Engineers in this proceeding?

A. Yes, I did.

Q. Would it be correct to say that you acted as something of a clearing house in the work of preparation and correlating material and ideas so far as the staff work is concerned?

A. I think that is correct.

Q. Were you working in close association with Mr. Tucker and his staff?

A. Yes, I was.

Q. When did the idea of an ultimate merger of Engineers and Virginia first come up so far as you know?

(Discussion off the record.)

A. I believe that this suggestion was first considered in July, 1945.

By Mr. Scheetz:

Q. Who originated it?

A. I believe it arose by reason of suggestions made by tax counsel in Mudge, Stern, Williams & Tucker.

Q. Were any drafts of any merger agreements prepared to implement this idea?

A. No.

Q. At Page 578 of the notes of testimony there appears this statement by Mr. Barnes in answer to a question—"If the distribution of the Virginia stock to Engineers' stockholders in final liquidation had been a taxable transaction, I think we would have stuck to the merger route, in order to avoid such tax liability.

"Q. Then would you say the over-riding weight, then, was the change in tax circumstances?

"A. I think so."

Then there is a reference to the ideas of the staff of the Commission.

I don't know whether you can answer this question, but if you feel that you can I would like you to: If, prior to the time that Engineers files a certificate of dissolution under Part 1 of the plan it developed for any reason that the distribution of Virginia stock to Engineers' common stockholders would be taxable or that there would be a substantial risk that it would be held taxable, do you think that the management and the directors would revive the merger idea as a feature of the plan?

A. Will you read that back, please?

(Question read.)

A. I think the tax feature is so important that that might happen, Mr. Scheetz.

Q. If the merger idea had been carried out or is ever revived and is carried out, since Virginia Electric & Power Company is an operating utility operating in the State of Virginia, I assume that Engineers would have been merged into Virginia and the resulting corporation would be a Virginia corporation. Is that correct?

A. That is my understanding.

Q. Well, from your experience with the Virginia law, the Virginia Merger Law, don't you think that that is almost a certainty?

A. Yes.

Q. Would it be correct to say that the management and the directors were fully acquainted with the appraisal provisions under the merger provisions of the Virginia Corporation Law?

A. I think they were advised of those provisions in connection with the Virginia merger with Virginia Public Service, but I think certainly the management was aware of those provisions and I think the directors probably were.

Q. Is it your conception that this possible claim of the preferred stockholders covered by Part 2 would be disposed of prior to any such merger or might it be dealt with in any such merger?

A. Will you repeat that question, please?

(Question read.)

A. Well, the only place where that merger alternative was originally was in Part 3 of the plan, which has now been eliminated.

Under the present plan, there is no merger provided for so that I don't understand the purport of your question.

Q. I was trying to find out in your thinking about any such proposed merger how you proposed to handle this possible claim of the preferred or whether the merger wouldn't occur until after that was disposed of.

A. The merger would not have occurred until after the preferred stock had been liquidated.

By Mr. Kanton:

Q. Isn't it true, Mr. Benjamin, that at the time the Engineers filed the original plan which contained Parts 1, 2, and 3, and the merger possibility was discussed, that the management had in mind that by the consummation of Part 1 and the paying off of the preferred stockholders of $100 a share plus accrued dividends, that amount there under Part 1 would take away whatever rights the preferred stock-

holders might have not only under the appraisal statutes of the Virginia, but also under the appraisal statutes of the Delaware law?

A. Well, I think the effect of paying off the preferred stock under Part 1 of the plan would be to eliminate that as a stock of Engineers, except for the one remaining right that was specified in Part 1 of the plan.

Q. And that was the consideration also of the management before the original plan was filed, not only your consideration but also their consideration, and that had been discussed as such?

A. Well, I recall some discussion about the merger statutes and the appraisal right in Virginia but it was my understanding and I think the understanding of the other people who discussed it——

Q. Meaning the management?

A. Meaning the management—that those appraisal statutes would be inapplicable in so far as the preferred stockholders were concerned, that is right.

Q. Because of the reasons we have just discussed?

A. That is right.

By Mr. Scheetz:

Q. Now, I direct your attention to Engineers' Exhibit No. 33, which is the charter of Engineers, Page 10, where there appears the following sentence near the foot of the page—"A consolidation or merger of this corporation with any other corporation or corporations shall not be regarded as a liquidation, dissolution, or winding up of this corporation within the meaning of this paragraph, III, provided such consolidation or merger does not substantially impair the rights and preferences of the preferred stock."

Was that provision actively in the minds of the management so far as you know during the period when the merger provision was being sponsored?

A. You mean when the merger plan was first suggested?

Q. And throughout that period.

A. No, I don't believe it was.

Q. Who first suggested Amendment No. 4?

A. I brought up that suggestion.

Q. Did this provision in the Engineers' charter to which I first alluded ever come up for discussion in connection with it?

A. Yes, it did.

Q. When?

A. I don't recall the exact date, Mr. Scheetz.

Q. Was it after this plan was filed?

A. Oh, yes. It was after the plan was filed.

Q. Was it after the hearing on November 20?

A. I think it was.

Q. You heard Mr. Barnes testify that the Holding Company Act operated to depress prices for Engineers' preferred stock?

A. Yes, I did. The effect, I believe, is the way you summarized it. I heard him testify that without the Holding Company Act he believed that at the present time the preferred stock would sell slightly in excess of its call price.

Q. So that a necessary deduction from that statement is that it operates to depress the price of the preferred stock?

A. Yes.

Q. Would it in your opinion be correct to say that the Act has had that effect on the prices of holding company stocks ever since its adoption and caused a lag in their appreciation marketwise; a lag behind other stocks not affected by any such condition?

Mr. Kanton: Do you mean also, Mr. Scheetz, bonds, preferred stocks, and common stocks; or are you only specifically referring to preferred stocks again?

Mr. Scheetz: My question was directed to preferreds. I think that it would probably apply to others, but that is my question at the moment.

A. Well, I think that perhaps the reason the Engineers' preferred stock—I can't answer for preferred stocks of all holding companies in general—is selling below the call price is because of the uncertainties as to the amount the preferred stock would receive in this proceeding.

By Mr. Scheetz:

Q. And that was because of the impact of Section 11?

A. Yes.

Q. And that that factor has been operative since the Holding Company Act has been adopted?

A. Well, I think that factor has been operative. I think the time of accomplishment has been more uncertain up until recently.

Q. Well, how far back do you think it was operative?

A. I think it has been one of the considerations in the picture and there were other factors that were taken into consideration too.

Q. It is one of the considerations that have operated right along?

A. The Holding Company Act, I think so.

By Mr. Kanton:

Q. Am I to understand by your answer to Mr. Scheetz' question along this line that the Holding Company Act has held down the preferred stock of Engineers and, if so, to what extent?

The Examiner: You mean held down the market price of the preferred stock?

Mr. Kanton: I am referring to the market price only, Mr. Examiner.

A. Well, I think Mr. Barnes' testimony was to the effect that if it were not for the Holding Company Act he believes it would sell slightly above the call price; therefore, I assume that the only factor that holds it down is the Holding Company Act.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Kanton: Will you read my question again, Mr. Reporter?

(Question read.)

The Witness: Well, I think it has held it down to the extent as indicated by the market prices.

By Mr. Kanton:

Q. Let us take from the period of 1942, when the preferred stocks were selling around 60. Was the Holding Company Act holding down the preferred stock any more at that time than it is today when the preferred stocks are selling just below their call prices? Is that the summation of your testimony?

A. Will you read that again?

(Question read.)

A. No, I think that when the stock was selling at the price you mentioned of 60 that that reflected the market appraisal of the value of the stock at that time.

(Discussion off the record.)

By Mr. Scheetz:

Q. Now, Mr. Benjamin, coming back to the cross-examination where I left it, I was endeavoring to direct your attention to the entire period during which the Holding Company Act has been in effect and not just the period when the preferred stocks were selling above $100.

At a hearing on March 20, 1942, in Commission Docket No. 70-453, at Page 149 of the notes of testimony, there appears the following question and answer by Mr. Barnes. The question is by Mr. Lester of the Commission staff:

"Q. Do you think that oppressive regulation has brought about the present market or our war with the Axis?

"A. If you are referring now to utility securities, which is what I have in mind, I think if you will look at the financial indexes of utility, industrial, and railroad securities, you will find that their progress departs radically in trend

dating back to the time of the passage of the Public Utility Holding Company Act."

Then, passing over an interruption, the witness continued, "And I think that trend reflects the public's reaction to the effect of the passage and the regulation which has ensued from the passage of the Public Utility Holding Company Act."

Are you in accord with that view? Assuming that the question is directed to common stocks, do you think that is a correct statement?

A. Well, I didn't make the comparisons that Mr. Barnes referred to in that testimony myself and I hesitate to say that I agree with his conclusions, although I certainly have the utmost confidence in any judgment conclusions that Mr. Barnes makes.

I do think that certainly as respect to common stocks of holding companies, one reason for their fluctuation has been the uncertainties raised in the investors' minds as to what is going to happen under the Holding Company Act.

Q. Do you agree that that operated to some extent in the period when the Engineers' preferred stock was selling at less than $100?

A. Yes, I think so.

Q. Did the management and directors anticipate an appreciation in the value of Engineers' portfolio securities, that is, Gulf States, Virginia, El Paso, and Western Public Service, as of 1942?

(Discussion off the record.)

(Reporter read pending question.)

A. I think Mr. Barnes testified at that time that he thought that the market for public utility securities was unduly depressed and therefore I assume from that that he did anticipate an increase.

The Examiner: The question was as to the directors. What was their view on the subject, and not the view of Mr. Barnes particularly. Was there any discussion at any of

the directors' meetings, or did you get any other opinion? I think that is what Mr. Scheetz is after.

Isn't that correct?

Mr. Scheetz: That is correct.

The Witness: I just don't recall what the directors' discussions were on that subject in 1942.

By Mr. Scheetz:

Q. Is it not correct that the company wished to defer the filing of a Section 11(e) plan during the period when the prices for the portfolio securities appeared to be depressed, and another reason, of course, was the pending United States Supreme Court decision?

A. Will you read that again, please?

(Question read.)

A. Yes, I think that is a fair statement.

Q. Have you finished?

A. Yes.

Q. Is it correct to say that the improvement in the market for utility common stocks has made the present warrant plan feasible?

A. You mean as compared to 1942?

Q. Yes.

A. It has certainly made the warrant plan easier of accomplishment. I am not sure that the warrant plan could not have been used in 1942. I have not thought much about that possibility.

The Examiner: Mr. Benjamin, if the common stock of Gulf States had been selling around 6, could you put through the present plan?

The Witness: No, sir. In order to have the warrant plan operative, I think there has to be an excess of the market value over the warrant price.

The Examiner: Wasn't that the substance of Mr. Scheetz' question? That conditions existed in 1942 made the present plan unfeasible, but that it is feasible now be-

cause the market price of Gulf States common has exceeded the offering price on the warrants? Isn't that correct?

The Witness: I think that is right.

The Examiner: I think that is the substance of the question.

Mr. Scheetz: That is correct.

By Mr. Scheetz:

Q. Now, I understand from the testimony that the management and the directors by reason of the current high individual income tax rates, in fact the high rates that have been existing these past years, and their experience with the recent policy of withholding dividends on common stock, felt relatively free to utilize future earnings to help eliminate the preferred stocks, to help pay off the preferred stocks; is that correct?

A. I think that the management and possibly the directors too realized what the effect would be on the large stockholders in withholding dividends; but I think the primary reason for withholding dividends was to accumulate in the system the funds to take care of the preferred stock.

Q. Well, now, generally speaking, did not the management and the directors feel that the common stockholders would be content with a policy of withholding dividends on the common stock during this period?

A. I think so. There were relatively few complaints.

Q. And did not the management and directors feel free to lean heavily on that factor in designing plans to meet Section 11 problems?

A. Well, this is just a matter of my own opinion as to what the directors think, but I think they would have followed this same policy regardless of the tax law, Mr. Scheetz.

Q. Well, they didn't anticipate any very great objection from the common stockholders to such a policy?

A. That is right.

Q. Or any substantial objection?

A. I think that is right.

Q. In view of their experience with them?

A. That is right.

Q. Do you regard it desirable or an advantage to a corporation that its securities, particularly its debt securities and its preferred stocks, have a high investment rating?

A. Yes.

Q. A high investment rating makes for good relations with those securityholders, doesn't it?

A. Yes.

Q. Would you say that it enabled a company to take advantage of the changes in the money rates when they occur, by refunding operations?

A. Yes.

Q. Would it be true to say that generally speaking the better the investment rating, the more promptly such refunding operations can be undertaken?

A. I don't know just what you mean by that.

Q. Well, as money rates go down, is it not correct that a company with a high investment rating can move in on that new money market or lower rates more quickly than one which is not so well heeled financially?

A. I think that is true.

Q. When such a company takes advantage of refunding at lower rates, that, of course, increases the leverage for the common stockholders, doesn't it?

A. It increases the balance, yes.

Q. Mr. Barnes testified that if the Holding Company Act were repealed that a refunding of preferred at a lower dividend rate could be accomplished. I think I am correct in stating his testimony. Do you recollect that?

A. I recall that he said that he thought it could be accomplished at the present time.

Q. The accumulation of earnings on one hand would help that operation by reducing the amount to be refunded, wouldn't it?

A. That is right; yes.

Q. Would that tend to make it possible to refund it at a lower dividend rate by reason of the smaller amount to be refunded?

A. I think it would have that tendency.

Q. Is it reasonable to suppose that Engineers would include an exchange over to the present preferred in any such refunding operation?

A. Well, that is certainly one of the methods of accomplishing it and I think that is a possibility, having the balance of the shares underwritten.

Q. With Mr. Kanton's prompting, may I not ask you if such an exchange offer was included in the recent refunding of the Gulf States preferred?

A. That is right. One of the considerations there was to retain the local holders so far as possible.

The Examiner: We will take a short recess.

(Whereupon, a short recess was taken, after which the hearing was resumed.)

The Examiner: Let the hearing come to order.

By Mr. Scheetz:

Q. Mr. Benjamin, as I understand it, the management and I believe at least a majority of the directors considered the low price at which the Engineers preferred had been selling as one of the reasons and considerations for not paying the preferred more than $100 plus accrued dividends under the plan. Is that correct?

A. You mean over the life of the preferred stock issue over the past years?

Q. That is right.

A. I think they had that fact in mind, Mr. Scheetz.

Q. There is also testimony on behalf of Engineers, and I think you gave it, that the directors regard that the warrant plan was something of a burden on the common stockholders, to raise the funds?

A. That is right.

Q. Would not that burden have existed if a warrant plan had been promulgated several years ago?

A. Yes, I think so.

Q. So that during this period of appreciation that burden has been deferred, has it not? Well, obviously it has, hasn't it?

A. That is right.

Q. Of course, during that period the preferred stockholders were receiving their dividends on the preferred?

A. That is right.

Q. Is it your thought that the receipt of those dividends at existing rates was a compensation, of course, to them during the period in which the preferred stockholder continued to hold his preferred?

A. That is right.

Q. And if he didn't like that, I suppose your answer would be that he could sell his stock and invest in something else?

A. That is right.

Q. In which event a new group of stockholders would come in at the higher prices that are now prevailing?

A. That is right.

Q. If you were to buy a common stock of a company in the market below the lowest issue price for common stock of that company and thereafter received a capital distribution not derived from any earnings which had been withheld in excess of the issue price, would you regard it as a windfall?

A. Read that one again.

(The pending question was read by the reporter.)

A. I think no matter what appreciation I received in a common stock that I purchased I would regard it as certainly a very happy outcome of my investment. I think when you buy a common stock you hope that that is what is going to happen.

Q. That is one of the reasons you buy it?

A. That is right.

Q. If you were to buy a preferred stock at less than the issue price and later received a redemption price in excess of the issue price, that is a premium that you might get on a call, would you regard that as a windfall?

A. Well, there again, if I purchased a preferred stock at less than the issue price and the preferred stock were redeemed, I would be very well satisfied with that investment. One of the factors that I think you are bound to take in mind when you buy a preferred stock is what the voluntary redemption price is, and you also should take into account what the price would be if the company were involuntary liquidated.

Q. Certainly. Now, addressing your attention to the preference common plan about which you testified, as I understand that plan it was contemplated that there would be a vertical split of the enterprise and that the Engineers preferred would receive a preference common stock to be paid off out of earnings. Is that a proper brief description of that plan?

A. Will you read that again?

(The reporter read the pending question.)

By Mr. Scheetz:

Q. When I say a vertical split, I mean into three parts supported by Virginia, Gulf States, and El Paso respectively.

A. That is right.

Q. Under that plan, the preferred would have been retained in the picture until there could have been enough earnings accumulated to pay them off?

A. That is right.

Q. When that plan was under consideration, did the management ever consider including a redemption premium or a higher liquidating value for those preference common stocks, something comparable to the redemption premium on the preferred stock?

A. I don't think so.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. And that notwithstanding the fact that the preferred was expected to stay in the enterprise until the earnings could be accumulated to pay it off?

A. That is right.

Q. Will you turn to Mr. Tucker's opinion, Engineers' Exhibit No. 38, Page 5?

According from Page 5, there appears the following statement, "Although, as will appear, I am unable with assurance to advise you that the premium is not payable, I have no hesitancy in advising you, as directors, I think you should, for your own protection, take the position that the premiums are not payable. This is so because if you should, as a Board voluntarily pay the premium and it should later, as the law on the subject develops further, be determined that premiums were not payable, it is possible that you might incur liability to the common stockholders on the ground of waste of assets."

What did that mean to you at the time the opinion was received?

A. That meant to me that Mr. Tucker could not advise definitely that the final determination of this question would be that the premium was not payable; but that he felt that the directors should, for their own protection, take the position that they are not payable.

Q. Just to keep the record straight at that point, when you refer to premiums, are you again thinking of whatever additional amount might be paid on the preferred, whether it would arise by a voluntary redemption undertaken by the Board or some other theory? Is that correct?

A. Will you read that again?

(The reporter read the pending question.)

A. Yes, I think so.

Q. Was that portion of Mr. Tucker's opinion debated by the directors?

A. I don't believe there was very much discussion on that point at the meeting. I know Mr. Kellogg mentioned

that in his letter to Mr. Barnes, but that letter was sent out the day after the directors' meeting.

By Mr. Kanton:

Q. Would you read Mr. Kellogg's statement to that effect, Mr. Benjamin?

A. Yes, I would be glad to.

By Mr. Scheetz:

Q. You are reading from Preferred Stockholders' Exhibit No. 12, are you?

A. Yes, I am. IIa of this letter reads, "The veiled threat of personal loss to directors if they awarded more than $100 a share to the preferred stock seems to me entirely improper. The Board should honestly apply their best judgment to the case without fear that their good faith would be questioned."

Mr. Tucker: In that same connection, would you like to get in Mr. Barnes' reply on that same point?

The Witness: Mr. Barnes, in his reply, which is Preferred Stockholders' Exhibit No. 12-A, made this statement under II, "In reference to your comment IIa, in regard to Bill Tucker's memorandum to the directors of July 26, it seems to me that if, as you point out in I(3) there is any doubt as to whether the preferred stockholders are entitled to a premium, the directors would be guilty of wasting the assets if they voluntarily paid the premium, since once the preferred stockholders have been paid there would be no way in which the cash could be recovered for the common stockholders if it were later determined that the preferred stockholders were not legally entitled to such a payment. Under such circumstances I should think that a common stockholder might have proper grounds for suit against the directors, particularly if the company's counsel had advised the directors before their action that he had grave doubts as to whether the premium was legally payable."

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Scheetz:

Q. Have you finished that?

A. Yes.

Q. Now had that idea come to your attention before it appeared in Mr. Tucker's opinion of July 26, 1945?

A. Had this idea come to my attention before then?

Q. Yes.

A. I don't think so; certainly not in these terms. What I mean by that is that I realized that if the stock were once voluntarily called, there would be no further problem or recourse.

Q. In view of Mr. Kellogg's letter of July 27, 1945, Preferred Stockholders' Exhibit 12, does that refresh your recollection in any way as to the discussion or as to the debate among the directors about that point?

A. I think that Mr. Kellogg did not raise that point at the September 5 meeting. I can't be sure of it but I don't recall that he did.

The discussion at that meeting to the best of my recollection had to do with the directors' expression of opinion as to what the fair treatment of both classes of stockholders was.

Q. In connection with that portion of Mr. Tucker's opinion, was there any discussion heard by you or participated in by you between the officers or any of the directors with regard to the Article IV, Division C, Part IV of Engineers' charter, Applicant's Exhibit No. 33, dealing with the indemnification of directors and officers?

A. I don't recall any discussion on that article either among the members of the management or the members of the Board of Directors; that is, to be sure I have that, that is IV of Division C you are referring to?

Q. Yes, and I have in mind particularly the provision which I am paraphrasing, and that provides that no future director or officer shall be liable for action taken or had in good faith, which is required, authorized, or approved by

any orders issued pursuant to the public utility holding company act of 1935, and the provisions relevant to that.

A. I don't recall any discussion on that.

Q. Having in mind Mr. Tucker's thought about the personal risk to the directors, did you, as one of the officers of the company, feel free to make or join in any recommendation to pay anything more to the preferred if you had entertained any such thoughts did you not feel that operated as a limitation on anything that you might do?

Mr. Tucker: You say "that operated". What operated?

Mr. Scheetz: Your opinion with respect to the personal risks of the directors.

The Witness: Will you read that again?

(The reporter read the pending question.)

A. Just to be sure I get what you have in mind, Mr. Scheetz, I am a little bit puzzled by your question.

By Mr. Scheetz:

Q. Perhaps I can state the question another way. Did you not feel that self-protection by the directors under this opinion compelled a treatment which would not result in the payment of more than the voluntary payment or proposal on the part of the directors to pay more than $100 plus accrued dividends to the preferred?

A. I don't know that I thought at the time that this would compel the directors to take this position, Mr. Scheetz. I think that when counsel gives advice of this character certainly that is one of the considerations that the directors should keep in mind.

Q. Well, now, assuming and without binding yourself or me or anybody, that you personally happened to think that something more should be paid to the preferred, would you have felt free to make that recommendation and urge the directors to do that in the face of that opinion?

A. I certainly, if I had that feeling, would not urge directors to find it fair and equitable to pay $100 per share.

What I am attempting to say is that I think that if I personally were in that position and felt that this consideration was a vital consideration, I would not state it as my opinion as a director that the plan was fair and equitable.

Q. Yes, but that wasn't my question. I am not trying to ask you to say that $100 was a fair and equitable amount if you thought that something more was fair and equitable. I am directing your attention to this proposition.

Assume that you, as an officer, thought that something more ought to be paid, would you feel that you could urge the directors to adopt a proposal to pay more in any amount that they might fix in view of this opinion?

A. No, I don't believe I would.

Q. If you did, wouldn't you feel that you would be confronted with this opinion which pointed out the personal risk to the directors if they did so?

A. Read that back again, please.

(The reporter read the pending question.)

A. Yes.

By Mr. Scheetz:

Q. We know from the record that the directors have at no time fixed and have not indicated that they thought anything more should be paid to the preferred. Did the directors ever consider a plan whereby it would be provided that if the Commission found that something additional were to be paid to the preferred stockholders, that the plan would then automatically be amended to provide for such payment without prejudice to either the preferred stockholders or the common stockholders to contest the amount and the propriety or non-propriety of such payment, with the company remaining in a neutral position and merely supplying the data whereby that additional amount, if any, could be determined?

A. That is a pretty long question but I understand the effect of it is whether or not the Board ever considered

taking no position on this problem and permitting the Commission to settle the problem for them. That question was discussed and I believe—I am not clear as to who brought up the suggestion, but I believe it was Mr. Coonley who stated that he thought that the directors had a responsibility to determine this question to the best of their ability and thought that the Engineers Board should take the position on this matter, and the other directors agreed with him.

By Mr. Condon:

Q. Except Mr. Streeter?

A. I think Mr. Streeter was opposed to the plan in any event, so that his objection was over-all. I don't know about on that particular point.

Mr. Scheetz: Mr. Examiner, to the surprise of everybody, I think I am probably through, although there may be a few more questions which I will want to ask when I have had an opportunity to read the notes.

The Examiner: All right, Mr. Kanton, suppose you proceed then, if you have any further cross-examination.

By Mr. Kanton:

Q. Just following up this latter line by Mr. Scheetz, if the Commission were to issue an opinion that more than $100 per share plus accrued dividends were payable to the preferred stock, do you think that would overcome any so-called personal liability upon the directors if they subsequently acquiesced and filed an amendment to the effect that an amount over $100 per share was payable?

A. I am not a lawyer, Mr. Kanton. I don't know.

The Examiner: I was going to say that I thought the question probably called for a legal conclusion and I questioned whether the witness could answer it.

By Mr. Kanton:

Q. Do you recall, Mr. Benjamin, while Mr. Condon was cross-examining you I think the day before that I asked

you a question as to whether the capital loss sustained by Engineers from the sale of Puget in the sum of $31,000,000 could be offset in the five-year period subsequent to that sale by either Engineers or any of its subsidiaries with which it filed a consolidated return? I specifically asked you as to whether any Virginia capital gain could be offset by this capital loss sustained through the sale of Puget and I believe you answered me that it could. Is that correct?

A. That is my recollection.

Q. In other words, during the three-year period subsequent to the so-called dissolution of Engineers, on the assumption that this plan is consummated, any capital gain that Engineers or Virginia is entitled to can be offset against that capital loss?

A. That is my understanding.

Q. Do you know if any operational gain by Virginia during this five-year period can be offset against this capital loss by Puget?

A. I don't know, Mr. Kanton.

Mr. Kanton: Well, in the light of that, Mr. Examiner, I would suggest that an exhibit number be reserved, and if I may suggest Applicant's Exhibit No. 68, for an opinion by Mr. Lynch from the firm of Mudge, Stern, Williams & Tucker.

Mr. Tucker: Mr. Lynch is no longer a member of my firm, so you will have to put it in the firm if you want.

Mr. Kanton: All right. With that amendment, to the firm, expressing an opinion by a competent tax counsel of that firm showing whether any capital gain or operational gain by either Virginia or Engineers can be offset with the capital loss suffered by reason of the sale of Puget in the sum of $31,000,000.

* * * * *

[R. p. 1152] (Applicant's Exhibit No. 68 is reserved as noted.)

Richard N. Benjamin—Cross Examination (Cont'd)

The Examiner: You may proceed, Mr. Kanton.

By Mr. Kanton:

Q. Referring to Exhibit 63, Mr. Benjamin, Page 5 thereof, and looking at the tabulations under Gulf States and El Paso, as I understand it this estimate included Gulf and El Paso for the year 1946, as if they were to continue in the Engineers Public Service Company system. Is that correct?

A. Yes, that is correct.

Q. Is it true, Mr. Benjamin, that Gulf States in the past has not filed a consolidated return with Engineers?

A. That is correct.

Q. But El Paso has?

A. I don't believe it has.

Q. But they will for 1945?

A. In 1946.

Q. For 1945?

A. That is right.

Q. But as far as Gulf States is concerned, there will not be any consolidated return filed for 1945?

A. With Engineers, that is right.

Q. In your opinion, what do you think the tax effect would be on El Paso if El Paso were not assumed to be continued in the Engineers system? Do you think it would be appreciable or small?

A. What was that again?

(The reporter read the pending question.)

A. This estimate of income and expenses for El Paso was prepared on the basis of El Paso filing a separate return, so that if El Paso is not in the Engineers system that state of facts would apply.

By Mr. Kanton:

Q. That is your estimate?

A. That is correct.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Does that also apply to Gulf States?

A. Yes.

Q. Does it also apply to Virginia or is Virginia on a consolidated basis?

A. Virginia is also calculated on a separate basis.

(Discussion off the record.)

By Mr. Kanton:

Q. Looking at this Page 5 of Exhibit 63, Mr. Benjamin, could you tell me in your opinion what you would estimate to be the reasonable and foreseeable earnings for Gulf?

A. No, I couldn't give you an estimate as to that, Mr. Kanton.

Q. Did any of the management or the Board of Directors seek such a determination before they filed this plan? Did they consider such a factor?

Mr. Condon: I think he has already testified that nothing like that was done. That is in the record at least twice.

Mr. Kanton: Yes, I know.

By Mr. Kanton:

Q. Do you know if Mr. Barnes has ever made any estimate of the reasonable, foreseeable earnings of any of the operating companies of Engineers?

(No response.)

Q. Do you know the answer, Mr. Benjamin?

A. No, I don't.

Mr. Kanton: That is all I have, Mr. Examiner.

The Examiner: All right, Mr. Condon.

By Mr. Condon:

Q. You were testifying this morning about the question of possible liability of directors in the event that they decided to pay out an amount in excess of $100 per share to

the preferred in the event that it should be finally ascertained that the preferred was only entitled to $100. Do you recall that general line of inquiry?

A. Yes, I do.

Q. As I understand it, Part I or Step 1 of the plan anticipates a request to this Commission for approval of a deposit of $100 in trust?

A. That is right.

Q. Giving to a preferred stockholder the right to take that $100?

A. That is right.

Q. Now, apart from the interpretation placed by your Board on this transaction as an involuntary liquidation, what was there before the Board of Directors on September 5 to show that a share of preferred stock was entitled to even $100?

A. Will you read that?

(The reporter read the pending question.)

(No response.)

By Mr. Condon:

Q. Does that trouble you a little, Mr. Benjamin?

Mr. Tucker: Evidently he is searching his recollection.

Mr. Condon: That is quite right.

The Witness: You make the exception of involuntary liquidation in the question?

Mr. Condon: I did, that is right.

The Witness: I think that the directors looked first to the contract, which is the exception that you made, and then viewed that contract in the light of the other circumstances that we have discussed at this hearing and I don't know of anything, any starting point, so to speak, other than the contract, Mr. Condon.

By Mr. Condon:

Q. So that if this Part 1 of the plan which permits the deposit of $100 for this share of preferred stock should be

permitted under the deposit made and the shareholder get his $100 and if on this state of the record the Commission should find that the going concern value or the fair value of a share of preferred was $90 a share, it would have countenanced on this application an excess payment of $10 a share to the preferred stockholder who would have gotten no money, is that the fact?

A. Will you read that one again?

(The reporter read the pending question.)

A. If the Commission found that it was fair and equitable to pay $90 a share, then they would not approve Part I of the plan and no payment to the preferred stockholders would be made. I think it is fair to say that the directors didn't contemplate that possibility.

By Mr. Condon:

Q. The effect of what you are testifying to now is that it is vital for this Commission to determine what the fair and the going concern value of a share of preferred stock is before it permits that deposit, isn't that so?

A. Read that again, please.

(The reporter read the pending question.)

A. I think the Commission would undoubtedly consider, in connection with the payment of the $100, the contract and the present condition of the Engineers system in order to approve Part I of the plan.

By Mr. Condon:

Q. Are you finished, Mr. Benjamin?

A. Yes.

Q. Isn't the effect of that testimony or that answer simply this: That the Commission has got to decide the fair value or the going concern value of a share of preferred stock before it can permit this Step 1 to become effective?

A. I think it would have to decide that the preferred stock was entitled to receive at least $100 a share, yes.

The Examiner: That is before anything could be paid to the common stockholders?

The Witness: Preferred stockholders, yes, sir.

Mr. Condon: Preferred stockholders.

The Examiner: That the preferred stockholders would be entitled to receive at least $100 per share before anything could be paid to the common stockholders.

Mr. Condon: That isn't my point, Mr. Examiner.

Mr. Kanton: The common stock isn't involved here. That isn't a reorganization to that extent, Mr. Examiner.

As we understand the plan as filed, the common stockholders are to have the trustees continue the estate of Engineers over Virginia for a period of three years and thereupon, at that time, the common stockholders of Engineers will have distributed to them the common stock of Virginia.

The Examiner: That is true enough, but before the Commission could find that the preferred stockholders would receive less than $100 per share, they would have to find that there were not sufficient assets to make any distribution to the common stockholders, isn't that the position?

Mr. Condon: That may be a position, but that was not my point, Mr. Examiner. My point developed by the answer of the witness is simply this: That before the Commission could permit the deposit of $100 and its withdrawal by a preferred stockholder, the Commission will have to determine, based upon all the evidence in the entire record, whether or not a share of preferred stock on a going concern value basis or a fair value basis is worth at least $100.

By Mr. Condon:

Q. Isn't that so, Mr. Benjamin?

A. I think the Commission would certainly have to determine whether the preferred stock was entitled to receive at least $100 in the light of all the circumstances, yes, sir.

Q. And that is going to involve a consideration of going concern value or fair value of a share of preferred stock from the facts presented here, is it not, Mr. Benjamin, by this Commission?

A. Will you read that question, please?

(The reporter read the pending question.)

A. I think they would consider the fair value in arriving at that decision.

By Mr. Condon:

Q. Wouldn't that be necessary, in your judgment?

A. I think it would be necessary at least to the point to satisfy themselves that that value will permit this payment of $100.

Q. You were interrogated with respect to the market appraisal of the value of the stock at different times by Mr. Scheetz. He started, as I recall it, with the time of the adoption of the Holding Company Act in 1935.

I ask you, isn't it fair to say that even prior to 1935, during the period that followed closely upon the Federal Trade Commission inquiry into the holding company systems, and that while the Holding Company Act legislation was in contemplation those elements also played a part in the elements of uncertainty to which you testified and which you testified existed subsequent to 1935?

A. Well, I don't know the answer to that, Mr. Condon. That was a long time ago. The only information I have here is this chart to show Engineers common stock quotations from January 1, 1930 to date. That is Exhibit No. 13. That shows that the market prices of Engineers common went down materially and that, of course, was the period of general depression anyway; so that I just can't answer that question.

Q. All right. You have testified that the Holding Company Act had exercised a certain amount of uncertainty,

over the market values of common stock. Isn't it a fair statement for you to include a similar element of uncertainty with respect to the preferred stocks of public utility holding companies?

A. Well, of course, the preferred stock had the prior position and I wouldn't expect that that would be affected as much by any means as the common stock; in other words, it seems to me one of the largest questions in the minds of a person purchasing common stock of a holding company was what its actual treatment would be.

Q. Don't you think that the same observation might fairly be made with respect to the preferred stock?

A. If there is some doubt about it, yes.

Q. There still is, isn't there, Mr. Benjamin?

A. Yes, there still is.

By Mr. Kanton:

Q. What do you mean by "treatment"?

A. What the ultimate participation of the common stockholders would be.

Q. Wouldn't that depend on the assets and earnings of a particular company and not so much on the treatment that it was accorded under the Act, other than perhaps where a particular company was in conflict with Section 11 of the Act?

A. That is right.

By Mr. Condon:

Q. Now, one final question, Mr. Benjamin. Do you recall reading Mr. Tucker's opinion dated December 11, 1945, which is Preferred Stockholders' Exhibit 13 for identification?

A. Yes, I do.

Q. That is dated the 11th of December?

A. That is right.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. And that was just three or four days before the adoption by your Board of Amendment 4 which suggested dissolution of Engineers; is that right?

A. That is right.

Q. Did you hear Mr. Barnes testify that there were two impelling reasons why that was done; the first was that it no longer appeared that there would be any substantial tax advantage gained from a merger and the second, the suggestions, if I may use that term, made by certain members of the staff of the Commission with respect to dissolution vis a vis merger?

A. Yes, I did.

Q. Was there any other reason that played an important part in the decision of the Board with respect to liquidation of Engineers, so-called, leaving the matter open to a further decision by the common stockholders of Engineers?

Mr. Tucker: May I ask that that be read? I missed it.

(The pending question was read by the reporter.)

A. In his opinion to which you refer Mr. Tucker states this reason, and I think that is one of the reasons that the directors considered——

By Mr. Condon:

Q. Are you looking at Page 5?

A. I am looking at Page 4.

Q. All right.

A. Where he states as follows: Furthermore, it would seem to me that the presentation of the considerations from which it will be determined whether the preferred stockholders of Engineers should be granted in connection with the retirement of their preferred stock any amount in addition to $100 per share plus accrued dividends will be more clearly brought into focus if the merger suggested should be abandoned entirely and the dissolution of Engineers as a corporate entity incorporated into Part 1 of the plan.

Now, that meant to me that it would eliminate from consideration by every one who is considering the present plan the possibility of a variation in method of dissolution or merger at the time at which such a dissolution or merger would take place.

In other words, it would put into Part 1 definitely and finally the method at the time of dissolution of Engineers.

Q. Mr. Benjamin, is the effect of what you are saying by reference to Mr. Tucker's opinion, that it would take away the argument of the preferred stockholders if the merger provision remained in the plan that they might be entitled to an appraisal under either Virginia or Delaware law?

A. It would certainly eliminate that question.

Q. Isn't that one of the important reasons the amendment was made, Mr. Benjamin?

A. I think one of the important reasons the amendment was made was to eliminate the discussion of a possible means of terminating the Engineers enterprise as such from the plan entirely.

The Examiner: I don't think that answers the question, Mr. Benjamin.

Mr. Condon: May we have the question read?

The Examiner: Mr. Condon asked you if that was one of the important reasons that was considered. Can you answer that?

The Witness: I thought I said it was.

The Examiner: I think the question was, was that not one of the important things that was considered. You have not answered that.

(The last question and answer were read.)

By Mr. Condon:

Q. Did you answer that?

A. I thought I did.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Condon: May I have his answer read.

(The answer was read.)

By Mr. Condon:

Q. Wasn't it done, Mr. Benjamin, in the hopes of steering the Commission away from any determination on the fair value or the going concern value of the preferred stock and to have this question decided solely as a matter of law if that were possible?

A. No, I don't think so, Mr. Condon. I think that this merger route was suggested primarily for tax reasons, and when it developed that the tax advantage was no longer there it was eliminated, and that elimination had the effect, I think, of making unnecessary discussions in connection with it.

I mean, in other words, the Plan now provides for an out and out dissolution and there is nothing left up in the air as to just how that dissolution is going to take place.

Q. Are you suggesting that the Board of Engineers can't amend the plan, as it did in Step 4th and revive a merger plan?

A. No, I am not suggesting that it couldn't be done. It could be done, but if it were done it would have to be done before any action is taken under Part 1 of the Plan.

Q. Where do you find that in your Plan, Mr. Benjamin? Point that out to me, will you?

Mr. Tucker: When you say "that", it isn't clear to me what you mean by "that".

Mr. Condon: Will you read Mr. Benjamin's statement, please?

(The record is read.)

The Witness: Perhaps I ought to go a little further in my answer. By "any action taken under the Plan" I meant by having Part 1 of the Plan consummated, and one of the steps in Part 1 of the Plan is to file this certificate

of dissolution. I think that is the place in the Plan. Certainly, it is where I thought you would find that result.

By Mr. Condon:

Q. I believe you said this amendment No. 4 was taken without stockholder action?

A. You mean Amendment No. 4 does not provide for stockholder action?

Q. It was taken without stockholder action.

A. That is right.

Q. And it does not anticipate stockholder action?

A. That is right.

Q. Was there any attempt to comply, so far as you know, with the requirements of Delaware Law with respect to the dissolution of a Delaware Corporation?

A. No.

Q. Did you give three days' notice of this meeting for the purpose of voting on dissolution, to each of your directors?

A. No.

Q. Have you given notice within ten days after the adoption of this resolution, to your stockholders, common and preferred?

A. No.

Q. Have you published this notice of intention to dissolve once a week for three weeks, the first three weeks next succeeding the adoption of your resolution?

A. No.

Q. And you plan to consummate this without the consent or approval of either class of stock, common or preferred, is that right?

A. That is right.

Q. In violation of the Delaware Law?

A. Well, I——

Mr. Tucker: I object. That is a legal question, purely.

Mr. Condon: I think that is a proper question here.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Tucker: I don't think it is a proper question at all. I think it involves a legal answer.

The Examiner: I will sustain the objection because I think it does call for a legal answer. It may be that they can accomplish this under Section 11 of the Act without reference to the Delaware Law at all.

Mr. Tucker: Right.

The Examiner: I don't think this witness is in a position to answer that, Mr. Condon.

Mr. Condon: It may be that they can't, also, Mr. Examiner.

The Examiner: I still say that it calls for a legal conclusion. I still doubt if this witness is able to answer.

Mr. Tucker: I object to it also as being absolutely unnecessary. The plan itself says it can be done without director or stockholder action on the plan. Look at it.

Mr. Condon: I have that data.

Mr. Tucker: And you have just told us what the Delaware law is.

* * * * * *

[R. p. 1168] The Examiner: Is there any further cross examination?

By Mr. Kanton:

Q. On Amendment 4, Mr. Benjamin, do you recall that Mr. Barnes testified on cross-examination that one of the reasons, or one of the main reasons that Amendment 4 was filed when it was filed was, as he stated on page 578:

"If the distribution of the Virginia stock to Engineers' stockholders in final liquidation had been a taxable transaction, I think we would have stuck to the merger route in order to avoid such tax liability."

I asked him the following question, "Then, would you say the overriding weight then was the change in tax circumstances?"

His answer was: "I think so. That, and to meet the ideas of the staff and the Commission."

We gather from that—and I think it is your opinion that the main reason Amendment 4 was filed was because of the tax effects?

A. That is my understanding.

Q. Isn't it true with reference to the staff, that those ideas had been discussed with you or the management long prior to the time of the filing of the original plan?

[R. p. 1170] By Mr. Kanton:

Q. My question was simply this—wasn't that matter discussed previous to the filing of the original Plan?

A. Yes.

Mr. Kanton: That is all.

Re-direct Examination

[R. p. 1171] By Mr. Tucker:

Q. Mr. Benjamin, this morning, and I will state merely enough to bring your mind to what we want to talk about, you were asked something that indicated whether or not the directors had anything before them that would lead the directors to believe that even $100 was proper to be paid to the preferred stockholders—do you recall that testimony?

A. Yes, I do.

Q. Do you wish now to expand your answer in connection with that?

A. Well, at various times during my testimony I have been asked what the directors had before them in consideration of this whole problem, and to the best of my ability I have tried to state what documents and papers and considerations they had before them at the time they reached the conclusion they did reach.

I pointed out, for example, that the directors are generally familiar with the financial structure of Engineers, they are familiar with the market quotations of the stock, both preferred and common, in the market, and they have had presented to them, among other things, the statements that were marked yesterday as having been presented to them at the May 24th meeting.

Included in those statements were analyses of three investment or brokerage firms, in New York, which showed a substantial excess of value over the amount of the preferred stock outstanding.

By Mr. Condon:

Q. When you say "marked", Mr. Benjamin, do you mean marked for identification?

A. I think that was the status of it. I am not sure whether they were actually marked, or whether they were offered as Preferred Stockholders' exhibits.

By Mr. Tucker:

Q. Had you finished when Mr. Condon asked you his question?

A. Yes.

Q. That is the best of your recollection at the moment?

A. Yes, sir.

Q. Isn't it true, and did you include in your answer without having it read back, that they had present before them at every meeting of the Board the current financial income statements, and that kind of thing?

A. Yes, I have so testified.

Q. What is contained in those little black books that were put before the directors was current financial information which was placed before them?

A. Those statements ordinarily contained the monthly published report of the Engineers and its subsidiaries and for the latest period, and also preliminary figures which are

not available for publication. They contained considerable detail concerning such earnings.

Q. If you were a director and had the information that you now have told us about before you, you would have no hesitancy about coming to the conclusion that the payment of anything like $90 to the preferred stockholders would have been unfair, would you?

A. No, I would have no hesitancy.

Mr. Condon: May I have that question and answer re-read, please?

(The record was read.)

The Witness: I would have no hesitancy in saying that the preferred stockholders were entitled to at least $100 a share.

By Mr. Tucker:

Q. Now, Mr. Benjamin, at page 807 of the transcript you were being cross-examined as to why the directors didn't include the preferred stockholders in the warrant plan. My recollection of that, when your were asked that question, is that you said something in substance like this—You said, first, that you saw no legal obstacles to such a plan and then,—and I quote now, "I see no reason why it could not have been done."

Now, I ask you if you care to expand that answer.

A. That answer was intended to state that I saw no mechanical reason why that type of transaction could not have been carried out. I didn't mean to imply by that answer that I thought it would be a fair and equitable way of filing a plan or that the directors had that thought in mind. I understood Mr. Condon's question merely to cover the fact whether it was a possibility that that could have been done.

Q. It is true that Section 11 provides—and if anybody thinks that this is a legal conclusion they can object and you needn't answer—for voluntary plans,—you can file any

doggoned kind of a plan you want under it—is that your understanding?

The Examiner: Strike the "doggoned."

Mr. Condon: I think that that is very characteristic, Mr. Examiner. I think that we might call this that kind of a plan.

The Examiner: Let it go in the record if he wants it in.

By Mr. Tucker:

Q. Under (e) you can file any kind of a plan,—isn't that your understanding,—that you want?

A. That is my understanding.

Q. And then the Commission has to decide whether it is "fair and equitable?"

That is my understanding.

Q. I will try to get this reference to the transcript correct, at page 860 you are testifying in connection with the savings under the refunding of Series B, C and D bonds of Virginia through the issuance of new bonds.

I think the record will show, and you will remember, you said that it resulted in a savings of $396,635, is that correct, Mr. Benjamin?

A. That is right.

Q. Now, do you wish to amplify that statement?

A. Well, I understood the question to inquire as to what the gross savings were in connection with that refinancing. Of course, that was before taxes, and the pro forma statement which was included in the prospectus at that time showed that the balance for common stock and surplus had been increased, as a result of that financing, by $37,083.

Q. So that your figure of $394,635 was a gross figure?

A. That is right.

Q. Before taxes?

A. That is right.

Q. And the figure you just gave is the net figure after taxes?

Richard N. Benjamin—Re-direct Examination (Cont'd)

A. That is right.

Q. And amortization?

A. That is right.

Mr. Tucker: My recollection is that there was a reservation of a number 53 for this exhibit, and this statement that I am now about to present is headed "Virginia Electric and Power Company, estimated income statement for the year 1945, excluding transportation operations for three months ended 3/31/45 (last two months estimated) and pro forma income statement year 1944, giving estimated effect as at January 1, 1944 as to merger and sale of transportation properties."

The Examiner: Applicant's Exhibit 53 was reserved for that statement.

Mr. Tucker: I now present for the record Applicant's Exhibit No. 53.

The Examiner: Is there any objection?

* * * * *

[R. p. 1178] Mr. Condon: Who prepared this, Mr. Tucker?

Mr. Tucker: Ask the witness, will you?

The Witness: Now, this statement was prepared by Mr. Leighton in New York.

By Mr. Tucker:

Q. With the assistance of our auditors, is that right?

A. Yes, he was assisted by Lybrand, Ross Brothers and Montgomery, in connection with its preparation.

By Mr. Condon:

Q. Would you be able to state for the record the theory upon which this statement was prepared?

A. It is my understanding that this statement reflects the results of discussions between representatives of Lybrand and Mr. Leighton and Mr. Werntz, of this Commission's staff.

Q. Are you aware of the differences of opinion that existed between your auditors and Mr. Leighton on the one hand and Mr. Werntz on the other as to the theory of this document?

A. (No answer)

Q. I draw your attention to the item of taxes.

A. Yes. There has been a difference of opinion which arose in the first instance in our Virginia Electric and Power Company refinancing of last year.

The principal difference, as I understand it, between the auditors and the Commission is the method of treatment of the tax item.

Q. Would you amplify that for the record, if you will, and explain the two concepts or approaches?

A. I would like to amplify the previous statement. It is my understanding that Mr. Leighton and a representative of Lybrand discussed with Mr. Werntz the problems involved in connection with the recent accounting release No. 53 as applied to the Virginia Electric and Power Company situation; and that after some discussions, this statement was prepared in New York, and it is my understanding that they believe that this set-up is satisfactory.

Q. To whom?

A. To the Commission.

The Examiner: You mean by "satisfactory" that it applies to the accounting regulation?

By Mr. Kanton:

Q. That it will be satisfactory to the Commission, is that correct?

A. That is correct.

By Mr. Condon:

Q. Now, continuing with your explanation of the differences in view between the auditors and Mr. Leighton on

the one hand, and presumably the accounting division of this Commission on the other——

Mr. Tucker: You are laying a basis for saying whether you want to object to it or not?

Mr. Condon: Yes, sir; these are preliminary questions on the question of whether or not I wish to object to the document.

Mr. Tucker: All right.

The Examiner: All right. Proceed, Mr. Condon.

The Witness: The Company and its auditors would have preferred, in this particular statement, for example, to have included $3,939,677 under the item "Federal Taxes" on this income, against which a figure of $623,000 now appears, in order to show what the normal tax would have been, based on the revenue received during that year, and then that amount would have been reflected lower down so that you would arrive at the same balance applicable to common stock.

The Commission's opinion stated that the Commission felt that the taxes should be shown on the basis that they were actually paid during the year, without any attempt to reflect a normal rate of tax on that income.

By Mr. Tucker:

Q. Now, Mr. Benjamin, you referred there to $3,939,677. Wouldn't the same general remark that you made with respect to that apply also to the item above, $2,367,940?

A. Yes. The Company and their auditors would prefer to show that item above gross income. Here it is shown above net income, in accordance with the Commission's opinion.

By Mr. Condon:

Q. Are there any other variations in philosophy, so to speak, than you have mentioned?

A. No, I think that is all.

Richard N. Benjamin—Re-direct Examination (Cont'd)

Q. Have your annual statements, which are in evidence, been prepared upon the theory that you say it is preferred by Mr. Leighton and your auditors?

A. The published reports reflect the opinion of Mr. Leighton and Lybrand.

Q. And would be on a different theory than is set forth in the Exhibit 53, is that right?

A. That is right.

Q. So that, to the extent that Exhibit 53 varies from the theory of preparation of your annual reports, it will have to be viewed in that light?

A. That is right.

Q. Can you state why it was impossible to have the same data prepared for years prior to 1944 as requested by staff counsel?

A. Well, that was due to the difficulty of giving effect to the sale of the transportation properties, and the merger in previous years.

Q. Well, aren't the considerations to both of those matters given in connection with the preparation of Exhibit 53?

A. Well, that is right. They were included in Exhibit 53, but this exhibit covers only the year of the merger and the sale of the transportation properties, and not the prior years.

Q. Would there be any reason why this statement for three or four years prior to 1944 could not be prepared on the same theory as requested by Mr. Kanton, now that this has been set up in its present form?

A. Well, I understand from Mr. Leighton that this matter was put up to him when Mr. Kanton's request was first made and he said that he thought it would be impossible to go back into those earlier years and make up these statements giving effect to those changes.

Q. Well, he has covered the two most difficult years, hasn't he? The years 1944 and 1945, the years of the merger and the disposal of the transportation properties?

A. I understand that the principal reason the treasurer's department was able to furnish the figures for 1944 was that a great amount of work had been done in connection with the registration statement, at which time a pro forma statement was put in, and, that as to previous years it would be very difficult, if not impossible, to calculate taxes on the basis of these companies,—Virginia Public Service and the Virginia Electric being in the consolidated return, figuring the capitalization that would have been outstanding on Virginia Public Service, for example, during that period.

During most of those years Virginia Public Service didn't pay any dividends on the preferred stock, but if it had been combined with Virginia Electric, it might well have paid the preferred dividends.

The payment of those dividends entitled the Company to a tax credit.

In addition, there were allocations of expense between transportation and electric departments, so that Mr. Leighton's conclusion was that it could not be prepared.

Q. All right. You are not suggesting that this statement has the approval of the Commission, or any employee of the Commission, are you, Mr. Benjamin?

A. No, I am not.

The Examiner: Now, have you any objection, Mr. Condon?

Mr. Condon: Subject to Mr. Benjamin's explanation, I don't object.

The Examiner: Have you any objection, Mr. Kanton?

Mr. Kanton: No.

The Examiner: Mr. Scheetz, have you any objection?

Mr. Scheetz: I have no objection.

The Examiner: There being no objection, it will be received as Applicant's Exhibit No. 53.

(Applicant's Exhibit No. 53 is received in evidence.)

By Mr. Tucker:

Q. This is clearly direct testimony, this question:

Richard N. Benjamin—Re-direct Examination (Cont'd)

Mr. Benjamin, have you had prepared an exhibit showing historically the investment in subsidiaries of Engineers, and what has happened to them?

A. Yes, I have.

Q. Was this statement prepared, Mr. Benjamin, by you or under your supervision?

A. It was prepared at my direction, Mr. Tucker.

Q. Do you believe it to be accurate?

A. I do.

Mr. Tucker: The statement referred to is entitled "Engineers Public Service Company, Incorporated, Investment in Subsidiary Companies," and I now offer it as Applicant's Exhibit No. 69.

Mr. Condon: For what purpose, Mr. Tucker?

Mr. Tucker: For showing generally the fairness and equitableness of the Plan that is pending before the Commission in this proceeding.

Mr. Condon: How does this show it? Would you explain?

Mr. Tucker: I don't think that needs any explanation. I have no explanation to make.

The Examiner: Is there any objection?

Mr. Scheetz: Yes, I object.

Mr. Condon: I object to it on the grounds that it is irrelevant and immaterial to any issue before this Commission at the present time.

Mr. Scheetz: Mr. Examiner, the basis of my objection is that I believe that it is an extension of the line of testimony which was introduced with respect to the El Paso Natural Gas Company, and if that be one of the purposes, as I believe it is, I certainly object to it as irrelevant.

Mr. Kanton: Mr. Examiner, just having received a copy and not having had an opportunity to examine it or members of the staff examine it—looking at its face value, this exhibit, as proposed to be entered into evidence by Mr. Tucker leaves a lot of questions to be answered,—just looking at it.

I think before I would object I would like to ask Mr. Tucker if he expects to offer any explanation of this exhibit, either through the witness or himself?

Mr. Tucker: Does the Examiner have one of these?

The Examiner: Yes, I have.

Mr. Tucker: I have a feeling that in a record of this character, where so much historical evidence has been put in, that bringing together in one exhibit the story about the investments in these various companies, and what has happened to them will be helpful to the Commission in considering this Plan.

I think it is material and eminently relevant and I don't, myself, see that it needs any further explanation.

You are dealing with a plan here, now, which is offering something for the preferred stock, leaving something for the common stock.

The Commission's duty is to determine whether, under all the circumstances in connection with this Company, that have any relevancy, that plan is fair and equitable.

I, myself, think that the Commission would welcome that kind of an exhibit in that connection.

Mr. Kanton: Could you tell me the basis of the investments, as stated here in the first column of figures, whether it is cost or book value?

Mr. Tucker: Ask the witness.

Mr. Kanton: I didn't know you were going to ask him.

Mr. Tucker: It is perfectly all right. I have offered it, and your questions now go to whether you want to object and I think you can properly ask him at this time, to see whether you want to object, what the basis of the statement is.

The Witness: Book value.

The Examiner: Wait a minute — was that question asked?

Mr. Kanton: I have now directed the question to the witness.

The Examiner: He says "Book value."

Richard N. Benjamin—Re-direct Examination (Cont'd)

By Mr. Kanton:

Q. What do you mean by "book value", Mr. Benjamin?

A. It is the amount shown on the books of Engineers as its investment in these subsidiary companies.

The Examiner: Do you mean by that the cost to Engineers of these securities?

The Witness: Yes, that reflects the cost to Engineers.

By Mr. Kanton:

Q. How was that cost determined, Mr. Benjamin?

A. That was determined on the basis of securities issued or cash paid for these common stocks and preferred stocks.

By Mr. Tucker:

Q. Taking the securities issues as of their value at the time of issuance?

A. That is my understanding.

By Mr. Kanton:

Q. Is that also the same reasoning reflected in the headings entitled "Sold" "Balance" and "Additions"? Does that mean that it is sold for cash or securities?

A. The elimination of that much investment from Engineers' books.

Now, in the case of Puget Sound, the largest item in there, for example, that was the sale of the balance of the stock that Engineers received under reorganization.

By Mr. Tucker:

Q. In other words, the figures under the column "Sold" don't attempt to go into what you sold the items for?

A. That is right.

Q. But merely to take out of the investment column what the values therein stated were, namely, the book values, that particular item, is that right?

A. That is right.

Richard N. Benjamin—Re-direct Examination (Cont'd)

By Mr. Kanton:

Q. Looking at Puget Sound Power & Light Company, which you just referred to, does that $34,097,000 approximately reflect the investment of Engineers as of August 31, 1935?

A. Yes.

Q. How much did you get for Puget, Mr. Benjamin?

A. Oh, it was less than $1,000,000.

Q. Was that worth over $1,000,000 in 1935?

A. I don't know what the value was in 1935.

Q. How can you say there is a reduction from August 31, 1935 to December 31, 1945 of $34,000,000 in assets?

A. Well, this is simply in investments, Mr. Kanton, book value.

Q. It had nothing to do with value, then?

The Examiner: Well, that is also true of the amounts shown under "investments" as of August 31, 1945. That has nothing to do with value?

The Witness: That is right.

The Examiner: That is merely the amount that you carried it on the books at?

The Witness: That is right.

The Examiner: And your "Sold" column doesn't represent cash received or property received, but simply represents where you have disposed of the property, the elimination of that item from your investment account on the books?

The Witness: That is right.

By Mr. Tucker:

Q. And the next column reflects the balance after the elimination?

A. That is right.

Q. And the next column reflects the additions since that time?

A. That is right.

Q. And the last column reflects the book investments of Engineers at the moment in all of its remaining properties?

A. That is right.

By Mr. Kanton:

Q. Mr. Benjamin, between these dates, you have now sold approximately half of your assets, have you not, as reflected in the $95,884,000 and the $54,321,000, is that correct?

A. Between what figures, please?

Oh, I see what you mean. We have sold 59 per cent of the investments, based entirely on book values.

Q. Based on values, not book values, or is it based on book values?

A. It is based on the book investment that Engineers has, the book costs.

Q. Based on real values, how much have you sold during this period, Mr. Benjamin?

A. I don't know.

Q. Would you say approximately ten per cent?

A. I wouldn't guess any, Mr. Kanton.

Q. Nowheres near fifty per cent, would you say?

A. I wouldn't think it would amount to as much as that.

Q. As much as what?

A. Fifty per cent.

Q. It is closer to ten per cent, wouldn't you say?

A. I would rather not guess at it, Mr. Kanton.

Q. Could you estimate that or could you figure it, if you have the time and the opportunity?

A. That would involve a valuation as of August 31, 1935 and as of this latter date. That would be a very lengthy job.

Q. Can't you give me a rough figure? I think you are fully acquainted with the system and what has been going on in the last eight years, Mr. Benjamin?

Richard N. Benjamin—Re-direct Examination (Cont'd)

A. I would rather not give that estimate just now, Mr. Kanton.

Mr. Kanton: Mr. Examiner, based on the witness's answers, I would like to state now that this exhibit is misleading because it does not show the proceeds of all the sales and the present values. As it now stands, if it is left in the record as it is, it would be misleading to somebody who may read it.

Mr. Condon: I would like to supplement by a few additional questions, if I may, my objection.

The Examiner: All right.

By Mr. Condon:

Q. Are you familiar with the organization of Engineers back in 1925?

A. 35?

Q. 1925.

A. Only from reference to records of the Company.

Q. Are you familiar with the facts and circumstances whereby, on August 31, 1935, the investments appearing in column fashion, vertical-wise, the second column from the lefthand side of the page, acquired those book costs, and the circumstances surrounding each?

A. I am familiar in a general way from my reference to the records of the Company, with the bases on which the securities were acquired. I cannot give you the details of them at the moment, but they can be obtained.

Q. Are you aware of the existence of any restatement or revaluation of any of the underlying assets as set forth in that proposed exhibit, at or about the time of acquisition by Engineers?

A. Read the question, please.

(The question was read.)

A. I can't give you any specific instances of that, Mr. Condon.

Richard N. Benjamin—Re-direct Examination (Cont'd)

By Mr. Condon:

Q. Are you under the impression that there was no such situation with respect to the acquisition of any of these properties?

A. You are speaking of revaluations of the operating companies?

Q. Write-ups, Mr. Benjamin.

A. On the books of the operating companies?

Q. On the books of Engineers.

A. Well, there was a write-up made in 1928 in the case of Virginia, but I think that the footnote (e) shows that that was taken out of this calculation.

Q. Is that the only instance of a write-up that you are aware of?

A. Yes.

Q. Are you familiar with the consideration paid by Engineers incident to the acquisition of the various common stocks set forth on the proposed exhibit?

A. Familiar with the what?

Q. Considerations given by Engineers incident to the acquisition of the common stocks set forth on the exhibit.

A. I can't give you that information at the moment. I could obtain it.

Q. Do you know whether or not some of the common stocks were acquired in exchange for Engineers' stock?

A. Yes, I think they were.

Q. Do you know to what extent?

A. I do not have that information,—no.

Mr. Condon: Mr. Examiner, I think it affirmatively appears, in addition to this document being irrelevant and immaterial to our inquiry, that it is an incompetent document on the ground that the proper foundation has not been laid for it, and this witness, with the greatest respect to Mr. Benjamin, is unable, with a reasonable degree of accuracy to give the requisite data to support the competency of the document.

The Examiner: Mr. Tucker, do you have anything further to say?

Mr. Tucker: I don't agree with that statement. I suppose that is natural.

Mr. Condon: As to what?

Mr. Tucker: I said I don't agree with that statement, but I suppose that is natural.

The Examiner will bear in mind that this Plan arises under Section 11 of the Act and that one of the things that has to be considered by the Commission in connection with this Plan, which has been filed under Section 11(e) is this: —and it is the same quotation that I made the other day from Section 11(e):

> "If, after notice and opportunity for hearing, the Commission shall find such plan as submitted or as modified necessary to effectuate the provisions of sub-section (b) and fair and equitable to the persons affected by such plan, the Commission shall make an order approving such plan."

Now, we digress just a second to answer Mr. Scheetz. He says that this is a continuation of the El Paso Natural Gas picture and the so-called "sacrifices" of the common stockholders in connection therewith or preferred and common stockholders, if you please, because if we had gotten more for it it would have benefitted the preferred too.

That is clearly not the kind of document this is, because it doesn't even show what these things were sold for. It is an attempt to show historically, under this language of the Act "necessary to effectuate the provisions of subsection (b)" the extent to which, under the operation and impact of this Act Engineers has complied up to date.

Now, I say for that purpose this exhibit is an enlightening exhibit to the Commission. They might well have a different attitude, that this Company had been sitting still and doing nothing about complying with the Act; but we have gone this far, and we think it is fair and equitable that

the Commission should have visually presented to them the extent to which we have done it already, so that they may fairly consider whether the effect of the balance is to carry out sub-section (b).

Mr. Scheetz: The statement addressed to my objection, I believe.

I get the import from Mr. Tucker's statement that it is important to show the Commission compliance to date under Section 11, for the purpose of determining the fairness of the Plan. I suppose that conversely—and I think Mr. Tucker gave some indication of this, if they had not complied in this way, that the Commission would be disposed to take some other attitude toward the fairness and equitableness of the plan. At least, I gathered that from Mr. Tucker's statement here.

It doesn't seem to me that that is the basis for qualifying an exhibit. I simply had the expectation that Mr. Tucker was going to argue from this exhibit that this indicates that substantial losses were sustained and sacrifices made—and whether or not the exact dollar mark is in there, it does seem to me that it constitutes some indication in that direction, and that is the part of it that I objected to.

If it was purely an historical explanation of something that had happened, and was not to be used for the purpose of augmenting the argument about sacrifices of the common stockholder, I would have no objection.

Mr. Condon: Mr. Examiner, as I listened to Mr. Tucker, I gathered that he tendered the document for the limited and restricted purpose of bringing home to the attention of the Commission how cooperative Engineers Company had been in disposing of the companies it had been directed to dispose of, and as a corollary of that attempt it was hoped, as a collateral advantage, to have the Commission assume that the Engineers' System was 59 percent dismembered, which is the total under the so-called "sold" column.

Now, Mr. Kanton asked Mr. Benjamin whether that represented anything like a fair proportion or percentage

on a valuation basis or any other basis of that portion of the Engineers' system that was disposed of pursuant to the direction of the Commission.

If Mr. Tucker hopes to derive any advantage from that totalization, I say the document is grossly misleading and should be denied admission on that ground.

If it is merely to bring home to the Commission what steps have been taken with regard to disposal of subsidiaries, and collateral systems or interests, I feel that it is entirely unnecessary.

This Commission knows equally as well as Mr. Tucker just what the Engineers system has done and has not done with regard to compliance, and I feel that the document should be denied admission for any purpose.

The Examiner: Generally, in Section 11(e) proceedings it has been the policy to admit evidence which, in other cases, perhaps, wouldn't be considered at all.

Mr. Tucker has stated that his prime purpose in offering this exhibit is to be of assistance to the Commission in determining whether or not the Plan which they have proposed was fair and equitable.

If I was satisfied in my mind that this statement was fair on its face and could be construed properly by anyone who read it, I might have a different attitude toward it, but it is perfectly clear to me from the statements which have been made by counsel and from the testimony of Mr. Benjamin that the statement is grossly misleading, and instead of being of assistance to the Commission I am afraid it might mislead the Commission in its proper determination.

For that reason I will sustain the objections to the offer of the exhibit.

Mr. Tucker: Will the Examiner save my exception?

The Examiner: Yes.

Mr. Tucker: I have no further re-direct or direct evidence to offer at this time.

The Examiner: Gentlemen, if you are through with Mr. Benjamin now, we will excuse him.

Mr. Condon: When Mr. Scheetz is finished, I have one question.

Mr. Tucker: Mr. Examiner, I would like to make an offer of proof of this as an exhibit, basing my offer of proof, if I may, on the statements with respect to it which have been made by Mr. Benjamin on examination of counsel.

Mr. Condon: I am sorry—I was talking to staff counsel and I am afraid I didn't hear Mr. Tucker.

The Examiner: Let the reporter read the statement. Mr. Tucker merely stated that he was making an offer of proof of this now for the reasons which he had stated and Mr. Benjamin's testimony.

(The record was read.)

Mr. Condon: May I note an objection to the offer of proof on the ground that no proper foundation has been laid for the offer, on the ground that the data to which reference has been made in the offer is incompetent and has been clearly so established by the testimony of the witness Benjamin; and hence the offer of proof should be denied.

Mr. Tucker: Do you mean that the offer of proof should be denied?

Mr. Condon: That is what I said, Mr. Tucker.

The Examiner: Wait a minute. Off the record.

(Discussion off the record.)

The Examiner: Back on the record.

I will overrule your objection and permit Mr. Tucker to make his offer of proof, anyway.

Mr. Tucker: For the purposes of my offer of proof, I would like that statement that I just handed to the reporter marked for identification as Applicants' Exhibit No. 69.

The Examiner: Let it be so marked.

(Applicant's Exhibit No. 69 is marked for identification.)

Mr. Scheetz: Mr. Examiner, it is understood, of course, that the objections previously made now apply to the exhibit as offered?

The Examiner: That is true, yes, sir.

Mr. Condon: And my exception is noted?

The Examiner: Yes.

Mr. Tucker: You say the exhibit is offered? Marking it for identification is the basis of my offer of proof.

Mr. Schoetz: Well, the substance of your offer of proof.

Mr. Tucker: All right.

* * * * *

[R. p. 1201.] By Mr. Condon:

Q. Mr. Benjamin, Mr. Tucker asked you a question if you were a director, and you were, first, generally familiar with the financial affairs of the Engineers System and, second, familiar with the market quotations of the preferred stock and, third, familiar with the contents of the statements marked as Preferred Stockholders' Exhibit 18 for Identification, containing the analyses of the three financial houses to which you made reference, and, fourth, had been currently advised with respect to the financial information, earnings data, and so on, that it would be your opinion that the preferred stock was worth at least $100.

Did you give that testimony?

A. I think I said that it would be my opinion that the preferred stockholders would be entitled to receive at least $100 a share, Mr. Condon.

Q. Now, is that expression on your part based upon a conscious study of going-concern value of the preferred stock or the fair value of the preferred stock or its intrinsic value in a going concern, or is it because of the provision in the Charter?

A. It is because I think that, based on those statements, there would be sufficient value in the Engineers' picture to make that payment to the preferred stockholders, in accordance with the charter provision.

Q. Would there be anything else in the Engineers' picture that might suggest the payment of more than $100 to the preferred stock ex what you consider the charter limitations?

A. I think it has been testified here by Mr. Barnes,—and I agree with his testimony,—that ex the Act, the preferred stock would be refunded, based on present market conditions; therefore, I think it follows that the value of that, ex the Holding Company Act, would be in that neighborhood of the call price.

Q. $105 and $110?

A. That is right.

* * * * *

DONALD C. BARNES

previously sworn, is recalled, and was examined and testified further as follows:

Cross Examination

[R. p. 1203.] By Mr. Kanton:

Q. Mr. Barnes, earlier in this hearing, when I first cross-examined Mr. Benjamin, I asked him a question as to whether the sale of the assets of Gulf States had ever been considered by the Board of Directors, or whether any direct offers or offers of an indirect nature were ever received by you or any members of the Board.

As I recall—and I think the record will show—he deferred to you for the answer to that question.

I would appreciate if you could give me that answer at this time, Mr. Barnes.

A. Yes, I shall be glad to.

On April 30, 1945, the President of an adjacent holding company system phoned me and asked me if we would care to discuss the sale to them of Gulf States Utility Company which, in his opinion, would fit into an integrated system with their properties.

I told him that we were not disposed to sell our interest in any of our more important subsidiaries, because we felt that our stockholders would be better off if we could carry out our liquidating holding company plan, which we had filed informally with the Securities and Exchange Com-

mission staff in September, 1943, and as to which we were waiting for the staff to advise their attitude.

Q. Was that the President of the New Orleans Public Service Company or the President of the Louisiana Power and Light Company, Mr. Barnes?

A. I would rather not name the President unless you insist on it.

Q. No, I don't insist, sir. I leave it entirely within your discretion.

A. Well, I think it was a confidential approach on his part and I don't know how much he would like to have publicity given to it.

Q. As I understand your last remark, no effort was made to enter into any form of negotiations for the sale of the Gulf States, so that no prices were discussed, etc. Is that correct?

A. That is correct. That was the full extent of our discussion.

Q. I take it that that was the only direct communication made with you or with any of the other members of the Board of Directors that you know of, for the sale of the assets of Gulf States?

A. That is correct.

Q. And that covers a period of how long, sir?

The last five years? Is that correct?

A. Since I have been connected with Engineers Public Service Company,—the last eight years.

Q. Did you communicate the receipt of that offer to your Board of Directors?

A. I think I did tell them of it.

Q. What was their reaction, Mr. Barnes?

A. I think they agreed with me that it would be in the interests of our stockholders to not sell the physical assets or the securities.

Q. When you say "in the interest of our stockholders" are you referring to your common stockholders?

A. No, I am referring to the Engineers Public Service Company, not the common stockholders, particularly.

Q. But I take it that you mean both preferred and common stockholders?

A. That is correct.

Q. Did the Board of Directors consider whether a price could be received for those properties in excess of the $21,000,000 or $22,000,000 that you now expect to receive from the sale of warrants if this Plan is consummated?

The Examiner: One minute. By the sale of warrants—you are selling common stock. Do you mean on the exercise of the warrants?

(Discussion off the record.)

By Mr. Kanton:

Q. Subject to the Examiner's correction of my question, could you answer me, Mr Barnes?

A. Well, I would like to make this preliminary statement—I don't think that you can construe the proposal under the Plan to dispose of Gulf States through the issuance of warrants to the common stockholders to be comparable in any way to a sale to outside interests, because Engineers Public Service Company common stockholders have the full interest in Gulf States common stock.

Now, I think the short-cut of what this Plan contemplates is that the Company, in effect, is assessing its common stockholders $11.50 a share in order to provide the balance of the funds required to take care of the redemption of senior securities, and to the extent that common stockholders are not able to pay that assessment they have the opportunity to sell their proportionate interest in the Gulf States common stock.

Q. On an over-all basis, I am assuming this to be your statement—you think, and the Board of Directors think that it would be to the advantage of the common stockholders, to give them an opportunity to retain their interests

in Gulf States rather than to sell Gulf States, no matter what the price may be over and above $22,000,000?

A. That has been the fundamental principle that the Board has followed ever since 1941, when we first discussed the various alternative methods by which we might have compliance with Section 11.

Q. Why do you feel that it would be worth more to the present group of common stockholders than it would be to anyone else?

A. I don't think that it would necessarily be worth more to the present group of common stockholders than anyone else, but I think they are entitled to the right to decide whether or not they want to continue their interest in Gulf States, or whether they prefer to sell it.

I might go on to extend that answer by pointing out one of the reasons why I feel that way, and I think why the directors feel that way.

Take, for example, the experience of National Power & Light Company in connection with the disposal of their property in Houston, Houston Lighting & Power Company.

There, the National Power & Light Company first attempted to make an exchange offer with their preferred stockholders. They offered, in the first instance, one and seven-eighths shares of Houston common for each share of National Preferred.

That offer didn't go well and they amended the offer and subsequently offered two shares and still the offer was not acceptable to a great number of Preferred stockholders. Finally, National Power & Light Company made a public offering of the balance of the common stock and it was sold at a public sale.

At that time, as I recall it, they received about $50 a share. The Company itself received about $51 or $52 a share—I have forgotten the exact figures. That was approximately the basis on which they were offering the exchange, if you took National Power & Light at its involuntary redemption price of $100 a share.

That was back in 1941 and 1942. Since that time Houston Lighting and Power stock has gone up, I think, as high as 86, and the last time I looked at it it was selling at 83.

Now, had the National Power & Light Company adopted a three-holding company plan, or a liquidating holding company plan, such as we proposed, or a warrant plan, their common stockholders would have had a continuing interest in Houston Lighting and Power Company and would have realized this capital gain that the purchasers of the common stock of Houston have realized since that time.

Q. Of course during this period from 1941 to 1945, if the market had gone down instead of up, the converse would have been true, would it not?

A. That is correct. But I think that is a chance that the common stockholder ought to be allowed to take for himself.

Q. Well, if you speak of the common stockholder taking a chance for himself, which common stockholders have you spoken to that have expressed the wish to be able to be in a position to exercise these rights, on this particular point?

A. I have not spoken to any common stockholders as to that point.

Q. Well then, what is the basis for your assumption that the common stockholders wish to continue, if you have not spoken to any of them?

A. The basis of my assumption is purely an analysis of what an intelligent investor should prefer to do. It is based on our discussions in meetings of the Board of Directors when we were trying to select what plan we would follow in an effort to provide the most fair and equitable method of disposing of the assets to comply with the Holding Company Act.

Q. Was that also tied in in your considerations of the tax advantages?

A. That is correct; throughout our discussions, we have endeavored to develop the plan that would be the fairest and most equitable plan for all of our security holders.

Donald C. Barnes—Cross Examination (Cont'd)

Q. Well, in this overall consideration, then, in giving the common stockholders the opportunity to either continue in the Gulf States enterprise or not, did the Board of Directors in such consideration also have in mind that these common stockholders of Engineers would possibly be foregoing an increment to the extent that any amount—say four or five million dollars—could be received over and above the approximately $22,000,000 that will be received from the exercise of the warrants?

A. No. Because that is not a fact.

Q. What is the fact, Mr. Barnes?

A. They have the full equity interest in Gulf States common stock. They lose nothing whatever between the amount that is raised by warrant subscriptions. They get the Gulf States common stock. All that they have done is to put up $11.50 a share to pay off the senior securities. They have the full value of the common stock after having put that money up to pay off the senior securities. It is just like your putting up $2,000 to pay off the mortgage on your home; you have still got your home.

The Examiner: Your position, Mr. Barnes, is that if the stockholder does not want to go on with the plan, he would not lose anything, because he could dispose of his warrant and realize the difference between approximately $22,000,000 that will be received from the exercise of the warrants, and the amount which the property might bring if sold outside; is that correct?

The Witness: That is correct, Mr. Examiner.

By Mr. Kanton:

Q. Well, did the Board of Directors and the management also consider that if you could get this extra amount of four or five or perhaps six million dollars that that could be used instead of the loan of $3,000,000 or any excess necessary to pay off the preferred stockholders?

A. If the Gulf States stock was sold outright?

Donald C. Barnes—Cross Examination (Cont'd)

Q. Yes.

A. Yes, they did consider that.

Q. And what was their observation, Mr. Barnes, as you recall it?

A. Well, they did not think that it was desirable to sell the Gulf States common stock, for the reason that I have explained.

Q. On that point, yes; but what was their rationalization as to the point of raising this additional amount to pay off the preferred to the extent of $3,000,000 or any other amount that may be needed.

A. Well, you are speaking now of their consideration as to whether the subscription price under the warrant should not be increased so as to avoid the necessity of a bank loan.

Q. That is one facet of it, or, as I say, selling it outright and getting the money immediately.

A. Well, I have answered the question as to selling it outright, telling you the reason why directors did not think that was a desirable course to follow. Now do you want me to go on with the other "facet" as you call it?

Q. If you will.

A. They felt that $10 per share even was a considerable assessment to be putting on our common stockholders to pay off the senior securities. They had felt from the beginning—and when I say the beginning, I mean from 1941—that the best way from the standpoint of the common stockholder was to retire this senior preferred stock by allowing it to be done out of earnings. Well, it became apparent that that could not be done, and then they decided to go ahead with the warrant plan and pay it off with cash. They felt that the assessment of $10 a share would be as large a burden as they should put on the common stockholders, and therefore they contemplated at that time a $6,000,000 bank loan. Then that plan was discussed with the staff, as I have testified I think, and the staff urged that we revise the plan to eliminate any bank loan.

After further discussion in the Board, we concluded that we would go halfway, and we would, instead of having a $6,000,000 bank loan, ask the stockholders to put up $1.50 additional for their warrant price, and reduce the bank loan $3,000,000 by getting $3,000,000 additional from the common stockholders.

Q. I think you have given us this explanation before, Mr. Barnes.

Getting back to my original line of inquiry. Turning now to El Paso, were any offers received for the sale of the assets of El Paso recently?

A. Well, you know in El Paso that we negotiated with the city of El Paso.

Q. We have that in the record. But I was wondering: since that negotiation, have any offers been directed to your attention or to any of the members of the Board of Directors?

A. Yes, a president of another holding company system, not the one who spoke to me in reference to Gulf, asked me if we would be interested in discussing the sale of El Paso to his system. And I gave him the same reply in substance as that in the case of Gulf States.

Q. When was this, Mr. Barnes?

A. When was it? Well, I can not place the date exactly, but it was subsequent, as I recall it, to the negotiations for the sale to the City of El Paso. And as I recall it, that was in the fall of 1943. I should say that this approach came perhaps within six to 12 months from that time.

Q. And that is the only one that has been received?

A. That is the only one that I have had.

* * * * * *

[R. p. 1215] By Mr. Scheetz:

Q. Mr. Barnes, for the purpose of my cross-examination, I will again use the reference to management to mean officers and directors within the Board as such. Were you present during my cross-examination of Mr. Benjamin today?

A. I think I was present during most of it.

Q. Do you recall a line of inquiry on my part as to the retention or the withholding of dividends on the common stock during recent years for the purpose of furthering solution of the Section 11 problems of Engineers?

A. Yes, I do.

Q. And do you recall my asking the ultimate question to Mr. Benjamin as to whether or not the management and the directors did not feel free to lean heavily on that factor or policy of withholding dividends, and so on? What would be your answer to that question?

A. I think it is covered by statements in the Annual Report. We have told the stockholders in the Annual Report each year that the reason we were not paying common dividends was because of the uncertainties in connection with what would have to be done under the Public Utility Holding Company Act, and the stockholders received that intelligently, and we have had very few complaints. Therefore, we have felt perfectly justified in following that procedure.

Q. Do you regard it as desirable and of advantage to a corporation as to securities that particularly its senior securities have a higher rating; and do you agree that the higher that rating the sooner the company can take advantage of interest rates in refunding and refinancing?

A. It can if it continues in business.

Q. Yes, of course; but making that assumption.

A. Yes. That is a little contrary to the situation with which we are faced.

Q. Now directing your attention to Mr. Tucker's opinion, Exhibit 38——

The Examiner: Off the record.

(Discussion off the record.)

The Examiner: Back on the record.

Donald C. Barnes—Cross Examination (Cont'd)

By Mr. Scheetz:

Q. I show you Applicant's Exhibit No. 38, page 5, with the statement of Mr. Tucker there with respect to the possible personal risk which directors ran if they furthered or sponsored a plan which would pay more than 100 plus accrued interest to the preferred stockholder. You are acquainted with that?

A. I am acquainted with it.

Q. And you heard my question in that respect to Mr. Benjamin this morning?

A. I did.

Q. And you heard his answer?

A. Yes, I heard his answer.

Q. And you have that answer in mind?

A. Well, not specifically; just generally.

Q. Well, may we assume that your position with respect to that portion of Mr. Tucker's opinion is fully set forth in preferred stockholders' Exhibit 12-A, which is your letter to Mr. Kellogg dated July 31, 1945, more particularly under paragraph II?

A. Yes. I would like to supplement that by saying that in my opinion no director took the action that he did because of any fear of suit if he had taken any other action.

Q. Well, were you able to erase from your mind that portion of Mr. Tucker's opinion in consideration of this problem?

A. I was able to erase it, because in my mind I had decided that it was fair and equitable to pay the preferred stockholders $100 a share and no more.

Q. Before that question had ever been raised?

A. That is correct.

Q. Now this morning, in my questions to Mr. Benjamin, I asked him whether in his opinion the impact of the Holding Company Act tended to depress the prices of Engineers preferred during the earlier period; that is, the period prior to the time when it was selling at $100 and upwards. And

I quoted some testimony given by you in Docket 70-453 at page 149, to 151, I believe. Were you present when I was interrogating him on that subject?

A. Yes, I was.

Q. Now when I undertook to interrogate Mr. Benjamin on that, I was personally under the impression that your testimony there related to preferred stock. And before I ask you any questions, I will give you my reasons so that you will have an opportunity to say what you did mean if I am wrong.

As I analyze these notes, the line of inquiry began at page 148, when staff counsel asked you that if you were not an official of Engineers and owned preferred stock, would you sell it. And further down on that page, you made an answer to another question:

"A. Because I have considerable faith in the utility industry. I believe the pendulum is going to swing. I think we are going to be relieved of the present regulation, which I think has affected unduly and adversely the market value for all securities, and I think those who have patience and will ride their investment through are going to come out well in the end."

Now I do not want to skip anything that is important, and if I do you correct me.

Further on the question was asked:

"Q. Do you think that oppressive regulation has brought about the present market, or our war with the axis?

"A. If you are referring now to utility securities, which is what I have in mind, I think if you will look at the financial indices of utility, industrial and railroad securities, you will find that their progress departs radically in trend dating back to the time of the passage of the Public Utility Holding Company Act."

Mr. Kanton: Is the record clear now that Mr. Scheetz is reading from Docket No. 70-453?

The Examiner: Yes, Mr. Scheetz mentioned that at the beginning.

Donald C. Barnes—Cross Examination (Cont'd)

By Mr. Scheetz:

Q. Continuing over on page 150:

"And I think that trend reflects the public's reaction to the effect of the passage and the regulation which has ensued from the passage of the Public Utility Holding Company Act."

Now I think you will discern from that testimony why I assumed that you were making the statement with reference to preferred stock as well as other stock. Was I wrong in that respect?

A. No, I think I had preferred stock in mind, although these utility indices that are spoken of are indices of common stock and not indices of preferred stock.

Q. Well then, is it your opinion that the prices of Engineers preferred stock during the period, say, 1942 and '43, were depressed to any extent by impact of the Public Utility Holding Company Act?

A. Yes, I think they were—to this extent, Mr. Scheetz: Until the preferred stockholder knew what he was going to wind up with after the Section 11 requirements had been complied with, there was an uncertainty that made it difficult for him to determine what the value of his investment was going to be. Some companies had adopted one stock plan, and the preferred stockholders did not know what percentage interest in the enterprise he was going to get. Therefore, he was uncertain as to what the value of his securities was going to be. That affects adversely market value.

I think when you get to a point where it is fairly definite in the investor's mind as to what the disposition is going to be, and that the disposition is going to be a liquidation, and it is apparent to the investor that in liquidation the company has sufficient assets so that they can be sure that the preferred stockholders will get their involuntary redemption price, then if the market for the stock and for other stock is depressed below 100, I think the existence of

the Public Utility Holding Company Act and the assumption that an imminent liquidation is coming along to give the stockholders $100 a share, would tend to increase the price of the preferred stock that might otherwise be selling at less than that amount. I think if you go on to a period where the market has carried the stock above 100, and there is still the uncertainty as to what is going to be done in such a liquidation plan—that is, what the Commission is going to find is fair and equitable—the market will reflect less than the value that it would reflect excluding the Public Utility Holding Company Act. And that is the situation that I see presently in our preferred stock, as evidenced by my testimony that "ex" the Public Utility Holding Company Act today I think our stock would be selling at slightly over the voluntary redemption price.

Mr. Kanton: Are you using the word "liquidation" advisedly as part of your expression? You do not mean that Engineers was always going to liquidate and that the investor always had in mind that a liquidation was going to take place in a legal sense; is that the idea?

The Witness: I do not think the investors knew what was going to happen, whether it was going to be a liquidation or whether Engineers were going to continue on.

Mr. Kanton: But you meant liquidation in a general sense; something perhaps could remain, and Engineers might remain; is that correct?

The Witness: And I told you in my cross-examination several days ago, to my mind a liquidation is when we are disposing of properties in connection with the Section 11 proceeding.

Mr. Kanton: And is that what you had in mind in answer to Mr. Scheetz's question; just as to that general term as it is used?

The Witness: I think I used the word liquidation several times. I would not want to say now what the application was each time that I used it. When I spoke of the

fact that when the investor knows that the company is going to be liquidated—and by that I mean dissolved——

Mr. Kanton: Well, in the present situation you have the Engineers common stockholder giving up his Engineers common stock for perhaps a span of time, common stock in the three operating companies; namely, Virginia, Gulf States, and El Paso. You did not mean liquidation in that sense, did you?

The Witness: I think that is just the sense in which I did mean it the last time.

Mr. Kanton: Did you not mean in your mind liquidation of Engineers as a corporate entity, the way you are posing this plan before the Commission?

The Witness: Yes, and I do not see the distinction between that and the other situation you were trying to describe to me.

Mr. Kanton: It may be a legal distinction, but I just wanted to clarify that point for the record, Mr. Barnes.

* * * * *

[R. p. 1224]

Re-direct Examination

By Mr. Tucker:

Q. Mr. Barnes, has the management of Engineers given any consideration to the acquisition of any additional property in the area of the Virginia Company?

A. Well, I do not know what you mean by "have they given any consideration". At one time we considered the possibility of acquiring Carolina Power & Light Company, for example.

Q. Well, would you tell us why you did not do it?

A. Yes. Because we felt that in all probability the Commission would not permit such an acquisition.

Mr. Kanton: Where is that property located, Mr. Barnes?

The Witness: It is in North and South Carolina adjacent to the Virginia Company. We have an interconnection there with the Carolina Power & Light.

Donald C. Barnes—Re-direct Examination (Cont'd)

By Mr. Tucker:

Q. And there has been some testimony brought out on cross-examination—I think by Mr. Condon of Mr. Benjamin—with respect to the fact that the North American Company, in connection with its preferred stock, was either arranging to or had provided for its redemption on a voluntary redemption premium over $100 per share; do you recall that testimony?

A. Yes, I do recall it.

Q. Have you any information that would differentiate that picture from the situation in which you find yourself?

A. Yes. It is my understanding that the North American Company is not in a position to go through forthwith with a liquidation in compliance with the Section 11 provisions. They have certain litigation pending which I understand prevents them from adopting an 11(e) plan to comply with the divestment requirements of Section 11. It is quite conceivable that they have figured that during the interval between now and the time when such a plan could be made effective, they will save more in the difference between their dividend charges and the interest charges on the security on the note to be issued, to provide the cash to retire their preferred stock, sufficient to more than pay the amount of the premium on voluntary call.

Q. Now at transcript page 529, you gave some testimony with respect to conversations that you had with stockholders of Engineers with reference to their feeling toward the present plan, or substantially the present plan. I recall that, among others, you spoke about conferring with Mr. James Orr. Do you recall that testimony?

A. I do recall it.

Q. Is Mr. Orr connected with some investment company?

A. Mr. Orr is president of Railway & Light Securities Company.

Q. Have you, since the time that that testimony was given, checked with Mr. Orr to see whether his interest is to some extent at least in preferred stock?

Donald C. Barnes—Re-direct Examination (Cont'd)

A. Yes. Railway & Light Securities Company own approximately 4,000 shares of Engineers preferred stock.

Mr. Kanton: How much common do they own, Mr. Barnes?

The Witness: Railway & Light Securities Company do not own any common stock, but I think it is fair to say that Mr. Orr is an investment counsellor and many of his clients have very substantial interests in Engineers common stock.

By Mr. Tucker:

Q. Now after you sent your reply to Mr. Kellogg—and by "your reply," I mean preferred stock Exhibit 12-A—did you have some conversations with Mr. Kellogg with reference to that general subject matter?

A. Yes, we did.

Q. And at that time, in the light of his letter and your reply, did he state whether he was satisfied or not satisfied with the plan?

A. He stated that he was entirely satisfied with it, withdrew all his objections, and when the plan came up for action at the September meeting, he voted for it.

Q. Now, Mr. Barnes, could you, without going into too much detail, give us your idea as to the value of the Virginia common stock at the present time; and I ask you this question in the light of some questions that Mr. Condon asked with reference to—if I may use the expression—the protection of the preferred stockholders?

Mr. Condon: Is this question restricted to that point, or are we going into the question of the valuation of Virginia common stock? Is this an over-all question as predicated and directed solely to the matter of security and protection, or is this a detailed valuation question with respect to the Virginia stock as an asset of Engineers Public Service?

Mr. Tucker: Yes, the purpose of it is to develop what Mr. Barnes' idea of the value of that is at the present moment, and what the market analysts have found to be

the value at the moment, or recently. Have you any objection?

Mr. Condon: Well, I do not know until I hear the testimony.

The Witness: As a preliminary to that, I think it might be of interest to put in the record values that have been published by various security houses representing analyses by their investment analysts. And I will read off the valuations that have come to our attention: The latest one was one dated December 3, 1945 by Paine, Webber, Jackson & Curtis, in which they found what they call a low valuation of $78,015,000, and a high valuation of $88,417,000. The next is a valuation published in Barrons National Business and Financial Weekly, under date of September 17th, in which they place a valuation of $75,000,000.

The Examiner: That is in 1945, I assume?

The Witness: That was 1945. And all of these are in the year 1945.

The next is the valuation published by Argus Research, September 14th, in the amount of $57,270,000.

The next is the valuation published by Security Supervisors on the 9th of August, and the amount was $70,000,000.

The next is published by Duff & Phelps on July 5th, and the amount of that valuation was $70,000,000.

The next is a valuation by Ira Haupt & Company, published April 1945, the valuation on a low basis being $46,000,000, and on a high basis $47,200,000.

Mr. Kanton: What was that date, Mr. Barnes?

Mr. Condon: That was April 30th.

The Witness: The next was a valuation published by Bear, Stearns & Company April 20th, in which the low valuation was placed at $62,700,000, and the high valuation at $76,000,000.

From my knowledge of the Virginia property and my knowledge of its earnings performance, I am prepared to state that Virginia Electric & Power Company common stock owned by Engineers Public Service Company is worth not less than $65,000,000.

Donald C. Barnes—Re-direct Examination (Cont'd)

Mr. Tucker: I have no further questions.

The Examiner: Any further cross-examination?

(Discussion off the record.)

The Witness: Mr. Kanton has called my attention to a discrepancy in the valuation as found by Ira Haupt & Company. The valuation should be, instead of $46,000,000 for the low and $47,200,000 for the high, $70,000,000 for the low and $72,000,000 for the high. The error came about in computation that I made last night in using the earnings per share of Virginia stock instead of the earnings per share of Engineers stock, equivalent shares of Engineers stock.

Mr. Kanton: Mr. Barnes, you put a lower limit on your estimate for the Virginia stock of 65,000,000. What would your upper limit be, sir?

The Witness: I do not care to put an upper limit on it. I have not gone to the extent of attempting to determine that.

Mr. Kanton: If someone were to offer you or the management or the Board of Directors say $90,000,000 for Virginia, do you think it possible that consideration would be given to such an offer, and that the properties would be sold?

The Witness: I do not like to make a commitment offhand, but I would be interested in getting such an offer if you know of anybody that wants to make it.

Mr. Kanton: Well, would you be interested in receiving an offer of $30,000,000 for the Gulf property?

The Witness: No, I do not think I would.

Mr. Kanton: Would you be interested in an offer of $35,000,000 for the Gulf property?

The Witness: I would be interested in getting such an offer.

Mr. Kanton: What offer would you be interested in receiving for the El Paso property generally?

The Witness: Well, we entered into a contract to sell that property to the City of El Paso for an amount that meant a little over $9,000,000, as I recall it, to Engineers.

Donald C. Barnes—Re-cross Examination

Mr. Kanton: So on an over all basis for any of these operating properties, if you or the management or the Board of Directors received an offer which you considered to be fair and reasonable, there is a good possibility that such an offer would or could be accepted for any of the three operating properties?

The Witness: I do not believe that the directors would be disposed to sell them, unless it was an unreasonable offer.

Mr. Kanton: You mean unreasonably high?

The Witness: That is right.

Mr. Kanton: Above what they were worth?

The Witness: That is right.

Mr. Kanton: But if they were reasonably high and you could receive a good margin of profit over what the properties originally cost, you would not sell?

The Witness: That is right.

The Examiner: Any further questions?

Mr. Condon?

[R. p. 1231.]

Re-Cross Examination

By Mr. Condon:

Q. I just wanted to ask one or two questions, Mr. Barnes.

Is it fair to say and will the record indicate that you have been physically present in the hearing room at all of the times Mr. Benjamin was testifying, both under examination by Kanton, Mr. Scheetz, and myself, with the possible exception of a very brief interlude when you might have been getting a drink of water; and that you are aware of his testimony given under such examination?

A. That is correct, Mr. Condon.

* * * * *

Hearing on January 30, 1946.

* * * * *

[R. p. 1273]

Mr. Tucker: At page 1152 of the transcript, Exhibit No. 68 was reserved for an opinion of my firm on Federal taxes. This was in supplement to a previous exhibit which had been submitted. It seems that there were two such opinions previously filed as Exhibit 15-A and 15-B, and for this supplement opinion there was reserved Exhibit No. 68, and I now offer it.

The Examiner: Hearing no objection, that will be received as Applicant's Exhibit No. 68.

(Applicant's Exhibit No. 68 was received in evidence.)

* * * * *

[R. p. 1274]

J. C. LEIGHTON

was recalled as a witness and, having been previously sworn, testified as follows:

Direct Examination

By Mr. Tucker:

Q. Mr. Leighton, have you previously testified in these proceedings?

A. I have.

Q. There has been testimony in these proceedings to the effect that since the filing on September 10, 1945, of the Engineers Plan pursuant to Section 11(e) of the Public Utility Holding Company Act of 1935 for divestment of assets and related matters, Virginia Electric and Power Company paid off $5,100,000 principal amount of its notes payable and that the proposed payment of $1,342,000 to certain former transportation employees of Virginia will not be made as contemplated. Also, since the filing of the aforesaid Plan, Virginia has elected to terminate the em-

gency period with respect to emergency facilities as of September 30, 1945, following the proclamation issued September 29, 1945, by the President of the United States ending the emergency period which election will result in computing the amortization deduction over a shortened period. Do you have with you a statement showing the estimated effect of these items on the financial condition of Engineers and its subsidiaries?

A. Yes. I have a statement entitled Engineers Public Service Company (Incorporated) and Subsidiary Companies Pro Forma Balance Sheet Consolidated as at June 30, 1945, Giving Estimated Effect to (A) Sale of Investment in The Western Public Service Company, Operations for the period July 1 to December 31, 1945 of Engineers and Virginia, Tax Adjustments by Virginia Resulting from Loss Claimed on Sale of Transportation Properties and Accelerated Amortization of War Facilities due to Termination of War Emergency Period, Payment on December 31, 1945 of $5,100,000 Notes Payable of Virginia Prior to Maturity and Miscellaneous Adjustments, and (B) the Consummation of Parts I and II of the Plan. This statement is a revision of Schedule A of Applicant's Exhibit No. 9 and also a revision of the explanatory notes contained on Schedule B of Applicant's Exhibit No. 7 and gives effect to the items you have mentioned.

Q. Was this statement prepared under your supervision and do you believe it to be correct?

A. It was so prepared and I believe it to be correct.

Mr. Tucker: At this time I desire to offer the statement to which the witness has referred. It will be Exhibit, I understand, No. 71.

The Examiner: Is there any objection? Hearing no objection, that will be received as Applicant's Exhibit No. 71.

(Applicant's Exhibit No. 71 was received in evidence.)

By Mr. Tucker:

Q. Will you explain briefly the changes in the accounts between those shown on Applicant's Exhibit No. 71 and the similar accounts shown on Schedule A of Applicant's Exhibit No. 9?

A. On the assets side of balance sheet cash in banks and on hand shows a decrease of $3,758,000. This difference represents the payment of $5,100,000 on the Virginia notes and the retention of $1,342,000 which Virginia had contemplated paying out in December, 1945 under a proposed plan for the purchase of pension annuities for certain former transportation employees of Virginia which plan was abandoned because of an unfavorable ruling by the Treasury Department in respect of the treatment for tax purposes of the cost of the annuities. Other deferred debits increased $1,986,093 representing (1) claim for refund in the amount of $1,009,750 filed with the United States Treasury Department equal to payment made on March 15, 1945 at the time tentative 1944 consolidated returns of Engineers and affiliated corporations were filed. I have already testified in this case that the final consolidated returns for 1944 filed in August 1945 did not show any excess profits tax or income tax due from the affiliated group—and (2) claim for refund in the amount of $976,343 to be filed with the Treasury Department covering over-payment of Federal income taxes for prior years due to the increased amortization deductions allowable with respect to emergency facilities resulting from the shortened emergency period.

On the liabilities side notes payable shows a decrease of $5,100,000 as already explained. Taxes accrued shows a decrease of $1,883,055. This decrease represents a net reduction in estimated Federal income tax liability for 1945 consisting of reductions in tax of $3,030,465 comprising (1) $2,769,677 (including $39,021 of savings from filing consolidated returns) due to the increased amortization deduction in respect of emergency facilities because of the shortened amortization period and (2) $260,788 representing

additional savings from filing consolidated returns, less an increase in tax of $1,147,410 representing the tax reduction applicable to the cost of purchasing pension annuities which would have obtained had the proposed plan for the purchase of such pension annuity contracts for certain former transportation employees of Virginia been consummated.

Other current liabilities decreased $127,764 due to reduction in estimated Federal taxes applicable to the operations of Citizens Rapid Transit Corporation, the capital stock of which was sold by Virginia on March 31, 1945.

Other reserves increased $194,590 due to abandonment of the proposed plan for purchase of pension annuities for certain former transportation employees of Virginia estimated to have cost $1,342,000 with an offsetting reduction in Federal income taxes of $1,147,410.

Earned surplus since May 31, 1938, parent company portion shows an increase of $5,133,188. The items making up this increase are as previously explained: (1) a reduction of $3,030,465 in the estimated Federal income tax liability for the year 1945; plus (2) refund claims aggregating $1,986,093 included in Other Deferred Debits for overpayment of prior years Federal income taxes; plus (3) $127,764 representing an adjustment of the provision included in Other Current Liabilities in Schedule A of Applicant's Exhibit 9 for Federal income taxes of Citizens' Rapid Transit Corporation; less $11,134 representing the adjustment for minority interest in respect of the foregoing items.

This does, I believe, explain the increases and decreases between Applicant's Exhibit No. 71 and Schedule A of Applicant's Exhibit No. 9.

Q. Have you any further statement you would like to make?

A. Yes, I have. I would like to refer to Page 499 of the transcript and make a correction in one statement that was made by Mr. S. E. Ratcliffe, an Assistant Treasurer of the Company, while he was testifying in this proceeding. Mr.

Ratcliffe was under cross-examination by Mr. Condon and the following questions and answers were submitted:

"Q. What part of the loss would be included in connection with the sale of Gulf States stock?

"A. Whatever the tax gain is that results from the sale of the Gulf State stock.

"Q. Do you know what that is and have you any idea?

"A. It is substantially the credit to Surplus in these entries.

"Approximately?

"A. That is true.

"Q. Do you know how much it is approximately? Approximately $2,000,000?

"A. That is correct."

We have had occasion since this testimony to refer to certain of the Federal income tax returns of Engineers Public Service Company in which are detailed the tax cost to Engineers of the 280,000 shares of common stock of Gulf States Utilities Company. This tax cost is $12,839,697.88 compared with the book cost of $19,914,346.83. Accordingly while the credit to Earned Surplus as set forth on Applicant's Exhibit No. 71, which I have just entered into the record, is $2,050,285, the Federal tax gain would be slightly in excess of $9,000,000 rather than the $2,000,000 used by Mr. Ratcliffe in his answer to Mr. Condon. This substantial change in the tax cost from that originally used by Mr. Ratcliffe is brought about by the fact that in January, 1938 under a plan of liquidation the assets of Eastern Texas Electric Company (Delaware) were transferred to Engineers Public Service Company as a non-taxable transaction. Therefore, for Federal income tax purposes the cost to Eastern Texas Electric Company (Delaware) of its investment in common stock of Gulf States Utilities Company, plus additional contributions made by Engineers in August, 1938, is the real tax cost at the present time to Engineers Public Service Company. Mr. Ratcliffe is in Richmond,

Virginia, at the present time working on details which have to do with filing the 1945 Federal income tax return for Engineers Public Service Company and affiliated Companies, and is, therefore, not available to make this correction in his testimony. He is in agreement with the figures that I have now submitted as being the tax cost of the Gulf States Utilities Company common stock to Engineers.

Mr. Tucker: That is all.

The Examiner: Any cross-examination, Mr. Kanton?

Mr. Kanton: I have none at this time, Mr. Examiner.

Mr. Condon: I have a question or two.

Cross Examination

By Mr. Condon:

Q. Mr. Leighton, will you be kind enough to state briefly for the record the circumstances of the error in Mr. Ratcliffe's testimony being drawn to the attention of the Engineers' management?

A. Yes, sir; I would be glad to. Mr. Martenson of Arthur Andersen & Company telephoned me at your request as to the tax cost of Gulf States stock, El Paso stock and Virginia Electric Power Company stock to Engineers. In looking at that tax cost in the record, I ran across this difference between what Mr. Ratcliffe put in and what I now have submitted.

Q. You understood that the firm of Arthur Andersen & Company was acting for the preferred stockholders?

A. What is that?

Q. You understood that Arthur Andersen & Company were advising the preferred stockholders?

A. I surely did.

Q. In order to complete the record in connection with your amendment to Mr. Ratcliffe's testimony, I hand you pages 499 and 500 of the record and ask you if you would continue as though you were Mr. Ratcliffe and make whatever changes you feel to be appropriate in his answers with

respect to the amount of net tax savings that would result from increasing the gain from $2,000,000 to $9,000,000.

A. The record shows that Mr. Condon asked this question:

"Q. Now, what will the tax savings be? Will that be the amount?

"A. It would be 25 percent of $2,000,000."

The correct answer should have been "25 percent of $9,000,000."

The question is: "Using $9,000,000 as a base, the net tax savings would be approximately $2,250,000," instead of $500,000.

Q. Other than that change, Mr. Leighton, do you feel with that phase of the transaction the record is now complete?

A. Well, down below you raise the question as to what amount should be applied to the $31,000,000, and of course, instead of $2,000,000 that should be $9,000,000, leaving $22,000,000 still available for capital gains.

Q. By "still available" you mean there will be a net loss carry-over of approximately $22,000,000 that could be used and employed during the next five years as an offset against capital gains.

A. That is correct.

Mr. Tucker: You said in answer to Mr. Condon's question it would be five years which it would be carried back. Doesn't that five years run from some time in 1944, so that from now it is approximately three years?

The Witness: Of course it is five years from the date the transaction took place.

Mr. Tucker: Speaking from now it is three and not five years?

The Witness: That is correct.

Mr. Tucker: I have no further questions.

[R. p. 1287]

RICHARD N. BENJAMIN,

was recalled as a witness and, having been previously sworn, testified further as follows:

Cross Examination

By Mr. Condon:

Q. Mr. Benjamin, do you recall being interrogated by me with respect to the minutes of a meeting of the board of directors of Engineers Public Service Company that took place on or about February 2, 1945?

A. Yes, I remember.

Q. I hand you a memorandum supplied to me by Mr. Streeter, which refers to certain happenings at the meeting of your board held on January 24, 1946, and ask you if you will state as briefly as you can for the record, either by reference to this memorandum which I now hand you or from memory, what action, if any, was taken by the board on that day with respect to the resolutions of the board on February 2, 1945?

A. At this meeting held on January 24, 1946, the directors were reminded of resolutions adopted at the February 2 meeting to which you refer and also the February 27 meeting with reference to the use of certain cash of the company in connection with, so far as the February 2 meeting was concerned, a proposed pay-down on the preferred stock, and in connection with the February 27 meeting, proposed plan to retire shares of preferred stock at $100. These resolutions had never been formally rescinded from the record, although the funds contemplated to be used for this purpose were under the present plan to be used otherwise. Therefore it was suggested that the resolutions be formally rescinded from the record in order to clarify the record on this point, and that action was taken at this meeting.

Mr. Tucker: When you say "this meeting", what meeting?

Richard N. Benjamin—Cross Examination (Cont'd)

The Witness: The January 24 meeting.

By Mr. Condon:

Q. Would you state what amount of cash has been available for use by the Engineers Company from February 2, 1945 date pursuant to that resolution down to the 24th of January, 1946?

A. Well, there has been a substantial amount of cash, much of which came from the sale of the Savannah Company securities. I can't recall at the moment what the date of the sale of that Savannah stock was.

Q. About the winter or early spring of 1945, in the amount of $3,300,000—would that be the approximate sum?

A. Yes, that is about right.

Mr. Scheetz: When you say the late winter in 1945, you mean the end of the calendar year 1945?

Mr. Condon: I meant the late winter of 1944-1945, or, to-wit, in or about the month of March 1945, Mr. Benjamin.

The Witness: That is what I understood you to mean.

By Mr. Condon:

Q. What amount of cash, if you recall, in round figures, was available on or about February 2, 1945, which date preceded the receipt of the avails from the sale of Savannah?

A. I think I could get that information if I could look at the meeting folder for that date.

Q. Please do.

A. At the end of December 1944, Engineers had $3,762,239 in cash and $2,200,000 in temporary cash investments.

Q. Would that approximate $6,000,000 shy a few thousand dollars?

A. That's right.

Q. Then you would add to that this $3,300,000 or $3,400,000 from the Savannah sale?

A. That's right.

Q. And that increased the amount, say, as of March 1945 to something like $9,000,000?

A. That is correct.

Q. What is the cash amount available today, Mr. Benjamin?

A. Well, including the proceeds which we expect to receive tomorrow from the Western Public Service Company, we will have approximately, in round figures, $14,000,000 will be available. At the end of December 1945 Engineers had, in round figures, $6,000,000 of cash and $7,150,000 in temporary cash investments, and we expect to get approximately $1,500,000 from the Western Public Service, so that we would have in excess of $14,000,000.

Q. Have you got the consolidated figure for your cash?

A. I do not know the answer to that question, but we will attempt to get the information and furnish it to you after the noon recess.

Q. Was there anything to prevent the Engineers using the $9,000,000 that it had, say, from early March 1945 on the pay-down plan that was anticipated in general would be carried out by the Board resolutions of February 2 and February 27, 1945?

A. No, I think that could have been accomplished by the filing of an appropriate plan with the Commission, Mr. Condon.

Q. Mr. Benjamin, I hand you a copy of a memorandum dated May 22, 1945, captioned "Engineers Public Service Company, Plan for Divestment of Gulf States Utility Company and El Paso Electric Company and liquidation of Engineers Public Service Company," and ask your if you would examine that and tell me its origin in a general way?

A. This memorandum was prepared in our office for the purpose of setting forth the so-called preference common plan that we have discussed before.

Q. Had it ever been considered by the directors?

A. There was a meeting of the Board of Directors on May 24, 1945, so that this draft was prepared prior to that.

I don't believe that this plan had been discussed with the Board prior to that, but it might have been discussed generally as one of the types of plans.

Q. Isn't that a fact, to your best recollection, Mr. Benjamin, it was?

A. That's right.

Mr. Condon: I would like to have the document identified and request that it be marked Preferred Stockholders' Exhibit No. 20 for identification.

The Examiner: Let it be so marked.

(The document referred to is marked as Preferred Stockholders' Exhibit No. 20 for identification.)

By Mr. Condon:

Q. Mr. Benjamin, would you take Preferred Stockholders' Exhibit 20 for identification and state you submitted that to me at my request from the files of the company?

A. Yes, I did.

Q. Would you examine the first page of that, and I ask you to run through the arithmetic very quickly of the provision made for each share of the Engineers preferred stock under the proposal being considered then, and ask you if it is not the fact that a sum slightly in excess of $100 was provided for each share of the preferred stock of Engineers Public Service?

A. This proposed plan provided for the payment of $35 in cash for each share of Engineers preferred stock, and the delivery of two-fifths of a share of no par Engineers preferred which would be the equivalent of $40 in capital account; two-fifths of a share of $50 Gulf States preference common, which would be $20 in par; and one-tenth of a share of $50 par of El Paso preference common, which would be an additional $5 par. That total is $100.

Now, in addition to that, there was considered at that time as a means of simplifying the preference common stock of these companies in lieu of having a $5, $5.50, and $6

preference common stock, or the equivalent of that, an adjustment for dividends on the $5.50 stock and the $6 stock. In the case of the $5.50 stock, each share would get 87½ cents in cash and each share of the $6 stock would get $1.75 in cash.

I don't recall at the moment the detail computation of how those figures were arrived at, but that was the purpose of those adjustments.

Q. Mr. Benjamin, I am not quite clear, and I wonder if you will help me. You say this was considered as a means of simplifying the situation with regard to the common stock or the preference common?

A. No sir, simplifying the situation with respect to the preference common stock that was to go to the preferred stockholders. In other words, the new preference common stock would bear a dividend rate of 5 per cent per annum. Now, it would not change the dividend rights of the $5 stock to get a 5 per cent dividend stock in return, but it would change the rights of the $5.50 and the $6 to get a 5 per cent; therefore, the thought at the time was that if a cash adjustment could be given at the time the plan went into effect to equalize that dividend, that it would make it unnecessary to have a $5, a $5.50, and a $6 preference common stock.

Q. Well, you say to equalize—do you mean compensate?

A. That's right. In other words, it fit in with the contemplated length of time that it was thought that it would take to pay out this preference common stock

By Mr. Kanton:

Q. What contemplated time was that, Mr. Benjamin?

A. I don't recall the exact time. I think it was in the neighborhood of seven or eight years.

Q. To pay off the preferred stock?

A. To pay off the preference common stocks and preferred stock.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. You thought a differential of 87½ cents for the $5.50 preferred and $1.75 for the $6 preferred is to take care of these particular preferred series during the seven or eight-year period? Is that the way it was determined?

A. That's right; that is the way it was determined.

Q. Do you have any figures before you to show how that determination was made?

Mr. Tucker: Mr. Examiner, if this kind of examination is going to take a very long time, it would seem to me that I ought to object to it. I don't see the relevancy of prior plans to the fairness and equitableness of the plan that is before this Commission at this time. This record shows that they were turning out plans up there in Engineers' office with the productivity of rabbits, and if we are going to take each one of them and discuss it as though it were an issue in this case, it would seem to me we have got an interminable time-consuming element here. I would like to ask Mr. Condon what relevancy he thinks this has to the fairness of the present plan.

Mr. Condon: Mr. Tucker, I have examined a good many drafts of these plans——

Mr. Tucker: So have I.

Mr. Condon: Not quite as numerous as the descendants of this rabbit to which you have made reference; but I have selected from this one two points that I thought material to this inquiry. First, as to this point, it is the only instance that I have found where provision was made by the Engineers Board for payment to the preferred stock in excess of $100. That is point 1.

Mr. Tucker: Wait a minute. You say reference made by Engineers Board. It just isn't true.

Mr. Condon: Mr. Tucker, I didn't interrupt you. I would like to complete my statement, if I may. There is another point that I think I would like to call Mr. Benjamin's attention, because it appears to be slightly at variance with what I understood to be his testimony, and I am sure he would like to clarify it. If you have something to say about me

being in error, I feel you might address your remarks to the Examiner and let me have an opportunity to be heard on the record.

Mr. Tucker: We can use up more time than you use up asking the questions, and I am only interested in speeding the thing up and keeping it relevant. Let us see how long it goes on. I withdraw my objection for the moment.

Mr. Kanton: There is a pending question, Mr. Examiner, which Mr. Benjamin, during the discussion between Mr. Tucker and Mr. Condon, advised me that he can give me the answer at this time.

The Examiner: All right, Mr. Benjamin.

The Witness: Mr. Kanton asked what the basis was for arriving at the $1.75. To the best of my recollection at that time it was contemplated that it would take about seven years to pay out the preference common stock. The difference between the $5 rate and the $6 rate is $1 per year, or a total of $7. The percent of the amount proposed to be received by the Engineers preferred stockholder in Gulf States preference common and El Paso preference common was 25 per cent. In other words, they were to get $25 of the total $100 in Gulf States preference common and El Paso preference common. One-fourth of $7 is $1.75. This gave no effect to the fact that this preference common stock would be paid down gradually over this period. In other words, that would be the full differential of the dividend rate over a seven-year period.

By Mr. Kanton:

Q. Let me see if I understand you: At the time this plan was contemplated here and it was to be set up with these preference common securities fom the different subsidiary operating companies, would the $6 preferred stock at the beginning receive a 6 per cent return as provided in its original contract as a preferred stockholder of Engineers?

A. The $6 preferred stockholder would get part cash, and as to that cash there would be no further return.

Richard N. Benjamin—Cross Examination (Cont'd)

Q. Did you assume a 6 per cent return on that cash?

A. I didn't assume any return on the cash because we were paying them in cash.

Q. All right. To that extent the 6 per cent dividend would not be paid?

A. That's right.

Q. Will you continue, please?

A. Then he would get $40 in Engineers preferred which would have a 6 per cent dividend on it. He would get $25 in Gulf and El Paso preference common, which would have a 5 per cent rate, and the $1.75 was the suggested amount to compensate him for the difference on that $25.

Q. Just $1.75 in cash per year?

A. No, one payment of $1.75. In other words, he would get an immediate payment of $1.75, whereas if he received a 6 per cent stock, he would have gotten $1. He would have gotten $1.75 over the seven-year period and longer, if the stock wasn't paid out, but if the guess was right, about seven years, why then he would get $1.75 over the period. In other words, he would get the $1.75 at the beginning of the period instead of over the period.

Q. If the guess was wrong, he wouldn't be getting——

A. That's right. Bear in mind, Mr. Kanton, this was just a suggestion and was put down as such. It never was discussed in any great detail with anyone, so far as I know.

Q. Would you say of all the plans that were considered by the Board of Directors of Engineers, this is the only one that contemplated and gave recognition to a differential between the three series of preferred stocks?

The Examiner: Just a moment. Read that question.

(The question is read.)

The Examiner: As I recall Mr. Benjamin's testimony, he has not testified that this plan was ever considered by the Board. That is my recollection of his testimony.

Mr. Kanton: Well, if that is correct, I will amend my question to the extent of the plan being considered by the management of Engineers.

The Witness: I think that is right. I don't recall any.

Richard N. Benjamin—Cross Examination (Cont'd)

By Mr. Condon:

Q. Is it a fact, Mr. Benjamin, that the present plan gives reflection to no such element?

A. That is correct.

Q. Mr. Benjamin, I haven't checked your testimony in detail, but would you let me have Exhibit 20 for identification.

Do you recall being asked whether or not under the preference common plan the preferred stockholders were to have any rights to vote, and I think your answer was that your recollection was that they did not. Do you recall being asked a question like that in substance and making a comparable answer in effect?

A. Well, I don't recall that question. Mr. Kanton advises me that I made that answer to him, and therefore I must have made it.

Q. I might state that that accords with my recollection of your testimony as well.

Would you look at page 2 of this Exhibit 20 for identification, which I hand you, and see whether that refreshes your memory with respect to that subject matter?

A. Yes, this contains a statement that each share of preference common stock and common stock would have one vote per share.

Q. Is it fair to say that it was contemplated that that right to vote was to continue during this seven-year period that you say was estimated to liquidate out these preferred shares?

A. That is right.

Q. Is it also fair to state that your present plan gives no reflection to any rights on the part of the preferred to vote during any period subsequent to the filing of your proposed certification of dissolution?

A. That's right.

Richard N. Benjamin—Cross Examination (Cont'd)

[R. p. 1314]

Mr. Condon: I offer in evidence the release of the Securities and Exchange Commission No. 5738, Holding Company Act of 1935, marked for release Friday, April 20, 1945, and the order of this Commission with respect thereto, dated the 18th of April, 1945, captioned "In the Matters of Engineers Public Service Company, File No. 70-1034 and Donner Estates, Incorporated, File No. 31-532," being the findings and opinions and order of this Commission in that matter.

* * * * *

[R. p. 1318]

The Examiner: Mr. Tucker, I will overrule your objection and admit this as Preferred Stockholders Exhibit No. 24 and allow you an exception if you so wish.

Mr. Tucker: I would like an exception.

* * * * *

[R. p. 1319] Mr. Condon: I offer Holding Company Act Release No. 1945 for release February 29, 1940, in the matter of Engineers Public Service Company and subsidiary companies.

The Examiner: That involves what?

Mr. Condon: That involves hearing pursuant to Section 11(b)(1) of the Act with respect to Engineers, El Paso, Western, and various other subsidiaries, and represents the release of this Commission bearing date 28th of February, 1940. It shows the location of the properties and other matters of historical character.

Mr. Tucker: May I see it, please?

Mr. Condon: Yes.

Mr. Tucker: I think that could have been more accurately described as a notice and order for hearing under Section 11(b)(1) case that was brought by the Commission.

The Examiner: Do you have any objection, Mr. Tucker?

Mr. Tucker: I think we will waste more time and probably do more harm as far as expedition is concerned, so I don't object.

Richard N. Benjamin—Cross Examination (Cont'd).

The Examiner: That will be received as Preferred Stockholders Exhibit No. 25.

(Preferred Stockholders' Exhibit No. 25 is received in evidence.)

By Mr. Condon:

Q. Mr. Benjamin, I hand you Preferred Stockholders Exhibit No. 13 for identification, and ask you if that is the supplementary legal opinion rendered by Mr. Tucker on or about December 11, 1945, to the Board of Directors of Engineers?

A. Yes, it is.

Mr. Condon: I offer that in evidence not as proof of any of the facts set forth therein or substantiation of his conclusions, but merely to show the opinion rendered by Mr. Tucker upon which the board acted on or about that time.

The Examiner: Any objection?

Mr. Tucker: No objection.

The Examiner: That will be received as Preferred Stockholders Exhibit No. 13.

(Preferred Stockholders' Exhibit No. 13 is received in evidence.)

By Mr. Condon:

Q. I hand you Preferred Stockholders' Exhibit No. 18 for identification, and ask you if it is not a fact that this is one of a series of documents referred to by Mr. Barnes in his testimony as having been submitted to the board on or about May, 1945?

A. That is right.

Mr. Condon: I offer the fourth sheet of that document in evidence with leave to any of the other counsel to offer any of the other remaining portions of it if they so desire.

Mr. Tucker: I wouldn't have any objection if you put the whole business in. I object to just Page 4, because I think it is meaningless.

Mr. Condon: May the entire document be received and marked?

The Examiner: I understand there is no objection to that, and it will be received as Preferred Stockholders Exhibit No. 18.

(Preferred Stockholders' Exhibit No. 18 is received in evidence.)

Mr. Condon: Mr. Examiner, I would like to respectfully call your attention to the fact that on the fourth sheet of that exhibit No. 18, reference is made to so-called analyses or appraisals of three firms with respect to the securities of the Engineers system.

By Mr. Condon:

Q. Mr. Benjamin, I hand you herewith from the files of the Engineers Company the following memoranda, being reports or appraisals or estimates made by financial houses referring to the stock of the Engineers and subsidiaries as follows:

From Ira Haupt & Company, bearing date April, 1945, captioned "Engineers Public Service Company, Post-war Potentialities" and ask you if that is from the files of the Engineers Company.

A. Yes, it is.

Mr. Condon: May that be marked Preferred Stockholders' Exhibit 26-A?

The Examiner: Let it be marked.

(The document above referred to was marked Preferred Stockholders' Exhibit No. 26-A for identification.)

By Mr. Condon:

Q. I hand you an appraisal dated May 14, 1945, to which is appended appraisal dated May, 1945, captioned "An appraisal of Engineers Public Service", of preferred

stock and common stock, and ask you if that came from the files of Engineers likewise?

A. I am not sure whether this one came from our files, but it appears to be the same as one used in our office prior to the May 24 meeting.

Q. Mr. Benjamin, I draw your attention to Preferred Stockholders Exhibit 18, more particularly page 4, wherein it appears that your Board of Directors considered estimates of independent analysts Carl M. Loeb, Rhoades & Company, for Virginia, Gulf States, and El Paso. I ask you to compare this exhibit with the exhibit marked for idenfification and tell us if that is not the analysis for study referred to in the exhibit?

A. I am sure it is.

The Examiner: You have not had it marked for identification.

Mr. Condon: I ask that it be marked as Exhibit 26-B for identification.

The Examiner: It will be so marked as Preferred Stockholders' Exhibit 26-B.

(Preferred Stockholders' Exhibit 26-B was marked for identification.)

Mr. Tucker: You are offering these reports as marked for identification, these appraisals by independent houses, and not as evidence?

Mr. Condon: And for no other purpose. I plan after these are identified to show these actual analyses by the three houses which are referred to in this Exhibit 18 and to supplement them by additional analyses and to offer the group for specific and limited purpose not of proof of any of the facts, not as to the correctness of any of the conclusions, but for the specific and limited idea of showing the estimates of independent analysts and with regard to three of them apparently before the Board of Directors in May, 1945.

The Examiner: Let us get the third one in and then you can make your offer.

By Mr. Condon:

Q. I hand you, Mr. Benjamin, an analysis of Duff & Phelps, captioned "Bulletin, Engineers Public Service Company, date, July 5, 1945", and ask you if that came from your files?

A. Yes, it did.

Mr. Condon: I ask that it be marked for identification as Preferred Stockholders Exhibit 26-C.

The Examiner: Let that be so marked.

(Preferred Stockholders Exhibit 26-C was marked for identification.)

By Mr. Condon:

Q. I ask you the same question with respect to an analysis of Engineers Public Service prepared by the Securities Supervisors, dated August 8, 1945.

A. Yes, this came from our files.

Mr. Condon: May it be marked for identification as Exhibit 26-D.

The Examiner: Let it be so marked.

(Preferred Stockholders Exhibit 26-D was marked for identification.)

By Mr. Condon:

Q. I hand you an analysis of Schwabacher & Company, undated, with a card attached which is physically affixed to it, bearing date of November, 1945, and ask you if that would approximately fix the time, and did that come from your files, or copied from your files?

A. Well, copies came from my files. I don't know about this card attached to it.

Q. Could you fix the time approximately?

A. November, 1945.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Condon: May I have that marked?

The Examiner: Let that be marked as Preferred Stockholders Exhibit 26-E, for identification.

(Preferred Stockholders Exhibit 26-E was marked for identification.)

By Mr. Condon:

Q. I hand you an analysis by Paine, Webber, Jackson & Curtis, dated December 3, 1945, and ask you the same question with respect to it.

A. The answer is the same. The date on this is December 3, 1945.

Mr. Condon: May that be marked for identification?

The Examiner: Let that be marked for identification as Preferred Stockholders Exhibit 26-F.

(Preferred Stockholders 26-F was marked for identification.)

By Mr. Condon:

Q. I hand you an analysis of Duff & Phelps on Engineers Public Service dated January 16, 1946.

A. Yes, I furnished that to you this morning.

Mr. Condon: I ask that be marked for identification.

The Examiner: Let that be marked for identification as Preferred Stockholders Exhibit 26-G.

(Preferred Stockholders 26-G was marked for identification.)

By Mr. Condon:

Q. Mr. Benjamin, I hand you a preliminary report on Engineers Public Service Company common stock prepared by Bear, Stearns & Company, which bears the pencil legend April 20, 1945, and ask you the same questions with respect to it.

A. The answers are the same.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Condon: May that be marked for identification.

The Examiner: Let that be marked for identification as Preferred Stockholders Exhibit 26-H.

(Preferred Stockholders Exhibit 26-H was marked for identification.)

By Mr. Condon:

Q. Mr. Benjamin, I believe you identified among this group of documents for identification the estimates of the independent analysts, three in number, referred to on Preferred Stockholders Exhibit 18 in evidence, being the analysis of Carl M. Loeb, Rhoades & Company, Ira Haupt & Company, and Bear, Stearns & Company?

A. Yes.

Q. Are the other items not referred to thereon items that came from your files as representing material, estimates of independent analysts from the files of Engineers Public Service, and representing information in the possession of the management?

A. Yes.

Mr. Condon: I offer them in evidence for the limited and restricted purposes which I stated a moment ago and for no other reason.

The Examiner: Is there any objection?

Mr. Tucker: No objection. He says he offers them. I think he ought to identify them.

The Examiner: I assume, Mr. Condon means Preferred Stockholders Exhibits 26-A through 26-H, inclusive.

Mr. Tucker: No objection for the limited purpose mentioned.

Mr. Scheetz: Mr. Examiner, in matters where I have appeared for holding companies I have always taken the position that material of this kind should not be admitted because there is no opportunity to cross-examine the authors. In view of the testimony which has been given that this data was before the management of Engineers and the directors, if that is the testimony——

Mr. Tucker: Some of it at least.

Mr. Scheetz: —at least before the management, I particularly refer to some of them in Exhibit 18, I think they are relevant, but I would not like to be understood as reversing the position which I have taken and will continue to take as to such reports.

The Examiner: I understand there is no objection, and they will be received in the record as Preferred Stockholders Exhibits 26-A, 26-B, 26-C, 26-D, 26-E, 26-F, 26-G and 26-H, respectively.

(Preferred Stockholders Exhibits 26-A to 26-H, inclusive, were received in evidence.)

Mr. Tucker: Mr. Examiner, I suppose it is fundamental here that the management also recognizes the infirmities in these reports that you mentioned, that we have no basis of knowing how they arrived at them, no privilege of cross-examination. We don't know what material they used to get their answers from, and they are nothing more than and will be used for nothing more than street appraisals for what street appraisals usually would be used.

Mr. Condon: That is correct, Mr. Tucker.

My associate calls attention to the fact I omitted a supplement to the Carl M. Loeb, Rhoades & Company appraisal dated November 17, 1945. I do not know whether this was in the files of Engineers or not, but I would like to offer it in evidence for the limited and restricted purpose which I have stated and for no other reason.

Mr. Tucker: And which I have stated.

The Examiner: That will be received as Preferred Stockholders Exhibit 26-I.

(Preferred Stockholders Exhibit 26-I was received in evidence.)

The Examiner: The understanding is that all these exhibits are received for the limited purposes stated.

Richard N. Benjamin—Cross Examination (Cont'd)

Mr. Condon: Mr. Examiner, I have before me, and I will supply counsel with copies, data which has been prepared at my direction in my office by one of the junior attorneys from the Commercial & Financial Chronicle with respect to the low and high sales prices of the preferred stocks of the $5, $5.50, and $6 series, from September 10, 1945, down to the week ending January 14, 1946. This material prior to the date of September 10 is in evidence as one of the applicant's exhibits and this merely brings the data down to date. I believe it to be correct, and I offer it subject to verification and checking if there be any inaccuracies, which I will be very glad to correct.

Mr. Tucker: There is no objection to that.

The Examiner: That will be received as Preferred Stockholders Exhibit No. 27.

(Preferred Stockholders Exhibit 27 was received in evidence.)

* * * * *

[R. p. 1342]

RICHARD N. BENJAMIN,

previously sworn, resumed his testimony:

The Witness: Could I make a short statement first?

Mr. Condon asked me for some information this morning, and I now have it.

The amount of cash on hand in Engineers and its subsidiaries as of December 31, 1945, was $15,445,015. That includes the $1,500,000 cash expected to be received tomorrow from the sale of Western Public Service.

In addition, there were cash items of $10,069,400 or a total of $25,514,415.

* * * * *

[R. p. 1347]

RALPH E. BADGER,

called as a witness by and on behalf of the Preferred Stockholders, and having been first duly sworn, was examined and testified as follows:

Direct Examination

. . . . . .

[R. p. 1348] Mr. Condon: Mr. Examiner, I have before me a statement of Dr. Badger's with respect to his educational background, his professional activities, both in the pedagogical way as well as in a professional way as an author, investment adviser, his activities extending over a period of many years, appraising securities, with a list of cases in which he has appeared and testified or advised as an expert in various tribunals and in a general way outlining his qualifications as an expert.

In view of the concession, I offer this statement in evidence, with a copy to counsel, and ask that it be marked, reserving the right, however, if the occasion presents itself, to expand this very brief statement with respect to his background and qualifications.

That may not be necessary, but I wouldn't want to be foreclosed from so doing, and may that be marked as Preferred Stockholders' Exhibit 28 in evidence.

Mr. Tucker: No objection.

The Examiner: I understand that there is no objection and that will be received as Preferred Stockholders' Exhibit 28.

(Preferred Stockholders' Exhibit No. 28 is received in evidence.)

. . . . . .

[R. p. 1350] Q. Dr. Badger, were you on or about the 30th day of December, 1945, retained by me, as counsel for certain preferred stockholders, to make certain studies and analyses concerning the fair investment value or the going concern

value or the intrinsic value of the three series of preferred stocks of the Engineers Public Service Company?

A. I was.

Q. Were you requested by me to make your studies and analyses without regard to the Plan of Divestment of Engineers Public Service Company filed in these proceedings, under Section 11(b) of the Public Utility Holding Company Act of 1935?

A. I was.

Q. Have you examined certain exhibits received in evidence in these proceedings in connection with your studies?

A. Yes, sir.

Q. Is it the fact that the following Applicant's Exhibits were considered by you, to wit:

Applicant's Exhibits 1, 2, 3, 4, 9, 11, 12, 13, 14, 15, 26, 27, 28, 29, 30, 33, 37-A to 37-T, all inclusive, 38, 39, 47, 48, 49, 50, 51, 52, 53, 55, 56, 57, 58, 59, 60, 63, 65, 66 and 67,—and this morning, Applicant's Exhibit Number 71?

A. That is correct.

Q. Have you also examined, in connection with your studies, the joint merger agreement of Virginia Electric & Power Company and the Virginia Public Service Company, dated April 1, 1944, the fifth supplemental indenture, Virginia Electric & Power Company to the Chase National Bank, dated March 1, 1945?

Mr. Tucker: Could I ask you, Mr. Condon, are those last things that you have been talking about, the merger agreement, and so forth, are they exhibits?

Mr. Condon: No. You may recall that the extracts from the documents were offered in evidence, copied into the record physically by Mr. Benjamin at the time Mr. Benjamin was on the witness stand.

Mr. Tucker: Then it is the extracts that the Doctor is referring to, I assume?

Mr. Condon: Why, yes, and the entire document, and if you want it in evidence, we will be very glad to put it in evidence. I am not at all sure that it is necessary that there be admitted or received everything that Dr. Badger con-

sidered. I am having him identify the documents and if, on cross-examination, you feel you want anything, I am sure you will have the opportunity of developing that.

The Witness: I don't recall this, but these two I have examined.

Mr. Tucker: I think it would be well to get on the record what he is referring to.

Mr. Condon: That was 22, which was stricken from the question.

By Mr. Condon:

Q. By reference to your lists of data, what other records and documents and exhibits did you consider in connection with your studies?

A. Specifically I had available the annual reports of a number of the subsidiary companies of Engineers Public Service, Gulf States Utilities for the years 1933 to 1943, El Paso Electric Company for the years 1935 to 1944, reports of the Virginia Electric & Power Company for the years 1935 to 1944, annual reports of Puget Sound Power & Light for the years 1938 to 1941, annual reports of Western Public Service Company for the years 1936 to 1940, and a number of Securities and Exchange Commission releases.

Q. Would you identify those by release number?

A. Numbers 2897, 2791, 3230, 3245, 3845, 3796, 4255, 4114, 4559, 4997, 5499, 5568, 5738, 5814, 6176, 6258, 6280, and Release 5021.

Mr. Tucker: All of those relate to Engineers Public Service Company matters? Was Engineers Public Service Company a party to all of those releases?

The Witness: They in all cases did not refer to Engineers Public Service. Some of the releases referred to decisions in cases that had certain questions at issue that were in one degree or another comparable with the questions at issue in this case and I examined the decisions in those cases to ascertain whether or not there was any relationship

between the problem which I found to exist here in valuation and the problems that existed in those other cases.

By Mr. Condon:

Q. Now, Dr. Badger, is it a fact that there was supplied to you a complete and detailed list of all of the Applicant's exhibits received in evidence in this case?

A. There was supplied to me a list of the Applicant's exhibits received in evidence up to today, that is, at hearings up to today, and I was present today at the time subsequent exhibits, if any, have been received in evidence.

Q. Now, is it also the fact that you examined portions of the testimony of Mr. Benjamin and Mr. Barnes and certain extracts of the testimony explaining Applicant's Exhibits 62, 65, 66 and 67?

A. Yes.

Q. Now, did you consider this data in connection with the preparation of your report?

A. I did, yes sir. Necessarily there was a certain amount of that data that may have been more related to value in this case than other parts of the data, but I nevertheless examined it all and utilized that examination in arriving at my estimates of value.

Q. Now, in a general way would you say it was fair to state that you familiarized yourself with the general history and background of the Engineers system to the extent necessary for you to reach a fair conclusion as to the valuation of these three issues of preferred?

A. Yes, sir.

Q. Would you also say that in a general way you familiarized yourself with the proceedings relating and pertaining to the Engineers system before the Securities and Exchange Commission and to the same extent and for the same purpose?

The Witness: Would you read that question?

(The question is read.)

The Witness: Yes, sir.

Ralph E. Badger—Direct Examination (Cont'd)

By Mr. Condon:

Q. Now, have you also examined the plan that was filed and the four amendments relating thereto?

A. Yes, sir.

Q. Do you have before you your original report?

A. Yes, sir.

Mr. Condon: Mr. Examiner, may I have the original report produced by the witness marked for identification as Preferred Stockholders' Exhibit 29 for identification?

The Examiner: Let that be marked as Preferred Stockholders' Exhibit No. 29 for identification.

(The document referred to is marked as Preferred Stockholders' Exhibit No. 29 for identification.)

By Mr. Condon:

Q. Dr. Badger, I return to you the original report which you have just identified, marked as Preferred Stockholders' Exhibit No. 29 for identification, and ask you if that report represents the result of the studies which you have made between December 30, 1945 and the present time?

A. Yes, sir.

Q. Would you look at the caption page, if you will, and I ask you as of what date your valuations speak?

A. This valuation was set as at January 15, 1946, but I believe I can say conclusively that I know of no change that has taken place since that date that would affect my appraisals or values.

Q. I notice, Dr. Badger, that this report bears date January 24, 1946. Can you tell us what that date purports to represent?

A. That was the date on which I completed the final dictation of the report.

* * * * *

[R. p. 1357] Q. Now, would you turn to your report, Exhibit 29 for identification, and I ask you to state whether or not

in that report you have defined in a general way fair value and going concern value?

A. Yes. I have given my concept of the term.

Q. Will you look at page 4, please?

A. Yes. Would you like to have me read that?

Q. No, that is not necessary. I would just like to have you point out, if you will, in response to a few questions, the places in your report where the general subject matters of your studies are set forth, just to assist counsel in placing it in the report itself.

Now, is it fair to say that your definition of fair value is what you understand to be the term as used by this Commission and the courts?

A. So far as I am able to interpret it it is, yes sir.

Q. Now, is this report basically a report on going concern value of these three preferred issues?

A. It is basically, yes, although the value is also discussed in certain sections of the report on other than a going concern basis.

Q. Well, you have included in your study, have you not, your opinion of the fair value of these securities?

A. Yes, sir.

Q. Their intrinsic value?

A. Yes, sir.

Q. Now, would you look at pages 4 and 5 of your report and, commencing at that portion of it, do those pages refer in a general way to your studies in so far as market value of these securities is concerned?

A. Not to the extent that current market value at the present time is influenced by other factors than those related to intrinsic worth or to fair investment value as a going-concern.

Q. How have you treated the study with respect to market value, just briefly?

A. As a part of this study I was naturally interested in the market prices at which the several series of stock were selling, and despite the fact that there is a plan presently

before this Commission and well known to the public in which plan it is proposed to pay off all classes of stock at $100 a share, the $5 series preferred is still selling at a price of approximately 105½, or was during the week ended January 5, 1946. That was the week I made that particular market study. The $5.50 series was selling at $106 and the $6 series was selling at $107.25.

It is perfectly apparent, it seems to me, from those market prices, that the investing public has a feeling, one, that it is going to be a considerable period of time before this plan may become operative, on the one hand, or, two, that there is a possibility that the plan now proposed, whereby $100 of par would be paid, may be altered either as the result of the action of the Commission or the courts, or both, otherwise the stock certainly wouldn't be selling at these substantial premiums over and above the $100 par that is proposed to be paid.

It is quite evident that, from the standpoint of the market's appraisal of intrinsic merit or intrinsic worth of the stock, there are elements of value there sufficient to bring the market price up substantially above $100 in the face of these proposals.

Q. Now, is it fair to say, Dr. Badger, that the market value study which is outlined in your report is just one of the bases of your determination?

A. That is correct, because I attempted to seek a value on the assumption that Engineers Public Service would be continued as a going concern.

Q. In other words, your approach was an effort to determine the fair value or the going concern value exclusive of the impact of the Public Utility Holding Company Act of 1935?

A. Yes, sir.

Q. Now, will you turn to pages 5 and 6 of your report, and I ask you if the next basis of valuation that you considered related to general economic conditions and money rates?

Can you make a brief statement concerning that phase of your study?

A. Well, the value of a prefererd stock, which in a way is substantially similar to a permanent annuity, must stem, it seems to me, from two factors. You have got to seek a rate of discount to apply to that permanent annuity and that rate of discount has got to give weight to basic interest rates, or the rate of interest on a riskless security on the one hand and on the other hand has got to, or should, involve a premium in addition to the pure rate of interest to take account of the elements of investment risk that may surround the permanent annuity. Then, of course, in the case of a callable preferred stock it is conceivable that a rate of discount involving the first two factors might produce a value in excess of the call price, in which case the valuation would have an upper limit placed on it by the call feature, plus some additional premium to account for the period of time which investors might believe would exist between the time of their purchase and the time the stock might possibly be called, so it is quite essential in valuing a preferred stock to start with a study and a discussion of the conditions in the money market, what are basic interest rates, to what extent may these basic interest rates be considered as purely temporary or more or less permanent, and I attempted to make that study, and without going into an elaborate discussion of the problem I found that from the year 1932, as a matter of fact, down to the present time, there had been a continuous reduction in interest rates. Being in the type of business I am in I didn't have to make such a study, but I did in presenting it here for the benefit of the Commission, and it will be seen that long-term Government securities, which for purposes of this examination may be regarded as 10 to 20-year maturities on an average range from a 3.68 basis down to a 1.46 basis in 1945, November—and I can say that since the termination of the Victory Loan Drive last December that there has been a further substantial advance in all Government securities and a sub-

sequent reduction in the rates of interest thereon. The same tendency is clearly portrayed in the Standard Statistics Average on a yield basis of high grade bonds. That is a continuous statistical series that is prepared and published by Standard Statistics monthly and it shows there that high grade corporate bond yields dropped from the 5.28 basis on an average in 1932 to a 2.67 basis in 1945. High grade preferred stocks, as one might expect, show a higher yield than do high grade corporate bonds and, likewise, high grade corporate bonds show a somewhat higher yield than do the U. S. Governments. In other words, the greater the elimination of risk, the lower the rate, and that is evidenced here, but preferred stocks have gone through exactly the same cycle that bonds have, and quite naturally, because their preferred dividend payments are in the nature of interest, there is a fixed income obligation. The yields on 15 high grade preferred stocks as computed by Standard Statistics dropped from a 6.13 basis in 1932 to a low level of 3.65 in 1945. For most of the period there there were at least three public utility stocks in that index: Public Service of New Jersey, Pacific Gas & Electric, and I believe Pacific Telephone. There may have been a fourth one, I don't recall, but I did make an examination of the yields on high grade utility preferred stocks and found that the same situation existed there as existed in the general average. Pacific Gas & Electric, for example, being a noncallable 6 per cent preferred stock having a par value of 25, averaged to sell in the month of December, 1945 at $43 a share, which would give a corresponding yield of 3.49 per cent, even lower than the average for 15 stocks. Buffalo Niagara Electric Corporation recently brought out a 3.6 preferred stock for sale to the public at approximately 102.8, or at a yield of 3.50.

The general tendency in respect to high grade preferred utility stocks is identical to that of high grade preferred stocks as a class. In other words, there is nothing at the present time that would distinguish a high grade preferred

utility stock from a high grade corporate stock. The converse of a constantly lowering rate of interest or a constantly lowering rate of return on a preferred stock is a constantly advancing dollar price for the security, so that conversely we can say that preferred stocks have continued to advance throughout this entire period, and I believe I can make the unqualified statement without fear of contradiction that today high grade corporate bonds and high grade preferred stocks are selling at the lowest yield basis ever recorded in our own economic history and concomitantly or concurrently they are selling at the highest prices.

I believe in that connection it would be helpful to make a few comments on the possible permanency of the interest rate structure. I would like to quote first from the Federal Reserve Bulletin of November, 1945. This, incidentally, is an unsigned article that appeared in the Federal Reserve Bulletin, and being an unsigned article, in accordance with the stated policy of the editorial committee, the said committee representing the Board of Governors of the Federal Reserve System, are responsible for interpretations and opinions expressed therein, so I think we can state that this quotation which I am going to give you represents the opinions presently of the Board of Governors in respect to the situation in the bond market.

"In view of the existing sources of demand for Government securities and the reduced supply of new securities, prospects are for a continued strong market for these securities. Under the circumstances demands are particularly strong for the intermediate and long-term issues bearing the higher yields. Such of these issues as can be held by banks will be in demand by banks, while non-bank investors may be expected to buy principally the issues that are non-eligible for purchase by banks."

I have a considerable interest in the permanency of interest rates because part of my function is to advise a substantial number of banks and insurance companies in respect to their investment policies, and the amount of

assets that are under my supervision in that respect at the present time will exceed $100,000,000.

I have followed a number of statements of the Honorable Secretary of the Treasury, Mr. Vinson, who has on numerous occasions expressed his confidence in the permanency of present low rates of interest.

Furthermore, the Federal Government, with its present huge debt, a substantial portion of which comes due in less than five years, is vitally interested in the maintenance of low interest rates and the Federal Government, through the Federal Reserve Banks and through other powers which it presently has, has a firm control in respect to interest rates and I can see no possible reduction in interest rates in the future stemming from any cause which it is possible to present, and it is my opinion that interest rates are going to remain low for a considerable period of time and that correspondingly bonds and preferred stocks will continue at comparatively high levels, and in that connection I would like to state that any values that I may have placed on Engineers preferred stocks are not to be classed as temporary values, are not to be classed as transitory values, due to any peculiar set of circumstances which may evaporate overnight; they are permanent values, as far as one can consistently examine and look into the predictable future.

Q. Now, Dr. Badger, will you turn to pages 8 and 9 of your report, and I ask you whether or not another basic consideration in the valuation of these preferred stocks of Engineers on a going concern value basis or a fair value basis related to earnings analyses of the Engineers Company on a consolidated basis and on a corporate basis?

A. Yes. A prospective investor in a preferred stock is quite naturally interested in the operating results of the company whose stock he purchases and one factor of interest to a preferred stockholder is the number of times charges and preferred dividends are earned, and in that respect I found that on what we call an over-all basis that

charges and preferred dividends combined in the year 1940 were earned 1.22 times:

1941, 1.20;
1942, 1.22;
1943, 1.40 and
1944, 1.54.

In the year 1945, based upon Applicant's Exhibit 63, page 2, the coverage works out at a 1.47 basis, provided no effect is given to a reduction in income and excess profits taxes resulting from extraordinary non-recurring deductions. If such items were used to reduce taxes accordingly, however, as set forth in Applicant's Exhibit 53 and 66, over-all coverage would be 2.12 times.

I believe it would be proper to state that that is the actual coverage for those years on the basis that the books were actually kept and on the basis that taxes were actually computed and paid to the Federal Government.

Q. Now, Dr. Badger, would you comment briefly, if you please, on the analysis of earnings with respect to Engineers on a corporate basis, which you have set forth commencing at page 9 of your report?

A. Preferred dividends alone were earned in the year 1940 2.34 times:

1941, 2.07;
1942, 1.81;
1943, 2.48;
1944, 3.20;
1945, 2.77, without giving effect to reduction in federal income and excess profits taxes resulting from extraordinary and non-recurring deductions, but if such items were used to reduce taxes accordingly, as per Applicant's Exhibits 53 and 66, parent company preferred dividends would have been earned 4.75 times.

Q. Now, Dr. Badger, as another element in your study did you consider the estimated earnings of Engineers, and would you turn to page 10 of your report and comment

briefly as to what that table purports to show and the supporting data under the table?

A. The data on page 10 purports to show the estimated earnings of Engineers Public Service Company and subsidiaries, including the subsidiaries of Virginia, Gulf States and El Paso, on the assumption that Engineers Public Service Company continues in operation and continues to operate those companies in the year 1946, and that is an estimate that was prepared by the officers of Engineers Public Service and submitted in these proceedings under the heading of Exhibit 63, and this particular table comes from page 5 of that exhibit, and that exhibit shows that on an over-all basis charges in 1946 will be earned 1.67 times.

Referring back to the table on page 8, it will be seen that that represents the highest over-all coverage shown for any of the years 1940 to 1946, inclusive, and it maintains the trend of improvement that apparently was initiated in the year 1941, so that going way through the year 1946 we find continued improvement in coverage and we find that the highest coverage on an over-all basis is shown in the year 1946. In similar fashion the times that parent company dividends alone will be earned in 1946 on the basis of this estimate would be 3.39 times. Again, the improvement was continuous throughout the period and the figure of 3.39 is the highest figure for any of the years studied, 1940 to 1946, inclusive.

Q. Now, Dr. Badger, as the next element of your consideration and your studies in the valuation of these preferred stocks, did you consider and make a balance sheet analysis, and I refer you to pages 11 and 12 of your report and ask you to briefly state, if you please, what they purport to represent?

A. I broke the capitalization of the company down into two groups. The first grouping I indicated as preceding claims. Those would be items on the balance sheet such as subsidiary debt and notes, subsidiary preferred stock premium and accured dividends, minority interests, which

claims would come ahead of Engineers Public Service preferred. Then the second group of claims included Engineers Public Service preferred and subordinated claims to assets and I determined what percentage of the aggregate capitalization was represented by prior claims and what percentage of capitalization was represented by claims represented by the preferred stock or subordinate claims. In other words, this, as far as assets are concerned, is equivalent to indicating what coverage the preferred stock has got. We indicated the coverage that the preferred stock had in reference to its dividends and this indicates the coverage that it has, and I must state in this connection that this is predicated upon the book or carrying value of the assets and is not related to the market value of assets, and there is a sharp distinction between those two that I hope to point out in a separate table, but on the basis of the consolidated balance sheets in 1942, 71.62 per cent of the capitalization was represented by prior obligations and 28.38 by subordinated items and the preferred stock of the holding company. In 1943 the similar figures were 60.37 and 39.63; in 1944, 68.26 and 31.74.

Q. In connection with your balance sheet analyses at pages 11 and 12, did you consider and make a study with respect to comparable situations with regard to several companies as outlined on page 12, and if you did, would you state briefly what your studies in that regard purport to show?

A. Yes. A holding company is in the position of being responsible for the debt of the operation companies only to the extent that it sees fit to service that debt in the event it becomes necessary to do so. In other words, a holding company which has no debt outstanding of its own—and that was the situation here—unless perchance it has already guaranteed or assumed the bonds of its operating companies, has no obligation in respect thereto. They must stand alone on the basis of the operating ability of the operating companies to meet that debt. So, if one operating

company, we will say, becomes involved, there is no reason why the holding company, if it sees fit and it is economic to do so, can't cut that operating company loose. So, it isn't truly fair in analyzing the preferred stock picture here to show the situation as I did show it on page 11 unless we take into consideration the actual market value of the unrestricted and unpledged assets of the holding company as I did on page 13.

On page 13 I took the operating companies as at December 31, 1944, and despite the fact there were certain changes that took place in '45 and other changes are about to take place—I will discuss those later—I had to take that balance sheet because it was the last one which I had available for the parent company.

I assumed, on the basis of facts I will discuss in a moment, that the common stocks of those operating companies should be worth fifteen times a two-year average earnings.

My basis for that was, I might say, threefold. In the first place, it is my own observation in connection with my general work that a multiple of fifteen applied to two-year average earnings of operating utility companies now would be a conservative basis on which to appraise or estimate the values of such stocks.

Applicant's Exhibit 14 presented a study of the price-earnings ratios of the common stocks of four companies, Houston Lighting and Power, Idaho Power, Indianapolis Power & Light Company, and Tampa Electric Company, and on the basis of the study of this exhibit there was demonstrated that those four stocks averaged to sell at 14.44 times average per-share earnings for the period 1938 to '41, inclusive, 16.04 times yearly average earnings for 1942 to 1944, inclusive, plus 12 months ended June 30, 1945; 15.20 times yearly average earnings for the period 1938 to 1944, inclusive, plus 12 months ending June 30, 1945; and 15.58 times per share earnings for the year 1944; and 14.90 times twelve months earnings for the period ended June 30, 1945.

So, it would seem reasonable to assume a multiple of 15, based on that study.

However, several months back I was called upon to testify before the Securities and Exchange Commission in reference to the valuation of the preferred stock of American Light & Traction, and in connection with that study I made a more comprehensive survey of the price-earnings multiples of electric and gas common stocks.

In Appendix A of that report I set forth a study which showed the relationship between five-year average earnings of thirteen electric and gas company common stocks and the then current market value of those stocks.

At that time the multiple relationship was 15.85, which is a little bit higher than the multiple 15 which I used. I propose to submit a copy of that report as a part of this testimony. I regret that I haven't a copy of it here, but I will submit a copy.

Mr. Condon: At this point in the record I would like to incorporate by reference the Appendix A from Dr. Badger's report from the American Light & Traction case, being Allied's Exhibit No. 21-2 in docket No. 54-25-1 of volume 13 in the United Light & Power case, 11(e) Plan. We will supply all counsel with a copy of that.

The Examiner: Any objection?

Mr. Tucker: I haven't the slightest idea what it is. From the Doctor's description of it, I probably won't object.

If your offer by reference relates to one page Dr. Badger will show you there, we have no objection. Will you see if that is so, Mr. Condon?

Mr. Condon: I will be very pleased to.

By Mr. Condon:

Q. Dr. Badger, I draw your attention to page 12 of Preferred Stockholders' Exhibit 29 for identification, about the middle of the page, at which point in your report you state as follows:

"In this connection I would also like to refer to Appendix A of a report which I prepared in connection with the valuation of the preferred stock of American Light & Traction Company, which report is on file with the Securities and Exchange Commission."

I hand you the Docket Number and the exhibit to which I have just made reference, and ask you if you will point out and state for the record the specific study to which you refer in your report in the American Light & Traction case and identify it for the record.

A. I referred to the study in the appendix showing the price-earnings multiples for selected electric and gas companies, using May, 1945 average price and using average earnings of 13 gas and electric companies for the period 1940 to 1944, inclusive.

I show in connection therewith the price-earnings multiples for each company, and I show the average price earnings multiple for 13 companies, which figure is 15.85 as already indicated in my report.

Q. What figure have you used actually in your calculations?

A. A figure of 15.

Q. 15 flat?

A. That is correct.

Mr. Condon: I would like to either incorporate by reference or offer in evidence, with leave to supply a photoprint, this exhibit.

With the permission of the Examiner and consent of counsel I would like to reserve Preferred Stockholders' Exhibit No. 30 identified as Appendix A by Dr. Badger, and a copy of this exhibit will be supplied to all counsel.

I ask that it be received and marked by the Reporter, with the approval of the Examiner, without the necessity for further hearing.

The Examiner: I understand there is no objection by counsel to the receiving of this in evidence, and accordingly

it will be received as Preferred Stockholders' Exhibit No. 30.

(Preferred Stockholders' Exhibit No. 30 is received in evidence)

By Mr. Condon:

Q. Dr. Badger, as another element in your study attempting to arrive at the going concern value of these three series of preferred stocks, did you consider the dividend record of Engineers, and would you return to Page 14 of your report and comment briefly with respect to that study?

A. I did. From the time that the several classes of preferred stocks were issued, until some time in the middle of 1933, regular dividends were paid.

From 1933 to about August of 1936, no dividends were paid.

Thereafter, dividends were resumed and arrearages were paid, and by January of 1938, I believe that in all cases, the dividend arrearages had been paid off, and from then on regular dividends had been paid up to the present time.

Q. In connection with your efforts to determine the fair value, did you make a comparative study with respect to five Public Utility Holding Companies?

I refer you to page 16 of your report and ask you to state briefly what the data there and on the following page 15 purports to show.

A. I would be glad to discuss that page, but before I do so, I would like to state that I don't like the use of the word "comparative" because, in doing evaluation work it is always difficult to find two companies that are identical or are comparable in all respects.

I proceed on the theory that a man who has had considerable experience in analyzing securities, in dealing in securities continuously, should, on the basis of an analysis

of a given company, said analysis covering the important factors of value, be able to arrive at a valuation for that security. But I do feel that having done that, he should support that valuation that he arrives at by a study of a number of companies,—and here I say more or less similarly situated, no one identical, to be sure—but in making such study he justifies or proves to himself that the basis he used is consistent with general market conditions.

That was the purpose of the next two studies, if I make myself clear.

Q. Thank you, Dr. Badger.

A. In that connection, I took five holding companies, all of which had preferred stock outstanding, none of which companies can be classed—or I should say none of the preferred stocks of which can be classed—as of the highest investment caliber.

In other words, I would classify the preferred stocks of these five companies presented here as being of a medium grade preferred stock, not of the highest to be sure, and not of the lowest, but as a group, not any one more or less similar to the preferred stocks of Engineers Public Service.

To follow that through, let us take Columbia Gas & Electric Company for example.

For the period 1940 to 1944—and that was the latest date at which I could get figures for my comparative companies: I couldn't get the 1945 figures as yet because they are not out—Columbia Gas & Electric Company in 1940 earned its charges on an over-all basis 1.35.

In 1941, 1.22;

In 1942, 1.25;

In 1943, 1.47;

In 1944, 1.46.

If you look over to the extreme right, next to the last column, you will see the over-all coverage for Engineers Pubic Service Company, and you will note that in the first two years, Columbia Gas & Electric Company did better than Engineers Public Service. I might say that there was substantially no difference for the years 1941 and 1942.

In the year 1943 a difference of .07 in favor of Columbia Gas & Electric;

In 1944, Engineers Public Service Company passed Columbia Gas & Electric by .08.

In other words, there was a substantial similarity there with respect to over-all coverage.

With respect to an analysis of balance sheet items, the percentage of prior obligations to capitalization, Engineers Public Service did not stack up quite as well. On the basis of book value of equity per share of preferred, Engineers Public Service did better than some of the companies in some of the years, did worse than others in other years, but except for Niagara-Hudson, the figures are very close.

Niagara-Hudson, despite the fact that it has substantially heavier coverage with respect to assets, has a considerably lower coverage in respect to earnings, and Niagara-Hudson, incidentally, is currently in default as to its current preferred dividends, and has arrearages on the preferred stock at the present time.

The percent of net-quick to prior obligations, again we find that Engineers Public Service is in a median position.

In respect to times preferred dividends alone earned in the year 1942, three of the companies did better. As a matter of fact, four of them did better than Engineers.

In the year 1943, two of them did better than Engineers, and in the year 1944 Engineers surpassed all five companies.

So, it occurred to me after this study that taking the factors as a whole, Engineers might be said to rank in about a median or average position, as far as the preferred stocks of these five companies are concerned.

I proceeded to reconstruct the values of the various classes of preferred stock of Engineers Public Service, using the rates of Capitalization expressed by the market and stated dividends on these holding company preferred stocks. I found if we used Columbia Gas & Electric's ratios we would have $105.49 for the $5 preferred; $116.03 for the $5.50 preferred; and $126.58 for the $6 preferred.

That, of course, is on the assumption that the several classes of Engineers Public Service are non-callable.

Niagara-Hudson prices and yields would give values of $102.75, $112.94 and $123.00.

If we averaged the values obtained by the use of all five companies, we would have a value for the $5.00 preferred of Engineers Public Service of $107.49, the $5.50 preferred $118.31 and the $6 preferred of $129.07, without giving any effect to the call features that existed in connection with those three classes of stock.

Q. Dr. Badger, as a further basic element of consideration did you make a comparative study of ten medium-grade selected utility preferred stocks? I ask you to turn to page 17 of your report, and page 18, and ask you to outline briefly what you did in that respect?

A. I went through all of the public utility preferred stocks that are quoted in this volume known as Standard and Poor's Stock Guide, which is a monthly publication, and which is put out for the purpose of giving current prices on a wide range of listed and unlisted securities.

I tried to pick out as far as possible—and I exceeded these limits a little bit here and there, but not substantially—preferred stocks whose over-all coverage ranged from 125 to 175.

I also restricted this study to preferred stocks whose dividend rate in connection with call price would give me a proper comparison to use in connection with Engineers Public Service.

For example, if we had a 7 percent preferred stock callable at 105, it wouldn't constitute a proper comparison, because no matter how good the stock was, it wouldn't sell substantially in excess of 105.

We have no 7 percent preferred stock in connection with Engineers Public Service that is callable at 105, so that wouldn't be a proper comparison. Non-callable preferred stocks, of course, would be highly desirable in so far as they are available, meeting our other classifications; all

preferred stocks whose dividend rate was relatively low as compared with the call price, would likewise constitute more proper comparisons than would preferred stocks with high dividend rates and low call prices, because you have an extraneous factor not related to investment risk, not related to the inherent value of an annuity operating there to depress the price of the stock, and we want to eliminate that as a factor of value.

Out of a rather large number of preferred stocks, including both holding companies and operating companies, I selected the ten that appear on page 18.

On an average in 1943, the preferred stocks of those ten companies averaged to earn their preferred dividends and prior charges—that is, all charges—1.49 times as against 1.40 for Engineers Public Service.

In 1944 they covered their over-all charges 1.48 times as against 1.54 for Engineers.

Mr. Tucker: Your figures of 1.49 and 1.40 relate to the year 1943? I don't think you stated that.

The Witness: For 1943 the ten companies averaged to earn their over-all charges 1.49.

Engineers Public Service in that year averaged to earn its over-all charges 1.40.

In the year 1944 the ten companies averaged to earn their over-all charges 1.48, whereas Engineers Public Service averaged to earn its over-all charges 1.54.

Preferred dividend coverage alone compared as follows: The ten companies averaged to cover preferred dividends only 2.52 times in 1943 as against a figure of 2.48 for Engineers Public Service; and in 1944 the ten companies averaged to cover preferred dividends 2.46 times, and Engineers Public Service 3.20.

So, there again, Engineers certainly ranked as good as this group on average.

The stocks of these ten companies averaged to sell on a 4.5 basis, based upon their average prices for the week ending January 4, where that price was available.

Mr. Kanton: Where did you get that average price? I am trying to follow you on page 18. I have no figure for an average yield price on my copy. You used the figure of 4.5 percent.

The Witness: It is possible I did not put that average down there and maybe I should have. I referred to that in the text—that was a 4.5 basis. I believe that should have appeared on the chart.

Mr. Condon: I believe that is in the text, Dr. Badger.

The Witness: Yes, that should appear on the chart.

Mr. Tucker: What would it be if it appeared on the chart?

The Witness: The average of all those yelds was 4.5.

By Mr. Condon:

Q. That figure is set forth in the column appearing in the reconstructed values, about ten lines from the bottom of the page on page 18?

A. Yes, I know that. It should also appear under the average up here.

Q. Would you care to make a statement with respect to that, Dr. Badger?

A. Yes. The arithmetic average of the yields under column headed "Percent yield" on page 18 is 4.5.

If we apply that yield as a basis for capitalizing the stated dividends of these three classes of preferred stocks of Engineers, we get the corresponding values of 111.11 for the $5 preferred, 122.22 for the $5.50 preferred and 133.33 for the $6 preferred.

That, of course, is without reference to the call features, and is on the assumption that the Holding Company Act is not going to impinge on the company.

Mr. Tucker: Dr. Badger, right there,—because I might want to move to strike that part of your answer, you are not making any contention in this case, are you, that these values for the $5 of 111, for the $5.50 of 122 and for the $6 of 133 are values of these preferred stocks?

The Witness: No.

Mr. Condon: Just a minute, Dr. Badger.

I would like the record to show in the matter of Buffalo Niagara & Eastern Corporation, being Commission's release No. 6083, being under date of November 28, 1945, which was an 11(e) plan, where this Commission had before it the determination of fair value, going concern value, or intrinsic value of preferred stock, that language suggesting that values in excess of a so-called call price might be considered by the Commission, and I would like to read the answer to Mr. Tucker's inquiry, just one sentence from that opinion of the Commission.

"However, the call provision would ordinarily provide a maximum figure for the participation of the particular security since the holders of the junior securities have a right to retire the preferred at the redemption price quite apart from the impact of Section 11."

It is my view that where the Commission uses that language that there might well be situations that what would ordinarily be expected might not apply, and I feel it is perfectly proper that this Commission have all of the facts and all the estimates, as long as there is no question that Dr. Badger's figures appearing at the bottom of page 18 are ex-the Act, and ex-the call price.

The Examiner: I think he so stated.

Mr. Condon: He said it at least three times.

Mr. Tucker: Will you please read back my question and the witness's answer?

(The record was read.)

By Mr. Condon:

Q. In connection with that inquiry of Mr. Tucker, can you state for the record why you feel it appropriate to set forth at that point those figures to which you have just made reference?

A. Yes, sir.

Q. Go ahead.

A. The difference between the call price and the figures set forth here represent an element of value which could be extinguished by virtue of changing market conditions, or by virtue of changing investment status relative to this company itself, which value or which differential could be completely extinguished by such changes before there would be any change in my estimate of fair investment value. In other words, we could have a reduction from $133.33 as computed on this statement down to approximately $111.50 which is my appraised value of the $6 preferred stock, by virtue either of a change in business conditions or a change in the investment position of this stock before the fair investment value of the $6 stock of Engineers Public Service Company would be changed on the basis of my estimates.

In other words, that is a protective element, as one might say, inherent in that $6 stock which should be considered in placing any value thereon.

Q. Is your answer the same with respect to the $5.50 and $5.00 series?

A. Yes, sir.

Mr. Tucker: In other words, it gives you a cushion; that is what you are saying, isn't it?

The Witness: Yes, sir.

By Mr. Condon:

Q. Dr. Badger, did you give some special consideration to the Virginia Electric and Power Company? I refer you to pages 19 and 20 of your report, and I ask you to state briefly for the record what that portion of your study and report indicates.

The Examiner: We will take a short recess at this time.

(At this point a short recess was taken, after which the hearing was resumed.)

Mr. Condon: Will you read back the last question, please?

(The question is read.)

By Mr. Condon:

Q. Make it as brief as you can, Dr. Badger, please.

A. That shows the earnings available for preferred dividend requirements on Engineers Public Service—I should say for Virginia Electric & Power Company—for the last years 1939 through 1945, with the last two months of 1945 estimated; the amount of preferred dividend requirements predicated upon 1946 requirements, and the balance available for common. That would be substantially the amount that would be available for Engineers Public Service after the payment of charges and preferred dividends on Virginia Electric & Power Company. The purpose of that study was to show the amount of earnings which Engineers could derive directly from Virginia Electric & Power Company on the assumption that El Paso was disposed of according to the 1945 plan and provided the stock in Gulf States was sold at $11.50 a share in accordance with the provisions of the plan.

It will be seen that the balance available for common in 1939 of Virginia Electric & Power Company was $3,453,000; in 1940, $3,954,000; $3,783,000 for 1941—I will not read all of the years. On the basis of the tax situation as it actually worked out, for 1945 there would be $9,410,677 available, but it will be recalled that in the year 1945 there was an extraordinary and non-recurring tax adjustment that throws earnings somewhat above what they would be if that non-recurring item were eliminated. We have discussed that item before.

In the year 1946 there would be $6,125,000 available for preferred, $4,677,000 available after meeting preferred dividend requirements on Virginia Electric & Power Company.

The next line indicates my calculation of the freeze requirements.

I wish to show the amount available for common stock even after the freeze requirements would be fully adequate to meet the preferred dividend requirements on Engineers

Public Service outstanding preferred stocks provided Engineers Public Service were to utilize a total of $10,000,000 of cash plus proceeds from the sale of 1,000,968 shares of Gulf States common at $11.50 a share for the purpose of calling all of the $6 preferred stock at its call price, all of the $5.50 preferred stock at its call price, and the utilization of the balance of cash after those two issues were called to call the $5 preferred stock. That would leave outstanding after that transaction 99,863 shares of uncalled $5 preferred stock on which the annual dividend requirements would be $499,315. In other words, based on 1946 earnings as estimated, there would be $4,677,000 available from Virginia Electric & Power Company alone if the other two companies were disposed of to meet a remaining preferred dividend requirement in respect to Engineers Public Service of only $499,000. In other words, on the basis of these assumptions, it will be seen that the preferred dividend requirements of Engineers Public Service Company would be reduced from a present figure of $2,119,000 to $499,000 annually, an amount which would be well within the capacity of Engineers Public Service Company to pay if it were to continue as a holding company owning only Virginia Electric & Power Company or, two, if Engineers Public Service Company and Virginia Electric & Power Company were merged. Adequate funds would be available from Virginia Electric & Power Company to meet these requirements whether or not the freeze requirements previously mentioned were to be deducted from the balance available for the common.

Q. Dr. Badger, in the interests of brevity, as a result of your studies of the various documents and exhibits to which you have made reference, and as a result of the various studies giving consideration to the different component elements you have outlined, have you arrived at a conclusion with respect to the fair value and the going concern value of the several classes of preferred stock of Engineers

Public Service Company on the assumption that Engineers Public Service Company is to continue in business, or, in other words, ex the impact of the Act?

A. Yes.

Q. If you have, will you turn to page 21 and state what you have concluded?

A. It is my opinion that the $5 convertible dividend preferred—the convertible feature now has expired—would be worth at the rate of no less than $106.25 a share; that the $5.50 cumulative dividend preferred would be worth $111.38 per share; and that the $6 cumulative dividend preferred would have a value of at least $111.50 a share.

Q. Are the conclusions set forth in the report which has been marked for identification your own conclusions?

A. They are.

Q. Have they been arrived at in good faith?

A. They have.

Q. Are they based upon facts and figures which, to the best of your knowledge, information, and belief, are true and correct?

A. That is correct.

Mr. Condon: I offer the report and study in evidence.

Mr. Kanton: No objection.

Mr. Tucker: No objection.

The Examiner: It will be received as Preferred Stockholders' Exhibit No. 29.

(Preferred Stockholders' Exhibit No. 29 is received in evidence.)

By Mr. Condon:

Q. Dr. Badger, you have referred to preferred stocks of certain operating utilities and to certain utility holding company stocks. The record on your report shows that the operating utilities in the Engineers system have senior securities outstanding in the hands of the public and the

Engineers owns only common stocks of those operating utilities.

A. That is correct.

Q. What effect have you given to that in connection with the study that has just been received in evidence? Will you state your conclusions as to the values with respect to those preferred stocks of the operating utilities?

A. I have given consideration to the existence of the preferred stocks of the operating subsidiaries, and I have examined——

Mr. Tucker: May I interrupt and ask what issue in this case you think the value of the preferred stocks of the operating companies has?

Mr. Condon: I just think it is one of the elements here to show that Dr. Badger considered—if you prefer I withdraw the question I shall be very pleased to do so unless other counsel object.

Mr. Scheetz: I don't object. It seems to me the question stated another way is that on page 18 of Dr. Badger's report he has reached certain values based on a 4.5 per cent yield basis, and those studies refer back to operating utilities. The latter part of his report shows a percentage of 4.6 in evaluating the Engineers preferred. I think the question of Mr. Condon is the consideration that he gave to the fact that the Engineers preferred is based on common stocks of utilities with senior securities of the subsidiaries out in the hands of the public.

By Mr. Condon:

Q. Dr. Badger, would you give us the benefit of your answer to that question, if you will, if Mr. Tucker does not press his objection?

Mr. Tucker: I haven't made any objection to that question.

The Examiner: You say you have no objection?

Mr. Tucker: I haven't made any to date.

The Examiner: Proceed, Mr. Badger.

The Witness: I would like to say in general that all other things being equal, the preferred stock of an operating company would per se have a somewhat higher investment status than the preferred stock of a holding company.

I believe that Engineers Public Service Company as it is presently constituted with three operating companies, which three operating companies on a conservative appraisal would have a very substantial value—as a matter of fact, of the five companies which were owned in 1945, two either have been or will have been sold at prices close to the values indicated here, so that that value that is indicated for the companies as at December 31, 1944, now becomes cash in the hands of the parent company. On that basis we would have a total of $99,000,000 of either very liquid assets, such as cash, or reasonably liquid assets, such as companies which can be disposed of, as against a total par value of preferred stock of $39,000,000—$245 a share. I regard that as a very substantial element of protection in this case.

This holding company has no bonds outstanding prior to this preferred stock. The preferred stock therefore is in the form of a prior claim against those assets. The average rate at which the market capitalized the dividends of the 10 stocks, including West Penn Electric, which is a holding company, was on a 4.5 basis. Public Service of New Jersey, which is one of the companies I studied on page 15, has certain issues of non-callable preferred stock outstanding. I used the $5 preferred. There is a company which instead of having five years of improvement in respect to times dividends earned had five years of regression as far as times earnings are concerned, and earned its charges in 1944 only 1.25 times as against a figure of 1.54 for Engineers Public Service. That holding company preferred stock was selling on a 4.37 basis.

Taking all these facts into consideration, facts that unquestionably operating company preferred stocks should

sell at somewhat lower yields than holding company preferred stocks, I am still of the opinion on the basis of my studies that were it not for the existence of a call feature in connection with the several classes of Engineers preferred stocks, that they would sell substantially in excess of the values that I stated on page 21. Does that answer your question?

Mr. Condon: I think it does.

By Mr. Kanton:

Q. Is the effect of your answer, Dr. Badger, or at least part of your answer, that you consider the preferred stocks of the three operating subsidiaries to be of better quality than the preferred stocks of Engineers?

A. That is correct, and they are selling at very substantially higher prices than even the prices I have suggested here.

Q. But it doesn't necessarily follow—I am referring back specifically to part of your answer—that a preferred stock of a subsidiary would necessarily, because it is closer to earnings as you put it, be better than the preferred stock of a holding company?

A. No, sir, because other factors might be the same. You might have the stock of an operating company that was vastly inferior to the stock of a holding company.

By Mr. Condon:

Q. Dr. Badger, for facility and speed, did you have any book or record which would show what prices these preferreds of the three operating companies in the Engineers System are selling at?

A. I have.

Q. Would you state what they are for the record and the source of your answer?

A. Based upon Standard & Poor's earnings and ratings stock guide for January 1946, which contains prices

through December of 1945, during the month of December 1945, Virginia Electric & Power $5 cumulative preferred stock, which is callable at $117.50, sold at a high of $123 and a low of $121, and closed at $122. That compares with the value ex the call price for the preferred stock of Engineers Public Service of $108.70.

Q. Would you please continue, Dr. Badger?

A. The Gulf States Utilities $4.40 cumulative preferred, callable at $111, sold at $113.75 high in December, $113.25 low, and closed at $113.75. The El Paso—I don't find that.

* * * * *

[R. p. 1400]

RALPH E. BADGER,

previously sworn, resumed the stand and testified further as follows:

Cross Examination

By Mr. Tucker:

Q. Dr. Badger, how many drafts have you made of this report which was introduced yesterday as Preferred Stockholders Exhibit No. 29?

A. There never was but one completed draft. I dictated portions of it, and as that would come, I would have it corrected and then that would go back into this final draft. This was the only complete draft that I have had of the report. The other one contained, you might say, the dictated material, without any charts. In other words, I had these tables prepared in either pencil memorandum form or typewritten form, and then I together with those, would dictate portions of the report, and as those portions would come back, I would correct them and from those two groups of material the completed report was prepared, but this was the only draft in its completed form that I had prepared. I might say that I didn't start to work on this case until

some time about January 5, and it took me several weeks of working both day and night to digest this material and get myself to a point where I was sufficiently familiar to come to my conclusions to prepare this report.

Q. You were in New York, were you not, Dr. Badger, two or three weeks ago?

A. I was in New York on this matter, I believe, the last week in December, but I didn't go back to Detroit immediately. It was somewhere around January 3 or 4 before I got back to Detroit. I came down to New York some time in the vicinity of the 10th of January, but that was on an entirely different matter, and I didn't have any contact at that time with Mr. Condon.

The next time I came to New York, as I recall it, was a week ago—two weeks ago this Friday. That would be a week ago last Friday.

At that time I had no report prepared.

Q. You had no report at all at that time?

A. No, sir; hadn't even started to dictate the report at that time. The entire report was prepared subsequent to that time.

Q. When did Mr. Condon first see a draft of your report?

Q. As far as I know, he saw it the afternoon—I believe it to be Tuesday this week, because the report was mailed out from Detroit, I believe, Monday night.

Q. Did he at any time discuss with you the draft?

A. Not the draft of the report. He discussed certain of the tables that were contained in the report.

Q. You had no discussion with Mr. Condon with respect to the draft of the report?

A. Not of the report, because the report was not prepared at the time I last saw him, which was two weeks ago Friday.

Q. Are you saying, Doctor, that you had no conferences with Mr. Condon with respect to your draft report at all, at any time?

Ralph E. Badger—Cross Examination (Cont'd)

A. I said that I had, at the last conference with Mr. Condon, certain of the tables that subsequently appeared in the report.

Q. Yes, I heard you say that. I am talking now about the report.

A. That is correct.

Q. Well, what do you mean it is correct?

A. That the only discussion I had with Mr. Condon relative to this report was on Wednesday morning of this week.

Mr. Condon: You mean yesterday morning at 8:00 o'clock?

The Witness: Breakfast, yes, sir. That was the first time that Mr. Condon and I had discussed this report.

By Mr. Tucker:

Q. After you had had that conference with Mr. Condon, were any changes made in the draft?

A. Yes, sir.

Q. What changes were made in the draft?

A. They are all indicated in the report.

Q. Do you refer to deletions?

A. They are made in ink.

Q. On what I suppose is page 1?

A. Well, for example, on page 1——

Q. Let me ask you the questions, if you will. You refer to deletions on page 1, deletions on page 3, deletions on page 4——

Mr. Kanton: There is one on page 2.

Mr. Tucker: It is not important.

Mr. Condon: Either include them all, Mr. Tucker——

Mr. Tucker: You objected to my interrupting your cross examination. Let me have the same privilege. If you want to object to questions, I have no objection, of course.

Ralph E. Badger—Cross Examination (Cont'd)

By Mr. Tucker:

Q. —and deletions on page 13,——

A. I——

Q. Just a minute, please.

A. If you are asking me a question——

Q. I haven't yet gotten to the end of the question.

Mr. Condon: I would like the question re-read, please.

(The reporter read as follows:

"Q. You refer to deletions on page 1, deletions on page 3, deletions on page 4 and deletions on page 13——")

By Mr. Tucker:

Q. Is that right, Doctor?

A. They are not all deletions. Some are deletions and some are corrections or substitutions.

Q. Well, all right. We won't quarrel with the definition of the word "deletions." I take it the so-called deletion or what I refer to as a deletion on page 1 is what you would call a substitution or correction, is that correct?

A. That is correct, a substitution.

Q. I neglected the one on page 2. That is obviously a change in a figure.

A. That is a correction.

Q. The one on page 3, Doctor?

A. That is a deletion.

Q. What did it say before it was deleted?

A. I believe it says, "In the event the Plan should be deemed as involving an involuntary liquidation."

Q. What about the deletion on page 4—and that is a deletion, isn't it?

A. That is a deletion.

Q. A rather complete deletion, as far as I can make out. I couldn't read it.

A. It is a deletion of one sentence.

Q. What did that say? I don't care for the exact words.

Give me the substance of it. You must be able to remember that?

A. In substance it says that "On the assumption that parts 1 and 2 of the Plan should be consummated, which would eliminate from the system El Paso and Gulf States, after which elimination Engineers Public Service would continue its existence and operate Virginia Electric & Power Company alone, or should become merged with Virginia Electric & Power."

Q. It sounds like a lot more than those three lines that are deleted.

A. You asked me the substance.

Q. You think that is the substance of what that said?

A. I believe that to be the substance, yes, sir.

Q. I take it that what I referred to as a deletion on page 13 you have referred to as just a correction?

A. That was a substitution. At the time I prepared the report I did not have the accurate reference to the pages in the record where Mr. Benjamin's testimony appeared, but after my discussion with Mr. Gordon, we looked that up in the record and that became a much better reference for purposes of the report than was the reference previously made to the prepared testimony.

Q. Putting your mind for the moment on these things that you say are deletions, who suggested making the changes?

A. Was that a question, sir?

The Examiner: He asked who suggested making those deletions.

Mr. Tucker: Read the question.

(The question was read.)

The Witness: Well, the suggestion developed as a result of a discussion after our discussion of that particular paragraph, the last sentence.

By Mr. Tucker:

Q. You are not referring to the defetion on page 3, are you?

A. Page 4. Did you refer to the one on page 3?

Q. No. I said who suggested the deletions. I would like to have you start with the one on page 3.

A. The two deletions arose in exactly the same way.

Q. That is, the one on page 3 and the one on page 4?

A. That is correct. After a mutual discussion we both agreed that the two sentences, the one on page 3 and the one on page 4 did not add anything to the clarity or the purpose of the record, and they were deleted.

Q. One or the other of you and Mr. Condon made the suggestion in the first instance; which one made the suggestion? Those things just didn't happen simultaneously, did they?

You didn't of one accord arise and say "Let's strike these out," did you?

A. No, sir.

Q. Well, which one made the suggestion in the first instance?

A. I think I was asked if the report could be better or more clarified if those sentences were removed, or whether I thought they should remain in after we discussed the report, and I believe I said that I believed the sentences should be deleted, as I recall it.

Q. You were asked that by Mr. Condon?

A. That is correct.

Q. If you had been left alone and you hadn't had a conference with Mr. Condon, you would not have made the deletions; is that right?

A. That is correct.

Q. On page 7 of your report, in the last sentence of the second paragraph, you state:

It may, therefore, be stated that the present level of preferred stock prices is, so far as one can humanly predict, a permanent level. Did you say that in your report?

A. That is the last sentence in the second paragraph on page 7?

Q. Yes. Did you say that in your report?

A. Yes, sir.

Q. On the same page you say, do you not, "The values which I propose to place on these several classes of preferred stock of Engineers Public Service Company are, therefore, values of a permanent nature, and are not values of a temporary or speculative nature." Did you say that?

A. Yes, sir.

Q. You were valuing in this case a preferred stock of a holding company, weren't you?

A. Yes, sir.

Q. Did you with another gentleman or professor, prepare a book that got at least to a third edition, which I seem to have in front of me called "Investment Principles and Practices," by Badger and Guthmann?

A. That is correct.

Q. Without taking the trouble to make quotations from the book, because I assume you know pretty generally the matter in the book, do you have a sub-paragraph in that book, or a chapter, as I might call it—it is not a whole chapter, but a heading—that deals generally with the question of the bonds, reference to preferred stocks as a hedge, one against the other, or preferred stocks as a hedge against bonds? Does that mean anything to you?

A. Well, I couldn't indicate without reference to the book how these paragraph headings go. I fail to see how we could have stated that a preferred stock as an investment would be a hedge against a bond?

A. No, not a hedge——

Mr. Condon: Mr. Examiner, I want to interpose an objection. I feel if this line of inquiry is to be pursued, Dr. Badger should be handed the book which appears

before Mr. Tucker and his attention directed to the specific part of the book. This is not a memory contest, and if Mr. Tucker has any point in mind, I submit we come to it.

We have spent 25 minutes of time going into the question of a couple of typographical changes and a couple of immaterial deletions. I feel if we are going to get down to the meat of this cross-examination, let Mr. Tucker come to it and show Dr. Badger the book and the paragraphs to which he is referring.

Mr. Tucker: If the Examiner requires me to do it, I will do it. I would prefer to conduct my examination in my own manner. I think I have a right to do it.

The Examiner: Proceed with your examination, Mr. Tucker.

By Mr. Tucker:

Q. This in substance, Doctor, is what I understood from your paragraph. You understand, I am just a layman; I am not an expert who handles securities—I understand that you were saying in the book that if a man was a little nervous about his bonds, it wasn't a good thing for him to do, to sell his bonds and purchase preferred stocks—do you remember that?

A. Not in that language at all.

Q. Well, if it suggests something to you, will you tell me in your own language? I don't want to quarrel with you about language.

A. You are making certain interpretations of paragraphs in the book, and I can't recall exactly what the arrangement was in the book or what the actual wording was. And I would like to refresh myself as to that particular part of the book to see what you have in mind. The book contains some 700 or 800 pages, and I don't believe I could be expected to tell you exactly the import of every page or every material in there on the basis of a vague reference.

Q. Doctor, do you remember saying in that same connection, if it meant anything to you—if it didn't, you needn't answer the question—that preferred stocks were of a character of bonds to a certain extent, in that they had—both of them, one a fixed interest rate and the other a fixed dividend rate, but that preferred stocks as a class had not the security value, the safety factor, of the ordinary bonds, but in times of difficulty they partook more of the character of common stocks, and that a preferred stockholder found himself in the position, if you please, of one who took the risk of a limited dividend but in times of stress his stock became perhaps more of the character of a common stock and fluctuated accordingly.

Do you remember saying something like that?

A. Yes, sir; and I think your exposition of that part of the book is very good and very clear. This I would admit and say that that is substantially the way the book discusses that problem.

Q. That is the character of the thing that you are talking about here, the kind of a security that you are talking about here, when you say, Dr. Badger, "The values which I propose to place on the several classes of preferred stocks of Engineers Public Service Company are, therefore values of a permanent nature and are not values of a temporary or speculative nature," is that correct?

A. That is correct, and there is nothing inconsistent as between that and what was said in the book.

Q. Let us see about that. That is where we are going, I hope.

You agree, don't you, that a preferred stock will fluctuate with changes in what you call the yield basis?

A. Changes in interest rates.

Q. Well, in interest rates.

A. Yes, sir.

Q. I will let you set them up on that basis. I don't know much about this stuff, Dr. Badger,—pardon me. So that any change in interest rates, we will call it—let us use your

terms,—will effect a change in the value of the preferred stocks for the same reason that that kind of thing affects the change in the value of bonds, is that right?

A. Correct.

Q. And that is because, as you point out in your book, that both have limited returns; is that right?

A. Yes, sir.

Q. I will show you the book this time, so there won't be any difficulty about that.

Mr. Kanton: What is the date of the book?

Mr. Tucker: It is the third edition,—1942.

The Witness: That is correct.

By Mr. Tucker:

Q. Will you examine for me now so I can ask you some questions about them, those charts on pages 830, 831 and 832? I just ask you to examine them. When you have done so, you tell me, and I will ask you some questions.

A. (Examining) Well, I have examined them.

Q. Those describe, as to the first two charts, as I understand them, certain relationships between stock prices and business activity; is that correct?

A. The charts show the relationship between the common stock prices, industrial common stock prices, and business activity—industrial common stock prices and business activity; yes, sir. With that correction in your question, the answer is "Yes."

Q. That is all right. So far as timing is concerned, that chart on page 830 runs from the year 1883 on upwards, doesn't it?

A. That is correct.

Q. To what year—on page 830?

A. The chart is in two sections. The part on 830 comes down to 1906 and the part on page 831 which is a continuation of the same chart, runs from 1907 to 1930.

(Discussion off the record.)

Ralph E. Badger—Cross Examination (Cont'd)

Q. Dr. Badger, those charts on page 830 and 831 show a direct relationship, do they not, between—I know you are going to object, Mr. Condon—industrial stocks, as you say, and business activities; is that right?

A. Between industrial common stocks and business activity. It is quite important that the words "common stocks" be inserted.

Q. Doctor, would you say that there is any relationship between industrial common stocks and preferred stocks and bonds, in respect of their prices?

A. Not necessarily.

Q. Well, I asked you if you would say there is any. I don't think it is quite responsive.

A. It is impossible to make a generalization of this nature, because for the simple reason you have many different gradations in the quality of bonds, and you have many different gradations in the quality of preferred stocks. A low grade bond does tend to fluctuate with business conditions. Likewise, a low grade preferred stock will tend to fluctuate with business conditions. A high grade bond or a high grade stock fluctuates in accordance with money markets, and not in accordance with business conditions.

Q. I think I understand you. Now, will you just turn the page. That particular chart there is on a little different basis, as I understand it?

The Examiner: That is the chart on page 832, Mr. Tucker?

Mr. Tucker: That's right.

Mr. Condon: At this time I should like to request that the charts and page references which Mr. Tucker is employing and which are being examined by the witness be marked for identification as Preferred Stockholders' Exhibit 31 for identification.

The Examiner: All three of them?

Mr. Condon: I would like them marked, whatever the pages are here, 830, 831.

Ralph E. Badger—Cross Examination (Cont'd)

The Examiner: Let the chart on page 830 be marked Preferred Stockholders' Exhibit 31-A for identification, the one on page 831 31-B for identification and the one on page 832, 31-C for identification.

(Preferred Stockholders' Exhibits 31-A, B and C are marked for identification.)

By Mr. Tucker:

Q. Referring to the chart marked for identification as Preferred Stockholders' Exhibit 31-C, that is a little different from the other charts in that, as I understand it—you correct me if it isn't so—in this particular chart I guess you use, is it, production?

A. Federal Reserve Index of Industrial Production.

Q. Instead of what you called in the other charts, or what was referred to in the other charts as business activity; is that right?

A. Yes, sir.

Q. But it shows in the chart that we are now talking about—31-C, the same direct relationship, does it not, between the industrial common stocks, if that is with reference to that, and the production index?

A. It does—down to the year 1938. From the years 1938 on there is a substantial diversion in industrial production. From 1938 through the year 1940, which is covered by the charts, it advanced very substantially, whereas industrial common stock prices from the year 1938 down through 1940 either declined or remained stationary.

Q. Well, now, suppose you were to project that chart we are now talking about up to the present time. Would you think that perhaps there would be a harmony then between common stock industrials and production?

A. No, sir; there would have been a wide variation. The common stock prices declined down through May of 1942 whereas industrial production advanced very substantially during that period, from the 1940 level. So you

would have a continuation of the divergence at least through the middle of 1942. Then you would have had a period of possibly a year or a year and a half during which industrial stock prices advanced only slightly, whereas business activity was advancing very rapidly, and at the present time you would have a tendency for business activity to decline somewhat and industrial stock prices to advance very substantially.

Q. But your expert knowledge of such matters would lead you to the conclusion that that decline is not likely to last very long in production, wouldn't it?

A. Well, I wouldn't say that because the decline which I have reference to would be a decline from the war levels down to a peacetime basis. I am not referring at this juncture to a permanent decline of any substantial nature, but I think we would all agree that the state of business activity on a peace time basis would result in a lower level of industrial production than we experienced when Government expenditures were averaging $90,000,000,000 a year.

Q. Well, there is a lot of dammed-up deferred maintenance there is a lot of demand for gadgets that are dammed up, radios, and a lot of automobiles, and things dammed up?

A. That is true.

Q. And a multitude of things that you as an expert could tell me are, as soon as industry gets readjusted, going to come into the production area here, and will perhaps harmonize those two again, the stock prices and the production?

A. That is perfectly correct, and as far as one can prognosticate at the present time, business activity should remain at comparatively high levels for at least several years to come.

Q. Is it true, Doctor, that generally speaking—and you tell me the facts from your expert knowledge—that we perhaps without exception, after every war we have had what might be characterized, Oh, perhaps ten or fifteen years later, a deep depression?

Ralph E. Badger—Cross Examination (Cont'd)

A. That has been the experience in the past.

Q. Do you mean by saying that it has been the experience in the past, that it won't recur after this War?

A. I wouldn't make any generalizations as to what might or might not occur after this war for this reason: That after all prior wars the business expansion that took place, took place as the result of substantial increases in private borrowings in banks. The boom, so to speak, was financed by an increase in bank deposits, predicated by private borrowings, that is, borrowings of individuals and borrowings of corporations, and after the expansion had reached a certain point, contraction would step in, and a cycle of deflation would be started, as we proceeded toward the liquidation of those private debts.

The basis for the present coming expansion, if that is what we are going to have, is a vast increase in bank deposits and currency in circulation, all of which increase has been predicated upon Government borrowing, and you can trace very definitely the correlation between an increase in Federal debt and the increase in deposit currency and other currency in circulation.

Now, I asked myself, How are we going to ever deflate that type of bank credit? My answer is that only by a substantial reduction in the Federal debt, and it is my own observation—and I would state this here for the record, that I doubt that anybody in this room will ever live to see the day when there is any substantial reduction in our present Federal debt. Therefore, I do not look to see any substantial reduction in the present amount of deposit currency in circulation, and for that reason I say that it is impossible from an historical point of view to say that just because we had deflations after past wars, when private credit became contracted, that we are going to have a serious deflation after this war in the future, because I don't see how we are going substantially to curtail bank deposits through a reduction of Federal debt.

Q. Well, perhaps I don't understand too thoroughly what you say, but as a matter of fact, sooner or later, Doctor, the old economic laws of supply and demand with respect to capital are coming back into play in this country, aren't they—sooner or later?

A. Are you inferring by that that the laws of supply and demand aren't working at the present time?

Q. You can make your own inference about it, and I will ask you some further questions about it which I have in mind.

Mr. Condon: I would like to have the question, if there be a question, read to the witness.

(The record was read.)

Mr. Condon: I submit that answers that, and there is no question on the record for an answer by the witness.

Mr. Tucker: There is. He asked me a question, and I said he can make his own inferences, and now he can answer the first question.

The Witness: It is my opinion that the laws of supply and demand relative to capital have been operating in the past and will continue to operate in the future.

By Mr. Tucker:

Q. Subject, however, to certain Governmental controls that have been real substantial controls; is that true?

A. I don't know of any controls, any direct controls, that the Government has exercised over the capital markets. The Government unquestionably, through its various Federal Reserve Bank operations, has made conditions favorable to low money rates, but the Government has never stated that the rate of interest would be this or that. The Government has never restricted at any time during the war the rights of private corporations to enter the capital markets and to borrow. The Government itself has entered the capital markets and borrowed without any restriction, except technical restrictions in reference to subscriptions

to war bonds, to war loans, where certain types of borrowings have been limited in the amounts that they could buy of Government securities, but I would say, as far as direct controls are concerned, that the Government has not exercised any direct controls over the capital market.

Q. Well, I read about these open market purchases in the Federal Reserve System of Governments—doesn't that have the effect you are talking about?

A. That I would classify as an indirect means of influencing capital markets.

Q. In other words, they are pegging the Governments by open market purchases—you know what I mean by "pegging the markets?"

A. I don't quite understand your question, or the inference.

Q. I am not making an inference, I am asking you a question. If you don't understand what I meman by "pegging" I will try to explain, but I thought, as an expert, you would understand. Read the question.

(The question was read.)

The Witness: I didn't get that word "pegging". I thought you said "paying."

With that qualification, I would say that is correct.

By Mr. Tucker:

Q. Bankers do the same thing with respect to new issues, don't they? They peg at a certain price and they buy or sell to keep it at a certain price until the syndicating is over; right?

A. Investment bankers?

Q. Yes. They commonly do that, don't they, what they call "stabilizing?"

A. That is correct. In certain cases. They don't do it in all cases by any means. They do it in cases where they are distributing issues.

Q. That is what I said.

A. That is correct.

Q. Now, that introduces into your picture, doesn't it, a certain artificiality as to the price at which the security sells for in the market?

A. Are you referring to the operations of investment bankers, or to the operations of the Government?

Q. I am referring to both the operations of investment bankers and the Government.

A. I would say that was true, in reference to the operations of investment bankers, but I do not say that that was necessarily true in respect to the operations of the Federal Reserve Banks in the money market, because the operations of the Federal Reserve Banks definitely do increase the amount of available bank reserves, and as such make a fundamental change in the supply and demand equation that you referred to a short time ago, and as such bring about a natural situation that tends to maintain low interest rates.

Q. During the last war the total amount outstanding at the end of the war of Governments, as I remember, was approximately $24,000,000,000.

A. I think it was $26,500,000,000, to be exact.

Q. I accept your correction. I don't care about a couple of billions and a half. After this war we had Governments outstanding of what? $249,000,000,000, or something like that?

A. Approximately that figure.

Q. In the last war the Bonds that were issued by the Government in a series, if you will recall, declined in the market, didn't they?

A. They declined quite substantially.

Q. I am not holding you down to definite figures, but my recollection is that some of the Liberty Loans went as low as 70.

A. I would say the low point was nearer 80.

Q. Well, we will raise it 10 points, but it was very considerably under par?

A. That is correct.

Q. How did the Government meet that situation in the last war—by boosting the interest rate or the coupon rate?

A. In so far as the Government refinanced in an adverse money market, they had to increase the coupon rate on the bonds. The decline that you refer to down into the 80's, however, took place subsequent to the final War Loan in the last War, and the Government didn't do any financing that I recall at a time when the Liberty Bonds were down in the 80's. They did, however, in the latter part of the war, raise the coupon rate up to as high as 4¼ percent, as I recall it.

Q. 4¼ was the last Liberty Loan, is my next question to you. That is right, isn't it?

A. That is right.

Q. They started in around 3, perhaps?

A. 3 to 3½.

Q. And there weren't any open market purchases that I remember, at that time, were there?

A. No, the Federal Reserve System was introduced just prior to the commencement of World War I, and as between World War One and World War Two, very substantial changes have been made in the Federal Reserve System and in the operation of the system, but there were no open market operations at that time, as we now know them.

Q. And the Government had to go and pay the going concern rate for money in competition with others, although, as I recall, they did control to some extent, capital issues—had to show they were necessary, or something of that kind; that's right, isn't it?

A. Yes.

Q. My recollection is they were rather liberal in that policy with respect to capital issues?

A. I don't recall specifically what the controls were.

Q. Suppose that in this last war that we have just been through, Doctor, with instead of having $26,500,000,000 out-

standing, as we did after the last war, they had $249,000,000,000 outstanding——

* * * * *

[R., p. 1425] By Mr. Tucker:

Q. —and the $249,000,000,000 outstanding, and the Government hadn't exercised any of these artificial controls to peg the coupon rates, where do you think the large issue of Government bonds would have been selling?

Mr. Condon: I object to the question on the ground that it is confusing, that it confuses the wars and the form of the question is objectionable.

By Mr. Tucker:

Q. Let me ask the witness: Do you understand the question?

A. The question as it stands, to my mind, is confusing in this respect: It says "Suppose that after this last war we had had $249,000,000,000 outstanding instead of $26,500,000,000 and it seems to me that is what we do have outstanding after this last war—$249,000,000,000 or $250,000,000,000.

The Examiner: I think the trouble with it is you are referring to this last war, meaning the war of 1917-18, as the "last war" and the current war——

Mr. Tucker: World War Number Two.

By Mr. Tucker:

Q. At the end of World War Two you said, Doctor, that we have outstanding Governments of $250,000,000,000—let us not quarrel with a billion or so; small in percentage, isn't it?—and I am asking you, and it seems to me to be a rather simple question, that if the Federal Reserve System hadn't been conducting open market purchases, if the whole drive of the Government hadn't been to keep down interest rates, where do you think that Governments in the last issue would have gone, so far as coupon rate is concerned?

A. Well, that would be a difficult question to answer. For example, proportionately I believe Great Britain borrowed very substantial amounts of money, possibly on a proportionate basis as much as we have borrowed, and yet not having any Federal Reserve System there, but having a central bank, to be sure, they nevertheless had very low interest rates on all of that borrowing, paralleling our own low interest rates. If you are asking me what would have happened to interest rates in this last war if we had not had a central banking system my answer would be that I don't know. I couldn't state what would have happened to interest rates.

I doubt that would affect a system that the Government would have been able to borrow as much money as it had to. It may have elected to use other means to obtain the necessary capital to pursue the war.

Q. It couldn't have gotten much more in taxes——

Mr. Condon: Let the witness complete his answer.

The Witness: We would have entire changes in all of our conditions and all of our assumptions, and to go into speculation as to what might have happened or how the war might have been financed or pursued, or what would have happened to interest rates, it seems to me would be far beyond my ability to predict at this time. I could go on for hours and discuss various possibilities that may have arisen under those circumstances, but I don't believe it would be helpful.

The Examiner: Let us take a short recess.

(At this point a short recess was taken, after which the hearing was resumed.)

The Examiner: Let us come to order.

By Mr. Tucker:

Q. Do I understand, Dr. Badger, that you support the thesis that if the Government controls hadn't been work-

ing, bond yields and high grade preferred yields would be about the same as they are now?

The Examiner: Read that question, please.

(The question was read.)

The Witness: I don't recall that I made any such statement.

By Mr. Tucker:

Q. I am asking you if you support that thesis. I wasn't referring to anything that you said in the past. Do you now support that? Is that your position now?

A. I wouldn't attempt to state what bond prices would be or what the yields on high-grade preferred stocks would be under a different central banking system or in the absence of any central banking system. The controls that the Government is exercising at the present time are indirect controls that are being exercised through the Central Banking System. You are asking me what would happen to preferred stock prices, and bond yields in the absence of such a system. I would say that I couldn't answer that question without knowing what might be substituted in lieu thereof, or what other changes at the same time might be involved in your hypothetical question.

Q. Well, it is rather obvious, isn't it, doctor, that if the same lack of control which was exercised during World War I was exercised in World War II, those yields would be higher than they are now? I refer to the bond yields and the high grade preferred stock yields.

A. I think that is a reasonable assumption.

Q. Would you go so far as to say that they would be appreciably higher?

A. I believe so.

Q. But you don't think you are wise enough to tell me how much?

A. That is correct.

Ralph E. Badger—Cross Examination (Cont'd)

Q. You are familiar in general with Standard and Poor's indices, aren't you?

A. Yes, sir.

Q. Generally familiar?

A. Yes, sir.

Q. You must be, as an expert, aren't you?

A. Yes, sir.

Q. It is one of the things you have to keep up, don't you?

A. That is correct.

Q. I show you what purports to be—if you think it hasn't sufficient authority to be at all relied on, you can say so—a Standard and Poor Index with respect to high-grade preferred prices, as I understand it, or yields. I haven't asked you any question—I just show it to you and let you examine it. I will ask you a question in a minute.

A. Is there a question?

Q. No, there is no question yet. Have you examined this?

A. I have examined this, yes, sir.

Q. This chart purports to show, does it not, Doctor, price trends of high grade preferreds plotted on a yield basis; is that right?

A. That is what one of the charts purports to show.

Q. I refer particularly to this chart in the middle, Doctor?

A. Yes, sir.

The Examiner: May we have it identified?

Mr. Condon: May we have that identified specifically? I ask that it be marked Preferred Stockholders' Exhibit No. 32 for identification.

The Examiner: Let us have a description of it.

Mr. Tucker: I just described it in my question.

Mr. Condon: Mr. Tucker, would you mind stating what that index purports to show?

Mr. Tucker: That purports to give the price trends computed on a yield basis for the years 1942, 1943, 1944 and 1945.

The Examiner: Let it be marked.

(Preferred Stockholders' Exhibit No. 32 is marked for identification.)

By Mr. Tucker:

Q. Doctor, that shows for those years a very marked change in those prices, doesn't it?

A. It shows a constant advancement in prices, yes, sir.

Q. Well, it isn't constant, because there is a dip at the beginning, isn't there? There is a dip at the beginning of that chart, isn't there?

A. From the early part of '42, that is correct.

Q. There is a dip in the middle?

A. Yes, sir.

Q. And quite a marked dip in the middle of '42.

A. That is correct.

Q. This relates to high grade preferreds?

A. Yes, sir.

Q. Your report, Preferred Stockholders' Exhibit No. 29, says that Engineers Preferred is not a high grade preferred, doesn't it?

A. Says what?

Q. It is not a high grade preferred.

A. That is correct.

Q. Have you any reason to doubt the accuracy of that chart?

A. No, sir.

Q. It is the kind of thing you use constantly in your work as an expert in valuing securities?

A. Yes, sir. As a matter of fact, my own charts or my own series of data on page 6 indicates exactly the same situation. Yield for High Grade Preferred stocks for the year 1941 was 4.08, the average yield for the year 1942 was 4.31, and the yield for the year 1943 was 4.06. So you have a difference of approximately .23 in terms of yield as between 1941 and '42, and that is approximately the differ-

ence in yield as indicated, I believe, on the chart that you refer to in the year 1942.

Q. In the first year on this chart, 1942, the yield varies, doesn't it, from 4.25 to nearly 4.60; is that right?

* * * * *

[R. p. 1433]

The Witness: The yield varies from approximately 4.24 to approximately 4.55. That is by visual inspection. 4.24 to 4.55 would be my interpretation of it.

By Mr. Tucker:

Q. That is a considerable variation in one year for something that you characterize as of a permanent nature, isn't it?

A. I don't think that changes the implication of the paragraph in my report in which I referred to the permanency of the prices that I am using in connection with my appraisal here. I think my use of the word "permanency" in a connection of this kind should be possibly explained, as I explained it in my testimony yesterday. I was very careful in my testimony yesterday referring to this particular paragraph to say that in view of present circumstances and as far as one could reasonably predict these were permanent values. I wouldn't be so bold as to say that anything in our economic structure was permanent in the way that we regard the Rock of Ages as being permanent. It would be fatuous for me to make a statement of that kind. When I say that these prices are permanent and not speculative, I refer to them as being permanent as far as we can reasonably predict into the future at the moment, barring what you might call a holocaust such as World War III, barring some great critical movement that can't be forecast at the present time. I wouldn't get up here and say that any series of prices was permanent ad infinitum, but

Ralph E. Badger—Cross Examination (Cont'd)

I say they are to be regarded as permanent prices as contrasted with speculative movements in the market.

We have prices of securities sometimes running up for a few weeks and then coming down, because of a speculative movement or because of a manipulation in the market, or something of that nature. What I wanted to point out was that these values which I place on these stocks weren't just temporary, day-to-day values that might result from a speculative movement that had brought them up to some particular level which they wouldn't retain for any substantial period of time; they are permanent values one can reasonably predict into the future, values that probably will be maintained for a period possibly of three to five years, and in the absence of some possible worldwide event that we can't predict at the present time, I think, with that clarification, possibly we get a better diagnosis of the situation that you refer to.

In that particular chart the drop that you refer to there occurred in the first part of 1942 and that drop accompanied the decline in the military status of the Allied powers during the early part of 1942 following the attack on the United States by Japan in 1941, and was due to a set of circumstances that were entirely unusual and of, we hope, a non-recurring nature.

Q. Well, Dr. Badger, if you will read the paragraph on page 7, the second paragraph from the bottom, you don't make any qualification there such as you made in your testimony and now make, do you?

A. What paragraph did you refer to?

Q. The second paragraph from the bottom of page of preferred stock exhibit No. 29.

A. I didn't expand on my use of the word "permanent" in this report to the extent that I did in my testimony yesterday, and to the extent that I have at the present time, but in testifying in respect to this report yesterday I was very careful to explain that these values that I set were permanent as far as one can reasonably predict at the

present time and they were not to be regarded as of a temporary or speculative nature, and I will make that same qualification or explanation in reference to that paragraph at the present time, if you would like to have me.

Q. Don't you think you should fairly do it, if you make it in your testimony and you make it now?

A. I think that is correct.

Q. Well, just what would you like to add to that paragraph, the second paragraph from the bottom of page 7, to make it reflect what you now say it needs to reflect in order to be accurate?

Mr. Kanton: Off the record.

(Discussion off the record.)

The Witness: The values which I propose to place on the several classes of preferred stock of Engineers Public Service are, therefore, values of a permanent nature as far as one can reasonably predict at the present time and not values of a temporary or speculative nature.

By Mr. Tucker:

Q. And you now make that amendment to that paragraph, do you?

A. Yes, sir.

Q. Now how far can one reasonably predict the future, Doctor?

A. That depends on the nature of the matter that you are trying to predict. I think in a case of this kind, and I will always say barring something of an entirely unpredictable nature, such as a world war, that it is possible to predict somewhere between two and three years, up to five years.

Q. Now, in your private business, Doctor, if you know what I mean, if you don't, ask me, did you ever in your experience advise a client to buy a certain security and tell him that the money he put into it he should always

get back, as far as you could humanly predict, in your private busjness?

A. Yes, sir. I am doing that every day.

Q. You are telling them that, as far as can be humanly predicted, they can always get their money back?

A. That is correct.

Q. Just what they put into it?

A. That is correct.

Q. And what character——

A. As a matter of fact, I would go so fa——

Mr. Condon: Just let him finish, if you please.

The Witness (Continuing): —as to say that 90 per cent of the investments that I recommend, that they will get their money back, together with the rate of interest or the rate of return that they anticipate getting when they make the purchase of the security, and I couldn't operate on any other basis, and I invest for clients, and in the interests of clients, a great many millions of dollars a year on that same assumption, and I have done so for a great many years.

By Mr. Tucker:

Q. And you tell them that when you recommend a purchase?

A. That is right, yes sir. I don't say it in respect to every purchase, but I have always made that statement when I proceed to administer an account that that is the assumption and if there is any different idea on which an investment is recommended I would so state in making the recommendation.

Q. When did you last recommend the purchase of a medium grade preferred stock of a holding company, if you ever did that, and tell them that the investment that they make was of a permanent character, so far as one could humanly predict the future, and that they could, in your opinion, always get their money back?

Mr. Condon: I object to that question as being distinctly unfair. The Public Utility Holding Company Act with re-

spect to its impact on holding companies has a direct relationship to the preferred stocks of holding companies and the suggestion by this question that Dr. Badger could have advised his client with respect to that is absolutely baseless, unfounded and speculative.

Mr. Tucker: Let him answer. All he has to say is that he hasn't done it and it is over with.

Mr. Condon: I know that you want to be fair, Mr. Tucker.

The Examiner: I will overrule your objection, Mr. Condon. I think Mr. Badger is fully capable of answering that.

The Witness: I said in respect to 90 per cent of the investments that I made that I have made the statement, or the statement was understood between me and the client, that they would get their money back, together with the stated return. Ninety per cent of our business is with banks and banks, of course, are not permitted to buy preferred stocks and, therefore, the types of investment that I have recommended for the banks have been bonds and bonds of a character that gave reasonable assurance they were going to get their money back.

By Mr. Tucker:

Q. Well, now, you say reasonable assurance. There is a little different connotation, isn't there, Doctor, between reasonable assurance and so far as it is humanly possible to predict the future?

A. That certainly, as far as one could predict, they were going to get their money back.

Mr. Tucker: I submit, Doctor,—I won't ask to have it stricken, because it might add something to the record—that you haven't answered my question and I ask the reporter to read it back and then I would like to have you answer the question.

(The question is read, as follows:)

"Q. When did you last recommend the purchase of a medium grade preferred stock from a holding company, if you ever did that, and tell them that the investment that they make was of a permanent character, so far as one could humanly predict the future, and that they could, in your opinion, always get their money back?"

The Examiner: I think he answered the question indirectly, at least, Mr. Tucker, in that he advised you that he was representing banks who did not buy preferred stock and only bought bonds, from which I assumed he intended to say that he had never made any recommendations with reference to preferred stock.

Mr. Tucker: He didn't say it. He said that as to 90 per cent of his business he was advising banks and insurance companies. He left the inference that as to 10 per cent of his business he was advising other clients, and I asked him and I think I am entitled to an answer.

The Examiner: Will you answer the question directly, Mr. Badger?

The Witness: Well, I would say that I don't recall that I have ever recommended the investment of a medium grade preferred stock to a client, a medium grade public utility preferred stock to a client.

By Mr. Tucker:

Q. Why not, Doctor, if you think that you are capable of telling them that they can get their money back, so far as it is humanly possible to foresee the future? Why do you avoid that kind of an investment with your private clients, if it is of that type?

A. Because the clients that I advise are all banks or they are individuals with very substantial incomes, pay very high taxes, and require, as far as individuals are concerned, a tax exempt investment.

Q. But if you had a small client, who wasn't so concerned with his income tax, you wouldn't hesitate to recom-

mend a medium grade preferred stock with the same qualification, Doctor?

A. That is correct. I can think of several instances in which we have recommended preferred stocks, now that I look back. We were administering some small trust accounts for some of our banking clients and among preferred stocks that we recommended I believe was Consumers Power $4.50 preferred and also the $5 preferred. We were fairly heavy purchasers of that stock for these smaller accounts during the past few years, until the stocks got up to sell in excess of the call prices.

Within the last several years we have recommended the purchase, I believe, of Narragansett Electric preferred stock.

We have recommended, at certain levels, the purchase, I believe, of Columbia Gas & Electric preferred stock.

I don't recall of other stocks, but those are some of the stocks that we recommended at certain prices.

Q. Let's take Narragansett Electric. Do you recall what price you recommended its purchase at? Wasn't that one of the companies, Doctor, that you said you recommended the purchase of?

A. That is correct. My recollection is that that is a $50 par value, or at least it is either a $3 preferred or a $2.50, the coupon I forget at the moment, and I believe we recommended that at the time the stock came out at 52½ or 53.

These things happened several years ago. There have been many other transactions, and I can't be specific as to the date and price, but that is approximately the range.

Q. And do you recollect whether there was any reaction in the market after it came out?

A. My recollection is that the stock went up slightly after it came out.

Q. That sometimes happens, too, doesn't it?

A. Yes.

Ralph E. Badger—Cross Examination (Cont'd)

Q. Now, let's take your Columbia Gas & Electric. That was the other one, wasn't it?

A. Yes.

Q. Tell us the circumstances of that recommendation.

A. Yes. We recommended that stock, I believe, shortly after the change in tax rates, some time in the early '40s, when the stock was selling at comparatively low levels. I think the stock was down around 70 or 80 at the time we recommended that stock.

Q. And after you recommended it it never went below what you recommended it be purchased at?

A. I don't believe it did. My recollection is it started to go up.

Mr. Tucker: I may come back to that subject, Doctor.

I again show you your book, Doctor, and this time I will ask to have marked as Applicant's Exhibit for identification No. 72 the chart on page 851, and I hand that chart to you for examination.

(The document referred to is marked as Applicant's Exhibit No. 72 for identification.)

Mr. Condon: May I examine that for a moment, please?

Mr. Tucker: When you have examined it let me know, Doctor, and I will ask you the questions.

The Witness: All right.

By Mr. Tucker:

Q. Now, Doctor, the chart in your book at page 851, identified as Applicant's Exhibit No. 72, shows, does it not, the monthly high and low closing averages on a logarithmic scale of industrial stocks—you don't say they are common stocks, but I presume they are, is that right?

A. I would have to examine that a little more closely.

Q. Well, are they common stocks of industrials?

A. The chart on page 851 is the Dow-Jones Averages of Industrials for the years 1897 to 1941, inclusive, and it has the Dow-Jones index of public utility common stocks

for the years, well, either 1928 or 1929, down through 1940.

Q. And would you say, roughly, Doctor—I am not trying to be tricky or unfair—brother Condon thinks I am, but I am not—would you say roughly that the public utility stocks follow in general the industrial stocks on that table?

A. No, I would not.

Q. Well, you go ahead and describe what the table shows. It looks so to me, as a layman, but you describe it.

A. The public utility stocks did follow the industrials from the years 1928 or 1929 down through the years 1932. From then on the correlation did not continue, for the reason that from 1933 on the public utility industry became the subject of very serious and a very protracted political legislation and dispute, which eventually culminated in the passage of the Public Utility Act in 1935 and the impact of that Act I don't think was fully appreciated by investors at that time, with the result that for a long period of time, because of the attitude of the then existing administration, because of the disclosures that were made in various congressional investigations, because of the constant series of political attacks that were made on the industry, these securities remained under a cloud, with the result that when the recovery in industrials set in in 1933, 1934, utilities, although they did advance to some extent during that period, did not come up anywhere near to the relative levels that they sold at as compared with industrials in the earlier years.

Q. Now, will you turn, while you have the book there, Doctor, to page 348?

A. I have 348.

Q. Do you on that page say—and I will give you a little time to find it after I start reading it—do you say, "Investments in electric light and power operating companies as a class . . ." and then I will continue later when you

have found that expression, if it is on that page. Do you find it?

A. "Investments in electric light and power operating companies as a class . . . ", yes.

Q. Go ahead and read the rest of the sentence, please.

A. Do you wish me to read it?

Q. Yes.

A. " . . . warrant a high rating at the present time (1941) in view of their depression record, although they are currently threatened by inflation and hostile political activity."

Do you wish to me to continue?

Q. Yes. That is far enough, unless you want to continue.

Mr. Condon: Does that portion you have read reflect the sense of the entire context, Dr. Badger? If it does not, would you continue and read the entire paragraph?

The Witness: I believe that contains it.

Mr. Condon: Thank you.

By Mr. Tucker:

Q. Now, Engineers Public Service Company at the present time has three electric light and power operating companies, hasn't it?

A. Yes, sir.

Q. And you have made your valuation, I take it, on the assumption that they will continue to control those three companies, as a holding company?

A. Well, I made a supporting valuation also on the assumption that they could eliminate two of those operating companies through certain operations and that would not affect the values.

Q. But you did make your value primarily, I take it, on the basis of the continued existence of these three operating companies in the holding company system, that is fair, isn't it?

A. Yes.

Ralph E. Badger—Cross Examination (Cont'd)

Q. Now, in 1942 was Engineers subject to threatened inflation and hostile political activities which you mentioned?

A. To the same extent that other holding companies operating electric light and power operating companies.

Q. Are you through?

A. Yes, sir.

Q. And would you say that at the present time the Engineers securities are threatened by possible inflation?

A. To the same extent any other electric light and power company is.

Q. Well, is any electric light and power company at the present time threatened with possible inflation?

A. I believe there is a possible inflationary threat to the utility industry, which threat, of course, is contained in the time lag that might exist between the ability of companies through their regulatory bodies to get price rises concomitant with advances in operating costs that might develop through inflation. That is the sense in which a utility company is threatened by inflation. Inflation doesn't threaten to wipe them out, or anything like that. It simply might threaten for brief periods of time to effect some reduction in their operating profits because of that time lag.

Q. Well, you say brief periods of time. Did you ever try to get the rates of a public utility raised?

A. Well, I have never been an attorney representing a utility company and, therefore, I have never attempted to get a regulatory body to advance rates.

Q. Did you ever have any occasion to consider that particular problem as an expert in security valuations?

A. Yes, sir. We are continuously confronted with that problem.

Q. And do you go on the supposition in making your values that in a fairly brief period of time a public utility operating company can get its rates raised?

A. We have gone on the assumption that the various regulatory bodies would follow the laws in respect to the

granting of rate increases to the point of protecting the integrity of investments in the company.

Q. How long a period of time do you think it takes to get the protection of laws?

A. Well; I think that would vary with the regulatory body.

Q. And the courts?

A. And the courts.

Q. And the length of time it takes to get a case from the regulatory body to the courts and then perhaps the Supreme Court of the United States, to your ultimate protector, so to speak?

A. Where it has to be carried that far——

Q. Well, there have been plenty of cases involving rates that have been carried that far, haven't there?

A. Yes, and there have been many cases that have never gone before the Supreme Court.

Q. That is true, too, but how long a period of time on the average do you think it would take to go through that mill to the Supreme Court of the United States, where your ultimate protection might lie?

A. Well, that might require a period of several years to go up to the Supreme Court, if that became necessary, I would assume.

Q. And meantime if you had a serious inflation, that would result in increased, or might result in increased wages that you had to pay?

A. That is true, but, on the other hand, you might find during that period a substantial increase in business activity which might permit the company to absorb the impact of inflation during that period. In other words, usually periods of inflation are accompanied by increases in business activity and increased business activity results in heavier demands on electric and power companies, all of which might tend to offset during that period the temporary impact of inflation. That is a possibility. I mean, there

are a great many factors that you have to take into consideration.

Q. And it might result in very material increases of prices in all of the supplies that an operating utility company might have to have, fuel, steel, copper, and all of those things?

A. Well, any period of inflation would result in advances in these commodities, yes sir.

Q. Have you ever had occasion to consider, in the kind of a situation we have been talking about, what the effect of Government competition is on the raising of rates?

A. You mean the competition of other utility companies operating within the same area and furnishing the same type of service?

Q. No. I said Government competition, competition either by state bodies or the Federal Government.

A. Yes sir, we have had occasion to consider that.

Q. And what effect did you find that that kind of competition had on your ability to raise rates?

A. Well, in certain cases it has resulted in the sale of some of the operating properties to the municipality. In other cases it has resulted in possibly a maintenance of a given rate structure, or the lowering of a rate structure. I mean, the results have varied depending upon the particular circumstances.

Q. Well, isn't it true that if you have a competitive situation in the electric light and power field that you are unable, for economic reasons, to go to your Commission and the courts for any relief on your rate structure, isn't that true?

A. Well, naturally if you had two competing companies operating in the same territory and supplying the same types of service, competition would be the regulator of rates and not the regulatory body, but one of the peculiar characteristics of the utility industry is the fact that it is classified as a public necessity, that as a rule you can not operate economically two or more systems in a given com-

munity, with the result that it is a natural monopoly, and being an industry clothed with a public necessity and being a natural monopoly it has become necessary to develop and apply the theory of public regulation in respect to the operations of these companies. Now, generally speaking, public utility operating companies, electric light and power companies, enjoy monopolies in the territories that they are serving, and we go on the assumption that they are monopolies, unless we find out, as the result of our studies, that a contrary situation prevails.

Mr. Kanton: May I ask a question?

Mr. Tucker: Go ahead.

By Mr. Kanton:

Q. Isn't it also true that there would be competition in a given area between a gas utility and an electric utility? Have you come across that in any of your studies, Dr. Badger?

A. Not to any appreciable extent. There is naturally some competition between gas and electric light and power, but that is restricted now to only certain types of uses, but I would say that generally speaking each type of utility had its own types of demand which it serves without serious competition, except within a fairly small range of users, let me put it that way.

Q. Do your mean space heating for one?

A. Space heating or cooking, but generally speaking, for all power purposes and for all lighting purposes we find that electricity is the more economical. For certain industrial uses, for space heating and for cooking——

Q. There is competition?

A. (Continuing)—there is competition.

Well, there is no competition, as I see it, in the space heating as between electricity and gas, if I understand space heating to mean the heating of buildings, and so forth.

Q. Heating of buildings and homes.

A. I would say there is no competition there between electricity and gas.

Q. If I understand it, I have had it brought to my attention that there is some competition expected in the immediate future between gas and electric, competition in acquiring the rights to heat homes?

A. Possibly the electric industry is going to develop a rate structure or a type of heating unit that could be economically utilized for space heating, but up to the moment the cost has been all in favor of the gas company and I don't think the utility companies have relied much upon that type of demand. That has been my experience.

Q. Well, in those two limited fields that you have just mentioned, where there is competition, to that extent, or to some extent, that takes the place of the regulatory authority in the particular neighborhood where both the gas and the electric utilities are operating, is that correct, Dr. Badger?

A. It would, and it would, of course, not affect the entire rate structure, but it would only apply to the rates applicable to current that might be devoted to those specific uses.

Mr. Kanton: Thank you.

By Mr. Tucker:

Q. Doctor, there are situations in this country where we have competition in particular areas or threatened competition, are there not?

A. There are areas where the Government has consummated the development of hydroelectric projects and in the areas served by those developments there has been competition with private utility companies.

Q. Yes, and would your experience lead you to believe that that threat of competition extends outside of the particular area in which the Government serves?

A. Not to any appreciable extent; that is, not that type of competition.

Q. Well, I don't see what you mean by your answer, but let me ask you some further questions.

A. I refer to the competition of electric power that has been developed through these Government propects. There is an area in which that can be distributed economically and there is a geographical area beyond which that current can not be supplied economically, so that I don't think the competition from these Government projects is felt beyond, you might say, the area in which that current can be distributed economically.

Q. Have you given some thought to the patricular problem or are you more or less extemporizing?

A. I beg your pardon?

Q. Have you given some thought to that particular problem, or are you in that answer more or less extemporizing?

A. Do we give thought to it?

Q. I say, have you given thought to it?

A. Indeed, yes sir.

Q. Isn't it true that around the area of TVA's operations the people in those areas are conscious of what they feel are advantages that they can gain from Government operation?

A. Yes, sir.

Q. Because of the fact that the Government pays no taxes, has multiple service involved and can allocate costs more or less arbitrarily, and all that kind of thing. Now, they see certain advantages arising from those economic factors, don't they?

A. Yes, sir.

Q. Outside of that area?

A. Yes.

Q. And they are conscious of that fact, aren't they?

A. Yes, sir.

Q. And don't you think that that leads to a threat of competition in these other areas?

A. Not so much a threat of competition as a threat of political pressure against these other companies, possibly to bring rates into conformity with rates within the areas.

Ralph E. Badger—Cross Examination (Cont'd)

Q. Well, in the face of that kind of a situation that I have described, do you think a company in the outside area would ask for an increase in its rates?

A. Do I think it would ask for an increase in its rates?

Q. Yes.

A. Under the impact of inflation?

Q. Yes.

A. If it felt that it was entitled to it, I believe it would, yes sir.

Q. And run the risk of stirring up Government competition in that area?

A. It wouldn't necessarily run the risk of stirring up Government competition in that area. There might be no facilities for developing Government projects within the area. The Government isn't just going to go into every area in the country and start a steam plant. It isn't going to undertake a small hydroelectric development within every area. It has confined its activities primarily to navigable rivers and where there are other projects combined with the utility development that made it a logical project for the Government to undertake.

Q. Well, you say the Government isn't going to do it. Don't you think that a gentleman by the name of Ickes has something like that thing in mind, even to the development of steam plants?

(At this point there followed a discussion which by order of the Trial Examiner was physically stricken from the record.)

The Witness: I would like to make one slight change in my answer.

By Mr. Tucker:

Q. Yes, you may do so.

A. I believe I made the categorical statement that the Government would not do this. I should change that to

read that the Government in my opinion would be unlikely to, if I can make that change.

Q. Now, you have read the record in this case rather thoroughly, haven't you?

A. I beg your pardon?

Q. You read the transcript of testimony in this case rather thoroughly?

A. Yes, sir.

Q. Do you recall——

Mr. Condon: Just a second. I don't think Mr. Badger got the question. Would you please the question?

The Examiner: He asked you if you read the entire record in this case.

The Witness: No, sir. I have not read the entire record.

By Mr. Tucker:

Q. Did you read those portions of the record which had to do with testimony by Mr. Barnes, the president of Engineers, as to threatened or probable Government competition?

A. I read certain parts of his testimony in which he referred to that. If it would be proper for me to refer to his prepared testimony, I could find that much more readily than I could the testimony as actually given in the record, and I assume there is no substantial change between his prepared testimony and the record.

Mr. Tucker: Mr. Barnes informs me, Mr. Badger, that that was not in his prepared testimony, that that was brought out on cross-examination either by Mr. Scheetz, Mr. Condon, or Mr. Kanton.

Mr. Condon: Let's look at the prepared testimony first, if you don't mind.

Off the record.

(Discussion off the record.)

The Witness: The part that I read appears on pages 219 and 220 of the record in this case.

Ralph E. Badger—Cross Examination (Cont'd)

By Mr. Tucker:

Q. And what, in general, had that to do with, Dr. Badger?

A. It had to do with competition of federal projects.

Q. You say it had to do with competition of federal projects?

A. Yes, sir.

Q. In very general language?

A. I thought it was rather specific.

Q. And you weren't aware of the fact that in respect of his cross-examination he took up specific projects of the Government and detailed them one after another?

A. I didn't read the cross-examination and I am not familiar with what developed on cross-examination,

Q. And you made your valuations of your preferred stock in this case without reference to the testimony given in this case by Mr. Barnes in detail in connection with Government competition, is that true, Doctor?

A. In so far as testimony on cross-examination varied from his direct testimony. If there was any change developed on cross-examination that was not contained or implied in the direct examination, and to the extent that such a change exists I did not give consideration to it.

* * * * *

[R. p. 1459] By Mr. Tucker:

Q. Dr. Badger, did I understand you correctly this morning to tell me that you saw some signs in present conditions of the possibility of inflation?

A. I believe I said that there were factors in the economic structure today which might, conceivably lead to inflation.

Q. Inflation has some effect, does it not, on high grade bond and preferred stock prices?

A. On prices?

Q. Yes. Well, indirectly.

A. Not necessarily.

Q. Well, will you explain what you mean by "not necessarily"?

A. I will be very glad to. I think that we would all agree at the moment that we did have the threat of inflation, and I think we would agree that up to date there has been some modest inflation in wages and prices. It used to be the general idea of economists that as one approached an era of inflation, or as one progressed into an era of inflation, that high grade bond prices and high grade preferred stock prices would drop and the yields thereon would advance, but the entire experience of our economy under its present set-up is counter to that point of view.

For example, in the face of this inflation and with such inflation as we have already had, we have had right down to the present time a consistent advance in bond prices and in the prices of high grade preferred stocks with a concurrent reduction in the yield thereof, so that that correlation that was economic doctrine five or ten years ago finally has got to undergo a change.

I believe that we would find high grade preferred stock prices and bond prices today to be governed over considerable periods of time by funds available for investment, funds seeking an investment, and the supply of available securities on the other hand, and that, I think accounts for the fact that high grade bond prices and preferred stock prices today are going right on into higher levels with a concomitant reduction in yield, whereas you might argue on the basis of previously accepted doctrine that we should have a decline. We haven't had decline, we have had a continuous advance.

Q. Isn't that because of an economic lag in the situation, perhaps?

A. I don't think so. I think it is due to relations between the supply of investable funds on the one hand and the

supply of available investment opportunities on the other hand.

Q. Doctor, have you changed your opinion in this respect since you wrote your book?

A. Yes, I have been changing my opinion in that respect quite definitely during,—well I would say the past five years. I think that you will find some change in that particular phase of general economic theories.

Q. This book came out in the third edition—that is, three years ago, isn't it?

A. Yes.

Whereas it may have been printed in '42, it probably was written in parts of '41 and '42.

Q. In any event you don't recollect that you developed the theory that you just expounded in your book, do you?

A. No, sir; I am quite sure that I did not.

Q. Well, there is one thing that is rather basic in economics, isn't there, and that is that you by and large find it difficult to change human nature?

A. That is true.

Q. In a period of rising prices, doctor, when an individual has a fixed income security, he gets into a somewhat embarrassing situation, doesn't he?

A. I wouldn't agree with you that he got into an embarrassing situation, necessarily. As I interpret the word "embarrassing" I would say that the holders of fixed income bearing securities, as well as the owners of life insurance policies, as well as the owners of deposits in banks, as well as the owners of dollar bills in his or her pockets—any such owner becomes affected by a decline in the purchasing power of, let us say, his money, or his money as represented by these other types of securities. That does not mean, however, that the dollar price of those securities declines also. His purchasing power may decline, but the dollar price of the security isn't required to decline also, because the dollar bills that he had in his pocket declined in purchasing power, and he still may receive $100 for his

bonds and his par for his bonds, he may receive his interest as stated, and the market price of his bond can continue to remain at 100, but he is nevertheless injured, because the $100 that he gets from his bond will only purchase 75 percent of the quantities of goods that those same dollar bills would previously purchase, or 50 percent of the amount which could previously be purchased, depending upon the advance in prices, depending on the degree to which the inflation occurs. It is a common error to feel that inflation per se is going to restroy market values of fixed income bearing securities. A dollar bill is always worth a dollar bill. A $100 short-term Government Bond is aways worth $100. That isn't the question.

The question is what will the $100 buy in the way of goods? That is why the holders of fixed income bearing securities, as well as the owners of these other types of securities and evidences of debt or money are affected by rising prices and are, to use your term, embarrassed.

Q. Human nature being what it is, it is true, isn't it, that a man who sees his purchasing power fading away because of the fixed interest or dividend nature of his securities, certainly has an urge to increase his income; isn't that true?

A. He may have an urge to, but he may have an inability to do it.

Q. Well, let's see about the inability. Are stocks at the moment on somewhat the same comparative yield basis —I may not be using technical terms; I hope you see what I mean—as bonds and high grade preferreds? Isn't there an advantage to a man that has a fixed income bond or a fixed income high yield preferred stock at the present time to get some common stocks with this money and get a larger return that he could from the bonds and preferred stocks?

A. In cases, that may be perfectly true.

Q. That would at least have a tendency, wouldn't it, to lower the price of the bonds and raise the yield of the bonds and the preferred stocks? A tendency, I say.

A. There might be other factors that would far outweigh that. That factor in itself, and even alone, if that were the only factor in a complex economic structure such as we have, if that were the only factor that was in operation, that might be sure to depress the prices of fixed income bearing securities, but it is perfectly evident, without going into any theoretical demonstration, we can prove empirically there must be other factors far outweighing that because of the fact, as I say, common stock prices are advancing, indicating that people are desirous of purchasing them, but preferred stock prices and high grade bonds are advancing pari passu?

Q. Yes and I suggest with respect to that, that there might be a lag in there. You don't have to answer that question. It is just a statement to clarify my next question. Isn't it true, Doctor, that our experience with other inflationary periods—and we have had some of them, haven't we? Isn't it true that our experience with those periods has been that our bond yields have risen and bond prices have fallen?

A. That is true—and with very much less in the way of a time lag than you are supposing to exist in the present case. But, as I have previously stated, there are fundamental differences in our entire banking structure today than existed in those past times, and we have forces today which may, for a very considerable period of time, maintain bond prices at much higher levels than they would otherwise be. They may maintain lower interest rates than we would have under different circumstances.

As I have tried to point out in my study here, I believe that this level of interest rates—and again I use the term "permanent" with the same qualifications that I did, namely, as far as one can reasonably predict—I believe that interest rates are going to remain at these levels. And I might even suggest the possibility of interest rates going to lower levels than we are experiencing at the present time. I believe one of the concerns of the Federal Reserve

authorities today centers around the question, not of supporting interest rates at these levels, but to prevent them from going still lower.

Q. How recently have you been in touch with any officers of the Federal Reserve System? I notice you refer to that as "Bank." I was quite severely criticized just a few weeks ago by referring to it as a bank. They said it is not a bank, it is a system—but never mind.

A. I believe I used the plural "banks."

Q. Then you mean the member banks?

A. No. There are twelve Federal Reserve Banks, on top of that is the Board of Governors. So, when I speak of the Federal Reserve banks, I refer to the system in the aggregate and ramifications thereof.

Q. Now, I asked you how recently you have been in touch with them down there, as to what their policies and feeling are with respect to the subject of inflation.

A. The only way that I have been in touch with the officials of the Federal Reserve System is through their publications, such, for example, as the Federal Reserve Bulletin which is published monthly.

Q. Does that indicate some fear on the part of the officials of the system that we may get inflation more or less runaway?

A. I believe their publications would indicate that—I can say this on the basis of my interpretation—that they are concerned with the possibility of inflation.

Q. Would you say that they also indicated there is some concern as to whether or not they are going to be able to control it?

A. I don't know that they recognized any inability on their part to control it. They recognize its possibilities, and I think they are concerned with devising, in so far as possible, means to anticipate and to control it. As to whether they feel that they can control it or not, I wouldn't want to say.

Q. I don't want to go into a discussion with you of the labor policy that the Government is pursuing, and its effect on prices, but you wouldn't say it was beyond the realm of even probabilities that we are going to have very substantial rising in prices because of the labor disputes and their settlements, would you?

A. You are projecting me into a highly controversial matter when you ask that question.

. . . . . .

[R. p. 1469] By Mr. Tucker:

Q. Doctor, it seems to me that in 1927 and in 1928 I heard some economists and investment advisers saying that we were on a new investment plateau and we were in a new era. You know some economists and investment advisers who took that position, don't you?

A. I think that there were beliefs held to the effect that we may have attained some sort of a new era. I would hesitate to interpret their thoughts in the matter, but the phrase was used, at least—let us put it that way.

Q. That general philosophy cost a lot of people a lot of money, didn't it?

A. Well, I don't know whether it was that philosophy that cost them the money or the fact that human nature doesn't change, costing them money.

Q. You would resent any suggestion on my part, I am sure, that perhaps you are aligning yourself up a little bit in this present situation with that school of thought, in this permanency of the prices, yields, and that kind of thing?

A. Well, I will state that such an inference, to my mind, was an improper inference. Of course, naturally, I wouldn't be in a position to take offense at any interpretation that you might place on my report, but I think I would be within my rights to state that I disagreed most heartily with the inference.

. . . . . .

Ralph E. Badger—Cross Examination (Cont'd)

[R. p. 1471] By Mr. Tucker:

Q. It is true, isn't it, that inflation invites expansion of business and in due time increases the demand for capital, isn't it?

A. Increases the demand for capital or decreases?

Q. Increases.

A. Increases—yes, sir; that would be true.

Q. As a result of that situation, when that inflation comes, if it comes—and you say you see some signs of it—that demand will cause investors to require and secure higher yields, won't it?

A. Well, the same situation would apply there as would apply to these previous cases where you are trying to isolate one influence out of a complex structure.

For example, at the present time and as a result of the prosecution of the war, a substantial, a very substantial addition to our permanent capital of this country has already been made in the way of substantial additions to our supply of machine tools.

Substantial additional factory floor areas have been created throughout the country and the supply of fixed capital in this country has already been very greatly increased as the result of the war activity.

I would say that you could have a substantial degree of increase in productive activity without increasing your fixed plant any from this level, but merely to arrive at a point where you were utilizing that plant at 100 percent capacity.

I just cite that to show how misleading it is to take one factor and hold that up as having a possible relationship to another factor in our economy. You have got to take all factors into consideration; as an isolated factor, the steps, (1) inflation, (2) an increase in productive activity resulting therefrom, would, in itself, be a factor increasing the demand for capital and tending to increase interest rates. But, as the situation stands today, we have released as a result of the cessation of war, subtantial quantities of fixed

capital that we hope to employ in this so-called era of inflation that is coming. We have substantial Government surpluses the Government is trying to dispose of, and we have a very substantial addition to our fund of investment capital through the increase in bank deposits, and so forth, all of which would tend to cause interest rates to remain low, or to go lower.

So that a diagnosis of the situation for the next several years, to me at least indicates a continuation of low interest rates or possibly a further decline of interest rates.

Q. Would you turn, please, Doctor, to page 11 of Preferred Stockholders' Exhibit No. 29. In the table on that page you have undertaken, have you not, to compute for the years 1942, 1943 and 1944 as applied to Engineers Public Service Company, the book equity, book value equity, per share, for the preferred stocks?

A. Yes, sir.

Q. Now, I notice that you have included in the assets in arriving at these ratios—is that the proper term to apply to them, Doctor?

A. Yes, sir.

Q. —for each of these years, an item called "Reserves," $14,352,830.47 for 1942, $4,350,470.62 for 1943; and $4,394,705.20 for 1944; is that correct?

A. That is correct.

Q. Can you tell us what these reserves are, and what the justification is for including them as assets for the purpose of determining this ratio?

A. They are reserves for depreciation in the value of investments of subsidiaries. Until such time as the actual investments in subsidiaries is decreased on the books of the company, this would be a proprietorship item in respect to whatever book value did exist on the asset side of the balance sheet.

Q. Were you struck by the fact, Doctor, that there is a drop in the reserves between 1942 and 1943 of approximately $10,000,000?

A. I noticed that.

Ralph E. Badger—Cross Examination (Cont'd)

Q. Did you make any inquiries to find out what this was caused by?

A. My recollection is that it was caused by the elimination of the Puget Sound from the system as between those two years, or at least a substantial part of it was thus occasioned.

Q. That means, does it not, to use the laymen's language, and not an accountant's language or an expert's language, that you have included in computing the book value equity per share for the preferred for 1942 a reserve that was set up to cover the loss which had previously been recognized as having been incurred?

A. Well, of course, any reserve against possible decline in the value of assets is a reserve to take care of such possible decline.

At the time Puget Sound Power & Light was eliminated from the system, the entire composite balance sheet was changed. The assets or investments on the asset side of the balance sheet were eliminated from the consolidated statement and all liabilities and all reserves in connection therewith were eliminated, and whatever cash or securities may have been received by Engineers as a result of the disposition would appear in the 1943 statement.

Q. Yes, I know, but when you made up the statement for 1943, you then say you were struck by the fact that there had been a decrease in that item of $10,000,000. Did that indicate to your mind that there wasn't much of a substantial value in the reserve for $14,000,000-odd that you set up in the 1942 column?

A. Well, that series of computations there is predicated exactly upon the statements as they were published by Engineers Public Service. I didn't attempt to change any of the captions or any of the figures. I made certain rearrangements, but the balance sheet is exactly what it purports to be and it is predicated upon the books of the Company. The computation that I made in respect to page 13 is a somewhat different statement, because there I took the aggregate

reconstructed market value of these subsidiary stocks, without any relation to their book values, and substituted those values, in lieu of the book or carrying values of the system. So that that would be my interpretation of the coverage of the preferred stock on the basis of estimated or appraised market values.

The statements on page 11 do not involve any construction of values on my part but are taken directly from the books of the Company and the computations set up and fully set forth.

Q. I understand, Doctor, but you are an expert in these matters.

A. I don't purport to interpret anything on page 11.

Q. You arrive at a result, don't you, Doctor?

A. Well, I arrived at a mathematical computation.

Q. I understand. I am talking about whether, as an expert you shouldn't have recognized that perhaps that mathematical computation of the book value of equity per share of preferred of $225.65 for the year 1942 was in view of the inclusion of that $14,000,000-odd item for reserve, a misleading calculation?

A. I fail to see why it is a misleading calculation. It is perfectly obvious in that value there is $14,000,000 of reserves, and as to whether at that time and over a period of years that full loss was going to be taken or was not going to be taken is a question for subsequent determination. The Company was carrying its assets on the books at a given figure, and if they set up reserves against those assets, the only alternative I had was to put the reserves in where I put them and to proceed with the computation.

Do you think that is really a fair statement of the situation, Doctor? You must have known as an expert in these matters, that that reserve wouldn't have been set up if the loss hadn't been recognized as having been previously incurred whether it was a closed item, or whether it wasn't a closed item, isn't that true?

A. Not from the accounts, the way they were stated. I can cite many instances of where corporations write up substantial reserves against possible inventory depreciation, reserves against contingent losses, reserves for post-war development, and so on *an infinitum*, and where such reserves are never used, but are eventually thrown back into surplus.

Q. You could have made an investigation, couldn't you, Doctor, to determine the nature of that reserve if you wanted to—right?

A. That was the way the books were stated. That is the way I stated it here.

Q. I repeat the question and I would like you to answer it, Doctor.

Mr. Tucker: Let me have the question again.

(The question was read.)

The Witness: Well, I did make an investigation as to the nature of the reserve, and I stated here exactly what the reserve is. It is a reserve to provide—let me use the exact wording of the company here—that is the reserve for depreciation in value of investments in subsidiaries, less certain deductions explained in Note K.

Mr. Kanton: You are reading from what report, Doctor.

The Witness: That is reading from Applicant's Exhibit 37-J, page 19, and Note K appears on page 22.

By Mr. Tucker:

Q. Are you through, Doctor?

Mr. Condon: He hasn't finished reading the note yet.

Mr. Tucker: I asked him if he was through. Can't I even do that?

The Witness: Do you want me to read the entire note?

By Mr. Tucker:

Q. I don't want you to—I asked if you were through answering the question.

Ralph E. Badger—Cross Examination (Cont'd)

A. Yes.

Q. At the time you prepared this table on page 11, you knew the facts that you have just stated, Doctor?

A. Yes, sir.

Q. Where on page 11, or in language subsequent to that, do you, if at all, describe what those reserves are?

A. No further explanation is given of them other than to say they are reserves.

Q. Why, if you include those reserve, Doctor, didn't you on the basis of the logic that you applied in including these reserves, also include the reserve for depreciation?

A. Because the reserves for depreciation are a series of reserves built up as an offset to the plant account, fixed assets of the property, and charged annually to earnings.

Q. To offset losses?

A. No, sir; to offset what is recognized as an annual depreciation in the value of the fixed assets.

Q. I don't care to go into a long dissertation on the nature of depreciation reserves, but isn't it generally for the loss-in-service value incurred during the particular year?

Mr. Condon: Mr. Examiner, aren't we getting into another discussion here that is getting a little off the beam? I feel that if we are going to get involved into a controversy on what theories of depreciation are going to be or should have been applied, or matters of that character, that we are getting outside the fair scope of cross-examination.

The Examiner: I still think, Mr. Condon, Mr. Tucker has a right to go into the basis that the expert used for his opinion.

The Witness: I don't think I would quarrel with you about a refined definition of depreciation reserve. I stated that it was because of a loss in, a constant annual loss, value of fixed assets ensuing from the use of those assets. Now, you stated that it is a loss in the service value of those assets. I wouldn't quarrel with you on a definition as to

the nature of depreciation reserves. I think fundamentally we mean the same thing.

By Mr. Tucker:

Q. But, generally speaking, it is a loss of the same character as this reserve, isn't it? It is a loss?

A. It is a depreciation in value that is incurred from the normal use of the property over a period of years, and not restored through maintenance.

Q. These reserves represented a loss that may have been incurred over a period of years. I suppose it may have been well the decline value?

Mr. Condon: May I ask Mr. Tucker what reserves? Depreciation or the reserves referred to on page 11 of the report?

Mr. Tucker: I am talking about both of them.

Mr. Condon: I think then he ought to, in fairness to the witness, be more precise in his language, because in each case the word "reserves" is used. If he is going to use the word "reserves" I think he should be made to specify whether he is talking about the depreciation reserve or the reserves as testified to by Dr. Badger and referred to in page 11 of his report, so that there would not be any confusion in the record.

Mr. Tucker: As long as I don't confuse the witness, he can take care of himself on his answers.

By Mr. Tucker:

Q. Are you confused?

A. I don't believe I am; no, sir.

The Examiner: Proceed with your examination, Mr. Tucker.

Mr. Tucker: Thank you, sir.

The Witness: That is, I am not at this point. I have been at other points.

Mr. Condon: But for different reasons.

Ralph E. Badger—Cross Examination (Cont'd)

The Witness: These reserves, it seems to me, are not similar to reserves for depreciation, and the full explanation of the $14,362,000 item is contained on page 22 of Exhibit 37-J. We are now describing the depreciation reserves,—not the depreciation reserves, the reserves for depreciation in the value of investments in subsidiaries, which is the $14,352,000.

By Mr. Tucker:

Q. Doctor, you were preparing this report for filing with the Securities and Exchange Commission, weren't you?

A. Yes, si

Q. Are you familiar with the method by which the Securities and Exchange Commission determines these equity ratios that you have got at the bottom of this tabulation on page 11?

A. No, sir.

Q. You told me yesterday, if I recollect, that you had read a lot of releases issued by the SEC. Did you find in those releases some determinations of such equities per share of preferred?

A. I have no doubt that there were such, but I think you will appreciate that I can't recall at the moment the specific locations of those computations, nor would I be prepared at the moment to say that I was familiar with the specific methods which were used in each case.

Q. Your ratios at the bottom of that tabulation—I am referring to the tabulation on page 11—are described as book value equity per share preferred, aren't they?

A. Yes, sir.

Q. What they are in reality is gross book value equity per share preferred, is that a fact?

A. No, sir.

Q. Let's see about that.

A. They would be net value after depreciation reserves but gross before other reserves.

Well, accepting your correction, do you consider that one of the factors which should be taken into consideration in valuing preferred stock to be the net book worth of that preferred stock, and by net book worth I mean the determination arrived at by taking the total assets of the company as shown by the balance sheet and deducting intangibles such as 100.5 and 107 accounts, and deducting liabilities of the system ranking prior to the preferred stock, such as long-term debt, current liabilities, subsidiary preferreds and reserves?

A. May I have that question read? It is rather long.

(The question is read.)

The Witness: Would you define those numerical accounts for me?

By Mr. Tucker:

Q. Are you not familiar, Doctor, with the Uniform System of Accounts of Public Utilities?

A. I believe they are depreciation reserves. I would like to have that verified.

Q. I am asking you a question now. Are you familiar with the Uniform System of Accounts set up by the Federal Power Commission for public utilities?

A. Not to the point of recalling the specific designations that go with those numerals.

Q. Explaining to you then, 100.5 in the Federal Power Commission classification is an account known as "Utility Plant Acquisition Adjustment" and 107 is "Utility Plant Adjustments." I think perhaps 107 would be broadly characterized as write-ups and 100.5 perhaps would be broadly characterized as something the company paid for, assets in excess of original cost. Does that give you some idea of what those things are?

A. Yes, sir. I would say that would be one type of study that might be pertinent in respect to value, but I don't think

that you could arrive at a value of a public utility stock by that method. It might be one of the methods that would be employed. It would at least be one approach.

Q. Doctor, you made, on page 15 of your report, a comparison between five public utility companies and Engineers as to book value equity per share preferred stock, did you not?

A. Yes, sir.

Q. With respect to them, did you make any investigation to determine how this book value equity per share preferred stock was arrived at by those companies?

A. Well, I made the computations myself in arriving at those several series of book values from their own balance sheets as taken from Moody's Public Utilities 1945 volume. I made the computations. I computed the amount of book values behind each one of those preferred stocks. I have here my computations.

Q. Did you follow the same method there that you followed on the tabulation on page 11?

A. It was my intention to.

Q. Did you find any reference in your analyses to utility plant acquisition adjustments and utility plant adjustments with respect to those companies? I am referring to the companies on page 15 of your report.

A. Well, I would have to look at my records to ascertain that.

Q. Would you look at your records to answer the question?

A. I would say offhand that the book values didn't stem from an examination of assets less liabilities but did proceed with the preferred stock-common stock surplus reserve items which were added up and a computation was made in that way, and was not made on the basis that you suggested in your hypothetical question, that being the same method that I used here in connection with Engineers Public Service.

Ralph E. Badger—Cross Examination (Cont'd)

Q. Would you mind looking at your record and telling me the facts.

* * * * *

[R. p. 1485] By Mr. Tucker:

Q. Can you give me the answer to the question?

A. I answered the question.

Mr. Condon: Will you read the question, please?

(The record was read, as follows:)

"Did you find any reference in your analyses to utility plant acquisition adjustments and utility plant adjustments with respect to those companies? I am referring to the companies on page 15 of your report.

"A. Well, I would have to look at my records to ascertain that.

"Q. Would you look at your records to answer the question?

"A. I would say offhand that the book values didn't stem from an examination of assets less liabilities but did proceed with the preferred stock-common stock surplus reserve items which were added up and a computation was made in that way and was not made on the basis that you suggested in your hypothetical question, that being the same method that I used here in connection with Engineers Public Service.

"Q. Would you mind looking at your record and telling me the facts?

"The Examiner: While he is looking for it, we will take a short recess."

The Witness: Now if you will give me the question again I will answer.

(The question is read.)

The Witness: That is the fact.

Ralph E. Badger—Cross Examination (Cont'd)

By Mr. Tucker:

Q. Well, do you know from the history of those companies whether some of them have charged off 100.5 items to surplus and 107 items to surplus, so that if any of those items were included in others, it would not be a fair comparison?

A. I couldn't state that, sir.

Q. In other words, you didn't carry your investigation far enough to really know, Doctor, then, whether this is a fair comparison or not; is that true?

A. Well, I still believe it is a fair comparison.

Q. On the supposition I have made, it couldn't be, could it?

A. It is a fair comparison in that it reflects on the basis of the balance sheets of the companies at the several dates the book values of their preferred stocks computed from their statements appearing in Moody's, and using identically the same methods as were used in connection with Engineers Public Service, I would say it is a fair comparison.

As to whether or not these companies in the past made certain charges in more or less degree to their surplus accounts doesn't change the status of the books at these given periods that I was using.

Q. The fact is, Doctor, you don't know what the past history of these companies is and whether they were on a comparable basis or not, do you?

A. The computations were made on a comparable basis. As to whether the accounts as set forth in Moody's represent comparable bases of accounting with the methods used here, I confess I would not know.

Q. You don't know, do you, Doctor, as you sit on the stand at the moment, what the net worth of Engineers preferred stock is; is that a fact?

* * * * * *

[R. p. 1488] The Witness: At December 31, 1945?

Ralph E. Badger—Cross Examination (Cont'd)

By Mr. Tucker:

Q. At whatever date you use in this tabulation. You can assume, of course, that when I use the term "net worth" it was as I defined it in a previous question. That, I suppose, is understood. This computation on page 11 is made for the years '42, '43, and '44. I ask the question with respect to each of those. Now, understand, I am talking about net worth and not gross book value equity per share preferred.

A. I would say that I did, yes, sir; and I would say that your question in the negative there called for a denial that that question was true. I think unless the report is in error as far as arithmetic is concerned that the figures are available thereto produce the net worth of the assets available for the preferred stock.

Q. If that is so simple, I ask you to undertake to do it on the figures that you have arrived at on page 11, if I understood you correctly.

A. At 1944 the aggregate net worth of book assets available for the Engineers preferred stock amounted to $75,551,000 without giving any consideration to reserves for possible decline in the value of investments; and, $71,156,000, giving 100 per cent weight to reserves which had been set up for possible decline in the value of investments.

Q. Would you put that on the same basis that you put what you call book value equity per share preferred in your tabulation on page 11, or do you have to divide it by the number of shares of preferred?

A. That would have to be divided by the number of shares to give the per share value.

Q. Would you take the one where you exclude the reserves and make the computation for me?

A. You wish me to divide those two figures?

A. Yes, I do. Can you do it with a slide rule?

A. I haven't got a slide rule here.

Q. Suppose we furnish you one.

A. That is fine. If you could tell me offhand the number of preferred shares outstanding——

Q. We will assume there are 392,455 shares outstanding. You can just ignore the 455 for the purpose of your slide rule computation. It is going to be about anyway, isn't it?

A. It would give you a value of approximately $183 per share.

Q. That is for the year 1944, excluding the reserves?

A. That is correct.

Q. You think that that results in giving you a net book value of equity per share of preferred?

* * * * *

[R. p. 1490] The Witness: Based on the books of the company, I do.

By Mr. Tucker:

Q. Let us see, Doctor. If you will take in that report—if that is your report—the year 1944 and follow through some of these items, I would like to ask you whether or not in order to get a net book value of equity per share—and I say net book value—you wouldn't have to exclude, if you follow the method used by the Securities and Exchange Commission in handling these matters, the following items: Do you find in that balance sheet an excess of recorded gross investments in shares of subsidiary over net assets applicable thereto—I think you will find it reflected on page 24—note D-4 of $25,246,000?

A. The mere fact that the Securities and Exchange Commission for one purpose might require a deduction of that item doesn't imply that for the purposes of this study here it should not be included. That is the excess of reported gross investments in shares of subsidiaries over the net assets applicable to such shares at dates of acquisition as adjusted to give effect, among other things, to reduction of certain properties to original cost. The fact of the matter is that the company paid $25,246,000 for that pro-

portion of their assets, and they are carrying those assets on their books, or that portion of their assets at that figure, and I think it is perfectly proper in view of that situation to include that amount in the book value of the equity per share of common. Now, as to whether the Securities and Exchange Commission for other purposes elects to have that item deducted, I don't think destroys the validity of the statement that I make on page 11 or the validity of the statement that I make in my testimony here in which I state there is $192.50 gross value or $183 net value after the deduction of reserves for possible depreciation in investment.

Q. Well, you don't fully agree with the method of presentation followed by the Securities and Exchange Commission?

Mr. Condon: I object to that question. There is nothing in the record to indicate that the witness so testified, and there is nothing as yet in the record as to what the attitude of the Securities and Exchange Commission is except Mr. Tucker's excerpts with respect thereto in his question, and I object to the question on those grounds.

The Examiner: I will sustain the objection, Mr. Tucker.

By Mr. Tucker:

Q. Do you know, Dr. Badger, that the Securities and Exchange Commission ordinarily shows the things in the releases on two bases, one leaving in the items and one taking them out?

Mr. Condon: I object to the form of the question. Mr. Tucker is again purporting to interpret what the Securities and Exchange Commission is alleged to have done in certain calculations without supplying the data to the witness for examination and I object to the question.

Mr. Tucker: I asked him if he knew. He can tell me whether he does or whether he doesn't.

Mr. Condon: I say that that presupposes a state of facts not in the record and I object to the question on that ground.

The Examiner: Read the question back.

(The question is read.)

Mr. Condon: I feel that if there is any basis for that statement by Mr. Tucker that he should produce the release, that he should have it marked for identification and shown to the witness and counsel.

The Examiner: I will sustain the objection, Mr. Tucker.

By Mr. Tucker:

Q. Dr. Badger, I hand you Holding Company Act Release No. 6176 in the matter of American Power & Light Company, File No. 70-618.

The Examiner: Off the record.

(Discussion off the record.)

Mr. Tucker: I will refrain from further pursuing this until I can hand Dr. Badger a series of releases by which I can set this thing up in tabular form instead of narrative form, and I think it will be simpler.

I haven't any objection to your seeing it if you haven't one, Mr. Condon.

Mr. Condon: I would like to have this release identified for the record, please. He was purporting to interrogate the witness with regard to his conclusions as to certain opinions or releases of the Commission and I would like to have the release, which is Holding Company Act Release 6176, which he has just handed the witness, marked for identification, as Preferred Stockholders' Exhibit No. 33 for identification.

Mr. Tucker: Would you mind having Dr. Badger's copy identified instead of mine, because mine has a lot of pencil notes and he has a clean copy.

Ralph E. Badger—Cross Examination (Cont'd)

The Examiner: Let that be marked Preferred Stockholders' Exhibit No. 33 for identification.

(The document referred to is marked as Preferred Stockholders' Exhibit No. 33 for identification.)

Mr. Tucker: I think I can simplify the cross-examination on these points if I leave it and take it up on Monday, if that is the next hearing day, or whenever the next hearing day is.

By Mr. Tucker:

Q. Let's see if we can't agree on a few things, Doctor. You recognize, do you not, that there are some advantages in a holding company type of structure, so far as public utilities are concerned?

A. Yes, I admit that, and agree with it.

Q. I said I hoped we could agree on a few things.

A. Yes.

Mr. Kanton: That is just between the witness and Mr. Tucker.

By Mr. Tucker:

Q. Now, would you say that one of those advantages is the diversity that is ordinarily introduced in the holding company type of structure?

A. That would be an advantage from the standpoint of the security holders of the holding company, yes, sir.

Q. And would you agree that that arises, Doctor, largely since they are all in the same type of business?

A. Well, you would get geographical diversification in so far as the holding company had operating companies in different areas.

Q. And you mean by that, do you not, that the different areas would probably be basically affected by varying economic backgrounds or factors—you get a diversity there?

A. It is conceivable.

Ralph E. Badger—Cross Examination (Cont'd)

Q. Will you put your mind on Engineers Public Service Company first as it was constituted at the time of the passage of the Public Utility Holding Company Act in August, 1935, and do you recall how many states Engineers had property in at that time?

A. I can't recall the exact number, but it was a substantial number.

Q. Could I suggest that maybe it was 11?

A. Well, I would say it was at least 11. I was going say to 15 to 18.

Mr. Kanton: I don't see the relevancy of this line of cross-examination, but I know that information is contained in the Section 11(b)(1) order issued by this Commission and directed to Engineers Public Service Company, and I would like at this time to ask Mr. Tucker, if I may, the purpose of this line of cross-examination as to the past history of Engineers and how many states it was in and how many states it is in now.

Mr. Tucker: The purpose of it?

Mr. Kanton: Yes, sir.

Mr. Tucker: Does the Examiner think it necessary to disclose to a witness on cross-examination the purpose of my questions?

Mr. Kanton: Well, I personally can't see the relevancy of that and I would be glad to be——

Mr. Tucker: I will undertake to establish the relevancy of it and if I don't, you can move to strike.

The Examiner: Proceed, Mr. Tucker.

By Mr. Tucker:

Q. And some of those properties were located, talking about geographical areas rather than states now, in the Puget Sound district at that time?

A. Yes, sir.

Q. Some of them were located in the Middle West, around Nebraska, Wyoming, and perhaps at that time Colorado, I am not sure, but in that area out in there?

A. Yes, sir.

Q. Another was located in Virginia and North Carolina, was it?

A. Yes, sir.

Q. These are a series of separate questions and if you will just answer as I ask them——

A. I thought you were going to include the entire group and then ask me a question.

Q. No. I would like an answer to each of them.

You said yes as to each question up to date, or you intended to, didn't you?

A. I intended to, yes sir.

Q. And you said yes with respect to Virginia and North Carolina?

A. Yes, sir.

Q. Now, another was located in Georgia?

A. Yes, sir.

Q. Another was located in Key West?

A. Yes, sir.

Q. Another was located in eastern Texas and western Louisiana?

A. Yes, sir.

Q. Another was located in west Texas?

A. Yes, sir.

Q. And New Mexico is included in that?

A. Yes.

Q. Isn't it true that the economic background of all of those areas is substantially different, the one from the other?

A. I would say that is true. The industries are varied as between the geographical areas.

* * * * * *

[R. p. 1507] By Mr. Tucker:

Q. Doctor, you know, do you not, that up to January, 1945, the Standard & Poor's, whatever you call it, put ratings on preferred stocks?

A. Yes, sir.

Q. In connection with your study of this case did you consult those ratings?

A. Yes, sir.

Q. On page 15 of your report, Doctor, being Preferred Stockholders' Exhibit 29, you have a list there, do you not, of six companies, including Engineers Public Service Company, that you make some comparisons with respect to —right?

A. Yes, sir.

Q. That you make some comparisons with respect to?

A. Engineers?

Q. Yes, sir.

A. Yes, sir.

Q. Now, putting your mind on Columbia Gas & Electric, which is in the first column on page 15, which preferred stock of Columbia Gas & Electric did you use in your analysis?

A. I used the $5 preferred.

Q. With respect to that my information shows that there is a 5 per cent B issue and a 5 per cent convertible issue. Now, which of those two did you use? Did you use the convertible or did you use the 5 per cent B issue—apparently the 5 per cent B.

A. Well, I think you will find the convertible is known as the convertible preference stock. If that is correct, then I used the 5 per cent B. The designations that I have are 6 per cent cumulative preferred, Series A, 5 per cent cumulative preferred, callable at 105 and 5 per cent cumulative preference stock, callable at 100.

Q. Well, let's assume, then, for the purposes of the present inquiry—and you can correct the record later if our assumption is wrong—that you used Columbia Gas & Electric Company 5 per cent B that I have been talking about in your study.

A. All right. I would state here that I used the 5 per cent cumulative preferred, callable at 105.

Q. Yes, but we have to get together on something.

Mr. Condon: Well, suppose you do the getting together, Mr. Tucker.

Mr. Tucker: All right. I don't care which way you put it.

Mr. Condon: The witness has stated what he used.

Mr. Scheetz: Yes, I care. I think we had better talk about what the witness used.

Mr. Condon: The same thing.

By Mr. Tucker:

Q. All right. What rating with respect to whatever you used for Columbia Gas & Electric Company did Standard & Poor's rating for January 1945 give to that preferred stock?

A. Their current market rating for that stock was their second category, which is above average. That is on the basis of current market ratings.

Q. Now, I want the investment ratings, if you please, and not the current market ratings.

A. I can't give you that, sir.

Q. Did you consult the investment ratings of Standard & Poor's in connection with your study?

A. I did, but I didn't split those down and I don't recall what those ratings were in the manuals.

Q. Have you anything in your supporting papers that would give it to you, Doctor? You usually pull something out of a bag that gives these things. Have you got anything that would do that?

A. The only rating that I could give you is their current market rating.

Q. That is not the one that I want to inquire about.

Mr. Condon: Mr. Tucker, may I inquire at this time whether or not these ratings as to which you have been interrogating the witness appear on the documents that you have before you?

Mr. Tucker: Yes, they do.

Mr. Condon: And could we have the date of that memorandum, if you will?

Mr. Tucker: The date of the memorandum was 1/30/46.

Mr. Condon: And could we have it more completely identified for the record?

Mr. Tucker: Well, I have no objection. You identify it, will you? You seem to be able to do that with more facility than I do. You have had more practice.

Mr. Condon: Mr. Tucker, can you state for the record whether or not these alphabetical designations refer to ratings other than current market ratings? I notice this is a longhand memorandum, undoubtedly prepared for you to facilitate your examination. I would like you to state for the record just what those ratings purport to be.

Mr. Tucker: Well, they are the investment ratings. They are not the current market ratings. Does that answer your question?

Mr. Condon: Is that your statement for the record?

Mr. Tucker: Yes. We got them yesterday by telephone from Standard & Poor's, and that is what they said they were giving us.

The Examiner: All right. Proceed with your questions, Mr. Tucker.

By Mr. Tucker:

Q. Now, Doctor, apparently you wouldn't have a recollection now, if you haven't any record of these things, as to what it was that you learned when you consulted something or other as the basis of your report, would you? You wouldn't remember, or have you that kind of a memory that would remember what they were?

A. I don't recall what the investment ratings of Standard & Poor's was in respect to these stocks.

Q. You do not?

A. No, sir.

Ralph E. Badger—Cross Examination (Cont'd)

Q. And you would say the same thing with respect to the list of 10 companies on page 18, would you?

A. That is correct, yes sir.

Q. Could you, without inconveniencing yourself while you are in Detroit, consult your records and bring back the investment ratings, and I mean investment, not current market.

A. Yes, sir.

Q. By Standard & Poor's—any others that you want to, of course, but at least that—of all of the companies shown on page 15 and all of the companies shown on page 18?

A. Yes, sir.

Q. Now, just one very short line of inquiry, I hope.

Mr. Kanton: Mr. Tucker, do you have any particular period in mind that you want that for? Do you want it as of December 31, 1945?

Mr. Tucker: I want it for the month of January, 1945, which, as I understand it ——

Mr. Kanton: 1946, you mean?

The Witness: I assume you want the most current of the ratings.

Mr. Tucker: Off the record.

(Discussion off the record.)

Mr. Kanton: May I ask the relevancy, then, if they were stopped one year ago, for asking for those ratings at this time?

Mr. Tucker: Sure. It is to show that what the market analysts appraised these preferred stocks at appears to be quite contrary to the witness' investment appraisals of these investments.

Mr. Kanton: You mean in 1945? There is a possibility that these same analysts may have changed their minds by 1946.

Mr. Tucker: They don't make the ratings any more, but certainly I can go into it and let the witness explain, if he wants to, what has happened in the meantime, but try

to reconcile his appraisals here with the market analysts' appraisal, and it is pointed out to me that all of these comparisons in here start with December, 1944, as a matter of fact, so I have a direct comparison for that particular year.

The Witness: Why wouldn't it be more proper, Mr. Tucker, to give you the current market rating which Standard & Poor's put on the stocks and which I do have at the present time?

Mr. Kanton: That is what I have in mind, Mr. Examiner.

The Witness: I have the type of rating that they are making at the present time right before me. Now, to be sure, I have not before me the ratings that they were making a year ago or two years ago and have ceased since that time making, but I have their current ratings right up to the moment here and I would think, for the benefit of the record and the court, and whoever is to determine this thing, that those ratings would have far more value and far more weight than something that was made a year ago and has been discontinued for practically a year.

Mr. Tucker: Well, we will let Mr. Condon and the other lawyers go into that matter if they want to on re-direct. I don't care to.

The Witness: As a matter of fact, I am not too sure that I can get those ratings in every case, because we don't file that old material of Standard Statistics. I will endeavor to get it in so far as possible.

* * * * *

Hearing on February 4, 1946.

RALPH E. BADGER

Cross Examination (Resumed)

[R. p. 1539] By Mr. Tucker:

Q. Now, would you turn to page 2[illegible] of your report, Doctor, and under the heading "Conclusions" close to the bottom of the page, you state there, do you not, that it is your conclusion that the several classes of preferred stock of Engineers Public Service Company have fair investment value on the assumption that Engineers Public Service Company is to continue in business as follows:

For the $5 stock, $106.25;

For the $5.50 stock, $111.38; and

For the $6.00 stock, $111.50;—is that a fact?

A. You asked me if that was a fact?

Q. Yes.

A. Those are my conclusions,—yes, sir.

Q. And later in that same paragraph, Doctor, you say, referring to those values, "These values are equivalent to the full call price for the stock plus three months' cumulative dividends." You say that, do you not?

A. Yes, sir.

Q. Three months' cumulative dividends. Now, will you tell us why you included in those values, an amount equal to three months' cumulative dividends?

A. At any given time, and in the absence of a published call notice, a preferred stock which is callable at a specific price may well sell in excess of the call price and the amount in excess of the call price at which the stock may sell would depend upon an investor's appraisal of the probable length of time that it might take the corporation to effect the call.

In the case at hand, I placed a minimum of three months there as the possible time which the investor might consider a proper interval and in doing so I may have gone a bit on

the conservative side; but it was my opinion, and is my opinion, that it would not take any substantial period of time for Engineers Public Service on a going concern basis, to effect these calls. I think that is purely a matter of judgment as to what that additional premium should be, and I figured that that would be the minimum amount of premium. Other appraisers may have placed a higher additional premium than I did.

Q. Now, doctor, looking at the plan, if the Commission found it fair and equitable to pay $105 to the $5 stock and $110 to the other two series, this value stated by you would be fully met if you assumed that it would take about three months to carry out the plan after the decision of the Commission; is that correct?

A. If it could be done in that short a time,—yes.

Q. Well, that is the assumption that you made in which it could be called?

A. Yes.

Q. And if you make the same assumption with respect to carrying out Part 1 of the Plan, my statement would be correct—that if they got $105 for the $5 and 110 for the $5.50 and the $6, and it took three months to carry it out, then they would get accrued dividends during that three months period under the Plan, wouldn't they?

A. That is correct.

Q. And if it took longer to carry it out, then they would get more than the amount that you would bring, is that right?

A. That is correct.

Q. Will you look again at page 19 of your report? How did it happen that you made that special analysis, Doctor?

A. I wanted to determine what the values of these preferred stocks might be on the assumption that Engineers Public Service elected to divest itself of El Paso by a recapitalization of the company and a distribution of the shares to the common stockholders of Engineers Public Service, and also divest itself of Gulf States by a recap-

italization and disposition of the shares, as provided in the present Plan at $11.50 a share, and continued to maintain and operate Engineers Public Service Company as a holding company owning Virginia Electric and Power. In other words, I wanted to see if the execution of that part of the Plan would necessarily affect my appraised values of Engineers Public Service preferred stocks.

Q. How logically could that study affect those values, Doctor?

A. It couldn't cause any substantial change in my appraisals.

Q. Well, it is on an entirely different basis, isn't it, Doctor, that you made your appraisals? You made your appraisals on the basis of a going concern, Engineers as a going concern, and this isn't Engineers as a going concern at all, is it?

A. It would be on the basis of Engineers as a going concern, if, having consummated the two parts of the Plan which I previously referred to, having consummated those parts of the Plan, if Engineers continued as a holding company and continued to operate Virginia Electric, the valuation would still be on a going concern basis.

Q. Yes, but on a going concern basis, which is entirely different than the going concern basis that you are using, when you placed these values on these preferred stocks—is that correct?

A. Well, if that El Paso and Gulf States in this second assumption were eliminated from the holding company, and certain of the preferred stock were called to utilize the cash presently available, plus the cash that would be received from the sale of Gulf States stock—to that extent, would it be operating on a different basis, yes, sir.

Q. The ratios would all be different, the times earnings would all be different? Hardly anything would be the same, isn't that correct?

A. They would be improved by the consummation of this plan. As far as earnings are concerned, the times earnings would be substantially improved.

Q. But they would be different?

A. They would be better.

Q. And one thing that would be gone: is that whatever diversity there is in having in Engineers, Gulf States and El Paso, that would be gone under your study, wouldn't it?

A. Yes, sir.

Q. Do you regard that as an element of value or not?

A. I regard the loss of value occasioned by the loss of diversity to be a much smaller value loss than that gained by the other improvements that would be made by virtue of carrying out the assumption set forth here.

Q. Now, you are talking about the preferred stocks?

A. Yes, sir.

Q. But Virginia Electric and Power Company is located in an area which has both agricultural and very heavy manufacturing facilities, isn't it?

A. It has both agricultural and manufacturing, yes, sir.

Q. Gulf States Utilities Company is located pretty largely in an oil country, oil producing and refining country, isn't it?

A. To an extent, yes, sir.

Q. And they also raise some cattle there?

A. And some agriculture, as well.

Q. They do produce some rice in that area, do they not?

A. Yes, and there would be some merchandising and a certain amount of manufacturing.

Q. When you get to El Paso, you have an entirely different economic situation, don't you?

A. Yes, sir.

Q. You have ore refining as one of the large industries in El Paso, don't you?

A. Yes, sir.

Ralph E. Badger—Cross Examination (Cont'd)

Q. And you have agriculture down the Valley to a very considerable extent——

Cotton, even long staple cotton is raised in the Valley, isn't it?

A. Yes, sir.

Q. And a little further out you have some cattle, I suppose?

A. Yes, sir.

Q. So that the economic aspects of those three situations are entirely different, aren't they, Doctor? Or, I will say substantially different?

A. That is correct. There is a substantial difference in the areas.

Q. If your plan that you have suggested here were carried out, whatever benefits result from that economic diversity would be lost to Engineers, would they not?

A. They would be lost to the corporation as it would then be constituted, but they would not be lost to the present stockholders of Engineers.

Q. They would be lost to Engineers?

A. They would be lost to Engineers, as it would then be constituted, but they would not be lost to the present stockholders of Engineers Public Service.

* * * * *

[R. p. 1545] By Mr. Tucker:

Q. You say they would not be lost to the present stockholders of Engineers Public Service. Those stockholders have already lost, have they not, a lot of the benefits of diversity in connection with other companies that we were required by the order of the Commission to dispose of?

Mr. Kanton: Clarifying the question, do you mean the preferred and the common stockholders? Or only the common stockholders, Mr. Tucker?

Mr. Tucker: I am talking about the common stockholders.

Mr. Condon: I object to that line of inquiry on the ground that this is not proper cross-examination and on the further ground that it is an attempt upon the part of Mr. Tucker to cross-examine the witness on a matter that is pending before the Supreme Court of the United States and is not in issue at the present time in this proceeding.

The Examiner: I sustain the objection, Mr. Tucker.

Mr. Tucker: Well, I submit, Mr. Examiner—I shouldn't do it, but I should take an exception, but, if the Examiner please, I submit that this witness himself said what effect it would have on the common stock, and they are not my words, they are his.

The Examiner: He didn't say "common stock". He said "the stockholders."

(The Reporter read from the record the following:

"They would be lost to Engineers, as it would then be constituted, but they would not be lost to the present stockholders of Engineers Public Service.")

The Examiner: I stated, Mr. Tucker, in my ruling, that you might ask the witness if had given consideration to that phase of the valuation. Beyond that, I don't think it is proper on cross-examination.

By Mr. Tucker:

Q. When you said "stockholders" what stockholders were you talking about, Dr. Badger?

A. Both the preferred and the common stockholders.

Q. Precisely.

A. On the assumption that this Plan is carried out as I have set forth here, not as it is proposed by Engineers Public Service, however, under the present Plan of 1945; but under the Plan that I propose, any loss that might be occasioned as a result of the divestment of El Paso and the divestment of Gulf States Utilities would be passed on to the common stockholder by continuing their interest in the enterprises and the preferred stockholders under this Plan

would receive the call price for their stock. The preferred stock that was not called would continue to draw the $5 dividend until such time as it was called, at the option of the Company. The Company at all times has the option to call these preferred stocks at $105 and $110 respectively. It is part of the contract between the preferred stockholder and the corporation, so I think the use of the word "stockholders" under those circumstances, was an advisedly selected word.

Q. But taking in the common stock as well as the preferred stock?

A. Yes, sir.

Q. Now, part of your answer leaves me in some confusion. You said "Under the Plan the Preferred stockholder would get the call price." What Plan are you talking about?

A. I said the Plan referred to in my report.

By Mr. Condon:

Q. Would you identify the pages, please, Dr. Badger?

The Examiner: I think perhaps the witness means rather than the Plan, that if the Commission finds the amount that he has recommended in his report for the preferred stockholders, rather than a Plan that he suggested. I don't know that the witness has suggested a plan.

Mr. Condon: It is just a method of calculation that starts at page 19 and continues through 21, if I understand it correctly.

The Witness: That is correct.

The Examiner: I think it is more a question of terminology. You have not suggested any other Plan other than the one that Engineers already has before the Commission, have you, Dr. Badger?

The Witness: I have not suggested any plan at all, but I have set forth here a calculation showing what would transpire, as far as the several stockholders are concerned, if the El Paso Company were distributed in kind, Gulf

States were distributed at a price of $11.50 per share for the newly constituted shares of Gulf States, certain cash which is presently available in the corporation, together with cash that would be received from the sale of Gulf States were to be used by Engineers Public Service Company for the purpose of calling a substantial amount of its preferred stock at the call prices thereof.

The Examiner: And that is what you meant by the plan that you suggested.

The Witness: That is correct.

By Mr. Tucker:

Q. What you really do in this section is to suggest, isn't it, Doctor—and by "this section," I mean your special analysis re Virginia Electric and Power—what you really do is to propose an alternative plan that Engineers might have adopted if it had seen fit to do so, is that right?

A. Well, you can call it that if you wish. It certainly is a method that might have been followed.

Q. Now, what justification do you think there would be in keeping Engineers as a holding company over Virginia alone?

A. Well, there might be several advantages in doing that.

Q. Will you tell us what they are, please, Doctor,—or might be?

A. If that policy were to be followed, according to my calculations, the preferred stock charges of Engineers Public Service could be reduced to a figure no greater than $499,000 a year, and it is my opinion that it would be possible for Engineers Public Service completely to eliminate those charges because in the calculations that I made I stated that $10,000 of cash——

Q. Do you mean $10,000,000?

A. $10,000,000 of cash was to be utilized. It was testified to last Friday, according to my interpretation of the

testimony, that there was approximately $16,000,000 of cash in the holding company at the present time. It is also my opinion that if Engineers Public Service Company were required to divest itself of Gulf States on the basis of competitive bidding it would be able to receive an amount substantially in excess of $21,964,000 therefor, for that same stock which is now under the promulgated plan of the Company to be sold at $11.50 a share to the present stockholders of Engineers, it is my opinion that that stock could still be sold to the stockholders, and would be subscribed to on the rights that were given at a price substantially in excess of $11.50 a share; so that there are at least those two possibilities existing, whereby Engineers Public Service, as the continuing holding company, would be in possession of substantially more than $31,964,000 of cash, which I set forth as the amount to be used on page 21.

Furthermore, under the Plan as promulgated by the Company, there is a proposal to borrow $3,000,000. It is my opinion that that could still be borrowed and that these additional amounts could be borrowed at rates of interest substantially below the dividend rates on the preferred stock which might be called, with the result that it would be possible through the execution of a plan following the suggestions which I set forth on page 21, to continue Engineers Public Service Company in operation with no preferred stock outstanding, all of the preferred stock having been extinguished at the call prices; therefore, with no preferred dividend requirements ahead of the common; that such a holding company, owning Virginia Electric, might conceivably acquire additional properties contiguous to the properties it is now operating, and that under the consolidated operations of Engineers Public Service and the Virginia Electric and Power, there would be only a nominal expense with the possibility of substantial savings by virtue of the filing of consolidated returns.

* * * * *

Ralph E. Badger—Cross Examination (Cont'd)

[R. p. 1555] The Examiner: The witness hasn't answered the question. The question was what advantages there would be from consolidated returns.

Do you want that question to stand, Mr. Tucker, knowing that he is not an expert?

Mr. Tucker: Yes—I would like it to stand if I may.

The Examiner: All right.

Dr. Badger, you may answer the question, then.

The Witness: I can't cite the exact pages in the record, but is my impression that on either direct or cross examination it was shown that there was a net saving of, I think, somewhere in the vicinity of $100,000 a year which would accrue to Engineers Public Service by virtue of filing consolidated returns under the circumstances here set forth.

The Examiner: I think so, to complete the answer on that, let us get the record fully on that. I think the record also shows that it would cost about $130,000 a year to operate Engineers.

The Witness: That is correct. So that the net cost, after balancing the savings of a consolidated return, as against the aggregate cost of operating Engineers Public Service would be in the amount of approximately $30,000, which is an insignificant amount looked at from either the common or the preferred stockholders' point of view, or from the point of view of both common and preferred stockholders.

By Mr. Tucker:

Q. Will you look at page 9 of your report, Doctor? In the first full sentence at the top of page 9 of your report, Doctor, you say that if such items were used to reduce taxes accordingly, over-all charges would be 2.12 times?

A. Yes, sir.

Q. And you do say that, don't you?

A. Yes, sir.

Ralph E. Badger—Cross Examination (Cont'd)

Q. And those charges that you referred to could be properly characterized, could they not, as including non-recurring items?

A. Yes, sir; page 8 fully explains the nature of those items under Note 1.

It says: "Does not give effect to reduction in Federal Income and Excess Profits taxes resultant from extraordinary non-recurring deductions. If such items were used to reduce taxes accordingly, (as set forth in Applicant's Exhibits 53 and 66) over-all coverage would be 2.12." So they were non-recurring items.

Q. Now, I ask you, Doctor, what weight can be given to an over-all coverage which reflects, as you say, this ratio of 2.12 does, non-recurring items?

A. Well, in so far as those non-recurring items may have been applicable to excess profits taxes in the year 1945, to that extent they might be considered indirectly as being a continued saving in subsequent years in the event that in subsequent years there are no provisions for Excess Profits taxes; but to the extent that they would apply against normal income taxes or surtaxes, they would be purely non-recurring items, so there might be some basis for arguing that consideration to a limited extent should be given to the 2.12 figure.

Q. What do you mean by "a limited extent?" How limited?

A. To the extent that excess profits taxes will presumably discontinue in years subsequent to 1945.

Q. Now, Doctor, I asked you if, over the weekend, if you could do it, you would get for me the Standard and Poor's ratings in respect of certain companies. Do you recall that?

A. Yes, I recall it.

Q. Did you succeed in doing that?

A. You asked me, I believe, to get a series of ratings?

The Examiner: Investment ratings, I think the question was.

Ralph E. Badger—Cross Examination (Cont'd)

The Witness: Known as investment ratings, which ratings have been discontinued for a considerable period of time. You asked me to get the last available of such ratings?

By Mr. Tucker:

Q. That is right.

A. Or I should say the last of such ratings, as were available?

Q. That is right. Now, I ask you—Did you do it?

A. Yes, sir.

Q. Did you get them with respect to the month of January, 1945?

A. I was given by Standard Statistics, the Local Office in Detroit, a record of those ratings which were published under date of September 11th, 1944, and I was assured that there had been no change in those ratings as between that date and 1945; so, if their statement is correct, I have the 1945 ratings.

Q. Would you be good enough to read them into the record in respect of the companies which appear in the tabulation on Page 18, first?

* * * * *

[R. p. 1563] Mr. Condon: May I ask that the document referred to and produced by the witness be marked for identification as Preferred Stockholders' Exhibit No. 34?

The Examiner: Let it be so marked.

(Preferred Stockholders' Exhibit No. 34 is marked for identification.)

Mr. Condon: I have a preliminary question.

By Mr. Condon:

Q. Dr. Badger, with respect to Preferred Stockholders' Exhibit No. 34 for identification, which bears the caption "Standard and Poor's Ratings, five public utility preferreds

used for comparative purposes with Engineers Public Service Company preferreds," could you state for the record, prior to reading the ratings just what type of ratings they purport to be? Are they investment ratings or are they market ratings or what are they?

A. The ratings appearing there in the first column are investment ratings. Those ratings, as I have stated, and as we know, were discontinued early in 1945 and do not appear in any of Standard's statistics services at the present time.

The ratings appearing in the second column are known as current investment ratings, and those are the ratings which are currently published in connection with Standard's statistical service and are currently used by them?

Q. Current investment ratings?

A. Those are current market ratings.

Q. Then correct your statement. You said "current investment ratings."

A. I should have said "current market ratings."

By Mr. Tucker:

Q. What is the difference, Doctor, between a current investment rating and a current market rating? One for the short pull and the other for the long pull?

A. No, sir; I believe that Standard Statistics found their method of investment ratings as applied to preferred stocks to be of little or no value and I believe for that reason they discontinued them.

They substituted in lieu thereof a series of ratings that could be maintained more up-to-date, that were more current, and were used to reflect those factors that give rise to, we will say, value determining factors, in respect to the several preferred stocks.

Q. Are you through?

A. Yes, sir.

Q. Now, Doctor, what do you base that belief on? You said you believed something. Were you informed by some

official of Standard & Poor's that that was the reason that they discontinued the ratings?

A. Yes, sir; I was.

Q. Who gave you that information specifically?

A. That information was contained in a bulletin that was put out by the Home Office of Standard Statistics and was supplied to all of their sub-offices, and I was furnished a copy of that bulletin from the Detroit Office and I have the bulletin right here, as a matter of fact.

Q. Will you let me see the bulletin?

A. Yes, sir.

Mr. Condon: May the record indicate that the witness is handing the bulletin to Mr. Tucker, and I would like the bulletin to be marked for identification as Preferred Stockholders' Exhibit No. 35 for identification.

The Examiner: Let it be so marked.

(Preferred Stockholders' Exhibit No. 35 is marked for identification.)

* * * * *

[R. p. 1567] The Examiner: Hearing no objection, it will be received as Preferred Stockholders' Exhibit No. 35.

(Preferred Stockholders' Exhibit No. 35 is received in evidence.)

* * * * *

[R. p. 1583] The Witness: The next point that I was proposing to refer to dealt with the recomputations of coverage in connection with Pennsylvania Power & Light on the assumption that the same number of shares of 4½ per cent preferred stock had been outstanding in the years 1943 and 1944 as were outstanding after the refinancing of the old several classes of preferred stock in 1945.

By Mr. Condon:

Q. And you are referring to data appearing on page 18 of Preferred Stockholders' Exhibit No. 29?

A. That is correct. Pennsylvania Power & Light computations there are predicated upon the then existing preferred stocks that were outstanding. Early in 1945 the three classes of old preferred stock, to wit, $7 preferred, $6 preferred, and $5 preferred were all called and $44,000,000 par value of $100 par 4½ per cent preferred was substituted in lieu thereof so I made computations to show what the coverage would have been using the then existing earnings but substituting for the years 1943 and 1944 the charges which would ensue from $44,000,000 of $100 par value 4½ per cent preferred stock outstanding.

By Mr. Kanton:

Q. Dr. Badger, in other words, the question I asked you this morning with reference to Pennsylvania Power & Light with reference to whether the $5 cumulative preferred should be exchanged for $4.50 and the callable price at 110 should be changed to 112 stands corrected?

A. Yes, sir.

Q. And those are the only corrections that will appear or need appear under the column going across the chart on page 18 and based on the Pennsylvania Power & Light statistics shown thereon?

A. Well, it might be argued, Mr. Kanton, that since there was a refinancing in 1945 and since the price that we used of 114⅛ is now going to refer to this 4½ per cent preferred stock, which is currently outstanding, that an adjustment should be made on a pro forma basis to show what the charges would have been for the years 1943 and 1944 had that stock been outstanding instead of the three classes of stock that were outstanding.

Q. Would you think, Dr. Badger, that if such changes were made on the basis that you have just indicated any appreciable amount in the average times charges and the preferred dividend coverages would take place?

Mr. Condon: Mr. Kanton, I believe that Dr. Badger has before him the computations to which you have just made.

reference and he can state them for the record if you so desire.

Mr. Kanton: Thank you.

By Mr. Condon:

Q. Will you so do, please, Dr. Badger?

A. If those changes were to be substituted, charges for Pennsylvania Power & Light alone and not for the average of all Penn companies for the year 1943—coverage would be raised for the year 1943 from 1.21 to 1.52 and for the year 1944 coverage would be raised from 1.18 to 1.47.

The preferred dividend coverage alone would be raised from a figure in the year 1943 from 1.52 to 2.93 and in 1944 the figure would be raised from 1.47 to 2.85.

The yield which is shown computed on a 5 per cent preferred stock would be correspondingly reduced from a 4.4 basis to a 3.92 basis.

The average yield for the 10 stocks would be slightly reduced.

The average times preferred and charges covered would be increased very slightly.

The times preferred dividend coverage alone in respect to the averages would be increased slightly.

Those would be the only changes that would be occasioned if the computations previously referred to were made.

By Mr. Kanton:

Q. Now, Dr. Badger, with respect to those changes for Pennsylvania Power & Light and referring back to the last paragraph on page 17 where you state the reasons for selecting a wide list of electric and power company preferred stocks on the basis you stated in said paragraph would you now, in the light of your present testimony of the changes for this company, still consider Pennsylvania Power & Light Company to be a company that could still be used for comparative purposes with the Engineers preferred stocks?

A. I would because on an over-all basis charges would still have been earned by a number of times which would have come within the limits there set forth, to-wit, between 1.25 and 1.75.

The Examiner: Does that clear it up?

All right, Mr. Tucker.

By Mr. Tucker:

Q. Now, Dr. Badger, in making these computations you didn't make any change, did you, due to the fact that a different tax situation would apply to the 4½ than applied to the 5 in the amount of your surtax deduction?

A. No, sir. The change was made without any computation in respect to taxes. I would have been unable to make such a computation.

Q. If you had taken it into consideration, it would have reduced the coverages slightly, wouldn't it, Doctor?

Mr. Condon: I object to that question on the ground that it presupposes a state of facts not in this record. There is not a scintilla of testimony or evidence upon which this witness can answer this question and I state that it is speculative and I object to it. There is no proof of the fundamental or basic facts upon which the question is predicated.

The Examiner: Read the question.

(The question is read.)

Mr. Tucker: The witness has just said, if you please, that he didn't take it into consideration.

Mr. Condon: I state that it is argumentative and it presupposes a state of facts not proven in this proceeding and it is not proper cross-examination. We have no proof before us in this proceeding about the surtax rates of Pennsylvania Power & Light or any such material.

If Mr. Tucker desires to develop that let him establish it but it is not a fact as yet established, if it be a fact.

The Examiner: I think you might ask him, Mr. Tucker, what effect, if any, if he knows, that would have without presupposing that it might not require a reduction in the figures.

Mr. Tucker: All right.

By Mr. Tucker:

Q. I will ask you the question that the Examiner put.

A. From the data that I have available I would be unable to compute the effect that this change might have had retroactively on the tax liability of Pennsylvania Power & Light.

Q. Well, you know that the preferred stock dividends of an operating company are entitled to a certain deduction for surtax purposes, don't you?

A. Yes, sir.

Q. And that is 16 per cent of the dividend, you know that?

A. Yes, sir, that is correct.

Q. Well, that is all you need to have, isn't it, to make this computation?

Mr. Condon: Mr. Examiner, I feel that this is not proper cross-examination. The witness hasn't testified that he used that method or that it should be used.

The Examiner: He is asking if that is all he needs to make that computation.

Mr. Kanton: Excuse me. Mr. Reporter, will you read that question?

(The record was read, as follows:)

"Q. Well, you know that the preferred stock dividends of an operating company are entitled to a certain deduction for surtax purposes, don't you?

"A. Yes, sir.

"Q. And that is 16 per cent of the dividend, you know that?

Ralph E. Badger—Cross Examination (Cont'd)

"A. Yes, sir, that is correct.

"Q. Well, that is all you need to have, isn't it, to make this computation?"

The Witness: I wouldn't say that that was necessarily a correct statement. What more information I might or might not need I am unable to state at this time because I have not before me the tax returns of the company nor their methods of computing taxes nor what proportion of taxes were applicable to excess profits taxes, to normal taxes, or to surtaxes.

By Mr. Tucker:
